[From the Washington Post, Oct. 12, 1969]

FOREST IN WISCONSIN WIRED FOR DOOMSDAY

(By George C. Wilson)

CLAM LAKE, WIS., October 11.—The Navy in the wondrous North Woods just outside this cross-roads of a town is wiring Wisconsin for Doomsday.

The idea—named Project Sanguine—is to bury a backup nuclear "button" in the forest floor in case other communications are knocked out by enemy H-bombs.

If Sanguine goes all the way—it is in the test stage now—the button would be in the form of a huge grid of underground wires covering up to one-third of the State of Wisconsin.

The longest radio waves ever produced by man would be sent out of the grid—a huge underground sending antenna—and reach Polaris submarines hidden in the ocean depths. The Sanguine signal could be the one ordering the subs to fire their missiles.

Many conservationists, biologists and others view the whole project with utter horror. They fear timber will be slashed, trout streams silted and animals and plants hurt or killed by the electric currents which the Navy admits will leak out of the Sanguine system.

The opposition is becoming increasingly vocal. It is similar in tone, though not yet volume, to that which prompted President Nixon to relocate the Safeguard anti-ballistic missile system.

"It's too high a price to pay," Kent D. Schiffert, chairman of the State Committee to Stop Sanguine, said of the Navy insurance scheme for war communication.

Schiffert, a history instructor at Northland College in Ashland, Wis., plans to meet with committee leaders today to see how Sanguine can be blocked in the courts.

Sen. Gaylord Nelson (D.-Wis.), opposing Sanguine from the Washington end, said Congress has never taken a good look at the project to see if it is needed. He has been briefed by the Navy on Sanguine and estimates its eventual cost at $2 billion.

"The Navy admits," Nelson said, "that the network will give off electrical currents that will affect some 26 counties in the North

Country . . . Thousands of miles of Wisconsin farm and forest will be dug up to install some 6,000 miles of cable under the ground over a 25,000-square-mile area . . . There has been no debate in Congress to prove that, even if the system will work, it is a necessary or a justifiable expense."

The Navy, in explaining Sanguine to people in Wisconsin, states that "the purpose of the test facility" at Clam Lake "is not to demonstrate the feasibility or the effectiveness of the communications technique involved. That has already been demonstrated.

"But before such a facility is constructed," the Navy continues, "we are going to show you, not tell you, that the facility will not adversely affect the area." The Navy has built what it calls an "interference mitigation laboratory" to keep electrical currents from Sanguine from disrupting the area.

After the Clam Lake demonstration, the Navy intends to move south to Park Falls, Wis., to conduct more experiments. This will mean more digging and building—regarded as a boon by job hungry residents and a bane by the concerned conservationists. So far, about $27 million of a $50 million set aside for Sanguine has been spent.

Official Navy press releases steer clear of the Doomsday nature of Sanguine. The "fact sheet" on the project states that "Sanguine calls for the development of a single transmitter complex located in the United States that could provide communications with forces deployed worldwide."

The unmentioned fact that Sanguine is another nuclear button comes through clearly only in the explanations given at Sanguine's fenced-in command post here in the breath-takingly beautiful Chequamegon National Forest.

A "POST-ATTACK" CENTER

W. R. Hayford, site manager for RCA, which got the contract to run the test, said in an interview that Sanguine "is a post-attack communications system." He added that the American forces could only receive the signal—not talk back to Sanguine.

To the person standing on the ground over Sanguine's long electrical cables, the setting seems all wrong for a Strangelove system. White birches lean over the 30-foot-wide rights-of-way the Navy has cut through miles of forest. Spruce trees can be heard whispering in the quiet of the forest. And other tree tops are aflame with the reds, golds and oranges of autumn. A ruffed grouse stood a little way down the road pecking up gravel—his form of teeth.

Why here? Why here of all places? It turns out that the military believes upper Wisconsin is the only place in the world where the Sanguine electronic trick can be performed well. The reason is the peculiar properties of the rock shield running underneath the swampy ground of this forest and the rolling farm land outside it.

Called the Laurentian Shield, the rock is about two billion years old and extremely dry. It lies under the upper third of Wisconsin. The dryness means that electrical currents will not move through it easily. The rock acts like a huge insulator. Electrical current in the Sanguine sending antenna, because of this rock insulator, would not be drawn off deep into the earth at those places where the system is grounded. The rock, as Hayford explained it, assures maximum sending power for the giant Sanguine antenna.

To send out an extremely low-frequency radio wave, which is thousands of miles long, the sending antenna itself must also be thousands of miles long—much too big to be put on a ship or plane.

The required length of antenna, the Navy believes, can be achieved through criss-crossing wires over the thousands of square miles of the Laurentian Shield. The resulting signals would go from Wisconsin around the world.

GLOBULAR CAVITY

The cavity formed between the earth and the ionosphere is known as the Schumann cavity after W. O. Schumann, the German scientist who explored its possibilities for radio work. Extremely low-frequency signals going through this cavity, according to scientists, will remain strong as they go around the world. They cannot be jammed.

Also, the longer a radio wave is the deeper it penetrates water. Therefore, a long wave from Sanguine could get down to American Polaris submarines hiding in the ocean depths. They have to come near the surface to communicate now—a real danger in wartime where survival depends on stealth.

Hayford said Sanguine will generate radio signals of 40 to 80 cycles per second—called Hertzes. One unofficial calculation is that a signal of 100 Hertz—a much longer radio wave than any in use today—would penetrate 400 feet into the water.

If that calculation is correct, Sanguine could mean making American Polaris submarines less vulnerable to detection and attack in a war. Their mission is to clobber any nation which attacks the United States first. Sanguine, then, could be linked by its supporters to the credibility of the American deterrent to anyone contemplating nuclear war.

NOT A PRIME TARGET

Looking at that proposition from another angle, an operational Sanguine system (it is not operational at present) could be a target for enemy H-bombs. Navy leaders concede Sanguine could become a target but doubt the spread out system would ever be a prime one. The existing command and control centers for launching American ICBMs are considered prime targets. Weapons leaders long have feared that nuclear effects in a war would black out those systems.

The Sanguine fight at the moment is focused not on such longer-range strategic questions, but on what a vast communication system would do to Wisconsin's countryside.

The Sanguine antenna now in existence consists of two 14-mile-long stretches of wires which intersect at the middle to form a cross. There is a transmitter at the intersection.

If Sanguine went all the way, such crosses would be repeated over and over again until there was a gigantic grid over the Laurentian Shield in upper Wisconsin.

The present test site has the antenna wires strung above the ground on telephone poles. In the next construction phase at Park Falls and thereafter, the sanguine wires will be buried in the ground.

The Navy asserts that the wires will be buried with surgical precision so the land above them can be restored to its former use, including farming. Only "scattered two-acre sites," the Naval Electronic Systems Command states, would be needed for the transmitters.

"There will be no need to denude large areas of forest land or cut wide swaths through the forest," the Navy contends.

BIOLOGICAL EFFECTS

As for how the electrical currents going out from Sanguine will affect animal life and plants, the Navy has awarded a contract to Hazleton Laboratories of Falls Church, Va., to assess such dangers.

Schiffert said "the whole Hazleton contract is a smokescreen to quiet the conservationists." He said Hazleton is too heavily dependent on military work to do an objective analysis and that the study contemplated will not cover enough of the animals and plants in the range of Sanguine's currents.

Lowell Klessig, an environmental science specialist, active in the Stop Sanguine committee, said, "Every biologist knows that the nervous system and other biological processes operate on the principle of internal electrical fields. To put an organism in an external electrical field, such as is proposed by the Navy in Sanguine, may very well alter these processes. . . .

"The electromagnetic field may even influence the guidance system of migratory birds, such as ducks and geese, and cause them to lose or change their fly-way patterns," Klessig said.

The Sanguine test site falls in the congressional district of Rep. Alvin E. O'Konski (R.-Wis.) who sees the project as an economic lift to the area and argues that the Navy should be allowed to complete the phase now under way.

[From Popular Science, Sept. 1969]

ELF: How We'll Broadcast With "Mystery" Radio Waves

(By Kevin V. Brown)

The U.S. Navy is planning to build the world's largest transmitting antenna—a gargantuan, highly electrified underground grid that will sprawl across some 21,000 square miles of northern Wisconsin. The plan, code-named Project Sanguine, is cloaked in secrecy and controversy, yet this much is clear: Sanguine is a tremendous breakthrough in communications.

It will use Extremely Low Frequency (ELF) radio waves never before tapped to provide global coverage from a single source, enabling the Navy to send unjammable signals to ships, planes, and shore stations without relays. And for the first time, nuclear subs in hundreds of feet of water will not have to surface to receive messages.

Although many details of Sanguine's design are secret, enough is known to have aroused the fears and protests of some Wisconsinites. They claim Sanguine will mean the uprooting and electrifying of a third of the state, resulting in the loss of wildlife and forest land, disruption of telephone service—even danger to human beings.

What is the truth about Sanguine? How will it work? Why should a Navy communications system be set in the middle of the country? What perils does it pose?

Much utterly fallacious information has appeared in the popular press—even in some technical journals. Here, as far as we have been able to determine, are the facts.

The story of Sanguine begins during World War I, when German agents tried to intercept telephone conversations between French army commanders by sticking electrodes in the ground. The noise they encountered was so great that electronics experts were called in to identify and eliminate the source of the mysterious interference.

The noises were identified easily enough as being generated by electrical storms, some very distant. But almost accidentally, the investigators discovered a strange phenomenon. The low-frequency noise had a peculiarly strong resonance—an energy peak—at seven Hz (cycles per second). But the German experts thought this an interesting curiosity without practical value, and turned to other things.

No one could blame them. Communications scientists were then experimenting with higher and higher frequencies. The higher the frequency, the shorter the wavelength (and vice versa). And the size of the transmitting antenna varies directly with the wavelength. So higher frequencies brought the payoff smaller antennas. To produce ELF waves, the longest of all radio waves, would require the largest antenna ever conceived.

There was also the question of attenuation—loss of signal power with distance traveled. Experiments had revealed that the frequency least attenuated was around 10,000 Hz. Below that frequency, the attenuation curve started back up sharply. No one bothered checking it below 3,000 Hz because it

seemed logical that attenuation would keep on increasing as the frequency dropped.

No wonder then, that interest in the ELF resonance phenomenon lay dormant for decades.

Then along came W. O. Schumann. An eminent German scientist, Schumann conducted in the physics of the atmosphere, and came to a remarkable conclusion:

The earth and the ionosphere formed the boundaries of a spherical resonant cavity, with a fundamental resonant frequency of about seven Hz. The earth is nearly 25,000 miles around. Radio waves, which travel at some 186,000 miles a second, would therefore travel around the earth in this cavity seven times per second. If the waves had a matching frequency—seven Hz—and were broadcast from a single source, they would round the earth and meet exactly in phase. The result: a reinforcement, or resonance.

Schumann published the results of his findings in a series of scientific papers beginning in 1952. Other scientists picked up the cue and expanded Schumann's original findings. Among other things, they established that the Schumann cavity had a series of resonances beginning at seven Hz and continuing in increments of six or seven.

They also finished plotting the attenuation curve and found that it did not go up indefinitely below 3,000 Hz, but, in fact, turned down again and headed back toward zero with lower frequencies. Below 100 Hz, they learned, the attenuation would be almost negligible, even better than above 10,000 Hz!

In other words, frequencies below 100 Hz could be used to signal around the world, using the Schumann cavity, with almost no attenuation.

BIG ANTENNA A PROBLEM

Even so, many scientists were still skeptical about ELF. One of them concluded pessimistically, "Unfortunately for communication applications, the problem of building a large enough transmission antenna appears insurmountable." To be efficient, an antenna must at least approach in size the wavelength it is to transmit. ELF waves are thousands of miles long.

The U.S. Navy was not so pessimistic. For ELF could yield not only a one-source global communications system, but also the ability to signal nuclear submarines underwater. The reason is that the lower the frequency, the deeper in water a radio signal will go. At 10,000 Hz, the signal delves only about 40 feet beneath the surface. But at 100 Hz, the depth is 400 feet, and seven Hz, 1,500 feet! The ability of a sub to receive information without having to surface is obviously of vital strategic importance.

So, about 10 years ago, the Navy and some of its civilian contractors, notably RCA and Westinghouse, went to work on the problem of building an antenna big enough for ELF. And someone, somewhere, came up with an ingenious idea, which led to Project Sanguine being sited in Wisconsin.

THE IDEA?

Take advantage of the fact that much of northern Wisconsin sits on a huge chunk of some of the oldest rock in the world.

This rock, the tip of a much larger formation called the Laurentian Shield, is more than two billion years old. It is therefore extremely dry. This gives it the lowest conductivity of any rock on earth.

What has all this to do with Sanguine?

Suppose you form an antenna from a wire by passing current through it and grounding it at both ends. The electricity seeks to complete a circuit by returning from one end of the wire to the other through the ground. How far this current actually penetrates the earth is called the *skin depth*. The lower the conductivity, the deeper the current penetrates. In moist earth, the current travels practically at the surface. But in the bone-dry bedrock of the Laurentian Shield, the skin depth can be 10 to 20 miles! And if your wire is a cable 100 miles long, the result is a whopper of a loop antenna.

Let's carry the thought process of our ingenious antenna designer a bit further. A 100-by-20-mile loop antenna is impressive, but it would be a lot more effective if it had many turns. Because the ground is common, the turns can't be connected in series. But they can be parallel-connected, by crisscrossing the cables.

And here again, the vast extent of the ancient rock plays its role. If the Navy utilizes all of it, they will form a grid 150 miles wide and 140 miles long, covering almost the upper third of Wisconsin. Cables would intersect at six-mile intervals, with a transmitter at each intersection—perhaps 240 in all. The cables would be buried about six feet underground, not, as some journalists have suggested to transmit signals through the earth, but simply to get the wires out of harm's way.

Result? The enormous mesh of cable grounded in an enormous expanse of ancient rock add up to Sanguine—largest antenna ever designed.

To some residents of Wisconsin, however, Sanguine is not an exciting scientific success story, but a threat. They are wondering what it might do to them, their land, and their wildlife after it has been installed.

PROBLEMS TO BE SOLVED

The Navy admits that some problems might arise in a venture of such tremendous scale. But they emphasize that the problems are basically no different, except in extent, from those encountered (and solved) by civilian power and utility companies. If it appears from preliminary tests that they cannot be overcome, the Navy insists, Project Sanguine will simply not be built.

This is the Navy's schedule. It has already built one transmitting antenna, two crisscrossed cables of about 14 miles each, near Clam Lake, Wis., in the Chequamegon National Forest—federally owned land. The cables are strung on poles above ground with a transmitting station at the intersection. This complex will be used for a test program "to develop and perfect techniques and devices for reducing induced electrical interference to noninterference levels."

If this initial test is successful, the Navy will move on to the next phase, burying more and longer cables in the ground near Park Falls, Wis., southeast of Clam Lake, and conducting still more tests. If the Navy is convinced they have solved all the problems, it will go ahead and build the whole system. Although the Navy won't say how much current will flow through the final system, the cables in the interference tests will handle a hefty jolt of several hundred amperes. In previous pilot tests in another states, the large currents electrified fences, rang telephone bells, disrupted communications, and generally gave people the willies.

Here are some of the problems the Navy will consider, from the top down:

AIR NAVIGATION

Will Sanguine interfere with existing air navigation facilities? Very unlikely; most of them operate in much higher frequency ranges.

POWER LINES

Here, Sanguine is definitely a problem. The ELF signals of Sanguine—below 100 Hz—could induce currents that would play hob with 60-Hz household electricity. Results might be flickering lights, TV picture hash, tripping circuit breakers. The solution is to convert to balanced power lines, which are much less susceptible to induced currents than unbalanced ones.

TELEPHONE LINES

The currents that ring the telephone usually operate below 100 Hz; those that carry voice transmissions operate roughly from 200 Hz to 3,000 Hz. Induced currents could ring the telephones when no one was calling, and cause buzzing and other noise to interfere with conversation.

The solution is one the Bell Telephone system has been using for years to rid its lines of unwanted current—installing neutralizing transformers.

RAILROAD SIGNALS

Induced currents could turn signals on when no trains were coming or going, or turn the wrong ones on when they were. Fortunately, railroads in the Sanguine area use mostly balanced circuits already, so would not have to be changed to protect them.

METAL FENCES

If a metal fence, with metal poles stuck in the ground, runs for any length—say a mile or more—parallel to a power line, it can carry an induced current, and may be dangerous.

The Navy will ask permission of the owner of any such fence to chop it into shorter segments, then hook it together again with insulating materials, cutting the closed loop.

ANIMAL AND PLANT LIFE

Could underground currents endanger plants and animals? The Navy will explore Sanguine's possible biological hazards, using plants and animals native to the area.

CONSERVATION

Will the very act of installing Sanguine destroy the natural beauty of the area? Sanguine is in the heart of Wisconsin's northwoods, a popular tourist area. Many residents worry that all the digging will tear up the scenery, erode the soil, and sully the many attractive lakes and streams.

The Navy replies that it will use digging methods successfully employed by the utilities. The cables will be buried in trenches, then covered over immediately; the only thing to show above ground will be the transmitter buildings.

CABLE TELEVISION

CATV, or cable television, uses a master antenna for a whole community, and feeds TV signals to homes of subscribers via cables susceptible to induced currents.

The solution appears simple. CATV systems employ booster amplifiers at various intervals. Interrupting the outer shield of the coaxial cable with capacitor couplings at the amplifier stations, would break up the closed loops.

The Navy is confident it can overcome these hurdles, and has planned to spend the next four years running tests to prove it. Then, and only then, will the world's largest antenna be buried, and come to life.

NATIONAL BUSINESS WOMEN'S WEEK

Mr. PEARSON. Mr. President, this week, October 19 through October 25, the 3,800 business and professional women's clubs of our Nation are observing National Business Women's Week. In my State of Kansas, there are 129 such clubs with a total membership of 6,271 business and professional women, as of June 30, 1969.

The yearly tribute, first observed in 1928, spotlights the responsibilities and achievements of women in business and the professions. It gives the individual clubs and State federations an opportunity to focus the attention of their communities on the tremendous contribution made by women in all phases of economic, social, cultural, business, and professional life.

The National Federation of Business and Professional Women's Clubs, Inc., was founded in 1919 as an outgrowth of

the previous year's meeting of the War Work Council of the YWCA. Desiring to adopt a broader peacetime program, the federation was incorporated in 1921. Its headquarters are at 2012 Massachusetts Avenue, NW., Washington, D.C. Today, the national federation has a membership over 180,000 women, and membership is open to all women who are actively engaged in business or the professions, upon invitation from a local club.

The national federation is a nonprofit, nonsectarian, nonpartisan association which has as its stated objectives the following:

To elevate the standards for women in business and in the professions.

To promote the interests of business and professional women.

To bring about a spirit of cooperation among business and professional women of the United States.

To extend opportunities to business and professional women through education along lines of industrial, scientific, and vocational activities.

During the past summer, the golden anniversary convention of the national federation was held in St. Louis, Mo. This, of course, was an occasion to look back upon what the NFBPW was at its beginning 50 years ago. I quote from one of the speakers at this golden anniversary convention:

When the opening (1919) meeting was over, we did not have a single club that had joined this Federation, Not one cent in the treasury, nor any assured source to obtain it.

Immediately the success of this new venture by business women throughout the country was evident. When we look at what they accomplished in 1 short year before their second meeting in 1920, there is no reason to be amazed at what they have accomplished in 50 years. Again, I quote:

By our second (1920) convention, we had overshot a goal of 100 clubs—bringing in 287 in 47 States; 28 State Federations; an executive office, a monthly magazine.

Although I shall not take time to read this long and impressive list of legislative proposals sponsored—and, in most cases, successfully sponsored—by the NFBPW over the past 50 years, I ask unanimous consent that it be printed at this point in the RECORD.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

Year 1919–20: Successfully endorsed permanent establishment of Women's Bureau, continuation Children's Bureau; creation Federal Employment Service.

Year 1921: Successfully supported the Sheppard-Towner Act giving funds for maternal and child welfare and the Cable Act (and amendment till 1934) granting married women citizenship status independent of their husbands.

Year 1923: Supported the amendment to the Smith-Hughes Act placing Home Economics in vocational training which passed as well as the Bell Act creating the National Federal Department of Social Hygiene. Also sponsored the first legislative tax bill ever introduced in Congress by women—to increase personal exemption for single persons—still on the agenda today. Began long and dedicated support for federal aid to education without federal control (goal more than achieved in legislation aiding education since 1958). Endorsed Child Labor Amendment to protect children—failed to pass in the states but gradually enacted by most states and the federal government in other laws.

Year 1937: Secured repeal of a section of the National Economy Act which provided in labor reductions for dismissal of an employed wife (govt.) of a government employee. Sponsored Equal Rights Amendment. Urges states to work for equal jury rights for men and women.

Year 1940: Urged amendment (later achieved) of social security laws to provide for dependent widowers and children under 18.

Year 1942: Began urging legislation to permit women jurors to serve on federal courts (fully achieved 16 years later—Federal Jury Selection Act).

Year 1944: Successfully supported legislation to establish the Women's Armed Services on a permanent basis with the same rank and pay as men. (The final step was achieved in 1967 when President Johnson signed bill giving women in the armed services equal opportunity promotion).

Year 1950: Allowance of an income tax reduction to an employed person for costs of care of dependent because of said employment (now part of the Internal Revenue Code).

Year 1956: Successfully supported the double income tax exemption for taxpayers over 65 and blind. Opposed lower retirement age for women. This passed, but in 1961 men were enabled to take the lower age of 62 also.

Year 1963: Support for equal pay for equal work goes back to 1920. Since the 1940's it had been a special legislative effort. Passed in 1963.

Years 1963–67: Originated the idea for and helped organize State Status of Women Commission. All 50 States plus the District of Columbia, the Virgin Islands, Puerto Rico and two municipalities had created these special groups to study problems of women by late 1967.

Year 1964: The Civil Rights Act of that year contained a Title VII which prohibits employment discrimination of all kinds, including sex. The Equal Employment Opportunity Commission was set up to enforce this provision.

Year 1965: Section 165 of the Revised Statutes, allowing discrimination against women in government positions, was repealed after strenuous efforts by BPW.

Year 1967: Women in Armed Services bill (See 1944). BPW urged and succeeded in getting the word "sex" added to the discriminations prohibited by the Federal Government when President Johnson issued Executive Order 11375 prohibiting discrimination against women in government or by government contractors. The Office of Federal Contract Compliance oversees compliance with this order by all the agencies of the government. Civil Service Commission required each agency to establish "a positive, continuing program to develop and promote equal opportunity without regard to sex."

Year 1968: BPW's much desired legislative goal was achieved with passage of the Federal Jury Selection and Service Act of 1968, requiring selection of federal jurors without consideration to race, color, religion, sex, etc.

Mr. PEARSON. Mr. President, I will make one other point: To remind all of my colleagues on both sides of the Senate aisle that, if they ever doubt the contribution that women have made and are making to the business and professional world of this country, then take a few moments to reflect on just where they would be in carrying out their duties as Senators of their respective States without them.

Woman power has long been a very precious and necessary commodity in political campaigns. And no congressional office could be run without the skills and talents of the women employed in them. In fact, it has often been said in the public service field that one should never send a boy on a man's errand, he should send a woman.

So, it gives me great pleasure to salute today the National Federation of Business and Professional Women during National Business Women's Week and to include in that salute all other women throughout the country who are making contributions to the world of business by their inclusion in the work force of this Nation.

THE BIG THICKET IS DISAPPEARING: A NATIONAL PARK NEEDED NOW

Mr. YARBOROUGH. Mr. President, the ADA World for October contains a penetrating article on the crisis confronting one of this Nation's last great wilderness areas—the Big Thicket of southeast Texas.

At one time the Big Thicket extended over 3.5 million acres. Today, however, the Big Thicket has been reduced to 300,000 acres by the operators of the lumber and real estate industries. Unless something is done soon to stop the exploitation of the Big Thicket, this beautiful and unique wilderness will be lost forever.

To save the Big Thicket, I have introduced S. 4, which would create a 100,000-acre Big Thicket National Park. This bill has gained wide support from civic and conservation groups throughout the United States. If, however, this natural wonderland is to be preserved, we must act now.

Mr. President, I ask unanimous consent that the article entitled "The Big Thicket: A Chronicle of Destruction," written by Pete Gunter, and published in the October 1969, issue of ADA World be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE BIG THICKET: A CHRONICLE OF DESTRUCTION

(By Pete Gunter)

(NOTE.—Pete Gunter, for several years on the faculty of the University of Tennessee, this year joined North Texas State University as chairman of the department of philosophy. A long-time conservationist, he has contributed several articles on the Big Thicket of Texas to the Texas Observer, from which this Chronicle is reprinted with permission.)

Once upon a time the Big Thicket sprawled in a rough triangle from Beaumont, Texas, north almost to Shreveport and west to near Houston, encompassing three and one-half million acres of lushly vegetated, varied terrain, from piney hills and trout-filled creeks in the north to cane brakes, cypress swamps, palmetto jungles in the south. Within its dim, vine-laced recesses bear and panther foraged, squatters, Indians and escaped prisoners lived isolated, forgotten lives. As late as 1938, though the *Big Thicket Biological Survey* could lament that the region had shrunk to a million acres, these conditions still persisted, essentially unchanged. Today, scarcely 30 years later, only 300,000 acres of the original Thicket remain, and within this

remainder only isolated pockets of untouched wilderness can be found. In his *Farewell to Texas* William O. Douglas warns that the Thicket is being depleted at the rate of 50 acres a day.

Though only a fragment of the original wilderness remains, there can be no doubt that this fragment possesses natural features of great value. The Thicket contains ten of the world's largest trees in their species, as well as Texas' last sizeable stand of first-grown pines. It is the last known haunt of the rare ivory-billed woodpecker, and the nesting-ground of a remarkable variety of water birds. Botanists, taxonomists, ecologists journey there regularly for research into its unusual combination of eastern and western, subtropical and temperate vegetation. Its potential as a lure for the tourist dollar is unlimited. And its beauty is unique, and haunting. One would think, therefore, that Texans would leap to the defense of such a natural asset. What follows, however, is a chronicle of destruction.

Apparently there is an effort being made—by lumber and real estate interests, mostly—to destroy the Thicket's value as a natural treasure and, thereby, discourage government preservation which would remove several tens of thousands of acres from potential private exploitation.

It has not been many years since an East Texas lumber executive was heard to snap: "The Big Thicket? The way we're going, in four years there won't be any Big Thicket." Cutting schedules were subsequently accelerated, and extended into once untouched areas. Hardwood trees were sprayed to make room for pulp-producing pines; magnolia trees were hunted down and turned into railroad ties. In one wilderness area hundreds of acres of first-growth timber were levelled and replaced by cottonwoods. The lumber company involved explained that this was an "experiment" structured so as to produce "abundant" pulpwood. The experiment, most authorities agree, has "failed."

The tactics of local lumber companies may, for all I know, be hailed as a glowing tribute to the spirit of free enterprise. No economic dogma I am aware of, however, is being used to justify recent acts of outright vandalism against the Thicket. In one instance a heron rookery was sprayed with insecticides from an airplane. Lance Rosier of Saratoga (affectionately known as Mr. Big Thicket for his espousal of conservation in the area) explored the site the next morning, discovering more than 200 dead water birds in an area of less than two acres. Not long afterward a thousand-year-old magnolia, judged to be the oldest and largest in North America, was found dead, drilled in nine places and poisoned with arsenate of lead.

Still more recently, Lance, escorting a *Wall Street Journal* reporter through the rugged back country, discovered dead water birds and discarded shotgun shells in an isolated woodland pond. Was this a common thing, the reporter asked? Lance replied vehemently that it was another example of people trying to destroy the Thicket before it could be saved.

One thing is certain; no plot however efficient, could have succeeded in depleting the natural resources of the Thicket faster than the actual course of events over the last decade.

Conservationists, of course, have not been ignorant of these developments. It is largely their cries of alarm which have brought the Big Thicket Association into existence and created public awareness of both the area's value and its rapid diminution. It was their efforts which, in the summer of 1967, brought the Department of the Interior at last to make definite recommendations for a national park. In its recommendation the Department of the Interior singled out areas (totaling 35,000 acres) for special protection:

	Acres
1. Big Thicket Profile Unit	18,180
2. Beech Creek Unit	6,100
3. Neches Bottom Unit	3,040
4. Tanner Bayou Unit	4,800
5. Beaumont Unit	1,700
6. Little Cypress Creek Unit	860
7. Hickory Creek Savannah	220
8. Loblolly Unit	550
9. Clear Fork Bog	50

Though 35,000 acres may seem like a minute portion of the original Thicket, conservationists breathed more easily once these recommendations were made public. At last the pillage of nature was ended. Wasn't it?

The ink was scarcely dry on the park proposal, however, before one obliging investor had arranged to obliterate the Beech Creek Unit, which contained one of the last stands of virgin beech forest in Texas. Protests and accusations, pleas and blandishments proved futile; beech trees fell, amid the virtually total silence of the press.

Not long afterward the Loblolly Unit, a stand of 400-year-old pines which has escaped cutting through its involvement in a series of litigations dating from 1904, was nearly lost. Only the nearly frantic efforts of the Big Thicket Association and the remarkably public-minded decision of the Temple Lumber Company to hold back cutting schedules, saved the big pines from extinction. This salvation, however, like many another one might mention, is only temporary. There is no guarantee that cutting can be put off indefinitely.

Of the many segments of the proposed park, the Big Thicket Profile Unit is by far the most inclusive and, to my mind, the most interesting. Beginning in the rolling piney hills near the Alabama-Coushatta Indian reservation, it descends gradually along Pine Island Bayou past cypress swamps and sandy savannahs, taking in almost every kind of topography and plant life in the region. But the Profile Unit, too, is being dismantled. In this case the benefactor is a real estate developer whose Hoop 'n' Holler Estates is carved out of 640 acres chosen for protection for its unique botanical value.

In spite of long-term abuses of lumber companies, and of new threats posed by new vacation subdivisions (of which Hoop 'n' Holler is but one among many), in spite even of the immense weight of public apathy, something may still be done to save the Big Thicket. In the last two years every major conservationist organization in the United States has come out in favor of conserving the remaining wilderness. Emboldened by this support, Sen. Ralph Yarborough is nursing a Big Thicket bill in the Senate. The senator will need all the help he can get in order to succeed.

In the meantime, conservationists have chosen the present moment for a divisive, bitter wrangle over just how large the proposed park should be. The Lone Star chapter of the Sierra Club, backed by nearly a dozen national and regional conservationist organizations, proposes a "large" park of 100,000 acres. On this recommendation, the Profile Unit would be broadened and extended southeast to the Neches River (near Beaumont); a Village Creek Unit would be added; the Neches Bottom Unit would be significantly enlarged; a new area southeast of Saratoga would be annexed; and, finally, all major units would be connected by "corridors" one-half-mile wide. To this and similar proposals Dempsie Heneley (president of the Big Thicket Association) replied with exasperation:

"Ten to fifteen years ago, I myself would have been pushing as hard as anyone for as much as 100,000 acres for the park. However, the Thicket is no longer in such a wilderness state that this can be done. The Thicket has been cut to the extent that we will be doing good if we can get 45,000 acres."

If conservationists insist now that the "whole Thicket be locked up," Heneley insists, Texas will be the loser, for the Big Thicket in its entirety will be lost.

I am in no position to decide which proposal is politically feasible, or ecologically justifiable. One thing, at least, is clear: the Big Thicket continues to shrink, piece by piece, three by tree, lot by lot, "estate" by "estate." Texas' last wilderness is up for grabs. Perhaps, one might suggest—ever so delicately—something really should be done.

ARTHUR C. DECK REPORTS ON SOVIET UNION

Mr. BENNETT. Mr. President, recently, 10 American newspaper editors were given the opportunity to tour the Soviet Union. A member of that group was the very distinguished and successful executive editor of the Salt Lake Tribune, Mr. Arthur C. Deck. Upon his return to Salt Lake City, he wrote a series of six very informative, penetrating, and interesting articles on Russia, its people, and its government.

This has been very helpful to the people of Utah in understanding what Winston Churchill once described as an enigma wrapped in a mystery.

I ask unanimous consent that Mr. Deck's excellent reports be printed in the RECORD so that they can gain the wide distribution they deserve.

There being no objection, the reports were ordered to be printed in the RECORD, as follows:

[From the Salt Lake (Utah) Tribune, Sept. 28, 1969]

PERSPECTIVES ON A SOVIET ODYSSEY—I: RUSSIA A VAST LAND OF CONTRADICTIONS

(By Arthur C. Deck)

After three tortuous weeks of travel in the Soviet Union covering more than 8,000 miles it is difficult to capsulize one's impressions of that vast country, but some things that come through loud and clear:

Russians are friendly—they fiercely want to be friends of Americans—but there always is that subtle undercurrent of distrust.

They are determined that there never will be a repetition of World War II. "We must be strong—we will never let that happen again," is a refrain that is repeated over and over.

They are an extremely proud people and constantly point out that what they have accomplished has been done in 50 years with most of their achievements coming in the last 25 years after the terrible destruction of many of their cities during the war.

CONFIDENT OF CATCHING UP

There is frank admission by some of their top ranking officials about their lag in adequate housing, consumer goods, automobiles and the like, but they have great confidence that they will catch up before too long.

In short, Russia is a pregnant giantess, terribly distressed by labor pains which have caused her to be somewhat slovenly in some of her housekeeping chores in her desperate effort to become a modern nation.

Our three weeks in Russia was arranged under the cultural exchange agreement between the United States and the Soviet Union. Negotiations were undertaken last January with the first cautious steps taken by the United States State Department and the Soviet Foreign office. The exchange proposal came from the Soviet Union of Journalists, which acted as our hosts.

DELEGATION OF 10 EDITORS

Our delegation consisted of 10 editors composed of officers and some directors of the American Society of Newspaper Editors

and one photographer. A similar delegation of Soviet journalists is scheduled to visit the United States in October. Each group pays its own expenses.

None of us knew what our itinerary within Russia would be until we arrived in Moscow, and our anticipation of what life would be like within a closed society was overwhelming. Especially was it so for me. All of the others arrived in Moscow as a group but because of a family wedding it was necessary for me to get there a day late. I had been told I would be met at the Sheremetievo airport, one of four huge airports outside Moscow, but I had no idea who it would be or how the meeting would be accomplished.

CROWDED WAITING ROOM

It turned out that four large planes landed at the same time, disgorging about 400 people into a small and very hot waiting room. There we began to queue up for passport inspection—a long and tiring procedure in Russia.

I was prepared for a delay of several hours when I heard my name being shouted. Then came one of the miracles of a controlled society. When I raised my hand, I was hustled out of the line, pushed in front of all of the other bewildered tourists, hurried through passport formalities and turned over to my greeter, one Victor Afanasiev, a representative of the union of journalists. Victor had a small leather card in his hand with which, somehow he worked his miracles. He flashed the card and we were whisked through customs without the slightest look at my luggage. He flashed it again, and a large black limousine pulled up. In short order we negotiated the 40-odd miles to the hotel where a sumptuous dinner was laid out for me. (The rest of the party had departed for the theater.)

Such experiences were to become common during the ensuing weeks of the tour which took us from Moscow, north to Leningrad, to Minsk in Byelorussia, far west to Novosibirsk in Siberia, down to Alma Ata in Kazhakstan, 200 miles from the Red Chinese border, and to Sochi, the warm resort area in the south on the Black Sea.

Before the trip we had hoped to be able to see areas of Russia off the usual tourist route, but this was not to be. And while we were housed in the best hotels, given the best food and showered with vodka we were politely but firmly told that we would be unable to get to such places as the cosmonauts' launching site—"even Borman could not go there," they said—and our hosts were completely deaf when we suggested that we be taken closer to the border with Red China.

DIVIDED INTO 2 GROUPS

After Leningrad, our group was divided in two, with five visiting the aforementioned cities and five going to Kiev, Irkutsk, and Tiblisi. We had interpreters, one of whom was the miracle man Victor, and another attached to Radio Moscow who spoke American so well he convulsed us with off-color American jokes.

Everywhere we were free to talk with government leaders, newspaper editors, people in industry and science and even with the people in the streets, department stores, subways or on the bench. The language barrier, of course, made it difficult to converse without an interpreter, but nowhere was there a feeling that our conversations were not being translated correctly. Strangely enough, none of us ever had a feeling that we were under surveillance, but knowledgeable Western newspapermen in Moscow advised us that for all our feelings it was a safe bet that our hotel rooms were bugged and that we were being watched constantly.

RED CARPET OUT EVERYWHERE

Apparently Moscow had spoken loudly when the itinerary was approved because everywhere we went the red carpet was out. Although we were always being told of the classless society, we usually ended up in the first class sections of airplanes and were always moved to the front of queues that are to be found anywhere. And all this without the slightest protest from the Russians who were being pushed aside.

Our hotel rooms were comfortable and mostly clean, although it is hard to dry adequately on a bath towel that is no larger than a table napkin and made of somewhat the same cloth. And one never knows whether the elevators will work or whether water will flow from the bathroom plumbing. But the radio which is in every hotel room (tuned to Radio Moscow) and the television set which is in most hotel rooms are always in top working order.

These are just a few of the many contradictions a visitor finds in Russia.

[From the Salt Lake (Utah) Tribune, Sept. 29, 1969]

PERSPECTIVES ON A SOVIET ODYSSEY—II: ULTRA-MODERN, PRIMITIVE STAND CHEEK-BY-JOWL IN RUSSIA

(By Arthur C. Deck)

Not far from the center of Moscow is an imposing, 100-meter-high monument to space exploration.

It is a magnificent sculpture, executed in titanium, set on a pedestal of polished granite and topped by a rocket which gleams bright in the sun.

Behind it is a phalanx of buildings comprising the USSR Economic Achievement Exhibition, a permanent industrial fair. One building is devoted to the Soviet achievements in space, complete with mockups of space vehicles and animated miniatures. Another has miniatures of the great power dams that are being built throughout the country, with detailed, illuminated maps showing the extensive power grids designed to supply industry.

EXQUISITE DETAIL

Another has displays of miniatures of all forms of transportation—air, rail, water—all in exquisite detail. Still another pictures the developments of the nation's farm program with emphasis on mechanization and use of the virgin lands in the far West. There are others devoted to medical research, electronic and scientific developments.

The grounds of the exhibition are teeming with Russians of all ages and with tourists, mainly from countries of the Soviet bloc. The exhibition is open year round and is an excellent maneuver in interior propaganda. The space exhibit, for example, is far superior to anything we have at Cape Kennedy or Houston.

But when a visitor leaves the exhibition grounds and walks along the broad streets he is again awed by the amazing contradictions of Soviet life. Within a block he will see a couple of small, old ladies emerging from a sewer manhole where they have been cleaning an accumulation of debris. He will see other women sweeping the streets with something less than primitive brooms.

STARTLING CONTRASTS

These contrasts exist everywhere. Russian technology has produced marvelous things, to be sure. They have modern, mechanical street sweepers and flushing trucks which nightly patrol the streets of all cities, keeping them so clean one is embarrassed if he forgetfully drops a cigarette stub or a gum wrapper. You soon learn to look for one of the litter barrels, of which there are many.

Russian officials maintain there is no unemployment; but there is tremendous underemployment, and to achieve the fiction that everyone works there is gross featherbedding and makework activities. Lack of motivation on the part of workers is readily admitted by some of the top officials, who maintain they are working to correct this deficiency. How is not readily spelled out.

But the gap between technology and services is tremendous, with no apparent effort to eliminate it.

CRAMPED INTERIORS

The airports around Russia are filled with marvelous flying equipment. Jet planes fly faster than those in the United States. The pilots are apparently well trained and efficient. All of the planes we rode in were either modern jets or turbo jets. The interiors of planes that fly only to Russian cities leave much to be desired, however. Seating is cramped and everything from suitcases to watermelons is piled on the overhead baggage racks.

Once in the air you're almost certain to get where you've set out for, but the big problem is that you never know when the plane will take off. On one occasion, our party spent 16 hours in one of the Moscow airports waiting for a plane that had been scheduled for the flight two days before.

Baggage handling is atrocious. Instead of baggage trucks, porters often carry two bags at a time to the planeside.

NO BAG TRUCKS

The waiting rooms in both airports and railroad stations are deplorable. Whole families sprawl on the floors eating and sleeping and waiting for ever-delayed departures. The stench in the public washrooms is beyond description. On the other hand, the Intourist waiting rooms and wash rooms are clean and comfortable, but ordinary Russians are not permitted in them—only international travelers.

Other things Americans take for granted further accent the contradictions of life in Russia. At a hotel in Minsk one of our group discovered the key girl on his floor did not have a key to his room. No other was available and apparently there was no master key. It was an hour to plane time.

HOTEL SNAFU

After much shouting among the hotel personnel, the chambermaid undertook to break the door with several hefty punches from her backside. (She was modest and insisted we look the other way while she went through her gyrations.) The door would not give, however, and just before the missing key was found, the hotel manager came running through the corridor with a large fire ax. He intended to batter the door down to gain entrance.

Another member of the group turned up one day without hot water in either his basin or his bathtub. He discovered, however, that steaming hot water was flowing in the toilet.

Such mundane things as getting laundry and cleaning done turn out to be traumatizing. Send a suit out for cleaning and it is likely to be returned with more spots on it than before. Shirts sent out for laundering are often returned looking as though they had been ironed with a lawnmower.

DIRECT DIAL

Since there are no central switchboards in hotels, all calls must be dialed directly to the room, and often one's sleep is interrupted by violent ringing several times during the night. The caller usually spouts something in Russian and then hangs up.

To shave in some hotel bathrooms is an exercise in gymnastics. The mirrors are placed so that a tall man must almost kneel and the bathroom light (at most 25 watts) is frequently on the opposite wall.

While our service in restaurants was superb, ordinary travelers on the Intourist circuit usually complained about the long delays in being served. A waiter may not arrive for half an hour and two hours later the food may show up.

GOODS SHODDY

There is an abundance of consumer goods and clothes available in department stores, but most of it is shoddy. Better merchandise can be found in the so-called "dollar stores" which are everywhere. These foreign currency stores accept no Russian money, but while the merchandise is better than in the stores Russians must patronize, it is also expensive.

One exception is American cigarettes which may be purchased for around $3 a carton.

Again, however, the problem is to get service. Usually there is one person in a dollar store who can speak English. After making a purchase you take a slip to the cashier who totes up the amount on an abacus (although she usually has an electric adding machine at her elbow). Then you go back to the original clerk, if you can find her, and retrieve your purchase.

One finally wonders if the gap between 20th century Russian technology and the ordinary living that Americans take for granted can ever be closed.

[From the Salt Lake (Utah) Tribune, Sept. 30, 1969]

PERSPECTIVES ON A SOVIET ODYSSEY—III: HOUSING, LIVING CONDITIONS IMPROVE FOR TODAY'S RUSSIAN WORKER

(By Arthur C. Deck)

Despite a lack of many ordinary conveniences which Americans are accustomed to take for granted it would be grossly unfair to infer that Russians are not working tooth and nail to improve and excel.

After three weeks and thousands of miles in that vast land, 10 American newspaper editors agreed that the USSR has not stood still in the last 10 years.

Three in our group had been to Russia before. One traveled in western Russia 10 years ago; another had been to Moscow and Leningrad in the early sixties. Another was there in 1966.

The Tribunes' editorial page editor, Theodore W. Long, made an extensive 39-day tour in 1960 through much of the same territory our group covered in three weeks.

GENERAL IMPROVEMENT

The assessment of our associates was that great strides had been made and a rereading of Mr. Long's articles published after his visit indicate that while many of the same problems exist, there is great improvement: food is abundant and good; more consumer goods are available; women appear to be more chic in clothing, hair styles and figures.

Automobiles, of course, are in short supply. Only 300,000 cars a year are being turned out in Russia at present and it is possible for the average Russian to wait two years before he can get one.

The jovial deputy premier of the USSR, Nikolai Baybakov, who also is in charge of national planning, is very optimistic about the future. He foresees a housing shortage for at least another 15 years. He is concerned about the sameness of apartment design and says this will all be changed in the next five years.

TO BOOST OUTPUT

Although Russia turns out only 300,000 passenger cars and 500,000 trucks per year now, Baybakov says that an arrangement with the Italian Fiat company will increase this to more than 600,000 cars next year with 2 million per year set as the goal in five years.

He recognizes that with an increase in automobiles will come traffic problems and has projected plans for a mammoth road building and improvement program.

One of our colleagues remembered that as recently as 1966 there were only three good women's wear shops on Gorky Street, Moscow's main shopping area. Now there are about a dozen.

READILY AVAILABLE

Transistor radios, refrigerators, vacuum cleaners, electric fans and other household items are readily available in stores but the metal products do not match their American counterparts either in design or composition.

Russian officials are not reluctant to admit there is still a tremendous housing shortage, but in all cities that we visited there is a virtual forest of cranes used for erecting apartment buildings. For the most part these are products of prefabricated housing factories where great concrete slabs are turned out in assembly line fashion, then taken to the building sites for erection.

Mr. Long remarked in 1960 the construction work was poor and that the buildings would be old long before their time. He called attention to the wretched slums in Moscow, very near to the American embassy.

QUALITY IMPROVES

Present day construction is much better. More attention is being given to plumbing facilities, decoration and preservation of green areas between apartment complexes.

There appears to be a realization of the desirability of making apartments more attractive both inside and out. There is more floor space per apartment today than in those built 10 years ago. And in Moscow the program of slum eradication seems to be moving with greater rapidity than in many large American cities.

We were told by government officials that it is contemplated that by 1980 it will be necessary to tear down some 5 million square meters of living space, not only for reasons of inadequacy but to allow for a more modern layout of the city.

Rent, we were told, is usually about 4½ percent of the family income with the average living space 12 square yards per person. The goal is to increase this to 22 square yards in new buildings. (An average worker can earn from 100 rubles per month to upwards of 250 rubles per month with a ruble valued at from $1.11 to $1.25.)

We were able to see at first hand how some Russian factory workers live in newer apartment complexes during our visit to Alma Ata, relatively near the Chinese border.

There a young Korean family of five occupied an attractively furnished five-room apartment close to a textile mill. It had a piano, books, television, radio and modern plumbing.

BARGE INTO APARTMENT

Everywhere we went we were amazed at the Russian hospitality. Our visit to this apartment was a typical example. Five of us barged into the apartment without much prior warning, obviously to the embarrassment of the young Korean housewife, who insisted we sit down to cold cuts, vodka and wine.

In this remote part of the country consumer goods are as readily available as in Moscow. We visited a department store which covered a block and was three stories high. It was equipped with modern escalators and carried the same variety of consumer goods that can be found in any American equivalent.

PRICES VERY HIGH

It appeared there was a lot of shopping, but at least while we were there, very little buying. Prices were high—men's shirts at 20 rubles; a man's suit at 150 rubles; a woman's cotton dress at 30 rubles; a rain coat at 30 rubles.

Sales clerks are paid 100 rubles a month; a department manager 230 rubles and the top store manager, 350 rubles including a bonus he receives when sales volume exceeds the store's "norm."

The confounding and unanswered question is how people are able to buy at such high prices with such modest incomes.

Another change that was apparent to our colleagues who had been in Russia before was the lack of black market money peddlers. Mr. Long, in his report of 1960, told of being approached by such characters after only a short walk on city streets.

None of us had such an experience.

On the whole, things are improving in Russia. Visitors used to return telling how the average person yearned for a ball point pen and that the principal difficulties in hotels were the lack of toilet paper and plugs in the bathtubs.

That no longer is true. Most hotels have plugs for the bathtubs and there is adequate soap and toilet paper, although the towels leave something to be desired and often the toilet seat is not fastened to the bowl.

Ballpoint pens are common now and readily available. Perfumes and cosmetics are sold everywhere. Even cigarette lighters are in excellent supply, but nowhere is lighter fluid available.

Yet the Russians solve this oversight in a rather ingenious way—they tie a string to the lighter and lower it into an automobile gasoline tank.

[From the Salt Lake (Utah) Tribune, Oct. 1, 1969]

PERSPECTIVES ON A SOVIET ODYSSEY—IV: PERSONAL FREEDOM FLOWERS IN POST-STALIN PERIOD

(By Arthur C. Deck)

The farther a visitor travels away from Moscow it becomes apparent that Russians in the cities far from the capital are more friendly to foreigners and are a happier people.

As one of 10 American editors who traveled thousands of miles in the Soviet Union over a period of three weeks my impression was that Muscovites generally wore a stolid, uncompromising look and in many cases were suspicious of foreigners, particularly Americans.

It may be that this is the pattern of people the world over who live in impersonal, highly congested metropolitan areas (Moscow has a population of 6,600,000) but I was impelled to wonder if the distance from the seat of Big Brother might have contributed to the ever increasing thaw.

NO VISIBLE EFFORT

In any event it appears that the era of the personality cult has all but disappeared in Russia. Except for statues, billboards and posters of Lenin, which are everywhere, there is no visible pictorial propaganda effort in behalf of the current leaders of Russia nor of their immediate predecessors.

Lenin, of course, is revered. In conversations with some of our hosts, he was referred to as being "sacred." One Russian editor referred to an American newspaper editorial which criticized Lenin. "How would you feel if we criticized George Washington?" he asked.

In all our travels I saw only one picture of Stalin and that was in a war museum in Leningrad. Our colleagues who traveled in Georgia, however, said Stalin photographs were much in evidence there.

BRINGS QUICK DENIAL

Visitors who had been to Russia during Stalin's regime told of seeing statues, pictures and posters of the dictator everywhere. They have all disappeared. While some current writers have indicated a trend to return to the era of terror that characterized the Stalin period, this is vigorously denied by Russian officials.

Even our interpreter, Joe Adamov, a very Americanized product of Radio Moscow, became violently defensive when asked to read articles by accredited American correspondents which suggested that thousands of dissenting Russians were being jailed or worse.

"I am in Moscow radio," he shouted, "With my contacts would I not know if someone were taken away? I tell you, I know of not one Russian who is in jail as these writers charge."

ENDS DISCUSSION

The case of the Russian writer, Anatoly Kutnetsov, who recently defected to England because of what he charged was a new campaign to suppress freedom of expression, is dismissed with a violent retort:

"Any person who would leave his wife and family is bad to begin with."

That ends the discussion.

During a return from a bus trip in Lenin-

grad I was afforded an opportunty to make some detailed inquiries into how Russians evaluate life in their country today. An attractive, 35-year old housewife, Mrs. Galina Sherondva, sat down beside me. She is a guide for Intourist and speaks excellent English.

FEELING OF FREEDOM

I remarked at the complete elimination of the Stalin image. She replied that life was certainly easier today than during the Stalin period. She emphasized that there was more of a feeling of freedom of expression and that there is no longer a concern that Big Brother, or one of his henchmen, is looking over your shoulder or spying on you.

"But," she said, "it has been too extreme to eliminate all of the statues of Stalin. After all he did contribute a great deal to the counrty, even though many people go to Moscow to spit on his grave."

Mrs. Sherondva, who dresses extremely well and wears a modified miniskirt, has traveled extensively throughout Europe and Africa as part of her job as a representative of Intourist and would like to visit the United States.

SHRUGS SHOULDERS

"When they want me to go I will go," she said, but in response as to whether she would make a personal effort to get there, she shrugged her shoulders.

Mrs. Sherondva agreed with me that people in Leningrad were more warmly approachable than in Moscow but she quickly denied that this was because Muscovites live so close to the center of government.

"People here are just more relaxed," she said.

Russian editors in all of the cities we visited were unanimous in denouncing reports by American newspapermen, particularly Henry Kamm, who had spent two years in Moscow for The New York Times and who suggested that the present government was moving closer to the Stalin concept, and Anatole Shub of the Washington Post, who was expelled from the country after he wrote that there are now "scores of thousands" of political prisoners. Both men were denounced as "liars" not only by editors but by scientists, government officials and by ordinary citizens.

FOLLOW ITINERARY

Of course we had no way of evaluating the charges or the denials. We saw no prison camps. We met no one who could be described as a dissenter. We were guests in a strange and beautiful country and we followed the prescribed itinerary.

If the government is, in fact, moving to tighter control over its people, it is not apparent in the light of our experience. The visible transition is the complete erasure of Stalin and Khruschev and the complete confidence of the people in their current leaders even though their image is projected in very low key.

[From the Salt Lake (Utah) Tribune, Oct. 2, 1969]

PERSPECTIVES ON A SOVIET ODYSSEY—V: RUSSIANS PROUD OF CLIMB FROM RUINS AFTER WAR

(By Arthur C. Deck)

Russia's determination to keep alive the memory of World War II and the national pride of accomplishment in the 25 years of recovery from that holocaust are readily apparent to a visitor to the Soviet Union.

Whether in Moscow, Leningrad, Minsk or the far reaches of Siberia where cities escaped the war's devastation, officials, newspaper editors and ordinary country folk automatically surge into a discussion of the terrible war years and remind the listener that everything he sees—building, industry, the advancements in culture, education and science—all have been accomplished in a quarter of a century.

"And," the visitor is told, "we have done this by ourselves. We have received no help, no loans or grants from a rich uncle."

APPALLING STATISTICS

To the 10 American editors from a country that never has been invaded in modern times, the statistics of 20 million dead, more than 60,000 cities and villages destroyed and the loss of one third of the national wealth, are appalling. The rate of recovery is impressive but frustration mounts at the recognition of growing pains and official apprehension of the distrust of western nations.

Since our tour was officially arranged, it is understandable we would have been escorted to:

The beautiful Piskarevskoe Memorial Cemetery at Leningrad, the mass graves of more than 600,000 people who died at the hands of Nazi troops during the siege of that city from 1941 to 1944.

The impressive war memorial near Minsk, where a small mountain has been built with earth from all of the war-torn cities of Byelorussia and topped with a modernistic sculpture.

BELLS TOLL

The Khatyn village outside Minsk where acres of green are now dotted with the restored chimneys of the farm homes burned by the Nazis after they herded nearly 200 villagers into a barn and set fire to it. The chimneys stand out starkly against the greensward and in each a bell rings periodically.

Another war memorial at Novosibirsk where the names of 30,000 war dead from that Siberian city are inscribed on huge upright placques.

At each place we hear an echo of what we were told by Moscow's deputy Mayor, Vasili Isayev:

"We must create a powerful industrial and defense capability to prevent war from ever happening again."

SHOWN INDUSTRY

And while we were never shown anything that remotely resembled a munitions factory or a defense establishment, we were ushered ceremoniously through several industrial complexes:

At Leningrad—The Obuhovo prefabricated house factory, one of six in the city, where 3,200 workers turn out 25 family units per day in assembly-line fashion. The slabs, which are of reinforced concrete, roll out of the plant and are recarted to the building sites, where they are assembled into free-standing apartments of from five to nine stories high. By 1972 they hope to be producing 12- 16-story buildings, but they have no plans for skyscrapers because land is not at a premium.

At Minsk—The Belaz truck factory outside the city, which produces 20- 40- and 60-ton heavy-duty dump trucks at the rate of 2,500 units a year. We were told that plans were on the drawing board for 120-ton capacity carriers. The products are exported to 30 nations.

TEXTILE PLANT

At Alma Ata—A huge textile plant, at least one of our blocks in area, a vast, air conditioned complex that turns raw cotton into cloth at an astounding rate.

While the mill is only three years old, already there are plans for its expansion, which, we were told, would triple the plant's output by 1970.

Impressive as these industrial works are, however, the growing pains are readily apparent. At the housing factory where 45 percent of the workers are women who operate overhead cranes and pour concrete, the appearance of the place is not up to American standards: lighting is poor, floors are cluttered and in general the working area is unkempt.

The truck factory, for all its accomplishment, is untidy and a far cry from the American concept of assembly line production, while the textile mill, despite the introduction of air conditioning, still has its atmosphere fouled with cotton fibers.

EDUCATIONAL PROGRESS

But the results of planned effort are there, nevertheless, and the visitor is readily told of the availability of education—from preschool through college; of the progress of the agricultural sciences, where new strains of farm products are being developed to withstand the rigorous winters of Siberia and the vast stretches of virgin lands.

It is with obvious pride, during our visit to Novosibirsk, Siberia, that we are escorted to Science City, some 18 miles away, where during the Khrushchev era a vast area of forest land was cleared for the erection of a complex of buildings to house the nation's top scientists. Not only is research carried out here, but it also is a higher education complex, similar to our graduate schools.

MATH MUDDLE

A discussion with scientists here is highly enlightening if not always comprehensible. One of our group got into an argument with one of the scientists concerning different interpretations of some rather obfuscating mathematical technology.

For the first time in the whole tour, our interpreter, Joe Adamov, the suave linguist from Radio Moscow, threw up his hands in exasperation.

"This is the first time in my life that I don't know what I'm talking about in either language," he said.

[From the Salt Lake (Utah) Tribune, Oct. 3, 1969]

SOVIET ODYSSEY—VI: DRY SALAMI, MINISKIRTS—A LAND IN TRANSITION

(By Arthur C. Deck)

Was it chance or was it planned?

Whatever the reason, as we boarded the plane for our flight out of Russia, there on the apron stood the giant, spanking-new TU144, the Soviet Union's sleek supersonic jet transport.

And, as if to bid us goodbye, the pilots slowly raised and lowered the long needle-nosed snout of the behemoth. How or why they did this I have no notion.

From all appearances, this was the Russians' final gesture, of their last chance to put their best foot forward for the 10 American editors to whom they had been hosts for three weeks and thousands of miles in that great land of paradox.

SALAMI, APPLES

The jet that carried us away was far different from the planes we had flown within Russia. Its interior was well furnished; the miniskirted stewardesses could have been plucked from any American airline. The seats were wide and comfortable, in contrast to those in domestic planes. The food was far superior to that on interior flights, where the fare usually consisted of a hunk of salami, a dry roll, an apple and a cup of mineral water.

What does it all add up to? How does a nation so obsessed with a desire to excel in technology, culture, education—you name it—manage to spin its wheels so hopelessly in so many ways?

And as one gropes for some answers, these terms become all too apparent: frustration, pride, insecurity, friendliness, distrust and hospitality.

It's all there in one great tangle.

PLEASANT MEMORIES

Recollections of some things are most pleasant.

There was the unforgettable evening at the Leningrad ballet, which surpassed anything of its kind I had seen. The performance of "Don Quixote" was presented by the second-string company, since the first was on tour in Japan.

The performers were superb, the girls were

beautiful, the staging and costuming magnificent and the audience reaction enthusiastic and amazing. The performers, both men and women, were showered with great bouquets of flowers carried onto the stage and thrown with abandon from all over the beautiful theater.

But the orchestra in the pit was something else again. While the conductor was properly attired, the rest of the musicians wore a motley array of clothing—white shirts and colored shirts; some with ties and some without. Some were shaven, some not.

ART MUSEUM

There is the fabulous Hermitage art museum in Leningrad. It is said to contain one of the world's greatest collections of Rubens' works. There are priceless collections of archeological artifacts dating from the stone and bronze ages. The Treasure Room contains an exquisite collection of works of art in gold and other precious metals from primitive civilizations. It has one of the world's greatest collections of French impressionists, many of which have never been reproduced or seen by westerners.

One is impressed by the Russians' pursuit of culture which extends even to the small communities on the collective farms. At one of these were enthralled by a recital by several beautiful children who were enrolled in the farm's music school—a most important part of Russian education. Over and over we were invited to these schools.

So intense is the desire for culture that while the battle for Stalingrad was being waged in World War II, the people of Novosibirsk in Siberia continued building of their opera house without interruption.

RUSSIAN WOMEN

We were told at length about the emancipation of the Russian women and her important role in Soviet society during a meeting with officers of the Soviet Women's Committee in Moscow. (It could have been a meeting with officers of the League of Women Voters in any American city.)

We were told that 72 per cent of Russian doctors were women, as are 33 percent of the judges, 35 percent of the lawyers, 60 percent of the economists, 30 percent of the engineers, 45 percent of the scientific workers and so on and on.

It is very impressive, but then the nagging sight of the women sewer workers and women street sweepers pops up to fog the scene.

Near Novosibirsk is a huge library, five floors above ground and four below. It is a magnificent building and one of the five largest libraries in Russia, with an inventory of more than five million volumes. The librarian was proud of its world-wide connections and its exchange agreements with American libraries.

SUBSCRIBE TO "LOOK"

"Even the Library of Congress," she said.

Asked if the library subscribed to any American publications, she proudly displayed the New York Times, the Wall Street Journal and Look.

Any visitor to Russia is in an almost complete vacuum about news of the outside world. The only English language newspapers readily available are the Communist papers from Europe and the propaganda newspaper, Moscow News, locally edited and produced.

Russians are avid newspaper readers, and the national newspapers, Pravda and Izvestia, have enormous circulations. Every city has newspapers, local and regional in character. There are magazines galore, youth newspapers, women's magazines and publications of every description.

NEWSPAPERS DRAB

There is a sameness in appearance of all newspapers and, in comparison with American publications, they are startlingly drab.

While Russian editors generally describe their roles as supporters of the government, they vigorously insist they can and do criticize when necessary. An editor can "satirize" the director of a tractor factory for his shortcomings or a regional editor may criticize Pravda, for example, for not carrying enough science news.

On international affairs, however, discussions with editors indicate they all speak with one voice. We, as American newspapermen, were taken to task more than once for publishing both sides of the Chinese border controversy.

ONLY ONE TRUTH

"There is only one side that is the truth," we were told. "It is not good to publish both sides—this only gives an opportunity for Mao to spread his lies."

Most editors are extremely defensive about Russia's role in Czechoslovakia and at one dinner meeting in Minsk the discussion became such a shouting match that our interpreter, Joe Adamov, took off his shoe and pounded the table.

The obvious reference to the Khrushchev performance in the United Nations broke the tension, provoked some laughter and the evening proceeded on a more friendly tone.

The unanimous response by officials, editors and even the man in the street to questions about international affairs is often unbelievable.

YANKEES, GO HOME

About Vietnam? The U.S. should pull out and let the Vietnamese solve their own problems. What of Russia's role? That's different. "You don't understand," was a reply heard frequently.

About China? The border incidents are provoked by Mao as a diversion to take people's minds off internal failures. They love the Chinese and think the current confrontation is temporary.

About Czechoslovakia? They are sorry, but it had to be done. "But we will leave Czechoslovakia before the Americans leave Europe."

About West Germany? They are concerned about the gains made by the neo-Nazis and they harbor a deep-rooted fear of West Germans.

About the Mideast? They'd rather not discuss that.

HOPE FOR PEACE

About the U.S.? They hope for peace and a solution to the disarmament question. They castigate the American "imperialists" but insist that if there were talks "such as with you American journalists" all could be worked out.

Everywhere we heard enthusiastic praise for the United States' moon shot. Apollo badges we distributed were warmly accepted and worn and American newspapers picturing the moon walk by American astronauts became prized possessions wherever they were distributed.

Air and water pollution concern Russian officials as much as they do the U.S., but the Russians have a bigger club, the product of a controlled society. Soviet officials require strict compliance of industrial plants. Even though production is for the state, they can and do close down plants that fail to comply with government standards.

NO MORE FACTORIES

City planning is high on the list of important projects in every municipality. In Moscow we were shown detailed plans for widening streets, developing peripheral boulevards and establishing a "green belt" on the outskirts. They plan to move some of the historic buildings to make way for broad new thoroughfares, and they are firm that no more industry will be permitted within the city.

Municipal planning in most cities we visited includes the development of broad green areas between the evergrowing apartment complexes, but in Novosibirsk, where there are still picturesque, single family dwellings in great green ravines that thread through the city, there are plans to fill in the gullies to make way for modern apartments.

And here, for once, was a similarity to the American way of life. We were told by the city's newspaper editor that in their haste to modernize they had torn down the first log cabin built in that part of Siberia.

Now, of course, they are making plans to build a replica.

STUDENT ADVISORY COMMITTEES FOR THE SELECTIVE SERVICE SYSTEM

Mr. SCHWEIKER. Mr. President, earlier this year, President Nixon recommended the creation of student advisory committees in every State to meet and discuss our draft system, and to make recommendations for changes and improvements.

I thought this was an outstanding idea, and early in September I wrote to Selective Service Director Lewis B. Hershey to find out more about it, and received a preliminary report from him in the middle of September.

Since this correspondence took place, I have continued to express interest in the youth advisory committee idea, and in the progress of the creation of these committees I have learned that they have been set up in more than 30 States and territories.

I think it is important that attention be given to these youth committees, because they can provide a positive and constructive service to draft reform. General Hershey is to be commended for carrying this idea out, and I hope all States will have advisory committees set up in the very near future.

As a member of the Senate Armed Services Committee, I am looking forward to the hearings this committee will be having early next year. We will be considering broad questions of draft reform and draft system modernization, and will be considering a wide variety of recommendations and information.

These student advisory committees can be extremely helpful to the Armed Services Committee hearings because they will provide intelligent recommendations from the people who are affected most by the draft system—our young people.

Mr. President, at this time I would like to have inserted in the RECORD the correspondence in September between General Hershey and myself.

In addition, the National Employment Association has recently written to President Nixon to endorse his proposals for draft reform. I would like to have the NEA statement, and the text of the NEA letter, also inserted in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SEPTEMBER 3, 1969.

Lt. Gen. LEWIS B. HERSHEY,
Director, Selective Service System,
Washington, D.C.

DEAR GENERAL HERSHEY: Because of my long-time interest in our draft system, I am delighted to know of your plans to create Youth Advisory Committees in every state, to receive information on what today's youth think of the draft, and suggestions for improvements. President Nixon and you are to be commended for your leadership in devel-

oping these committees, and I am confident they will be fruitful to the Selective Service and to all other persons interested in having the most equitable and efficient draft system possible.

I will be following the creation and progress of these advisory committees with great interest, and am writing to ask if you could provide me with greater detail concerning your plans.

Specifically, I would like to know details concerning the following:

(a) How are the State Committee representatives being chosen?

(b) What plans are being made for State meetings?

(c) What procedures and timetables are being developed for State reports and recommendations?

(d) What plans are being made for a national meeting?

(e) What procedures and timetables will be followed for submission of the reports to the Selective Service System in Washington, and for their evaluation?

(f) What timetable will be developed for making these State reports public?

(g) Will there be any official Selective Service System comment on the youth recommendations?

I am confident that our youth can provide perceptive and informative commentatories on the draft system, which affects their lives so directly, and thus I commend you for your work in obtaining this expression of opinion, and look forward to having your views and thinking on the details of your worthwhile enterprise.

Sincerely,

RICHARD S. SCHWEIKER,
U.S. Senator.

SELECTIVE SERVICE SYSTEM,
Washington, D.C., September 15, 1969.

HON. RICHARD S. SCHWEIKER,
U.S. Senator,
Washington, D.C.

DEAR SENATOR SCHWEIKER: Thank you for your letter of September 3, 1969, and your kind remarks concerning the action which President Nixon and I have taken in developing Youth Advisory Committees to Selective Service in the States.

I am in thorough agreement with you that these Committees can be of great help in our effort to develop the most equitable and effective draft system possible.

As you are aware, at the present time these Committees are largely in a devlopment stage. State Committees have already been set up in many of the States and others are in the process of being formed. Trying to get people together to serve on the Committees during the summer months is one of the difficulties being experienced by the States. Because of travel, vacation and summertime employment, many persons could not be brought into the plan earlier. To the extent that these plans have developed, I will respond to the specific points of your inquiry.

The responsibility for the selection of members of these Committees rests with the individual State Director. The general pattern for selecting Youth Advisory Committee members is similar to that followed in selecting local board members, in that each State uses the method best adapted to that State. Many States are getting recommendations from schools, institutions and various organizations in their States in which youth are involved.

The responsibility for scheduling, at least the initial meeting, is left up to the individual State Director. Generally, thereafter it is expected that meeting times will be determined to a large degree by the Committees themselves, consistent with availability of funds and Committee functioning.

It is contemplated that the State Committees will not make formal reports, as such, but that there will be representatives from all State Committees who, after they have familiarized themselves with the subject, will participate in a national meeting to be held at some future time at which the recommendations of the individual State Committees will be compared and their consolidated recommendations made to the Selective Service System. The views of each State Committee on matters it considers will, of course, initially be presented to the State Directors.

One of the advantages of a national meeting is the cross-fertilization of ideas developed by the youth in the States. This was a point stress by President Nixon when he met with the initial youth group in California in June.

The Selective Service System will evaluate the recommendations coming out of the national meeting and they will be reported to the President. Another point stressed by President Nixon was the great value that a national meeting of representatives of the State Advisory Committees will have in carrying back information and ideas to their individual State Committee. State Committees will be kept informed on the actions taken on their recommendations.

As you are aware the main objective of this program as expressed by the President is to give the youth of the Nation an opportunity to make constructive recommendations concerning the program in which they are so vitally affected.

The potential of the program for constructive recommendations was illustrated by several preliminary suggestions made by the young people to the President at their meeting with him in California during June. The President thought these suggestions had sufficient value to merit further study and referred them to his staff members, Mr. Peter M. Flanigan and Mr. Charles B. Wilkinson to discuss with Selective Service.

Sincerely yours,

LEWIS B. HERSHEY,
Director.

PRESIDENT NIXON'S DRAFT REFORM SUPPORTED

President Nixon has received the strong support of the National Employment Association in his efforts to reform the Selective Service System. While applauding his efforts, the Association, which represents the nation's private employment agencies, urged the President to take an additional step to remove inequities from the draft law. This additional step would be to give potential draftees their physical, mental and moral tests at the time of registration. In this manner, the registrant's true classification would be established early and much of the present uncertainty would be eliminated.

The text of NEA President Joseph L. Wroble's letter to President Nixon follows:

"The National Employment Association strongly commends you for your program to relieve the uncertainties that mark the present operation of the Selective Service System and recommends an additional step be taken in easing the burden of the draft on the nation's young men.

"In your message to Congress on reforming the military draft, you stated that:

" 'The present draft arrangements make it extremely difficult for most young people to plan intelligently as they make some of the most important decisions of their lives, decisions concerning education, career, marriage, and family.'

"As to considerations of a career, the private placement agencies our Association represents have had the repeated experiences of attempting to place young, male job applicants who, while otherwise qualified, are virtually unemployable because of the uncertainty of their status in the draft.

"Your program to remove from vulnerability all men between the ages of 20 and 26 and provide for draft eligibility only those 19 years of age deserves support. It would remove a significant impediment to the employability of the great many young men who seek our members' counsel regarding job opportunities.

"To dispel a further degree of uncertainty, we strongly urge that physical, mental and moral tests be given at the time of registration. In this manner, the registrant's true classification will be determined early and his ability to plan greatly enhanced. Moreover, the Selective Service System would gain an accurate count of the number of eligible men available.

"You have the enthusiastic support of the National Employment Association in this effort, and we will make our views known to the appropriate legislative committees in the Congress."

The National Employment Association is the trade organization for private employment agencies. It was formed in 1960 through a merger of three predecessor organizations. A key program is professional development, and its members are pledged to a rigid Code of Ethics.

There are over 8,000 small business firms engaged in the private placement agency business. These firms employ some 40,000 people and are responsible for approximately 4 million placements each year. Private employment agencies define a permanent placement as one expected to last at least 90 days. The U.S. Employment Service and its state affiliates use an index of only three days so there is no basis for comparison.

NEGLECT OF THE GREAT LAKES—ST. LAWRENCE SEAWAY SYSTEM

Mr. HARTKE. Mr. President, today President Nixon announced his plans to come to the rescue of the maritime industry by a program to expand the activities of the U.S. merchant fleet and revive construction of commercial vessels in domestic shipyards.

Unfortunately, the President's maritime program appears to overlook the Great Lakes, inland waterways, and the St. Lawrence Seaway. Since the seaway opened on June 26, 1959, it has stimulated economic development and prosperity not only within the Great Lakes region, but throughout the entire United States and the North American Continent. As the seaway enters its second decade of operations, it is plagued by numerous problems that threaten to choke this vital transportation link.

The seaway is the only federally supported waterway that is required to be self-supporting. At present, the seaway is obligated to repay $148 million in debt. It is often suggested that the way the seaway can pay off its debt is by raising tolls. However, an increase in toll rates would definitely discourage shipping in the Great Lakes region and defeat the aim for which the St. Lawrence Seaway was constructed in the first place. Inland waterways in the United States have always been open without charge. If the Great Lakes are free and open to all, why should the seaway linking the lakes even have toll charges?

The seaway must be relieved of the necessity of being required to repay the cost of construction, operation, and maintenance from revenue derived from toll charges. The financial position of the St. Lawrence Seaway Development Corporation must be improved so that it can attract and handle additional maritime traffic.

It is imperative that seaway facilities be efficient and modern to accommodate increased traffic and the most modern ships. If these funds are provided, port authorities will be encouraged to improve terminals, freight handling, loading and unloading facilities, and transportation facilities to and from port areas.

The President's new proposal increases Federal subsidies for ship construction and operation of shipping lines for oceangoing vessels involved in foreign commerce so that they will be better able to compete with foreign carriers. Why must U.S. Great Lake vessels be excluded from this proposal? Certainly, it makes sense that similar assistance should be devised for our translakes shipping fleet because keen competition is also prevalent in the Great Lakes area. Canada has subsidized its Great Lakes fleet making it one of the most advanced and highly automated in the world. From 1955 to 1965, the American Great Lakes fleet declined approximately 500,000 gross tons while the Canadian Great Lakes fleet increased by the same amount. Therefore, I urge that discrimination in maritime subsidies be terminated and that aid be made available to all American shipping.

Mr. President, I believe that we must add to the President's maritime proposals by developing ways and means to solve the Great Lakes-St. Lawrence Seaway system's problems. Surely, if the St. Lawrence Seaway is able to reach its full potential and proper place in our transportation network, our national economy will benefit tremendously.

POLLUTION THREATENS A PRECIOUS RESOURCE

Mr. YARBOROUGH. Mr. President, on October 6, 1969, I introduced Senate Joint Resolution 156 to establish an Interagency Commission with the specific duty of planning for our Nation's participation in the 1972 U.N. Conference on the Human Environment.

At that time, I stated to the Senate that there is a serious question whether our Government is taking sufficient steps to insure adequate planning for this most important conference.

Mr. President, the evidence is overwhelming that the pollution of our air and water is creating a grave environmental crisis, and this crisis is one of worldwide dimension.

Water is one of our most precious resources. The threat to its future use by mounting pollution is discussed with unusual clarity and insight by Ken Jurgens in the October 1969 issue of Texas Parks and Wildlife, in an article entitled "Water, Water Everywhere: Keep It Fit To Support Life."

The article is accompanied by some excellent photographs by Reagan Bradshaw and Bill Duncan. These pictures bespeak the adage that "one picture is worth a thousand words." It is unfortunate that they cannot be reproduced in the CONGRESSIONAL RECORD.

The article discusses all phases of water pollution: Domestic sewage; industrial wastes; excessive nutrients such as phosphates, ammonia, or nitrates; oil pollution; abnormal variances in water's temperature; pollution by toxic substances such as the phenolic compounds, sulfides, cyanides, and heavy metals such as copper, chromium, and zinc; and the pesticide problem.

Mr. President, this article amply illustrates why all efforts to deal with the environmental crisis, including the 1972 U.N. Conference on the Human Environment are vitally important to the survival of mankind. I commend the article to the Senate and ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From Texas Parks and Wildlife, October 1969]

WATER, WATER EVERYWHERE: KEEP IT FIT TO SUPPORT LIFE

(By Ken Jurgens)

News of recent well leaks off the California and Louisiana coasts and the fish kill in the Rhine River in Germany have intensified public interest in pollution. Yet most people only vaguely understand the meaning and scope of pollution. To pollute is to make physically impure, to befoul, defile, dirty, or taint, but modern usage encompasses yet another connotation—*to alter adversely.*

We all know that water is a fundamental requirement of all living things and that clean, natural waters—unaltered by man—are essential to all life. Changing the condition of our natural waters in any way which harms or excludes normally found aquatic life is an act of pollution whether or not it is done legally. It is the purpose of this article to give the reader a basic understanding of water quality and the effects of pollutants upon fish, plants, and other wildlife found in and around our rivers, ponds, lakes, streams, bays, and estuaries.

When natural waters are clean and support a wide variety of aquatic or marine life, they are said to be of good quality. Water is an almost universal solvent. Thus, natural waters may contain any number of dissolved substances. Moving waters may also carry many suspended or emulsified materials such as silt or oil and grease. Technically, water quality is judged by the amounts of substances it contains plus its acidity, alkalinity, turbidity, and temperature. Chemical or other analyses of water quality measure substances contained in water in parts per million parts of water (ppm) or in milligrams per liter (mg/l).

ACID AND ALKALINE WATERS

Natural waters are either slightly acid or alkaline depending upon the minerals of the particular region. When natural waters are acid it is usually due to dissolved carbon dioxide, sulfuric or other mineral acids. When waters are alkaline it is a result of dissolved carbonates, bicarbonates, silicates, phosphates, and alkaline organic substances.

Acid and alkaline waters are both described in terms of potential hydrogen ion concentration (pH). A pH 7 is neutral. Less than pH 7 is acid and greater than pH 7 is alkaline. Natural waters most frequently range from pH 6.5 to pH 8.5.

DISSOLVED OXYGEN

Fish and other aquatic and marine life require dissolved oxygen or they will suffocate. Some warm-water fish, such as carp, can live in water with as little as 3 ppm of oxygen, whereas largemouth bass require more dissolved oxygen and live best in water containing 5 to 8 ppm. Most natural waters with good fish populations contain ample dissolved oxygen.

Flowing streams, free of excessive oxygen-demanding pollutants, can regain oxygen by flowing a relatively short distance. The more rifles and rapids present, the sooner the stream recovers lost oxygen.

Unfortunately, organic pollutants—which consume large amounts of dissolved oxygen—are often introduced into natural waters in great quantity. The bulk of these pollutants come from domestic sewage and industrial wastes. Unless properly treated they can make water unfit for aquatic life.

Even with adequate waste treatment, some single industries release enough oxygen-demanding wastes to equal sewage wastes from cities of 50,000 to 100,000 population. The seriousness of organic pollution can be understood simply by looking at a Texas map to see the many cities and industrial plants along our rivers and some coastal bays. Of further significance is that fact that water in a river has to be reused many times before reaching the open sea.

In some streams and coastal bays, it's a marvel that fish life exists at all. In fact, certain waters have been so heavily polluted that authorities consider them unfit for production of fish life. The truth is, no fish can live in them, and when fish enter such areas by accident, they most likely will die.

NUTRIENTS

Traces of nutrient materials such as phosphates, ammonia, or nitrates in natural waters are required for the growth of aquatic plants. However, when present in large quantities they cause excessive growth of vegetation which often interfere with swimming, boating, fishing, and water skiing. Heavy growth of aquatic plants may also cause bad tasting water, foul odors, and extensive fish kills. When large quantities of plants die and decay, they use up dissolved oxygen in the water causing fish to suffocate.

Nutrient materials in surface waters often come from the land—in runoff waters carrying agricultural fertilizers, from sewage wastes, either raw or treated, or industrial wastes.

Ammonia, a nutrient (fertilizer), is also toxic (poisonous) especially in more alkaline waters.

OIL

Oil which finds its way into surface waters is harmful to aquatic life in a number of ways. Free and emulsified oils can coat the gills of fish causing them to suffocate. They also coat and kill one-celled plants and animals which are vital sources of fish food.

Oily materials that settle to the bottom, coat the bottom, suffocate bottom-living animals, destroy fish habitat, and render useless areas used by fish for spawning. Water-soluble oils may cause fish to become unpalatable and may be poisonous to fish and other aquatic or marine life. In addition, thick films of oil floating on the surface can upset the natural self-purification of streams by preventing aeration.

SOLIDS

In water quality studies, some substances are classed as solids which are defined as either dissolved, suspended, or settleable. Dissolved solids are materials such as salts and sugars while suspended and/or settleable solids are such as silt, paper pulp waste fibers, sewage solids, water treatment sludges, lime waste from treating industrial waste waters, oily sludges, and street washings.

Dissolved solids result mainly from minerals leached from soils or geological deposits, although large amounts reach natural waters from industrial wastes. U.S. Public Health Service drinking water standards suggest not more than 500 ppm of total dissolved solids should be present in fresh water.

Salinity, or amount of salts dissolved in water, is particularly crucial to productivity of coastal waters. Many people think salt water is sea water regardless of where it is found—in the coastal bays or open sea—and that no matter how much salt it contains,

marine animals won't know the difference. Actually, fish, shrimp, crabs, oysters, and other marine animals have definite preferences for certain amounts of dissolved salt (sodium or magnesium chloride).

On the average, waters of the open sea contain a total salinity of 35,000 ppm. Bays and estuaries, on the other hand, vary from almost no salinity where the rivers enter the bays to nearly the salinity of seawater where the bays meet the sea. These zones of varying salinity are very important to marine life. When changes are made by the unnatural addition of dissolved salts, the habitat is changed—either the area becomes completely useless for marine life causing them to leave, or destroys marine organisms outright.

Fortunately, many oil producers, who produce vast amounts of concentrated brine, are disposing of it by reinjection into the geologic formation from which it was pumped. If all producers—including other mining interests—did this, none of these salty waters would be able to contaminate surface waters so necessary to fish and wildlife.

Suspended or settleable solids are another matter. Silt, sewage solids, and industrial waste slurries, cause surface waters to become turbid and may contain substances which are poisonous or otherwise make water unfit for living creatures.

Large amounts of iron, either dissolved or suspended, can coat the gills of fish and other gill-breathing animals with iron deposits and prevent them from exchanging waste carbon dioxide for oxygen. This causes them to suffocate. The same problem is sometimes caused by pulping wastes from paper and paper board manufacture.

Throughout history until the present, industry has traditionally used streams, rivers, bays, and oceans as receptacles for disposal of unwanted wastes. Pollution of surface waters has been looked on by many as the "necessary result" of our economic and industrial systems. It has often been said that "the solution to pollution is dilution." This approach can no longer be tolerated.

TEMPERATURE

In the United States today, almost one-half of all water used for all purposes is for cooling and condensing by power and manufacturing industries. The power industry alone used more than 40 trillion gallons in 1964. Other industries used in excess of another 9 trillion gallons. The amount of waste heat released into lakes and streams, bays and estuaries, even with some onshore cooling, is almost incalculable.

Generally, water used by the power industry in conventional steam plants for one-through cooling is raised 10 to 15° above its intake temperature and is then released into surface waters unless some form of onshore cooling is employed prior to discharge. The danger is this: such discharges are capable of raising surface water temperatures to a point to which fish and other aquatic life cannot adjust. Therefore, they are forced to avoid heated areas or die. In addition, increased temperature reduces the amount of oxygen the water can contain, increases rate of chemical reaction of other pollutants, and increases toxicity of many poisonous substances.

In streams, large amounts of heated water can, and sometimes do, cause thermal blocks preventing fish moving upstream to the cooler waters above the point of discharge. In lakes that are sufficiently deep and large, warmwater fish species such as channel catfish and largemouth bass may not suffer too greatly, and in winter, the heated water often provides excellent fishing since such fish tend to move to the area with the most agreeable temperature. However, coldwater fish, such as rainbow trout and salmon, may be completely eliminated by increased water temperature.

In bays and estuaries along the Texas coast, waters are generally shallow in those areas used as nursery grounds by fish, shrimp, crabs, and oysters. Summer temperatures may naturally reach 95° F or more; therefore, any substantial releases of heated waters into these large areas can only remove such areas as habitat for marine life during the summer when they are needed most as nurseries.

Two examples of the direct effect of heated waters on marine life should suffice to point up the danger of released heated waste water into coastal waters during the summer months. At prolonged temperatures above 95° F oysters close their shells and cannot feed properly. Since they cannot move, prolonged exposure to heated water may cause them to die of starvation, even if the water is not hot enough to kill them outright. Also, according to the U.S. Bureau of Commercial Fisheries, brown shrimp cannot live in waters with temperatures in excess of 95 to 97° F. Thus, areas affected by large volumes of heated discharges are destroyed habitat.

In most cases regarding Texas' inland waters, Texas Water Quality Requirements state that the upper limit of the representative water temperature is 96° F and surface water temperatures are not to exceed a five-degree rise in this representative temperature above natural conditions. In coastal waters, during fall, winter, and spring, water temperatures are not to exceed a four-degree rise in representative temperature above natural conditions, while in summer this rise is not to exceed more than 1½ degrees.

Because fish and other aquatic or marine life have no control over their body temperatures, environmental temperature is extremely important. Heated discharges can be beneficial during the cool and cold months of the year, but in the warmer months, especially in streams and shallow waters already heated by the sun, increased temperatures due to large releases of industrial cooling waters can be deadly or can completely eliminate large areas as valuable nursery grounds or fish habitat.

Because of the effect of temperature on fish and aquatic life, the Federal Water Pollution Control Administration states, "A temperature of 95° F is about the maximum acceptable for aquatic life." Therefore, it is obvious that it would be best if all waste waters released into surface waters did not exceed 95° F, especially where warmwater fish and other desirable aquatic life exist. Even here, the waters receiving the heated wastewater discharges must have sufficient volume to absorb the waste heat without ill effect to aquatic life.

TOXIC SUBSTANCES

Up to this point only the natural or mechanical effects of pollutants have been reviewed. But, many substances introduced to natural waters are directly toxic or poisonous to living things. Just a few of these are phenolic compounds, sulfides, cyanides, and heavy metals such as copper, chromium, and zinc.

Phenolic compounds are used as disinfectants, such as carbolic acid, and are among wastes produced from petroleum refining, and the manufacture of petrochemicals and coal tar products.

Extremely small amounts of phenolic compounds may not be toxic to fish but do cause them to have an unpalatable phenolic taste. A dangerous aspect of phenolic wastes to fish is that the toxicity of phenol increases as oxygen concentration in the water decreases. Thus, the presence of small amounts of phenols magnify the effects of other pollutants which reduce the amount of dissolved oxygen.

According to the Federal Water Pollution Control Administration and the U.S. Public Health Service, not more than 0.2 ppm phenols are acceptable in surface waters for fish, and industrial effluents should not contain more than 0.1 ppm at the point of discharge into surface waters. Also, there is evidence which suggests that the toxicity of phenolic compounds to aquatic life is even greater in the softer natural waters.

Metallic copper does not dissolve in water but many copper salts are very soluble and poisonous in varying degrees to fish and other aquatic life, including plants depending on water hardness and temperature.

Although soluble copper salts in minute amounts up to 0.05 ppm may be naturally present in some waters, more often they enter surface waters with industrial waste discharges. In industry, copper is used in electroplating, photography, textile manufacturing, pesticides, and many other industrial processes.

There are reports of the toxic effects of copper to fish and other aquatic life in concentration of as little as 0.015 to 3.0 ppm. In salt water, only 0.13 to 0.5 ppm absorbed in the flesh causes oysters to be green in color and makes them unfit for human consumption. Oysters, as you know, permanently attach themselves to the bay bottom and pump water through their bodies to strain out whatever food it may contain. Once attached to the bottom, they either grow and multiply or die and are lost. Any pollutant which is absorbed, stored, and concentrated in their bodies is hazardous because of the tremendous quantities of water they filter.

Zinc salts, such as zinc chloride and zinc sulphate, are used extensively in many industries—in the manufacture of paints, cosmetics, dyes, and insecticides for example. They can therefore be expected to be present in industrial wastes as well as domestic wastes.

Soluble salts of zinc are very toxic to fish and other aquatic life and where soluble copper is present, zinc toxicity is increased.

It is known that fish eggs exposed to zinc in solution are delayed in hatching and the actual numbers of such eggs which do hatch are considerably reduced. Also, there are reports that young hatchery fish, transferred from pond to pond in galvanized pails for stocking purposes, suffered toxic effects of zinc contained in the galvanized coating.

In saltwater, oysters are known to concentrate zinc, and very small amounts are reported to be dangerous to them. According to the U.S. Public Health Service, concentrations toxic to fish range from 0.3 to 4.0 ppm—these toxicities depending on hardness of the water. The softer the water is, the greater the toxicity of zinc to aquatic life.

Like the salts of copper, chromium salts are toxic to aquatic life varying with temperature and particularly with water hardness.

The metal finishing industry is the greatest single source of chromium wastes but chromium—as are chlorine and cadmium—is commonly used as a corrosion inhibitor in cooling water systems of steam-electric plants and other industries where waste heat is removed through cooling water systems.

Though the toxic effect of chromium salts on fish is not clearly understood, fish food organisms such as water fleas have been harmed by as little as 1.2 ppm chromium chloride. It is known that algae concentrate chromium one hundred or more times over the concentration contained in the water.

The Federal Water Pollution Control Administration suggests that the maximum allowable amount of chromium in industrial waste effluents "can be expected to be less than 1.0 ppm."

As little as 0.05 to 0.15 ppm of most cyanide salts have been reported to have killed fish. Cyanide can be present in waste waters from industries such as steel refining, metal cleaning and electroplating, chemical manufacturing and petroleum refining. They are poisonous substances which become even more toxic as temperature increases. The cyanide salts of zinc and cadmium are extremely toxic.

Waste sulfides are produced by such industries as pulp and paper mills, chemical plants, tanneries, and oil refineries. Sulfides are also produced in the decomposition of sewage.

Research by the Texas Parks and Wildlife Department fisheries biologists has shown hydrogen sulfide to be a major factor in the death of young catfish in the softer, more acid waters of East Texas. In certain lakes it was learned that, although channel catfish spawned, their eggs would not hatch properly and hatchery-reared catfish fry stocked in these waters would not live. Lethal sulfide concentrations ranged from 0.5 ppm for catfish fry to 1.4 ppm for adult catfish. Federal Water Pollution Control Administration sources suggest that sensitive fishes may be killed by concentrations of sulfides from as little as 0.5 to 1.0 ppm "even in neutral and somewhat alkaline solution."

PESTICIDES

A limited number of toxic substances have thus far been discussed. In most cases they were relatively simple, inorganic chemicals. Chemical industries today, however, are producing complex organic compounds faster than they can be evaluated. In terms of their immediate, or especially, their long-range effects on living things or upon the environment, little or nothing is known.

Perhaps the most insidious of all the organic compounds are the chlorinated hydrocarbons and the organophosphates. These are the chemical groups to which many of the present day insecticides belong.

Who would have believed that DDT, which had such promise toward controlling insect-transmitted diseases at the end of World War II, would today be found in tissues of animal life at Antarctica? Who would have believed that fish such as the coho salmon in Lake Michigan would be so contaminated with deadly DDT that tons of commercially harvested salmon would have to be confiscated to protect the health of unsuspecting consumers?

The truth about DDT in Lake Michigan coho salmon, according to the Federal Food and Drug Administration, is that confiscated fish contained DDT residues up to 19 ppm. Amounts of DDT tolerated in meats are only 7 ppm.

No one knows how these salmon accumulated so much DDT. But it is suspected that the concentration of DDT was a step-by-step buildup in the fish's food chain through what is technically called biological magnification. For example; DDT was applied on a widespread area to control some insect pest of agriculture or perhaps forestry. The residue washed off the land by rains and into the surface waters. Next, microscopic plants and animals absorbed and concentrated the DDT. They were then eaten by some higher form of life such as small forage fish or minnows. Minnows concentrated DDT even more and were in turn eaten by larger fish, more and more concentrating the DDT until 19 ppm were contained in the bodies of coho salmon.

It is known at present that DDT, its derivatives and other "hard pesticides," are stored in the fatty tissues of virtually all living things. What is not known, and what may not be known for generations, is the long-range effect of such pesticides on all life forms. We do know peregrine falcons are nearly extinct, reportedly because of DDT. We suspect the brown pelican, formerly common on the Texas coast, has almost disappeared possibly because of DDT. We do not know how this pollutant will affect life in years to come. We can be sure, however, that it will not be for the better.

Some pesticides are safer than others but none are completely safe and those that have long term, residual toxicity are the least safe of all. To illustrate their extreme toxicity to aquatic and marine life, it is known that DDT in concentrations as little as 0.6 ppb (parts per *billion* parts of sea or bay water) will immobilize or kill a shrimp population in two days. Also, oysters stop feeding in water containing only 1.0 ppb DDT, and oyster shell production is prevented or stopped when only a few parts per billion of DDT are present.

Research studies have been conducted with many species in the presence of various pesticides. To compare toxicities with a familiar fish species, research reports show bluegills (a small sunfish locally known as "sun perch" or "bream" in various parts of Texas) have been killed by as little as the following concentrations of these pesticides: Chlordane—22 ppb, Heptachlor—19 ppb, DDT—16 ppb, Aldrin—13 ppb, Dieldrin—7.9 ppb, Toxaphene—3.5 ppb, and Endrin—0.6 ppb.

None of these values are absolute because lethal toxicity varies with the size and condition of the animals. In addition, if other pollutants are present, the animals already may be affected and very little additional pollution may cause them to succumb quickly. However, these values illustrate the comparative toxicity of these deadly chlorinated hydrocarbon compounds.

The reason so much is heard about DDT is because so much of it has been used and it lasts so long as a toxic residue. Imagine what could happen to fish and wildlife if, for example, a thousand acres of land infested with fire ants were treated with 30,000 pounds of dieldrin. Suppose, just after application a six or seven-inch rain fell on the area. The result of the runoff containing dieldrin entering a river could wipe out all life along the entire course of the river to the sea. And life in the sea would also be affected. Shrimps and oysters, fish, and crabs could be destroyed by the tons. The animals that would eat these dead and dying creatures might also be killed or in some other way harmed to the point that they might slowly but surely head toward extinction.

We do not recommend that the use of all pesticides be halted. We do recommend that extreme care should be practiced in using pesticides, particularly those that have long-term residual effect on living things. Serious consideration should always be given to the possibility of dangerous contamination of the environment before the decision is made to use pesticides. Plans for wide scale applications particularly need very critical review.

What we have written has been for a single purpose: in some small way, to make people aware that sources of pollution are everywhere around us. In the volumes of scientific literature, much has been written in technical detail about the effects of pollutants on fish and wildlife and on the entire environment. But, such papers are difficult reading even for the scientist and are not published in places where the average person can find them.

We have a sufficiently advanced technology to purify water for our own use; however, fish and wildlife have no choice but to use the water available to them. If the water is unfit to support life, animals will either avoid such water or die unless we treat waters to make them harmless—not only to us—but also to these other forms of life. This is our duty, even if the cost is high.

This article has barely scratched the surface. But, hopefully, what is here should bring to the reader an awareness of pollution and some of its hazards. Once the majority of people become aware of a serious problem, solutions will be found.

In the United States, where single-minded purpose and effort have fashioned the means to put man on the moon and to photograph Mars from a space vehicle, similar purpose and effort will find the means to protect and preserve the environment which we share with our presently abundant fish and wildlife.

MOBILIZATION BACKERS

Mr. FANNIN. Mr. President, there is new evidence that the backers of the November 15 movement are not sailing under their true colors.

I ask unanimous consent, Mr. President, to insert in the RECORD resolutions adopted on October 12 by the Stockholm Conference on Vietnam titled "November 15 Day of International Mobilization To End the War in Vietnam."

First it should be noted, Mr. President, that the Stockholm Vietnam Conference was also one of the participating organizations in the Communist controlled World Assembly for Peace held in East Berlin in June of this year. Others present at that meeting behind the Iron Curtain were Barbara Bick, national editor of the Women's Strike for Peace Newsletter, and Irving Sarnoff, Los Angeles, Peace Action Council. Both of these people are listed on the Steering Committee of the New Mobilization Committee which is the principal sponsor and organizer of the November 15 affair. All of this information, Mr. President, I have inserted in the RECORD previously.

When you read the resolutions, Mr. President, you will see references to the so-called fall offensive which began with demonstrations in Chicago in connection with the trial of the "Chicago eight."

It is coincidental that the open letter to the American people, which originated in Hanoi and was such a blatant interjection of anti-American ideology into domestic affairs, used the same language? Did the Premier of North Vietnam simply happen upon the use of the same term when he concluded his letter with the phrase, "May your fall offensive succeed splendidly"?

The evidence is mounting, Mr. President, that this whole antiwar movement was spawned in totalitarian circles and designed to take advantage of the natural desire of all Americans to see peace achieved in Vietnam and the war brought to an honorable solution.

Even the use of adjectives is the same. All of these groups pick up the phrase "immediate, total, and unconditional withdrawal."

Those who wish to join in with this group, the New Mobilization Committee, are certainly free to do so. Those in political circles who wish to lend their name and ostensible support are not prevented from doing so under the laws of our Nation. They may, however, be treading dangerously close to a violation of their oath of office in being sworn to uphold and defend the Constitution and defend it from all enemies both foreign and domestic. They will, I am sure, be held accountable for their actions by the people who placed them in a position of public trust.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

NOVEMBER 15 DAY OF INTERNATIONAL MOBILIZATION TO END THE WAR IN VIETNAM

Resolution: Adopted October 12, 1969

The Stockholm Conference on Vietnam welcomes the formation of the broadest coalition of US anti-war forces yet known

which have joined together in the New Mobilization Committee to End the War in Vietnam to mount a series of massive demonstrations. The Fall Offensive began with demonstrations in Chicago on September 24 in support of the 8 Anti-War leaders on trial for conspiracy. The campaign will continue with the Vietnam Moratorium on October 15 and will culminate in mass national demonstrations in Washington and San Francisco from November 13 to 15. The New Mobilization Committee is committed to the immediate, total and unconditional withdrawal of US forces and war material from Vietnam.

The Stockholm Conference wholeheartedly supports the Fall Offensive and calls for mass demonstrations throughout the world on November 15 to match the unparalleled outpouring of popular opposition to the war now spreading across the United States. All actions on this day of international mobilization should be centered on the demand of the Vietnam Appeal calling for immediate, total and unconditional withdrawal of all U.S. and allied troops from South Vietnam. This is the only basis for bringing the war to a rapid conclusion. In those countries linked to the U.S. war effort there should be demonstrations demanding an end to these pacts of complicity.

We join the New Mobilization Committee in calling for a campaign which will not end on November 15 but will rise in intensity until U.S. aggression in Vietnam is ended and the Vietnamese have won the independence and peace for which they have fought so long.

VIETNAM APPEAL

Resolution: Adopted October 12, 1969

To respect the Vietnamese people's fundamental national rights: independence, sovereignty, unity and territorial integrity—and the right to self determination of the people of South Vietnam.

We demand the immediate, total and unconditional withdrawal of all U.S. and allied troops from South Vietnam.

PRESIDENT'S PROGRAM FOR THE MERCHANT MARINE

Mr. MATHIAS. Mr. President, I thank the Senator from California for yielding me a brief amount of time to express my strong support for the President's program in the area of the merchant marine.

When the President originally announced his objectives in the field of the merchant marine, it breathed a new spirit of hope and life into our whole maritime industry. With this message and with the legislation which will follow this message, I think everyone now more than hopes; there is a real substance for belief that the American merchant marine is on the way back to that preeminence in the maritime industry, in commerce on the seas, that this Nation enjoyed for so many years.

I appreciate the Senator from California's yielding me this time to say now that I strongly support this legislation and that I hope it will have an easy passage through the Senate. I am going to do all I can to make it so.

THE ALABAMA-COUSHATTA INDIAN RESERVATION EXPANDS BIG THICKET TOUR

Mr. YARBOROUGH. Mr. President, the Alabama-Coushatta Indian tribes who live in southeast Texas are widely known for their conservation work. These two tribes have practiced their culture of conservation on their tribal lands since 1854. As a result of their efforts, the last virgin hardwood forest in Texas has been preserved.

The tribal members, in addition to their many other activities, conduct guided tours of the Big Thicket area. The tour takes visitors into the remote wilderness areas, where they may see the rare wildlife and botanical wonders for which the Big Thicket is famous.

In a article recently published in the Citizens Journal of Atlanta, Tex., on July 31, 1969, it was announced that as a result of constantly increasing numbers of visitors to the Big Thicket, the tour has been expanded and new facilities constructed to accommodate the public. It is estimated that 130,000 persons will visit the Alabama and Coushatta Reservation and the Big Thicket this year.

Unfortunately, the Big Thicket is in danger of being lost forever. With each day that goes by, another 50 acres of the Big Thicket are destroyed by the bulldozer and chain saw. To save a portion of the Big Thicket for future generations, I have introduced S. 4, which would create a 100,000 acre Big Thicket National Park. This bill has gained wide support from civic and conservation groups throughout the United States. However, time is growing short. We must act now if the Big Thicket is to be saved.

Mr. President, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

RESERVATION ADDS BIG THICKET TOUR

LIVINGSTON.—Texas' only Indian Reservation, home of the Alabama and Coushatta Tribes near Livingston, Texas, has added a new interesting area to their Big Thicket Tour.

Recently Sen. Ralph Yarborough, who is introducing a bill in congress to create a Big Thicket National Park next to the reservation, made the maiden tour on one of the Indian Reservation's four wheel drive tour vehicles into the virgin forest and swamp land of the reservation previously inaccessible by vehicles.

The tribal members have practiced their culture of conservation on the land held by the tribes since 1854. As a consequence, the only known virgin hardwood forest remaining in Texas can be seen on the reservation.

The reservation has more state champion trees (largest of a species in Texas) than any other property in Texas and possibly the United States. The state champion trees are water tupelo, Texas honeylocus, Schumard oak, American hornbeam, Hercules club, water hickory, white ash, mockernut hickory, red maple, American beech, shagbark hickory and long leaf pine. Two of the trees, water tupelo and Texas honeylocus are national champions (largest of a species in the United States).

The Big Thicket Tour, which leaves the reservation museum every thirty minutes from 10 a.m. to 5 p.m., is one of the most fascinating rides for people who enjoy natural beauty remaining in the United States. Naturalists from all over the world have come to the reservation to see these trees.

Roland Poncho, a tribal member and assistant superintendent states, "this extended tour of the Big Thicket area has been made possible by the generous attendance of visitors who have made it possible for reservation business to grow and construct new facilities for the enjoyment of the public."

This year 130,000 persons are expected to visit the reservation. So that visitors may stay overnight, 42 camping units have been built with all necessary facilities including swimming and fishing.

RELEASE SOUTH VIETNAM POLITICAL PRISONERS

Mr. HARTKE. Mr. President, for 19 months an outstanding patriot of South Vietnam, Truong Dinh Dzu, has been imprisoned for vague and unsubstantiated charges that disgrace the ideals of justice. He has been the victim of the political insecurity of the Saigon regime which refuses to tolerate any criticism of its uncompromising policy of war.

In the elections of 1967, Truong Dinh Dzu campaigned for the presidency of his country on a platform that called for a negotiated settlement of the war that would repair the wounds of the nation. In spite of the efforts of Generals Thieu and Ky to misrepresent and silence his position, Mr. Dzu finished a close second in the balloting. Shortly thereafter, the Saigon regime—which does not abide political opposition—arrested Mr. Dzu and sentenced him to 5 years at hard labor.

I call upon President Nixon to bring pressure upon the Saigon regime to release immediately Truong Dinh Dzu from his unjust incarceration. Our efforts to depict South Vietnam as a democracy are ludicrous and hypocritical as long as its Government defines dissent as a crime against the state.

In South Vietnam, November 1 is traditionally a day when amnesty is granted to prisoners. General Thieu should free Mr. Dzu and all prisoners held for political reasons so that South Vietnam might benefit from the wisdom that has always dictated his political actions.

ARIZONA SAFEGUARDS FREEDOM WITH ORDER ON THE CAMPUS

Mr. GOLDWATER. Mr. President, I have spoken out on the problem of campus disturbances many times in the Chamber. My position has consistently been one of the strongest condemnation of activities which involve pillage, terror. riot, and other acts of unlawfulness.

At the same time I have stated my conviction that the first line of action for combating this irrational behavior can be and should be the colleges and local governments themselves. If the administrators of our institutions of learning would only take note of the seriousness of the revolutionary methods used by the architects of disorder, if the faculties and boards of regents would simply assume greater responsibility for maintaining academic freedom and order within the laws and procedures that have been established by organized society, and if the vast numbers of parents and citizens in each community who are devoted to the principles of reason and tolerance would make it clear that they demand and will back up steps to provide and safeguard the primary educational functions of the universities, then I believe

we shall see an end to the hooliganism and anarchy that is occurring at some of our places of learning.

In my opinion, the universities in the State of Arizona are demonstrating the wisdom of this kind of approach. The academic leaders of the Arizona institutions have proven their alertness to the dangers that face the university system. They have achieved a marvelous success in securing orderly conditions in a climate which is conducive to free discussion, inquiry and expression.

As an example of steps being taken in Arizona, I would like to mention the strength shown by Dr. Richard A. Harvill, president of the University of Arizona, who has steadfastly refused to respond to coercion or intimidation. Doctor Harvill has referred to the boycotting of classes, during the recent attempt at a moratorium day, as "the height of asininity."

Evidently the faculty of the university shared his view because they voted overwhelmingly to keep classes open on October 15.

Similar evidence of backbone has been shown by former president G. Homer Durham at Arizona State University. Dr. Durham clearly and publicly announced his resolve to meet threats to physical safety, life, and property at ASU with every means at his disposal, including expulsion.

Also, in Arizona, an ordinance was adopted by the Arizona Board of Regents in July of 1968, which clamps down on acts of disruption or violence on university property.

Mr. President, the distinctive aspect of the approach being used in Arizona is that it combines preparedness and a willingness to use State and local laws against violence and vandalism with a tolerance and respect for the right of individual students to engage in constructive outlets of discussion and inquiry. An excellent example of this sensible attitude is the adoption of a report this year by the Faculty Senate of the University of Arizona setting forth policies and procedures which govern the adjudication of disputes related to nonacademic activities of students. This report, which gives the utmost consideration to legitimate student views, was passed by the Faculty Senate without a single dissenting vote.

Mr. President, Doctor Harvill has written to me recently on this subject asking that we in Congress give an opportunity to the administrators and faculties of universities to face up to the problems occurring on their campuses and that we refrain from taking any precipitous action to penalize entire institutions because of the action of a few students.

Mr. President, the views stated in this letter are so thoughtfully presented and well-balanced that they should be brought to the attention of a wide audience. For this reason I ask unanimous consent that there be printed in the RECORD at the end of my remarks the text of the letter sent to me on October 15 by Dr. Harvill.

Also, I ask unanimous consent that there be inserted in the RECORD certain newspaper articles and documents relative to the efforts underway in Arizona to control the problem of campus disturbances.

Finally, in connection with the problem of university disorders, I have come across an excellent article authored by Prof. J. Timothy Philipps, who has taught at the West Virginia University Law School for 3 years. Mr. Philipps was the recipient of the 1969 Student Bar Association Law Professor Award at that law school, which is the highest honor that students can offer to a member of the faculty.

This fact makes the message of his article particularly impressive. That a young man who holds such a close rapport with students will write a realistic, no-nonsense criticism of the misuse of freedoms by the self-styled revolutionaries of the new left is a very encouraging sign. Since I believe that the piece deserves notice by the many readers of the RECORD and lends itself so well to my topic today, I ask unanimous consent that the article entitled "The Arrogance of Impotence," published in Jus et Factum, West Virginia University College Law, be printed in the RECORD.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

THE UNIVERSITY OF ARIZONA,
Tucson, Ariz., October 15, 1969.

Hon. BARRY GOLDWATER,
U.S. Senate,
Congress of the United States,
Washington, D.C.

DEAR BARRY: I have watched carefully the expressions of reactions by members of the Congress and by special committees and commissions that have been established to study disorder and dissent on university and college campuses in the United States, especially during the last couple of years. I have given a great deal of consideration to the views of members of the Congress, as well as to those of business and professional leaders in all walks of life in this country. I have an enormous file pertaining to all of these questions and issues.

Although this problem is not a simple one, I shall try to confine my statement of views within a few short paragraphs. I accept the legislation by the Congress of the last session which places penalties upon students convicted of serious disorders on campuses of universities. The fact that students have engaged in this kind of endeavor should disqualify them individually for direct benefits under legislation providing for such benefits to students enrolled in universities and colleges of this country.

To extend this kind of legisaltion to provide penalties on universities that eliminate them from eligibility for grant funds, contract funds and student aid funds of various kinds would in my judgment be a serious mistake. It would penalize the entire institution because of the action of a few students. On the whole, the disorders that have occurred on campuses have been precipitated by a very small proportion of the students. The vast majority of the students, although concerned about contemporary problems and issues that face our society, are dedicated to peaceful and rational consideration of these issues. To penalize all of the students for what comparatively few students do in any institution would be contrary to all of the fundamental tenets of American justice. We can ill-afford to take action that will enhance the danger of causing a greater number of our university students, and indeed our citizens generally, to engage in thought and action that might bring ill-advised results.

Certain conclusions are rather clear to me. First, the more violent of the activist groups, for example SDS, seem to be breaking apart because of diversities within their own ranks and because they are so completely discredited in the eyes and minds of students generally. In the next place, the experience of university administrators and faculties based on what has already happened is making them extremely alert and there is more understanding of the dangers that face universities.

Moreover, in university after university, action is being taken to give much more consideration to the expressions of students who want adjustments within the framework of orderly procedure. Many administrators of universities who traditionally and very properly had viewed the university as an institution that permitted and encouraged freedom of speech to bring about a clear definition of issues on political and social considerations are now recognizing responsibility to go far beyond what was apparent and necessary initially when disturbances first began to occur. In my judgment, the situation in this respect is far different than it was even a year ago.

Moreover, almost every university in the country has recognized the importance of providing students with greater participation in both academic and nonacademic affairs than was thought to be necessary or desirable a few years ago. I am enclosing herewith a report of the Faculty Senate Committee of the University of Arizona relating to the adjudication of disputes related to nonacademic activities of students. This report evolved after approximately a year of consideration by a committee authorized by the Faculty Senate in response to student requests and appointed by the President of the University of Arizona. This Faculty Senate is comprised of about one-third administrative officers of the University and two-thirds nonadministrative faculty members, with a total of 72 members. It was passed by the Faculty Senate without a single dissenting vote. This same sort of thing is happening at universities throughout the land. Legitimate student views are being given the utmost consideration. The demands and arrogant protests of students who are not reasonable and that lead to disruptive and disorderly behavior on campuses are being submerged in effect by constructive student endeavors that are now occurring.

Governing boards of universities throughout the country are concerning themselves more with these many complex problems. Many policy actions have been taken by these governing boards. Here in Arizona, an ordinance was adopted by the Arizona Board of Regents in July, 1968, which has been very helpful in calling attention to inappropriate endeavors on the campus of this University and of the other universities under the jurisdiction of this governing board. Many editorials and news stories have occurred in the papers of Arizona in support of reasonable student dissent and of the importance of giving attention to student views, but at the same time adhering strictly to a policy of order and peaceful operation that does not interfere with the rights and privileges of those who disagree with any particular point of view.

As you well know, the University of Arizona and the other two universities of this State under a common Board of Regents have experienced phenomenal success in maintaining orderly conditions.

I want to express on behalf of the University of Arizona appreciation of the endeavors of the members of the Arizona congressional representation who have spoken out in defense of the action of Arizona universities and who have had a very significant effect upon the thinking of members of the various segments of the universities of this State.

My own position at the University of Arizona has been simply that the Board of Re-

gents under the constitution and statutes of the State of Arizona does have sufficient authority to exercise its responsibility in close support of and cooperation with the administrations of the universities of this State. The Board generally has taken that point of view. This simply means that the state and local laws against violence, vandalism, and other disorders, if enforced, will provide adequately for the contingencies that may develop.

It is well known that the University of Arizona has sought and secured restraining orders in certain cases and has been ready in other cases, if necessary, to secure the action of civil authorities to maintain an orderly campus. Under no circumstances should court action and police enforcement be resorted to unless necessary. Preparedness, though, is absolutely essential. The number of cases in which restraining orders and other civil action has been used in universities throughout the country has increased enormously during the past year. Court decisions generally have been favorable when actions have been brought.

In brief, I believe that action by the Congress to cut off support to institutions in case of disorder is unnecessary and indeed would have a counterproductive effect by playing into the hands of the comparatively few revolutionary radicals and would punish the entire academic community. The members of every national and regional association that has taken action after consideration of these problems has gone on record in opposition to Federal legislation beyond what has already been enacted. Universities generally have demonstrated greater responsibility for maintaining academic freedom and order. This position of the component elements of the university community generally—administration, students, faculty, and governing boards—is that of assuming fully this responsibility and of acting in a manner that is acceptable in the face of very trying conditions.

Universities and colleges have responded magnificently to the needs and requirements of the Federal Government by providing assistance in carrying on research and providing many other kinds of programs that have helped to maintain and develop national strength.

Even though a few universities may have missed the mark in meeting the levels of their responsibilty, the answer is not found in the over-reaction of the Federal Government in a manner that might well be calculated to intensify and aggravate problems that already beset us.

I feel very keenly the sense of responsibility that I have and my colleagues, administrative and other faculty both, share this great sensitivity to our responsibility. It is my firm conviction based on experience at this University and on participation in many discussions in meetings and conferences of colleagues throughout the country that the constituent elements of universities throughout the land are responding and will continue to respond to the requirements of their well-established responsibilities.

Finally, the universities of this country have achieved a greatness never equaled or excelled in the entire history of the world. I am firmly convinced that the excellence of attainment will be enhanced only by retention in the universities of the same measure of responsibility in the future that they have borne so well in the past.

Respectfully yours,

RICHARD A. HARVILL.

[From the Tucson (Ariz.) Daily Star, Dec. 17, 1968]

STUDENTS PRESENT LIST—HARVILL SPURNS RACE DEMANDS

(By Martin Haynes)

Demands for minority recognition on the University of Arizona campus by black and Mexican-American student groups and an ultimatum for administrative action prompted UA president Richard A. Harvill to say last night:

"I have never failed to respond to reasonable requests of students, but the university will not take action on demands or ultimatums."

In concerted efforts by the Black Student Union, the Mexican-American Liberation Committee and other campus groups, this week has been designated "Student Power Week" on the campus.

Purpose of the drive reportedly is to focus attention on what they term "racial injustice, both subtle and obvious" on the UA campus.

Oliver Lee Hill, chairman of the campus Black Student Union of Aware Africans Board, met Saturday with Harvill.

Hill presented Harvill with a 10-point list of demands by the BSU, one of which is that by Jan. 8 meetings be started on campus by the president "to work out agreements regarding BSU demands. The BSU is willing to do anything necessary to obtain its goals, Hill said he told Harvill.

The Mexican-American Liberation Committee, an adjunct of UA's Mexican-American Student Assn. headed by Salomon Baldenegro, has submitted to Harvill similar demands for "corrective action" with regard to Mexican-American students.

Baldenegro told the Star yesterday that his committee and the BSU have correlated their aims, with support from student body president Steve Malkin, the Students for Peace Assn., the Young Democrats, the Young Republicans and others.

Hill said the "gist of the demands is that we as students feel minorities in American society have been left out of white American culture.

"We supposedly live in a pluralistic society, but the education system is the biggest perpetrator of Anglo-Saxon, Protestant culture.

"Incorporated in this culture, minorities have contributed significantly, and its time we let the world know that we live in a pluralistic society.

"This brings us to the necessity of minorities having their contribution in the American Education system.

"Thus we will break down sterotypes. We hope the student body and administration will be compassionate enough to understand and respond favorably."

Hill reiterated to the Star, "as I told Dr. Harvill, the administration must be prepared to accept the consequences if the meetings called for are not scheduled."

[From the Tucson (Ariz.) Daily Star, Dec. 20, 1968]

DR. HARVILL IGNORES SECOND RALLY—UA DISSIDENTS STAGE FUTILE GATHERING

Another demand for University of Arizona President Dr. Richard Harvill to appear before a crowd of about 800 dissidents was staged yesterday in front of the school administration building.

It was the second mass call for Harvill to publicly answer lists of demands presented by the Black Student Union and the Mexican-American Liberation Committee.

Nearly 1,000 persons—students, some faculty members and observers—attended a similar rally Wednesday.

The president failed to appear at either session.

Harvill said in an Arizona Wildcat, campus daily newspaper, interview, that he will confer with colleagues and deliver a written response to the groups' demands in early January.

The university will close for the holidays following classes Saturday until Jan. 6.

The Black Student Union had planned to call the gatherings daily until Harvill responded. However, Mike Hester, BSU public relations chairman, said yesterday:

"Don't come here and waste your time with these administrators. All they will listen to is violence." He added:

"On every other campus they are using violence. But here we are doing something constructive and they will not respond . . . Security men are ready to lock the doors and react only if we do something disorderly."

"The only thing we have to throw at you (administration) are words and ideas, and I think that is what a university is all about," said Mike Price, UA law major.

Sal Baldenegro, Mexican-American Liberation Committee chairman, told the group there will be no violent incidents. "But we will not back down from our issues," he said.

[From the Tucson (Ariz.) Citizen, Sept. 8, 1969]

IF RIGHTS RESPECTED—UA'S PRESIDENT HARVILL PROMISES FRESHMEN FREE EXPRESSION

(By Bob Knight)

University of Arizona President Richard A. Harvill today promised new students that they will have complete freedom of inquiry and expression—as long as the rights of those who disagree with them are respected.

"You can express ideas and opinions even though they may be unpopular, even though some may appear—and may be—foolish," Harvill said in a welcoming address.

He urged students to use some "historical perspective" when discussing social issues. "In many cases these problems are not new and it is well to find out what has been done in the past," he said.

"Universities have to exercise a considerable amount of patience in dealing with unrest," Harvill added. "We must preserve the rights of all members of the university. We must preserve the rights of those who disagree."

Harvill told freshmen, "You will not appreciate what has been done for you here and what the university will do for you until you leave."

He added that the university's prime goal is to give the student a "stamp of competence" when they get their degrees.

Harvill praised what he called the decentralized organization at the UA. "A great deal of personal relationship persists at the university. During your stay here I hope to get to know as many of you as I can," he said.

[From the Arizona Daily Star, Oct. 8, 1969]

FACULTY UNIT WON'T BACK BOYCOTT

The University of Arizona Faculty Senate voted overwhelmingly Monday night to keep classes open Oct. 15.

Two representatives from the Associated Students ad hoc committee on the Vietnam Moratorium, urging a boycott of classes Oct. 15, asked the senate to allow faculty members to cancel classes that day.

In reply, the senate said: "The faculty senate acknowledges that a large segment of the student body is actively concerned with a problem of great magnitude confronting our nation.

"While the university encourages those committed to a social and political cause to actively organize and work in its behalf, it is neither legally possible nor desirable that the faculty senate endorse an official boycott of classes on Oct. 15.

"To do so would deny to those students who do not wish to participate in the boycott the educational opportunities to which they are entitled, having paid university tuition and fees."

The two students, Linda Billings, chairman of the ad hoc committee, and Warren Frank outlined plans for the three-day moratorium to begin Oct. 13. They plan to sponsor speakers' corner dialogue, forums and movies in which opinions on the war will be presented.

The students said that orderly and peaceful demonstrations are being planned.

[From the Arizona Daily Star, Mar. 13, 1969]

ASU To Meet Threats, President Durham Says

TEMPE.—Every means at its disposal will be used to meet any threat to physical safety, life or property at Arizona State University, President G. Homer Durham said Wednesday.

Durham told a Charter Day audience the peaceful students, the faculty and the staff were "fed up with tolerating bad manners."

"The overwhelming majority of faculty, students and staff deplores the occasional prostitution, always well-publicized, of the university's freedom—but toleration of bad conduct, within the law, is one of the burdens carried by freedom-loving people."

Durham told the campus audience patience was wearing thin among the peaceful students.

"We do see virtue in the right to advocate, peacefully, fully and rationally, significant ideas in the context of university life. Some citizens have advocated the application of force and violence to quell unrest.

"But the university rejects this solution until all other remedies and professional skills have been exhausted," Durham said.

The ASU president said the public should not confuse the noisy efforts of a few students with the thousands of students attempting to seek an education.

"I believe firmly that our faculty, students and staff are not about to be duped by sirens or sorcerers of either the left or right."

ASU Crackdown

It is being said that Arizona State University did not crack down hard enough when it placed on probation five student radicals who were disorderly during a recent campus appearance of Gov. Jack Williams.

And indeed, there is no denying that expulsion would more forcefully have brought home to the rabblerousers that ASU does not intend to tolerate the bad manners and anti-democratic conduct which have brought larger universities to a grinding halt.

But under the circumstances—the fact that the radicals were noisy and insulting, but not destructive or particularly effective—the decision of the committee of six professors and four students will probably have the intended dampening effect.

And if there is a next time, involving any of the five already disciplined or any other actors in the activists' "Children's Garden of Versus," it will not be too late for expulsion.

On the national level, the Nixon administration made a valuable contribution to sanity in academia when the President recently denounced campus disorders as a threat to intellectual freedom and civilization itself.

It's too bad the nation had to endure a half-dozen years of campus riots and insurrection before a chief executive could bring himself to denounce the rioters. But now that Mr. Nixon has, and has pledged that his administration will enforce the statute barring interstate travel to incite riots, perhaps support will be forthcoming from the many administrators and faculty members who until now have acted as though there was something vulgar about using force to put down rioters.

Nothing can destroy academic freedom faster than condoning anarchy and destruction in the name of academic freedom.

[From the Phoenix (Ariz.) Republic, May 22, 1968]

Expulsion for Rioters: Durham

TEMPE.—The president of Arizona State University issued a warning yesterday that any students who participate in the illegal seizure of campus buildings can expect to be expelled.

The statement by Dr. G. Homer Durham was contained in "The Faculty Bulletin," published yesterday on the ASU campus.

In Tucson, Dr. Richard A. Harvill, president of the Univrsity of Arizona, said he was in general agreement with Durham's statement, which said, in part:

"Any members of the university community who disregard the peaceful, rational and orderly processes of university life, and who do not voluntarily withdraw themselves from the university, who resort to violence, misappropriation, or misuse of university facilities, can and must expect the due process of university regulations and of the law, including expulsion and dismissal for cause."

Neither ASU nor the UofA campuses have sustained any disorderly student or demonstration activities such as have occurred within the past several weeks at Columbia University, in Paris (where the student revolt has generalized into a paralyzing nationwide strike), and elsewhere.

Dr. Harvill told The Arizona Republic:

"I have perfect confidence in the students and faculty at the University of Arizona, and I don't expect to have any reason to invoke any extraordinary authority . . . We don't have any situation that will require it."

He noted that the UofA is protected by the same regulations and state laws as ASU.

The Durham statement emphasized that "violence, the misuse or misappropriation of university property and physical actions interfering with or harmful to the rights of others cannot be tolerated."

"Those who engage in such practices must accept full responsibility for the consequences of their actions," he said, adding:

"We must all remember that the land, buildings, structures, space, access ways and walks, equipment and supplies at Arizona State University are the legal property of the Arizona Board of Regents, a body corporate and politic under the laws of Arizona.

"All facilities are assigned for use under this authority, for the good of education as set forth by the public law of the state and the regulations of the university. And Arizona statutes, the regulations and policies of the university prohibit the misuse or misappropriation of any university property."

He made a special point of saying that these regulations and laws apply to campus visitors and the general public as well as to the students, faculty and administration personnel.

Noting that "the university has a basic commitment to the processes of reason as the method of solving problems," Dr. Durham stressed that such commitment "on the part of faculty, staff, students and all members alike is absolutely critical to the life of the university."

He said that any grievances, complaints or problems can properly be presented for discussion and resolution through the "open channels to the president and to the governing board, including direct written petition."

"There are open channels beyond the Board of Regents to the elected governor, who appoints and is one of them, to the representatives of the people, and by initiative, to the people themselves," he said, adding that there are many recognized channels of appeal in the student government structure at ASU as well.

Finally, Dr. Durham noted, "The major committees and boards at Arizona State University contain student members (lack of student representation on such bodies was a grievance cited in at least one campus demonstration at an eastern university recently) and they exercise full voting rights in the significant government of the university carried by these organs."

The ASU president said the "Student Senate especially, and the executive student officers, provide clear and open channels for any matter of student concern."

Ordinance Regulating Use of, and Conduct Upon Properties of the Universities of the State of Arizona

(Adopted by the Arizona Board of Regents, July, 1968)

The grounds and properties of the three universities of the State of Arizona are owned by the State through the Arizona Board of Regents, for the use and benefit of the respective institutions. Such grounds and properties are devoted to and maintained for the sovereign function of supplying higher education to the people, and are not places of unrestricted public access.

Neither the State nor the Board is obligated to furnish or supply in such grounds and properties a forum or locale for the commission of crime, disorders, violence, injuries to persons or property, or the incitement or encouragement thereof, or any conduct or activity whatsoever which will interfere with or is harmful, disruptive, or inimical to the educational function aforesaid.

Accordingly, in the light of the foregoing and in the exercise of the jurisdiction and control vested in it by law, the Arizona Board of Regents hereby formally adopts and promulgates the following ordinance and regulation:

No person or persons may enter upon the grounds, buildings, roadways, or properties of the University of Arizona, Arizona State University, or Northern Arizona University, nor may a person or persons there be or remain, for the purpose of or in the actual or threatened commission of, any one or more of the following:

A breach of the criminal laws (state or national); violent obscene, or disorderly conduct; injury to or destruction of property; interference with free access, ingress, or egress; injury to person or persons; seizure or exercise of unpermitted control of properties of the institution; trespass; conduct harmful, obstructive, or disruptive to, or which interferes with, the educational process, institutional functions, contractual arrangements, or the public peace and tranquility; conduct likely to foment uproar, or violence; or the incitement, support, encouragement, aid, or abetment of any or all of the foregoing.

Access to, enjoyment of, and presence upon or within the areas aforesaid are conditioned upon compliance with the foregoing ordinance and regulation. Any and all persons not in compliance with the foregoing, or in threatened or actual violation thereof, will be denied entry to or upon such areas, or will be evicted therefrom, as the case may be. (Adopted as an Emergency Rule—Vol. XXII, p. 47, 48, July 6, 1968.)

Report on the Adjudication of Disputes Related to Nonacademic Activities of Students

(Adopted by the Faculty Senate of the University of Arizona)

The University of Arizona exists for the transmission of knowledge, the pursuit of truth, the development of students, and the general well-being of society. Free inquiry and free expression are indispensable to the attainment of these goals. As members of the academic community, students should be encouraged to develop the capacity for critical judgment and to engage in a sustained and independent search for truth. Procedures for achieving these purposes should be as unrestrictive as possible in order that the minimal standards of academic freedom of students outlined below are observed.

Freedom to teach and freedom to learn are inseparable facets of academic freedom. The freedom to learn depends upon appropriate opportunities and conditions in the classroom, on the campus, and in the larger community.

Students should exercise their freedom with responsibility. The responsibility to secure and to respect general conditions conducive to the freedom to learn is shared by all members of the academic community. The University of Arizona has a duty to develop policies and procedures which provide and safeguard this freedom. Such policies and procedures should be developed within the framework of general standards and with the broadest possible participation of the members of the academic community. The purpose of this statement is to enumerate the essential provisions for student freedom to learn.

I. Freedom of access to higher education

The admissions policies of the University of Arizona should make abundantly clear the characteristics and expectations of students which it considers relevant to success in the institution's program. All such policies should be clearly and publicly stated. Under no circumstances should a student be barred from admission on the basis of race. Thus, within the limits of its facilities, the University should be open to all students who are qualified according to its admission standards. The facilities and services of the University should be open to all of its enrolled students.

II. In the classroom

The professor in the classroom and in conference should encourage free discussion inquiry, and expression. Student performance should be evaluated solely on an academic basis, not on opinions or conduct in matters unrelated to academic standards.

A. *Protection of Freedom of Expression.* Students should be free to take reasoned exception to the data or views offered in any course of study and to reserve judgment about matters of opinion, but they are responsible for learning the content of any course of study for which they are enrolled.

B. *Protection Against Improper Academic Evaluation.* Students should have protection through orderly procedures against prejudiced or capricious academic evaluation. At the same time, they are responsible for maintaining standards of academic performance established for each course in which they are enrolled.

C. *Protection Against Improper Disclosure.* Information about student views, beliefs, and political associations which professors acquire in the course of their work as instructors, advisers, and counselors should be considered confidential. Protection against improper disclosure is a serious professional obligation. Judgments of ability and character may be provided under appropriate circumstances.

III. Student records

The University of Arizona should have a carefully considered written policy as to the information which should be part of a student's permanent educational record and as to the conditions of its disclosure. To minimize the risk of improper disclosure, academic and disciplinary records should be separate, and the conditions of access to each should be set forth in an explicit policy statement. Transcripts of academic records should contain only information about academic status. Information from disciplinary or counseling files should not be available to unauthorized persons on campus, or to any person off campus without the express consent of the student involved except under legal compulsion or in cases where the safety of persons or property is involved. No records should be kept which reflect the political activities or beliefs of students. Provision should also be made for periodic routine destruction of noncurrent disciplinary records. Administrative staff and faculty members should respect confidential information about students which they acquire in the course of their work.

IV. Student affairs

In student affairs, certain standards must be maintained if the freedom of students is to be preserved.

A. *Freedom of Association.* Students bring to the campus a variety of interests previously acquired and develop many new interests as members of the academic community. Within a clearly defined University policy they should be free to organize and join associations to promote their common interests.

1. The official body charged with the responsibility of deciding such recognition should be composed of equal numbers of faculty, administration, and the student body representing as wide a diversity of interests as is possible. All such representatives should be full members with equal voting privileges.

2. The membership, policies, and actions of a student organization will be determined by vote of only those persons who hold bona fide membership in the college or university community.

3. Affiliation with an extramural organization should not of itself disqualify a student organization from University recognition.

4. Campus advisers are required for each organization, but it should be free to choose its own advisers. Campus advisers may advise organizations in the exercise of responsibility, but they should not have the authority to control the policy of such organizations.

5. Student organizations may be required to submit a statement of purpose, criteria for membership, rules of procedures, and a current list of officers.

6. Campus organizations, including those affiliated with an extramural organization, should be open to all students without respect to race, creed, or national origin, except for religious qualifications which may be required by organizations whose aims are primarily sectarian.

B. *Freedom of Inquiry and Expression.*

1. Students and student organizations should be free to examine and to discuss all questions of interest to them, and to express opinions publicly and privately. They should always be free to support causes by orderly means which do not disrupt the regular and essential operation of the University. At the same time, it should be made clear to the academic and the larger community that in their public expressions or demonstrations students or student organizations speak only for themselves;

2. Students should be allowed under the sponsorship of officially approved campus organizations to invite and to hear any person of their own choosing. Those routine procedures required by the University before a guest speaker is invited to appear on campus should be designed only to insure that there is orderly scheduling of facilities and adequate preparation for the event, and that the occasion is conducted in a manner appropriate to an academic community. The University control of campus facilities should not be used as a device of censorship. It should be made clear to the academic and larger community that sponsorship of guest speakers does not necessarily imply approval or endorsement of the views expressed, either by the sponsoring group or the University of Arizona. The meetings may be restricted to students, faculty and staff.

C. *Student Participation in Institutional Government.* As constituents of the academic community, students should be free, individually and collectively, to express their views on issues of University policy and on matters of general interest to the student body. The student body should have clearly defined means to participate in the formulation and application of University policy affecting student affairs and assigned areas of academic affairs. The role of the student government and both its general and specific responsibilities should be made explicit, and the actions of the student government within the areas of its jurisdiction should be reviewed only through orderly and prescribed procedures.

D. *Student Publications.* Student publications and the student press are a valuable aid in establishing and maintaining an atmosphere of free and responsible discussion and of intellectual exploration on the campus. They are a means of bringing student concerns to the attention of the faculty and the University authorities and of formulating student opinion on various issues on the campus and in the world at large.

Since financial and legal autonomy is not possible at the University of Arizona, the latter, as the publisher of student publications, would have to bear the legal responsibility for the contents of the publications. In the delegation of editorial responsibility to students, the University should provide sufficient editorial freedom and financial autonomy for the student publications to maintain their integrity of purpose as vehicles for free inquiry and free expression in an academic community.

University authorities, in consultation with students and faculty, have a responsibility to provide written clarification of the role of the student publications, the standards to be used in their evaluation, and the limitations on external control of their operation. At the same time, the editorial freedom of student editors and managers entails corollary responsibilities to be governed by the canons of responsible journalism, such as the avoidance of libel, indecency, undocumented allegations, attacks on personal integrity, and the techniques of harassment and innuendo. As safeguards for the editorial freedom of student publications the following provisions are necessary:

1. The student press should be free of censorship and advance approval of copy, and its editors and managers should be free to develop their own editorial policies and news coverage.

2. Editors and managers of student publications should be protected from arbitrary suspension and removal because of student, faculty, administrative, or public disapproval of editorial policy or content. Only for proper and stated causes should editors and managers be subject to removal and then by orderly and prescribed procedures. The agency responsible for the appointment of editors and managers should be the agency responsible for their removal.

3. All University published and financed student publications should explicitly state on the editorial page that the opinions there expressed are not necessarily those of the college, university or student body.

V. Off-campus freedom of students

A. *Exercise of Rights of Citizenship.* Students of the University of Arizona are both citizens and members of the academic community. As citizens, students should enjoy the same freedom of speech, peaceful assembly, and right of petition that other citizens enjoy, and, as members of the academic community, they are subject to the obligations which accrue to them by virtue of this membership. Faculty members and administrative officials should insure that institutional powers are not employed to inhibit such intellectual and personal development of students as is often promoted by their exercise of the rights of citizenship both on and off campus.

B. *University Authority and Civil Penalties.* Activities of students may upon occasion result in violation of law. In such cases, University officials would be prepared to apprise students of sources of legal counsel and may offer other assistance. Students who violate the law may incur penalties prescribed by civil authorities, but Univer-

sity authority should never be used merely to duplicate the function of general laws. Only when the University's interests as an academic community are distinct and clearly involved should the special authority of the University be asserted. The student who incidentally violates University regulations in the course of his off-campus activity, such as those relating to class attendance, should be subject to no greater penalty than would normally be imposed. University action should be independent of community pressure.

VI. Procedural standards in disciplinary proceedings

In developing responsible student conduct, disciplinary proceedings play a role substantially secondary to example, counseling, guidance, and admonition. At the same time, The University of Arizona has a duty and the corollary disciplinary powers to protect their educational purpose through the setting of standards of scholarship and conduct for the students who attend them and through the regulations of the use of University facilities. In the exceptional circumstances when the preferred means fail to resolve problems of student conduct, proper procedural safeguards should be observed to protect the students from the unfair imposition of serious penalties.

The administration of discipline should guarantee procedural fairness to an accused student. Practices in disciplinary cases may vary in formality with the gravity of the offense and the sanctions which may be applied but in every case all circumstances of the case should be considered. The jurisdictions of faculty or student judicial bodies, the disciplinary responsibilities of University officials and the regular disciplinary procedures, including the student's right to appeal a decision, should be clearly formulated and communicated in advance. Minor penalties may be assessed informally under prescribed procedures.

In all situations, procedural fair play requires that the student be informed of the nature of the charges against him, that he be given a fair opportunity to refute them, that the University may not be arbitrary in its actions, and that there be provision for appeal of a decision. The following are recommended as proper safeguards in such proceedings.

A. *Standards of Conduct Expected of Students.* The University of Arizona has an obligation to clarify those standards of behavior which it considers essential to its educational mission and its community life. These general behavioral expectations and the resultant specific regulations should represent a reasonable regulation of student conduct but the student should be as free as possible from imposed limitations that have no direct relevance to his education. Offenses should be as clearly defined as possible and interpreted in a manner consistent with the aforementioned principles of relevancy and reasonableness. Disciplinary proceedings should be instituted only for violations of standards of conduct formulated with significant student participation and published in advance through such means as a student handbook or a generally available body of institutional regulations.

B. *Investigation of Student Conduct.* 1. Except under extreme emergency circumstances, premises occupied by students and the personal possessions of students should not be searched unless appropriate authorization has been obtained. For premises such as residence halls controlled by the University of Arizona, an appropriate and responsible authority should be designated to whom application should be made before a search is conducted. The application should specify the reasons for the search and the objects or information sought. The student should be present, if possible, during the search. For premises not controlled by the University the ordinary requirements for lawful search should be followed;

2. Students detected or arrested in the course of serious violations of University regulations, or infractions of ordinary law, should be informed of their rights. No form of harassment should be used by University representatives to coerce admissions of guilt or information about conduct of other suspected persons.

C. *Status of Student Pending Final Action.* Pending action on the charges, the status of a student should not be altered, or his right to be present on the campus and to attend classes suspended, except for reasons relating to his physical or emotional safety and well-being of students, faculty, or University property.

D. *Hearing Committee Procedures.* When the misconduct may result in serious penalties and if the student questions the fairness of disciplinary action taken against him, he should be granted, on request, the privilege of a hearing before a regularly constituted hearing committee. The following suggested hearing committee procedures satisfy the requirements of procedural due process in situations requiring a high degree of formality.

1. The hearing committee should include faculty members and students. No member of the hearing committee who is otherwise interested in the particular case should sit in judgment during the proceeding.

2. The student should be informed, in writing, of the reasons for the proposed disciplinary action with sufficient particularity, and in sufficient time, to insure opportunity to prepare for the hearing.

3. The student appearing before the hearing committee should have the right to be assisted in his defense by an adviser of his choice from the faculty, staff or student body.

4. The burden of proof should rest upon the officials bringing the charge.

5. The student should be given an opportunity to testify and to present evidence and witnesses. He should have an opportunity to hear and question adverse witnesses. In no case should the committee consider statements against him unless he has been advised of their content and of the names of those who made them, and unless he has been given an opportunity to rebut unfavorable inferences which might otherwise be drawn.

6. All matters upon which the decision may be based must be introduced into evidence at the proceeding before the hearing committee. The decision should be based solely upon such matter. Improperly acquired evidence should not be admitted.

7. In the absence of a transcript, there should be both a digest and a verbatim record, such as a tape recording, of the hearing.

8. The decision of the hearing committee should be final, subject only to the student's right of appeal to the President of The University of Arizona or ultimately to the Board of Regents.

[From the West Virginia University College of Law, May 1969]

THE ARROGANCE OF IMPOTENCE

(By J. Timothy Philipps)

(A certain quantum of power must always exist in the community in some hands and under some appellation. Edmund Burke, Reflections on the Revolution in France.)

Much has been written and said in the past months by the so-called new left and its apologists about the arrogance of power, the miscreances of the "establishment" and the outrages of the "power structure." The current intellectual fad (and it is just that, a fad) seems to be the pillorying of individuals, and more especially, institutions who represent the authority and accomplishments of our civilization. Little has been said, however, about the arrogance of impotence. If one notes the origin of the manifold diatribes directed against the power and authority of our social system one might perceive that the basic dissatisfaction of those from whom these emanate is precisely that others and not themselves are in a position to exercise effective control over the direction of our government and culture. This in itself might indicate something about the validity of the criticisms which have been made.

One might draw the inference that the real issue in the matter is not the efficaciousness of the values and ideals of one side or the other, but rather is simply which side, if any, is to occupy the dominant position in our society. This assertion is confirmed by statements such as that made by Mr. Mark Rudd who rose to notoriety as a result of last year's disturbances at Columbia University. When questioned about the motivations for the uprising, he candidly admitted that the alleged issues (e.g., the plans of the university to build a new gymnasium) were built up for the explicit purpose of providing an excuse for disruption.

The reasoning is simple. Disrupt, using as a basis any issue which happens to present itself. Make demands and continue to escalate them until they become so unreasonable as to be impossible to satisfy. Make the failure to meet demands a basis for confrontation. Use the confrontation to arouse sympathy among the passive and uncommitted. All of this is directed to the ultimate purpose of transference of total power to the disrupters. In short, revolution. Whatever other criticisms one might make of the new left, one certainly cannot accuse them of lack of candor.

The strategy is so well known that it is trite. The problem is, though, no one wants to believe them when they talk of such things as total revolution. To a rational mind their bizarre activities and fantastic aims seem so silly as to be a joke. But the fact is that these selfsame bizarre activities and fantastic aims can become a real threat. They are at this moment an imminent threat to one of our basic institutions, the university system. Witness the state of turmoil at so many places of learning where screaming marching and chanting have replaced the reasoned discourse so necessary to a functioning university. If our universities can be so easily undermined, it is not an altogether impossible notion that other of our institutions can also be. Surely, therefore, it is imperative to take this unhappy phenomenon seriously and to understand fully the logical implications of the philosophy which motivates those behind it. It is a threat to some of our most treasured values and institutions and must be faced.

[They] have a bigotry of their own; and they have learnt to talk against monks with the spirit of a monk. Edmund Burke, Reflections on the Revolution in France.

Still, the extremists are as yet basically impotent. They are able to disrupt but are not presently in a position to put into effect a program of action (if they have one). This leads to the reason for the title of this piece. The arrogant ones in our society are not those in positions of power. After all, a very prized value of the American "establishment" is toleration of diverse viewpoints and acceptance of the concept of the marketplace of ideas. The truly arrogant are the self-styled revolutionaries and their apologists. Their values are in their own eyes "absolutely true," their ideas and proposals are "non-negotiable," and they consider themselves entitled to resort to illegal force and violence to counteract their opponents because "error has no rights." It is interesting to note the parallels between this kind of thinking and that of earlier day religious fanatics. It may be that to the new left,

politics has replaced religion as the new fountainhead of dogma. In contrast to the reason and logic of the much maligned "establishment," emotion and irrational belief are the hallmarks of the new left; and these go hand in hand with arrogance.

The well publicized faith of many members of the new left in astrology is only one illustration of the dogmatism and irrationality inherent in the movement. The only other large scale Western political movement of recent times whose followers took widespread recourse to astrology was that of the German Nazis (another parallel that should not go unnoted). A further example of the abdication of rationality is the very tactics of dissent used by its adherent—lying down, going limp, spitting, screaming, name-calling—which are essentially characteristic of infantile behavior. The rule of law and reason is held in contempt; and the constitutional ideal of free, reasoned discussion, and tolerance for diverse viewpoints is in the words of the movement's philosophical messiah, Herbert Marcuse, "repressive and must, therefore, be suppressed." The disciples must go forth teaching all nations, and if a few individual freedoms are trampled along the way, this is perfectly all right, since it is all for a higher good.

It is easy to despise what you cannot get. Aesop, The Fox and the Grapes. People often grudge others what they cannot enjoy themselves. Aesop, The Dog and the Master.

If emotionalism and dogmatism are the hallmarks of the new left, how has it managed to gain the allegiance of a sizeable (though not substantial) number of University faculty members, whose profession has the avowed purpose of fostering rationality? S. I. Hayakawa has remarked that being alienated is a literary fashion among intellectuals today. This alienation seems to be most prounounced in the so-called soft subject areas of the liberal arts and social sciences. Often the liberal arts colleges of universities seem to be relegated by their administrations to a status subordinate to the technical and vocational schools. Those connected with the liberal arts are rightfully resentful and this may in some part explain the alienated attitude of some among them. But it is not the full explanation. If one examines the composition of faculty support for the new left one finds that it comes mainly from faculty members in the humanities and social sciences who are in the lower echelons of the academic hierarchy—those at the level of graduate assistant, instructor, and in some cases, assistant professor. These people are, as matters now stand, the least able by their position and training to modify the structure of existing institutions within the authorized framework for change. At the same time, the very nature of their fields of interest tends to breed within them an attitude of hubris—they have the answer to the problems of mankind if only someone would heed them. They are thus impotent and at the same time arrogant. How appealing the calls of the new left for revolutionary change must be for persons with such attitudes!

A little fire is quickly trodden out which, being suffered, rivers cannot quench. Shakespeare, King Henry VI.

So we have the paradox of the arrogance of impotence. Those essentially without power lay claims to certitude in judging the affairs of their fellow man, and therefore demand that the power be handed over to them. When their demands are not met they react in ways typical of the frustrated infant. As yet these reactions have not seriously disrupted our existing institutions (with the exception of some of our universities). It must be borne in mind, however, that self-righteousness is a very contagious phenomenon. The time has come for the arrogant ones to be reminded that the right to be heard does not include the right to be heeded; that the right to dissent does not include the right to decide the case. The excesses of the new left in the recent past have gone far beyond the bounds consonant with and essential to a free society. Those devoted to the principles of rationality and civility must take the aberrations of the fanatical few seriously lest they cease to be merely aberrations; they must make it clear that the rule of law and reason cannot co-exist with the rule of unlawfulness and irrationality. They must be willing to realize that in the words of Edmund Burke, "There is . . . a limit at which forebearance ceases to be a virtue."

COMPREHENSIVE NATIONAL HEALTH INSURANCE

Mr. KENNEDY. Mr. President, last week in New York City, the Committee for National Health Insurance sponsored a highly significant 2-day conference to consider a major new proposal for a comprehensive health insurance plan covering all Americans. The CNHI was formed in November 1968 under the chairmanship of Walter P. Reuther, president of the United Auto Workers, in order to mobilize broad support for basic changes in the financing and delivery of health care in the United States. The vice chairmen of the committee are Mrs. Albert Lasker, Whitney M. Young, Jr., and Michael E. DeBakey, M.D. I am privileged to serve as a member of this committee, along with my colleagues Senator YARBOROUGH and Senator COOPER, and a large number of other distinguished public officials and private citizens in the Nation.

In his opening address to the conference last week, which was attended by many of the members of CNHI as well as by representatives of 65 national organizations, Walter Reuther spoke eloquently of the contemporary health crisis in the Nation. He emphasized the need to develop a health insurance system uniquely adapted to the needs and capabilities of health care in the United States, and urged the members of the conference to renew their efforts to achieve this goal.

One of the principal purposes of the conference was to consider tentative specifications for a national health insurance program. These specifications were prepared under the leadership of Mr. Reuther and Dr. I. S. Falk, professor emeritus of public health at Yale Medical School and chairman of the technical committee of CNHI. As Dr. Falk made clear in his address to the conference, the specifications for the program are intended to be only a preliminary formulation. According to the committee's current schedule, it is hoped that these proposals will be refined and that specific legislation implementing the committee's final program will be available for introduction early next year, at the beginning of the second session of the 91st Congress.

Mr. President, I believe that the committee's tentative proposals are a major new contribution toward the development of a comprehensive national health care program for our citizens. I commend Mr. Reuther and Dr. Falk for their extraordinary progress, and I look forward to the future development of the CNHI program. I believe that the proposals presented to the recent conference will be of interest to all of us in Congress and elsewhere who are concerned with the cause of better health care for all our people.

I therefore ask unanimous consent that the following materials be printed in the RECORD: a press release of the Committee for National Health Insurance announcing the conference and listing the officers and members of CNHI and some of the organizations represented at the conference; the opening address by Walter Reuther to the conference; and the statement of Dr. I. S. Falk to the conference, including an appendix containing the tentative specifications for the committee's national health insurance program.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[A press release from the Committee for National Health Insurance, Oct. 12, 1969]

WASHINGTON.—Representatives of 50 national organizations will meet October 14–15 in New York to examine proposed solutions to the critical problems afflicting America's health care services.

The two-day conference of Interested Organizations was convened by the Committee for National Health Insurance. CNHI Chairman Walter P. Reuther, in a letter of invitation to representatives of the national organizations, said:

"The conference will bring together leaders of health, labor, industry, consumer, insurance and other interested organizations to examine proposed solutions to the critical problems of financing and organizing health services."

"The problems are well known; we want to focus on solutions."

Referring to the work of the Committee for National Health Insurance, Mr Reuther said:

"We believe we have formulated a sound, new approach to improvement of the health care delivery system. Our concept of national health insurance has as its basic goal a reordering of the organization of health services, retaining and strengthening useful aspects and replacing the outmoded.

"We hope our program will serve as a stimulant to conversation at the meeting and produce a cross exchange of ideas from which clarifications and improvements will emerge . . ."

The Committee for National Health Insurance is a committee of one-hundred prominent Americans from all walks of life working for the achievement of national health insurance as a means of restructuring America's health services.

In addition to members of CNHI, leading representatives of at least 50 organizations have signified their intention to attend the two-day conference, among them:

Amalgamated Meat Cutters and Butcher Workmen of North America.
American Academy of Pediatrics.
American Association of Medical Clinics.
American Dental Association.
American Dietetic Association.
American Federation for Clinical Research.
American Federation of State, County and Municipal Workers.
American Federation of Teachers.
American Hospital Association.
American Medical Association.
American Nurses' Association.
American Nursing Home Association.
American Optometric Association.
American Osteopathic Association.
American Osteopathic Hospital Association.
American Patients Association.
American Podiatry Association.
American Psychiatric Association.

American Psychological Association.
American Public Health Association.
Association of American Medical Colleges.
Blue Cross Association of America.
Catholic Hospital Association.
Consumer Federation of America.
Daycare Center Association of America.
Episcopal Church.
Group Health Association of America.
International Brotherhood of Teamsters.
International Union, United Auto Workers.
Medical Committee on Human Rights.
Medical Group Management Association.
National Association of Blue Shield Plans.
National Association of Social Workers.
National Association of State Mental Health Directors.
National Consumers League.
National Council of Churches.
National Council of Senior Citizens.
National Institutes on Rehabilitation and Health Services.
National League for Nursing, Inc.
National Medical Association.
National Rural Electric Cooperative Association.
National Urban Coalition.
National Urban League.
Pharmaceutical Manufacturers Association.
Private Health Insurance Industry.
Regional Medical Programs Association.
Student American Medical Association.
Student National Medical Association.
The National Assembly.
United Methodist Church.
United Mine Workers of America.
United Presbyterian Church.
United Rubber, Cork, Linoleum & Plastics Workers of America.
United States Catholic Conference.
United States Youth Council.

THE COMMITTEE OF ONE-HUNDRED

Rev. Ralph D. Abernathy.
Arthur Altmeyer.
Guillermo Arbana, M.D.
George Baehr, M.D.
Rabbi Leonard Beerman.
Peter Bommarito.
Lester Breslow, M.D.
James Brindle.
Mrs. Mary I. Bunting.
Martin Cherkasky, M.D.
John Sherman Cooper.
William S. Crowles, Jr.
Tony Dechant.
Paul Douglas.
Stanley Dreyer.
Robert H. Ebert, M.D.
William N. Enes.
I. S. Falk, Ph.D.

AMERICA'S CHALLENGE: A NATIONAL SYSTEM TO ORGANIZE AND FINANCE PERSONAL HEALTH SERVICES TO MEET THE NATION'S HEALTH NEEDS

(By Walter P. Reuther, chairman, Committee for National Health Insurance)

I am very pleased to welcome each of you to this Conference of National Organizations which is sponsored by the Committee for National Health Insurance. We are delighted that 65 national organizations with major interests in the health field have accepted our invitation. We look forward to sharing with you during the next several days what we consider to be a very important matter on America's agenda of unfinished business: the question of how a free society goes about organizing health care services to meet the basic needs of its people.

I think that all of us are aware of the fact that we live in a very difficult time in the history of the world and a very difficult time in the history of America. This is truly a time for testing the values that we believe in as a free people. It is a time of revolutionary change, of challenge and of deep crises in many aspects of our national life. We have a crisis in our cities. We have a crisis in education. We are polluting our air and water. Our living environment is deteriorating dangerously. We have a crisis in housing, and one of the most serious crises we face is in the area of health care services.

We believe, as do many Americans, that this is a time when the American people need to reorder their national priorities, to put first things first, to commit ourselves and our resources in a measure equal to the dimensions of the problems that we face.

Like almost every other American and millions of people around the world, we were thrilled when Neil Armstrong left man's footprints on the moon. What impressed me in that historic achievement was not the fact that America has great scientific and technological capability. I think we've known that for a long time. I think the real lesson to be learned from that historic mission is that America is capable of doing almost the impossible if we make a national commitment and we are prepared to allocate resources to carry it out.

We went to the moon because President Jack Kennedy made a commitment for the nation, and we allocated the resources necessary to carry out that commitment. We share the view that we will not deal effectively with the many problems at home until America reorders its priorities and until we all make a comparable commitment in terms of the national will and the allocation of our national resources.

Our Committee for National Health Insurance developed in response to the growing realization in America that the crisis in health care is becoming progressively more serious. Leaders from medicine and public health, labor and business, religion, the law, the universities, civic organizations and the civil rights movement, young people—from all walks of American life have joined our Vice-Chairman, Dr. Michael DeBakey, Mrs. Mary Lasker, Whitney M. Young., Jr., and me in mounting this effort to bring about fundamental changes in the financing and delivery of health care services.

The cost of health care is sky-rocketing. It represents the most inflationary single factor in the upward movement of the price index. The cost of medical care over the past decade has risen at almost twice the rate of the movement of the general price index. If we are going to fight inflation, as we must, we have to look at the increasing cost of health care and realistically begin to deal with the sources of the problem.

We are told that in 1969 American people will spend approximately 60 billion dollars for health care services, almost five times more than we spent in 1950. This represents the second largest expenditure out of our gross national product, 6.5% of the total. It is second only to the fantastic sum of over 81 billion dollars we are spending for military purposes. We spend more money in total and a larger percentage of our Gross National Product for health care than any other nation in the world. Yet despite this, we have not provided the American people with the kind of comprehensive high quality health care services that we have the knowledge and the affluence to provide. We are not getting the maximum yield from our expenditures because we lack effective organization for the delivery of health care services. Ours is a non-system.

I have said on many occasions that the quality of our society will be judged neither by the measure of our material wealth nor by our productive potential, nor by the level of our technological progress, nor by the quality of our gadgets, nor by the brightness of the chrome on the new Cadillacs and Continentals we turn out in Detroit. The real quality of a society should be measured by how that society orders its priorities, allocates its resources, and demonstrates both the sense of social and moral responsibility needed to translate technical progress into human progress and in finding answers to basic human and social needs.

I believe that in no area of our national life is there a greater or more dangerous gap between promise and performance, between capability and competence and translation of that competence and capability into practical performance than in the field of health care services. Our gross national product will soon exceed one trillion dollars; yet we currently rank 14th among the major industrial nations of the world in the rate of infant mortality and we rank 12th among the industrialized nations of the world in the percentage of mothers who die in childbirth. We rank 18th in terms of life expectancy for males and 11th for females. The death rate among middle-aged males in America is higher than in any country in Western Europe and in many other nations.

These figures do not reflect the true proportion of our crisis in health care. In no industrialized nation in the world is the gap between the haves and the have-not people in their respective ability to gain access to adequate health care as wide as in the U.S. Infant mortality among non-white babies is more than double that among white babies. Death and disease rates in the poorest states

are much greater than the rates in the most affluent states.

One of our problems in America is that too often we have relied upon the marketplace to find answers to these basic problems. The marketplace in America has provided us with unprecedented volumes of gadgets, but the marketplace is incapable of responding adequately to meet basic human rights and needs such as health care services.

My associates and I at the UAW have been privileged to work at the bargaining table with the very competent representatives of a large number of insurance companies over the last 30 years trying to find answers to health care problems. But the insurance industry, despite a massive effort, has failed to provide universal, fully comprehensive health insurance coverage at a price within the reach of all people.

The dimensions of the problem are beyond the capability of any private sector in America. When you look at the tragic and what I think are shocking and shameful facts, you find that in 1968, of the 178 million Americans who were under the age of 65, 13% or 24 million, had no hospital insurance whatsoever; 20% or 30 million, had no surgical insurance; 34½% or 61 million Americans, had no in-hospital medical expense insurance; 50% or 89 million, had no out-of-hospital x-ray and lab coverage; 57½% or 102 million Americans, had no insurance for doctors' office visits or home calls; 61% or 108 million Americans, had no prescription drug coverage; and 95½% or 173 million Americans, had no dental care insurance.

In dollar terms only one-third of private consumer expenditures for health in 1967 were paid from insurance; two-thirds of the costs came directly out of our pockets and purses. The insurance industry has made this massive effort over 20 years, and has applied great competence to this effort, yet these are the results. Clearly, the private industry is not capable of dealing with the dimensions of this basic problem. It cannot deal with the problem of universal coverage nor can it provide an adequate mechanism for dealing with the control of both quality and of cost. It has been significantly unable to modify the current disorganized delivery system.

Our public programs are also limited in effectiveness. For example, Medicare covers less than 45% of the basic health care costs of our aged citizens. Medicaid is proving totally incapable of meeting the real and pressing needs of the disadvantaged poor and its expenditures have skyrocketed due to unjustified inflation.

Because the dimension of this problem are so overwhelming and because the cost of health care is sky-rocketing, there is a growing understanding that we need to begin to deal with these problems more realistically and comprehensively. We can't just put more and more billions into a non-system because all we would be doing is continuing to waste our precious resources without finding answers to many central unresolved questions. This is what I believe motivated the Governors in their recent annual conference to adopt a resolution which called for a federal system of universal health insurance. They didn't spell out the details, but this meeting today is designed to promote discussion of possible approaches which would be responsive to the needs the Governors so well understood.

Recently Secretary Finch of HEW broadened the charge of his Task Force on Medicaid and Related Programs to include exploring the feasibility of a universal health insurance system. The American Hospital Association has formed a committee to study and report on this subject. And many, many groups throughout America including the American Medical Association, the National Medical Association, the American Public Health Association, and other health groups, in recognition of the growing crisis in health care are beginning to explore the feasibility of various new approaches.

President Nixon in his recent statement dealing with the crisis in health care pointed out that in the absence of revolutionary changes the system would collapse. We believe that his diagnosis was correct although his proposed cure was inadequate and unrealistic. We can't solve this problem in our judgment by simply relying on ever greater expenditures, tax offsets or other purely financial remedies. What we need is basic surgery to substitute for the present non-system a new system that begins to bring about more effective and technologically advanced forms of organization of our national health resources and health services.

We need to recognize that we have a kind of Model T health care system and that a Model T is not adequate to meet the health care needs of the space age. I think it is important we understand that the system does not need simply a tune-up or a new set of spark plugs. We ought to take the old Model T system out and put it in a museum where museum pieces reside peacefully with the past.

An up-to-date system of personal health services can only be structured around and can only be implemented through a universal health insurance system. We are the only democratic nation in the world that has not shown the wisdom and the good sense to move in the direction of organizing a national health insurance program for personal health services.

As you will gather from the presentation today of our Technical Subcommittee, the Committee for National Health Insurance does not propose a system of socialized medicine atlhough these terms will be thrown about as they were when we talked about Blue Cross in the early days. When the UAW first sat at the bargaining table in 1940 to talk about the first Blue Cross-Blue Shield plan, we were charged by many people, including especially the medical profession, with travelling the road to socialized medicine. The General Motors Corporation took a similar view. We worked hard to build the "Blues" plans because we believed they represented a significant historic forward step at the time when we had no insurance whatsoever.

Today, however, we must move on and develop new instruments to provide the kind of modern, effective health services to which all people will have access.

We do not propose to borrow or transplant the health insurance system of any other nation because we believe that our problems and our capabilities are different. What we need to do is to develop a uniquely American system which will preserve the best features of the current delivery system while dealing with its basic organizational and financial deficiencies in order to make possible the provision of comprehensive, equitably and soundly financed high quality care on a universal basis.

We believe the approach which we plan to recommend to the nation is fully compatible with the unique values of a free society. We do not believe that the answers can be found either in a continued reliance on the medical marketplace or in the dictates of a rigid bureaucratic system. We believe it is possible to structure a health care system that will meet our needs while providing a wide degree of choice and experimentation in the use and development of a better delivery method. We want a system that will eliminate the waste and the inefficiency of the present non-system—a system, moreover, that will bring the poor into the mainstream of medical care—a system that can in an organized and rational fashion begin to bring about the effective use of our health manpower, facilities and economic resources.

Most of the labor movement is involved in health care and insurance not only at the bargaining table but in the community. I will be sitting down at the bargaining table representing UAW members next year with officers of some of the largest corporations in America—General Motors, Ford, Chrysler and others. We will be bargaining about health care services. But we have learned that for almost every additional dollar we bargain and pay for, we wind up with far less than a dollar's worth of improved health care services. Much of our money goes to subsidize inappropriate forms of care and the inefficiencies, gaps and waste in the present non-system. We are no longer willing to bargain hard, to fight hard and in some cases to walk the picket-line when the yield we get is only a fraction of what it should be. And, therefore, we have a right, as consumers of health care, to insist that one dollar of consumer purchasing power buy one dollar's worth of appropriate and reliable health care services.

Now we meet here this morning not in the spirit that we have all of the answers, because we know that this is a very complex problem and that there are no simple answers. But it is a problem we are capable of solving if there is a spirit of good will and cooperation among all of the people who share responsibility for providing the kind of universal high quality comprehensive health care that we believe the American people have a right to expect. And so we come here not to give you the final details of a national health insurance system, but to seek your participation, as part of a working conference, in examining proposed solutions developed after months of intensive study by a panel of distinguished experts headed by Dr. I. S. Falk, eminent Professor Emeritus of the Department of Epidemiology and Public Health at the Yale Medical School.

We hope you will give us the benefit of your reactions and judgments in three panels which will be chaired by Dr. Lester Breslow of the Medical School of UCLA, Dr. Myron Wegman, Dean of the University of Michigan School of Public Health, and Dr. James Haughton, First Deputy Health Administrator of New York City. We welcome not only your ideas and your suggestions but your constructive criticism.

Those of us who are participating on the Committee for National Health Insurance share the view that access to good health in a free society is a matter of right and not a matter of privilege. We have unlimited faith in the capability of free men and of free institutions to work together to find answers to this basic human problem. We believe that America can find answers and that we can provide the kind of personal health services that all the American people have a right to share on the basis of equality. We believe also that the hour is later than we think and that this is the time for action.

Tentative Specifications for National Health Insurance

(A report from the Technical Committee of the Committee for National Health Insurance submitted by I. S. Falk, Chairman of the Technical Committee, to the Conference on National Health Insurance, New York, Oct. 14, 1969)

Mr. Chairman, Members of the Conference, it is my privilege to submit to this Conference, as an agenda paper, tentative specifications for national health insurance developed by our Technical Committee.

I would, first, preface my remarks about the agenda paper by emphasizing that this is a preliminary formulation. Some of the specifications are firm and unequivocal, directly reflecting the Statement of Principles on which the Committee for National Health Insurance takes its stand. Others are highly tentative, being still in course of development. And still others, needed for the series, have yet to be developed. We welcome the opportunity provided by this Conference to have the benefit of review from all who have

an interest in the potentials and the implications of national health insurance.

Second, I would summarize for you our Technical Committee's guidelines when developing the specifications. Our primary concern has been—and continues to be—the Nation's need for good medical care to be available to the whole population. We proceeded with the firm conviction that, while we do not now have such availability in the United States, we can have it. We therefore undertook to design the plan for a program that would resolve many inadequacies in the present resources and, by building upon what we have, could become a program adequate for the delivery of good medical care for the Nation.

Our system of specifications starts with the intention to implement the *Principles* of the Committee for National Health Insurance. Within this framework, we do not propose a program limited to the poor and near-poor, believing that such separate provision would further ghettoize medical care for the disadvantaged. Instead, we would encourage the development and strengthening of one system that would bring all within a single mainstream of good medical care. We therefore propose equal eligibility for all the benefits of national health insurance to all who are resident in the country, identifying only minimal exclusions.

We propose financing which should be total, adequate, equitable and assured. To this end, we exclude deductibles and other financial barriers to needed care, whether early or late in the course of treatment, because we would encourage the receipt of medical care when it is needed. We would especially encourage easy and early access to medical care, in order to improve the potential capacity of the health professions to prevent disease which is preventable and to control the progressive development of disease and disability that cannot yet be prevented. We are well aware that the program we envisage would involve large sums. Most of the cost, however, would be only a re-channeling of what is already being spent—much of it being spent badly, wastefully and ineffectively whether from private or from public funds; and the total cost would be well within the means of our large national economic capacity.

Our Technical Committee has not been content merely to propose pumping more money into an already burdened and strained manifold of resources for medical care. To be sure, we must start with where we are, what we have, and how the existing resources perform. We have tried, however, to build into our plan various incentives for an orderly evolution toward an adequate system for the delivery of medical care. We propose new financial and other supports to help overcome shortages and, through better organization, to extend the reach and the productivity of personnel and facilities. And we intend that these measures should be implemented directly, not in some long-distant future.

Our Committee has been mindful that, along with very substantial national achievements under Medicare and Medicaid, there has been some unfavorable experience. We believe such experience has resulted mainly from the undertaking to expand the financial support of services without at the same time making an adequate effort to improve their organization. This is a mistake we do not propose should be repeated—or continued. On the contrary, we believe that only a social insurance program which provides vigorous support for better organization as well as adequate support for the services is capable of meeting national needs and of justifying what it will cost the Nation. Only such a program can contain or moderate the steeply rising costs of present health services without compromising either the comprehensiveness or the quality of the medical care provided through its finances. We believe it can be a program which would be as fair and acceptable to those who provide the services as it would be beneficent to those whom it will serve.

Our Committee has appreciated that the system we propose may require development in stages. If it should, all the more reason—we have thought—that the specifications should express the goals clearly and incisively, lest the staging of development become haphazard or dictated only by convenience or compromise.

These have been our guidelines. As we turn now to the specifications, you will have a basis for judging the merits of the proposals and for joining with us in their review. We invite you to examine them critically and to help us develop them further. We especially invite your comments where we have indicated awareness that our specifications are inadequately developed, and where there are well known diversities of opinion about the potential scope, financing and administration of national health insurance.

APPENDIX—SUMMARY OF TENTATIVE SPECIFICATIONS FOR NATIONAL HEALTH INSURANCE

1. POPULATION COVERAGE AND ELIGIBILITY FOR BENEFITS

a. Coverage should be as nearly "universal" as feasible for all residents of the USA, with no other requirements for eligibility to the services made available under NHI; and

b. Exclusions may extend to groups beyond the "reach" of payroll and related taxes, but should not extend to any groups merely because they are also eligible for services under other persisting (categorical) programs.

2. SCOPE OF AVAILABLE SERVICES

a. NHI should extend to the entire range of services required or useful for the maintenance of personal health. Qualifications and limitations should be only those that are dictated by inadequacies in personnel, facilities, or in organizational patterns;

b. If limitations or exclusions are unavoidable, they should be treated as temporary provisions; and, to the maximum extent feasible, should be subject to elimination by authorized administrative decisions;

c. If "staging" of benefits is unavoidable, as far as practical priority should be given to ambulatory over inpatient services, and to primary care over referral and specialty services; and

d. Further discussion is needed—and is invited—concerning the scope of "medicines" and "dental care" as benefits under NHI, and concerning the proposed exlusion of mental *hospitals* (but not of other mental health services).

3. ORGANIZATION FOR THE DELIVERY OF SERVICES

a. To the maximum extent practical, services should become available through organized arrangements, designed to encourage comprehensive and continuing care of good quality; and financial and other requirements and incentives (and disincentives) to this end should be incorporated into the design of the benefits and payments;

b. Group practice of health care personnel, and regional coordination among group practices, hospitals and related facilities should be prescribed as goals, but implementation should be made as flexible as possible; and

c. Financial and other incentives should be provided for group practice providers whether they serve a defined and delimited population or an open-ended practice; and such incentives should extend to the support of education and training for the staffing of group practice.

4. PARTICIPATION OF PROVIDERS

a. Eligibility to participate as providers should extend to all who may usefully participate in the full spectrum of benefit services;

b. For personal providers, licensing should be the minimum requirement. Federal standards for participation should apply in any State whose standards are less and to categories for which there are no acceptable State standards; and, after a grace period, no payments under NHI should be made to providers who do not meet the Federal standards;

Query: Should the Federal standards require periodic re-licensure; and if yes, how often? Or should they require participation in (approved) continuing education or training? Both?

Query: Suggestions as to the content of desirable Federal standards?

c. For facilities, Federal standards may (?) shall (?) go beyond current provisions for certification and accreditation in Medicare; and such standards may (?) should (?) require "linkages" among facilities and services—with financial incentives and disincentives or penalties;

Query: Suggestions as to the desirable Federal standards for facilities and for local and regional inter-relations; and as to incentives and disincentives?

d. Service performances by personal providers and institutions shall be reported in sufficient detail to provide a basis for peer medical data review for outpatients as well as for inpatient services, and such reporting shall be a prerequisite to payments under NHI;

e. The payment procedure and specifications should reflect and implement the requirements for participation and acceptable performance for personal providers and institutions; and such specifications should extend to scope of services, standards of service, payments with respect to capital investment in facilities and equipment, and (for nursing homes and home care programs) required affiliation with qualifying hospitals;

f. Special financial and other incentives should be provided to encourage the organization of professional, technical and supporting personnel into health teams and groups capable of providing comprehensive health care for families and individuals efficiently and effectively, with compensation through comprehensive *per capita* payments as an alternative to the fee-for-service method of payment in an area. This should apply especially to payment on a comprehensive capitation basis to existing organized groups serving a defined or delimited population in a geographical area in which providers are generally paid on a fee-for-service basis; and

g. Incentive payments should also extend to hospitals for the expenses of providing bases for health care teams; and hospitals and other facilities should share in the cost savings which result from the lowered rate of hospitalization under group practice arrangements.

5. METHODS OF PAYMENT TO PROVIDERS

a. The general policy is to assure the availability of services, not to provide indemnification for costs incurred. Consequently, NHI should undertake—as far as it can—to make total and fully adequate payments to the providers of the services without requiring any such payments from those who receive the services;

b. The methods of payment have to start with the *status quo;* but NHI should include incentives for the development of a more desirable system of methods of payment which is without deductibles, barrier payments, "hesitation" charges, co-insurance, indemnifications, or exhaustions;

c. Independent (i.e., non-institutional based) physicians and other providers should have the right to elect among fee-for-service, capitation, salary, etc., methods of payment;

d. Statutory guidelines should apply to methods and rates of payment to hospitals

and other institutions. NHI should *not* undertake (as under Medicare) unlimited full reimbursement of production costs; instead, NHI should provide for reimbursements bounded by maxima, by capitation rates, or by other limitations including maximum permissible rates of annual cost escalation. Various designs require further study. Where such payments are based on reimbursement of costs incurred in the production of services, delimitations should apply to reimbursement of capital costs as well as to maximum rates of payment for operating costs. Where such payments are based on capitation payment, the guidelines should be adapted administratively to ensure equitable rates of payment within the applicable regional ceilings;

e. Special provisions should be developed—by adaptation of statutory general guidelines—for equitable methods and rates of payment to the several categories of providers (doctors, hospitals, nursing homes, medicines, optometric and other appliances, etc.); and

f. NHI should provide fiscal and other incentives toward the grouping, affiliation or integration of providers, moving away in the course of time from fractionated fee-for-service payments and moving toward hospital-affiliated or hospital-based medical groups, in order to stimulate better organization within and between institutions.

AVAILABILITY OF SERVICES

a. The general policy objective is that services shall be available without direct charges or costs at the time the services are needed or utilized. As far as may be feasible, there should be no direct financial barriers to the receipt of needed services that are available under NHI—no deductibles, no barrier or "hesitation" charges, no co-insurance, etc. If there are to be exceptions, they should apply only to those limited areas in which charges to the patients are demonstrably related to effective utilization and/or to necessary fiscal controls—as with respect to some aspects of dental care, eye glasses, or medicines;

b. Primary care should be emphasized under NHI and, where necessary, should be given priority in the development of NHI availability of services. The entry point of the system should be through "the family physician." Fiscal and other incentives should be provided for the development of "local area health centers" affiliated with approved hospitals and especially as the functional locus for both the primary physicians and the referral personnel (specialists and supporting professional and technical services);

c. In general, NHI should pursue the policy of encouraging access to specialists through referral from the family physician. Initially, this policy should be administered loosely, authorizing payments to specialists utilized on self-selection by the patient and upon direct access by the patient; but this transitional policy should be superseded as rapidly as feasible by a policy restricting payments for specialty services only on referral;

d. Except in emergency and unusual circumstances, payments for major surgery should be authorized only on a referral basis and for performance by board-eligible and board-qualified surgeons. A corresponding policy should be encouraged as strongly and as rapidly as feasible with respect to payments for other services provided on a specialty basis; and

e. Further study should be undertaken on the design of specifications for controls to discourage or prevent primary physicians from "dumping" referrals on the specialists.

7. ADMINISTRATION

a. The general pattern for the administration of NHI should be developed with regard for three broad levels of administration: National; regional; and state, district and local. The Office of National Health Insurance Administration should be lodged in DHEW, under the Secretary, with "bridges" to other related administrations, bureaus, etc., within DHEW and in other Departments;

b. NHI should be administered by an Administrator, in association with a National Advisory Council which includes representatives of consumers as well as of providers and, also, national representatives-at-large. The statute should require the Secretary and the Administrator to consult the Advisory Council on all matters of general policy and to have the Council's review and advice on all general aspects of program plans and operations and of proposed rules and regulations. The Council should be authorized to have its own technical staff and to make an annual report to the Congress on consultations and recommendations;

c. The Secretary should be authorized and directed to invite the states to undertake various activities of NHI in which they may play useful contributory roles; and the states should be reimbursed for appropriate expenditures incurred in performance of functions as agents of NHI;

d. Advisory Councils, with corresponding composition and with similar functions applicable to the lower levels of administration, should also be provided at regional, state and local administrative levels;

e. When devising the administrative structure and allocations of functions, the Secretary should provide for appropriate functional roles for voluntary (non-governmental) health organizations as agents of NHI; and

f. Since NHI should undertake to assure the availability of a broad spectrum of services to all eligibles throughout the country, it should have fiscal resources to take all necessary and practical measures toward assuring that availability. The Secretary should therefore have assured funds available, through an earmarked portion of annual income to (or of annual expenditure from) the Trust Fund, to make grants for needed education, training, facilities, organizational developments, demonstrations, etc., toward achieving that availability of services as rapidly as possible. These funds should be allocated by the Secretary, on recommendation of the NHI Administrator after consulting with the National Advisory Council, among various program activities. With respect to these developmental funds, the statute should require that they shall be allocated after consultation with, and should be expended in collaboration with, the administrative agencies in DHEW and other Departments responsible for grants or loans in closely related program areas.

8. FISCAL PROVISIONS

a. The NHI program should be financed by contributions from employers, employees and self-employed persons, and from general tax revenues—preserving present provisions which permit employer assumption of all or part of contributions required of employees for social insurance purposes;

b. Financing should be effected through the mechanisms which are now well-developed and time-tested in the financing of the national social insurance system of Social Security (OASDHI), utilizing the Treasury Department and the Trust Fund procedures;

c. The provision for earmarked funds to support necessary and desirable innovative undertakings and demonstrations should be effected through the Trust Fund; and these funds should be available for use with broad administrative discretion by the Secretary and his National Advisory Council; and

d. It is tentatively assumed that two-thirds of the fiscal resources of NHI should derive from "payroll" taxes (with or without a ceiling on taxable earnings) and one-third from Federal general tax revenues.

[It is proposed that state and local governments, though relieved of various service and expenditure obligations, should not be required to participate in the financing of NHI.]

9. RELATIONS WITH OTHER PUBLIC AND PRIVATE PROGRAMS

a. The development of comprehensive NHI would involve the absorption of many—but not necessarily the absorption of all—existing delimited and categorical programs which provide for the availability and/or the financing of personal health services. Which should persist—temporarily or permanently—as collateral programs, and which should be absorbed into NHI, involve inspections program by program. Account has to be taken of many factors, including consideration of the pace at which the NHI program moves toward its comprehensive maturation and assures equal access of all residents to all needed and available services;

b. Enactment and implementation of NHI should provide for the absorption of such public tax-supported programs as: Medicare, Medicaid, services for civilian dependents of the Armed Forces, etc., and other similarly readily amenable to absorption in the interest of systematic rationalization for all eligibles under NHI. In each case, persistence of an existing program should be provided for so long, and only to the extent, that the NHI services (benefits) are narrower than those available under the existing categorical program;

c. NHI should not undertake to absorb and supplant certain highly specialized, delimited and categorical public programs, e.g.: The medical care programs for the uniformed personnel of the Armed Forces; the "hospital" program of the Veterans Administration; the special area-delimited programs for Indians, Eskimos, and other "wards" of the Federal Government; the marine and other hospital programs of the PHS; the intra-mural health and medical care provisions of schools, custodial and correctional institutions; and perhaps others. And NHI should not pay for services provided in these persisting special and delimited programs. However, all persons eligible for service under these persisting programs (except Armed Forces personnel on duty) should be eligible for services under NHI;

d. NHI should absorb the personal health service aspects of the maternal and child health and the crippled children's program, but not their community-wide health service activities;

e. Whether NHI should or should not absorb the medical care aspects of programs which involve close coordination with provisions for income-maintenance or indemnification for income-loss requires further study: E.g., under workmen's compensation, and state temporary disability insurance; and

f. It is assumed that private insurance which applies to services or costs which are—or come to be—included in the benefits of NHI will terminate, but that such insurance may persist with respect to services and costs that are not included—and for so long as they are not included—in an evolving NHI program. To what extent and with what functions the private insurance carriers participate as administrative agents of NHI should depend upon conclusions yet to be reached with respect to the structure of the NHI benefit and administrative systems and their needs. This, obviously, invites further careful review.

TAX REFORM NOS. 7 AND 8: DEMOCRATIC STUDY GROUP TAX REFORM FACT BOOK

Mr. METCALF. Mr. President, today I shall make available the last two sections

of the Tax Reform Fact Book prepared by the Democratic Study Group in the House of Representatives. These sections deal with a rather long list of tax preferences, as well as the subject of tax relief. The Committee on Finance has already completed its consideration of several of the important areas listed in these sections of the book.

For example, on October 13 the committee agreed to repeal the unlimited charitable contribution deduction over a 5-year period. This is the same period provided for by the House bill. However, the committee did modify the House version so that certain features of the House bill would not apply in the case of the unlimited charitable contribution deduction. The excepted features of the House bill would be the inclusion of appreciated charitable gifts as tax preferences within the limit on tax preferences and allocation of deduction rule, the allocation of the charitable deduction, the 30-percent limit on gifts of appreciated property, and the appreciated property rule in the case of property which would give rise to a long-term capital gain if sold.

On October 9 the committee agreed to eliminate State and local bond interest from the limitation on tax preference and allocation of deductions provisions of the House bill. The committee also agreed to delete that provision in the House bill which would provide a subsidy for States and local governments which choose to issue their bonds on a taxable basis and pay competitive market rates of interest on them. When Assistant Secretary of the Treasury Edwin S. Cohen testified before the Finance Committee on September 4 he was asked what the revenue loss would be if State and local bond interest were eliminated from the limitation on tax preference provision contained in the House bill. He was asked this question because the administration is vigorously opposed to the continued inclusion of tax-exempt interest in the LTP provision of the House bill. According to Mr. Cohen, the annual revenue loss would be $35 million. He was also asked how much additional revenue would be lost by eliminating tax-exempt interest from the allocation of deduction provision and his answer to that question was an annual revenue loss of $45 million—part 1, Senate hearings, page 662. This means that if the Finance Committee's decision is finally accepted the revenue loss over the House-passed bill would total $80 million a year.

On September 25, I submitted an amendment to the House-passed bill that would impose a minimum income tax on certain untaxed income of both individuals and corporations. In addition, my amendment would require allocation of deductions between taxed and untaxed income of individuals as well as corporations. Before the tax reform bill is reported by the Committee on Finance, I hope to obtain a revenue estimate as to its affect.

Mr. President, so that Senators may study the details of my amendment now, I ask unanimous consent that it be printed at this point in the RECORD.

There being no objection, amendment No. 206 was ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 206

Page 165, beginning with line 7, strike out all through line 8, page 180, and insert the following:

"SUBTITLE A—TAX ON CERTAIN UNTAXED INCOME AND ALLOCATION OF DEDUCTIONS

"SEC. 301. TAX ON CERTAIN UNTAXED INCOME.

"(a) IMPOSITION OF TAX.—Subchapter A of chapter 1 (relating to determination of tax liability) is amended by adding at the end thereof the following new part:

"'PART VI—ADDITIONAL TAX

"'Sec. 55. Imposition of tax.

"'SEC. 55. IMPOSITION OF TAX.

"'(a) INDIVIDUALS.—In addition to the other taxes imposed by this chapter, there is hereby imposed on each individual for each taxable year a tax equal to 25 percent of the amount by which—

"'(1) the sum of the taxpayer's excluded items for the taxable year, exceeds

"'(2) $10,000 ($5,000, in the case of a married individual filing a separate return), plus an amount equal to the amount of deductions disallowed under section 277(a) for the taxable year.

"'(b) CORPORATIONS.—In addition to the other taxes imposed by this chapter, there is hereby imposed on each corporation for each taxable year a tax equal to 25 percent of the amount by which—

"'(1) the sum of its excluded items for the taxable year, exceeds

"'(2) $25,000, plus an amount equal to the amount of deductions disallowed under section 277(b) for the taxable year.

"'(c) EXCLUDED ITEMS.—For purposes of this section, the term "excluded items" means—

"'(1) interest excluded from gross income under section 103,

"'(2) the amount by which (A) the deduction for depreciation under section 167 on real property (other than residential real property for low- and middle-income families) exceeds (B) the amount of such deduction computed under the straight line method of depreciation,

"'(3) the amount by which (A) the amount allowed as a deduction under section 170 (relating to charitable contributions) for the taxable year exceeds (B) the taxpayer's aggregate adjusted basis for the property giving rise to such deduction,

"'(4) the amount allowed as a deduction under section 611 (relating to depletion) with respect to any property the adjusted basis of which is zero, and

"'(5) in the case of an individual, the amount allowed as a deduction for long-term capital gains under section 1202.'

"(b) CLERICAL AMENDMENT.—The table of parts for such subchapter A is amended by adding at the end thereof the following new item:

"'PART VI—ADDITIONAL TAX'

"(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1969.

"SEC. 302. ALLOCATION OF DEDUCTIONS BETWEEN TAXED AND UNTAXED INCOME.

"(a) IN GENERAL.—Part IX of subchapter B of chapter 1 (relating to items not deductible) is amended by adding at the end thereof the following new section:

"'SEC. 277. ALLOCATIONS OF DEDUCTIONS.

"'(a) INDIVIDUALS.—

"'(1) IN GENERAL.—In the case of an individual, if the sum of his excluded items for the taxable year exceeds $10,000 ($5,000, in the case of a married individual filing a separate return), then the sum of the items otherwise deductible under the sections listed in paragraph (2) shall not exceed an amount which bears the same ratio to the sum of such items (determined before the application of this section) as the taxpayer's adjusted gross income bears to the sum of his adjusted gross income and the amount by which his excluded items exceeds $10,000 ($5,000, in the case of a married individual filing a separate return).

"'(2) DEDUCTIONS AFFECTED.—For purposes of paragraph (1), the sections referred to are the following:

"'(A) section 163 (relating to interest),

"'(B) section 164 (relating to taxes),

"'(C) section 165(c)(3) (relating to personal theft and casualty losses),

"'(D) section 170 (relating to charitable contributions),

"'(E) section 213 (relating to medical, dental, etc., expenses), and

"'(F) section 216 (relating to cooperative housing expenses).

"'(b) CORPORATIONS.—

"'(1) IN GENERAL.—In the case of a corporation, if the sum of its excluded items for the taxable year exceeds $25,000, then the sum of its nonoperating deductions shall not exceed an amount which bears the same ratio to the sum of such nonoperating deductions (determined before the application of this section) as its net operating income bears to the sum of its net operating income and the amount by which its excluded items exceed $25,000.

"'(2) DEFINITIONS.—For purposes of paragraph (1), under regulations prescribed by the Secretary or his delegate—

"'(A) The term "nonoperating deductions" means all items otherwise deductible under this chapter which are not directly connected with the active operation of trade or business activities.

"'(B) The net operating income of a corporation is the amount by which the gross income directly connected with the active operation of trade or business activities exceeds the deductions allowed by this chapter which are directly connected with the active operation of such activities.

"'(c) EXCLUDED ITEMS.—For purposes of this section, the term "excluded items" means—

"'(1) interest excluded from gross income under section 103,

"'(2) the amount by which (A) the deduction for depreciation under section 167 on real property (other than residential real property for low- and middle-income families, exceeds (B) the amount of such deduction computed under the straight line method of depreciation,

"'(3) the amount by which (A) the amount allowed as a deduction under section 170 (relating to charitable contributions) for the taxable year, exceeds (B) the taxpayer's aggregate adjusted basis for the property giving rise to such deduction.

"'(4) the amount allowed as a deduction under section 611 (relating to depletion) with respect to any property the adjusted basis of which is zero, and

"'(5) in the case of an individual, the amount allowed as a deduction for long-term capital gains under section 1202.

"'(d) REGULATIONS.—The Secretary or his delegate shall prescribe such regulations as may be necessary to carry out the purposes of this section.'

"(b) CLERICAL AMENDMENT.—The table of sections for such part IX is amended by adding at the end thereof the following new item:

"'Sec. 277. Allocation of deductions.'

"(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1969."

Mr. METCALF. Mr. President, on October 20, the committee adopted with some modifications the general provisions of the House bill which would significantly tighten depreciation practices in the real estate industry. Under the

House bill, the real estate changes would increase Federal revenue by about $1 billion annually when fully effective. According to published accounts, the committee trimmed an estimated $25 million of annual revenue gain from the House bill. I mention this now because the tax treatment afforded the real estate industry is one of the areas of discussion contained in today's section of the DSG Tax Reform Fact Book.

On August 13, I reintroduced my tax-dodge farming bill, S. 500, in the form of an amendment to the House-passed bill. A bipartisan group of 27 Senators are cosponsors of S. 500. They are: Senators BAYH, BIBLE, BROOKE, BURDICK, CANNON, CHURCH, EAGLETON, HARRIS, HART, HARTKE, HATFIELD, HUGHES, INOUYE, KENNEDY, MCCARTHY, MCGEE, MCGOVERN, MANSFIELD, MONDALE, MONTOYA, MOSS, MUSKIE, NELSON, PEARSON, SAXBE, YARBOROUGH, and YOUNG of Ohio.

When former Assistant Secretary of the Treasury Stanley S. Surrey testified before the Committee on September 25, he commented that an appropriate revenue gain in this area would be $150 million to $200 million. The annual revenue effect of my bill has been estimated at $205 million. Mr. Surrey concluded his testimony with this statement:

The proper course in the farm area is to reject the House bill approach and follow Senator Metcalf's approach.

However, according to published accounts the overall farm loss plan adopted by the Committee on Finance on October 17 ultimately would increase Federal revenue by $20 million a year, the same as under the House proposal. On October 20, I requested an estimate of comparative revenue figures from the Joint Committee on Internal Revenue Taxation. I have not yet received a response to my request but this is certainly understandable since the staff of the joint committee must be under an arduous time schedule now that the Committee on Finance has begun executive sessions to mark up its version of the bill.

As soon as I do receive a reply, I intend to make it available to other Senators, since I shall offer my amendment when the tax reform bill reaches the Senate floor for debate and further amendment. In the meantime, since this is an area that is discussed in some detail in today's section of the Tax Reform Fact Book, I shall make both the text of my letter together with the text of my amendment available now.

Mr. President, I ask unanimous consent that my letter of October 20 to Laurence N. Woodworth and the text of my amendment be printed at this point in the RECORD.

There being no objection, the letter and amendment No. 139 were ordered to be printed in the RECORD, as follows:

OCTOBER 20, 1969.

Mr. LAURENCE N. WOODWORTH,
Chief of Staff, Joint Committee on Internal Revenue Taxation, Longworth House Office Building, Washington, D.C.

DEAR MR. WOODWORTH: On 17 October the Senate Finance Committee agreed to a substitute for section 211 of the House-passed tax reform bill. Under this substitute, an individual who has more than $50,000 of nonfarm income and who incurs a loss from his farm operations of more than $25,000 (these are the same tests provided in the House bill) will be allowed to deduct currently only one-half of his farm losses in excess of $25,000 against his nonfarm income. The remaining portion of his farm loss which would not be allowed as a deduction in the year it is incurred could be carried over for an indefinite period but could be used only to offset future farm income.

Under the Committee substitute, farm losses up to $25,000 could continue to be deducted in full against nonfarm income, but deductions in excess of $25,000 (where the taxpayer has nonfarm income of more than $50,000) could be subject to an initial 50% disallowance.

At his press conference, Senate Finance Committee Chairman Russell Long stated that the Committee substitute would produce more annual revenue than the House bill for about four years but that at the end of that time, the provisions contained in the House version of the bill would at least have caught up to and possibly produce more annual revenue than the substitute adopted by the Senate Finance Committee.

In preparation for my testimony before the Senate Finance Committee on 22 September on this subject, I requested from you comparative revenue estimates between my tax-dodge farming bill, S. 500, and each of the provisions contained in the House bill. I also asked how many returns would be affected.

Pursuant to my request, you informed me that my bill would affect in the neighborhood of 14,000 individual tax returns. You estimated that it would raise an additional $205 million a year from these individuals. The number of returns affected by the "Excess Deductions Account" provision of H.R. 13270 you estimated to be in the neighborhood of 3,000. By 1979, the estimated increase in tax liability under the farm provisions of the House bill were estimated as follows: excess deductions account, $10 million; depreciation recapture, $5 million; holding period for livestock, $5 million; hobby losses negligible; for a total of $20 million by 1979. You further estimated that sometime after 1979 the increase in tax liability ascribed to the excess deductions account provision would increase an additional $5 million.

I understand that comparative figures for corporations are not available. However, I point out when I testified that my bill would raise $205 million a year additional revenue from individuals as opposed to only $25 million a year under the farm provisions of the House bill.

I would appreciate it if at your earliest convenience you would provide me with similar information regarding the Senate Finance Committee's version of each of the farm sections contained in the House-passed bill. Since the Committee adopted the livestock depreciation recapture provision contained in H.R. 13270, I assume that your prior revenue estimate as to that provision would remain at $5 million a year.

Very truly yours,

———.

AMENDMENT

Page 139, beginning with line 10, strike out all through line 6, page 152 (section 211 of the bill), and insert the following:

"SEC. 211. FARM LOSSES.

"(a) IN GENERAL.—Part IX of subchapter B of chapter 1 (relating to items not deductible) is amended by adding after section 279 (added by section 411(a) of this Act) the following new section:

"'SEC. 280. LIMITATION ON DEDUCTIONS ATTRIBUTABLE TO FARMING.

"'(a) GENERAL RULE.—In the case of a taxpayer engaged in the business of farming, the deductions attributable to such business which, but for this section, would be allowable under this chapter for the taxable year shall not exceed the sum of—

"'(1) the adjusted farm gross income for the taxable year, and

"'(2) the higher of—

"'(A) the amount of the special deductions (as defined in subsection (d)(3)) allowable for the taxable year, or

"'(B) $15,000 ($7,500 in the case of a married individual filing a separate return), reduced by the amount by which the taxpayer's adjusted gross income (taxable income in the case of a corporation) for the taxable year attributable to all sources other than the business of farming (determined before the application of this section) exceeds $15,000 ($7,500 in the case of a married individual filing a separate return).

"'(b) EXCEPTION FOR TAXPAYERS USING CERTAIN ACCOUNTING RULES.—

"'(1) IN GENERAL.—Subsection (a) shall not apply to a taxpayer who has filed a statement, which is effective for the taxable year, that—

"'(A) he is using, and will use, a method of accounting in computing taxable income from the business of farming which uses inventories in determining income and deductions for the taxable year, and

"'(B) he is charging, and will charge, to capital account all expenditures paid or incurred in the business of farming which are properly chargeable to capital account (including such expenditures which the taxpayer may, under this chapter or regulations prescribed thereunder, otherwise treat or elect to treat as expenditures which are not chargeable to capital account).

"'(2) TIME, MANNER, AND EFFECT OF STATEMENT.—A statement under paragraph (1) for any taxable year shall be filed within the time prescribed by law (including extensions thereof) for filing the return for such taxable year, and shall be made and filed in such manner as the Secretary or his delegate shall prescribe by regulations. Such statement shall be binding on the taxpayer, and be effective, for such taxable year and for all subsequent taxable years and may not be revoked except with the consent of the Secretary or his delegate.

"'(3) CHANGE OF METHOD OF ACCOUNTING, ETC.—If, in connection with a statement under paragraph (1), a taxpayer changes his method of accounting in computing taxable income or changes a method of treating expenditures chargeable to capital account, such change shall be treated as having been made with the consent of the Secretary or his delegate and, in the case of a change in method of accounting, shall be treated as a change not initiated by the taxpayer.

"'(c) CARRYBACK AND CARRYOVER OF DISALLOWED FARM OPERATING LOSSES.—

"'(1) IN GENERAL.—The disallowed farm operating loss for any taxable year (hereinafter referred to as the "loss year") shall be—

"'(A) a disallowed farm operating loss carryback to each of the 3 taxable years preceding the loss year, and

"'(B) a disallowed farm operating loss carryover to each of the 5 taxable years following the loss year,

and (subject to the limitations contained in paragraph (2)) shall be allowed as a deduction for such years, under regulations prescribed by the Secretary or his delegate, in a manner consistent with the allowance of the net operating loss deduction under section 172.

"'(2) LIMITATIONS.—

"'(A) IN GENERAL.—The deduction under paragraph (1) for any taxable year for disallowed farm operating loss carrybacks and carryovers to such taxable year shall not exceed the taxpayers' net farm income for such taxable year.

"'(B) CARRYBACKS.—The deduction under paragraph (1) for any taxable year for disallowed farm operating loss carrybacks to such taxable year shall not be allowable to the extent it would increase or produce a net operating loss (as defined in section 172(c)) for such taxable year.

"'(3) TREATMENT AS NET OPERATING LOSS CARRYBACK.—Except as provided in regulations prescribed by the Secretary or his delegate, a disallowed farm operating loss carryback shall, for purposes of this title, be treated in the same manner as a net operating loss carryback.

"'(d) DEFINITIONS.—For purposes of this section—

"'(1) ADJUSTED FARM GROSS INCOME.—The term "adjusted farm gross income" means, with respect to any taxable year, the gross income derived from the business of farming for such taxable year (including recognized gains derived from sales, exchanges, or involuntary conversions of farm property), reducted, in the case of a taxpayer other than a corporation, by an amount equal to 50 percent of the lower of—

"'(A) the amount (if any) by which the recognized gains on sales, exchanges, or involuntary conversions of farm property which, under section 123(a), are treated as gains from sales or exchanges of capital assets held for more than 12 months exceed the recognized losses on sales, exchanges, or involuntary conversions of farm property which under section 1231(a) are treated as losses from sales or exchanges of capital assets held for more than 12 months, or

"'(B) the amount (if any) by which the recognized gains described in section 1231 (a) exceed the recognized losses described in such section.

"'(2) NET FARM INCOME.—The term "net farm income" means, with respect to any taxable year, the gross income derived from the business of farming for such taxable year (including recognized gains derived from sales, exchanges, or involuntary conversions of farm property), reduced by the sum of—

"'(A) the deductions allowable under this chapter (other than by subsection (c) of this section) for such taxable year which are attributable to such business, and

"'(B) in the case of a taxpayer other than a corporation, an amount equal to 50 percent of the amount described in subparagraph (A) or (B) of paragraph (1), whichever is lower.

"'(3) SPECIAL DEDUCTIONS.—The term "special deductions" means the deductions allowable under this chapter which are paid or incurred in the business of farming and which are attributable to—

"'(A) taxes,

"'(B) interest,

"'(C) the abandonment or theft of farm property, or losses of farm property arising from fire, storm, or other casualty,

"'(D) losses and expenses directly attributable to drought, and

"'(E) recognized losses from sales, exchanges, and involuntary conversions of farm property.

"'(4) FARM PROPERTY.—The term "farm property" means property which is used in the business of farming and which is property used in the trade or business within the meaning of paragraph (1), (3), or (4) of section 1231(b) (determined without regard to the period for which held).

"'(5) DISALLOWED FARM OPERATING LOSS.—The term "disallowed farm operating loss" means, with respect to any taxable year, the amount disallowed as deductions under subsection (a) for such taxable year, reduced, in the case of a taxpayer other than a corporation, by an amount equal to 50 percent of the amount described in subparagraph (A) or (B) of paragraph (1), whichever is lower.

"'(e) SPECIAL RULES.—For purposes of this section—

"'(1) BUSINESS OF FARMING.—A taxpayer shall be treated as engaged in the business of farming for any taxable year if—

"'(A) any deduction is allowable under section 162 or 167 for any expense paid or inourred by the taxpayer with respect to farming, or with respect to any farm property held by the taxpayer, or

"'(B) any deduction would (but for this paragraph) otherwise be allowable to the taxpayer under section 212 or 167 for any expense paid or incurred with respect to farming, or with respect to property held for the production of income which is used in farming.

For purposes of this paragraph, farming does not include the raising of timber. In the case of a taxpayer who is engaged in the business of farming for any taxable year by reason of subparagraph (B), property held for the production of income which is used in farming shall, for purposes of this chapter, be treated as property used in such business.

"'(2) INCOME AND DEDUCTIONS.—The determination of whether any item of income is derived from the business of farming and whether any deduction is attributable to the business of farming shall be made under regulations prescribed by the Secretary or his delegate, but no deduction allowable under section 1202 (relating to deduction for capital gains) shall be attributable to such business.

"'(3) CONTROLLED GROUP OF CORPORATIONS.—If two or more corporations which—

"'(A) are component members of a controlled group of corporations (as defined in section 1563) on a December 31, and

"'(B) have not filed a statement under subsection (b) which is effective for the taxable year which includes such December 31,

each have deductions attributable to the business of farming (before the application of subsection (a)) in excess of its gross income derived from such business for its taxable year which includes such December 31, then, in applying subsection (a) for such taxable year, the $15,000 amount specified in paragraph (2)(B) of such subsection shall be reduced for each such corporation to an amount which bears the same ratio to $15,000 as the excess of such deductions over such gross income of such corporation bears to the aggregate excess of such deductions over such gross income of all such corporations.

"'(4) PARTNERSHIPS.—A business of farming carried on by a partnership shall be treated as carried on by the members of such partnership in proportion to their interest in such partnership. To the extent that income and deductions attributable to a business of farming are treated under the preceding sentence as income and deductions of members of a partnership, such income and deductions shall, for purposes of this chapter, not be taken into account by the partnership.

"'(5) TWO OR MORE BUSINESSES.—If a taxpayer is engaged in two or more businesses of farming, such businesses shall be treated as a single business.

"'(6) RELATED INTEGRATED BUSINESSES.—If a taxpayer is engaged in the business of farming and is also engaged in one or more businesses which are directly related to his business of farming and are conducted on an integrated basis with his business of farming, the taxpayer may elect to treat all such businesses as a single business engaged in the business of farming. An election under this paragraph shall be made in such manner, at such time, and subject to such conditions as the Secretary or his delegate may prescribe by regulations.

"'(7) SUBCHAPTER S CORPORATIONS AND THEIR SHAREHOLDERS.—

"'For special treatment of electing small business corporations which do not file statements under subsection (b) and of the shareholders of such corporations, see section 1380.

"'(f) REGULATIONS.—The Secretary or his delegate shall prescribe such regulations as may be necessary to carry out the purposes of this section.'

"(b) SUBCHAPTER S CORPORATIONS.—Subchapter S (relating to election of certain small business corporations as to taxable status) is amended by adding after section 1379 (as added by section 541(a) of this Act) the following new section:

"'SEC. 1380. ELECTING SMALL BUSINESS CORPORATIONS ENGAGED IN BUSINESS OF FARMING.

"'(a) SEPARATE APPLICATION TO FARMING INCOME AND DEDUCTIONS.—Under regulations prescribed by the Secretary or his delegate, an electing small business corporation which is engaged in the business of farming during its taxable year (other than a corporation which has filed a statement under section 280(b) which is effective for such taxable year), and the shareholders of such corporation, shall apply the provisions of sections 1373 through 1378, separately with respect to—

"'(1) income derived from the business of farming by such corporation and deductions attributable to such business, and

"'(2) all other income and deductions of such corporation.

In computing the taxable income and undistributed taxable income, or net operating loss, of such corporation with respect to the business of farming, no deduction otherwise allowable under this chapter shall be disallowed to such corporation under section 280.

"'(b) SHAREHOLDERS TREATED AS ENGAGED IN BUSINESS OF FARMING, ETC.—For purpose of section 280—

"'(1) each shareholder of an electing small business corporation to which subsection (a) applies shall be treated as engaged in the business of farming,

"'(2) the undistributed taxable income of such corporation which is included in the gross income of such shareholder under section 1373 and is attributable to income and deductions referred to in subsection (a)(1), and dividends received which are attributable to such income and deductions and are distributed out of earnings and profits of the taxable year as specified in section 316(a)(2), shall be treated as income derived from the business of farming by such shareholder, and

"'(3) the deduction allowable (before the application of section 280) to such shareholder under section 1374 as his portion of such corporation's net operating loss attributable to income and deductions referred to in subsection (a)(1) shall be treated as a deduction attributable to the business of farming.

"'(c) SPECIAL RULES OF SECTION 280(e) APPLICABLE.—For purposes of this section, the special rules set forth in section 280(e) shall apply.'

"(c) CLERICAL AND CONFORMING AMENDMENTS.—(1) The table of section for part IX of subchapter B of chapter 1 is amended by adding at the end thereof the following new item:

"'Sec. 280. Limitation on deductions attributable to farming.'

"(2) Section 172(1) is amended by adding at the end thereof the following new paragraph:

"'(3) For limitations on deductions attributable to farming and special treatment of disallowed farm operating losses, see section 280.'

"(3) Section 381(c) is amended by adding at the end thereof the following new paragraph:

"'(24) FARM OPERATING LOSS CARRYOVERS.—The acquiring corporation shall take into account, under regulations prescribed by the Secretary or his delegate, the disallowed farm operating loss carryovers under section 280 of the distributor or transferor corporation.'

"(4) The table of sections for subchapter S is amended by adding at the end thereof the following new item:

" 'Sec. 1380. Electing small business corporations engaged in business of farming.'

"(d) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1969, except that for purposes of applying section 280 (c) of the Internal Revenue Code of 1954 (as added by subsection (a)) with respect to disallowed farm operating losses of any taxpayer for taxable years beginning after such date—

"(1) such amendments shall also apply to the 3 taxable years of such taxpayer preceding the first taxable year beginning after such date, and

"(2) in the case of a taxpayer to whom section 1380(b) of such Code (as added by subsection (b)) applies for any of his first 3 taxable years beginning after such date, section 1380 of such Code shall apply with respect to the electing small business corporation of which such taxpayer is a shareholder for the 3 taxable years preceding each such taxable year of such taxpayer, but only with respect to any such preceding taxable year for which the corporation was an electing small business corporation."

Mr. METCALF. Mr. President, I ask unanimous consent that the section of the DSG Tax Reform Fact Book entitled "Other Loophole-Closing Provisions" be printed in the RECORD.

There being no objection, the section of the book was ordered to be printed in the RECORD, as follows:

DSG TAX REFORM FACT BOOK

SECTION 6—OTHER LOOPHOLE-CLOSING PROVISIONS

Eliminate the $100 dividend exclusion

The Problem: Special income tax treatment is granted to corporation dividends that is not given to income from such sources as bank or savings bond interest. The exclusion is defended on the basis that it is compensation for double taxation of dividends (first through corporate tax on the company, then through income tax on the individual).

Present Law: The first $100 of ordinary dividends received from taxable domestic corporations is excluded from taxable income. A husband and wife, filing either jointly or separately, may each exclude up to $100 received from qualifying companies for the tax year. Since this is an exclusion, rather than a deduction, it applies on both itemized and unitemized returns.

The exclusion also applies to ordinary dividends on the capital stock of non-exempt cooperatives, stock of the Federal National Mortgage Association, the capital stock of building and loan associations (as distinct from so-called dividends on deposits and withdrawable accounts), and similar organizations.

Pending Proposals: A large number of tax reform bills included this proposal. H.R. 5250 (Reuss and others) would repeal the exclusion entirely. Identical or similar measures are H.R. 229, 1039, 1119, 3655, 6206, 6233, 6770, 6791, 7040, 7045, 7346, 7585, 8144, 9195, 9759, 9852, 10043, and 10253.

Revenue Impact: Treasury estimates repeal of the exclusion would increase revenue $225 million a year.

Proponents and Opponents: Little testimony was presented on this proposal most of it by sponsoring members. There was no direct opposition.

Administration Action: Neither the Treasury recommendations nor the Nixon Administration's proposals dealt with the dividend exclusion.

House Action: The House did not act on this proposal.

Enact a minimum tax on exempt income

The Problem: Present law gives preferential treatment to capital gains and certain other types of income through partial or total exclusion from taxable income. Some individuals structure their income to avoid all income tax liability. As a result, the system favors unearned income over wages and salaries. In 1967, the most recent year for which information is available, taxes paid by millionaires averaged only 25% of total income. Twenty-one of these millionaires and 134 other persons with incomes exceeding $200,000 escaped federal taxes altogether. It is estimated that an effective minimum tax proposal would affect about 40,000 wealthy taxpayers.

Present Law: There is no minimum tax at present. Special privileges and exemptions available and the amount of revenue lost each year to taxpayers avoiding taxes include: (1) $8.5 billion on capital gains from stock and other property sales; (2) $1.8 billion income from interest on state and local bonds; (3) $1.3 billion in income from oil, gas and more than 100 minerals eligible for depletion and other allowances; (4) $750 million in real estate income that escapes taxation when it is written off as accelerated depreciation; (5) $2.2 billion in deductions to charitable and other tax-exempt institutions; (6) $800 million to non-farmers who write off paper losses in farm operations against normally-taxable ordinary income, and (7) $500 million to those who have tax-exempt income yet write off all deductions against the taxable portion.

Pending Proposals: Minimum tax proposals are included in several tax reform bills introduced this year. H.R. 7980 (Fraser), for example, would impose a minimum tax on all incomes over $50,000. Identical or similar proposals are in H.R. 10842, 11353, 229, 1379, 2142, 5196, 6207, 6721, 7326, 7744, 7980, 9762, and 10237.

Revenue Impact: Treasury reports a limitation on tax preferences, one approach to the problem, would increase revenues $20 million in 1969, $40 million in 1970, and $80 million when fully effective in 1971. It is estimated that $1.5 bilion would be raised by imposing a 25% minimum tax on all excluded income exceeding $10,000 for individuals and $25,000 for corporations.

Proponents and Opponents: No organization witnesses appeared when Ways and Means held hearings on the minimum tax approach. Proponents include the AFL–CIO, UAW, and Longshoremen's Union.

Administration Action: The Treasury, in its December report, proposed a minimum tax with rates graduated from 7% to 35%, which would have the effect of keeping any individual from excluding more than half his total income from taxation. The Administration, in its April recommendations, called for a Limit on Tax Preferences (LTP) provision to limit income eligible for tax-free treatment. The limit on tax-free income would apply only to certain types, however, and would not become effective at the final 50% ceiling until 1971. It also would not apply to corporations.

House Action: The House voted to adopt a minimum tax that would work this way: It would tax at ordinary rates half the amount of otherwise excludable income that exceeds a person's taxable income, provided that these exclusions total more than $10,000. Thus if a person received $50,000 in salary and $150,000 in sheltered income, his tax would be levied on $100,000 rather than on $50,000 as under present law.

The specified income categories are (1) tax-exempt state and municipal bond interest; (2) the excluded half of capital gains; (3) appreciation in gifts of property to certain tax-exempt organizations; (4) the excess of accelerated over straight line depreciation in real estate, and (5) farm losses to the extent they exceeded losses figured under the inventory method of accounting. The minimum tax does not apply to tax-exempt income of corporations or to percentage depletion or intangible drilling costs, both important tax preferences for the petroleum industry.

Resource References: See Ways and Means Hearings, Volumes 5 and 7; Treasury Studies, Part 2.

Limit to $15,000 the amount of farm loss writeoff against nonfarm income

The Problem: Taxpayers with high bracket salary or other non-farm income create this tax shelter by investing in agricultural operations that use premature deductions to show losses in the early years of investment but later produce sizeable capital gains income. In 1967, for example, more than one million tax returns showed farm losses, compared to two million reporting from profit.

This tax avoidance opportunity stems from liberal accounting rules used to compute farm income and losses. They were adopted to spare the ordinary farmer the red tape involved in meeting more rigorous requirements of a business.

Present Law: Present law is best explained by using livestock as an example. The investor purchases livestock for breeding, dairy or draft purposes and deducts expenses of their care and maintenance. He also takes depreciation deductions on the cost of the herd. These deductions can offset his high-bracket non-farm income in the year they are taken. Later any profit on sale of the herd is taxed as capital gains. Even if the investor breaks even on these transactions before taxes, or has a loss on paper, the difference in the rate of tax between high-bracket ordinary income and capital gains income makes a substantial after-tax profit possible.

Investors can create a similar tax shelter when they invest in citrus groves or other income producing trees, in uncleared land to convert to farmland or a real estate development, or in other agricultural operations.

Pending Proposals: Several bills have been introduced to restrict or eliminate this tax shelter. H.R. 4257 (Culver and others) would limit the farm loss offset against nonfarm income to $15,000 in any taxable year. The measure would permit carry backs and carry forwards of any excess. Identical or similar measures are H.R. 5196, 5250, 6206, 6233, 6721, 6770, 6791, 7040, 7045, 7336, 7346, 7575, 7585, 7617, 7787, 7980, 8144, 8157, 8374, 8650, 8952, 8982, 9195, 9270, 9752, 9759, 9762, 9852, 10237, 11017, and 11174.

Revenue Impact: Treasury estimates farm loss writeoffs cost $800 million a year in revenue. It estimates $145 million would be raised by restricting farm loss writeoffs to $15,000.

Proponents and Opponents: Several farm groups have endorsed the Culver bill or other specific tax loss measures. Most farm and rural organizations, however, support the legislative principle rather than a specific bill. Main supporters are National Farmers Union, American Farm Bureau Federation, National Grange, National Farmers Organization, National Council of Farmers Cooperatives, National Association of Wheat Growers, Cooperative League of the U.S.A., National Association of Farmer Elected Committeemen, Farmland Industries, Midcontinent Farmers Association, National Catholic Rural Life Conference, AFL–CIO, and UAW. Major opponents testifying were the National Livestock Tax Committee, American National Cattlemen's Association, Oppenheimer Industries, and the American Hereford Association.

Administration Action: The Administration proposal would deal with the problem by limiting capital gains on a farm operation where losses exceeded $5,000 a year. When losses were higher a figure representing the excess would go into an Excess De-

ductions Account EDA). Future farm income would reduce the EDA and be taxed as ordinary income as long as anything remained in the EDA. No capital gains would be allowed as long as an EDA balance remained.

The proposals also would (1) provide for capture of excessive depreciation on livestock; (2) require livestock to be held two years for capital gains treatment, and (3) disallow "hobby farm" losses if they exceeded $50,000 for more than three of each five years (rather than the present five consecutive five years).

House Action: The House bill would require losses to be recorded in an excess deductions account (EDA). Capital gains realized from later sale of assets equal to this excess account would be taxed at ordinary income rates. The bill would apply only to those with non-farm income of $50,000 or more and would exclude the first $25,000 in losses from the excess deductions account provision. It also would disallow farm losses under the hobby farm provision if such losses exceeded $25,000 in 3 out of 5 years and extend the holding period requirement for capital gains treatment on livestock.

Resources References: See Ways and Means Hearings, Volume 6; Treasury Studies, Part 2.

Repeal unlimited charitable contribution deduction

The Problem: This special provision allows individuals to take an unlimited tax deduction for contributions of money, stocks and other property to foundations, churches, and other designated organizations. Recent studies show this provision is used by only about 100 of the nation's wealthiest families. Their income is mainly from dividends and tax-exempt bond interest and their tax liability small or nonexistent.

This deduction is a bigger loophole than it looks because it ties in with another tax avoidance provision. That provision bases the charitable deduction on the full value of the donated assets (usually stocks or real estate), which permits the taxpayer to avoid payment of capital gains on the appreciated value.

Present Law: Present law permits a taxpayer to deduct charitable contributions to a maximum of 20% or 30% of his income, depending on the type of tax-exempt organization to which contributions are made. These limits do not apply, however, if the taxpayer's contributions plus his income tax for the taxable year and eight of the preceding 10 years exceed, in each of these years, 90% of his taxable income (computed without regard to charitable contributions, personal exemptions, and net operating loss carryback).

Pending Proposals: More than 20 bills dealing with this provision have been introduced in the House. H.R. 5250 (Reuss and others) would repeal the unlimited deduction and put all taxpayers under the 20% and 30% limitations. Identical or simlar bills are H.R. 229, 1039, 1119, 3655, 5196, 6206, 6233, 6721, 6769, 6791, 7040, 7045, 7346, 7585, 6770, 8144, 9195, 9759, 10844, and 11017.

Revenue Impact: Treasury estimates eliminating this deduction, when fully effective in 1980, would raise $25 million in additional revenue. It also is estimated by Treasury that proposals to increase the 20% and 30% ceilings to an overall 50% limit would cost $20 million a year.

Proponents and Opponents: A wide range of religious, cultural, educational and charitable organizations either testified or submitted statements opposing repeal. Included were such groups as the American Association of Fund Raising Counsel, Inc.; American Sympathy Orchestra League; Population Council; Council of Jewish Federations and Welfare Funds, United Church Board of World Ministries, and National Catholic Welfare Conference. The National Association of Manufacturers also asked that all charitable contributions provisions remain unchanged. The AFL–CIO, UAW and Longshoremen's Union all urged that this loophole be closed.

Administration Action: The Administration has proposed increasing the limitation on charitable contributions for all taxpayers to 50% of adjusted gross income from the present top limit of 30%, effective with returns filed in 1970. It would continue the unlimited charitable deduction for individuals meeting the 8-of-10 years requirement, setting a new and lower overall limit of 80% on charitable contributions. And it would repeal the deduction for rental value of property leased rent-free to a charitable institution. Also recommended was a change in tax benefits of contributions of property. It would limit deductions for these gifts to the cost or other basis of the property. The effect is similar to taxing the appreciation of ordinary income assets in a charitable gift.

House Action: The House bill would (1) increase the general limit on the charitable contribution deduction for individuals from 30% to 50%; (2) repeal the unlimited charitable contributions deduction with a 5-year phaseout, and (3) tighten tax treatment of charitable contributions of art works and other appreciated property.

Resource Reference: See Ways and Means Hearings, Volumes 3, 4 and 5; Treasury Studies, Part 2.

Remove tax-exempt status of State and local bonds

The Problem: The interest on the roughly $130 billion in outstanding state and local bonds is exempt from federal taxation. Critics contend these tax-free bonds, which lose the Treasury $1.8 billion a year in potential tax revenue, are an inefficient way to finance state and local government projects. The reason is the Treasury loses $2 in taxes for every $1 in lower interest gained by governmental units issuing the bonds.

The exemption also has created a tax haven for commercial banks and other financial institutions, which now hold about $50 billion worth. Tax-exempt interest makes up about one-third of the income of commercial banks.

Present Law: Interest on obligations of a state or its political subdivision, or on the obligations of the District of Columbia or any of its subdivisions, is wholly exempt from tax. This includes such bodies as port authorities, toll road commissions, utility service authorities, and similar bodies created for furtherance of public functions.

Pending Proposals: A large number of bills to change the tax-free status of state and municipal bonds have been introduced in the House. H.R. 5250 (Reuss and others) would end the exemption and pay the state or locality issuing the bond an interest subsidy, providing the bond-issuing governmental unit agreed to this arrangement. Similar or identical proposals are H.R. 6206, 6770, 7040, 7045, 7346, 7585, 8144, 9195, 9756, 9852, and 10253.

Revenue Impact. It is estimated the revenue gained after ending the exemption and paying the interest subsidy would be $100 million a year.

Proponents and Opponents: Main opposition to the proposal comes from the National Association of Attorneys General, National Governors Conference, National League of Cities, National Association of Counties, and U.S. Conference of Mayors. Most of the support came from Members of Congress who recognize that many wealthy individuals have sizeable tax-free incomes from exempt bond interest and look on this exemption as an important unplugged loophole.

Administration Action: The Administration did not make a recommendation on the tax status of municipal bonds.

House Action: The House voted to encourage state and local governments to issue taxable bonds by giving them the option of continuing to market tax-exempt bonds or accepting a subsidy tied to issuance of taxable bonds. The subsidy would be equal to the average cost of the additional interest payable (over what the rate would be on a tax-exempt bond) plus a small additional amount.

Resource References: Ways and Means Hearings, Volume 6.

Drop accelerated depreciation on speculative real estate

The Problem: Preferential tax treatment for real estate subsidizes commercial and industrial buildings, motels and hotels, shopping centers, office buildings, and rental housing operators. These preferences include accelerated depreciation (twice the rate the law presumes the property will actually deteriorate) and reduced or deferred taxation of gains.

Combining these provisions provides tax-free cash flow plus the opportunity to use excess real estate deductions in sheltering ordinary income from tax. Deferred tax liability is, in effect, an interest, free federal loan. Finally, the property is usually sold after a few years and a good portion of the accelerated depreciation is never returned to the tax base and escapes taxation entirely.

Present Law: Under accelerated formulas new buildings can be written off at twice normal or "straight line" rates and the cost of used buildings can be charged off at 1½ times normal depreciation rates. Since depreciation writeoffs are considered a cost, they are added to interest and other expenses subtracted from rental income and the income tax, if any, is paid on the remainder. Usually bookkeeping losses results and landlords use these to offset ordinary income. When these properties are sold, the profit is taxed at capital gains rates and the new buyer is eligible to start the accelerated depreciation routine all over again.

Pending Proposals: Proposals to eliminate accelerated depreciation are included in most tax reform bills pending in the House. H.R. 5250 (Reuss and others) would disallow depreciation in excess of straight line on all speculative real estate. Identical measures are H.R. 6206, 6770, 7040, 7045, 7346, 7585, 8144, 9195, 9759, 9852, and 10253.

Revenue Impact: Treasury estimates closing this loophole would save $750 million a year. Some $500 million of this now subsidizes motels, office buildings, shopping centers, and commercial and industrial construction of all kinds.

Proponents and Opponents: Opponents testifying against elimination of accelerated depreciation included representatives of the National Association of Home Builders, National Association of Real Estate Boards, Realty Committee on Taxation, American Hotel and Motel Association, National Apartment Association, Mortgage Bankers Association of America, Investing Builders & Owners Association, U.S. Chamber of Commerce, and the International Council of Shopping Centers, Inc.

The National League of Cities and U.S. Conference of Mayors filed a statement generally critical of preferential treatment of real estate. But they supported continuation of special provisions for new or rehabilitated housing. The AFL–CIO has taken a similar position, calling for continuing rapid depreciation for low and moderate income housing.

Administration Action: Depreciation on real estate would be subject to the Administration's proposed Limit on Tax Preference (LTP) to the extent that it exceeded deductions allowable under a straight line formula. LTP is a minimum tax approach to certain income that now escapes taxation.

House Action: The House bill would preserve 200% declining balance depreciation for apartment house construction and allow only 150% straight line on commercial and industrial construction. Apartment houses no longer held by original owners would be

cut back to the straight line rate. A new feature would encourage rehabilitation of old residential properties by allowing amortization over a 5-year period. It also would make it easier for the government to recapture for tax purposes, when a building is sold, the excess depreciation that has been taken.

Resource References: See Ways and Means Hearings, Volume 8; Treasury Studies, Part 3.

Require allocation of deductions between taxable and nontaxable income

The Problem: Highly preferential treatment now allows billions of dollars in income to escape taxation entirely each year. Yet the tax-exempt status of this income is only part of the benefit. The deductions taken for personal and non-business expenses come off any taxable portion that is left, offsetting some of it and making even more of the total tax-free.

Present Law: Under present law an individual can receive two kinds of income: (1) income subject to tax such as salary and interest, and (2) income exempt from tax such as interest received on municipal bonds and one-half of long-term capital gains. The law allows an individual to reduce the amount of his income subject to tax by deductions for all his personal expenses, even though part of such expense is paid out of tax-exempt income.

In this situation, the present tax structure enables the taxpayer to receive a double benefit from his tax-exempt income. Such income is not included in his tax return. And he is permitted to reduce his other income subject to tax by the full amount of his deductible expenses.

Pending Proposals: Proposals to allocate deductions on a proportional basis between taxable and tax-exempt income were not included in the major reform bills introduced in the House this session.

Revenue Impact: Treasury estimates that revenue gained from allocation of deductions for individuals with $5,000 or more in exempt income would be about $405 million a year.

Proponents and Opponents: There was no organized opposition to the allocation of deductions approach. The AFL–CIO is a strong supporter.

Administration Action: Treasury, in its December recommendations, called for allocation of non-business itemized deductions between taxable and nontaxable income for individuals with at least $5,000 in tax-exempt income. The Nixon Administration proposal is basically the same except for a two-year phase-in provision.

House Action: The bill passed by the House provides an allocation approach similar to the Administration proposal. It would apply only to individuals with $1,000 or more in tax-exempt income and to these categories of tax-exempt income: (1) interest on state and local bonds; (2) the one-half of net long-term capital gains excluded from income; (3) appreciation in value of property donated to charity to the extent the appreciation was deducted as a charitable contribution but not included as income; (4) intangible drilling costs and a portion of percentage depletion; (5) real estate depreciation in excess of straight line, and (6) certain farm losses.

Resource References: Treasury Studies, Part 2.

Mr. METCALF. Mr. President, the final section of the Tax Reform Fact Book deals wtih four tax relief proposals. The Senate Committee on Finance has already reached agreement in one of these areas. The House-passed bill would have provided that the maximum marginal tax rate applicable to an individual's earned income is not to exceed 50 percent.

The effect of this would have been to provide an alternative tax computation for earned income under which earned income in the taxable income brackets where the tax rate would otherwise be greater than 50 percent would be subject to a flat 50-percent rate. On October 10 the Senate Committee on Finance agreed to delete this provision from the House bill.

On August 18 the staffs of the Joint Committee on Internal Revenue Taxation and the Committee on Finance made available a statistical table which lists the revenue effect of all the tax relief provisions contained in the House-passed bill.

Mr. President, I ask unanimous consent that both the table and the final section of the DSG Tax Reform Fact Book to be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

TABLE 4.—TAX RELIEF PROVISIONS AFFECTING INDIVIDUALS AND TOTAL FOR ALL REFORM AND RELIEF PROVISIONS AFFECTING INDIVIDUALS, WHEN FULLY EFFECTIVE, BY ADJUSTED GROSS INCOME CLASS, 1969 LEVELS

[In millions of dollars]

AGI class	Reform provisions	Low income allowance	Elimination of phaseout	15-percent $2,000 standard deduction	General rate reductions	Maximum tax on earned income	Intermediate tax treatment	Total relief provisions	Total, all provisions

DSG TAX REFORM TAX BOOK

SECTION 7—TAX RELIEF

Increase regular standard deduction

The Problem: The regular standard deduction was introduced in 1944 as an option for taxpayers who did not want to keep detailed records and itemize returns. It gave them the option of subtracting 10% of their adjusted gross income, up to $1,000, and paying taxes on the remainder. The 10% figure was high enough then to dissuade 82% of all taxpayers from itemizing.

By 1965, however, it was obvious the 10% figure was too low because only 59% used the optional deduction rather than itemizing. An estimated 42% used it this year. The drop is blamed on growing deductions for state and local taxes and home ownership interest and on the fact that it continues to cover only the first $10,000 of taxable income.

The standard deduction also provides some tax relief for those with less than 10% in allowable deductions. An increase would provide substantial tax reduction for many low-income taxpayers.

Present Law: Taxable income is computed by subtracting allowable deductions for personal expenses and personal exemptions from adjusted gross income. As an alternative to itemizing deductions, a taxpayer may elect to claim a standard deduction equal to 10% of his adjusted gross income, up to $1,000 ($500 for married persons filing separately). The standard deduction added to personal exemptions is subtracted from adjusted gross income to get the taxable income figure.

Pending Proposals: Several reform bills introduced this session call for increases in the regular standard deduction. H.R. 9680 (Fraser) would increase it to 14% with an $1,800 maximum. Similar or identical measures are H.R. 9762, 10090, 10135, and 9936.

Revenue Impact: Treasury estimates raising the $1,000 standard deduction ceiling to $1,800 would provide $1.4 billion in tax relief to about 14.6 million families and individuals. Nearly all would be in the $5,000 to $20,000 income range.

Proponents and Opponents: The AFL–CIO, UAW and Longshoremen's Union were among those testifying for higher standard deduction ceilings. Mortimer Caplin, former Internal Revenue commissioner, also supoprted an increase. There was no organized opposition.

Administration Action: The Treasury, in its December recommendations, called for raising the regular standard deduction to 14% with a new $1,800 ceiling. It estimated the new deduction would be used in 80% of the returns by taxpayers who would no longer find it advantageous to itemize.

The Nixon Administration did not recommend a regular standard deduction increase.

House Action: The House voted to raise the standard deduction to 13% with a $1,400 ceiling in 1970, to 14% with a $1,700 ceiling in 1971, and to 15% with a $2,000 ceiling in 1972.

Resource References: Ways and Means hearings, Volumes 5 and 7; Treasury Studies, Parts 1 and 2.

Reduce rates for the bottom income tax brackets to 9 percent and 13 percent

The Problem: Many inequities of present tax law are related to the use of marginal tax rates on taxable income. These rates are blind to financial circumstance and apply equally to all taxpayers. Both rich and poor, as a result, pay 14% or $140 on the first $1,000 of taxable income, 15% or $150 on the second, and so on. The effect is the same with each higher bracket.

It is possible, however, to reduce the proportionate tax burden on low-income families and individuals by cutting the bottom rates. Studies show that about 95% of the relief from cuts in the two bottom brackets would go to those with taxable incomes under $20,000.

Present Law: Present marginal tax rates begin at 14% on the first $1,000 of taxable income and range up to a 70% top bracket maximum.

Pending Proposals: None of the tax reform bills introduced in the House this session included an income tax-rate-cutting provision.

Revenue Impact: Cost to the Treasury of a proposal reducing the present 14% and 15% rate brackets to 9% and 13% is estimated at $3.4 billion a year.

Proponents and Opponents: The main supporter of this tax relief approach is the AFL–CIO. The proposal did not attract much attention during the Ways and Means hearings. It also did not draw any important opposition.

Administration Action: The Nixon Administration did not propose rate cuts.

House Action: The House included a two-stage rate cut provision in the bill that would provide reduction of at least 5% when fully effective in calendar 1972. The top rate would be cut from the current 70% to 65% and the lowest rate cut from 14% to 13%.

Resource References: Ways and Means hearings, Volume 12.

Raise minimum standard deduction

The Problem: Recent studies show 2.2 million families and individuals with incomes below officially-designated poverty levels have to pay federal income taxes. Many others with comparatively low incomes pay substantial amounts. Included are hundreds of thousands of students who have sizable sums withheld from wages. They end up paying $100 a year or more in federal income taxes on summer or part-time work, yet operate at a financial deficit to continue in school.

The difficulty in meeting this problem is devising a plan that would (1) be simple to administer; (2) make the proper allowance for family size, and (3) phase out in such a way that its impact would go to those needing relief the most.

Present Law: Taxpayers who do not itemize deductions now are entitled to a minimum standard deduction of $200 plus $100 for each family member up to an overall limit of $1,000.

Pending Proposals: Among the many tax relief bills introduced in the House this session is H.R. 9523 (Culver), which would increase the minimum standard deduction to $600 plus $100 for each exemption. Similar or identical measures are H.R. 9680, 9762, 10090, 10135, 12181, and 9253.

A low income allowance, a form of minimum standard deduction, was a major provision of H.R. 12290, the bill to extend the surtax that passed the House, 210–205, on June 30.

Revenue Impact: Treasury estimates the plan in H.R. 12290 would cost $665 million in Fiscal 1971, its first full year in operation. Its studies show an estimated 12.7 million low-income taxable returns would have tax cuts under this provision, with 6 million of these made nontaxable.

The Treasury estimate for the cost of raising the minimum standard deduction to $600 plus $100 for each deduction with a $1,000 limit is $1.1 billion a year.

Proponents and Opponents: The AFL–CIO supported the Treasury's December recommendation ($600 plus $100 per exemption and a $1,000 limit) in its testimony. The UAW supported it in principle but told the Committee the $1,000 limit was too low.

Administration Action: Treasury, in its recommendations last December, suggested raising the level of the minimum deduction to $600, plus $100 for each personal exemption, up to a maximum of $1,000.

The Administration, in its proposals submitted in April, asked for a low income allowance (See H.R. 12290 passed by the House) designed to disappear as income rises beyond officially designated poverty levels.

The low income allowance provision works this way: It is a variable amount that, when added to the minimum standard deduction, totals $1,100. This, added to the $600 exemption per person, almost exactly matches the federal poverty standard for each family size. Above a certain cutoff point tied to the poverty level, the allowance is gradually phased out by reducing it by $1 for each $2 of added income. For the single person it would disappear at $3,300; for the family of four, at $4,500.

House Action: The House bill included the low income allowance which had passed previously as a part of H.R. 12290. It did not include the allowance phaseout provision included in H.R. 12290 and backed by the Administration, however. This means it would provide as much as $2.7 billion in tax relief when fully effective.

Resource References: See Ways and Means hearings, Volumes 7 and 9; Treasury Studies, Part 2.

Increase the personal exemption

The Problem: The $600 personal exemption has been in effect since 1948, unchanged despite inflation and cost-of-living increases in intervening years. Treasury estimates a comparable 1969 figure, reflecting these increases in line with changes in government economic indexes, would be $891.

An increase in the exemption has been criticized as a tax change because each $100 increase means much more to the rich than to the poor. For example, it would mean only $14 in tax relief for the low-income taxpayer in the 14% bracket and $70 for the wealthy individual at the 70% level.

Present Law: Exemptions are allowed against adjusted gross income of all taxpayers, regardless of whether they itemize deductions, take the 10% standard deduction, or use the minimum standard deduction. A taxpayer is entitled to one $600 exemption for himself and each dependent. An additional $600 exemption is allowed for each person over 65. And an additional $600 exemption is allowed for blindness.

Pending Proposals: More than 200 bills calling for personal exemption increases were introduced in this session. They called for increases to $700, $750, $850, $900, $1,000, $1,200, $1,500 and $2,000. Several of the proposals also called for extending the exemption for blindness to other handicapped persons.

Revenue Impact: Treasury estimated increasing the personal exemption from $600 to $1,200, based on 1969 earnings levels, would cost $17.3 billion.

Proponents and Opponents: Most of the support has come from Members of Congress. There is no organized opposition to an increase.

Administration Action: The Treasury, in its December recommendations, proposed a higher exemption for those over 65 but did not call for changes applying to other dependents.

The Nixon Administration has not called for any exemption changes.

House Action: The House took no action on personal exemptions.

Mr. METCALF. Mr. President, on October 16, I made available that section of the Tax Reform Fact Book which discusses the taxation of oil, gas, and minerals. By way of addition, I have since discovered that the Representative from Florida, Mr. GIBBONS, has previously introduced a bill, H.R. 9735, that deals directly with the subject of mineral production payments.

CONCLUSION OF MORNING BUSINESS

Mr. MANSFIELD. Mr. President, is there further morning business?

The PRESIDING OFFICER. Is there further morning business? If not, morning business is concluded.

VETERANS EDUCATION AND TRAINING ASSISTANCE AMENDMENTS ACT OF 1969

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the unfinished business be laid before the Senate.

The PRESIDING OFFICER. Without objection, the Chair lays before the Senate the unfinished business, which the clerk will state.

The LEGISLATIVE CLERK. H.R. 11959, to amend chapters 31, 34, and 35 of title 38, United States Code, in order to increase the rates of vocational rehabilitation, educational assistance, and special training allowance paid to eligible veterans and persons under such chapters.

AMENDMENT OF THE AGRICULTURAL MARKETING AGREEMENT ACT OF 1937

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the pending business be temporarily laid aside and that the Senate proceed to the consideration of Calendar No. 487, S. 1455.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. S. 1455, to amend section 8(c)(2)(A) of the Agricultural Marketing Act of 1937, as amended, so as to include Colorado, Utah, New Mexico, Illinois, and Ohio among the specified States which are eligible to participate in marketing agreement and order programs with respect to apples.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana? The Chair hears none and it is so ordered.

Thereupon, the Senate proceeded to consider the bill which had been reported from the Committee on Agriculture and Forestry with amendments, on page 1, line 3, after the word "That", strike out "the first sentence of section 8c(2)(A) of the Agricultural Marketing Agreement Act of 1937, as amended," and insert "clause (A) of the first sentence of section 8c(2) of the Agricultural Adjustment Act, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937 and subsequent legislation,"; and on page 2, line 3, after the word "and", strike out "Ohio.'"; and insert "Ohio".'"; so as to make the bill read:

S. 1455

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That clause (A) of the first sentence of section 8c(2) of the Agricultural Adjustment Act, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937 and subsequent legislation, is amended by striking out "and Connecticut" and inserting in lieu thereof "Connecticut, Colorado, Utah, New Mexico, Illinois, and Ohio".

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the amendments be considered en bloc.

The PRESIDING OFFICER. Without objection, the amendments are considered and agreed to en bloc.

The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill (S. 1455) was ordered to be engrossed for a third reading, was read the third time, and passed.

The title was amended so as to read: "An act to amend section 8c(2)(A) of the Agricultural Adjustment Act to provide for marketing orders for apples pro-

duced in Colorado, Utah, New Mexico, Illinois, and Ohio."

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91-491), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

EXPLANATION OF BILL

This bill extends authority for marketing orders to apples produced in the States of Colorado, Utah, New Mexico, Illinois, and Ohio (including those for canning or freezing) and their products (other than canned or frozen products). Similar authority now exists for apples produced in the States of New York, Michigan, Maryland, New Jersey, Indiana, California, Maine, Vermont, New Hampshire, Rhode Island, Massachusetts, and Connecticut; and, except as to those for canning or freezing, to apples produced in the States of Washington, Oregon, and Idaho.

The bill is identical to section 804 of S. 3590, as passed by the Senate on July 20, 1968.

COMMITTEE AMENDMENTS

The committee amendments merely correct the citation of the provision being amended, and the punctuation.

BACKGROUND INFORMATION

Marketing orders are designed to improve returns to growers through orderly marketing. Orders may (1) regulate the quality of the commodity shipped in order to keep inferior products from depressing prices; (2) regulate the quantity of the commodity marketed by rate of flow or by total quantity; (3) provide for stndardized containers or packs; (4) provide for marketing research and development projects; (5) prohibit unfair trade practices; (6) require price posting; and (7) authorize the collection and dissemination of marketing information.

Orders are issued only after notice, hearing, and determinations by the Secretary that the order will effectuate the purpose of the act and that it is favored by two-thirds of the producers (by number or volume of production).

While not required by statute, orders are always initiated by the producers of the commodity to be regulated, and orders regulating fruits and vegetables are almost always accompanied by handler agreements providing for identical regulation and signed by handlers of 50 percent of the volume of the commodity.

ORDER OF BUSINESS

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

A REBUTTAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that "A Rebuttal," subheaded above, "Point of View," a commentary by Ward Just, relative to the situation existing in Vietnam and the difficulties confronting both this country and the South Vietnamese as well as the North Vietnamese and the Vietcong, be incorporated in the RECORD at this point.

Before the Chair rules, let me say that, in my opinion, Ward Just is one of the fairest and most competent reporters and commentators about the situation in Vietnam. That does not necessarily mean I approve all he has said in this commentary, but I do think it is worthwhile for the Senate's consideration.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana?

There being no objection, the commentary was ordered to be printed in the RECORD, as follows:

A REBUTTAL

(A commentary by Ward Just)

I suspect that Nicholas von Hoffman is right when he says that people in their heart of hearts don't care whether we bug out, run out, march out, stumble out, crawl out or fade out of South Vietnam. Who wants to negotiate about cancer? He is talking about a substantial minority in this country, people who have had it, as the President once said in another connection, up to *here;* thus frustrated, convinced the nation is acting immorally, they want to quit.

It would not be difficult to do, and sure as shooting there is a paper in the White House describing the scenario, how Kennedy and Johnson were responsible for the war, how Nixon, Kissinger and Company gave it the good college try but saddled with an impossible Saigon government and an intransigent and seemingly inexhaustible enemy, had concluded, for the good of the country, that losses must be cut. Add a few juicy charges of past mismanagement of the war (God knows there is enough evidence of it), and conclude that the South Vietnamese must now proceed on their own. America has done all it could, and Godspeed to the survivors. And the kids and their parents are pacified. They won't have to go to war in South Vietnam.

It is a pointless exercise to argue the politics of it, whether or not the loss of Vietnam will lead to the loss of Waikiki or even of Bangkok. Even so, that's a detail—arguable either way with most thoughtful men probably believing that yes, a loss in Vietnam probably means the "loss" of Southeast Asia, but if it did, which it might, so what. Southeast Asia, like China, is not our's to lose. "In the last analysis it's *their* war," President Kennedy said, blah blah blah. So it is necessary to set up the argument another way, to make it relevant, as they say, to what's happening now. This is to speak of the war in terms of its morals, and to do that is to examine it from the perspective of the Vietnamese.

Many of the Americans who so vehemently oppose the war do so from the position that the United States has virtually destroyed what it has tried to save. It is a fair point and an accurate one, far fairer and more accurate than they might suspect.

The Vietcong had all but won the war in early 1965, before the introduction of American combat troops. The test of strength was decently fair, with the indigenous Southern army with American support fighting the indigenous Southern guerrillas with North Vietnamese support. It seemed clear then that the Communists had the support of the people of South Vietnam. Theirs was the strong tide, and in that Buddhist nation, a nation with an ear tuned to the flow of history (in American political argot it means riding with the winner), the strong tide was the one that would win. The ordinary citizen, not wishing to be out of harmony, would go along; to refuse was to commit an unusual act of defiance. Defiance in that sense is not the Vietnamese way. So in 1965 the Saigon government was playing out a very weak hand, with little support in the country.

The Americans changed all that, first with the money and the men and then, in 1966, by taking charge of the prosecution of the war. What that did was free the South Vietnamese from the necessity for choice. The Americans ran the war now, and the South Vietnamese were obliged to go along with it—whether they wanted to or not. Many of them did. Others did not. Some of those who had managed to sit on the razor's edge were now forced to ante in with the allies. In a society as astoundingly resilient as South Vietnam's, many more continued to play both ends. But it became increasingly more difficult as 100,000 men became 200,000 men and finally half a million and $30 billion a year. What this means is very simple. It is that the responsibility for prolonging the war is this country's, not Saigon's nor Hanoi's.

The problem is that the tragedy is much, much deeper than Nicholas von Hoffman and others would have it. It would be wonderful if we could just walk away from it, pull the boats up to Camranh Bay and steal away into the night, leaving Saigon and Hanoi to work things out their own way. But if you did that you would want the journalists to leave along with the soldiers because the stories that would come with the Communist victory would be pretty grim stories, 20 years of scores to settle.

Our responsibility is not to Thieu or Ky or any of the other generals or merchants, nor is it to the South Vietnamese constitution nor to Freedom, nor even to the Americans who have died there, almost 40,000 now and 250,000 wounded. The responsibility is to those South Vietnamese who have been obliged to fight or otherwise resist the Communists because the Americans disturbed the normal course of events and changed the war. That is why the responsibility goes so deep, and it is a responsibility that will not be discharged by importing three million Vietnamese and parking them in the middle of Utah. But it is either that or stand by and watch the slaughter. Of course there may be no slaughter. Possibly not, but I know of no one who would make a bet on that. Twenty years of scores to settle.

That is not an argument bound to find much favor anywhere, because the Vietnamese are not nature's noblemen and we have had them around our necks for too long. For God's sake, for how much longer are we going to pick up the morning paper and find Vietnam all over page one? Whoever heard of Danang before 1965? The bitterness and anger sifts down and finally people say the hell with it. Get out, get out; get out, and we don't care how; get out, and get out right now; get out, or we'll blow the house down. And we don't care what happens later. What happens in the future doesn't matter, because nothing could be worse than the present.

But huh uh, kiddies; it won't work. This particular tragedy isn't going to go away because American college students are excused from duty in the rice fields. It's there with us now, and is going to be there for a generation and the question the moralists ought to ask themselves is where they intend to assign the responsibility for the blood left in the wake of the American boats, pulled up there in such haste at Camranh Bay. When the newspaper displays the photographs of those killed, what do we do then? Avert our eyes? Blame Lyndon Johnson? Perhaps pretend it isn't as bad as it looks, that the victims are war profiteers, or corrupt generals, or pimps or double agents. To the neurotic young it won't matter; American imperialism will be to blame, and that will be that. But what of the rest of us?

All we can do now is play out the tragedy, and try to learn the right lessons. On the ground in South Vietnam, revise the rules

of engagement, initiate a cease-fire, keep withdrawing troops, but keep security as well; try to keep people alive, ours and theirs; wind all of it down, but in the winding be mindful that there are people whose lives are at the mercy of the Americans. What is entirely misunderstood in the current flight from reality is that this war is not Kennedy's war or Johnson's war or Nixon's war, it's America's war and we all bear some responsibility for it, and for its decent resolution. And the heroes of it are not in Sweden. The heroes are dead.

Our accountability to the South Vietnamese is not without end, but it is there for the immediate future. That is the price you pay for undertaking the direction of someone else's life. What extraordinary courage and toughness it will take now for Americans to be decent.

VETERANS EDUCATION AND TRAINING ASSISTANCE AMENDMENTS ACT OF 1969

The Senate resumed the consideration of the bill (H.R. 11959) to amend chapters 31, 34, and 35 of title 38, United States Code, in order to increase the rates of vocational rehabilitation, educational assistance, and special training allowance paid to eligible veterans and persons under such chapters.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the committee amendment, in the nature of a substitute, to the pending measure be agreed to at this time and that it be considered as original text for the purpose of amendment.

The PRESIDING OFFICER. Is there objection to the request of the Senator from California?

Without objection, it is so ordered.

Mr. CRANSTON. Mr. President, I also ask unanimous consent that the staff members of the Committee on Labor and Public Welfare be authorized to be in the Chamber during consideration of H.R. 11959.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CRANSTON. Mr. President, before presenting my floor statement describing and discussing H.R. 11959 in detail, I will make a few comments on some of its most salient aspects.

The critical problem which the bill is designed to remedy is the low participation rate under the current GI bill educational assistance program.

Today, achievement in school is substantially more important to an individual than it was at the time of the Korean conflict.

Whereas at that time the median level of education achieved by a person 25 years and older was 9.3 years, by 1967 it had risen to 12 years.

Today it is even higher.

Nevertheless, during the first 3 years of operation of the present GI bill program, the overall participation rate is fully 25 percent lower than it was after 3 such years under the prior two programs.

This means that today's veteran who needs a higher level of education and training because of the sophistication of today's requirements are not finding it possible to upgrade their skills and education under the GI bill.

And most unfortunately, those veterans in the greatest need of further education and training are precisely those taking the very least advantage of that program.

Whereas 23 percent of the enlisted separatees from military service are high school dropouts, only 6.1 percent of all eligible high school dropout veterans have taken advantage of their educational benefits under the current program. This is 6.1 percent of a total population of 1.7 million post-Korean conflict high school dropout veterans.

Disturbing as this is, even more disturbing is the fact that after the first 3 years of operation of the prior two GI bill programs, the proportion of high school dropout veterans taking advantage of the GI bill education benefits was three times as great as the present rate.

The committee sought to remedy this participation rate problem in two basic ways.

First, by giving our present-day veterans an allowance rate covering the same proportion of education costs as were covered by the allowance paid Korean conflict veterans. This is title I of the bill.

And second, by providing for specially designed programs to prepare and assist high school dropout veterans in furthering their education and training. This is title II.

Title II is well described by its name: "Special assistance for educationally disadvantaged veterans; predischarge education program; veterans' outreach services program; miscellaneous amendments to veterans' and dependents' education programs."

I will describe these measures in some detail later.

Regarding the rate increase, which was proposed by Senator YARBOROUGH originally in S. 338, each Senator has on his desk a fact sheet which clearly shows the enormous disparity between the amount of comprehensive education costs covered by the Korean conflict GI bill and those covered presently.

For example, let us focus upon the allowance paid a veteran with no dependents pursuing an undergraduate college course.

At present he receives $130 per month. Under the Korean conflict program, he received $110 per month.

That $110 covered approximately 98 percent of the average tuition, board and room costs at that time.

The $130 paid today covers only about 67 percent of the costs.

This is because those comprehensive education costs have increased more than 75 percent since enactment of the Korean conflict GI bill, whereas the educational assistance allowance has been increased by only about 18 percent.

This means that in terms of Korean conflict dollars, today's veteran is receiving only about $74 to cover the costs of his education.

This amount is even less than a World War II veteran received solely for subsistence 21 years ago, and his tuition, fees and book costs were paid for directly over and above this $75.

The reported bill would restore the 98-percent coverage of education costs that existed under the Korean conflict program by raising the present $130 rate to $190.

This should be contrasted with the House-passed increase to only $165 which would cover only about 85 percent of present-day education costs.

In a letter to Senator YARBOROUGH, made public on October 21, the President expressed his "extreme concern" about what he termed the inflationary impact of the rate increase proposed by the committee to restore comparability of Korean conflict coverage for our present veterans.

Instead, the President endorsed a wholly inadequate increase of only 13 percent based on the rates established in 1967. This would raise the allowance from $130 to $147, less than half of the House-passed increase which itself fails to accomplish the necessary job.

I find the President's position entirely untenable.

First, the rates in the post-Korean conflict GI bill enacted in 1966 were plainly inadequate to begin with.

They were $100 a month which was $10 less than the rate enacted 14 years earlier in the Korean conflict bill.

This disparity was only slightly corrected when in 1967 the rate was increased to $130 which made it just equal to the figure which had already been established 2 years earlier—in 1965—as the allowance for war orphans and widows.

I share the President's concern over inflation. But, I reject the notion that expenditures to build better educated and more productive citizens are really inflationary.

If we fail to provide this essential education and training to so many of our veterans, who need it so badly, we will have to pay the costs in the future.

We will pay in terms of disbursements of unemployment compensation and welfare payments.

We will pay in terms of greater Veterans' Administration medical and hospital care expenditures.

We will pay in terms of lost production of goods and services.

And we will pay in terms of lost gross national product and tax revenues.

Moreover, it is essential that we recognize that, just as we must provide ammunition and armaments for our servicemen, an integral part of the cost of the war we are waging is the cost of assisting those servicemen to adjust to civilian life and succeed in it after their service.

When they return to civilian life, they are the victims of the inflationary situation which all of us are concerned about rectifying and from which all of us suffer.

But we must not victimize them still further by shortchanging them on the level of benefits which they need and deserve to help them in their education and training.

The resources of a young man returning from Vietnam are already meager, and we need not and must not compound his difficulties by making only a token

change in an antiquated and grossly inequitable rate structure.

Our veterans must not be sacrificed on the altar of efforts to combat inflation.

In speaking about inflation last week, the President referred to the "bitter medicine" that many citizens would have to swallow if the effort to combat inflation was to succeed.

If such medicine is to be the prescription for some of us in this country, it would be sinking to the very depths of ingratitude and injustice to administer such a potentially destructive dose to those men who have risked their lives and limbs in the service of their country.

Now I will describe the committee action and the reported bill—H.R. 11959—in greater detail.

H.R. 11959 was reported, and the Labor and Public Welfare Committee report on it was filed, on October 21, 1969. The measures in the reported bill were the subject of 5 days of hearings before the Subcommittee on Veterans' Affairs, which I am privileged to chair.

Testimony was presented by spokesmen of the administration, veterans organizations, numerous educational institutions and organizations, Senators, and other concerned parties. Except for the position of the administration, the testimony in support of the measures included in the reported bill was virtually unanimous. I will describe the administration's current position later on in this statement.

The bill reported by the Labor and Public Welfare Committee contains an amendment in the nature of a substitute including the provisions of eight bills as follows: It incorporates the principal provisions of S. 338 and a proposed amendment to it, introduced by Senator YARBOROUGH; S. 1998, introduced by Senator YARBOROUGH; S. 2036, introduced by Senator DOMINICK; S. 2361, introduced by Senator KENNEDY; and S. 2506, and a proposed amendment to it, S. 2668, and S. 2700, the three of which I introduced. The committee substitute also incorporates the essential features of S. 1088, introduced by Senator JAVITS; most sections of H.R. 6808; and retains section 3 of H.R.11959.

On the basis of extensive testimony regarding the disturbingly low participation rate in the present GI bill program and executive session consideration of the many bills I have just mentioned by the subcommittee and full committee, the committee concluded that a consolidated bill was necessary in order to present a coordinated and interconnected package of measures to bring about a substantially increased rate of participation in the GI bill education program by eligible veterans and eligible dependents.

The actions of the subcommittee and the full committee in reporting these measures were unanimous, evidencing broad bipartisan support for strong legislative action to provide our present-day veterans with the same degree of GI bill coverage as was provided veterans of the Korea conflict and also to attack the extremely low participation rate in the GI bill program by high school dropout veterans. And I wish to thank my fellow subcommittee and full committee members for their full and expeditious consideration of these measures so vital to our veterans and our Nation.

The reported H.R. 11959 is broken down into two titles. Title I contains the provisions of S. 338, the proposed amendment to it, and S. 1998, with certain relatively minor amendments described in the committee report on pages 19–26. Those measures were all introduced by the distinguished chairman of the Labor and Public Welfare Committee, Senator RALPH W. YARBOROUGH of Texas, who is also the ranking majority member of the Veterans' Affairs Subcommittee. Senator YARBOROUGH served with great dedication and distinction as chairman of that subcommittee longer than any other chairman—for 7 years. During this time, he battled mightily with three administrations to enact a post-Korean conflict GI bill. He was finally successful in achieving this landmark goal when the Congress enacted the Veterans Readjustment Benefits Act of 1966.

I have already spoken about the provisions of title I of the reported bill, and I expect that Senator YARBOROUGH, as the author of those provisions, will be discussing them in great detail in this statement.

Title II of the bill incorporates the provisions of the eight other bills to which I referred earlier. It also includes two amendments offered in committee—contained in section 201(a) and section 208—which are discussed on pages 26–29 and 65 and 66, respectively, of the committee report.

With the exception of some relatively minor provisions in the reported bill, the administration had not until the day before yesterday taken a position on the merits of any of these programs. Rather it had recommended that any legislative action be delayed until the President's Cabinet Committee on the Vietnam Veteran, appointed on June 5, 1969, had completed its study and submitted its recommendations. Although that committee on October 20 transmitted to the President an interim report, it appears quite certain that its final report will not be available for at least another month. And after that no timetable has been set for submission to the Congress of Presidential recommendations for legislative action.

In light of the extensive testimony before the Veterans' Affairs Subcommittee demonstrating the urgency of prompt and favorable action on virtually all the legislation under consideration, the committee determined that it must proceed to act on these important legislative proposals. Thus, on October 9, H.R. 11959, with amendments, was ordered reported by the committee.

Turning now to the specific measures in the reported bill, the five principal programs in the committee's comprehensive education and training proposal are described in the committee report, as follows:

(1) Increasing GI bill allowance rates under chapters 31, 34, and 35 of title 38, United States Code, by approximately 46 percent in all programs, including those for war orphans and widows;

(2) Establishing a new farm cooperative program, similar to the one which was previously in effect under the Korean conflict GI bill, which stresses on-farm training rather than institutional instruction;

(3) Establishing a number of new education and training programs designed especially for high school and elementary school dropouts and other educationally disadvantaged veterans, including a pre-discharge education program, special assistance for the educationally disadvantaged veteran to facilitate achievement of college admission, special supplementary assistance for veterans in school to assist them in completing their courses of education, grants and contracts to educational institutions for special educational programs for veterans, and permitting the counting of deficiency and remedial courses toward total college semester hours for the purposes of determining full-time or part-time educational assistance allowance rates;

(4) Providing for a reduction in the number of semester credit hours required for payment of full-time and part-time educational assistance allowance rates; and

(5) Providing for a newly oriented and greatly expanded veterans outreach services program designed to search out recently discharged veterans, especially the educationally disadvantaged, to advise them of the benefits to which they are entitled and assist them in obtaining them.

Now I would like to describe briefly the special education and training programs which are proposed in title II.

The bill would add three major subchapters to title 38 of the United States Code.

The first new program that would be established as a new subchapter V in the chapter 34 veterans' educational assistance program would provide for special assistance for the educationally disadvanged veteran through essentially three different programs.

First, it would permit GI bill allowances to be paid to a veteran taking college preparatory courses in other than a secondary school; for example, on a college or junior college campus. This idea was originally proposed by Senator KENNEDY in S. 2361 and was carried over in S. 2668 which I introduced. The purpose is to enable such college preparatory work to be offered to a 22- or 23-year-old veteran in an atmosphere that he would find most acceptable and comfortable. Such preparatory programs could be very flexible in terms of including both instruction class hours and other supervised program work. This new subchapter would also include in GI bill coverage education at the elementary school level, which was proposed in S. 2036, introduced by Senator DOMINICK.

The second new program in this new subchapter would provide special supplementary assistance to veterans already in school under the GI bill. This assistance would take the form of direct payments to educational institutions—up to $100 per veteran per month—for the provision of special remedial, tutorial, or counseling assistance to enable the educationally disadvantaged veteran to perform satisfactorily in the course he is pursuing. Payment of this supplementary assistance would not count against the

veteran's full entitlement to regular GI bill benefits.

The third new program would provide for the authorization of appropriations for the Veterans' Administration to make grants and contracts with schools for two purposes: First, to develop programs providing the special educational and supplementary assistance which I have just described and, second, to develop and implement special programs for veterans such as public service training programs, including the training of innercity teachers, policemen, firemen, and medical technicians.

The second new subchapter would also be part of the chapter 34 veterans' educational assistance program in title 38. This would establish a predischarge education program called PREP, designed to involve the preveteran during the last 12 months of his military service in education or training to prepare him to pursue GI bill education or training after his discharge. It is estimated that as many as 430,000 enlistees discharged yearly are in dire need of additional education or training in order to compete at all successfully in the job market. Yet, as I have already indicated, these very men have been taking advantage of their GI bill benefits the very least.

The PREP program would operate as an adjunct of the present Department of Defense transition program which reaches only 60,000 separatees annually. Unfortunately, very few educational institutions have been able to participate in that program because the cost of providing instruction is not able to be borne under any Department of Defense appropriations. It is this gap that PREP would fill by requiring the Veterans' Administration to pay, on behalf of a preveteran, the costs of education or training provided by a school at or near a military base for GI bill preparation. Payments would be limited to $150 per month per preveteran, which should generally be sufficient to cover the costs of recruiting, counseling, books, instruction, and placement.

Participation in the PREP program would not be charged against a preveteran's total period of eligibility for regular GI bill benefits after discharge. The committee believes that this PREP program would draw into the regular GI bill program a substantial number of veterans who would otherwise not take advantage of those benefits—either because of lack of ability, inertia, or lack of confidence.

The third new subchapter would be added to chapter 3 of title 38. It would provide for a newly oriented and expanded veterans outreach services program in the Veterans' Administration. Under this program, the Veterans' Administration would be charged with the congressionally sanctioned obligation of seeking out and offering a wide range of assistance to recently discharged veterans, especially those who are educationally disadvantaged.

The reasons for this new approach are fully discussed in the committee report on pages 58 through 63. It seems sufficient at this point to cite a few statistics about the U.S. veterans assistance centers program, called USVAC's, which the Veterans' Administration has administered for the last year or so.

This program has successfully motivated only 6.5 percent of the 216,200 high school dropout veterans discharged during that period, the prime target for the program. It has resulted in interviews with only about 17 percent of that population and in successfully inducing less than half of those interviewed even to file an application for GI bill benefits.

Although the concept behind the outreach effort, initiated by President Johnson last year, is a good one, it needs drastic expansion and overhaul to make it more fully responsive and relevant to the needs of the Vietnam veteran, especially the educationally disadvantaged veteran. We need more centers. We need them in rural areas, perhaps through use of mobile units. We need them in neighborhoods in urban areas, not in downtown office buildings. And we need more Vietnam veterans working for the Veterans' Administration to provide these outreach services.

All of these changes would be called for under the new outreach services program. The types of benefits provided to eligible veterans and eligible war orphans and widows would specifically include:

First, providing full information about available VA and non-VA benefits, services, and training programs.

Second, conducting interviews to answer questions and planning programs of education and employment.

Third, providing job and other referrals and appropriate job placements assistance, with special stress on matching qualifications with available jobs and training programs, including, when none are available locally, those in other localities.

Fourth, providing social services, such as professional counseling, to assist them in obtaining maximum assistance from the available benefits and services.

Fifth, assisting in preparation of a claim for any such benefit or service.

Sixth, maintaining complete records and conducting periodic followup.

In addition, the program would provide for payment of reasonable interview and relocation expenses for veterans and eligible persons assisted by the outreach services when these persons could not find suitable jobs or training opportunities in their home communities. This provision was proposed by Senator JAVITS in S. 1088.

In addition to the three new subchapters proposed in title I of the reported bill, there are several other features designed to assist veterans pursuing education under the GI bill, particularly those having difficulty meeting full-time or part-time minimum requirements. Under these new provisions, the minimum number of semester credit hours required for payment of a full-time and part-time educational assistance allowance would be reduced substantially at many schools, and veterans could also have counted certain numbers of noncredit remedial courses toward these minimum requirements for purposes of payment of allowances.

Two amendments to title I were adopted in committee, one proposed by Senator MONDALE to require timely notification of war orphans regarding their entitlement to educational assistance benefits; the other proposed by Senator DOMINICK to liberalize the definition of a vocational program of education to include more than one predetermined and identified vocational objective.

Finally, title II of the reported bill also includes a number of noncontroversial, relatively minor measures included in H.R. 11959 and H.R. 6808 as passed by the other body. These include programs for a new high school study definition; for expediting first allowance checks for veterans in below-college-level courses; to liberalize commencing dates of dependents' GI bill eligibility; and to eliminate most of the remaining bars to duplication of benefits.

This recapitulation of title II should make clear the comprehensive nature of the programs proposed in the reported bill. I have reviewed the interim report of the President's Committee on the Vietnam Veteran released publicly on Tuesday. Eight of the 10 proposals in that report are already implemented fully by title II of the reported bill. Thus, I urge the Senate to pass H.R. 11959 as amended by the committee to bring about the type of GI bill participation that our veterans deserve and our Nation requires and to give post-Korean veterans the fair shake to which they are fully entitled.

I wish again to thank Senator YARBOROUGH, the chairman of the full Labor and Public Welfare Committee, the author of the rate increase proposals in title I, and the father of the post-Korean GI bill program, for his great cooperation and assistance in the subcommitee, in the full committee, and in planning for floor consideration.

Mr. ELLENDER. Mr. President, will the Senator yield?

Mr. CRANSTON. I am happy to yield.

Mr. ELLENDER. As I understand, the Government pays whatever expense there is in connection with tuition and fees; is that changed any?

Mr. CRANSTON. That is not correct. That was true following World War II. The basic point now is that we are simply not giving them enough to survive on. We are no longer paying their tuition directly and we are not giving them enough money to live on and pay for their education. Inflation is eating up their benefits very rapidly.

Mr. ELLENDER. So this bill provides not only money to sustain him, that is, his room and board, but also to pay whatever additional amount is necessary to the college he attends?

Mr. CRANSTON. That is correct.

Mr. ELLENDER. And that amounts to what?

Mr. CRANSTON. It will go up to $190 a month, which will cover about 98 percent of the present comprehensive education costs.

Mr. ELLENDER. Now, as to the tuition and fees, how does the Senator take care of that in his bill? Is it fixed, or is it arranged so that no matter what college he goes to——

Mr. CRANSTON. No, the veteran has to pay the tuition and fees out of that $190. He has to pay directly his tuition

costs, his room, his board, his clothing, and any other expense that he has.

Mr. ELLENDER. Well, that is a very small additional amount.

Mr. CRANSTON. It most certainly is.

Mr. ELLENDER. Because I happen to have a few grandsons in college now, and I know what it costs. It has tripled in the last 7 or 8 years.

I compliment the Senator for the statement he has made, and I hope to be able to be here to vote for the measure when it comes up for a vote.

Mr. CRANSTON. For the Senator's information, I should like to add that under the World War II program a veteran's full tuition, fees, book costs were paid for directly and he was given $75 a month additional for living expenses.

Mr. ELLENDER. Mr. President, I thought that was still the law in respect to other veterans. I was under that impression. Has this been changed?

Mr. CRANSTON. Yes. That was changed at the time of Korea so that we no longer did what we did for World War II veterans.

Mr. ELLENDER. If the tuition increases, the veteran may still be short of funds.

Mr. CRANSTON. The Senator is correct.

Mr. ELLENDER. Nothing is contained in the bill to arrange it so that in the event the tuition increases, the Government would put up more funds?

Mr. CRANSTON. That would not be done. We would have to come back for more money.

Mr. President, I would like to mention one other point that astounded me. This will be of special interest to the Senator from Louisiana. It involves the failure of the program to attract the veterans to take advantage of the farm cooperative program.

There is an appalling shortage of farmers today. While 785,000 veterans participated in prior farm cooperative programs which enabled them to go back to the farms, under the present program, only 411 had taken advantage of the program as of June 30, 1969. It is to improve that situation that we have included in this omnibus bill provisions, originally sponsored by Senator YARBOROUGH in S. 1998, designed to induce more veterans to go back to farming.

Mr. ELLENDER. Mr. President, I presume that the reason for that was the increased cost of land and equipment.

Mr. CRANSTON. All sorts of problems were involved. However, direct aid to veterans who wish to go back to the farms has been devoured by inflation. We are not able to get information to them to advise them of their opportunities. That will be covered in the pending bill by the new outreach services program.

Mr. ELLENDER. Has the Senator any idea of how much the bill would cost?

Mr. CRANSTON. The expenditures the first year would be $383 million.

Mr. ELLENDER. And, of course, that might increase.

Mr. CRANSTON. It would be expected to increase. If, however, we are able to achieve peace in Vietnam and do not have the onflowing very great number of veterans, the cost will not increase.

Mr. ELLENDER. We would be protected if it were to increase?

Mr. CRANSTON. The Senator is correct. The total cost of this bill amounts to only 2 percent of the cost of the war. To cut back here and fight inflation by this means and have those who have sacrificed overseas for us make further sacrifices when they come home is unconscionable.

Mr. ELLENDER. Mr. President, I thank the Senator.

Mr. CRANSTON. Mr. President, I thank the Senator from Louisiana.

Mr. YARBOROUGH. Mr. President, will the Senator yield?

Mr. CRANSTON. I yield.

Mr. YARBOROUGH. Mr. President, I thank my friend, the distinguished Senator from California, the chairman of the Veterans' Affairs Subcommittee for yielding to me.

He has been very diligent in his first year as chairman of the Veterans' Affairs Subcommittee in conducting the hearings on the pending bill.

As the record shows, the hearings ran until the 12th of August. The day after the hearings were concluded, Congress took a 3-week recess. I point this out because of the criticism that has been leveled at the Veterans' Affairs Subcommittee for not being diligent. I have never seen a committee act more diligently in the discharge of its duties. Those hearings ran for more than 2 months, from June to August.

There were many changes in the membership of the Senate this year, and the chairmanship of every subcommittee of the full Committee of Labor and Public Welfare has changed because of the loss of three members of the committee this past year.

Senator Lister Hill left because of the illness of his wife. Senator Wayne Morse and Senator Joe Clark were not reelected. This caused changes in the chairmanship of the subcommittees.

The Senator from California took over as the chairman of the subcommittee and worked most diligently.

As the record shows, nine different bills are combined in this measure. The Senator from California incorporated all these measures into one bill. He did this with great skill and ability. The hearings were diligent. The executive sessions were handled in a superb fashion.

As you know that if there is an objection by any Senator, the bill cannot be reported to the Senate until we have a printed record.

We proceeded promptly with these bills. The Veterans' Affairs Subcommittee, on which I have the honor to serve under the distinguished Senator from California, worked very hard on this measure. The day the printed record was received, October 9, the Committee on Labor and Public Welfare unanimously voted to report the bill to the Senate. Every member of the committee of both political parties voted to favorably report the bill.

It was a bipartisan approach. There never was any partisanship involved. The only partisanship was in favor of the veterans, not for or against any political party.

The only question was what could we do to give our veterans a fair chance in life. This is not a bonus bill. It is a bill to readjust the assistance to the veterans under the cold war GI bill and bring it in line with the Korean conflict GI bill.

After World War I, we had an unfortunate experience with the bonus for the veterans. So in the middle of World War II, because of the vast number of veterans who would be returning home, wise men worked hard to devise the World War II GI bill. It was an all-encompassing measure for veterans, the best such measure ever passed by any nation for the purpose of permitting the veterans returning from war to obtain educational assistance.

The measure covered not only college training, but also high school, technical, office, and flight training.

The pending bill attempts to do for the veterans of the cold war and the Vietnam war periods what the earlier bills did for the veterans of World War II and the Korean conflict.

As pointed out in the exchange between the senior Senator from Louisiana and the Senator from California, the pending bill does not do as much as was done for the veterans as the prior two bills did.

The measure passed after World War II not only paid a certain stipend to the veterans for their maintenance, but it also paid all of their tuition. A veteran could pick out the most expensive college in the land and the Government would pay the tuition and a stipend in addition.

After that bill, the subsequent bills have given the veterans a flat sum per month and the veterans have had to pay their tuition out of that sum.

Mr. President, as chairman of the Labor and Public Welfare Committee, I am proud to recommend to my colleagues a comprehensive package of veterans education and training bills. These eight Senate bills and one House bill which have been combined into one bill and substituted for the House bill as H.R. 11959, are specifically designed to stimulate greater participation by veterans in the education and training programs provided by the cold war GI bill off 1966.

Participation in the cold war GI education and training programs has been considerably lower than under the World War II and Korean conflict programs. Over 50 percent of the eligible veterans of World War II used their education benefits.

There were more than 15.6 million veterans in World War II. Of those, 7.8 million used the training and educaton benefits. Due to the so-called tightening up of the bill for the Korean conflict veterans, fewer have gone to school.

The administration said, "we are tightening up. We are taking the water out." What they did was to keep 8 million veterans from enjoying their benefits.

The level of participation in such programs under the Korean GI bill was 42 percent. Under the present bill, only 1,303,977 of the over 6 million eligible veterans have made use of their hard-earned and well-deserved rights. This

represents a participation level of only 20.7 percent.

One veteran out of every two in World War II went to school under the GI bill. Two out of every five after the Korean war went to school under that bill. Now, with more than 6 million veterans, only one out of five would have gone to school.

One aspect of the veterans' education and training program which has suffered the sharpest decline in participation is in farm cooperative training. Since the enactment of the present bill in 1966, only 411 veterans have taken farm cooperative training in comparison to the 785,000 veterans who participated in this type of training under the World War II and Korean conflict GI programs.

The pending bill, H.R. 11959, represents the committee's efforts to proposed legislation which will reverse this low participation trend. The bill does this by:

First, increasing GI bill education and training allowances by 46 percent over the rates provided by the present law;

Second, expanding the existing flight programs so as to permit a veteran to obtain a low-interest loan for the purpose of receiving a private pilot license;

Third, establishing a new and broader farm cooperative training program;

Fourth, establishing new education and training programs to prepare high school and elementary school dropouts and other educationally disadvantaged for higher education;

Fifth, reducing the number of semester credit hours required for receipt of full-time and part-time allowances; and

Sixth, providing for a new far-reaching veterans outreach program which would counsel veterans of their rights under the GI bill and encourage and assist them in obtaining them.

H.R. 11959 is the end product of many hours of hard and devoted work by the Subcommittee on Veterans' Affairs and particularly the chairman of that subcommittee, the Senator from California (Mr. CRANSTON). Senator CRANSTON'S subcommittee held hearings on these bills and other important veterans health-care bills—which the Senate passed unanimously on October 21—from June 24 to August 12. These hearings comprise three volumes and contain more than 630 pages of testimony.

After the completion of these hearings, the subcommittee took the action I previously described and reported these bills favorably to the full committee on October 2. On October 9, the full Labor and Public Welfare Committee unanimously reported this important comprehensive bill to the Senate with the recommendation that it receive prompt approval.

I am proud of the work by the Subcommittee on Veterans' Affairs. The members of the subcommittee, both Democrats and Republicans, recognized how vital these measures are to our country's veterans and set-aside partisan consideration. They came to constitute a quorum at each meeting so that these bills could be moved, and they acted with diligence on them. I wish to commend all the members of the Labor and Public Welfare Committee for their efforts on behalf of our veterans and especially Senator CRANSTON for his leadership in this matter. I thank and congratulate my Republican colleagues for helping to give us the quorum that enabled us to move the proposed legislation.

As I have stated, H.R. 11959, as reported by my committee, is a combination of many important bills. However, I will devote the remainder of my remarks to title I only. This title embodies two bills, S. 338 and S. 1998, which I introduced, and they are to amend the cold war GI bill, which I had sponsored from 1958 on. The bills which comprise title II, most of which I am a cosponsor of, will be discussed in detail by the distinguished chairman of the Subcommittee on Veterans' Affairs and other members of the subcommittee. They are the principal authors. Senator CRANSTON is the principal author of the second title to that composite part, while I am the author of title I.

Mr. MONTOYA. Mr. President, will the Senator yield?

Mr. YARBOROUGH. I yield to the distinguished Senator from New Mexico, who has long been a champion of veterans' rights in this body, and who has introduced a number of veterans bills in his own right.

Mr. MONTOYA. Mr. President, I thank my good friend the Senator from Texas for yielding to me.

The distinguished Senator from Texas has been a great leader in the field of education. He has been a great champion not only of those who are veterans but also of those who need educational opportunity in this country. In the short time he has served in the Senate, he has carved for himself a great niche in history as being one of the great champions of education and a great champion of the underprivileged.

Mr. President, my distinguished colleague, Senator YARBOROUGH, and distinguished colleagues from both sides of the aisle today and in the hearings conducted have applauded the long overdue increase in veterans educational benefits. We have to frankly face the fact that the most onerous and dangerous task of our youth—fighting—increasingly falls upon our most disadvantaged men. The very least we can do for those who have been refused the fewest benefits of our society as children, and then again as young men, some of its greatest burdens, is to help them readjust to civilian life by giving them the necessary basic allowances in order to acquire the education needed to compete successfully in our modern society.

Education is more than a necessity, it is a right of all Americans—and for veterans who have served honorably in the defense of our country we should go out of our way to help them acquire a higher education.

Yesterday morning I became aware of the President's opposition to the committee's recommendations to increase by $60 veterans' educational benefits. The President's position is an unfortunate position, especially in light of the fact that both Republicans and Democrats have wholeheartedly endorsed the necessity for the committee's recommended increases, which is in fact merely an adjustment to the inflationary increase in the cost of obtaining an education. Should we allow our fighting men in Vietnam to come back and bear the burden of the inflationary trend in the costs of obtaining an education and in the cost of living? I say to you all here now that it is high time that we gave full support to our fighting men in their attempts to return to civilian life and to move forward in their careers. There is no alternative. For if we deny them that necessary increase, we shall in fact fail to repay them for services rendered in defense of our country.

The pending bill has been reported by his committee and by the subcommittee headed by my good friend the Senator from California (Mr. CRANSTON). It is a good bill. It is a bill that should be passed by Congress with great expedition, because it is sorely needed.

As the Senator from Texas has stated, the number of GI's who have availed themselves of the bill as it is now are lower in number or proportion than the GI's who availed themselves of the previous GI bill of rights. I was the prime sponsor of the Vietnam veterans' GI bill, and at that time we thought that $130 would be sufficient. I agree with the committee that, although the sum of $190 provided in this bill is not sufficient, it is a more realistic figure and would enable many GI's to avail themselves of the privileges under this bill.

The bill is sorely needed, and while some may say that in this day or year of great inflation we should try to constrict governmental expenditures, I do not believe that trying to deprive our GI's of educational opportunity would be in order. I believe that inflation has hit the educational field more than any other field, because the table shown in the report clearly reflects that even the meager sum of $190 will not be adequate to enable these GI's to go to school. They will have to seek supplemental funds in order to do so.

After the Korean conflict, the GI's did not have to resort to supplemental funds. After World War II, the GI's did not have to resort to supplemental funding. The cost of education then was at a lower and more realistic level in conformity with the allowance made under the GI bill of those days.

So, Mr. President, I take this opportunity to commend my good friend, the Senator from Texas, and to commend my good friend, the Senator from California, for bringing this bill to the floor of the Senate. I am hopeful that this Congress will endorse the bill as quickly as possible, so that we can tell our veterans that this country is thinking about them, that this Congress is mindful of the need for educational opportunity as they are discharged from the service.

I thank the distinguished Senator from Texas for yielding to me.

Mr. YARBOROUGH. I thank the distinguished Senator from New Mexico.

Mr. CRANSTON. Mr. President, will the Senator yield?

Mr. YARBOROUGH. I yield.

Mr. CRANSTON. Mr. President, I should like to express my thanks to the Senator from New Mexico for the re-

marks he has just made on this vital matter; but, more than that, for the leadership he has offered and the hard work he has done in this field. This subject is of prime concern to him because of his deep concern for justice for all Americans, and the importance of doing this work relates directly to justice for the veterans of our Nation.

At this time, and while the Senator from New Mexico is on the floor, I ask unanimous consent that, at the next printing, the name of the Senator from New Mexico (Mr. MONTOYA) be added as a cosponsor of S. 2993, a bill introduced on October 6, which contains some concepts on which we have been working together and which are incorporated in title II of the bill we are considering.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CRANSTON. At this time, I should also like to express my thanks to the Senator from Texas (Mr. YARBOROUGH), the chairman of the Committee on Labor and Public Welfare, for his great leadership over many years in veterans' legislation. His landmark bill, the cold war GI bill of rights, was a monumental accomplishment. He has rendered great leadership and service in moving the present bills to this point where we can have confidence that we will achieve some truly great legislation in behalf of veterans. His cooperation in the committee work on this bill has been invaluable.

I should like also to point out that the Senator introduced S. 338 on January 16 of this year, which embodied much of title I of the bill—most importantly the increase in the educational assistance allowance rate.

The bill we are considering today was not introduced in the House until June. In order to expedite the enactment of legislation to aid veterans, the Senator from Texas sacrificed his right, which he could have claimed, to have his bill with his name passed by the Senate, and instead we are now dealing with the House bill. That is symbolic to me of the dedication of the distinguished Senator from Texas (Mr. YARBOROUGH), who is the chairman of the committee, to achieve and not to seek glory. I compliment him for that, above all else, and praise him for it, and there is much for which he deserves praise.

Mr. YARBOROUGH. Mr. President, I thank the Senator. In my 12½ years in the Senate, I have found that if we were to wait to get credit for the work we do, veterans would not be in college.

The goal of greater educational benefits for veterans has been pursued under three Presidents, and it has been a hard fight every step of the way. The Department of Defense fought it for years, and the Bureau of the Budget fought it for years. Senate after Senate passed similar bills until the opponents of the legislation were forced to accept it. We improved the bill in 1967, we improved it again in 1968, and we are adding another improvement to it today. I take my hat off to my colleagues, those who are now serving in this body and those who have served here in past sessions. This is a Senate accomplishment. This body's action is the only reason that today's veterans have a GI bill. The Senate persisted in sending bills to the House and going on the stump all over the country until people become aware of the problem.

S. 338, which I introduced in the Senate in January of 1969, is aimed at remedying the principal cause of low participation in the GI education program—unrealistically low allowance rates. In the years since the enactment of the original cold war GI bill in 1966, the cost of living in the United States has skyrocketed. This increase in the cost of living is due in large measure to the ever rising cost of the Vietnam war. In addition to overall increase in the cost of public and private education has also reached an alltime high. Unfortunately, the education and training allowances under the cold war GI bill have fallen considerably behind the rapidly increasing cost of education and cost of living, thus making it extremely difficult for veterans to continue their education and training.

A comparison of the present allowances with those paid under the Korean GI bill clearly demonstrates the problem. Under the Korean GI bill, the allowances paid to veterans accounted for about 98 percent of the average tuition, board and room costs at public and private institutions of higher learning

The table which is printed on pages 16 and 17 of the report sets out the exact figures. This is no "guesstimate." These figures are from the Office of Education. The table sets out the average cost of tuition, board, and room in public and private schools, for the public and private universities and colleges, for 4-year schools and 2-year schools. The table covers the period of 1952 to 1969 with projections into the future as far as 1977.

The present allowances cover only 67 percent of these costs. To place the cold war GI program on equal footing with the Korean GI program, it will take an increase of 46 percent in the allowance rates. This is what my bill, S. 338, is intended to do.

The House version of H.R. 11959 provides for only a 27-percent increase in the educational allowances. The House bill also applies only to veterans enrolled in college training and ignores the many veterans in vocational and apprenticeship programs. In the opinion of the committee, the House bill provides too little and is much too limited in its coverage. It is also 10 years too late. This is why the committee adopted my bill which provides for a 46-percent increase not only for veterans in college programs but also for those enrolled in apprentice and on-the-job training, vocational, and farm training.

Furthermore, my bill, S. 338, makes these allowance increases retroactive to September 1. The House version of H.R. 11959 did not contain a retroactive provision. I was glad that the committee adopted this retroactive provision as part of its bill.

There was a statement in the press from the Veterans' Administration in August that veterans would have to borrow money to get in school in September because they could not receive payments until November. They are owed that money and it is only fair that that money be paid as of September 1.

In addition to the important allowance increases, S. 338, also expands the present flight program by creating a loan program whereby a veteran my obtain a low-interest loan of up to $1,000 to pay the cost of obtaining a private pilots' license. This would provide veterans with a means of obtaining a pilot's license which would be of assistance to them in their profession. I am pleased that the committee included this portion of S. 338 in title I of H.R. 11959.

Title I of H.R. 11959, also embodies my bill, S. 1998, which would replace the present farm cooperative program, which so far has been unsuccessful in attracting participants, with a new farm program similar to the program established under the Korean GI bill. The advantages to the program provided by my bill are, first, it requires less classroom work and provides for more on-the-farm training. This is accomplished by replacing the present requirements of 12 hours of classwork a week for 44 weeks a year with a requirement of a total of 200 hours a year at an educational institution with a minimum of 8 hours per month; and, second, it eliminates the previous requirement that the veteran own or control the farm on which he takes his training.

Previously, a student had to own control or control a farm before he could take his training.

Mr. CRANSTON. Mr. President, will the Senator yield?

Mr. YARBOROUGH. I yield.

Mr. CRANSTON. I am reluctant to interrupt the Senator, but so that we may have a rollcall vote on this matter, I ask for the yeas and nays on final passage.

The PRESIDING OFFICER (Mr. HUGHES in the chair). Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. YARBOROUGH. Mr. President, I believe that this new farm cooperative program will greatly encourage young men to return to farm and pursue agriculture as a vocation.

During the hearings on my bills and the other important bills which comprise title II of H.R. 11959, the Veterans' Administration repeatedly requested that the Senate take no action on these bills or any other veterans' legislation until President Nixon's Committee on the Vietnam Veteran, which was appointed on June 5, 1969, could complete its study of existing veterans' programs. In testimony before the Subcommittee on Veterans' Affairs, Mr. Donald E. Johnson, Administrator of the Veterans' Administration, advised the subcommittee that the target date for the report of the President's Committee would be October 1, with an absolute limit of October 15. As of this date, this report has still not been rendered. All that President Nixon's Committee has produced is an interim report of five or six pages which deals with only the allowance increases in my bill. This interim report charges these increases with being excessive and inflationary and suggests only a 10-per-

cent to 15-percent increase in these allowances. This interim report demonstrates, that the President's Committee either does not comprehend the reason for the 46-percent increase in allowances or is completely insensitive to the importance of GI education and training programs.

The President seems to believe that to curb inflation we must cut spending in such areas as veterans' programs. I submit that this approach does not cure the real cause of inflation—the Vietnam war—and penalizes the will of young men who were called on to risk their lives in that conflict. As much as I share the President's desire to stop inflation, I cannot accept an approach which cuts the heart out of this Nation's health, education, and veterans' programs.

Let me point out that total casualties in the Korean conflict were approximately 157,000. Total casualties in the Vietnam war to date are between 290,000 and 300,000—almost double those of the Korean war. If the present rate in casualties continues in Vietnam, the casualty will soon equal those of World War II, which was a worldwide conflict involving millions of American troops in Europe and Asia.

In conclusion, Mr. President, I want again to commend the members of my committee and Senator CRANSTON for their work on these bills. This bill, H.R. 11959, is one we can all take pride in. It is a composite of the Senate bills, given the House bill number in order to expedite matters. Its passage will clearly show the many young men whose lives and plans have been disrupted by the war, that we in Congress are sensitive to their needs and intend to make their interests our most important business.

I urge all my colleagues to give their support to this important legislation.

Mr. President, this is a modest bill which will bring veterans' benefits up only to the level of the Korean conflict GI bill. It is not excessive. We respectfully submit that the cost is only 1 percent of the cost of the war in Vietnam. It is not inflationary.

Mr. President, I yield the floor.

Mr. JAVITS. Mr. President, the bill before the Senate, the Veterans Education and Training Assistance Amendments Act of 1969, was reported by the committee without opposition and represents a bipartisan effort to meet the education and training needs of the Nation's more than 27 million veterans.

The Senator from California (Mr. CRANSTON) deserves great credit for the way he handled his duties. So does the distinguished chairman, the Senator from Texas (Mr. YARBOROUGH), for his long-standing and indefatigable advocacy of GI education, employment, and other opportunities, as demonstrated by his cold war GI bill. Both cooperated with Senators of the minority in order to produce this measure.

The bill before us includes a number of features of bills introduced by majority and minority Members which seek to raise veterans' education and assistance allowances and to provide new educational programs.

It also allows GI benefits to be provided for elementary school, a much-needed reform, creates special education programs for high school dropouts, which should have an effect on the problems of soldiers drafted from the ghettos of the United States and the slums, expands and redirects the veterans' outreach services program, and seeks to assist veterans in locating jobs and paying their moving expenses when relocation is necessary.

I speak on the last program with pardonable pride, as it is based on a bill of my own. I will say more about that program later.

Mr. President, we might as well grasp the nettle immediately. It is proper that I, as the ranking Member on the minority side, and with a Republican President in the White House, should note at this point that we are up against a serious budgetary situation and bring to our attention the serious concerns on the part of the President. His heart, I think I can say with absolute assurance, is entirely in the same place as that of the Senator from California (Mr. CRANSTON), the Senator from Texas (Mr. YARBOROUGH), and mine, as well as all the other members of the committee, with respect to the veteran and the opportunities that should be extended to him, but the President faces a trying situation.

The President is bound by an expenditure ceiling which the Congress has passed and with which he thoroughly agrees. He signed the bill and believes that we must adhere to the ceiling. Hence, he is absolutely bound to find another place to cut.

If we increase expenditures in this program, then we must act with our eyes wide open, because it is only fair to the President of the United States that this be made clear. We all feel deeply that nothing is too good for the man who has laid his life on the line.

The Senator from Texas (Mr. YARBOROUGH) has said, with understandable eloquence, that this is no place to cut. The President's problem and the country's problem is undeniable.

If we pass the pending bill—and we undoubtedly will—what we add must be taken from somewhere else. We should all understand that. It may be that it will come from a program which might make many Members extremely unhappy. It might be a program we dearly prize. But the President and we must face that problem.

I believe that, considering the situation in which we find ourselves, the parliamentary situation, the unanimity of the committee in reporting the bill, and the urgency of the need, it is desirable to pass this bill.

It is a difficult situation to face and a difficult decision to make, but I believe that the best interests of the Nation, of the veterans, and even of the President himself, in terms of the dilemma which he faces, will be served by passing the bill and going to conference with the House, and then doing our utmost to reconcile the views in a creditable manner which will meet the need.

In the meantime, there will be opportunity to take an overall view of the situation and see what it really amounts to. I think it is fair to say that heavier expenditures will come farther in the future and that of all the claims which will be made on the so-called end of Vietnam dividend, we would certainly place this kind of measure for veterans at the very top of the list of priorities. I think we have a right to contemplate that, as we survey the total financial situation.

I think, in fairness to the deeply held views of the President, his letter should be read into the RECORD. I ask unanimous consent that the letter of the President, which was sent to the Senator from Texas (Mr. YARBOROUGH), as well as to me, may be made a part of my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE WHITE HOUSE,
Washington, October 21, 1969.

HON. JACOB K. JAVITS,
U.S. Senate,
Washington, D.C.

DEAR JACK: In line with my talk last Friday on the rising cost of living, I must tell you of my deep concern regarding certain provisions of H.R. 11959, now pending Senate consideration.

Title I of this measure, as amended by the Senate Committee on Labor and Public Welfare, would raise veteran's educational assistance allowances by an average of 46% over current rates. Such increases would be retroactive to September 1, and would mean added expenditures of more than 323 million dollars over present costs in the remainder of this fiscal year. Together with the costs of the bill's Title II provisions, total extra spending through June 30, 1970, would be nearly 393 million dollars.

The average additional outlay for each of the next four full fiscal years would be approximately 550 million dollars.

I am in sympathy with a justifiable increase in educational allowances for post-Korean and Vietnam Era veterans. Yet, I consider the magnitude of the increases contained in H.R. 11959 to require reconsideration for two reasons. The proposed rates are excessive and their effect would be inflationary.

In comparison to the actual rise in the cost of living since these allowances were last increased, just two years ago, a 46% increase at this time is unrealistic and excessive. And, if we are to stay within the expenditure limit for fiscal 1970, the cost of H.R. 11959 as now drawn could not be borne without imposing severe cuts in other also important programs.

It is not easy to criticize the pending bill for it promises some appealing benefits to a most deserving group. But our veterans have long known that they must be champions of responsible government. They know the basic truth that a veterans' program not good for the nation as a whole cannot ultimately be of benefit to veterans themselves.

This summer I appointed a Committee consisting of agency heads having responsibility for programs bearing on the welfare and readjustment of returning veterans. I have received an interim report from its Chairman, Mr. Donald E. Johnson, the Administrator of Veterans Affairs. A copy is attached, inasmuch as the Committee's main recommendation bears directly on the subject matter of this letter.

The Committee on the Vietnam Veteran addressed the issue as follows:

"Educational assistance allowances were last increased October 1, 1967. Since that date the cost of living has risen approximately ten percent. Included in that increase is an even more dramatic rise in one of its components, the cost of education. Since the last increase in educational assistance allowances, colleges have increased their charges by roughly 15 percent. This means that to-

day tuition and fees for an academic year are higher by an average of $94.

"Therefore, your Committee recommends an immediate increase in educational assistance allowance rates commensurate with the rise in education and living costs cited above."

I fully support this recommendation. For this reason and those expressed above, I seek your support in urging the Senate to recognize the inflationary impact that enactment of H.R. 11959 would have. The consequences flowing from its enactment would in the long run more than outweigh any temporary gain that may be realized. As President, I have no option but to view with extreme concern the possible enactment of this measure.

I have sent an identical letter to Senator Yarborough.

Sincerely,

RICHARD NIXON.

Mr. JAVITS. Mr. President, I also ask unanimous consent to have printed in the RECORD the interim report of the President's Committee on the Vietnam Veteran, which accompanied his letter to me.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

[From the Office of the White House Press Secretary, Oct. 21, 1969]

LETTER TO THE PRESIDENT FROM DONALD E. JOHNSON, ADMINISTRATOR, VETERANS ADMINISTRATION

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: Your Committee on the Vietnam Veteran has been actively engaged in finding answers to the readjustment needs of returning veterans. We will give you a final report just as soon as all of our material has been reviewed and our final conclusions have been reached.

In the meantime, by reason of circumstances referred to therein, we deem it appropriate and desirable to transmit to you this interim report.

Respectfully yours,

DONALD E. JOHNSON,
Administrator.

PRESIDENT'S COMMITTEE ON THE VIETNAM VETERAN INTERIM REPORT

Your Committee on the Vietnam Veteran is considering suggestions solicited from the Nation's leadership in government, management, labor, and education, and all of the Veterans organizations to aid us in finding answers to the questions you posed in your message of June 5, 1969, establishing the Committee:

How can we help more veterans to benefit from existing programs?

How can we design programs to help those veterans who need help the most—the undereducated, ill-trained, hitherto unemployed or underemployed?

How can we improve the overall program of veterans benefits so that it meets the specific challenges of our society and the needs of the veterans?

Ultimate conclusions will depend, in part, upon the results of the study of disadvantaged veterans and other studies currently in progress. It is anticipated that analysis of data from these studies will form a basis for sound and meaningful answers to your questions.

Recommendations and suggestions received by the Committee, while differing in their approach to the many aspects of the veterans readjustment problem, are unanimous in one respect—the existing education assistance allowance rates are inadequate. This Committee agrees with that conclusion.

Educational assistance allowances were last increased October 1, 1967. Since that date the cost of living has risen approximately 10%. Included in that increase is an even more dramatic rise in one of its components, the cost of education. Since the last increase in educational assistance allowances, colleges have increased their charges by roughly 15%. This means that today tuition and fees for an academic year are higher by an average of $94.

Therefore, your Committee recommends an immediate increase in educational assistance allowance rates commensurate with the rise in education and living costs cited above.

Beyond this recommendation which requires legislative action, the Committee is agreed that other suggestions which can be administratively accomplished now should not be deferred until the final report.

Accordingly we recommend:

That industry be encouraged to set up computerized job banks to match the skills of returning Vietnam Veterans to available jobs in the private sector. As job banks are installed by State Employment Services in 54 major cities by this year, the Secretary of Labor should take special steps to see that these improved job finding services are made available to each returning Veteran.

That counseling services now being provided by the Veterans Administration in seven locations in Vietnam be extended to additional overseas commands throughout the world. Trained counselor teams should be readied on a standby basis for dispatch to any area needing such services.

That those who have gained valuable skills in the military service, particularly in the paramedical field, should be actively encouraged to make use of their experience when they return to the private sector. To this end the Federal Government should intensify its own recruitment efforts while working with private groups to adopt new certification procedures which will take military training into consideration.

That there should be developed on-the-job training programs in the public service field, particularly paramedical and community services. Federal, state, and local agencies should be encouraged to provide opportunities for the veteran willing to train for a career in health, youth work, social work, and other critically needed service occupations.

That there be instituted, on an experimental basis, computerized job matching of servicemen returning to a particular area. An inventory of veterans' talent would thus be established which can be utilized in both the public and private sector.

The establishment on a pilot basis of a military based training center for servicemen who volunteer to extend their service for the sole purpose of gaining a particular skill or a high school diploma.

That despite reductions in employment in certain sectors of the Federal Government because of turnover and retirements, there should be recognition that there are many job opportunities in entry level positions in the Federal Service. To ensure that Vietnam Era Veterans are aware of these opportunities, agencies of the Federal Government should intensify their recruiting activities at military separation centers, Veterans Assistance Centers and through community action agency programs.

That transition stateside military counseling services should be expanded to overseas commands.

That the Office of Education and Office of Economic Opportunity assist the educational community in developing special programs for educationally disadvantaged veterans.

That the Department of Health, Education, and Welfare and other Federal Departments work closely with education and training institutions to recruit, enroll, and give priority consideration in the allocation of assistance to returning Vietnam Veterans.

Respectfully yours,

Donald E. Johnson, Chairman, Administrator of Veterans Affairs; Melvin R. Laird, Secretary of Defense; Robert H. Finch, Secretary of Health, Education, and Welfare; Robert E. Hampton, Chairman, Civil Service Commission; George P. Shultz, Secretary of Labor; Donald Rumsfeld, Director, Office of Economic Opportunity; Winton M. Blount, Postmaster General, Post Office Department.

Mr. YARBOROUGH subsequently said: Mr. President, the distinguished Senator from New York placed in the RECORD the President's letter to me about this legislation dated October 21, 1969, and delivered to me that same day.

I answered that letter the next day, on October 22, and had the letter delivered to the White House immediately afterward. I received a letter from the President's secretary this morning acknowledging receipt.

I ask unanimous consent that my reply to the President, dated October 22, 1969, be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C.,
October 22, 1969.

HON. RICHARD NIXON,
The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: Your letter of October 21, 1969, concerning H.R. 11959, as amended by the Senate Labor and Public Welfare Committee, has been studied very carefully by me, as befits consideration due a communication from the Chief Executive of the Nation.

I share your concern for protecting the economy from the potentially damaging effects of runaway inflation and I agree that all of us should aid in combating this problem. However, I do not believe that we should begin by depriving our returning veterans of the just readjustment educational training under the G.I. Bill. Neither do I agree that attendance at school at the poverty level payments of the Cold War G.I. Bill would have an inflationary effect.

After World War II, 50% of the 15,600,000 veterans of that conflict, or a total of approximately 7,800,000, received educational readjustment assistance under the G.I. Bill. Under the Korean Conflict G.I. Bill, 42% participated in veterans training programs. From the data in the record before us, only about 1¼ million of the more than six million discharged eligible veterans of the Cold War-Viet Nam period, or about 20.7% have taken training under the Cold War G.I. Bill. A reason often assigned for this shocking failure of the Cold War veterans to take educational readjustment training under the present law has been the low scale of monthly payments, which are inadequate in light of the increasing costs of living and obtaining an education. These low payments make it so difficult for veterans to make ends meet that they are losing their chance in life by being denied the oppportunity that World War II and Korean conflict veterans received for readjustment training.

My bill, S. 338, which I introduced January 16, 1969, and is now incorporated into H.R. 11959 as Title I, provides for a 46% increase in educational and training allowances under the Cold War G.I. Bill. My purpose in introducing this bill and for suggesting such increases is to stimulate and broaden the

participation by Cold War veterans in this important educatioanl program. The original Cold War bill of 1966 was a compromise bill; the allowances were too low—they were lower than the Korean Conflict G.I. Bill, and far lower in purchasing power.

The allowances presently being paid to veterans cover only 67% of the cost of education whereas the allowances paid under the Korean Conflict bill covered approximately 98% of the cost of the veteran's education. If, therefore, allowances rates are to be brought in line with those paid under the Korean Conflict bill, it is necessary that they be increased by at least 46%. Such an increase would hopefully insure that 97.7% of the costs of the veteran's education would be paid, based on present costs.

Your letter raises two objectives to this bill, namely that it would be excessively costly and that it would have an inflationary effect on our economy.

First, the cost of this change in the existing veterans educational benefits is not at all inflationary, particularly when compared with the cost of the war. The War is inflationary; these veterans student allowances are miniscule in comparison.

Second, the increases which I propose are not excessive because, as I pointed out earlier, the veterans benefits now provided for are not even on a level with those provided for in earlier bills. Furthermore, the 10% increase which your Committee recommends in its October 20 interim report is based on these prior inadequate allowances.

The estimate of the additional cost of this Cold War G.I. Bill, given in the second paragraph of your letter, of $323 million dollars for the rest of this fiscal year is only slightly over 1% of the annual cost of the War in Viet Nam. Surely it is worth 1% of the cost of the War to educate these millions of returning veterans who have fought it for all of us.

I think, Mr. President, that the place to begin controlling inflation is by reducing excessive War costs, not by penalizing the men who have borne in their lives and persons the awful burden of that conflict. Several million more of these veterans should be in school or in training. The nation, in the long run, will pay a price too great if they are denied their fair chance in life.

I shall support your goal of combatting inflation, but I cannot in good conscience agree to lay this additional hardship on the backs of the men who have already served our nation with such great courage.

Sincerely yours,

RALPH W. YARBOROUGH.

Mr. GRIFFIN. Mr. President, will the Senator yield?

Mr. JAVITS. I yield.

Mr. GRIFFIN. Mr. President, I should like to commend the Senator from New York on his statement, and associate myself particularly with his expression of concern on behalf of the President as to the impact of this legislation upon the budget and inflationary pressures.

I had the opportunity to go to college under the GI bill of rights following World War II. Accordingly, I am deeply conscious, in a very personal way, of the importance of this legislation and what it means to veterans of the Vietnam war.

Obviously, a 46 percent increase is a very substantial increase over the existing allowance. I call attention to the fact that in 1967, President Johnson sent a message to the Congress in connection with this program, and I should like to read it in part:

The time has also come to increase the educational assistance allowance under the GI bill. A single veteran pursuing a full-time course receives $100 a month to help him finance his education. This amount is less than the $130 a month paid to the child of a deceased or disabled veteran who may be taking the same courses at the same school.

The veteran going to school is usually older and may bear heavier responsibilities. I recommend an increase in the monthly educational assistance allowance under the GI bill from $100 monthly to $130 for a veteran.

In accord with the present scale of benefits, a married veteran with children receives $150 monthly under the GI bill, regardless of the number of children he has. To help veterans with families who wish to continue a full-time educational program, I recommend that the monthly payment be increased by $10 a month for the second child and $10 a month for each additional child.

I am sure President Johnson and the distinguished members of the Committee on Labor and Public Welfare, when they moved in 1967 to increase the allowance from $100 a month for a single veteran to $130 a month they felt then that Congress was doing the right thing on behalf of Vietnam veterans.

It should be noted that since 1967 the cost of living has increased about 10 percent. As I understand it, the average cost of college tuition and books has gone up about 15 percent in that period. Accordingly, the increase of 27 percent provided for in the House-passed bill is very generous.

Despite that fact, of course, the Senate bill would increase the allowances, not by 27 percent, but by 46 percent.

I am glad the distinguished ranking Republican member of the committee, who will serve on the conference committee, is so conscious of the President's position and of the administration's concern. I hope that he and others on the conference committee will give great weight to the reasoning set forth by the President in his letter to Senator YARBOROUGH, read into the record by the Senator from New York.

Again I commend the distinguished Senator from New York for his statement and for his keen awareness of the problems it poses for the administration.

Mr. JAVITS. Mr. President, in response to the Senator, may I point out that one of the things that has not been considered, and which I think the President must consider in due course, is that when we increased the payment to $130 a month, it was inadequate. I think our committee recognized that.

I do not think it is fair to lay at our door the allegation that we are making a sensational increase of 46 percent. I think what we have been doing is laboring under a serious deficiency, and that deficiency has resulted in the significant underutilization of the veterans education program. It must make us ashamed that we are offering a program of which less than one quarter of the veterans are taking advantage.

Hence, there is a very strong case for our attitude, and for the attitude of the other body, in terms of the very material increase we are proposing—and I admit it is very material. I recognize the President's difficult position, and I think he has a right to be correctly appraised. He faces a grave dilemma. We will probably resolve the dilemma at a higher level than he favors. Nevertheless, I think it is fair to say, in the context of the argument, that the administration faces a very serious problem in this regard.

In fairness to the President, I want to point out that he himself took personal cognizance of the situation, and said he was "shocked and surprised" at the low participation rates. He named a Cabinet-level committee to look into the matter. Indeed, with respect to what we are doing in this bill, we have taken into account the problems which caused the creation of that Cabinet level committee.

So, as the saying goes here on the Senate floor, it is a tough situation. We have done the best we could with it. So has the other body. We will do our best to reconcile our differences. There is also the possibility that the President may veto it. Other Presidents have had to veto other bills for veterans, notwithstanding their support for veterans.

I am hopeful that I may be a conferee, although I am not on the subcommittee, and that we will find a way of working out a bill that, although it may not be the optimum for us or for the President, will be adequate.

I deeply believe that the inadequacy of benefits has been contributing to the low rates of participation. I think we are on the right track to solving the problem, at least partially, by increasing benefits. I might also say, with particular compliments to the chairman of the subcommittee, that many of the things we are doing in this bill are much more gifted than the rather naked approach of just more money for education. Other Members have also contributed their thinking to the bill, which has resulted in an interesting and innovative measure.

Finally, may I say that, considering the number of men involved, and the fact that so many men not otherwise motivated have gone through military service and, we have a right to believe, have thereby attained a greater motivation, this bill will hopefully prove to be an instrument that will bring into higher educational levels many men whom we otherwise would not have reached even with added money for higher education or elementary and secondary education. I think that is an important consideration as we review this particular subject.

So, for myself, I favor the bill, and I am standing up for it here. But I think it is only fair to take account of the dilemma of the President, and to lay his view before us so the country can understand that this measure has not just been shoved aside and disrespected, but, on the contrary, has been deeply respected and considered; that we are as troubled as he is, but we feel the situation requires a very material increase of this character.

Mr. CRANSTON. Mr. President, will the Senator yield?

Mr. JAVITS. I yield.

Mr. CRANSTON. I wish to thank the Senator from New York for giving us a fine, fair, and forceful argument on this important measure. It is of particular value because he is the ranking minority member of the full committee which supported this measure. His support for the committee's position and for

the present bill, with the present figures in the bill, is symbolic of the strong bipartisan strength behind the effort to do justice to the Nation's veterans of the Vietnam era.

I think it was very appropriate that the Senator from New York placed in the RECORD the message from the President on this matter. It does reflect a contrary view that the Senate is well aware of and that the Senate has considered, but which I feel the Senate will show by its vote later today that it simply feels it cannot accept, in view of the great need, in the long run, to save money, save lives, and save resources by doing justice to veterans of the Vietnam conflict.

I also feel that the Senate position will be shown to be so strongly in favor of the current bill with the current figures that we will have a mandate in the conference to stand very strongly behind what we do here. It seems to me that to do any less for the Vietnam veterans than we have done for veterans of prior conflicts is an injustice that the country should not and will not work.

Mr. JAVITS. Mr. President, I thank the Senator very much for his intervention.

Just to continue with a word of analysis about the bill itself, the differences between the percentages of eligible veterans taking advantage of their education and training benefits now, and under the GI bills of World War II and the Korean conflict have already been noted. The figures are 50 percent participation for World War II, 42 percent for the Korean conflict, and 21 percent at the present. As I have already pointed out, the President himself said he was "shocked and surprised" at that situation.

In addition, of course, we have these absolutely unbelievable increases in the costs of an education. Anyone who is a father knows this from his own experience. It has been estimated that since the Korean war, the average cost of public and private college education has risen about 75 percent; and, over that same period, veterans' education benefits have risen only 18 percent.

GI benefits during the Korea conflict covered about 98 percent of the average tuition, room, and board costs in the early 1950's; GI benefits now cover only about two-thirds of those costs.

The need to achieve comparability is what the Senator from California meant, I think, when he said there is really no room for us, once we adopt the principle of trying to achieve comparability, to do anything less than what is provided in the Senate bill.

The point has been made repeatedly, of course, that money spent on veterans' education comes back to the Federal Treasury ultimately, indeed several times over, in the form of increased gross national product and tax revenues. I might remind the Senate, too, that this very morning the three members of the Council of Economic Advisers appeared before the Joint Economic Committee, of which I am also ranking minority member, and I asked them about the danger of a recession based on the rather strong restraints in monetary policies which we have undertaken.

All three of them emphasized the fact that the manpower programs must go hand-in-hand with anti-inflationary restraints. It seems to me, therefore, Mr. President, that this area where we have such a remarkably fine pool of manpower deserves a high proirity, even now, in terms of the skills for which we can train these men.

Finally, Mr. President, the bill includes the essential aspects of what I consider to be a rather innovative effort to provide employment and relocation assistance for veterans. These features are based on S. 1088, which I introduced last year and reintroduced again this year. Under this program, the Administrator is directed to assist veterans and eligible dependents in finding suitable employment, first in the veteran's home area and then, if an appropriate position cannot be found nearby, in other areas of the country. The Administrator is also directed to pay the reasonable moving expenses for the veteran and his family if he accepts the job.

I would like to point out that there were a number of recommendations made by the President's Committee on the Vietnam Veteran, which will tie into this new program. The program, I might add, is quite desirable and yet does not cost a great deal—$20 million a year, at the maximum.

Among the recommendations of the President's committee are that industry be encouraged to set up computerized job banks to match the skills of returning Vietnam veterans to available jobs in the private sector; that those who have gained valuable skills, particularly in the paramedical field, the so-called "medics," should be actively encouraged to make use of their experience when they return to the private sector; and that there be instituted, on an experimental basis, computerized job matching of servicemen returning to a particular area.

I should like to say an additional word about the medics. There is a tremendous personnel shortage in the health professions field. There are some 30,000 medics discharged a year. We today attract only a very small proportion of them into the health professions. One of the great opportunities in this bill, of which I strongly urge the administrators to avail themselves, is a real drive to keep as many as possible of those 30,000 in the health professions field. I know of no single source of manpower that could be more effectively employed in that respect than this particular source, and I would hope very much that special attention will be directed toward that point.

Mr. President, I think that about sums up the situation with respect to this bill. I do hope very much, because I realize the dangers which the bill faces, that we will find a way to produce a bill in which both the President and Congress can join. I shall do my utmost, consistent with my obligations and with the principles which are involved, to see if that can be carried through effectively, as we bring the bill to enactment into law.

Mr. GRIFFIN. Mr. President, will the distinguished Senator yield to me once again?

Mr. JAVITS. I yield.

Mr. GRIFFIN. The ranking minority member of the committee has read into the RECORD the President's letter to the chairman of the committee.

The President appointed a Committee on Vietnam Veterans, chaired by the Administrator of Veterans' Affairs, Donald E. Johnson, and including the Secretary of Defense, the Secretary of Health, Education, and Welfare, the Chairman of the Civil Service Commission, the Secretary of Labor, the Director of the Office of Economic Opportunity, and the Postmaster General.

That committee has made an interim report to the President concerning the legislation before us, and I wish to read that report:

PRESIDENT'S COMMITTEE ON THE VIETNAM VETERAN INTERIM REPORT

Your Committee on the Vietnam Veteran is considering suggestions solicited from the Nation's leadership in government, management, labor, and education, and all of the Veterans organizations to aid us in finding answers to the questions you posed in your message of June 5, 1969, establishing the Committee:

How can we help more veterans to benefit from existing programs?

How can we design programs to help those veterans who need help the most—the undereducated, ill-trained, hitherto unemployed or underemployed?

How can we improve the overall program of veterans benefits so that it meets the specific challenges of our society and the needs of the veterans?

Ultimate conclusions will depend, in part, upon the results of the study of disadvantaged veterans and other studies currently in progress. It is anticipated that analysis of data from these studies will form a basis for sound and meaningful answers to your questions.

Recommendations and suggestions received by the Committee, while differing in their approach to the many aspects of the veterans readjustment problem, are unanimous in one respect—the existing education assistance allowance rates are inadequate. This Committee agrees with that conclusion.

Educational assistance allowances were last increased October 1, 1967. Since that date the cost of living has risen approximately 10%. Included in that increase is an even more dramatic rise in one of its components, the cost of education. Since the last increase in educational assistance allowances, colleges have increased their charges by roughly 15%. This means that today tuition and fees for an academic year are higher by an average of $94.

Therefore, your Committee recommends an immediate increase in educational assistance allowance rates commensurate with the rise in education and living costs cited above.

Beyond this recommendation which requires legislative action, the Committee is agreed that other suggestions which can be administratively accomplished now should not be deferred until the final report.

Accordingly we recommend:

That industry be encouraged to set up computerized job banks to match the skills of returning Vietnam Veterans to available jobs in the private sector. As job banks are installed by State Employment Services in 54 major cities by this year, the Secretary of Labor should take special steps to see that these improved job finding services are made available to each returning Veteran.

That counseling services now being provided by the Veterans Administration in seven locations in Vietnam be extended to additional overseas commands throughout the world. Trained counselor teams should be readied on a standby basis for dispatch to any area needing such services.

That those who have gained valuable skills in the military service, particularly in the paramedical field, should be actively encouraged to make use of their experience when they return to the private sector. To this end the Federal Government should intensify its own recruitment efforts while working with private groups to adopt new certification procedures which will take military training into consideration.

That there should be developed on-the-job training programs in the public service field, particularly paramedical and community services. Federal, state, and local agencies should be encouraged to provide opportunities for the veteran willing to train for a career in health, youth work, social work, and other critically needed service occupations.

That there be instituted, on an experimental basis, computerized job matching of servicemen returning to a particular area. An inventory of veterans' talent would thus be established which can be utilized in both the public and private sector.

The establishment on a pilot basis of a military based training center for servicemen who volunteer to extend their service for the sole purpose of gaining a particular skill or a high school diploma.

That despite reductions in employment in certain sectors of the Federal Government because of turnover and retirements, there should be recognition that there are many job opportunities in entry level positions in the Federal Service. To ensure that Vietnam Era Veterans are aware of these opportunities, agencies of the Federal Government should intensify their recruiting activities at military separation centers, Veterans Assistance Centers and through community action agency programs.

That transition stateside military counseling services should be expanded to overseas commands.

That the Office of Education and Office of Economic Opportunity assist the educational community in developing special programs for educationally disadvantaged veterans.

That the Department of Health, Education, and Welfare and other Federal Departments work closely with education and training institutions to recruit, enroll, and give priority consideration in the allocation of assistance to returning Vietnam Veterans.

Respectfully yours,

Donald E. Johnson, Chairman, Administrator of Veterans Affairs; Melvin R. Laird, Secretary of Defense; Robert H. Finch, Secretary of Health, Education, and Welfare; Robert E. Hampton, Chairman, Civil Service Commission; George P. Shultz, Secretary of Labor; Donald Rumsfeld, Director, Office of Economic Opportunity; Winton M. Blount, Postmaster General, Post Office Department.

Mr. YARBOROUGH. Mr. President, on this matter of the President's Commission to which the distinguished Senator from Michigan referred, I point out that that Commission kept begging the committee to do nothing until it finished its report. At the same time, the Commission was begging us to wait until it could finish its report, some agency—and it seems to me that it was the VA—apparently fed the Army Times a story attacking me and my committee. They said that I was stalling the passage of this bill. They said that the Senator from California (Mr. CRANSTON) was stalling the passage of the bill.

They made this attack on October 1, 1969.

The bill was moving as fast as it could move. They were feeding this attack to the paper and at the same time they were testifying that we should take no action until the President's Commission finished its report. They had promised that it would be ready by the first of October. However, they had not completed it. They did not have it by the 15th of October. They gave us the interim report which suggested a mere 10- to 15-percent increase in education and training allowances; it did not deal with the rest of the bill. They did that on the 20th of October.

The pending bill has been ordered reported to the Senate. We have already read into the RECORD, the record of the diligent hearings held by the able Senator from California and the prompt action taken by the Veterans' Affairs Subcommittee and the full committee.

Mr. President, to show the action of the VA, which I think is largely responsible—probably under prodding by the Bureau of the Budget—for keeping the veterans out of school, I ask unanimous consent to have printed at this point in the RECORD an editorial entitled "GI Bill Delay," published in the Army Times on October 1, 1969. It is a personal attack on the Senator from California (Mr. (CRANSTON) and me. I do this to show the falsity of this editorial.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

GI BILL DELAY

Sen. Ralph Yarborough (D., Tex.) chairman of the Senate Labor and Public Welfare Committee which has jurisdiction over GI Bill legislation, seems to be placing the blame at the wrong door for delay in advancing that program.

And while he's doing so, the more than 635,000 GI Bill beneficiaries who had planned on a raise in educational allowances this fall aren't likely to get one now until next semester—thanks to foot-dragging by the Senate committee.

The fault can be found closer to the old homestead.

Some of the blame for delay in raising GI Bill allowances rests with Sen. Alan Cranston (D., Calif.), chairman of the Labor Committee's subcommittee on veterans affairs.

His group began hearings on the legislation on June 24. Here we are, going into October and the subcommittee still hasn't come up with a rate increase proposal to present to the full committee.

The best guess is that if and when the smaller body does act its recommendations won't receive full committee consideration until some time after mid-October.

In addition to its own recommendations, the subcommittee has before it legislation already approved by the House which would raise GI Bill allowances by 27 percent. Under the House-approved legislation, allowances for single veterans would go from $130 to $165 monthly; for married veterans from $155 to $197 monthly, and for men with two dependents from $175 to $222.

Now it's up to the Senate Labor Committee and to Senators Cranston and Yarborough to get something started—and real soon—on their side of the national legislature.

Senator Yarborough also ought to put aside some of his politically-motivated and unsoundly-based charges against the Veterans Administration and the Department of Defense. In numerous speeches recently, he has accused these two government agencies of "deliberately" holding down GI Bill enrollment, charging that they want to "spend money on a war in Southeast Asia worse than they want to educate our young people."

We feel that GI Bill enrollments aren't as woefully low as Senator Yarborough would like people to believe. The VA expects a 22 percent gain in GI Bill enrollment this fall over last year, a record for the three-year-old program. This would bring enrollment up to 635,000 compared to 520,524 last fall and 380,037 in 1967.

It is true that enrollment figures among the disadvantaged veteran aren't what they should be. Only one out of 10 veterans without high school diplomas have taken advantage of GI Bill educational opportunities. The VA through its "outreach" program is making a bigger effort to get more of these veterans into school.

But unless Congress approves an increase in allowances, and soon, all of these efforts will be to small avail. Now is the time for action on a GI Bill rate increase.

Mr. YARBOROUGH. Mr. President, I ask unanimous consent that my letter to the editor of Army Times, dated October 22, 1969, be printed in full in the RECORD. It is an answer to the editorial in the Army Times of October 1, which attacks my committee for alleged, but wrongly alleged, inaction.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

OCTOBER 22, 1969.

Mr. TONY MARCH,
Editor, Army Times,
Washington, D.C.

DEAR EDITOR: On October 1, 1969, you published an editorial which accuses me and my committee of delaying the passage of legislation to raise G.I. educational and training allowances. Nothing could be farther from the truth.

On January 16, 1969, I introduced a bill, S. 338, which would increase the educational and training allowances provided by the Cold War G.I. Bill by 46 percent. Because of the rise in the cost of education and the cost of living, it is necessary that these allowances be increased by 46 percent to make them comparable to the allowances provided by the Korean Conflict G.I. Bill. Furthermore, my bill would also increase the allowances for apprentice and on-the-job training, vocational rehabilitation and farm training. I believe that a 46 percent increase is imperative if veterans are to be encouraged to use their hard earned and well deserved G.I. educational benefits. My bill is also retroactive to September 1. Thus, all veterans presently enrolled in educational and training programs would receive the full benefit of these increases for this semester as well as next semester.

The Subcomittee on Veterans Affairs held public hearings on my bill, as well as many other important veterans bills, from June 24 to August 12. During these hearings, three days, June 24, 25 and 26, were devoted to my bill, S. 338, and eleven witnesses, including every major veterans organization in the United States, expressly endorsed my bill. The only opposition to my bill came from the Nixon Administration which insisted that the Subcommittee take no action on my bill or any other veterans measure until the Veterans Administration could complete a study of veterans programs. The Veterans Administration first stated that this study would be completed on October 1. Later, this date was changed to October 15. As of this date, the long waited and often promised study by the Nixon Administration has still not been completed. Shortly, after the completion of these hearings, both Houses of Congress went into recess from August 13 until

September 3, which precluded any further action on these bills at that time.

The transcript of these two months of hearings was published on October 9. The transcript is in three volumes and contains more than 630 pages of testimony. The importance of the transcript of hearings on a bill cannot be overemphasized. It is one of the prime sources from which the legislative history and intent behind a bill can be determined. A bill cannot be presented to the Senate unless the transcript has been published.

Despite the objections of the Veterans Administration, the Subcommittee on Veterans Affairs, under the chairmanship of Senator Alan Cranston, took action and unanimously reported out favorably my bill, together with seven other major veterans bills. On October 9, the day that the transcript of the hearings was published, the Labor and Public Welfare Committee, under my chairmanship, reported S. 338 and these other important veterans bills to the Senate without one dissenting vote. On October 21, 1969, the Committee's report was filed with the Senate and I expect final passage of all these bills soon.

The House bill was not passed until August 4, and referred to the Senate on August 5. This House bill provided for only 27 percent increase in educational allowances for veterans in college programs. It did not provide anything for the many veterans enrolled in vocational and farm training programs. In my opinion, the House bill provides too little and is too limited in its coverage.

I am proud of the hard work of the members of my Committee and especially the great efforts of Senator Cranston and the members of the Veterans Affairs Subcommittee. These Senators, both Democrats and Republicans, put aside partisan considerations and moved with diligence to produce a group of bills that would be meaningful to all veterans.

In my twelve and one-half years in the Senate, I have worked hard for meaningful veterans legislation. Therefore, I wish to assure your many readers that no one is more anxious for the passage of S. 338 and the other veterans bills reported by my Committee than I.

Sincerely,

RALPH W. YARBOROUGH.

Mr. YARBOROUGH. Mr. President, I also ask unanimous consent that Senator MONDALE'S answer, of October 16, 1969, to the Army Times' attack on the Senate committee's "inaction," be printed in the RECORD.

I also ask unanimous consent that Senator CRANSTON'S letter to the Army Times concerning the October 1 editorial be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

GI BILL ACTION IN SENATE

Mr. MONDALE. Mr. President, on October 8, the gentleman from Pennsylvania, Congressman SAYLOR, placed in the RECORD an editorial from the Army Times charging the Senate Labor and Public Welfare Committee, and specifically its Subcommittee on Veterans' Affairs, with "foot-dragging" on the proposed GI bill rate increases.

I feel that such a charge is very unfair in light of the most commendable and diligent record of the Veterans' Affairs Subcommittee under the chairmanship of the Senator from California, Senator ALAN CRANSTON. As a member of that subcommittee, I speak from firsthand experience in pointing out the great amount of veterans legislation considered and favorably acted upon during this session by the subcommittee and the full Labor and Public Welfare Committee, on the basis of 6 days of hearings.

At the full committee level, the Senator from Texas, Senator RALPH W. YARBOROUGH, chairman of the Labor and Public Welfare Committee, a member of the Veterans' Affairs Subcommittee, and its former chairman of 7 years, has most expeditiously moved this legislation to the floor with the vigorous leadership he has always displayed on veterans education and training measures.

I think that the unfortunate Army Times editorial is fully rebutted by an October 15, 1969, article in the Army Times entitled, "Senate Unit Ups GI Bill" and a letter to the editor from Senator CRANSTON published in the October 22 edition of the Army Times entitled, "Cranston Group Drags No Feet."

[From the Army Times, Oct. 22, 1969]

CRANSTON GROUP DRAGS NO FEET

DEAR EDITOR: In your Oct. 1 edition, you published an editorial stating that the Senate Labor and Public Welfare Committee, and its Veterans Affairs Subcommittee, of which I am chairman, had been guilty of "foot-dragging" on important veterans education and training legislation.

I think the record of the subcommittee and the full committee amply rebuts that charge.

The subcommittee has conducted six days of hearings in eight months, equal to the combined number of hearing days by the subcommittee during both sessions of the last Congress. These hearings have been published in three volumes containing more than 630 printed pages of testimony from 54 witnesses, again substantially more than the last two sessions combined.

On the day your editorial appeared, the subcommittee had already been scheduled to meet the next day, Oct. 2, on these bills in executive session, which it did.

On Oct. 9, based on the subcommittee's unanimous recommendation, the Labor and Public Welfare Committee unanimously ordered reported to the Senate eight veterans bills—two consolidated education and training bills and six hospital and medical care bills.

The Senate action represents the most comprehensive approach to the G.I. bill since it was originally enacted. First, it calls for a far larger and more realistic increase in G.I. bill education rates—46 percent—than the House bill—27 percent. Moreover, it proposes a new comprehensive education and training program, with an estimated first-year cost of almost 150 million dollars.

This comprehensive package of provisions from eight other bills would seek to encourage and assist veterans to make the maximum use of their G.I. bill benefits under the following circumstances.

For those still in service, the bill would authorize direct payment to schools to encourage their participation in a predischarge education program (PREP) conducted on or near military bases for servicemen shortly before discharge.

The bill would extend G.I. bill allowances to veterans in elementary as well as high school level courses.

It would also extend allowances to veterans in college preparatory courses on college and junior college campuses including courses for correcting academic deficiencies before entering college.

It would supplement educational coverage under the regular G.I. bill, regardless of the educational level, through direct payment to schools providing veterans with remedial tutorial, counselling or other special supplementary assistance to improve educational performance.

The bill would authorize grants to schools to establish special educational programs for veterans, including public service-oriented programs such as for the training of policemen, firemen, medical technicians, and inner-city teachers.

It would permit reduction of minimum college semester-hour requirements for full-time and part-time G.I. bill eligibility.

It would offer veterans the option of counting non-credit hour courses toward their eligibility for full-time allowances.

The bill would greatly expand and provide new orientation for the outreach services program to search out Vietnam veterans and counsel them regarding their benefits and assist them in obtaining them. Included would be payment of reasonable interview and relocation expenses when a veteran so assisted must move to enter a job or training program.

The bill contains some house-passed provisions as follows: (a) to eliminate most of the bars to so-called duplication of education and training benefits; (b) to liberalize measurement of high school courses; (c) to tighten up the prerequisites for pursuing G.I bill flight training; (d) to permit more rapid payment of the initial G.I. bill allowance to veterans in non-college courses; (e) to make more flexible the measures of widows' and war orphans' eligibility for G.I. bill benefits; (f) and to permit V.A. approval of interstate transportation apprenticeship programs.

I hope this serves to set the record straight and I trust you will publish this letter.

Senator ALAN CRANSTON,
Chairman, Subcommittee on Veterans Affairs.

Mr. YARBOROUGH. Mr. President, I ask unanimous consent that the article from the Army Times of October 15, 1969, by Larry Carney, under the title "Senate Unit Ups GI Bill," be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Army Times, Oct. 15, 1969]

SENATE UNIT UPS GI BILL

(By Larry Carney)

WASHINGTON.—A Senate subcommittee has approved legislation to raise GI Bill education and training allowances by 46 percent and make the increased payments retroactive to September.

The measure—approved by the veterans affairs subcommittee of the Senate Labor and Public Welfare Committee—is much more liberal than a similar proposal passed by the House early this summer. The House measure would raise GI Bill allowances an average of only 27 percent. Effective upon enactment.

Full committee action is expected some time around mid-October. Cost for the entire package is estimated at more than $500 million the first year.

Subcommittee chairman Sen. Alan Cranston (D., Calif.) said the GI Bill hike increase measure was among 19 veterans education and medical bills approved by his group last week.

Three of the bills are designed to encourage more veterans without high school diplomas to get their diplomas under the GI Bill.

To accomplish this, the subcommittee proposes establishment of a new pre-discharge education program for active duty personnel in their last 12 months of service. The subcommittee hopes to tie the program in with Defense Department's Project Transition which trains servicemen approaching separation for civilian skills.

Under the subcommittee bill, the government would pay up to $150 monthly directly to the school towards education and training costs of servicemen enrolled in duty-hour or off-duty study.

Aid would be limited to servicemen with at least 12 months' service. Those who take advantage of benefits would not have it counted against GI Bill entitlement.

The education program would be in addition to GI Bill benefits already available to servicemen with two or more years' active duty but the legislation would preclude servicemen from taking advantage of both programs at the same time.

Full Senate Labor Committee chairman Sen. Ralph Yarborough (D., Tex.) promises speedy action on the veterans package, hoping to get it to the Senate floor "by the end of October or early November."

The subcommittee bill would raise monthly GI Bill allowances from $130 to $190 for single veterans; from $155 to $218 for married veterans, and from $175 to $240 monthly for veterans with two dependents. Veterans with more than two dependents would get $15 additional in allowances per child. They now receive $10 additional per child.

Under the House-passed bill, monthly allowances for single veterans would go to $165 monthly; to $197 monthly for veterans with one dependent; and to $222 monthly for veterans with two dependents. It would provide $13 additional monthly per child to veterans with more than two dependents.

Other bills approved by the subcommittee would:

Pay special grants to colleges and universities which establish special training projects and tutorial services for disadvantaged veterans.

Provide a 46 percent increase in allowances for orphans and widows taking training under the VA-administered dependents assistance program. Allowances for service-connected disabled veterans taking instruction under the veterans vocational rehabilitation program would be raised to similar levels. Vocational rehabilitation training is generally limited to veterans with disabilities rated 30 percent or more.

Broaden on-the-farm instruction for veterans under the GI Bill.

Permit veterans to borrow up to $1000 for flight training lessons.

Give unlimited community nursing home care to veterans hospitalized because of a service-connected disability.

Provide hospital and outpatient care to veterans totally and permanently disabled for their non-service-connected ailments.

Entitle veterans drawing non-service-connected disability pensions admittance to VA hospitals without having to take a pauper's oath of inability to pay. A comparable House bill would drop the pauper's oath requirement only for veterans 72 years of age or older. The Senate bill would drop the age limitation and bring an additional 67,000 veterans under its provisions.

Pay for drugs and medical care for permanently housebound veterans, regardless of whether their disability is service-connected.

Increase per diem rates the VA pays state nursing homes for hospital care from the present $3.50 to $7.

Mr. YARBOROUGH. Mr. President, furthermore, a public relations agency in Texas, with the cooperation of a House colleague of the opposite party, made an attack on me and put this editorial in the RECORD on the 8th of October.

That shows the double game that is being played here. This article was put in the RECORD by Representative SAYLOR.

I point out that had Representative SAYLOR been a member of the Committee on Labor and Public Welfare and known how diligently we worked under the able chairmanship of the distinguished Senator from California on this bill, he would not have put this erroneous editorial in the RECORD.

Mr. President, this clearly shows the double nature of their operation.

I called the Bureau of the Budget and asked, "Why are you trying to keep these veterans from getting an education?"

They said, "The Defense Department does not want it."

I said, "I feel it is the duty of the Defense Department to give these men an education."

They fought this measure on a number of occasions. They told the county service officers that the GI bill applied only to those men who served in Vietnam.

I think the monetary trouble with the bill is the fault of the VA. When I asked them about it, they said the allowances were too low and that is why the men were not going to school.

They fought to keep the allowances low.

This has been going on for the 11 years since I first introduced a GI bill in 1958.

The Defense Department and the Bureau of the Budget came over and testified against all of the bills. There would have been no veterans education bill if we had listened to the Defense Department, the Bureau of the Budget, and the Veterans' Administration. They fought all of the bills.

That is why we have provided for only a 46-percent increase. We got too little money each time. We got what we could in the conferences.

I hope that when the conferees are appointed, there will be no surrender to the House. We have gone long enough in keeping 4.75 million veterans out of school.

The funds will be denied again. We must not reduce this modest increase in the allowances that will bring the veterans back in line with the payments made to the Korean GI's. It does no more. It gives them no bonus.

I hope that when the bill is passed and goes to conference with the House, the Senate will stand firm.

We accepted limited bills in the past because the House was going along with the VA and the Budget Bureau and the Defense Department. The Defense Department would call the terms, and the VA and the Bureau of the Budget went along with them.

Mr. President, I ask unanimous consent that there be printed in the RECORD a letter to the editor of the News, Weslaco, Tex., under date of October 9, 1969.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

UNIVERSITY OF TEXAS VIETNAM VETS,
Austin, Tex., October 10, 1969.

EDITOR, NEWS,
Weslaco, Tex.

DEAR SIR: I am a Vietnam veteran trying to make ends meet under the GI Bill. Allowances under the current law are woefully inadequate as both the cost of living and education have skyrocketed since the rates were set several years ago.

Senator Ralph Yarborough, who claims to be the veterans friend, has been sitting on a House passed bill since August 5th to raise the rates by about 27%. He has publicly complained about the lack of participation of Vietnam veterans in the GI education program—and yet when he has a chance to do something about the biggest stumbling block standing in the way of greater participation, he does nothing.

Why doesn't Senator Yarborough get his Committee together and act? He has already killed chances for our getting a raise during the first semester and hasn't shown much interest in getting help for us during the next.

I'm enclosing a recent editorial from Army Times which explains the problem in detail. I hope all Texas GI's will write Senator Yarborough and tell him to get with it! His inaction is disgusting.

Sincerely,

———— ————.

Mr. YARBOROUGH. Mr. President, this is an effort by a public relations firm in Texas, acting in coordination with others, to attack me. They had this mailed to every one of the more than 600 newspapers in Texas.

They got several hundred of these letters signed by veterans to make an attack on the committee for not moving ahead with the measure.

We asked them why they signed the letter. They said that they went to a Naval Reserve meeting and someone told them to sign the letters and turn them in.

The letters were then mailed all over Texas. I point out the devious game that is being played with respect to this matter.

Such a letter has been printed in the Austin Statesman and in many of the other newspapers all over the State of Texas.

While they have been telling us to wait until the President's Commission completes its report, they have also been making these attacks in the newspapers in my State. They have been claiming that RALPH YARBOROUGH, the chairman of the Labor and Public Welfare Committee, and the Senator from California (Mr. CRANSTON) should get started with their work on this bill. They charged us with deliberately delaying this matter.

This material was placed in the RECORD by Representative SAYLOR and distributed to every newspaper in my State. I have had this material printed in the RECORD as proof of the falsity of the accusations.

The PRESIDING OFFICER. The Senator from Delaware is recognized.

Mr. WILLIAMS of Delaware. Mr. President, the pending bill, as is the case with many other worthy projects, concerns the question of how much we can afford to do.

The letter from the President which was printed in the RECORD earlier by the senior Senator from New York points out that the bill passed by the House provides for an increase in benefits of 23 percent and that the bill now pending in the Senate would provide for an average increase of 46 percent. This represents an increase in expenditures of nearly $400 million above budget estimates.

If we consider the merits of this one bill alone we could argue better for these increased expenditures; however, we must consider this bill and all other bills on the manner they affect the overall budget. We are already operating this Government at a deficit of around a half billion dollars per month. The cost of living is at an alltime high, and in-

flation is a real threat. Taxes are as high as the American people can afford to pay, and those who are proposing these ever-expanding expenditures should begin explaining to their constituents just how they plan to pay for them.

Mr. President, I ask unanimous consent to have printed in the RECORD a tabulation of the bills that have been acted on by either one House or the other up to this point. The tabulation includes the pending bill. The tabulation shows how the amounts have been increased substantially over the budget estimates.

There being no objection, the tabulation was ordered to be printed in the RECORD, as follows:

PENDING POTENTIAL CONGRESSIONAL INCREASES TO 1970 BUDGET OUTLAYS

[Amounts in millions]

Description	Increase over request	
	Authority	Outlays
Appropriation bills:		
Agriculture and related agencies, as passed by Senate (July 7, 1969), excluding administration's amended increase of $270 for food stamps	$405	$313
House bill (May 27, 1969)	(−161)	(+173)
Labor-HEW, as passed by House (July 31, 1969)—Increase mainly for education	1,078	+539
Public works and AEC, as passed by House (Oct. 8, 1969)—Increase mainly water pollution grants	301	16
Other legislation:		
H.R. 13000—raises Federal civilian and military pay effective Oct. 1, 1969, for post office and Jan. 1, 1970 for remainder; full year cost in 1971 about $4,300,000,000. Passed by House Oct. 14, 1969; 1970 cost will be	1,550	1,550
Social security benefits—Proposal to make effective January 1970 instead of March 1970 as recommended	(1)	465
Proposal to raise benefits by 15 percent (instead of 10 percent as recommended) and make effective January 1970; in addition to amount immediately above	(1)	580
H.R. 11959—GI bill for veterans education assistance, as passed by House Aug. 4, 1969	400	400
S. 2547—Food stamp amendments, as passed by Senate Sept. 24, 1969	640	600
Other legislation—Continued		
H.R. 11651—School lunch amendments for child nutrition, as passed by House July 21, 1969	(1)	$100
H.R. 13194 and S. 2721—Increases authorization for national defense education loans, work-study grants, and educational opportunity grants. Passed by Senate Sept. 16, 1969; passed by House Sept. 15, 1969; in conference	$333	239
H.R. 514 and S. 2218—Expands impacted area education aid for public housing children. Passed by House Apr. 23, 1969; Senate has held hearings	230	115
Potential nonenactment of recommendations to reduce spending:		
Postal rate increase (H.R. 10877)—Original proposal for July 1 effective date would save $591; it is still possible to make a Jan. 1 effective date and save about	300	300
Farmers Home Administration—Proposal to permit certain operating loans and to provide that certain insured loans to public bodies could be sold as taxable instruments; this could save	(1)	292
Veterans' Administration (H.R. 11703)—Proposal to permit sale of direct loans at more than a 2-percentage point discount could cut outlays by	(1)	128
Total, all items above	5,237	5,637

[1] Means not applicable. The specific budget authority for fiscal 1970 is not necessarily related to the specific 1970 outlay effect.

Note: The above listing covers only major increases that are still pending in the Congress. The estimates were prepared by Bureau of the Budget examiners, sometimes in consultation with agency staffers, and are not precisely the same as those carried in the "1970 Budget scorekeeping report" of the Joint Committee on Reduction of Federal Expenditures.

Mr. WILLIAMS of Delaware. If these bills are approved in the form in which they are being reported by the committee, it would require $5,637 million of extra expenditures in the fiscal year 1970.

I repeat, we are already operating the Government at a deficit of between $5 and $6 billion a year. If this Congress returns to the position of operating the Government at a level beyond our income by $1 billion a month we shall never get inflation under control. We have to start somewhere, and the place to start is right here.

I think that what we should do is to stand by the House proposal, which provides for a 23-percent increase.

Mr. President, I send to the desk an amendment which would substitute the House bill for title I. It does not deal with the other titles of the bill, but it would restore the House provisions of title I which would increase these benefits, even then, to about 26 percent over the amount in the present law. I think we would have a much better chance of getting this bill in its final form approved by the President if we approved this amendment. After all, a bill passed by the Senate which ultimately may not become law is not really as much to the veterans as a bill with lesser benefits which could become the law. Certainly, a 26-percent increase is not too unreasonable.

I ask that the clerk state the amendment.

The PRESIDING OFFICER (Mr. SPONG in the chair). The amendment will be stated.

The bill clerk proceeded to read the amendment.

Mr. WILLIAMS of Delaware. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and without objection, the amendment will be printed in the RECORD.

The amendment was on page 6, strike out line 22 and all that follows through and including line 9 on page 14, and insert in lieu thereof the following:

That section 1504(b) of chapter 31 of title 38, United States Code, is amended to read as follows:

"(b) The subsistence allowance of a veteran-trainee is to be determined in accordance with the following table, and shall be the monthly amount shown in column II, III, or IV (whichever is applicable as determined by the veteran's dependency status) opposite the appropriate type of training as specified in column I:

"Column I	Column II	Column III	Column IV
Type of training	No dependents	One dependent	Two or more dependents
Institutional:			
Full-time	$127	$173	$201
Three-quarters time	92	127	150
Half time	63	86	98
Institutional on-farm, apprentice or other on-job training: Full time	109	144	173

Where any full-time trainee has more than two dependents and is not eligible to receive additional compensation as provided by section 315 or section 355 (whichever is applicable) of this title, the subsistence allowance prescribed in column IV of the foregoing table shall be increased by an additional $6 per month for each dependent in excess of two."

SEC. 2. Chapter 34 of title 38, United States Code, is amended as follows:

(a) by deleting in the last sentence of section 1677(b) "$130" and inserting in lieu thereof "165";

(b) the table contained in paragraph (1) of section 1682(a) is amended to read as follows:

"Column I	Column II	Column III	Column IV	Column V
Type of program	No dependents	One dependent	Two dependents	More than two dependents
				The amount in column IV, plus the following for each dependent in excess of two:
Institutional:				
Full time	$165	$197	$222	$13
Three-quarter time	121	147	170	9
Half time	78	96	109	7
Cooperative	133	159	184	9.";

(c) by deleting in section 1682(b) "$130" and inserting in lieu thereof "$165";

(d) by deleting in section 1682(c)(2) "$130" and inserting in lieu thereof "$165";

(e) the table contained in section 1682(d)(2) is amended to read as follows:

"Column I	Column II	Column III	Column IV	Column V
Basis	No dependents	One dependent	Two dependents	More than two dependents
				The amount in Column IV, plus the following for each dependent in excess of two:
Full time	$133	$159	$184	$9
Three-quarter time	96	116	134	6
Half-time	64	77	90	4.";

and

(f) the table contained in section 1683(b) is amended to read as follows:

"Periods of training	No dependents	One dependent	Two or more dependents
First 6 months	$102	$114	$127
Second 6 months	76	89	102
Third 6 months	51	64	76
Fourth and any succeeding 6 month periods	25	38	51."

SEC. 3. Section 1684(a) of title 38, United States Code, is amended as follows:

(a) by deleting in paragraph (2) immediately after the semicolon the word "and";

(b) by deleting the period at the end of paragraph (3) and inserting in lieu thereof "; and"; and

(c) by adding at the end thereof the following new paragraph:

"(4) an academic high school course requiring sixteen units for a full course shall be considered a full-time course when a minimum of four units per year is required. For the purpose of this paragraph, a unit is defined to be not less than one hundred and twenty sixty-minute hours or their equivalent of study in any subject in one year."

SEC. 4. Chapter 35 of title 38, United States Code is amended as follows:

(a) by amending section 1732(a) to read as follows:

"(a) The educational assistance allowance on behalf of an eligible person who is pursuing a program of education consisting of institutional courses shall be computed at the rate of (1) $165 per month if pursued on a full-time basis, (2) $121 per month if pursued on a three-quarters time basis, and (3) $76 per month if pursued on a half-time basis."

(b) by deleting in section 1732(b) "$105" and inserting in lieu thereof "$133"; and

(c) by amending section 1742(a) to read as follows:

"(a) While the eligible person is enrolled in and pursuing a full-time course of special restorative training, the parent or guardian shall be entitled to receive on his behalf a special training allowance computed at the basic rate of $165 per month. If the charges for tuition and fees applicable to any such course are more than $50 per calendar month the basic monthly allowance may be increased by the amount that such charges exceed $50 a month, upon election by the parent or guardian of the eligible person to have such person's period of entitlement reduced by one day for each $5.30 that the special training allowance paid exceeds the basic monthly allowance."

SEC. 5. The amendments made by this Act shall take effect on the first day of September, 1969.

Mr. WILLIAMS of Delaware. Mr. President, I state for the information of the Senate and as I have pointed out to the Senator from California, that the amendment does embrace the House language of the bill in title I and that that is all it does change.

Mr. CRANSTON. Mr. President, I oppose the amendment. These figures were considered in the committee. They were rejected unanimously by all members of the committee, of both parties, on the ground that the increases of 2 years ago were totally inadequate, and did not bring payments at that time to the level that veterans of prior wars had received. The payments are even more inequitable now, as inflation has devoured the dollars and increased the cost of education.

The only just and proper thing to do is to hold to the Senate language, which will insure that veterans of the Vietnam conflict are given the same educational opportunities, the same assistance in adjusting to civilian life, that veterans of other wars have received; no less the abominable and deploring figures showing how few veterans are able to take advantage of GI educational benefits now, because allowance rates are so wholly inadequate, indicate what we must do. We must hold to the Senate language.

Mr. WILLIAMS of Delaware. Mr. President, the House bill does recognize that as a result of inflation some increase is necessary, and it does increase the benefits by approximately 26 percent. What I object to is the Senate's effort to increase further these benefits by 46 percent. This is nearly $400 million over budget estimates.

My only point is that if these increases continue along this line we will have a staggering deficit. Earlier I placed in the RECORD a tabulation showing some of these proposed increases in other pending bills. Do we want to launch again on a road of heavy deficit spending? If so we shall in effect not be giving these veterans any increase, because inflation will soon take it away from them.

We saw the statistics this morning which indicate that the cost of living last month rose .5 percent, and that is an average of 6 percent a year.

The reason why the present benefits are inadequate is that the erosion of inflation has destroyed the purchasing power of the dollar. I realize, and I agree with the Senator from California, that a good argument can be made for almost any increase on a program for our veterans. A good argument can be made for any one of these bills taken alone. But in my opinion we must consider these increases as a cumulative total. Congress has asked the President of the United States to hold expenditures for this fiscal year to $192.9 billion, and the President has sent a letter to Congress in which he promised that he will do just that. If this bill increasing expenditures between $375 and $400 million beyond that which is provided for in that budget is passed the President will have no choice but to expend the money, and that will automatically raise the expenditure ceiling. The President cannot hold that ceiling if Congress itself is going to continue these increases.

I ask unanimous consent that the letter which the President sent to Congress a couple of months ago, in which he promised to hold this ceiling, be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE WHITE HOUSE,
Washington, July 16, 1969.

Hon. JOHN J. WILLIAMS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR WILLIAMS: I am aware of the concern over extension of the surtax and repeal of the investment credit unless expenditure controls are made clearly effective. Possibly some of this concern arises from the flexibility of the expenditure control provision of H.R. 11400 just passed by the Congress.

In this legislation the limit on expenditures for fiscal year 1970 would appear to be $191.9 billion—one billion below the $192.9 billion projected in my revised budget. However, the actual language (1) authorizes me to exceed this ceiling by two billion dollars for increases in specified items of uncontrollable spending, thereby raising the ceiling potentially to $193.9 billion; and (2) enables Congress to raise expenditures by any amount for any program, thereby permitting automatic Congressional increases in the ceiling.

There is an obvious advantage in having a precise ceiling—one which clearly specifies the maximum allowable expenditures. I therefore assure you and your colleagues that I accept in good faith the $191.9 billion ceiling as passed by Congress. More than this, barring a plainly critical and presently unforeseeable emergency, I will hold total expenditures for fiscal 1970 within the $192.9 billion indicated in my April budget proposals.

I will regard this $192.9 billion maximum as a ceiling on fiscal 1970 expenditures, on this premise—that when an increase is approved by Congress or develops in one program it will be offset by a corresponding decrease in another program, thereby keeping the total budget within the $192.9 billion maximum.

For the Executive Branch this means that if uncontrollable spending, such as interest on the public debt and social security benefits, should exceed the April estimates, or if other spending essential to the national welfare is approved, the additional spending will have to be offset by reductions elsewhere. Further it means that, if the Congress should vote expenditures above those provided for in the breakdown of the $192.9 billion total, it will also need to impose compensating reductions in other programs. Failure to establish such priorities in allocating funds within the $192.9 billion total will compel the Executive Branch either to impose offsetting reductions itself in programs approved by Congress or to refrain from spending the increase.

I believe this firm expenditure control, prompt extension of the surtax and the excises, and repeal of the investment tax credit will give us the tools our country needs to brake and stop inflation. It is my understanding that the Ways and Means Committee and the Finance Committee will follow this action with prompt consideration of a major tax revision package which will include many of the reform proposals I recommended to Congress last April.

Working together, I am confident that the Congress and the Administration can establish sound priorities and keep within a $192.9 billion expenditure total for 1970. I assure you that I intend to see that this is done.

Sincerely,

RICHARD NIXON.

Mr. COTTON. Mr. President, will the Senator yield for a question?

Mr. WILLIAMS of Delaware. I yield.

Mr. COTTON. Is the application of the provisions the Senator is discussing in this bill limited only to veterans of Vietnam? Does it extend to other veterans?

Mr. WILLIAMS of Delaware. It is limited to title I of the bill alone—just title I. It does not deal with the other titles of this bill. It is not limited to just veterans of the Vietnam war.

Mr. COTTON. But is that title limited to veterans of Vietnam only?

Mr. CRANSTON. No. It applies to all post-Korean conflict veterans.

Mr. COTTON. It is the same meaning. That is practically synonymous, is it not?

Mr. CRANSTON. Veterans who served for any period after January 31, 1955, would be covered. So it applies to people who served prior to Vietnam, but may be called "Vietnam," because this is the war at the particular time.

Mr. COTTON. Even those veterans who did not serve during any hostilities?

Mr. WILLIAMS of Delaware. Yes.

Mr. COTTON. It applies to them?

Mr. CRANSTON. That is correct.

Mr. WILLIAMS of Delaware. Yes.

Mr. President, I will not debate this matter further. I am ready to vote. But as the Senators vote I urge them to remember that they have gone on record earlier this year as requesting the President to hold total expenditures for fiscal 1969 not to exceed $192.9 billion. Personally, I meant it, and that is why I am supporting the pending amendment. Unless the cost of this bill is reduced here in the Senate or in the conference, the President will have little choice but to veto the measure.

ORDER OF BUSINESS

Mr. McGOVERN. Mr. President, I ask unanimous consent that I be permitted to proceed for 5 minutes out of order.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

ADMINISTRATION POLICY ON VIETNAM

Mr. McGOVERN. Mr. President, yesterday I spoke briefly on the Senate floor with respect to the issue of Vietnam, with special reference to statements that had been made by the Vice President of the United States. After I left the floor, several of our colleagues, in commenting on my remarks, made statements to which I would like to refer now.

I recognize the differences that have existed from the very beginning on this issue within the Senate, and we all have our various reasons for the stands we take. But I was astounded to read these words in the remarks of the Senator from Arizona (Mr. FANNIN). He said:

> Where was the Senator's righteous indignation—

Meaning my righteous indignation—

> during the Kennedy years and the Johnson years?
>
> We have a right to have an answer to that question. It is indeed strange to watch how strongly indignation waxes when the President is a member of the other party.

Then the Senator from California (Mr. MURPHY), in commenting in a similar vein on my remarks of yesterday, said:

> Certainly, if the Senator from South Dakota feels that the entire intervention in Vietnam was a mistake, I think that he has waited an extremely long time to express himself.

I must say, Mr. President, that this is a very discouraging thing to read. It is really very hard on the ego of a Senator who has been speaking out on this issue for 5 or 6 years to discover that two of the illustrious Members of this body were not aware that I had said anything about it until yesterday.

I have never felt that the Vietnam issue was a partisan matter. The debate on this issue began years ago in the Senate, when we did have a President from my party in the White House. I think my remarks have been not only numerous but also rather blunt on this issue for a long time.

For example, during the Kennedy years, on September 24, 1963, I called for our disengagement from Vietnam then and the removal of our forces; and I warned that if we proceeded further down that road, we would be attaching ourselves to a government in South Vietnam that did not have the support and the respect of the people of that country, and that it was a self-defeating road for us to follow.

During the Presidency of former President Johnson, I took the floor time after time to make remarks that were just as blunt and just as candid as anything I said yesterday, warning at one time some 3 years ago that our continued involvement in this war represented the most tragic military, moral, and political blunder in our national history.

Mr. President, I repeat all those things—which, personally, I am almost getting a little tired of hearing—to make sure that the Senator from California (Mr. MURPHY), the Senator from Arizona (Mr. FANNIN), and others who spoke yesterday understand that my criticism today is neither new or partisan. This has been a long-time concern of mine.

I do not criticize Mr. AGNEW or the President of the United States because they are Republicans. I take issue with them because I believe that, like their predecessors, they are following a mistaken course.

I have one or two other points on the comments that were raised yesterday by the Senators to whom I have referred. The Senator from Wyoming (Mr. HANSEN), in commenting on my suggestion for disengagement, referred to the American prisoners of war in Vietnam. He said: "What about those prisoners?"

He asked whether we are going to walk out and leave them.

In the resolution I have offered for the consideration of the Senate is a provision that the disengagement would not take place until we had secured the release of American prisoners. The Senator from California (Mr. CRANSTON), the Senator from Iowa (Mr. HUGHES), and others are cosponsors of that resolution; and we have made provision that American forces are not to be withdrawn until the release of American prisoners has been carried out.

We have also made provision in that resolution for the Vietnamese who would feel threatened by our disengagement, to give them time to take advantage of the opportunity to go to friendly countries which would be willing to open their borders to them for that purpose.

We have tried to be sure that maximum arrangements are made for the security of our forces during disengagement.

This is not a surrender, as it has been characterized by some critics. We are leaving behind 1 million South Vietnamese forces which we have equipped and trained. They outnumber the enemy in the field by a ratio of 5 to 1. That is not exactly a surrender. It would be a trained and equipped army of 1 million men in South Vietnam, where we have spent billions of dollars and tens of thousands of American lives. For us to say at long last the time has come for the people of South Vietnam to resolve this struggle with their own effort and dedication, to me is not a surrender.

I wish to make one other point. In today's Washington Post there appears an erroneous statement attributed to me which I wish to correct while I have the floor. The article was written by Mr. Peter Osnos, who is a Washington Post staff writer. In the article it is stated:

> In refusing to take a firm stand on the November events, McGovern reportedly asked a group of Moratorium leaders on Tuesday: "Can I really be seen on the same platform with David Dellinger?"

This is not too important, other than for me to say there is not a grain of truth in that statement. I never mentioned Mr. Dellinger's name. I did not know he had anything to do with the November events. I am not going to make my judgment on criteria of that kind. I was opposed to our policy in Vietnam long before the moratorium and long before the mobilization of November. If someone with whom I disagree comes out against smallpox that is not going to be reason for me to dislike smallpox.

I am going to continue to oppose the policy and make my judgment not on the basis of who agrees or disagrees with me, but on the basis of what is in the national interest.

I did tell the moratorium leaders I thought they should be cautious and prudent about the sponsorship and the manner in which they conduct the November moratorium. They did a thought ful, constructive, nonviolent job in October. If they continue in that vein I have the feeling that increasing numbers of people will be standing with them as we move along.

I think in all fairness to the President we should give him an opportunity to enunciate any change in policy he has in mind for November 3, and perhaps after that date all of us will be in a better position to make a judgment on where we go from that date on.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. McGOVERN. I yield.

Mr. DOLE. I wish to ask the Senator a question. The Senator does feel there are certain conditions which must be met before we walk away from South Vietnam. Is that right?

Mr. McGOVERN. Absolutely, and I have incorporated them in the disengagement resolution which is pending.

Mr. DOLE. Based on that, if Hanoi

and the National Liberation Front would not agree with those conditions, the Senator would agree we could not walk away?

Mr. McGOVERN. Yes, I would have to alter my position. I do not agree we have to have 500,000 troops there, but I do not agree we can walk out on prisoners that are still held there.

Mr. DOLE. And the other side has made it clear that they will release prisoners only when we take everybody out of South Vietnam.

Mr. McGOVERN. They said they are willing to discuss that issue when it becomes clear we are disengaging. I think those are matters that can be discussed. That is the kind of issue we should be trying to discuss with them in Paris now, and I hope we are.

Mr. DOLE. I agree that we are all opposed to war everywhere and particularly now in Vietnam. But I happen to believe that President Nixon is embarked on a strategy for peace and that he is making progress.

The Senator says his criticism is not new. Maybe it should be new; maybe it should be changed, as we have a new policy in Vietnam.

Mr. McGOVERN. I hope the Senator is correct. I joined the majortiy leader yesterday in expressing the hope that we might be embarked on a ceasefire. I hope we move in that direction.

I want to give the President credit for whatever troops have been withdrawn and for whatever lessening of violence he has brought about. I do not want to take away from the steps he has taken.

I want to say to the Senator it is my judgment that those steps were taken in part because of the steady concern that has been expressed by some of us who have been speaking out over the last few years. I think that served to help President Nixon take the steps he has taken.

Mr. DOLE. I wish to say to the Senator I am not certain of that, but it is good to hear the Senator from South Dakota give the President credit, since he has been a strong critic of President Nixon, and who criticized President Kennedy and President Johnson. It should be encouraging to know that the Senator from South Dakota thinks President Nixon is going in the right direction, though perhaps not as quickly as the Senator would like.

Mr. McGOVERN. That is the question.

Mr. DOLE. I think President Nixon is. Maybe he is not, according to the Senator from South Dakota; but he is, according to me.

Mr. McGOVERN. That is where we disagree.

Mr. DOLE. But we have to recognize that the enemy is not South Vietnam or this Government, but the National Liberation Front and the North Vietnamese Government. Perhaps we give the wrong impression by harping about what we are doing and what the South Vietnamese are doing, and not about what the enemy is doing.

Mr. McGOVERN. The reason the debate develops in that form is that we do not have much influence in Hanoi or with the Vietcong, but presumably we have some influence over the policy in Saigon and in our Government. I think it is proper that the major force of our criticism is directed at our policymakers and the government in Saigon. Presumably that is where we can be effective.

Mr. DOLE. In addition, we do not have the facts with respect to what is happening in North Vietnam or with the Vietcong. We expose our cards; they do not. It is easy to criticize what we do or do not do, but we do not know what they are doing on the other side and do not criticize as we should.

Mr. McGOVERN. I have criticized the North Vietnamese Government in the past, and today on their prisoner policy. They will not tell our Government or the relatives of prisoners if those who are held are alive, dead, or wounded. That is in violation of the Geneva Convention. I deplore it and it is a barbaric practice. I think it is a self-defeating exercise on their part and it hurts them in world public opinion. I have objected to it on the floor of the Senate before and I shall continue to do so. I do not paint them as saints in this bitter and tragic war, but I am trying to direct my criticism where I think it is relevant and that is toward the policymakers of our Government and our illustrious ally in Saigon.

Mr. DOLE. I note the Senator emphasizes the term "illustrious." Nonetheless, there is a change for the better in the war.

The Senator pointed out yesterday that he had experience in World War II and I recognize this.

Mr. McGOVERN. One has to keep saying that or people say he is not patriotic. It is a little self-serving but it seems to have become more and more necessary to show that one is a patriot in order to speak his convictions on matters of public policy.

Mr. DOLE. I have been here only long enough to assume we are all patriots in the Senate. We all have the same ultimate goal and that is disengagement in Vietnam as quickly as we can with honor.

I hope the Senator agrees after November 3 that President Nixon is getting us out of this war.

Mr. McGOVERN. I hope that will be the case and I shall applaud the President if he moves in that direction.

VETERANS EDUCATION AND TRAINING ASSISTANCE AMENDMENTS ACT OF 1969

The Senate resumed the consideration of the bill (H.R. 11959) to amend chapters 31, 34, and 35 of title 38, United States Code, in order to increase the rates of vocational rehabilitation, educational assistance, and special training allowance paid to eligible veterans and persons under such chapters.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Delaware (putting the question).

The amendment was rejected.

Mr. CURTIS. Mr. President, I want to say to the distinguished Senator from Delaware (Mr. WILLIAMS) that I supported his amendment. I thought it was the best for all concerned. Probably the 20-some-odd million veterans in America are the largest group of taxpayers we have. There is no bloc larger than our veterans and their families. They have more stake in the welfare and perpetuation of this Government. They have more stake in the prevention and retarding of inflation.

I would have liked very much to have voted for the larger bill, but I believe that the President, having made a recommendation for a certain amount for veterans' benefit increases, and the House having added to that about $400 million, we should not go beyond the House figure. The committee bill was substantially more than that.

I voted for the House version because I am for the veteran. I feel that that is the best way to serve him and his family.

Mr. WILLIAMS of Delaware. I thank the Senator from Nebraska for his remarks, and I agree with him completely.

VIETNAM—THE RESULTS OF PRESIDENT JOHNSON'S BOMBING HALT 18 MONTHS AGO

Mr. BYRD of Virginia. Mr. President, it was little more than 18 months ago that the then President, Lyndon B. Johnson, restricted and subsequently eliminated all bombing of North Vietnam. President Johnson did this with the expectation that it would bring about productive peace talks in Paris.

Now, what has happened during that 18-month period?

The Paris peace talks have produced zero results.

There is no evidence that we are any closer to a negotiated settlement of the Vietnam war today than we were 18 months ago.

What has been the result on the battlefront of President Johnson's decision to restrict and then eliminate all bombing of North Vietnam?

The result on the battlefront has been this: During that 18-month period—April 1, 1968 through October 18, 1969—the United States has suffered 147,571 battle casualties, dead and wounded.

This figure of 147,571 U.S. battle casualties represents 50.1 percent of all the casualties we have suffered in this long Vietnam war.

Yes, during the past 18 months—since the bombing of North Vietnam was restricted and then halted—half of all our casualties have occurred. Through last Saturday, our Vietnam casualties totaled 294,578.

This week's casualty count is 78 dead and 684 wounded. This is the third week of relatively low casualty figures. But there is no evidence that this means a permanent reduction in the level of fighting.

From the beginning, Mr. President, I have felt, and have stated many times on the floor of the Senate, that it was a grave error of judgment to become involved in a ground war in Asia. But then we compounded that error by the way the war was conducted.

The record shows that regardless of the concessions made by the United States, the enemy has given nothing in return and has continued to demand that North Vietnam and the Vietcong be awarded a total political victory.

Mr. President, I submit that the American people should not be lulled into a false sense of security by fruitless peace talks and an occasional low casualty week.

The end of the war is not in sight and the casualties continue. There should be no sense of security so long as American lives are being lost.

Mr. President, I am convinced that President Nixon is sincerely attempting to bring this war to an honorable conclusion.

While I do not see an early ending to it, I do believe that we can best reach the earliest conclusion of the war by supporting our Commander in Chief in this hour of crisis.

THE NEED TO UPGRADE THE NATION'S MARITIME FORCES

Mr. THURMOND. Mr. President, as a member of the Armed Services Committee, I have been alerted to the importance of our merchant marine fleet for some time, and unfortunately the past history and present condition of America's maritime strength is a sorry record.

A simple examination of the facts clearly shows the low point to which we have allowed our merchant marine fleet to sink, and it is therefore quite reassuring to me that President Nixon has submitted to the Congress today some proposals to correct this situation.

It is felt they will provide dynamic and far-reaching programs to return American-flag vessels to the prominence they once enjoyed on the high seas.

The Nixon maritime program will certainly receive my close attention and study. Many of us here in the Senate recognize the need for progressive action in this area as our national security is deeply involved.

In recent years, the Defense Department has failed to give our merchant marine the type of support it has deserved. The Defense Department has a real stake in our commercial shipping program, but its failure to act more affirmatively has resulted in continued slippage of our merchant fleet and low morale among those who are engaged in its activities.

A similar situation has existed in the Department of Commerce, where the Maritime Administration is located, mainly because of an unfortunate administrative organization which places the maritime functions outside the mainstream of activity. The establishment of the Maritime Administration as an independent agency should be given careful consideration.

Mr. President, the guilt for our failures in the merchant marine field are not limited to these two Departments by any means—they lie here in the Congress, at the White House, and elsewhere.

The important thing is for this complacency to be dispelled through the efforts of all concerned working together to hammer out a plan and a program to correct this deficiency. Perhaps we need some of President Nixon's "bring us together" philosophy applied to this problem.

One of my main reasons for concern in this area is the aspect of national security. My fellow South Carolinian, the Honorable MENDEL RIVERS, chairman of the House Armed Services Committee, shares this concern. The interim report of Mr. RIVERS' Sea Power Subcommittee should be studied by all of us here in the Congress.

To understand this situation, we must first address ourselves to the current status of our maritime forces. A few well chosen facts amply make the point. They are:

First. The United States is carrying only about 5 percent of its total foreign commerce in American-flag ships while Russian ships are carrying 50 percent.

Second. The American merchant marine has declined from 1,900 ships in 1950 to 1,100 ships in 1968.

Third. During the same 1950 to 1968 period, the Soviet fleet increased from 1.9 million tons to 1,400 ships of 10.4 million tons.

Fourth. Eighty percent of the U.S. merchant fleet is over 20 years old and ranks sixth in world status.

Fifth. Modern air travel has made great strides but 98 percent of our trade continues to move by ship and 99 percent of the beans, bullets, and other supplies going to Vietnam travel by sea.

Sixth. The United States relies on foreign-flag ships to carry 95 percent of some 66 strategic and critical commodities imported here.

Seventh. A study has shown that had our merchant fleet remained as strong as prior to World War II, we could have counted a positive balance of payments of $5 billion instead of a deficit of $23 billion.

Eighth. While U.S. merchant presence declines, Soviet ships are visiting nearly 900 ports in about 100 countries annually. The first Soviet ship to sail through the Golden Gate in 21 years visited the port of San Francisco in early September.

Mr. President, privately owned U.S. merchant vessels now number less than 1,000. Twenty-five of these are passenger cargo ships, around 650 are freighters and about 275 are tankers. Of these, about a third are subsidized. About 15 new ships a year are being built. While the Government does have some ships in reserve, less than 200 of them are in condition to make their activation economically feasible. Most of them are barely worth scrapping.

Another important factor in our maritime picture is that our aging fleet is not configured to compete in today's trading environment. Most of our fleet consists of general cargo vessels while today's merchant ships carrying 80 percent of the world's cargo are bulk carriers such as tankers and grain and ore carriers.

Mr. President, the importance of restoring our merchant marine fleet relates directly to two key areas, defense and economic.

We must never forget some seven-tenths of the earth's surface is covered by water. When Britain ruled the oceans, and most of the world, it was through the power of her merchant fleet as much as anything else. They could turn off or increase imports and thus use this economic factor in a political sense.

Many believe the showdown with communism will come on the economic front. We are so dependent on foreign merchant ships today that our Nation's economy and defense could be greatly weakened through the force of economic sanctions by an unfriendly nation or group of nations.

The Soviets are very much aware of these facts. They are not adding to their merchant fleets for economic reasons alone, they have an eye on the military and political reasons as well. However, it has been only in the past two decades that the Soviets have recognized the inseparability of the various functions of a strong merchant fleet.

With the Soviets moving so rapidly in this field, what is to stop them from taking the trade routes away from the ships of other countries? Remember, these are the same countries we are depending upon to import 87 percent of the bauxite we use, 100 percent of the chromite, 88 percent of the cobalt, 33 percent of the iron ore, 54 percent of the primary lead, 99 percent of the manganese ore, 94 percent of the mica sheet, 90 percent of the nickel, 100 percent of the natural rubber, 48 percent of the sugar, 99 percent of the tin, and so on.

Russia is now handling 50 percent of its foreign commerce versus our 5 percent. Japan has prescribed that their merchant marine carry 60 percent of her exports and 70 percent of her imports.

But it is the scope and the momentum of the Russian program which gives us all cause to give this problem more attention. In the long term, the Soviets might well gain a position which would enable them to dictate shipping rates in shipping conferences and radically restructure them in the interests of Soviet objectives.

Mr. President, this issue of declining maritime strength for the United States is not a new one. Its solution is complex, many elements are involved, and many forces within the industry are pulling at one another. Added to this you have the Government subsidy problem, cheap foreign shipyards, and not the least by any means is lack of understanding by the American public.

Some means must be found to inform the American people of this problem. I dare say today more is known about the yachts of Aristotle Onassis than our merchant marine fleet. But for the most part, the American people are landbound in their thinking. The Navy League and other groups are trying to overcome this problem, but more must be done. Young men in my State often turn down opportunities to obtain a free education at the Merchant Marine Academy because they do not understand the importance of the seas nor see any great future in this area.

Mr. President, we Americans are basking in the pride of our moon landing. It was a magnificent achievement, but one which the Russians launched when they sent Sputnik whirling around mother earth. Our children are going to better schools, better because the Soviets challenged us in producing minds which could direct our course in the complex times ahead. Maybe the Russians will do us another service when the American people wake up to the fact they are driving fast in an effort to control the seas—with merchant ships, and submarines. If we can get this message to the American people, they will respond.

The future situation is even more foreboding when you take into account a recent survey which shows Russians are building six times more new ships than this Nation.

Had the maritime concept been understood in America, our people might have understood and accepted the need to block Haiphong Harbor to the Communist ships which carry the arms used to kill our soldiers in South Vietnam.

Make no mistake, Mr. President, America's future depends upon a presence on the seas. We must orient a part of our national strategy toward the seas. The security and prosperity of America depends to an increasing degree on the military, economic, and political exploitation of the oceans of the world. We can take an important step in that direction by moving to restore America as a maritime power.

VETERANS EDUCATION AND TRAINING ASSISTANCE AMENDMENTS ACT OF 1969

The Senate resumed the consideration of the bill (H.R. 11959) to amend chapters 31, 34, and 35 of title 38, United States Code, in order to increase the rates of vocational rehabilitation, educational assistance, and special training allowance paid to eligible veterans and persons under such chapters.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. CRANSTON. Mr. President, I ask for the third reading.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed, and the bill to be read a third time.

The bill (H.R. 11959) was read the third time.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from California has the floor.

Mr. CRANSTON. Mr. President, before we proceed, I want to point out that the action of the Senate, in rejecting the amendment which was before us, which was to adopt the House version in place of title I of the bill, made very plain the rejection of the House position and the Senate's will to give to veterans of this era the same educational benefits that were made available to veterans of other times and other wars.

Mr. HARRIS. Mr. President, I strongly support the Senate increase over what the administration had asked for the post-Korea veterans' education and other benefits, because I believe that we ought to help these young men who have fought in Vietnam in every way we can in getting re-established and getting a better life for themselves.

Experience has shown that investments like this in the past in veterans' education, training and other programs has brought into the Treasury much more than they ever cost because of the greatly increased earnings they produced on the part of the veterans served.

Young men who have fought and are fighting in Vietnam are entitled to our gratitude, our support and the very best we can do to assist them in getting better education and training and improving their earning capabilities. Therefore, I hope the Senate will pass the bill as amended and reported by the committee.

Mr. DOMINICK. Mr. President, the veterans education bill we are debating today is an omnibus bill, combining proposals of several Senators.

I am delighted that two of my bills have been included. The first opens new curriculums to veterans in business, trade, and technical schools. The second makes GI bill benefits available to the 129,000 recently discharged veterans who have less than an eighth grade education.

In view of the controversy surrounding the cost of the omnibus bill, I would point out for the record that the Veterans' Administration estimates the cost of both of my proposals will be "nominal."

CURRICULUMS IN BUSINESS, TRADE, AND TECHNICAL SCHOOLS

Under existing law there is a rather unusual restriction which might be called the "dual objective syndrome." It is outmoded, at least 17 years out of date. It is discriminatory in that it does not apply to educational institutions which grant degrees, but strikes at our business, trade, and technical schools. It has lost all relevance to modern education. It has achieved unintended results.

In a nutshell, the dual objective prohibition means that a student with a "vocational objective" must study for a single identifiable objective. This is to be distinguished from the student with an "educational objective"—a degree—who is permitted to have a major and minor field of study concurrently, or even a diversified major.

The text of my amendment to remedy this appears in title II, section 201(a) of the omnibus bill. Our committee report sets out the background of the dual objective prohibition, some examples of the practical impact, and our intent in correcting the situation. I ask unanimous consent that this portion of the report, pages 26 to 29, be printed at this point in my remarks.

There being no objection, the excerpt was ordered to be printed in the RECORD as follows:

LIBERALIZED VOCATIONAL OBJECTIVE DEFINITION

Section 201. Subsection (*a*) contains an amendment offered by Senator Dominick to amend 38 U.S.C. 1652(b) more nearly to equate the eligibility of curricula offered by business, trade, or technical schools with those offered by educational institutions empowered to confer degrees.

Whether a curriculum of any type of educational institution may be approved, under existing law, for purposes of the veterans' educational assistance programs depends first upon whether it meets the following definition of "program of education" in 38 U.S.C. 1652(b):

"The term 'program of education' means any curriculum or any combination of unit courses or subjects pursued at an educational institution which is generally accepted as necessary to fulfill requirements for the attainment of a predetermined and identified educational, professional, or vocational objective."

Under Veterans' Administration regulations, an "educational, professional, or vocational objective" is defined as follows:

"An educational objective is one that leads to the awarding of a diploma, degree, or certificate which reflects educational attainment. . . . A professional or vocational objective is one that leads to an occupation. It may include educational objectives essential to prepare for the chosen occupation. When a program consists of a series of courses not leading to an educational objective, such courses must be directed toward attainment of a designated professional or vocational objective."

The definition of "program of education" was included for the first time in the Korean conflict GI bill in order to preclude certain abuses which had taken place under the World War II program. Some veterans allegedly had been moving from one course to another without making a genuine effort to prepare for an educational, vocational, or professional objective which would enable them to earn a living. Thus, a definition of "program of education" was added, and provision was made that a veteran could make not more than one change of program. According to the House report (H. Rept. No. 82–1943), these changes were "intended to bar the taking of courses for the obvious purpose of receiving an educational allowance and of continually changing from one program to another without any relation to benefit to be derived by the veteran."

The definition of "program of education" has not been altered in 17 years, but substantial changes have taken place in the field of education and curriculum design so that there presently exists what the committee believes to be an unintended result.

Students who identify an "educational objective"—a degree—and attend accredited academic institutions may pursue major and minor subjects of concentration, or even a diversified major. In contrast, the student with a "vocational objective" is limited to a single identifiable objective.

The most prevalent example of a vocational curriculum which is not permitted under existing law—on the theory that it has more than one objective—is one which contains courses in accounting as well as data processing or computer programing. The Veterans' Administration has ruled, in reviewing vocational curricula, that secretarial training, accounting, and data processing are separate and distinct areas, and such courses may not be mixed, intermingled, or pursued concurrently. Another example of a curriculum which has been held to be "dual objective" is electronics with the addition of instructions in drafting for preparation of schematic diagrams. These are illustrative of the problems that section 201(a) is intended to correct.

The practical impact of the present distinction is amply demonstrated in a letter to the committee from Mr. R. A. Fulton, exec-

utive director and general counsel of the United Business Schools Association. Mr. Fulton states:

"In contrast with the great leeway and flexibility permitted the GI student in a baccalaureate program the GI student in a post-secondary vocationally oriented business school is, in our opinion, unnecessarily constrained by a rigidly narrow interpretation of what constitutes a "vocational objective." In many situations this is a particularly specific job title narrowly categorized by the Dictionary of Occupational Titles published by the U.S. Department of Labor.

"We feel that the Dominick amendment will permit to the veteran's benefit a more generic treatment in his attainment of a predetermined vocational objective. In this time of "sequential careers" we feel that vocational education can ill afford to remain entrapped by a philosophy of dead-end training for limited objectives. In all other Federal programs of vocational education (i.e., vocational rehabilitation, MDTA, etc.) the thrust is to broaden the training objective to permit total job comprehension and potential for career development.

"This of course has been the long-time approach at the college level whereby a veteran can identify his attainment of a predetermined "educational" objective as merely a "bachelor's or master's degree." He can change his major three times without loss of GI benefits. Within the college of business administration, he may change his major from personnel to marketing to accounting or study subjects in all three concurrently.

"In contrast, the veteran in a business school is often prohibited from selecting a "program of education" which includes courses in accounting along with data processing. Despite the connexity of these courses or units as constituting a reasonable "program of education" for the world of work the prohibition is presently justified as being a "dual objective." This is in the face of a crying need for qualified business data processors who must, by the nature of their work, have a knowledge of accounting (the very language of business) and data processing (the necessary quantitator and repository of business information).

"This objection or prohibition of "dual objective" is not found in any of the host of other Federal programs which might be assisting the student seated in a desk next to the veteran. These programs would range from dependent survivors of social security, civil service, railroad retirement, FECA to MDTA, and vocational rehabilitation."

The amendment in section 201(a) would remove the restriction confining a vocational curriculum to a single objective by providing that a program of education may include more than one predetermined and identified educational, professional, or vocational objective if all the objectives pursued are generally recognized as being reasonably related to a single career field. This will permit some diversification and breadth of training in skills which complement each other. The requirement that multiple objectives be within a single career field, coupled with the authority of the Veterans' Administration to issue regulations, should provide adequate safeguards against abuse. At the same time, the new language overcomes an unjustified inequity between the treatment of veterans attending vocational schools and those attending academic institutions under the present GI bill.

In the implementation of this section, it is the intention of the committee that the Veterans' Administration exercise greater flexibility in curriculum review. A curriculum should not be disapproved solely because it could reasonably be divided into two or more separate curricula or objectives. In determining whether all the objectives pursued are generally recognized as being reasonably related to a single career field, the presence or absence of a specific objective or career field in the Dictionary of Occupational Titles (published by the Department of Labor) should not be controlling. Rather such presence or absence in the DOT should be considered on an equal level with information from curriculum guides and materials recommended by the U.S. Office of Education and information obtained by the Administrator after consultation with State and Federal educational agencies, the appropriate nationally recognized accrediting agencies, and other qualified bodies.

Mr. DOMINICK. Mr. President, as Senators will note, the so-called dual objective which has arisen most often is in the case of curricula offered by these schools which contain a mixture of accounting and computer programing or data processing. Present law has been interpreted to preclude these combinations on the theory that they are separate and distinct areas, and such courses may not be mixed, intermingled, or pursued concurrently.

Mr. Bernard Ehrlich, legal counsel for the National Association of Trade and Technical Schools, advised me that member schools of NATTS have run into the dual objective barrier with curricula which couple electronics courses with some instruction in drafting—particularly schematic diagrams.

Ten schools in Colorado have been plagued with the restriction. Mr. Robert Perry, the Colorado supervisor for proprietary schools and veterans' education of our State board for community colleges and occupational education reviewed the difficulties we have had in this area. I ask unanimous consent that this letter be printed at this point in my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE STATE BOARD FOR COMMUNITY COLLEGES AND OCCUPATIONAL EDUCATION,
Denver, Colo., October 10, 1969.

Attention: Mr. Richard J. Spelts, legislative assistant to Senator Dominick.

Hon. PETER H. DOMINICK,
Old Senate Office Building,
Washington, D.C.

DEAR SENATOR DOMINICK: I have today received with the staff of the Colorado Veterans Approving Agency the matter of restrictions of multiple objective curriculums which presently exists in the Veterans Administration regulations.

We have agreed that the amendment which Senator Dominick is proposing to Section 1652 B "Program of Education" would be a desirable change in the regulations and we desire to go on record as supporting this amendment. Of course, you are aware of the difficulties that we in Colorado have had with respect to this problem with Parks School of Business which is located in Denver. A number of schools in Colorado have either been denied veterans' approval by the State Approving Agency or the Veterans Administration has denied approval due to the multiple objective restriction. We have had problems regarding this matter with the following schools: Parks School of Business, Denver; Southwest Data Institute, Durango; Denver Technical College, Denver; Engineering Drafting School, Denver; Seible School of Drafting, Denver; Midwest Business College, Pueblo and Colorado Spring; Airlines Training School, Denver; Colorado Electronic Training Center, Colorado Springs; Western Technical College, Denver; Barnes School of Commerce, Denver.

We feel that this amendment would be most helpful in relieving the problem of restrictions on multiple objective curriculums.

Sincerely yours,

ROBERT L. PERRY,
Supervisor, Proprietary Schools and Veterans Education.

Mr. DOMINICK. For the purpose of developing the legislative history as to our intent today, I think it would be helpful if I listed a few examples of other multiple-objective problems which Mr. Perry has forwarded to me. In these cases, the school seeking approval of a curriculum was turned down either by the Veterans' Administration or the State approving agency.

ELECTRONICS

There have been courses offered in Colorado where the first quarter of study was devoted to becoming a radio repairman, the second quarter an industrial repairman, and the third quarter an electronic technician. Obviously, this was a progressive program with qualification depending upon how long the student remained in school.

Drafting: The first quarter of study concentrated on basic drafting techniques. The second quarter was utilized to develop a specialty such as mechanical or architectural drafting. The third quarter focused on technical drafting and illustrations.

There are other examples, Mr. President, but I believe these demonstrate the general tenor of the problem which my proposal is intended to correct.

The dual objective syndrome has been a real barrier to schools around the country. The director of education at Parks School of Business in Denver, Mr. Max Wakefield, wrote to me as follows:

I think we could go to most any state and find the same type of situation. I could refer you more specifically to New York, Michigan, California, and Washington that I personally know of.

The importance of that statement is underscored by the support and very able assistance I have received for this provision from the United Business Schools Association which has 484 member schools in 48 States—and the National Association of Trade and Technical Schools—which has 190 member schools in 35 States.

I believe the vocational-trained veteran should have an opportunity which is equal to that of the academically trained veteran to utilize his training for advancement in a career which is truly responsive to the needs of the modern business and technical world. That is what my amendment is all about. It is, therefore, my intent that the term "single career field" be construed in the broad, rather than the narrow, sense in order that we might achieve that goal.

ELEMENTARY LEVEL EDUCATION

In the efforts to provide educational assistance to servicemen who want to complete high school and go to college, a sizable group of men was dropped at the wayside in the 1966 GI bill. I am referring to the 129,000 veterans separated from service during the post-Korean period who have not finished 8th grade.

Some 20,000 of them left the military service within the last 3 years.

Under existing law, these men do not qualify for GI education benefits.

This, in itself, is shocking. But even more so is the fact that the Korean GI bill specifically included benefits for elementary education.

In short, the Korean veteran is eligible; the Vietnam veteran is not.

I am very pleased that the committee has approved S. 2036, my bill restoring the authority which the Veterans' Administration had before 1966 to help these men. It appears in title II, section 201(b), and to some extent has also been interwoven with section 202, containing special assistance for the educationally disadvantaged and the new predischarge education program. My elementary education proposal is, however, separable from these new programs. I want to emphasize that I believe my proposal can stand on its own merits in conference with the House.

Not without significance is the fact that the Veterans' Administration estimates the cost of the elementary program will be negligible.

Colorado veterans, and I am confident veterans in other areas of the country, have applied for educational assistance below the secondary level and have been rejected.

When he was before our subcommittee, Dr. James Allen, Jr., U.S. Commissioner of Education, testified:

> Not all military personnel have completed the eighth grade; those that have not are not eligible to receive elementary level training under current law.
>
> It seems totally reasonable to me that they should receive federal assistance to complete their elementary education, as Korean War veterans did. . . . This proposal, which would be of little cost to the Federal Government, could be of significant importance to extremely educationally disadvantaged veterans.

Other witnesses who testified in support of this measure were representatives of the American Legion, AMVETS, Disabled American Veterans, National Urban League, and the VFW. There was no adverse testimony.

Mr. President, I urge the Senate to approve both the curriculum and elementary education portions of the omnibus bill, and I am hopeful the House will look favorably on these provisions.

I ask unanimous consent that pages 29 to 30 of the committee report, explaining the elementary education provision be printed in the RECORD.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

ELEMENTARY LEVEL EDUCATION INCLUSION

Subsection (b) of section 201 incorporates section 1 of S. 2036, deleting section 2 of that bill which becomes unnecessary in light of the new subchapter V contained in section 202(a) of the committee substitute amendment (see sec. 1691(a)(1) under which elementary level training would be available). This provision would permit education and training at the elementary school level under the post-Korean conflict GI bill; such training was covered under the Korean program. Also, elementary level training, as is the case presently with high school level training, would not be counted against the veteran's total period of entitlement to GI bill benefits. It is estimated that since the inception of the post-Korean conflict GI bill, 129,000 veterans have been discharged who had not completed elementary school, approximately 20,000 of whom left military service within the last 3 years.

The failure to cover elementary education in the original post-Korean conflict GI bill was not remedied in 1967 when a special provision for the educationally disadvantaged veteran was added to permit such a veteran to complete high school without losing any of his eligibility for regular GI bill benefits.

The Korean conflict GI bill and the Senate version of the 1966 GI bill defined "educational institution" as follows:

"The term 'educational institution' means any public or private elementary school, secondary school, vocational school, correspondence school, business school, junior college, teachers college, college, normal school, professional school, university, scientific or technical institution, or other institution furnishing education for adults."

The 1966 House definition which became law, however, changed the definition by deleting the words "elementary school" and substituting at the end of the phrase "any other institution if it furnishes education at the secondary school level or above" for the phrase "other institution furnishing education for adults." This has been interpreted by the Veterans' Administration to cut off assistance below the high school level. There was no discussion of the change in public hearings or during the House floor debate. The only explanation given is a single sentence in the House report (H. Rept. No. 89-1258):

"This definition follows that applicable to war orphans' educational assistance with the addition of correspondence schools."

Although the Veterans' Administration took no position regarding this provision, there was strong support from other witnesses and no adverse testimony.

The committee believes that the educational level of some servicemen being discharged continues to necessitate the availability of assistance below the secondary level. Without this assistance, the variety of other educational programs administered by the Veterans' Administration would continue to be meaningless to these men.

Mr. KENNEDY. Mr. President, H.R. 11959 will substantially help veterans to receive a good education and to take advantage of their benefits. I support the bill as it has been reported from the Committee on Labor and Public Welfare.

As a former chairman of the Subcommittee on Veterans' Affairs, I feel strongly that this Nation has a fundamental obligation to the men and women who have served so well in the Armed Forces, risking their lives and sacrificing opportunities. There are over 26 million living veterans in the United States today, and veterans and their families make up close to half of our population. In addition, thousands of servicemen are discharged every day to rejoin civilian life. This year, over 1 million GI's who have seen service during the Vietnam conflict will return as civilians.

My own State of Massachusetts has more than 800,000 veterans. Seventy thousand of them have served during the Vietnam era. In 1968, approximately 20,000 GI's returned to civilian life in Massachusetts, and the figure will be even higher for 1969.

This Nation has long recognized the commitment to assist all veterans. Over 100 years ago, Abraham Lincoln stressed the duty of the United States:

> To care for him who shall have borne the battle, and for his widow, and his orphan.

We must assure adequate benefits for all veterans—the returning servicemen of today and the dedicated veterans of yesterday.

Earlier this week, the Senate passed a number of bills relating to medical and hospital benefits for veterans. I strongly supported those bills.

Today, we are again considering important veterans legislation—relating to education and training. H.R. 11959 is a just, fair, farsighted bill to help veterans receive better education. The need is certainly great.

This country has long recognized the importance of education for all citizens. It makes us more productive and constructive members of society, and enhances personal development.

From a financial point of view, there is a direct general relationship between number of years of schooling and level of income. According to figures from the Bureau of Census, college graduates earn twice as much in their lifetimes as high school dropouts and three times as much as grade school dropouts. The Bureau has estimated lifetime incomes for men in terms of the number of years of formal education:

Less than 8 years of grade school	$189,000
Eight years of grade school	247,000
One to 3 years of high school	284,000
Four years of high school	341,000
One to 3 years of college	394,000
Four years of college	508,000
Five or more years of college	587,000

Between 1950 and 1967, median years of education completed by a person 25 years and older rose from 9.3 to 12 years. The average educational attainment level of employed persons in 1967 was 12.3 years, as compared with 8.6 years in 1959. The unemployment rate among high school dropouts and those with no more than a high school degree is close to three times the national average.

In light of the increasing importance of education, I am greatly disturbed that veterans eligible under the cold war GI bill, passed in 1966, have not been taking advantage of their educational opportunities. After World War II, 50 percent of the eligible veterans utilized the college and vocational training which was available. After the Korean war, 42 percent of its veterans benefited from the educational and training programs.

But of the Vietnam veterans discharged to date, only slightly more than 20 percent have utilized their benefits.

Many factors, of course, contribute to this low level of participation. One deterrent, and inequity, is the relatively low-level of support which we give our post-Korean and Vietnam veterans.

During the Korean conflict, allowances under the GI bill covered about 98 percent of the average tuition, board and room costs for public and nonpublic colleges. The present rate of coverage under the cold war GI bill, however, is only 67 percent of these costs. H.R. 11959, as amended by the Senate Committee on Labor and Public Welfare, would in-

crease payments to a level comparable to the coverage under the Korean conflict GI bill.

I support the higher payments. I do not feel that veterans of today should be second-class citizens. They are making great sacrifices for their Nation. They deserve benefits comparable to those which we gave to veterans of earlier eras.

Mr. President, the first part of title II of H.R. 11959 contains a number of proposals from S. 2361, which I introduced on June 9, and from other legislation which I worked on closely with Senator CRANSTON. These proposals would provide special assistance for educationally disadvantaged veterans.

The need is shockingly clear. Over 20 percent of our discharged veterans are high school dropouts—approximately 230,000 in fiscal year 1970. Yet only 6.1 percent of the eligible high school dropouts have taken advantage of the post-Korean conflict educational programs. This rate is only one-third of the participation rate for the Korean conflict and World War II programs in the comparable first 3 years of operation of those programs. At the present time, nine out of 10 new veterans who have not completed high school simply do not use the GI bill. To me, Mr. President, this is a tragically wasted opportunity, and we should do all we can to encourage veterans with weak academic backgrounds to continue their education.

Section 202 of H.R. 11959 represents a two-pronged approach. First, it seeks to make education more attractive to veterans with academic deficiencies by offering improved attention in a more comfortable environment. Second, it seeks to encourage colleges and other educational institutions to admit veterans and develop special programs for them, thereby expanding their educational opportunities.

As expressed in the bill, the purpose is:

(1) To encourage and assist veterans who have academic deficiencies to attain a high school education or its equivalent and to qualify for and pursue courses of higher education, (2) to encourage and assist institutions of higher education and other educational institutions in the development of programs which provide special instruction, counseling, tutorial, and other educational and supplementary assistance to such veterans, and (3) to encourage and assist institutions of higher education and other education institutions in the development of special educational programs and projects for such veterans.

The new subchapter V calls for a system of grants, contracts, and special supplementary assistance to be paid to institutions of higher education and other educational institutions to develop programs consistent with this goal.

The basis for the new programs is that even though a veteran may have dropped out of high school or had a mediocre record, presumably in his years in the service he has developed maturity and responsibility. If he does have the motivation to continue his education, we should recognize that he is a good prospect and that his high school performance is an inaccurate indication of his ability and potential. We want to assure that he has chance to develop fully and swiftly in the most conducive educational environment.

One motion would be for postsecondary or other schools to give special preparatory training to veterans, right on the campus, strengthening their background so that they can gain admission to an institution of higher education. They could eventually attend the school which gave them the training, or they could go elsewhere.

Once a veteran with academic deficiencies is admitted and attending school he still may need special tutoring in order to succeed in his studies. Such assistance could be supported under this bill.

Colleges and other schools could be encouraged to develop accelerated and concentrated programs of education for veterans enabling them to earn a bachelor's degree in 2½ to 3 years, for example, rather than the usual 4 years. For a person starting school at the age of 22 or 23 or older, perhaps with dependents and with a need to start earning money as soon as possible, this would be a tremendous help.

Institutions of higher education also might establish a 5- or 6-year program of study for veterans—with an easier course load for those who do not have the background for more concentrated study or those who need to work full time while pursuing their education.

Postsecondary schools also could develop programs to encourage and train veterans to pursue public service occupations to meet community needs. They could offer special incentives and courses to become teachers in disadvantaged areas, or to work in social action programs, or to join undermanned police departments, or to use their training as medics, and so on.

One idea which might be incorporated into some of these programs would be to hire older veterans, in their later years of college, to help the incoming students.

Mr. President, I am pleased and honored that the Subcommittee on Veterans' Affairs and the full Committee on Labor and Public Welfare have acted favorably on my own proposals to help educationally disadvantaged veterans. I think that this represents a new emphasis and recognition of the importance of assisting those with poor educations. I certainly hope that the Senate and the full Congress will approve these long-overdue programs.

A number of other proposals in H.R. 11959 would help disadvantaged veterans and veterans in general. The pre-discharge educational program—PREP—developed by Senator CRANSTON, for example, is an exciting new idea to reach veterans even before they leave the service. The strengthening of one-stop service centers should enable far more veterans to take advantage of their rights. I certainly support these and other sections of the bill which are all designed to help veterans receive a good education and effectively use their benefits.

Mr. President, the Nation has a rare opportunity both to assist and to gain from those who have broken out of disadvantaged backgrounds and matured in the service.

If we follow through with full veterans programs, including special assistance for the educationally disadvantaged, we can ensure that returning veterans will not revert to unproductive lives in ghetto or other areas. Rather, veterans whose horizons and aspirations have been broadened in the service can continue to contribute to our national welfare as constructive, well-educated citizens.

We have an obligation both to the men and women as individuals and to society as a whole to give them the chance.

Mr. FULBRIGHT. Mr. President, I am very pleased to support the Veterans Education and Training Assistance Amendments Act of 1969.

I understand that President Nixon has indicated that he might veto this bill because he believes that its provisions are too generous and inflationary. This bill would provide a 46-percent increase in educational benefits for Vietnam war veterans. The 13-percent increase suggested by President Nixon seems inadequate, particularly considering the greatly increased educational costs today.

Certainly we need to be concerned about inflation, which has been greatly heightened by the war in Vietnam. However, limiting the educational opportunities available to those who carried the burden in the Vietnam war hardly seems the proper way to combat inflation.

I have actively supported previous measures of this nature, strongly believing that we have an obligation to those who have disrupted their lives and educations to serve in our Armed Forces. Our Government sent these people to war and our Government owes them an obligation to assist them in readjusting.

I believe these veterans must be given every opportunity to complete their education. It is vital that they be able to compete in and contribute to our society.

I understand that this bill is designed to remedy the low participation rate under the current GI bill and that it includes a program to advise the veterans of the educational benefits available. According to the report of the Committee on Labor and Public Welfare, the low participation today is in large part due to the enormously increased cost of education over the past 15 years. The committee cites a 55-percent increase in the cost of public education and a 96-percent increase in the cost of private education since 1952–53.

I think all of us stand to benefit from insuring that these veterans, many of them very young, have every opportunity to pursue a higher education with adequate compensation.

Mr. SCHWEIKER. Mr. President, I rise in support of the Veterans Education and Training Assistance Amendments Act of 1969, H.R. 11959 as amended by the Committee on Labor and Public Welfare.

As ranking minority member of the Subcommittee on Veterans' Affairs, I commend this bill as a strong and com-

prehensive response to the educational needs of the returning war veteran in the 1970's.

This bill has taken shape within the Subcommittee on Veterans' Affairs and the full Committee on Labor and Public Welfare as a truly bipartison measure, interested only in the welfare of the American veteran. I am deeply grateful to the chairman of the subcommittee, the able junior Senator from California (Mr. CRANSTON) for his unfailing cooperation with the minority. There can be no doubt that this bill, in its objectives and in the manner it would achieve them, deserves the full support of every Member of this body, regardless of his party or particular political viewpoint.

Perhaps the part of the bill that has received the most attention has been the 46-percent increase in the GI bill educational allowances. I am one who believes this increase is long overdue. After the Korean war, in the years 1952 through 1955, the benefit for a single veteran in college was $110 a month for a 9-month college year. This covered 98.8 percent of the average tuition, room and board charges at American colleges.

Today we pay a single veteran in college only $130 a month for a 9-month school year. The percentage of college costs that this represents has shrunk from 98.8 percent after the Korean war to only 67 percent today. So this is why we must enact the increases set forth on the bill. They would raise a single veteran's monthly benefit to $190 a month, and would raise accordingly the allowances for veterans who are married with dependents.

I support this level of increase in GI benefits out of a sense of equity for the veteran of post-Korean war service. But in addition, there is disturbing evidence that far fewer veterans today are taking advantage of this program than took advantage of it after World War II or the Korean conflict.

In gross figures, half of all the eligible World War II veterans used their GI benefits. After the Korean war, 42 percent of those eligible used them. Since 1966, when the post-Korean war GI bill began, only 20.7 percent of the eligible veterans have used the program. Clearly we need to make this program more attractive to veterans today, and raising the benefits to a realistic level—on a par with the program when it was offered to Korean veterans—is the first step.

The bill before the Senate, however, does not confine itself to increases in the GI benefits. It has a number of other key provisions which affect the whole range of educational opportunities for returning veterans.

It sets up a new cooperative training program in farming for veterans, stressing on-the-farm training.

It establishes new education and training programs for educationally disadvantaged veterans, programs that will apply potentially to the 23 percent of returning veterans who were high school dropouts. These programs include:

GI bill benefits for veterans who take refresher and remedial courses on a college campus to enable them to enter the regular college program;

A supplementary assistance allowance of up to $100 a month per veteran paid to educational institutions that are offering special services to veterans who are educationally disadvantaged;

Authority for the Veterans' Administration to award grants and contracts to educational institutions for special veterans' training programs; and

A pre-discharge education program—PREP—that would reach the about-to-be-discharged serviceman during his last year of duty.

In addition, the bill will extend GI education benefits to those returning veterans whose formal education stopped before the eighth grade and who want to make up this education. This will correct a lapse in the law which, since 1966, has given GI benefits for high school study and beyond but has not included elementary school work. This part of the committee's bill is based on S. 2036, a bill introduced by the junior Senator from Colorado (Mr. DOMINICK).

The bill also recognizes changes which have taken place in the course schedules at many colleges and universities, and thus reduces the number of semester credit hours a veteran must carry in college to receive "full-time student" benefits from 14 hours down to 12, in most cases.

It puts the Veterans' Administration outreach activities on a stronger footing to help advise and counsel returning veterans of the opportunities open to them.

And, finally, the veteran who is moving out of his home area to be interviewed for a job or to take a job, the bill would provide payment by the Veterans' Administration of his reasonable travel and moving expenses. This provision of the committee's bill is based on S. 1088, a bill sponsored by the senior Senator from New York, and the distinguished ranking minority member of the committee (Mr. JAVITS).

Mr. President, just as I have strongly endorsed the increase in basic GI educational benefits in title I of this bill, so do I have great faith in the innovative programs and amendments under title II, particularly those programs designed specifically for the veteran with educational handicaps.

I personally cosponsored a number of the separate bills that went into title II of the omnibus bill: S. 2506, the bill to liberalize college credit hour requirements for veterans; S. 2668, the bill to set up the PREP program and extend GI education benefits to college refresher and remedial courses; S. 2700, the bill to strengthen veterans outreach services, and S. 1088, the Javits bill to provide job relocation assistance to veterans.

While title I provides the basic underpinning of veterans educational opportunities through a realistic level of benefits, title II programs are going to focus resources on the problems of the most educationally deprived veterans. Of the 1 million veterans coming home each year 23 percent have not completed high school. We must not forget the needs of this large segment of the veteran population. We must design programs for their needs, not simply offer programs that "skim off the cream" of the best qualified veterans. I submit that this bill, in its title II programs, can do the job if we support it.

The bill H.R. 11959, as amended by the committee, also contains a number of more technical provisions previously passed by the House in H.R. 6808.

One of the provisions passed by the House was section 2(b) of H.R. 6808, which would prohibit Veterans' Administration approval of a veteran's apprenticeship training where the Administrator "finds that by reason or prior training or experience such veteran is performing or is capable of performing the job operations of his objective at the same performance level as the journeyman in the occupation."

However, our committee did not report out this provision because, as the committee report states at page 68:

> The committee did not find either in the hearings or House report sufficient justification for this provision.

The International Union of Barbers, Hairdressers, Cosmetologists, and Proprietors and its affiliate, the Pennsylvania State Association of Journeymen Barbers, Hairdressers, Cosmetologists, and Proprietors, strongly oppose this provision. They believed that it would be used to discriminate against and withhold VA benefits from barber apprentices who have graduated from a barber college but who are still doing their necessary apprenticeship in order to qualify for a journeyman barber's license.

I agree that this might be a consequence of such a provision in the law, and I support the position of the barbers' organizations. In Pennsylvania, for example, a barber cannot become licensed unless he has trained for 24 months. Usually this means 9 months of training in one of Pennsylvania's 11 schools of barbering, followed by 15 months of apprenticeship training on the job in a barber shop.

Barber apprentices are not free to go into business for themselves during the apprenticeship period. They must work for an established barber until they are licensed. They must build their own clientele, even though they usually find it difficut to attract customers during this period when they are still learning their craft. I think it is unfair to single out these apprentice barbers for any discriminatory treatment in the awarding of GI apprenticeship benefits.

Mr. President, I strongly urge that the Senate act favorably on this vital measure, H.R. 11959, as amended by the committee.

Mr. RANDOLPH. Mr. President, this legislation in behalf of our many veterans who are and have recently returned from active duty in the Armed Forces of our country is greatly needed in terms of a realistic thank you for services rendered. It is an assist to each serviceman as he returns to civilian life. There is also provided an upgrading of the qualifications of those entering the employment market.

The value of the educational benefits which were begun after World War II has been well evidenced. These programs have provided incentive and valuable

training to many young men and women. However, there have been many changes in our society which necessitate reforms in our educational and training assistance programs—increases in educational expenses, rise in living costs, requirements for skilled labor, demands for trained technicians, and more stringent higher education entrance requirements. These were well documented in the testimony before our Veterans' Affairs Subcommittee.

After spending an average of 3 years in military service, it is difficult for a young man to reenter civilian life and spend several additional years outside the regular employment market in pursuit of education and training. This has been well evidenced in the apparent lack of enthusiasm for participating in the education benefits programs of our Vietnam era veterans. We have only a 20.7 percent participation record.

It is particularly difficult for a 22- or 23-year-old man or older to go back to pick up the remedial work necessary to complete elementary or secondary education requirements which are necessary prior to entering fields of higher endeavor. We must provide the incentive and the necessary counseling to involve our veterans in these opportunities. This legislation we have developed will provide this encouragement.

The increases in the educational allowances for all types of training are certainly more in line with present-day costs. A full-time college student with no dependents would receive $190 a month or $1,710 for a 9 month—two semester—school year. This is adequate but no luxury with today's higher education costs. Those with the same status in the vocational rehabilitation program would be eligible for $160 a month, in farm cooperative educational programs it is $153, and apprenticeship training is $116 a month for the first 6 months.

Important new additions to our veterans' benefits programs are contained in title II of the bill which is aimed at providing more flexibility in vocational education programs, elementary level education assistance without loss of entitlement to regular benefits, predischarge educational programs, special programs for educationally disadvantaged, and incentive for schools to provide special education programs for veterans. These are significant new supplements to our Government's effort in behalf of our veterans.

This fiscal year 230,000 of the approximately 1 million servicemen to be discharged will be high school dropouts. It is important that we make a special effort now to involve these young men and women in programs which will multiply many times over their future employment opportunities and will greatly enhance their role in America's development and, consequently, the return America will receive from them.

The young men and women who are giving so much of their time during this special period of their youth richly deserve this financial assistance and attention. As a member and a former chairman of the Senate Veterans' Affairs Subcommittee, I am well aware of the services performed by our veterans both as members of the Armed Forces and as civilians. I want to commend the chairman of the Senate Labor and Public Welfare Committee, Senator YARBOROUGH, who is also a former chairman of the Veterans' Affairs Subcommittee, for his continued outstanding leadership in behalf of programs for our returning servicemen. His efforts are well recorded in the GI benefits programs which have been approved by the Congress in the last decade. I would also like to congratulate the new chairman of the Veterans' Affairs Subcommittee, Senator CRANSTON, for his effective work in reporting this updated, meaningful program. He has performed an outstanding service, as have other committee members, to our veterans, and, therefore, to all Americans.

Mr. CRANSTON. Mr. President, I believe we are ready for a vote.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass? On this question the yeas and nays have been ordered and the clerk will call the roll.

The bill clerk called the roll.

Mr. BYRD of West Virginia. I announce that the Senator from Indiana (Mr. BAYH), the Senator from Nevada (Mr. CANNON), the Senator from Louisiana (Mr. ELLENDER), the Senator from North Carolina (Mr. ERVIN), the Senator from Tennessee (Mr. GORE), the Senator from Michigan (Mr. HART), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Wyoming (Mr. MCGEE), and the Senator from Maine (Mr. MUSKIE) are necessarily absent.

I also announce that the Senator from Nevada (Mr. BIBLE), the Senator from Missouri (Mr. EAGLETON), the Senator from Alaska (Mr. GRAVEL), the Senator from Rhode Island (Mr. PELL), and the Senator from Alabama (Mr. SPARKMAN) are absent on official business.

I further announce that, if present and voting, the Senator from Indiana (Mr. BAYH), the Senator from Nevada (Mr. CANNON), the Senator from Louisiana (Mr. ELLENDER), the Senator from Missouri (Mr. EAGLETON), the Senator from North Carolina (Mr. ERVIN), the Senator from Tennessee (Mr. GORE), the Senator from Alaska (Mr. GRAVEL), the Senator from Michigan (Mr. HART), the Senator from Wyoming (Mr. MCGEE), the Senator from Maine (Mr. MUSKIE), and the Senator from Rhode Island (Mr. PELL) would each vote "yea."

Mr. GRIFFIN. I announce that the Senator from Colorado (Mr. ALLOTT), the Senator from Massachusetts (Mr. BROOKE), the Senator from New Jersey (Mr. CASE), the Senator from Florida (Mr. GURNEY), the Senator from Pennsylvania (Mr. SCOTT), the Senator from Illinois (Mr. SMITH), the Senator from Alaska (Mr. STEVENS), and the Senator from Texas (Mr. TOWER) are necessarily absent.

The Senator from Oklahoma (Mr. BELLMON) is detained on official business.

If present and voting, the Senator from Oklahoma (Mr. BELLMON), the Senator from Massachusetts (Mr. BROOKE), the Senator from New Jersey (Mr. CASE), the Senator from Florida (Mr. GURNEY), the Senator from Pennsylvania (Mr. SCOTT), the Senator from Illinois (Mr. SMITH), the Senator from Alaska (Mr. STEVENS), and the Senator from Texas (Mr. TOWER) would each vote "yea."

The result was announced—yeas 77, nays 0, as follows:

[No. 134 Leg.]

Case	McCarthy	Tower
Eagleton	McGee	

So the bill (H.R. 11959) was passed.

Mr. CRANSTON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. MANSFIELD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CRANSTON. Mr. President, the Senate has acted most wisely, equitably, and appropriately in passing this legislation today.

It will be of direct assistance to well over one and a quarter million veterans, war orphans, and widows, and their families over the next year.

The increases in educational and training benefits and the new expanded programs to reach and assist the educationally disadvantaged, contained in this bill, are simple justice—and are long overdue—in light of the past sacrifices and future promise of these veterans.

For an annual cost of about 2 percent of our yearly expenditures to wage the Vietnam war, we will be able to meet the education and training needs of a significant segment of our population.

Many of our present veterans are in desperate need of encouragement and assistance at this critical time in their lives. And virtually all of the more than 80,000 new veterans each month are college age and are highly susceptible to encouragement and assistance in improving and acquiring the knowledge and skill which will enable them to compete successfully in today's increasingly specialized and competitive job market.

I wish to thank the distinguished majority and minority leaders for their outstanding cooperation in securing such speedy passage of this omnibus bill—H.R. 11959.

I am extremely grateful to all of my colleagues on the Veterans' Affairs Subcommittee and on the full Labor and Public Welfare Committee for their outstanding bipartisan cooperation and support in the consideration of the 10 bills which have been included, in part or in whole, in this omnibus veterans education and training bill.

I wish to congratulate Senator YARBOROUGH on his great achievement represented by the passage of these major education and training allowance rate increases and the other proposals in title I of the bill.

He is owed the praise and tribute of all the veterans of this Nation for his unswerving leadership on these vital measures.

I would also like to commend the veterans' organizations for their valuable work on behalf of these measures.

Finally, and certainly not least in my gratitude, I wish to thank the Senator from Pennsylvania (Mr. SCHWEIKER); the ranking minority member of the Veterans' Affairs Subcommittee.

In all of the work of the subcommittee, Senator SCHWEIKER has been of the greatest assistance in our bipartisan effort to secure enactment of legislation to provide our veterans with the kind of education and training programs which they richly deserve and badly need.

The title was amended, so as to read: "An act to amend title 38, United States Code, to increase the rates of vocational rehabilitation, educational, and special training assistance allowances paid to eligible veterans and eligible persons under such title; to improve the flight training and farm cooperative programs; to provide educational assistance to veterans attending elementary school; to provide special assistance to educationally disadvantaged veterans; to provide for a predischarge education program and a veterans' outreach services program; to reduce under certain circumstances the number of semester hours that a veteran must carry in an institutional undergraduate college course in order to qualify for a full-time educational assistance allowance; and for other purposes."

Mr. YARBOROUGH. Mr. President, will the Senator yield?

Mr. MANSFIELD. Mr. President, who has the floor?

The PRESIDING OFFICER (Mr. GOLDWATER in the chair). The Senator from California.

Mr. CRANSTON. I yield to the Senator from Texas.

Mr. YARBOROUGH. Mr. President, I am grateful to the Senator from California for his kind words about my effort on this bill; but, as shown by the unanimous vote of the Senate, this was not the work of any one man nor even of our committee, as able as that work was, under the leadership of the Senator from California in the Subcommittee on Veterans' Affairs. Many people, in both parties, have worked on this bill. It was reported by our committee with a unanimous vote—members of both parties—because of the very low payments to the veterans of the cold war and Vietnam war, which have resulted in only one veteran out of five going to school.

I think the allowances the Senate has voted should be held in conference to the last penny. Anything else would be a denial of even a semblance of justice to these veterans who have borne the brunt of this conflict for so long.

I am especially thankful for the able work of the subcommittee. We had quorums constantly. We never called for executive sessions of the full committee or subcommittee without a quorum being present. That took united effort of Senators on both sides of the aisle. I am grateful to them, and I am thankful that this measure of justice for more than six million discharged veterans of the cold war, eligible under this bill to go to school, has been written into partial passage by the Senate passing the bill.

I am hopeful that the House will accept this and not call for a conference. If they will accept justice, they will accept this bill.

Mr. MANSFIELD obtained the floor.

Mr. HOLLAND. Mr. President, will the Senator yield?

Mr. MANSFIELD. Does the Senator wish to speak on the bill which was just passed?

Mr. HOLLAND. Yes.

Mr. MANSFIELD. I yield to the distinguished Senator from Florida.

Mr. HOLLAND. Mr President, I voted for this bill when it passed. It was the only recorded vote I was given a chance to cast. I cast it because I think that the facts require a substantial improvement in the level of payments to veterans of the Vietnam war and of the cold war.

I am not, however, in accord with the level of payments prescribed by this bill. I would have gladly voted for the amendment offered by my distinguished friend, the Senator from Delaware (Mr. WILLIAMS), if a rollcall vote had been required. I was busy on other business of the Senate and did not know that there was not to be a rollcall vote on that amendment.

Mr. President, I hope that in conference we will get a bill more in accord, in my opinion, with the needs of the veterans, their widows and dependents, and more in accord with the treatment given uniformly by our Nation—and given gratefully—to its veterans of further wars.

I wanted the RECORD to be clear on this because, while not only I but also others voted for this bill under the conditions which confronted us, I am sure a great many Senators do not feel that the level of payments permitted by this bill is in accord with the real situation now existing.

I thank the majority leader for yielding.

Mr. HANSEN. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. HANSEN. Mr. President, I, too, rise, as did the senior Senator from Florida, to point out my feelings. Had there been a rollcall vote on the amendment of the Senator from Delaware (Mr. WILLIAMS), I would have joined my distinguished and respected colleague from Florida. I say this, fully aware of the contribution that the GI bill has made to this country throughout the years. But I am not unmindful, in saying that, of the concerted effort that is presently being made in order to try to dampen the fires of inflation.

It is in that context that I am most disturbed over the action that has been taken by the Senate this afternoon. As the vote has disclosed, I supported the passage of this bill. I would hope, though, that as the bill goes to conference, our conferees will be keenly aware of the great concern that the President of the United States must give our country's fiscal position. I hope we will not make it necessary for the President to have to veto a bill that has such a great deal of merit. I am told that if the action taken by the Senate should prevail, then he will have little choice except to veto this measure; and, in my opinion, that would be most unfortunate. It would be unfortunate because it would deny needed aid that can go to veterans in order to enable them to continue their education, and I know how important that is.

But it is equally important that we take cognizance of the fact that a great many people in the country today on fixed incomes are sorely strapped because of inflation; they are caught up in a situation that makes it extremely difficult for them to stretch their funds far enough to buy even the basic necessities of life in order to support their families. We must keep this in mind as we deal with measures which can badly unbalance the budget.

With that stark fact before us, I simply want to record my hope about the responsible position that I think should be taken by our conferees when they meet with the representatives of the other body in trying to resolve the differences between the cost of these two bills.

I thank the distinguished majority leader for yielding to me.

Mr. MANSFIELD. Mr. President, I yield to the distinguished senior Senator from Iowa (Mr. MILLER) at this time, and at the conclusion of his remarks, I will yield automatically to the distinguished senior Senator from Delaware (Mr. WILLIAMS).

Mr. MILLER. I thank the Senator from Montana.

Mr. President, I, too, joined in voting for the bill which has just been passed by the Senate. At the same time, I think I should truthfully state that I am deeply concerned about the percentage of increases reflected in the bill.

The President of the United States appointed a commission to look into the scale of benefits and recommend the increases that would be indicated, not only to take into account the inflation that has occurred during the last 2 years, since the last increase in veterans' benefits was passed, but also to provide a hedge against future inflation. That commission came out with a recommendation which was relatively modest.

The House, in turn, increased the scale of benefits considerably over the commission's and the President's recom-

mendation. I would prefer it if the Senate had kept within the House framework on these benefits. But instead of doing so, the committee of the Senate reported the bill with a great increase over and above what the House itself had set.

When the bill goes to conference, I hope that the Senate conferees will take into account that the House rates of increase are not only more than enough to take care of inflation that has occurred but also very substantial as a hedge against future inflation, and that if they do not go along with the House rates, there is likelihood that the President will veto this bill. If the President should not veto the bill, the very least he would have to do would be to cut back in some other programs where there is some administrative discretion. There already has been a cutback in some programs. Others have been held level. I am afraid that some of the people who voted for the large increase in this bill failed to take into account that Congress, earlier this year, set a maximum spending level for the President of the United States to keep within. In order to do so, he will have to squeeze other programs which other Members of Congress do not want squeezed. In other words, Mr. President, we cannot have our cake and eat it, and I hope the conferees will operate accordingly.

Mr. WILLIAMS of Delaware. Mr. President, I thank my colleagues for their remarks.

Those of us who supported the lower figure in the House bill took the only possible course we had in this instance, and that is to send this bill to conference. Having failed in our objective of rolling the increases back to the level as originally provided in the House bill we were confronted with the choice of defeating the bill in its entirety or of sending it to conference in the hope that we could have it readjusted.

I stated earlier, and the Senator from Iowa has pointed out, that since we have placed the President in a straitjacket of expenditure ceilings, we in Congress have a responsibility to do our part and either hold within those ceilings or spell out those areas in which it plans to make reductions. Thus far all that the Senate has done is to outline its plans for more spending.

The approval of the bill by conference in the form it has just passed the Senate would not help veterans because it would leave the President no choice but to veto the bill. I think the veto would be sustained, and in that event no benefits would go to the veterans.

I hope the conferees recognize this point and that they will try to bring back a bill in line with the budget estimate and more nearly what we can afford. It is with that thought in mind that I joined Senators in sending the bill to conference so that we could have another chance of getting a reasonable bill.

The fact the bill passed without any dissenting votes should not mislead the conferees.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. JAVITS. Mr. President, I think the debate made very clear the degree to which we understood the President's problem, and we ask him also to understand our problem. I am the ranking minority member of the committee, as Members of the Senate know. I hope very much we will be able to produce a result that the President can sign into law. I know that will be one of the objectives of the conferees. Mr. President, I assure Senators that as far as I am concerned I will make every effort in this regard.

Several Senators addressed the Chair.

Mr. MANSFIELD. Mr. President, I think I have the floor.

There has been much discussion on this bill.

Mr. YARBOROUGH. Mr. President, will the Senator yield?

Mr. MANSFIELD. I will yield once more, briefly.

Mr. YARBOROUGH. Mr. President, this discussion has come up after the bill has been passed by a vote of 77 to nothing. It has been said that the President will veto the bill. I do not believe that for 1 minute. If these gentlemen have been told that by the President, certainly I believe it, but we have had only opinions.

The President has said the cost will be $393 million. The Vietnam war is costing us $30 billion. My estimate from various committee members is that we are spending $36 billion.

It is inconceivable to me that the President would veto a bill that is only 1 percent of the cost of the war in Vietnam, and which would mean so much to these veterans who are shedding their blood in fighting this war for all of us. It is inconceivable to me that the President would not spend 1 percent more in order to let them go to school. I believe he will sign the bill. He is a veteran himself of World War II. He has had wide experience and I do not believe he would turn his back on the veterans. I shall stand by this bill in conference. I do not believe the President would veto the bill.

Mr. HOLLAND. Mr. President, will the Senator from Montana yield?

Mr. MANSFIELD. I yield to the Senator from Florida.

Mr. HOLLAND. I thank the Senator.

I think that the very point made by my distinguished friend from Texas is the point of several of us on the floor of the Senate, and the subject of discussion of many more Senators in the cloakroom, with respect to what was needed to correct this situation. Many of us voted for the bill because we recognized the fact that the present level of payments is entirely inadequate and that it should be raised. However, this is the only rollcall vote on which we have had a chance to cast our votes.

I want the RECORD to show what at least one Senator, who was not in touch with the President and does not know his thinking or plans, and who makes no pretense in that regard, thinks what he regards are much too high levels included in the bill. I hope we do get remedial legislation to help veterans. I am a veteran and both of my sons are veterans. They got their law degrees under this kind of help in the first GI bill.

But I think we are entitled to be heard and I would not have satisfied my conscience if I had not been heard on what I regard as the too-high levels incorporated in the provisions of the bill we have just passed. I hope those levels will be substantially reduced to a more acceptable figure in conference.

Mr. MANSFIELD. Mr. President, I have a few words to speak on this bill at this time. At the outset, I do wish to say I think this is a good bill, that it is long overdue, and that it achieves parity at long last for veterans.

I want to commend the Senator from California (Mr. CRANSTON) and the distinguished chairman of the committee, the Senator from Texas (Mr. YARBOROUGH).

May I say that the Senate owes a deep debt of gratitude to the able and distinguished Senator from Texas (Mr. YARBOROUGH), the chairman of the Committee on Labor and Public Welfare. His unstinting devotion to the causes of our veterans and to the assistance they need in gaining an education has been exemplary. His record in this area is unsurpassed. Over the years Senator YARBOROUGH has distinguished himself so much in both the fields of veterans assistance and education assistance. Of course he is the author of the original cold war GI bill. And it is no wonder that here in the Senate RALPH YARBOROUGH has been referred to for years as "Mr. Veteran." Today's success—the Senate's improvement of the cold war GI bill benefits—should serve to enhance that reputation measurably.

I must say as well that the distinguished Senator from California (Mr. CRANSTON), the able chairman of the Veterans' Affairs Subcommittee, deserves equally high praise for his outstanding effort in behalf of this measure. His careful presentation, his strong and able advocacy assured its unanimous approval by the Senate. The veterans of this Nation, indeed, all Americans are in his debt.

The distinguished Senator from New York (Mr. JAVITS) must be commended also for his splendid cooperation and support. Our commendation goes as well to the distinguished Senator from Michigan (Mr. GRIFFIN), the distinguished Senator from Pennsylvania (Mr. SCHWEIKER), the distinguished Senator from Delaware (Mr. WILLIAMS) and to the many others who joined to offer their views, their support and their assistance.

The Senate may be proud of another fine achievement obtained efficiently and with full regard for the views of all Members. I think that returning veterans who have been going to college have been operating under a handicap, and certainly have not reached parity with those veterans who served in World War II, the Korean war, and after the Korean war. This is especially true in view of the tremendous increase in the cost of tuition at colleges today and, even further in light of the cost of living as well. This measure has been long overdue.

THE CALENDAR

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the calen-

dar, beginning with Calendar No. 488, and that the rest of the calendar be considered in sequence.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will proceed to state items on the calendar, beginning with Calendar No. 488.

PERISHABLE AGRICULTURAL COMMODITIES ACT, 1930, AMENDMENTS

The bill (H.R. 9857) to amend the provisions of the Perishable Agricultural Commodities Act, 1930, to authorize an increase in license fee, and for other purposes was considered, ordered to a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91-490), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

SHORT EXPLANATION

This bill would amend the Perishable Agricultural Commodities Act to—

(1) Increase the maximum annual license fee to $100 (from $50); and

(2) Extend the retailer and frozen food broker exemptions to those doing less than $100,000 worth of covered business annually (now $90,000).

BACKGROUND

The basic objective of the Perishable Agricultural Commodities Act is to establish a code of fair trading practices governing the marketing in interstate and foreign commerce of fresh and frozen fruits and vegetables and cherries in brine and to aid in the enforcement of contracts for marketing these commodities. Under this act, it is unlawful for any commission merchant, dealer, or broker in connection with any transaction in interstate or foreign commerce to engage in certain unfair trade practices. Among these are:

(1) To reject or fail to deliver in accordance with terms of his contract, without reasonable cause;

(2) To dump, discharge, or destroy without reasonable cause any lot received on consignment;

(3) To fail or refuse to account correctly and to pay promptly for any lot;

(4) To fail to perform any specification or duty arising out of a contract without reasonable cause;

(5) To misrepresent or misbrand as to character, kind, grade, quality, quantity, size, pack, weight, condition, degree of maturity or State, country, or region of origin; and

(6) To fail to maintain adequate records and accounts.

Enforcement is through a system of licenses. Every commission merchant, broker, and dealer, including certain retailers and processors, operating subject to the act is required to be licensed. Most applicants encounter no problems in obtaining licenses. However, the Secretary may deny licenses to certain individuals for specific reasons spelled out in the law, including false or misleading statements in the application, a history of repeated violations of the act, the criminal record of the applicant, the failure to pay reparation awards, or the failure to furnish required surety bonds. Licenses may be suspended or revoked for violations of the act.

There are two main phases of activity in administering the act. First, the Secretary is authorized to hear and decide disputes which involve claims for damages resulting from any violation of the fair trading principles. Complaints are filed with the Secretary; investigations are made as warranted; and, if possible, amicable settlements are worked out between the parties. If a dispute cannot be settled informally, it may become a formal proceeding in which the parties are given an opportunity to submit evidence in support of their positions, either at an oral hearing or by written submissions of evidence. If the Secretary concludes that a violation has occurred, he determines the amount of damages sustained and issues an order requiring the offender to pay such damages to the injured party by a specified date. The offender's license is automatically suspended unless he pays the amount of the award or appeals the Secretary's decision to a district court of the United States, as provided in the act.

The second main phase of activity relates to disciplinary measures. These include administrative proceedings by the Secretary to suspend or revoke licenses for violations of the act, and court actions to collect civil penalties for operating without a license, together with injunctions to restrain further operations.

The act is self-supporting from annual license fees. These fees are deposited in a special PACA fund and all costs of administration of the act—except for legal services—are financed from these fees.

The Secretary is authorized to set the level of the annual license fee, within the maximum provided in the act, at an amount sufficient to provide the revenue to meet anticipated expenses for administering the act. Before the license fee has been raised, the Secretary has published the proposed rate and given all interested persons an opportunity to file their comments or objections. The present maximum fee authorization of $50 was established in an amendment to the act of October 1, 1962. Under this authorization, the annual license fee was increased to $36 on January 1, 1963, to $42 on January 1, 1965, and to $50 on January 1, 1969.

NEED FOR INCREASE IN MAXIMUM LICENSE FEE

The statutory ceiling on license fees must be raised because of (1) the declining number of firms operating subject to license, and (2) the increasing cost of administering the act. At present, the number of firms licensed is approximately 19,285, compared with an alltime peak of about 27,000 in 1956. This trend toward fewer licensees results from the continuing mergers and consolidations in the fruit and vegetable industry and the closing of many small firms. During the past 5 years, for example, the net decline in the number of firms licensed has averaged over 670 per year.

Despite the decline in number of firms licensed, the number of complaints filed under the act and the requests for advice and assistance have remained relatively constant. During the past fiscal year, for example, a total of 2,272 reparation complaints were handled by the Department under this act. Informal amicable settlements were arranged in 930 such cases resulting in payments to the parties of approximately $2.3 million. In addition, 341 formal orders were issued by the Department's judicial officer awarding reparations amounting to over $777,000. The Department makes no charge for the handling of these complaints.

Also, more than 9,800 requests for advice were received last year from members of the industry seeking assistance, mostly with problems concerning marketing contracts. Many disputes are settled on the basis of these informal recommendations by the Department and the necessity of filing complaints is avoided. The Department also conducted 15 marketing seminars for various trade groups during this period to encourage compliance with the law, minimize marketing disputes, and discuss procedures followed in administering the act.

Costs of administration have been increasing, largely because of adjustments in employees' salary scales and fringe benefits which account for over 80 percent of the expenditures under this act. The costs have increased even though there has been a reduction in the number of employees engaged in the administration of the act, and this number now is at the lowest level in over 10 years.

The PACA fund incurred a deficit of over $12,000 in fiscal year 1968 and a deficit of approximately $58,000 during the first 6 months of fiscal year 1969. With the increase in the license fee that became effective January 1, 1969, it is estimated that income and expenditures for fiscal year 1969 as a whole about balanced out. With continued decline in numbers of licensees it is likely that deficits will occur in fiscal years 1970 and 1971. The Department estimates it will be necessary to increase the license fee again in the amount of approximately $10 about January 1, 1971, in order to obtain sufficient revenue to meet the anticipated costs of administration. The small reserve in the PACA fund would soon be depleted if such deficits continue.

NEED TO INCREASE THE EXEMPTION FOR RETAILERS AND FROZEN FOOD BROKERS

Since the Perishable Agricultural Commodities Act was enacted in 1930, the great majority of food retailers have always been exempt from the licensing provisions. From 1930 to 1962 this exemption was expressed in terms of tonnage of perishable agricultural commodities purchased by retailers. When the act was amended in 1962, the exemption was broadened and was converted from a tonnage to a dollar volume basis. At present, all retailers are exempt whose purchases of perishable agricultural commodities amount to $90,000 or less per year.

Also, in 1962 an exemption from license was added for the first time for frozen food brokers who negotiate sales for and on behalf of vendors and whose sales of frozen fruits and vegetables have an invoice value of $90,000 or less per year.

H.R. 9857 would raise the exemption for both retailers and frozen food brokers to $100,000. The proposed increase in the amount of the exemption would approximate the increase in the index of wholesale food prices that has taken place since 1962 when the $90,000 exemption was established.

There are an estimated 200,000 retail food firms operating at present. Only approximately 4,000 of these firms currently are licensed under PACA in view of the exemption which excludes all those whose purchases of perishable agricultural commodities total less than $90,000 per year. Since fresh and frozen fruits and vegetables account, on the average, for about 9 percent of retail food store gross sales, this means that raising the exemption to $100,000 would exclude most retail firms with gross sales of less than $1.5 million per year. Therefore, it is estimated that fewer than 2 percent of all food retail firms would be subject to license under the bill as proposed.

The Department's records indicate that there are fewer than 300 frozen food brokers currently subject to license under PACA. Consequently, an increase in the exemption for these brokers from $90,000 to $100,000 would affect a relatively small number of such firms.

COST

This bill involves no additional cost to the Government. In fact, its enactment would continue the self-financing principle that

has been followed under the PACA program since its inception. Conversely, the failure to enact this bill would result in a continued deficit in the PACA fund which would in time require an appropriation by the Congress.

RESOLUTION PASSED OVER

The resolution (S. Res. 277) to refer the bill (S. 202) entitled "A bill to provide that the United States disclaims any interest in a certain tract of land" to the chief commissioner of the Court of Claims for a report thereon was announced as next in order.

Mr. MANSFIELD. Over.

The PRESIDING OFFICER. The bill will be passed over.

FRANCIS ASBURY STATUE

The bill (S. 1968) to authorize the Secretary of the Interior to permit the removal of the Francis Asbury statue, and for other purposes, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 1968

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior is authorized to permit the removal of the statue of Francis Asbury erected, pursuant to the Act of February 28, 1919 (40 Stat. 1213), on lands in the District of Columbia now under the administrative jurisdiction of the National Park Service, and to convey without compensation title to said statue to the Methodist Corporation, a religious corporation duly organized and existing under the laws of the District of Columbia, upon such terms and conditions as the Secretary deems necessary. The removal of the statue and restoration of the site to the satisfaction of the Secretary shall be without cost to the United States.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–493), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

HISTORY

The bronze, equestrian statue of this pioneer Bishop of the Methodist Church was erected by the Francis Asbury Memorial Association, and was dedicated on October 15, 1924. Its present location, at 16th and Mt. Pleasant Streets NW., was selected because of its proximity to the Francis Asbury Methodist Church, erected to the memory of the Bishop. This church has since moved, so that the original purpose in erecting the statue on this site would no longer be served.

The original legislation authorized the erection of the statue on public grounds in the District of Columbia. Therefore, the statue cannot now, by administrative action, be moved and placed on private grounds. Such action was requested by the presiding Bishop, and the committee for the development of the new Methodist Center. Further, the statue is the property of the United States and, as such, permanent disposition by gift or otherwise requires congressional authorization. S. 5968 would provide the necessary authorization both for the removal of the statue to private grounds and for conveyance of title to the Methodist Corp. It provides that the removal of the statue and restoration of the site shall be at no cost to the United States.

Enactment would result in a minor saving to the United States for semiannual cleanings of the statue.

COST

The measure specifically provides that removal of the statue and restoration of the site to the satisfaction of the Secretary shall be without cost to the United States.

GREAT SMOKY MOUNTAINS NATIONAL PARK

The bill (H.R. 11609) to amend the act of September 9, 1963, authorizing the construction of an entrance road at Great Smoky Mountains National Park in the State of North Carolina, and for other purposes, was considered, ordered to a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (S. 232) to promote the economic development of the Trust Territory of the Pacific Islands was announced as next in order.

Mr. MANSFIELD. Over, momentarily.

The PRESIDING OFFICER. The bill will be passed over.

FREDERICK DOUGLASS HOME

The bill (H.R. 5968) to amend the act entitled "An act to provide for the establishment of the Frederick Douglass home as a part of the park system in the National Capital, and for other purposes," approved September 5, 1962, was considered, ordered to a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–496), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

LEGISLATIVE BACKGROUND

In 1962, the Congress considered and enacted legislation authorizing the Secretary of the Interior to designate the former home of Frederick Douglass, known as Cedar Hill, for preservation as a part of the park system of the National Capital (Public Law 87–633, 76 Stat. 435). Subsequently, on June 25, 1964, the house, located at 1411 W Street SE., and approximately 8 acres of land were deeded, without cost, to the Federal Government by the Frederick Douglass Memorial and Historical Association.

At the time of the authorization, it was recognized that extensive repairs might be necessary. The committee report on the legislation (H. Rept. 2190—87th Cong.) stated that "Cedar Hill appears to be structurally sound but it is badly in need of repairs"; however, the funds authorized to be appropriated to rehabilitate and refurbish it were limited to $25,000. It was anticipated that additional costs might very likely be incurred, but it was hoped that they could be absorbed from donated funds expected to be raised for this purpose. Unfortunately, both premises upon which the modest authorization was founded proved faulty. First, an intensive study revealed extensive deterioration of the structure due to damage caused by water and insects, and second, the anticipated donations never materialized.

The result of these regrettable, but unforeseeable, circumstances has been that Cedar Hill has been closed to the public, that it is continuing to deteriorate, and that the objective of the Congress in making it a part of the national park system has been thwarted. If enacted, H.R. 5968 will rectify the situation and enable the National Park Service to make it a meaningful and useful park facility.

NEED

No action which the Congress can take can make a place in history for any man. That, he must do for himself. But the Congress can, by legislative action such as this, recognize the significance of a man's contributions and, in so doing, it can help to make them meaningful examples for the guidance and inspiration of generations to follow. It is highly appropriate that the Congress should commemorate the memory of Frederick Douglass. He was the kind of man who should be remembered.

Frederick Douglass was born a slave; he struggled for his liberty. A Negro, he suffered all of the torments of the people of his race, but he converted his frustrations into constructive energy which was the driving force of his character. Raised in ignorance, he educated himself; reared in complete poverty, his industry brought him wealth and independence; lacking in social standing, he became one of the foremost orators and powerful writers of his age. Facing all of the prejudices against his race in his times, he became a champion in the political arena. All of this did not come without effort or hardship, but it came because his ideals were unimpeachable and his methods of achieving them were compatible with the American system.

Cedar Hill is symbolic of the achievements of this 19th century leader. It sits on the crest of a hill in a residential neighborhood of the Anacostia section of the District of Columbia. With proper development of appropriate visitor facilities (including a visitor contact station, parking space, and the like, it could be a significant unit of the park system in the National Capital region. Through interpretive devices, this man and his contributions could assume their proper place in the historic panorama depicted by the various historic sites located throughout the Nation and visitors of all ages and races could benefit from the experience associated with a tour of the home.

Although the extensive restoration contemplated by H.R. 5968 was not the objective of the original act in 1962, it is apparent that minor repairs, will not adequately improve the property to make it useful as an interpretive historic facility. It is now unsafe for visitors to enter the house, because of the deterioration of the structural members, and most of the furnishings and memorabilia associated with Frederick Douglass have been removed to protect them from destruction. If the site is to be useful, a new approach is essential; a smaller investment would be inadequate to accomplish the objective.

EDUCATIONAL AND CULTURAL BENEFITS

In addition to being symbolic of Frederick Douglass' achievements, Cedar Hill will create a living memorial to this outstanding American. A memorial which will also be functional by providing both educational and cultural benefits.

As presently planned, the home will contain more than 1,300 books and over 500 artifacts; along with Mr. Douglass' personal papers, his speeches, and his writings. The visitors center, as planned, will contain a room suitable for community and educational purposes. By equipping and furnishing Cedar Hill in such a manner, the Na-

tional Park Service believes that maximum use may be obtained of the home. Students will be allowed to study and conduct research in the extensive library, while groups will be able to use the visitors center.

The committee was assured that the Park Service had adequate existing authority to implement the functional as well as the interpretive use concept.

The committee was further assured that the home would "indeed be a first-rate memorial" in commemorating this outstanding man.

COST

To provide a meaningful facility, it will be necessary to restore completely the buildings and grounds so that they reflect Cedar Hill as Frederick Douglass knew it. This will involve the reconstruction of the carriage approach to the house, the installation of new heating and utility systems, and the general restoration of the interior and exterior of the home. In addition, the plan for the site includes the construction of a visitor contact station and the installation of modern interpretive devices.

All of these undertakings require substantial sums of money. H.R. 5968, as recommended, increases the authorization for this purpose from the present $25,000 limitation to $413,000—an increase of $388,000. On the basis of current estimates, this should make the Frederick Douglass home a most attractive memorial to an outstanding American.

COMMITTEE RECOMMENDATION

The Committee on Interior and Insular Affairs recommends the enactment of H.R. 5968.

PACIFIC ISLANDS TRUST TERRITORY

Mr. MANSFIELD. Mr. President, I now ask unanimous consent that the Senate proceed to the consideration of Calendar No. 492, S. 232.

The PRESIDING OFFICER. The bill will be stated by title.

The ASSISTANT LEGISLATIVE CLERK. A bill (S. 232) to promote the economic development of the Trust Territory of the Pacific Islands.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Interior and Insular Affairs, with amendments, on page 2, line 23, after the word "on", strike out "outstanding and insert "comparable"; and on page 3, line 20, after the word "of", where it appears the second time, insert "the outstanding amount of"; so as to make the bill read:

S. 232

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. This Act may be cited, as the "Trust Territory of the Pacific Islands Economic Development Fund Act of 1969."

SEC. 2. For the purpose of promoting economic development in the Trust Territory of the Pacific Islands, there is hereby authorized to be appropriated to the Secretary of the Interior to be paid to the government of the Trust Territory of the Pacific Islands for the purpose of this Act such amount as will result in a Trust Territory Economic Development Loan Fund of $5,000,000. The Trust Territory Economic Development Loan Fund means the fund established pursuant to section 3 of Public Law 88-487, as augmented by further Federal grants prior to the date of enactment of this Act.

SEC. 3. Prior to receiving any funds pursuant to this Act the government of the Trust Territory of the Pacific Islands shall submit to the Secretary of the Interior a plan for the use of such funds which meets the requirements of this section and is approved by the Secretary. The plan shall set forth the policies and procedures to be followed in furthering the economic development of the Trust Territory of the Pacific Islands through a program which shall include and make provision for loans and loan guarantees to promote the development of private enterprise and private industry therein through a revolving fund for such purposes: *Provided,* That the term of any loan made pursuant to the plan shall not exceed twenty-five years; that such loans shall bear interest (exclusive of premium charges for insurance, and service charges, if any) at such rate per annum as is determined to be reasonable and as approved by the Secretary, but in no event less than a rate equal to the average yield on comparable marketable obligations of the United States as of the last day of the month preceding the date of the loan, adjusted to the nearest one-eighth of 1 per centum, which rate shall be determined by the Secretary of the Treasury upon the request of the authorized agency or agencies of the government of the Trust Territory of the Pacific Islands; and that premium charges for the insurance and guarantee of loans shall be established at rates which will be adequate to cover expenses and probable losses related to the loan guarantee program.

SEC. 4. No loan or loan guarantee shall be made under this Act to any applicant who does not satisfy the agency or agencies administering the plan that financing is otherwise unavailable on reasonable terms and conditions. The maximum participation in the funds made available under section 2 of this Act shall be limited (a) with respect to all loans, to that degree of participation prudent under the circumstances of individual loan but directly related to the minimum essential participation necessary to accomplish the purposes of this Act, but in no event shall more than 25 per centum of the funds actually appropriated by the Congress be devoted to any single project, (b) with respect to loan guarantees, to a guarantee of 90 per centum of the outstanding amount of any loan: *Provided,* That, with respect to loan guarantees, the reserves maintained by the agency or agencies for the guarantee shall not be less than 25 per centum of the guarantee.

SEC. 5. The plan provided for in section 3 of this Act shall set forth such fiscal control and fund accounting procedures as may be necessary to assure proper disbursement, repayment, and accounting for such funds.

SEC. 6. The High Commissioner of the Trust Territory of the Pacific Islands shall make an annual report to the Secretary of the Interior on the administration of this Act.

SEC. 7. The Comptroller General of the United States, or any of his duly authorized representatives, shall have access, for the purpose of audit and examination, to the books, documents, papers, and records of the agency, or agencies, of the government of the Trust Territory of the Pacific Islands administering the plan that are pertinent to the funds received under this Act.

Mr. MANSFIELD. Mr. President, this is a long overdue piece of legislation affecting the authority and the responsibility which rests on the Government of the United States in all the Trust Territory of the Pacific Islands. It is my belief that we have neglected this most important area. It is my belief also that we should go to extraordinary lengths to make sure that the inhabitants of these islands, who are few in number occupying a tremendously large area, are given every possible attention and every consideration.

It is my hope that the lack of care and consideration which has marked our jurisdiction of the Trust Territory in the Pacific Islands since we assumed control of that area at the end of World War II will be recognized and that in the future we will develop deeper, more personal, and better interests in the welfare of these people. They deserve to be treated as Americans even if they are not so considered in name.

This measure is designed to focus our attention on this long neglected responsibility. Strengthening the economic well-being of this area is only the beginning. We must do more and we shall.

Mr. President, I ask unanimous consent that the committee amendments be considered en bloc.

The PRESIDING OFFICER. Without objection, the amendments are considered and agreed to en bloc.

The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and the third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91-495), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of S. 232, introduced by Senators Burdick, Metcalf, Moss, Stevens, and Bellmon, as amended, is to establish a Trust Territory of the Pacific Islands Economic Development Loan Fund to promote the development of private enterprise and private industry in the trust territory. It would bring the total economic development authorization fund to a $5 million level.

This fund would be outside the ceiling limitation imposed on the trust territory by the act of June 30, 1954, as amended.

BACKGROUND

The Trust Territory of the Pacific Islands consists of the Caroline and Marshall Islands and all of the Marianas except Guam. Though it comprises 2,100 islands scattered over a 3 million-square-mile area its total land area is only 687 square miles. It has 90,000 inhabitants. The territory is administered by the United States under a trusteeship agreement with the Security Council of the United Nations approved by the President under authority granted by the Congress on July 18, 1947 (61 Stat. 397). The terms of that agreement (61 Stat. 3301) give the United States "full powers of administration, legislation, and jurisdiction" over the former Japanese-administered territory and obligate it to (1) "foster the development of such political institutions as are suited to the Trust Territory and * * * promote the development of the inhabitants of the Trust Territory towards self-government or independence," (2) "promote the economic advancement and self-sufficiency of the inhabitants," (3) "promote the social advancement of the inhabitants, and * * * protect the health of the inhabitants," and (4) "promote the educational advancement of the inhabitants." The U.S. authority is presently vested in a High Commissioner appointed by the President.

Public Law 88-487, among other things, granted approximately $369,000, which represented the balance in a federally financed

revolving fund for loans to private trading companies in the territory, to the local government "for use as a development fund within the trust territory of the Pacific Islands." This fund, assisted by subsequent grants totaling $550,000, has undertaken an economic development program of limited proportions.

NEED

In February 1967, a comprehensive economic study of the trust territory, prepared by the internationally known economic consulting firm of Robert Nathan Associates, was submitted to the High Commissioner. This study shows that economic resources of the trust territory are limited, yet with suitable guidance and assistance the potentials that exist can be developed. At the present time most of the population is in a subsistence economy. However, at least in the district centers and on Ebeye in the Marshall Island district, this pattern is changing and there is a significant movement into a limited cash economy.

During January 1968, Senator Burdick, chairman of the Territories Subcommittee, along with Senators Metcalf and Moss, made an inspection trip through Micronesia. Aside from a new fish freezing plant in the Palau district, a large cattle ranching enterprise on Tinian and a new first-rate tourist hotel on Saipan, both in the Mariana district, the subcommittee found almost no economic development in the territory. For the most part, the people of Micronesia rely on a subsistence agricultural and fishing economy, or on government input for cash. Economic resources in Micronesia are not large, however, opportunities for development do exist in agriculture, fishing, construction, wholesale and retail trade and services, tourism and travel, and air and sea transportation. These possibilities can only be realized if capital is made available with which to develop them.

The economic consultants who recently studied the trust territory have pointed out that local private capital from savings or from present private or governmental borrowing cannot meet the total needs. Nor are prospects of obtaining outside capital investment good, in view of the uncertainty of the political future of Micronesia. Thus, there is a definite need for a revolving loan fund such as that provided in the bill.

S. 232 is patterned after S. 1763, the Guam development loan fund bill, which passed the Senate on August 30, 1967.

A bill similar to S. 232 (S. 3073) passed the Senate in 1968 but was not acted upon by the House of Representatives.

UNIFORM RELOCATION ASSISTANCE AND LAND ACQUISITION POLICIES ACT OF 1969

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 485, S. 1. I do this so that the bill may be the pending business.

The PRESIDING OFFICER. The bill will be stated by title.

The ASSISTANT LEGISLATIVE CLERK. A bill (S. 1) to provide for uniform and equitable treatment of persons displaced from their homes, businesses, or farms by Federal and federally assisted programs and to establish uniform equitable land acquisition policies for Federal and federally assisted programs.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Government Operations, with amendments on page 2, line 6, after the word "Government", insert "(except the National Capital Housing Authority); in line 14, after the word "States," insert "the Trust Territories of the Pacific Islands,"; in line 17, after the word "means", insert "the National Capital Housing Authority,"; in line 19, after the word "and", insert "any State"; on page 3, after line 6, strike out:

(1) any person who is the owner of a business which moves from real property or is discontinued on or after the effective date of this Act prescribed in section 253(a) as a result of the acquisition or reasonable expectation of acquisition of such real property, in whole or in part, by a Federal or State agency;.

And, in lieu thereof, insert:

(1) any person who is the owner of a business, as defined by section 106 of this Act, and who, on or after the effective date prescribed in section 253(a), (A) moves or discontinues such business or an establishment of such business or (B) moves any outdoor advertising display, as a result of the acquisition or reasonable expectation of acquisition of real property, in whole or in part, by a Federal or State agency;.

In line 23, after the word "date", strike out "of this Act" and insert "prescribed in section 253(a);".

On page 4, line 6, after the word "date", strike out "of this Act," and insert "prescribed in section 253(a),"; in line 9, after the word "agency", strike out the comma and "or which moves from such dwelling as a result of the acquisition or reasonable expectation of acquisition by such Federal or State agency of other real property on which such family conducts a business or farm operation;" in line 16, after the word "date", strike out "of this Act," and insert "prescribed in section 253(a)"; in line 19, after the word "agency", strike out the comma and "or who moves from such dwelling as a result of the acquisition or reasonable expectation of acquisition by such Federal or State agency or other real property on which such individual conducts a business or farm operation"; in line 24, after "(5)" insert "a nonprofit organization which moves from real property on or after the effective date prescribed in section 253 (a) as a result of the acquisition or reasonable expectation of acquisition of such real property, in whole or in part by a Federal or State agency, or,".

On page 5, in line 6, after the word "date", strike out "of this Act" and insert "prescribed in section 253(a)"; after line 16, strike out:

SEC. 106. The term "business" means any lawful activity conducted primarily (1) for the purchase and resale of products, commodities, or any other personal property; (2) for the manufacture, processing, or marketing of any such property; (3) for the cultivation, processing, and marketing of timber; or (4) for the sale of services to the public. Such term does not include a farm operation or the activity of an investor in acquiring or holding real property for resale for gain.

And, in lieu thereof, insert:

SEC. 106. The term "business" means any lawful entity conducted primarily (1) for the purchase and resale of products, commodities, or any other personal property; (2) for the manufacture, processing, or marketing of any such property; (3) for the cultivation, processing, and marketing of timber; (4) for the sale of services; or (5) for assisting in the sale, resale, or marketing of products, commodities, personal property, or services by the erection and maintenance of outdoor advertising displays. Such term does not include a farm operation or the business of an investor in acquiring or holding real property for resale for gain.

On page 7, line 6, after the word "date", strike out "of this Act" and insert "prescribed in section 253(a)"; in line 15, after the word "profit", insert "or any Indian tribe, band, or group."; on page 8, line 16, after the word "Act." insert:

Notwithstanding any other provision of this Act, any business, as defined by section 106 of this Act, which is not being displaced shall be eligible for actual moving expenses with respect to its outdoor advertising displays being moved as a result of the acquisition or reasonable expectation of acquisition of real property, in whole or in part, by a Federal or State agency. No other payment therefor shall be made under subsections (b)–(f) of this section.

On page 9, line 5, after the word "established", strike out "by the head of the Federal agency," and insert "in accordance with the President's regulations issued under section 241 of this Act,"; in line 16, after the word "the", where it appears the first time, strike out "business or $5,000, whichever is the lesser. In", and insert "business, except that such payment shall not be less than $2,500 nor more than $5,000. Notwithstanding the preceding sentence, in"; in line 19, after the word "is", strike out sixty two" and insert "sixty"; in line 20, after the word "be", strike out "increased by" and insert "in"; in line 21, after the word "to", strike out "twice" and insert "three times"; in line 22, after the word "or", strike out "$5,000," and insert "$6,000,"; in line 23, after the word "is", strike out "the lesser", and insert "less"; on page 10, line 18, after the word "payment", strike out "in the amount of $1,000"; in line 21, after "$10,000", strike out "a" and insert "per"; in the same line, after the word "year." insert:

This payment shall be in an amount equal to the average annual net earnings of the farm operation, except that such payment shall not be less than $2,500 nor more than $5,000. Notwithstanding the preceding sentence, in the case of a displaced person who is sixty years of age or over, this payment shall be in an amount equal to three times the average annual net earnings of the business or $6,000, whichever is less.

In line 8, after the word "longer", strike out "a viable" and insert "an"; in line 19, after the word "to", insert "a displaced person who is"; on page 12, line 5, after the word "chases", strike out "and occupies"; in line 19, after the word "property" insert "(except that this provision requiring occupation of a dwelling ninety days prior to initiation of negotiations shall not apply to a displaced person within the meaning of section 233 of this Act)." in line 22, after the word "Act).", strike out "The additional" and insert "Such"; in line 24, after the word "amount", strike out "which" and insert "which—"; at the top of page 13, insert:

(A) is necessary to make the down payment on the purchase of; or

(B)

On page 13, line 11, after the word "facilities", strike out "Such payment" and insert "A payment made pursuant to subparagraph (B) of this paragraph"; in line 14, after the word "in", strike out "a"; in the same line, after the word "housing", strike out "project"; on page 14, line 3, after the word "section", insert "or under section 231 of this Act"; after line 8, insert:

(h) The payments provided for in this section shall be made administratively by the head of the Federal agency acquiring real property, and none of the provisions of this section shall in any way affect any condemnation action or the just compensation to be determined or paid to the landowner in such action.

On page 15, line 8, after the word "include", strike out the comma and "to the maximum extent practicable,"; in line 25, after the word "displaced", strike out "business and displaced", and insert "businesses, nonprofit organizations, and"; on page 16, at the beginning of line 5, strike out "Housing Administration home acquisition program of the National Housing Acts," and insert "housing programs,"; on page 17, line 4, after the word "contribute", strike out "the first $25,000 of the cost of providing such payments and assistance to any person displaced prior to July 1, 1972." and insert "to the cost of providing such payments and assistance to any person displaced prior to July 1, 1972, an amount not to exceed (1) the first $25,000 of such cost if the displaced person, at the time of displacement, lives in a State which is contiguous to at least one other State, or (2) the first $27,500 if the displaced person, at the time of displacement, lives in a State which is not contiguous to any other State."

On page 17, after line 13, strike out:

FUND AVAILABILITY

SEC. 214. Funds appropriated or otherwise available to any Federal agency for the acquisition of real property or any interest therein shall be available also for obligation and expenditure to carry out the provisions of this title.

On page 18, line 14, after "211(a)", insert "including actual moving expenses for moving outdoor advertising displays,"; at the beginning of line 21, strike out "and (d)(2)" and insert "(d), (e)(2), and (f)"; on page 19, line 2, after the word "available", strike out the comma and "to the extent that can reasonably be accomplished,"; in line 13, after "211", strike out "(d)" and insert "(e)"; in line 19, after "211", strike out "(d)" and insert "(e)"; on page 20, line 1, after the word "of", strike out "persons," and insert "families and individuals," at the beginning of line 17, strike out "contribute the first $25,000 of the cost of providing such payments to any person displaced prior to July 1, 1972." and insert: "contribute, to the cost of providing such payments to any person displaced prior to July 1, 1972, an amount not to exceed (1) the first $25,000 of such cost if the displaced person, at the time of displacement, lives in a State which is contiguous to at least one other State, or (2) the first $27,500 if the displaced person, at the time of displacement, lives in a State which is not contiguous to any other State.".

On page 21, line 4, after the word "subsection", strike out "No State agency need agree to make any relocation payment in excess of $25,000 to any displaced person in order to receive the assistance authorized by this subsection."; and insert "In order to receive the assistance authorized by this subsection, no State agency need agree to make any relocation payment in excess of (1) $25,000 to a displaced person if, at the time of displacement, the person lives in a State which is continguous to at least on other State, or (2) $27,500 to a displaced person if, at the time of displacement, the person lives in a State which is not contiguous to any other State."

On page 22, after line 23, insert:

(g) The provisions of this section shall not be applicable to any situation which comes within the provisions of the first sentence of paragraph (8) of section 15 of the United States Housing Act of 1937 (42 U.S.C. 1415(8)).

On page 23, line 5, after the word "AMENDED" insert "AND TITLE I OF THE DEMONSTRATION CITIES AND METROPOLITAN DEVELOPMENT ACT OF 1966".

In line 13, after the word "or" insert "as a result of carrying out a comprehensive city demonstration program under title I of"; after line 17, insert:

DISPLACEMENT BY CERTAIN OTHER PROGRAMS

SEC. 233. Notwithstanding any other provision of this title, a person—

(1) who moves or discontinues his business, moves other personal property, or moves form his dwelling on or after January 1, 1969, and before the effective date prescribed in section 253(a), as the result of the contemplated demoltion of structures or the construction of improvements on real property acquired, in whole or in part, by a Federal agency; and

(2) who has lived on, or conducted a business on, such real property for at least one year prior to the date of enactment of this Act;

may be considered a displaced person, for purposes of sections 211 and 212 of this title, by the head of the agency acquiring the real property if—

(A) the head of the agency determines that such person has suffered undue hardship as the result of displacement from the real property; and

(B) the Federal Government acquired and held such property for at least 5 years prior to the effective date prescribed in section 253(a).

On page 24, line 16, after the word "of", strike out "this title," and insert "title II of this Act,"; on page 25, line 7, after the word "moving", strike out "or discontinuing"; in line 8, after the word "operation", strike out "at a price which is less than its replacement value, the amount of the difference between such price and such value" and insert "and replaces such property at the new location at a price exceeding any sum received from disposing of such property, the amount of the difference between such prices not to exceed the estimated cost of moving the property or its market value, whichever is less"; on page 26, line 4, after the word "the", insert "Federal"; on page 28, line 13, after "107", insert "(b) and (c)"; in line 24, after "Sec. 253.", strike out "This" and insert "(a) Except as provided in subsection (b), this title"; on page 29, line 2, after the word "its", strike out "enactment, except that sections 231, 232," and insert "enactment."; at the beginning of line 4, insert "(b) Sections 231, 232,"; in line 5, after "(9)", strike out "and (10)", and insert "(10), and (11)"; after line 14, insert:

FUND AVAILABILITY

SEC. 254. Funds appropriated or otherwise available to any Federal agency for the acquisition of real property or any interest therein shall be available also for obligation and expenditure to carry out the provisions of this title.

On page 30, line 17, after the word "property.", insert "A copy of the appraisel report shall be furnished the landowner."; in line 25, after the word "decrease", insert "or increase"; on page 31, line 8, after "(5)", strike out "No" and insert "Unless the head of the Federal agency determines that an emergency exists and severe or irreparable damages or injury may be caused by complying with this subsection, no"; in line 15, after "26," strike out "1961" and insert "1931"; on page 33, line 9, after the word "of", strike out "1933" and insert "1933, as amended"; in the same line, after "(48 Stat. 70", strike out the comma and "as amended"; on page 36, line 24, after the word "the" strike out "earlier." and insert "earlier, unless such pro rata portion of the taxes may be cancelled under State or local laws."; on page 39, line 22, after the word "the", strike out "earlier" and insert "earlier, unless such pro rata portion of the taxes may be cancelled under State or local laws;"; in line 25, after the word "decrease", insert "or increase"; on page 41, line 5, after the word "this", strike out the word "subsection" and insert "paragraph"; at the beginning of line 15, strike out "Sec. 323. This" and insert "Sec 323. (a) Except as provided in subsection (b), this"; in line 17, after the word "enactment", strike out the comma and "except that sections"; at the beginning of line 18, insert "(b) Sections"; in line 24, after the word "law", strike out "government" and insert "governing"; and on page 42, after line 2, insert a new title, as follows:

TITLE IV—JUDICIAL REVIEW

SEC. 401. The provisions of sections 551–553, 559, and 701–706 of title 5, United States Code, shall apply to an action of a Federal agency under titles II and III. For purposes of this title, the definition of "person" contained in section 551(2) of title 5, United States Code, shall be deemed to include a State as defined by section 102 of this Act.

SEC. 402. Any person or State adversely affected or aggrieved by a final action of a Federal agency under title II or title III of this Act may seek judicial review of such final agency action and demand appropriate relief in a judicial district of the United States as follows:

(1) if the agency action pertains to property or any interest therein acquired or being acquired by the United States, or the ownership or right of the United States to possession of property, by an action in the judicial district in which the property is situated; and

(2) in all other matters, by an action in a judicial district as provided for in section 1391(e) of title 28, United States Code.

So as to make the bill read:

S. 1

A bill to provide for uniform and equitable treatment of persons displaced from their homes, businesses, or farms by Federal and federally assisted programs and to establish uniform and equitable land acquisition policies for Federal and federally assisted programs

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Uniform Relocation Assistance and Land Acquisition Policies Act of 1969".

TITLE I—DEFINITIONS

As used in this Act—

FEDERAL AGENCY

SEC. 101. The term "Federal agency" means any department, agency, or instrumentality in the executive branch of the Government (except the National Capital Housing Authority), any wholly owned Government corporation (except the District of Columbia Redevelopment Land Agency), and the Architect of the Capitol.

STATE

SEC. 102. The term "State" means any of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, any territory or possession of the United States, the Trust Territories of the Pacific Islands, and any political subdivision thereof.

STATE AGENCY

SEC. 103. The term "State agency" means *the National Capital Housing Authority,* the District of Columbia Redevelopment Land Agency and *any State,* any public body, agency, or instrumentality of a State or of a political subdivision of a State, or any public agency or instrumentality of two or more States or of two or more political subdivisions of a State or States.

HEAD OF AGENCY

SEC. 104. The term "head of a Federal agency" or "head of a State agency" includes a duly designated delegate of such agency head.

DISPLACED PERSON

SEC. 105. The term "displaced person" means—

(1) any person who is the owner of a business, as defined by section 106 of this Act, and who, on or after the effective date prescribed in section 253(a), (A) moves or discontinues such business or an establishment of such business or (B) moves any outdoor advertising display, as a result of the acquisition or reasonable expectation of acquisition of real property, in whole or in part, by a Federal or State agency;

(2) any person who is the operator of a farm operation which moves from real property or is discontinued on or after the effective date prescribed in section 253(a) as a result of the acquisition or reasonable expectation of acquisition of such real property, in whole or in part, by a Federal or State agency;

(3) any individual who is the head of a family which moves from real property occupied as a dwelling on or after the effective date prescribed in section 253(a), as a result of the acquisition or reasonable expectation of acquisition of such real property, in whole or in part, by a Federal or State agency;

(4) any individual, not a member of a family, who moves from real property occupied as a dwelling on or after the effective date prescribed in section 253(a), as a result of the acquisition or reasonable expectation of acquisition of such real property, in whole or in part, by a Federal or State agency; or

(5) a nonprofit organization which moves from real property on or after the effective date prescribed in section 253(a) as a result of the acquisition or reasonable expectation of acquisition of such real property, in whole or in part by a Federal or State agency, or, any person, not described in paragraph (1), (2), (3), or (4) of this section, who moves his personal property from real property on or after the effective date prescribed in section 253(a) as a result of the acquisition or reasonable expectation of acquisition of such real property, in whole or in part, by a Federal or State agency. Under this paragraph, the term "displaced person" shall not include the owner of personal property on the premises of another under a lease or licensing arrangement where such owner is required pursuant to such lease or license to move such property at his own expense.

BUSINESS

SEC. 106. The term "business" means any lawfully entity conducted primarily (1) for the purchase and resale of products, commodities, or any other personal property; (2) for the manufacture, processing, or marketing of any such property: (3) for the cultivation, processing, and marketing of timber; (4) for the sale of services; or (5) for assisting in the sale, resale, or marketing of products, commodities, personal property, or services by the erection and maintenance of outdoor advertising displays. Such term does not include a farm operation or the business of an investor in acquiring or holding real property for resale for gain.

FARM OPERATION

SEC. 107. The term "farm operation" means any activity conducted solely or primarily for the production for sale or for home use, of one or more agricultural products or commodities other than timber, and customarily producing such products or commodities in sufficient quantity to be capable of contributing materially to the operator's support.

FARM OPERATOR

SEC. 108. The term "farm operator" means any owner, part owner, tenant, or sharecropper who operates a farm.

FAMILY

SEC. 109. The term "family" means two or more individuals living together in the same dwelling unit who are related to each other by blood, marriage, adoption, or guardianship.

DISPLACED

SEC. 110. The term "displaced," when used in relation to any person, means any person moved or to be moved from real property on or after the effective date prescribed in section 253(c) as a result of the acquisition or reasonable expectation of acquisition of such property for a public improvement constructed or developed by or with funds provided in whole or in part by the Federal Government.

OWNER AND PERSON

SEC. 111. The terms "owner" and "person" include any individual, or any partnership, corporation, or association, whether organized for profit or not for profit or any Indian tribe, band, or group.

REAL PROPERTY

SEC. 112. The term "real property" as used in this Act shall include land, and any interest in land, including but not limited to, easements, rights-of-way, water rights, and mineral interests.

TITLE II.—UNIFORM RELOCATION ASSISTANCE

DECLARATION OF POLICY

SEC. 201. The purpose of this title is to establish a uniform policy for the fair and equitable treatment of owners, tenants, and other persons displaced by the acquisition of real property in Federal and federally assisted programs to the end that such persons shall not suffer disproportionate injuries as a result of programs designed for the benefit of the public as a whole. Such a policy shall be as uniform as practicable as to (1) relocation payments, (2) advisory assistance, (3) assurance of availability of standard housing, and (4) Federal reimbursement for relocation payments under federally assisted programs.

PART A—FEDERAL PROGRAMS

RELOCATION PAYMENTS

SEC. 211. (a) If the head of any Federal agency acquires real property for public use in a State, he shall make fair and reasonable relocation payments to displaced persons in accordance with the regulations established by the President under section 241 of this Act. Notwithstanding any other provision of this Act, any business, as defined by section 106 of this Act, which is not being displaced shall be eligible for actual moving expenses with respect to its outdoor advertising displays being moved as a result of the acquisition or reasonable expectation of acquisition of real property, in whole or in part, by a Federal or State agency. No other payment therefore shall be made under subsections (b)–(f) of this section.

(b) Any displaced person who moves from a dwelling who elects to accept the payments authorized by this subsection in lieu of the payments authorized by subsection (a) of this section may receive—

(1) a moving expense allowance, determined according to a schedule established in accordance with the President's regulations issued under section 241 of this Act, not to exceed $200; and

(2) a dislocation allowance of $100.

(c)(1) In addition to amounts otherwise authorized by this section, the head of the Federal agency shall make a payment to any displaced person who moves or discontinues his business provided the average annual net earnings of the business are less than $10,000 per year. This payment shall be in an amount equal to the average annual net earnings of the business, except that such payment shall not be less than $2,500 nor more than $5,000. Notwithstanding the preceding sentence, in the case of a displaced person who is sixty years of age or over, this payment shall be in an amount equal to three times the average annual net earnings of the business or $6,000, whichever is less.

(2) No payment shall be made under this subsection unless the head of the Federal agency is satisfied that the business—

(A) cannot be relocated without a substantial loss of its existing patronage; and

(B) is not part of a commercial enterprise having at least one other establishment, not being acquired, which is engaged in the same or similar business.

(3) For purposes of this subsection, the term "average annual net earnings" means one-half of any net earnings of the business, before Federal, State, and local income taxes, during the two taxable years immediately preceding the taxable year in which such business moves from the real property acquired, and includes any compensation paid by the business to the owner, his spouse, or his dependents during such two-year period.

(d)(1) In addition to amounts otherwise authorized in this section, the head of the Federal agency shall make a payment to any displaced person who moves or discontinues a farm operation, provided the average annual net earnings of the farm operation are less than $10,000 per year. This payment shall be in an amount equal to the average annual net earnings of the farm operation, except that such payment shall not be less than $2,500 nor more than $5,000. Notwithstanding the preceding sentence, in the case of a displaced person who is sixty years of age or over, this payment shall be in an amount equal to three times the average annual net earnings of the business or $6,000, whichever is less.

(2) In the case where the entire farm

operation is not acquired by such Federal agency, the payment authorized by this subsection shall be made only if the head of such agency determines that the property not acquired is no longer an economic unit.

(3) For purposes of this subsection, the term "average annual net earnings" means one-half of any net earnings of the farm operation, before Federal, State, and local income taxes, during the two taxable years immediately preceding the taxable year in which such farm operation moves from the real property acquired, and includes any compensation paid by the farm operation to the owner, his spouse, or his dependents during such two-year period.

(e)(1) In addition to amounts otherwise authorized by this section, the head of the Federal agency shall make a payment to a displaced person who is the owner of real property which is improved by a single-, two-, or three-family dwelling actually owned and occupied by the owner for not less than one year prior to the initiation of negotiations for the acquisition of such property. Such payment, not to exceed $5,000, shall be the amount, if any, which, when added to the acquisition payment, equals the average price required for a decent, safe, and sanitary dwelling of modest standards adequate to accommodate the displaced owner, reasonably accessible to public services and places of employment. Such payment shall be made only to a displaced owner who purchases another dwelling within one year after the date on which he is required to move from the dwelling acquired for the project.

(2) The Secretary of Housing and Urban Development shall determine the prices prevailing in the locality for dwellings meeting the requirements of paragraph (1) of this subsection for all agencies making such payments.

(f)(1) In addition to amounts otherwise authorized by this section the head of the Federal agency shall make a payment to any individual or family displaced from a dwelling and not eligible to receive a payment under subsection (e)(1) of this section, provided such dwelling was actually and lawfully occupied by such individual or family for not less than ninety days prior to the initiation of negotiations for acquisition of such property (except that this provision requiring occupation of a dwelling ninety days prior to initiation of negotiations shall not apply to a displaced person within the meaning of section 233 of this Act). Such payment, not to exceed $1,500, shall be an amount which—

(A) is necessary to make the down payment on the purchase of; or

(B) when added to 20 per centum of the income of the displaced individual or family during the two-year period immediately preceding displacement, equals the average rental required for a two-year period for a decent, safe, and sanitary dwelling of modest standards adequate in the size of accommodate the displaced individual or family in areas not generally less desirable in regard to public utilities and public and commercial facilities. A payment made pursuant to subparagraph (B) of this paragraph shall be made only to an individual or family who is unable to secure a dwelling in low-rent housing assisted under the United States Housing Act of 1937, or under a State or local program found by the Secretary of Housing and Urban Development to have the same general purposes as the Federal program under such Act, or a dwelling unit assisted under section 101 of the Housing and Urban Development Act of 1965.

(2) The Secretary of Housing and Urban Development shall determine the amount of assistance under this subsection according to family size, family or individual income, average rents required, or similar consideration for all agencies making such payments.

(g) No payment received under this section or under section 231 of this Act shall be considered as income for the purposes of the Internal Revenue Code of 1954, or for the purpose of determining the eligibility or the extent of eligibility of any person for assistance under the Social Security Act or any other Federal law.

(h) The payments provided for in this section shall be made administratively by the head of the Federal agency acquiring real property, and none of the provisions of this section shall in any way affect any condemnation action or the just compensation to be determined or paid to the landowner in such action.

RELOCATION ASSISTANCE PROGRAMS

SEC. 212. (a) If the head of any Federal agency acquires real property for public use in a State, he shall provide a relocation assistance program for displaced persons which shall offer the services described in subsection (c) of this section. If the head of such agency determines that persons occupying property immediately adjacent to the real property acquired are caused substantial economic injury because of the acquisition of real property for public use, he may offer such persons relocation services under such program.

(b) Federal agencies administering programs which may be of assistance to displaced persons covered by this Act shall cooperate to the maximum extent feasible with the Federal or State agency causing the displacement to assure that such displaced persons receive the maximum assistance available to them.

(c) Each relocation assistance program required by subsection (a) of this section shall include such measures, facilities, or services as may be necessary or appropriate in order—

(1) to determine the need, if any, of displaced families, individuals, business concerns, and farm operators for relocation assistance;

(2) to assure that, within a reasonable period of time, prior to displacement there will be available in areas not generally less desirable in regard to public utilities and public and commercial facilities and at rents or prices within the financial means of the families and individuals displaced, decent, safe, and sanitary dwellings, equal in number to the number of and available to such displaced families and individuals and reasonably accessible to their places of employment except that the President may prescribe by regulation situations when such assurances may be waived;

(3) to assist owners of displaced businesses, nonprofit organizations, and farm operators in obtaining and becoming established in suitable locations;

(4) to supply information concerning the Federal housing programs, the small business disaster loan program under section 7(b)(3) of the Small Business Act, and other State or Federal programs offering assistance to displaced persons;

(5) to assist in minimizing hardships to displaced persons in adjusting to relocation; and

(6) to assure, to the greatest extent practicable, the coordination of relocation activities with other project activities and other planned or proposed governmental actions in the community or nearby areas which may affect the carrying out of the relocation program.

STATES FURNISHING REAL PROPERTY INCIDENT TO FEDERAL ASSISTANCE

SEC. 213. Whenever real property is acquired by a State agency and furnished as a required contribution incident to a Federal project to improve a locality, the Federal agency may not accept such property unless the acquiring State agency has made relocation payments, provided relocation assistance, and provided assurance of availability of housing as required in the case of acquisitions of real property by a Federal agency. The State agency shall bear the costs of relocation payments and assistance as a part of the real property acquisition cost, except that the Federal agency having authority over the project shall contribute to the cost of providing such payments and assistance to any person displaced prior to July 1, 1972, an amount not to exceed (1) the first $25,000 of such cost if the displaced person, at the time of displacement, lives in a State which is contiguous to at least one other State, or (2) the first $27,500 if the displaced person, at the time of displacement, lives in a State which is not contiguous to any other State.

PART B—FEDERALLY ASSISTED PROGRAMS

RELOCATION PAYMENTS AND ASSISTANCE; ASSURANCE OF AVAILABILITY OF HOUSING

SEC. 231. (a) Notwithstanding any other provision of law, on and after the effective date of this section, no grant to, or contract or agreement with a State agency, under which Federal financial assistance will be available to pay all or part of the cost of (1) the acquisition of real property, (2) a public improvement for which real property is to be acquired, or (3) a program which will otherwise result in the displacement of persons may be approved by the head of the Federal agency responsible for the administration of such Federal financial assistance unless such State agency has entered into an agreement with the head of such Federal agency to provide to displaced persons for moves from such real property—

(1) fair and reasonable relocation payments in the same amounts and under the same terms and conditions as are required to be made by a Federal agency by section 211(a), including actual moving expenses for moving outdoor advertising displays, of this title and in accordance with regulations established by the President under section 241 of this title;

(2) relocation payments in the same amounts and under the same terms and conditions as are required to be made by a Federal agency by section 211 (b), (c), (d), (e)(2), and (f) of this title;

(3) relocation assistance programs offering the services described in section 212(c) of this title;

(4) a feasible method for the temporary relocation of families and individuals displaced from the property acquired, and assurance that within a reasonable period of time prior to displacement, there will be available in areas not generally less desirable in regard to public utilities and public and commercial facilities and at rents or prices within the financial means of the families and individuals displaced, decent, safe, and sanitary dwellings equal in number to the number of and available to such displaced families and individuals and reasonably accessible to their places of employment; and

(5) a payment for owner-occupants under the same terms and conditions as are required to be made by Federal agencies by subsection 211(e)(1) of this Act, except that no such payment shall be required or included as a project cost under subsection 231(c) if the owner-occupant receives a payment required by the State law of eminent domain which is determined by the head of the Federal agency to have substantially the same purpose and effect as subsection 211(e)(1) and to be part of the cost of the project for which Federal financial assistance is available.

(b) As a condition to further assistance to a State agency for (1) part or all of the cost of real property acquisition, (2) part or all of the cost of a public improvement for which real property is to be acquired, or (3) a program which will otherwise result in

the displacement of families and individuals, the head of the Federal agency shall require, within a reasonable time prior to actual displacement, satisfactory assurance by the State agency that decent, safe, and sanitary dwellings as required by subsection 231 (a)(4) are available for the relocation of each such individual or family.

(c) The cost to a State agency of providing the payments and services described in subsection (a) of this section may be included as part of the cost of the project for which Federal financial assistance is available to such State agency, and such State agency shall be eligible for Federal financial assistance with respect to such payments and services in the same manner and to the same extent as with respect to other project costs. Notwithstanding any other law, the Federal agency providing such assistance shall contribute, to the cost of providing such payments to any person displaced prior to July 1, 1972, an amount not to exceed (1) the first $25,000 of such cost if the displaced person, at the time of displacement, lives in a State which is contiguous to at least one other State, or (2) the first $27,500 if the displaced person, at the time of displacement, lives in a State which is not contiguous to any other State. Any funds appropriated or otherwise available to a Federal agency for assistance to State agencies for such projects shall be available also for obligation and expenditure to carry out the provisions of this subsection. In order to receive the assistance authorized by this subsection, no State agency need agree to make any relocation payment in excess of (1) $25,000 to a displaced person if, at the time of displacement, the person lives in a State which is contiguous to at least one other State, or (2) $27,500 to a displaced person if, at the time of displacement, the person lives in a State which is not contiguous to any other State.

(d) In order to prevent unnecessary expenses and duplication of functions, and to promote uniform and effective administration of relocation assistance programs for displaced persons, any agreement by a State agency under subsection (a) of this section shall provide that such agency may make relocation payments or provide relocation assistance or otherwise carry out its functions under this title by utilizing the facilities, personnel, and services of any other State agency having an established organization for conducting relocation assistance programs.

(e) Any grant to, or contract or agreement with a State agency executed before the effective date of this section, under which Federal financial assistance is available to pay the cost in connection with the acquisition of real property, or of the improvement for which such property is acquired, may be amended to include the terms and conditions required by subsection (a) of this section.

(f) If the head of a Federal agency determines that it is necessary for the expeditious completion of a public improvement for which a State agency has entered into agreement, as described in subsection (a) of this section, to make relocation payments to displaced persons, or to provide the funds necessary to meet the requirements of section 321(b)(1) of this Act, he may advance to the State agency the Federal share of such relocation payments and an amount necessary to make the required payments under section 321(b)(1). Upon determination by the head of such Federal agency that any part of the funds advanced to a State agency under this subsection are no longer required, the amount which he determines not to be required shall be repaid upon demand. Any sum advanced and not repaid on demand shall be deducted from sums otherwise available to such State agency from Federal sources.

(g) The provisions of this section shall not be applicable to any situation which comes within the provisions of the first sentence of paragraph (8) of section 15 of the United States Housing Act of 1937 (42 U.S.C. 1415 (8)).

DISPLACEMENT BY CERTAIN PROGRAMS RECEIVING ASSISTANCE UNDER TITLE I OF THE HOUSING ACT OF 1949, AS AMENDED, AND TITLE I OF THE DEMONSTRATION CITIES AND METROPOLITAN DEVELOPMENT ACT OF 1966

SEC. 232. A person who moves or discontinues his business, or moves other personal property, or moves from his dwelling on or after the effective date of this Act, as a direct result of any project or program which receives Federal financial assistance under title I of the Housing Act of 1949, as amended, or as a result of carrying out a comprehensive city demonstration program under title I of the Demonstration Cities and Metropolitan Development Act of 1966 shall, for the purposes of this title, be deemed to be a displaced person.

DISPLACEMENT BY CERTAIN OTHER PROGRAMS

SEC. 233. Notwithstanding any other provisions of this title, a person—

(1) who moves or discontinues his business, moves other personal property, or moves from his dwelling on or after January 1, 1969, and before the effective date prescribed in section 253(a), as the result of the contemplated demolition of structures or the construction of improvements on real property acquired, in whole or in part, by a Federal agency; and

(2) who has lived on, or conducted a business on, such real property for at least one year prior to the date of enactment of this Act;

may be considered a displaced person, for purposes of sections 221 and 212 of this title, by the head of the agency acquiring the real property if—

(A) the head of the agency determines that such person has suffered undue hardship as the result of displacement from the real property; and

(B) the Federal Government acquired and held such property for at least 5 years prior to the effective date prescribed in section 253(a).

PART C—AUTHORITY OF THE PRESIDENT

SEC. 241. (a) To carry out the provisions of title II of this Act, the President is authorized to make such rules and regulations as he may determine to be necessary to assure—

(1) that relocation payments authorized by section 211 shall be fair and reasonable and as uniform as practicable;

(2) that a displaced person entitled to a relocation payment under section 211(a) shall be reimbursed for or paid—

(A) his reasonable and necessary expenses in moving himself, his family, his business, farm operation, or other personal property, and for his reasonable and necessary expenses in searching for a replacement property;

(B) if he disposes of personal property on moving his business or farm operation and replaces such property at the new location at a price exceeding any sum received from disposing of such property, the amount of the difference between such prices not to exceed the estimated cost of moving the property or its market value, whichever is less; and

(C) such other expenses authorized by section 211(a) as may be provided for in regulations issued under this section;

(3) that a displaced person who makes proper application for a relocation payment authorized for such person by this title shall be paid promptly after a move or, in certain hardship cases, the President may, by regulation, authorize advance payment of certain relocation costs;

(4) that any person aggrieved by a determination as to eligibility for a relocation payment authorized by this title, or the amount of a payment, may have his application reviewed by the head of the Federal agency; and

(5) that a displaced person shall have a reasonable time in which to apply for a relocation payment authorized by this title.

(b) The President may, by regulation, establish a limitation on the amount of a relocation payment authorized by section 211 (a) with due consideration for the declaration of policy of this title and the provisions of subsection (a) of this section and section 231(c).

(c) In order to prevent unnecessary expense and duplication of functions, and to promote uniform and effective administration of relocation assistance programs for displaced persons, the President is authorized to require that any Federal agency make relocation payments or provide relocation services, or otherwise carry out its functions under this title, by utilizing the facilites, personnel, and servces of any other Federal agency, or by entering into appropriate contracts or agreements with any State agency having an established organization for conducting relocation assistance programs.

(d) The President may make such other rules and regulations consistent with the provisiosn of this title as he deems necessary or appropriate to carry out this title.

PART D—GENERAL PROVISIONS

SEVERABILITY

SEC. 251. If any provision of this title, or the application thereof to any person or circumstance is held invalid, the remainder of this title and the application of the provision to other persons or circumstances shall not be affected thereby.

REPEALER

SEC. 252. (a) The following laws and parts of laws are hereby repealed:

(1) the Act entitled "An Act to authorize the Secretary of the Interior to reimburse owners of lands required for development under his jurisdiction for their moving expenses, and for other purposes," approved May 29, 1958 (43 U.S.C. 1231–1234);

(2) paragraph 14 of section 203(b) of the National Aeronautics and Space Act of 1958 (42 U.S.C. 2473);

(3) section 2680 of title 10, United States Code;

(4) section 133 of title 23, United States Code;

(5) section 7(b) of the Urban Mass Transportation Act of 1964 (49 U.S.C. 1606(b));

(6) section 105(c) of the Housing Act of 1949 (42 U.S.C. 1455(c));

(7) section 114 of the Housing Act of 1949 (42 U.S.C. 1465);

(8) paragraph (7)(b)(iii) of section 15 of the United States Housing Act of 1937 (42 U.S.C. 1415(7)(b)(iii));

(9) paragraph (8) of section 15 of the United States Housing Act of 1937 (42 U.S.C. 1415(8)), except the first sentence of such paragraph;

(10) section 404 of the Housing and Urban Development Act of 1965 (42 U.S.C. 3074);

(11) section 107 (b) and (c) of the Demonstration Cities and Metropolitan Development Act of 1966 (42 U.S.C. 3307);

(12) chapter 5 of title 23, United States Code; and

(13) sections 32 and 33 of the Federal Aid Highway Act of 1968 (Public Law 90–495).

(b) Any rights or liabilities now existing under prior Acts or portions thereof shall not be affected by the repeal of such prior Acts or portions thereof under subsection (a) of this section.

EFFECTIVE DATE

SEC. 253. (a) Except as provided in subsection (b), this title and the amendments made by this title shall become effective one

hundred and eighty days after the date of its enactment.

(b) Sections 231, 232, and 252 (a) (4), (5), (6), (7), (8), (9), (10), and (11) shall take effect on July 1, 1971, except that commencing one hundred and eighty days after enactment, the provisions of sections 231 and 232 shall be applicable with respect to any grant to or contract or agreement with a State agency to the extent it is able under its laws to comply with such sections and the provisions of Federal law governing relocation payments and assistance otherwise applicable to grants to or contracts or agreements with such agency shall be superseded by this title.

FUND AVAILABILITY

SEC. 254. Funds appropriated or otherwise available to any Federal agency for the acquisition of real property or any interest therein shall be available also for obligation and expenditure to carry out the provisions of this title.

TITLE III—UNIFORM LAND ACQUISITION POLICY

PART A—FEDERAL PROGRAMS

UNIFORM POLICY ON LAND ACQUISITION PRACTICES

SEC. 301. (a) In order to encourage the acquisition of real property by amicable agreements with owners, to relieve congestion in the courts, to assure consistent treatment for owners in the many Federal programs, and to promote public confidence in Federal land acquisition practices, heads of Federal agencies shall be governed by the following policies:

(1) The head of a Federal agency shall conduct transactions for the acquisition of real property in such a manner as to assure to the extent possible that persons whose property is acquired shall not be worse off economically than they were before the property was acquired.

(2) The head of a Federal agency shall make every reasonable effort to acquire real property by negotiated purchase.

(3) Real property shall be appraised before the initiation of negotiations, and the owner or his designated representative shall be given an opportunity to accompany the appraiser during his inspection of the property. A copy of the appraisal report shall be furnished the landowner.

(4) Before the initiation of negotiations for real property, the head of the Federal agency concerned shall establish an amount which he believes to be just compensation, such amount not to be less than the appraised value of the property as approved by such agency head, and shall make a prompt offer to acquire the property for the full amount so established. Any decrease or increase in the value of real property prior to the date of valuation caused by the public improvement for which such property is acquired, or by the likelihood that the property would be acquired for the proposed public improvement, other than that due to physical deterioration within the reasonable control of the owner, will be disregarded in determining the compensation for the property.

(5) Unless the head of the Federal agency determines that an emergency exists and severe or irreparable damages or injury may be caused by complying with this subsection, no owner shall be required to surrender possession of real property before the head of the Federal agency concerned pays the agreed purchase price, or deposits with the court in accordance with section 1 of the Act of February 26, 1931 (46 Stat. 1421; 40 U.S.C. 258a), for the benefit of the owner an amount not less than the appraised fair value of such property as determined by such agency head, or the amount of the award of compensation in the condemnation proceeding for such property.

(6) The construction or development of public improvements shall be so scheduled that, to the greatest extent practicable, no person lawfully occupying the real property shall be required to move from his home, farm, or business location without at least ninety days' written notice from the head of the Federal agency concerned.

(7) If the head of the Federal agency concerned does not require a building, structure, or other improvement acquired as a part of the real property, he shall, where practicable, offer to permit its owner to remove it. As a condition of removal, an appropriate agreement shall be required whereby the fair value of such building, structure, or improvement for removal from the real property, as determined by such agency head, will be deducted from the compensation otherwise to be paid for the real property, however such compensation may be determined.

(8) If the head of a Federal agency permits an owner or tenant to occupy the real property acquired on a rental basis for a short term or for a period subject to termination by the Government on short notice, the amount of rent required shall not exceed the fair rental value of the property to a short-term occupier.

(9) In no event shall the head of a Federal agency either advance the time of condemnation, or defer the condemnation and the deposit of funds in court for the use of the owner, in order to compel an agreement on the price to be paid for the property. If any agency head cannot reach an agreement with the owner, after negotiations have continued for a reasonable time, he shall promptly institute condemnation proceedings and, at the same time or as soon thereafter as practicable, file a declaration of taking and deposit funds with the court in accordance with the Act of February 26, 1931 (46 Stat. 1421; 40 U.S.C. 258a), if possession is required prior to the entry of the judgment in the condemnation proceeding.

(10) If an interest in real property is to be acquired by exercise of the power of eminent domain, the head of the Federal agency concerned shall, except as to property to be acquired under section 25 of the Tennessee Valley Authority Act of 1933, as amended (48 Stat. 70; 16 U.S.C. 831x), require the Attorney General to institute formal condemnation proceedings. No Federal agency head shall intentionally make it necessary for an owner to institute legal proceedings to prove the fact of the taking of his property.

(11) If only a portion of a parcel of real property is to be acquired, thereby leaving the unacquired portion without economic use, the head of the Federal agency concerned shall offer to acquire the entire property.

(12) In determining the boundaries of a proposed public improvement, the head of the Federal agency concerned shall take into account human considerations, including the economic and social effects of such determination on the owners and tenants of real property in the area, in addition to engineering and other factors.

(b) The provisions of this section shall not affect the validity of any property acquisitions by purchase or condemnation.

BUILDINGS, STRUCTURES, AND IMPROVEMENTS

SEC. 302. (a) Notwithstanding any other provisions of law, if the head of a Federal agency acquires land or any interest in land for public use in a State, he shall acquire a like interest, or greater interest, in all buildings, structures, or other improvements on the land so acquired which are required to be removed from the land or which, in the opinion of such agency head, will be adversely affected by such public use, if such improvements are not required to be removed.

(b) As used in this section, the term "real property" means land, or any interest in land, and (1) any building, structure, or other improvement imbedded in or affixed to land, and any article so affixed or attached to such building, structure, or improvement as to be an essential and integral part thereof; (2) any article affixed or attached to such real property in such manner that it cannot be removed without material injury to itself or the real property; and (3) any article so designed, constructed, or specially adapted for the purpose for which such real property is used that (A) it is an essential accessory or part of such real property, (B) it is not capable of use elsewhere, and (C) it would lose substantially all its value if removed from the real property.

(c) (1) For the purpose of determining the extent of the acquisition of real property and the valuation thereof, no building, structure, or other improvement shall be deemed to be other than a part of the real property solely because of the right or obligation of a tenant, as against the owner of any other interest in the real property, to remove such building, structure, or improvement at the expiration of his term, and the head of the Federal agency shall pay to the tenant the fair value of the building, structure, or improvement, which fair value shall be determined by such agency head as the greatest of (A) the contributive value of the improvement to the present use of the entirety, (B) the current cost of replacement less depreciation of the improvement, or (C) the value of the improvement for removal from the property.

(2) Payment under this subsection shall not result in duplication of any payments otherwise authorized by law. No such payment shall be made unless the fee owner of the land involved disclaims any interest in the improvements of the lessee. In consideration for any such payment, the lessee shall assign, transfer, and release to the United States all his right, title, and interest in and to such improvements. No provision of this subsection shall be construed to deprive the lessee of his right to reject the payments hereunder and to obtain payment for his property interests of just compensation as otherwise defined by law.

EXPENSES INCIDENTAL TO TRANSFER OF TITLE TO UNITED STATES

SEC. 303. The head of a Federal agency as soon as practicable after the date of payment of the purchase price or the date of deposit of funds to satisfy the award of compensation in a condemnation proceeding to acquire real property, whichever is the earlier, shall reimburse the owner for necessary and reasonable expenses incurred for—

(1) recording fees, transfer taxes, and similar expenses incidental to conveying such real property;

(2) penalty costs for prepayment of any mortgage entered into in good faith encumbering such real property if such mortgage is on record or has been filed for record under applicable State law on the date the official announcement of the project is made by the authorized Federal agency; and

(3) the pro rata portion of real property taxes allocable to a period subsequent to the date of vesting title in the United States or the effective date of a court order of possession, whichever is the earlier, unless such pro rata portion of the taxes may be cancelled under State or local laws.

PART B—FEDERALLY ASSISTED PROGRAMS

REQUIREMENTS FOR APPROVAL OF CONTRACTS OR AGREEMENTS FOR FEDERAL ASSISTANCE

SEC. 321. (a) Notwithstanding any other provision of law, on and after the date of enactment of this section no grant to or contract or agreement with a State agency, under which Federal financial assistance will be available to pay in whole or in part the cost of the acquisition of real property or of

a public improvement for which real property is to be acquired, may be approved by the head of the Federal agency responsible for the administration of such Federal financial assistance unless such State agency has entered into an agreement which shall provide—

(1) that every reasonable effort shall be made to acquire the real property by negotiated purchase;

(2) that the construction or development of the public improvement shall be so scheduled that, to the greatest extent practicable, no person lawfully occupying the real property shall be required to move from his home, farm, or business location without at least ninety days' written notice from such State agency; and

(3) that it shall be the policy of the head of the State agency, before initiating negotiations for real property, to establish an amount which he believes to be just compensation, under the laws of the State, such amount not to be less than the appraised value of the property as approved by such State agency head, and to make a prompt offer to acquire the property for the full amount so established.

(b) Notwithstanding any other provision of law, no grant to, or contract or agreement with, a State agency, under which Federal financial assistance will be available to pay in whole or in part the cost of the acquisition of real property, or of a public improvement for which real property is to be acquired, may be approved by the head of the Federal agency responsible for the administration of such Federal financial assistance, unless such State agency has entered into the agreements described in subsection (a) of this section and has also agreed—

(1) that no owner will be required to surrender possession of real property before the head of the State agency (A) pays the agreed purchase price, (B) makes available to the owner, by court deposit or otherwise, an amount not less than the appraised fair value of such property, as approved by such State agency head, without prejudice to the right of the owner to contest the amount of compensation due for the property, or (C) deposits or pays the final award of compensation in the condemnation proceeding for such property;

(2) that the head of the State agency, as soon as practicable after the date of payment of the purchase price or the date of deposit of funds to satisfy the award of compensation in a condemnation proceeding to acquire real property, whichever is the earlier, shall reimburse the owner for necessary and reasonable expenses incurred for—

(A) recording fees, transfer taxes, and similar expenses incidental to conveying such real property;

(B) penalty costs for prepayment of any mortgage entered into in good faith encumbering such real property if such mortgage is on record or has been filed for record under applicable State law on the date the official announcement of the project is made by the State agency; and

(C) the pro rata portion of real property taxes allocable to a period subsequent to the date of vesting title in the State or the effective date of a court order of possession, whichever is the earlier, unless such pro rata portion of the taxes may be canceled under State or local laws;

(3) that any decrease or increase in the value of real property prior to the date of valuation caused by the public improvement for which such property is acquired, or by the likelihood that the property would be acquired for the proposed public improvements, other than that due to physical deterioration within the reasonable control of the owner, will be disregarded in determining the compensation for the property; and

(4) that for the purpose of determining the extent of the acquisition of real property and the valuation thereof, no building structure, or other improvement shall be deemed to be other than a part of the real property solely because of the right or obligation of a tenant, as against the owner of any other interest in the real property, to remove such building structure, or improvement at the expiration of his term, and the head of the State agency shall pay to the tenant the fair value of the building, structure, or improvement, which fair value shall be determined by such agency head as the greatest of (1) the contributive value of the improvement to the present use of the entirety, (2) the current cost of reproduction less depreciation of the improvement, or (3) the value of the improvement for removal from the property, except that (1) payment hereunder will not result in duplication of any payments otherwise authorized by law; (2) the fee owner of the land involved disclaims any interest in the improvements of the lessee; and (3) the lessee in consideration for such payment shall assign, transfer, and release to the State agency all his right, title, and interest in and to such improvements. No provision of this paragraph shall be construed to deprive the lessee of his right to reject the payments hereunder and to obtain payment for his property interests of just compensation as otherwise defined by law.

PROVISIONS REPEALED

SEC. 322. Sections 401, 402 and 403 of the Housing and Urban Development Act of 1965 (42 U.S.C. 3071–3073) and section 35 of the Federal Aid Highway Act of 1968 (Public Law 90–495) are hereby repealed.

EFFECTIVE DATE

SEC. 323. (a) Except as provided in subsection (b), this title shall become effective one hundred and eighty days after enactment.

(b) Sections 321 (b) and 322 shall take effect on July 1, 1971, except that commencing one hundred and eighty days after enactment, the provisions of section 321 (b) shall be applicable with respect to any grant to or contract or agreement with a State agency to the extent it is able under its laws to comply with such sections and the provisions of Federal law governing acquisition of real property otherwise applicable to grants to or contracts or agreements with such agency shall be superseded by this title.

TITLE IV—JUDICIAL REVIEW

SEC. 401. The provisions of sections 551–553, 559, and 701–706 of title 5, United States Code, shall apply to an action of a Federal agency under titles II and III. For purpose of this title, the definition of "person" contained in section 551(2) of title 5, United States Code, shall be deemed to include a State as defined by section 102 of this Act.

SEC. 402. Any person or State adversely affected or aggrieved by a final action of a Federal agency under title II or title III of this Act may seek judicial review of such final agency action and demand appropriate relief in a judicial district of the United States as follows:

(1) if the agency action pertains to property or any interest therein acquired or being acquired by the United States, or the ownership or right of the United States to possession of property, by an action in the judicial district in which the property is situated; and

(2) in all other matters, by an action in a judicial district as provided for in section 1391(e) of title 28, United States Code.

Mr. MANSFIELD. Mr. President, no further action will be taken this afternoon. There will be no further votes, but if Senators wish to enlighten the Senate, there is plenty of time at their disposal.

ORDER FOR ADJOURNMENT TO MONDAY, OCTOBER 27, 1969

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that, when the Senate completes its business today, it stand in adjournment until 12 o'clock meridian Monday next.

The PRESIDING OFFICER (Mr. SAXBE in the chair). Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BYRD of West Virginia. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is ordered.

ADJOURNMENT TO MONDAY, OCTOBER 27, 1969

Mr. BYRD of West Virginia. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in adjournment until 12 o'clock noon on Monday next.

The motion was agreed to; and (at 3 o'clock and 22 minutes p.m.) the Senate adjourned until Monday, October 27, 1969, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate October 23, 1969:

U.S. DISTRICT JUDGE

Philip C. Wilkins of California to be U.S. district judge for the eastern district of California vice Sherrill Halbert, retired.

CONFIRMATIONS

Executive nominations confirmed by the Senate October 23, 1969:

DEPARTMENT OF COMMERCE

Harold C. Passer, of New York, to be an Assistant Secretary of Commerce.

FEDERAL POWER COMMISSION

Albert Bushong Brooke, Jr., of Maryland, to be a member of the Federal Power Commission for the term of 5 years expiring June 22, 1974.

FEDERAL MARITIME COMMISSION

James V. Day, of Maine, to be a Federal Maritime Commissioner for the term expiring June 30, 1974.

ENVIRONMENTAL SCIENCE SERVICES ADMINISTRATION

Subject to qualifications provided by law, the following for permanent appointment to the grades indicated in the Environmental Science Services Administration:

To be captains

Jack E. Guth
Robert E. Williams
Robert C. Munson
Gerald E. Haraden

To be lieutenant

Robert D. Hickson, Jr.

EXTENSIONS OF REMARKS

PORTSMOUTH NAVAL SHIPYARD COMMENDED

HON. LOUIS C. WYMAN

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. WYMAN. Mr. Speaker, at the recent commissioning ceremonies for the Portsmouth-built nuclear attack submarine *Grayling*—SSN646—Rear Adm. Walter F. Schlech, Jr., commended the Portsmouth Naval Shipyard's skilled craftsmen. Admiral Schlech told the assembled audience:

The skilled efforts of the people here at Portsmouth Naval Shipyard have earned the Navy's confidence over the years. This Yard is a credit to the Navy and to this Nation. I take great pleasure, Captain Kern, in expressing for the Navy, to you and to your associates, my heartiest well done.

Admiral Schlech also said:

The building of a ship and its crew is a very delicate operation. This amalgam requires that both be ready for sea at the same time, and that each must be intimately familiar with the other. The officers and men of *Grayling* have completed the best submarine schooling in the world. Only the best—the cream—have made it here. I am pleased to single out the pre-commissioning accomplishments of the officers and men of *Grayling* in preparing this ship for its Naval role.

Nowhere in the Navy is the pre-commissioning inspection procedure more rigorous and demanding than when working toward the final 'thumbs up' on a submarine. Commander Baron, you and your men of *Grayling* can take great pride in achieving today's payoff.

The commissioning of USS *Grayling* provides an opportunity which I welcome to return here . . . twenty-five years ago I married my lovely wife right here in the Chapel. So my memories of Portsmouth are forever dear and personal.

This Yard has built ships for the old Navy, for today's Navy and now, in the *Grayling*, Portsmouth Yard builds for the Navy of the future.

I sailed on Portsmouth's ships of old. My second submarine was the Portsmouth-built *Halibut*. I joined her here in early 1942 as her Engineering Officer and served her later as Executive Officer. While I was aboard, she completed five war patrols in the Northern Pacific and she brought me back safely each time.

As commander of a submarine division, of two submarine squadrons and of Submarine Flotilla Six at Charleston, I have had many Portsmouth-built vessels under my command, and they performed with distinction.

The name *Grayling* has appeared on Navy subs since early in this century. The first in this series was Hull number SS18. The second and third *Graylings* were not submarines but patrol boats . . . While I was training for my own submariner's rating in 1940 and 1941, the fourth *Grayling* was under construction here in Portsmouth Yard.

She was commissioned in March 1941. On December 7, 1941, she was in port in San Diego, and sailed 10 days later for Pearl Harbor. On December 31, 1941, at Pearl Harbor, Admiral Chester W. Nimitz raised his Flag on *Grayling* as Commander, Pacific Fleet, and symbolically there began the Navy's long fighting road back to victory at sea in the Pacific.

In April of 1942 *Grayling* drew her first blood and sank a 6,000 ton Japanese cargo ship—the twenty-eighth ship sunk in the Pacific in that war. She sank three more ships on patrols during the following year, while taking part in an extraordinary amount of action at sea in support of the American movement westward across the Pacific. She began her eighth Pacific patrol in July 1943, delivering supplies to guerrilla forces in the Philippines. She was not heard from after September 9, and was declared "lost with all hands" September 30, 1943.

The Commander of that *Grayling*, Lieut. Commander Robert M. Brinker, went down with his ship. He and his men gave their lives in the best tradition of the Naval service, in the heat of combat, in defense of their country. Mrs. Lee Cullen, daughter of that gallant officer, sponsored this new *Grayling* when this namesake of her father's ship was launched at Portsmouth in June 1967. I am pleased that Mrs. Cullen is with us now for the commissioning of this namesake of her father's gallant ship. Today *Grayling* rejoins the Fleet under command of Commander Charles R. Baron.

Grayling in World War II was among a relatively small group of submarines in the Pacific area which broke the back of a determined enemy.

More than 2,000 merchant ships, comprising almost eight million tons of shipping, were lost by the enemy in the Pacific. Sixty per cent of that loss was accounted for by this Submarine Force . . . which General Tojo later described as one of the main factors that brought final victory to the United States.

Our submarine history is one of brilliance—forged by the Navy men who operate such ships and by the technicians who have designed and built them. The present day brand of submarines and submarine builders have written a new book in the business of going to sea underwater.

In the years since the first *Grayling* joined the Fleet, submarines have leaped the technological barriers into the realm of the true submersible: the submarine which is at home in the undersea environment as much as the fish that dwell in the deep. These developments are exciting, especially when one considers the time frame in which they have been achieved, and the promise which such an advancing rate of development holds for us in the future.

From my own experience as one-time Commander of the Submarine School, I frequently point out to audiences the very technical and highly specialized nature of Naval ships, equipment and operation epitomized by the submarine . . . and the commensurate need to have so many good, qualified people to man them. The modern submarine is a prime example of how technically advanced a weapons system can become. Building such a system, as this Yard does, is a high achievement. The officers and men who operate these systems make an effective contribution to the security of this Nation which I feel is beyond compare.

The commissioning is only the beginning. Now you prepare for further tests of *Grayling*'s material condition and operational readiness. I know these challenges are not easy ones, but the Navy is confident of your abilities to assure excellence in handling the complexities of modern submarine operation.

At the Annual Fleet Reserve Association meeting last month, the Secretary of the Navy, the Honorable John H. Chafee, talked of a better "quality Navy." He said that the Navy of the future would be smaller in numbers of men and ships, but of even higher quality than we have today. Firm, outspoken leadership is important to all of us in the Navy, as it is to the Nation, for we have tough competition from abroad. The Soviet Navy is ambitious to become the best Navy afloat, and is working very hard to achieve that goal. If we were in the automobile rental business, perhaps we could accept being number two. In this business number two becomes zero. Our Nation and our Navy can't tolerate that. Our future security depends on the vitality and the strength of American seapower.

The *Grayling* is a game fish, even though of the fresh water species. This submarine *Grayling* is a fighter. The strong character of the ship's namesake will be the present and future trademark for those submariners who man *Grayling*.

You are a new ship in a new era. I would like to wish you smooth sailing, good luck and God bless you all.

TRIBUTE TO DOC

HON. WALTER S. BARING

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. BARING. Mr. Speaker, September 5, 1969, Frank Christian "Doc" Jensen of Boulder City, Nev., officially retired from his position as first aid attendant on the Boulder Canyon project. This was the massive construction project of the famous Hoover Dam near Las Vegas, Nev., on the Colorado River. Since 1932, Doc dedicated himself to this arduous task, first with Six Companies, Inc., and later with the U.S. Bureau of Reclamation.

The son of Danish immigrants, Frank, or Doc as he later became affectionately known, at first sought a clerical career, attending Norwegian-Danish Theological Seminary in Minneosta. He also worked in the grain fields in the farming season and learned the newspaper trade inside and out. He devoted himself finally to the field of medicine, and attended medical school until the economic strain of the depression years forced him on the road again, a road which lead to the Boulder Canyon project. His enlistment there was the beginning of the longest career held by any one man on this project. As he recounted in his diary, he worked a 24-hour day, and a 6½-day week for the duration of his active career.

During World War II and the Korean war, Doc served Uncle Sam as an assistant flight surgeon, and received a citation from the Secretary of the Navy James A. Forrestal. A naval Reservist until 1965, Doc Jensen constantly enrolled himself in Navy correspondence courses, completing his service commitment with the highest cumulative scores of any man ever so enrolled.

A highly civic-minded man, Doc is a member of the Knights of Pythias, the

Elks, the Odd Fellows, and the American Legion. He has taught first aid to Boy Scouts and Sea Scouts. At last count, he had earned two 1,000-hour pins for volunteer duty at the Boulder City Hospital, and served on the Boulder City Hospital board for 2 years.

This year marks his retirement from the official rolls of Boulder Canyon project personnel. But Doc will continue to serve the people of Nevada, in his dedicated manner.

CONGRESS NEGLECTING PROBLEMS

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. BOB WILSON. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following:

[From the San Diego Union, Oct. 17, 1969]

PRESIDENT ASKS ACTION—CONGRESS NEGLECTING PROBLEMS

During his inaugural address nine months ago, President Nixon urged people of the United States of America to lower their voices so they could hear each other better.

Showing remarkable restraint more recently, the President followed his own advice when he asked Congress to accelerate action on executive legislative proposals.

It would have been easy for the President to pursue the same formula that was employed by President Truman—who won reelection in 1948 partially by campaigning against a "do-nothing" Congress.

But President Nixon chose not to follow this path. Instead he appealed to Congress with candor and calmness. In doing so, the President showed that his primary concern is for the welfare of the nation rather than the narrow matter of the 1970 congressional elections.

As President Nixon aptly noted, the majority of the people of the United States are more interested in positive accomplishments than in political posturing.

At the same time he would have been remiss not to note that this Congress has really little to show for nine months of session.

Only one of the major appropriations measures has been passed. And Congress has increased its own salaries substantially.

But the people of the United States have far deeper concerns.

A raging inflation has yet to be quenched. The crime rate is rising, pornography is flooding the mails, the post office is inefficient, selective service hangs over the heads of young men for half a decade, welfare costs are almost out of sight and schools are wondering where their next dollar is coming from.

The lethargy of Congress has failed to speak to these problems. It also has created new problems for all three branches of government.

At the Supreme Court the calendar has been adjusted to slow the pace because Congress has yet to confirm the court's ninth member.

The chief executive can hardly be charged with inaction when he does not know how much money he will have, what the congressional limitations will be on his programs, or even what he can plan on in the way of foreign aid. He is trying to run a government household without the assurance of a paycheck.

And because so much time has already been wasted, Congress will now either face a logjam as it approaches adjournment, or it will have to establish a set of rigid priorities to meet the obvious needs. To assure cogent legislation we recommended the latter.

For the welfare of the nation, Congress should accept the President's challenge for mutual action. That is the best kind of politics.

CLEVELAND WILL MISS BILL GORDON

HON. WILLIAM E. MINSHALL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. MINSHALL. Mr. Speaker, Cleveland is losing one of its most talented entertainers and Clevelanders are losing a good friend as Bill Gordon prepares to leave our city and go west. I have known Bill over the years as a dynamic and unique personality and I join with his thousands of other fans in saying that he will be missed on the airwaves. May he fare well in all his future endeavors. His own goodbye to Cleveland was eloquently spoken in an article in last Sunday's Plain Dealer, which follows:

[From the Cleveland (Ohio) Plain Dealer, Oct. 19, 1969]

THANKS FOR THE MEMORIES AND GOODBYE—STAY SMOOCHIE

Fare thee well! It is difficult to say when you really mean it. Today, due to over-usage, phrases and words drift through the air having neither substance nor meaning. "Good night," "good morning," "how are you?" and "good to see you" are empty sounds that pass among ourselves without carrying thoughts. For once, however, the meaning should be received as it is sent—fare thee well.

All too sadly, I am leaving Cleveland and truly wish each of you well. Read this and know it to be a note of appreciation to all the wonderful people who have been so kind, so good, so friendly to me.

When I returned last year and the Mayor proclaimed "Bill Gordon Day" in an official proclamation, I felt proud, very proud and happy and now, as I leave, I must thank you all in return.

I am moving west to Southern California and I am going to try to find a medium that hasn't heard of "format" or "middle of the road" or "hard rock" or "top 40." I am looking for a station that wants an individual—me, Bill Gordon. I'm the Bill Gordon who enjoys being on the air and communicating in the truest sense of the word with you, the listener. A personal type of broadcasting with an individual who is recognizable and distinctive.

I have no quarrel with the automated radio that seems to be creeping into our lives if that is what you want. I think, however, that almost anyone can read a cue card and say, "the time is now 8 o'clock and here's another great record from our new-oldies stack" or "with the ole thermometer at 56 degrees, we'll listen to the Deviated Septums singing 'Ain't Lake Erie eerie?' "

I really don't want to leave. I have so many, many friends here but, sadly, the radio and TV media seem to be copying one another in blind homage to surveys. The absentee owners of the stations are concerned less with the sound and more with the ratings. They equate loose surveys with sales proceeds. This is so wrong. A strong, single, individual effort is neither needed nor required.

Local managers look to the overall sound or, if you will, "Image" as reflective of the entire station during all broadcast hours. These formats are so similar that you—the consumer, the buyer, the listener—often cannot tell to which station you are listening. This is the numbers game that is now being played. When the numbers turn up against the local management, they find shelter in explaining that the format is being followed and, if it is not making money, it isn't their fault. And so it goes. And so go I.

I am grateful that I am being permitted to say goodbye in this way. I have so many wonderful letters on my desk and I'll never have the ability to answer—the wonderful lady who sent me a check and asked me to use the money to stay in Cleveland a little longer. The check returned—the thought retained. I want to thank all of you who remember "Stay Smoochie," "Has he gone yet?", "Apartment 13," "Dorothy and Bill" and "I'm not crazy, I'm listening to Bill Gordon." I will miss you, Cleveland.

I will miss being greeted and greeting all of you up and down Euclid Avenue and wherever we go. There is so much greatness here, more in Cleveland than the Orchestra, the Museum, the Browns, the Indians and the Terminal. As my friend George Condon noted in his book "Cleveland, the Best Kept Secret," it is obvious that there is potential for getting out of the rut we are in. This is a town of individual people. Why is it that we are on dead center and things are not progressing?

Everyone has the idea of how to solve it, but somehow the thought does not become deed. A strip of trees down the wide expanse of Superior—do it! The inflammable river should be cleansed—be it by City, State or Federal authority—do it! Stop the refuse from accumulating on the streets! Revitalize downtown! Don't fall into the format rut! Reach up and reach out and dare to do something because you know it is right. Don't listen to those who say it can't be done, or say it has never been done before. Format—status quo—death!

I only wish that I could have found a medium here and remained. I have been looking and searching and finally old Smoochie has had it. I'm not leaving Cleveland for greener pastures in California, for I have nothing of any substance out there. Yes, it will be warm and yes, it will be pretty, but I know I will miss each one of you, and I will think of you and thank you all for listening to me over all the years passed.

It has been wonderful for me and I appreciate it. Without sounding maudlin and just because it's true, thank you, thank you, thank you for the good years, the good times and the good memories that we have had together. Fare each of thee well! Stay Smoochie.

POSTAL REFORM

HON. WILLIAM A. STEIGER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. STEIGER of Wisconsin. Mr. Speaker, I believe all those interested in postal reform will agree with the Sheboygan Press in their editorial of October 14, 1969, entitled "Postal Plan Rebuffed." I think the Press continues to reflect the sentiment of Sixth District residents on this important issue, and I

include the text of their editorial as part of my remarks, as follows:

POSTAL PLAN REBUFFED

Sad to relate, it appears that the U.S. Postal Department is due to struggle through another year with the usual complaints about poor service and the ever-present deficit at the close of the fiscal year. For the House Post Office Committee in a 13 to 13 tie vote, failed to endorse President Nixon's request for a semi-independent postal corporation. Instead the committee favors some revision of the present system in the form of an alternate plan by Chairman Thaddeus Dulski, D-N.Y., to reshuffle the Post Office Department in its present framework.

But judging from past performances, we are not too optimistic about that kind of an arrangement. As years went by, new postmaster generals have come, each with a new broom to sweep out the inefficiencies of the present system, but none has succeeded.

Postmaster General Winston M. Blount said that Dulski's bill was inadequate. "I am concerned that some members of the committee continue to ignore the will of the overwhelming majority of voters in their own districts, as demonstrated in poll after poll," he said.

However, all hope for the Nixon proposal is not gone. Said Rep. Morris K. Udall, D-Ariz., "This was certainly not a victory for the corporation concept, but I don't think you can write the death certificate yet." Also, President Nixon lists the corporation plan as one of his major legislative targets, and its backers insist it remain alive.

The present system having failed so consistently in the past, we believe the time has come to try something new. For that reason we hope that President Nixon persists in his proposal, as he apparently intends to do.

NATIONAL BUSINESS WOMEN'S WEEK

HON. GEORGE BUSH

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. BUSH. Mr. Speaker, as October 19–25, 1969, will be recognized as National Business Women's Week, I think it particularly timely that the activities and achievements of the National Federation of Business and Professional Women's Clubs, Inc., be acknowledged.

With over 180,000 members living in every congressional district in the United States, women of the national federation have continually distinguished themselves and their organization in a broad manner of ways.

For the past 50 years, members of this outstanding organization have maintained an informed awareness on all manner of legislation. We have all benefited from their timely responses to indicated needs of the future, responses which have been representative of the sort of citizenship that has made our country strong.

This moment in time—today—is a critical period for all of us. It is one of those periods calling for leadership with the ability to motivate and unify us even stronger in behalf of our country. Such leadership is represented in the membership of the National Federation of Business and Professional Women's Clubs, Inc.

Its members are among us everywhere today. They are women possessing the capabilities required to deal with the complex and urgent circumstances of these times.

As we salute National Business Women's Week, let us similarly applaud the National Federation of Business and Professional Women's Clubs, Inc. Their search for truth in these times of vast paradox and change, has been a notable one.

ANNUAL CONVENTION OF THE AMERICAN ASSOCIATION OF ATTORNEY-CERTIFIED PUBLIC ACCOUNTANTS, INC.

HON. HASTINGS KEITH

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. KEITH. Mr. Speaker, there is meeting, in Boston, at this time, a very important group of professional people—members of the American Association of Attorney-Certified Public Accountants, Inc., gathered at its annual convention to exchange ideas, thoughts, and information and to further the interests of the two professions in which each is licensed; law and accountancy.

The important stature of this association is clearly shown by the presence at the convention, as keynote speaker, of Morris B. Abram, president of Brandeis University, and by the participation of three other distinguished individuals in the convention's educational seminar, Prof. John F. Sutton, Jr., of the University of Texas, Dr. Paul Vatter, Harvard professor, and Andrew Barr, chief accountant of the Securities and Exchange Commission.

It happens that this convention also commemorates the fifth anniversary of the founding of the organization, which was created in October 1964, to safeguard and advance the professional interests of all men and women in the United States who are qualified and licensed both as attorneys and certified public accountants; to protect the right of the public to select individuals so qualified if they choose; to advance the professions of law and accountancy; to promote and maintain and to guide members in observing the highest professional and ethical standards in service to clients, and the public at large where so required; and to aid the public in general and the members of the legal and accounting professions in particular by publication and dissemination of discussions of technical problems which the members of the association may be particularly well qualified to discuss. Because there are in all of the 50 States fewer than 3,000 people who fulfill both qualifications, they constitute a group of individuals who are recognized as highly skilled and competent in their chosen fields.

That the association, in its relatively short history, has been successful in accomplishing one of its prime objectives can be demonstrated by its collaboration during the development stage of the new code of professional responsibility, in working with the American Bar Association in the formulation of the rules with respect to the dual practice of law and accountancy. A committee of the ABA had previously issued opinions that no attorney could hold himself out as also being a certified public accountant, which has been interpreted by some State and local bar associations as a denial of the individual's right to claim both licenses, even though he had earned them. The new code of professional responsibility of the American Bar Association, however, does not specify accountancy by name, but recognizes the right of an attorney to engage in another profession or business, asking only that he observe certain rules concerning letterheads, business cards, door signs, and listings.

This was a major victory for the American Association of Attorney-Certified Public Accountants, Inc., and the American public, but the association's work is only commencing.

At this convention, the members will be charged with the responsibility of expanding their public service program, of seeking new ways in which they can utilize their combined and unique talents in behalf of the American people.

In addition to the ethical considerations, the association has made progress in other areas. The national organization is comprised of 14 regional associations covering 15 States and the District of Columbia, and there are members in practically every State of the Union. Many of these regional associations have already organized public service programs, such as serving on State tax boards, assisting minority business enterprises, and serving as arbitrator for the American Arbitration Association. The organization is presently voting to create scholarship programs at the Nation's leading universities to involve young law students in accounting, and vice versa, and has already made a grant to one such university.

More time will be devoted to programs involving the public welfare. Also, the association is stepping up its professional and intellectual development programs through forums, publications, and seminars in order that its members may better serve the people of this country.

Becoming a member of the American Association of Attorney-Certified Public Accountants is not an easy task. An individual must be licensed to practice not only as an attorney but also as a certified public accountant. When one considers what is involved in achieving both of these licenses—the long hours of study, training, and apprenticeship, and diligent dedication to two disciplined and important professions—it is a wonder that as many as 3,000 have achieved the goal. It is a truly dedicated individual who strives and completes all that is required to acquire both skills.

It is in this light that I offer congratulations to the members of the American Association of Attorney-Certified Public Accountants, Inc., on the occasion of its fifth anniversary. The American public indeed is indebted to these individuals for their service to the Nation, and we all join in wishing the American Association of Attorney-Certified Public Accountants, Inc., a long, useful, and successful life.

RURAL AMERICA STANDS UP FOR PEACE

HON. ROBERT L. LEGGETT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. LEGGETT. Mr. Speaker, on October 15 a broad spectrum of America stood up for a new policy in Southeast Asia.

Political and news commentators have noted the involvement of the poor, the well-to-do, the disenfranchised, the men who once held power and the men who currently hold power. But no one has noticed or spoken about the feelings engendered by the moratorium in rural America.

Rural America was involved on October 15. The Vietnam moratorium involved small towns across America like Meridian, Calif., in my congressional district. With a population of 400, the people of Meridian decided to add their small voice to the voices being heard from the big cities and many campuses. The people of Meridian circulated a petition calling for an immediate and complete withdrawal of U.S. troops from Vietnam by the end of 1970.

It is refreshing to see Meridian, Calif., stand up and be counted among those desiring peace, even though the ambitious timetable would be difficult to achieve. It was refreshing to see students nonviolently protesting on October 15 on their views toward peace balancing BARRY GOLDWATER before the National Convention of Old Crows last night pleading to end the war by bombing the dikes and the railroad lines in Hanoi. I believe that peaceful protest solution by the students, the middle aged and the folk of rural America is more reflective of majority national opinion than the nationally defeated Senator GOLDWATER. The Meridian petition follows:

OCTOBER 15, 1969.

DEAR CONGRESSMAN LEGGETT: It is our purpose to bring to your attention the deep concern over the Vietnam conflict that has spread to all facets of American life.

Meridian is a small community about sixty miles north of Sacramento. On October 15, which was nationally designated as Vietnam Moritorium Day, we circulated a petition which called for a complete and immediate withdrawal of U.S. troops from Vietnam. Enclosed is this petition.

It must be hard for you to realize the importance of a petition, that, compared to others you have received, seems to contain very few signatures. You must take into consideration, however, that the total population of the town, is only 400.

Voices have been heard from the big cities and many campuses, while rural America has remained virtually silent. We realize we have no one but ourselves to blame for this silence. As members of one such community, we have shouldered the responsibility of arousing our town in hopes it will spur other silent towns into decisive action.

It is our sincere hopes, that our hard work and dedication in the interest of rural America will not be ignored.

Our government was originally designed with the idea that through the voices of the people, the majority would be heard. If these conditions exist, the obvious outcome is withdrawal of U.S. troops from Vietnam by a reasonable date—December, 1970.

Sincerely,

LINDA WILLIAMS,
HILA NEWTON.

MERIDIAN, CALIF.

We, the below signed, feel the fighting in Vietnam to be immoral and unjust and call for an immediate and complete withdrawal of U.S. troops.

Hila Newton, Linda Williams, Linette Lynch, Florence Brown, Gloria Reische, Sally A. Bisby, Joyce Upton, Glenda Dornan, Mabel Phillips, E. Imfress, E. C. Webb, Fred Nigsch, T. J. Pague, Doris E. Lynch, Isabell Fleharty, Ira Nichols.

Mildred Briscoe, Maxine Longwill, Randy Longwill, Mamie Bielar, Mary Self, Chet Self, Thelma Coleman, Judie Gillespie, Pauline Phillips, Carolyn Crumby, Ron Banning, Cornelia Nichols, Linda Lomis, Fred Ray, Violet Shipp.

Norman M. Sanorn, Ellen Parrish, Louise Rohleder, Gordon Rohleder, Jane Olivera, Terry Fleshman, Mrs. Fred Heitman, Harold O. Reische, Jeannette Reische, Marilyn Reische, Nolan Said, Patricia Said, Beverly Christensen, Andy Christensen, Marilyn Ette.

Daryl Ette, Diane Tarke, Anna Tarke, Richard Tarke, Elaine Tarke, Leo Carothers, Frances Hensen, Thomas Hensen.

THE INTERNAL REVENUE SERVICE: A SERVICE FOR THE JUNK MAILER

HON. CHARLES A. VANIK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. VANIK. Mr. Speaker, I was very disturbed by a news item which appeared in today's Washington Post reporting:

The Internal Revenue Service is considering changing its rules to allow direct mail advertisers to pinpoint the neighborhoods they want to send their mail to—the rich, the poor, or the middle class.

This could be done by furnishing complete zip code numbers from the IRS' published income tax data.

The IRS data is sold to anyone who wants to pay the cost.

It is true that this IRS data can be a very useful aid to State and local governments in the formulation of public policy. I object, however, to this information being compiled for the use of advertisers seeking to fill our mailboxes with unsolicited advertisements and junk mail. Confidential economic data compiled by the Government is being distributed to profitmaking groups so that they may pinpoint prime markets. The distribution of this economic data for private purposes is, in a very real sense, a violation of privacy of the individual resident and the communities within the zip code area.

Further, these "mailing lists" will be sold at a price intended to cover the cost of compiling them to the Internal Revenue Service—but will it even begin to cover the cost to the Post Office of increased junk mail and magazines? It is my understanding that publishers' mail, largely magazines, currently carried under second-class mail are subsidized to the tune of approximately $267.1 million per year.

It is my hope that the IRS will carefully reconsider this plan and abandon it in the public interest.

IN DEFENSE OF BLACK STUDIES

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. CONYERS. Mr. Speaker, one of the most important statements I have read is contained in the paper I wish to introduce into the RECORD. It is important because it drives to the very heart of the domestic crisis that confronts this Nation today. It is that black Americans do not demand handouts of bread, but equitable distribution of power. They are powerless in a society that respects only power.

Make no mistake about it, they are out to change that society, once they have achieved an equity in power. They will not rest until it respects other values, such as the dignity of human life, and the brotherhood of man, goals not very disparate from those inscribed in this Nation's Declaration of Independence.

I do not mean to imply that this Nation should scrap its distribution of food stamps or its programs for open housing, equal opportunity, and improvement of schools, for until black Americans have power over their own lives, they will never be able to provide these for themselves, and it will remain incumbent on the powerful to assure these protections for the powerless. Non-black America should remember, however, that without a sincere and equitable redistribution of power, these other programs total up to paternalism that does not erase the oppression of racism.

In the face of demands for power, the powerful have responded with their usual tokenism. It has become patently clear that its power is the one thing white America is most reluctant to share. It has consistently refused to accept the fact that this is at the root of the turmoil. For where is the confrontation over power most visible but on the white campuses, where white America learns how to build and use its power, where black America wants in, and where white America refuses most vehemently to yield? The outcry of white America is loudest over black student demands for studies that are relevant to the experience of being black in white America. At last, white and black America have joined the central issue.

It is for that reason that this paper should be studied by my colleagues. Its author, Dr. James Allen Moss, is an eminent educator who is serving as chairman of the Select Committee on Equal Opportunity at the State University of New York at Buffalo. In a dispassionate but clear voice he states the case for black studies and the demands by black students that they be allowed to build black communities at the white citadels of

learning. Without black community, they remain socially ostracized and their chances of relevant black experience—the phrase most often heard in all of the angry discourse over black studies—is destroyed. If their just demands are not met, our Nation's traditional white education will continue what it has always done, turning black students into whitened sepulchers to assure the stability of the status quo and deny black Americans the opportunity ever to exercise power over their own lives.

As Mr. Moss points out, today's black students are not seeking a return to segregation, nor are they seeking to destory the quality of education. They ask only to expand that education so that it might provide them an understanding of their roles as black Americans, not the roles that have been defined by white America, but roles they themselves define, as masters of their own destinies, in the best traditions of democracy.

The paper previously mentioned, follows:

IN DEFENSE OF BLACK STUDIES

(By James Allen Moss)

Not since Stokely Carmichael issued his call for Black Power some three years ago, have the Black Establishment and White liberals been so up in arms as they are today. Only today, the issue is not Black Power, but Black Studies programs and Black militant action on the campuses of American colleges and universities. It is striking, however, that the anxiety and concern currently expressed over Black Studies programs does not extend to predominantly Negro colleges. Student demonstrations, regardless of how serious or minor at Cheyney State College, Bowie State, Howard University, Tuskegee Institute, Prairie View, Central State University, Atlanta University and a host of other institutions, receive only scant attention outside of their own institutional environments. It is Black Student demands on predominantly White campuses that are being subjected to often intemperate criticism, faulty and inaccurate subjective assessments, and in more extreme cases, to counterdemands for legal action or governmental intervention on behalf of the dissolution or drastic revision of such programs. Why is this so? A recently issued report by the Southern Regional Educational Board affirms the fact that predominantly Negro colleges have been equally as negligent as White institutions in the matter of curricular attention to the background and educational needs of Black students.[1] To be sure this is what the Black student revolt is about on most college campuses—Black and White. I would hope that we are not witnessing reverse racism in this instance. Most of us raised in Black communities remember the double standard of law enforcement in the cities in which we lived. If crime occurred in the Black community, involving only Black people, then one could expect to get off with a light sentence or no sentence at all. But if the same crime was committed in the White community or committed by a Black person against a White, then one might expect to pay the full penalties of the law. We do not need a double standard in either the quality, substance or accessibility to higher educational facilities in the United States. If Black Study programs are threatening to the educational process in predominantly White schools, they should be equally so in Black schools as well.

Footnotes at end of article.

For the past year and a half, I have been intimately involved in the development of Black student programs at the State University of New York at Buffalo. President Martin Meyerson, speaking at a memorial service for Matin Luther King in the Spring of 1968, called for a re-dedication of the University to both the principles and practices of equal opportunity for all citizens, as a living testimonial to the causes for which Martin L. King lived and died. Shortly thereafter, President Meyerson appointed a Select Committee for Equal Opportunity to assist him in formulating policies in support of expanded opportunities for minorities, both on campus and in campus-related activities within the community. President Meyerson gave the following charges to the committee:

First, "to enlarge substantially, the proportion of non-white and Spanish-speaking students attending our University."

Second, "the Committee and the Office must review our employment practices and the composition of our personnel, to find ways of training, hiring and upgrading non-white workers at all levels of our employment roster."

Third, "the Committee and the Office must explore channels through which we can dramatically enlarge the non-white members of our faculty."

Fourth, "the Committee and the Office must explore and develop other channels through which the University can better serve the needs of the Negro community."

Finally, "we must determine how we can bring the influence of the University to bear upon the attitudes, and the fears of a white community, which is just beginning to sense the urgency and the importance of achieving understanding and rapport with our non-white brothers."

I was asked by President Myerson to serve as the Chairman for the Select Committee. Other members of the Committee were drawn from the ranks of administration, students (black and white), faculty and the Black and Puerto Rican Communities. While formal appointments to the Committee numbered 14, there has seldom been a Select Committee meeting with fewer than 20 people present. The meetings which for most of the first year were weekly, but most recently biweekly, were open to all who chose to come. For most of this past year, the meeting place for the Committee has alternated between the campus and various locations within the Black and Puerto Rican communities.

The University established simultaneously with the appointment of the Select Committee, an Office of Equal Opportunity, with a former Dean of the School of Education at the University as its first Director. The Office serves as the administrative arm of the Select Committee, with the power to initiate action on its own within the spirit and intent of the Committee and to implement proposals acted upon favorably by the Committee and originating either within or from outside of the University. Those of us working with the Equal Opportunity program at the University are very cautious about giving external publicity to our accomplishments which I think have been considerable and to our failures of which we have had our share. First of all, we have accepted the notion that having so far to go in bringing Blacks and Puerto Ricans into our University Community, no matter how much we do, it will be insufficient to close the gap. Then, too, we feel that we are in a continuing experimental effort—an effort which seeks to involve in a partnership, diverse elements within the University and the City of Buffalo, on a basis of mutual support and trust. It seems to us then, that to boast of each new accomplishment, and perhaps, to gloss over our failures, would be to engage in gamemenship of the most cruel and insensitive nature. I think with few exceptions, those of us at the University of Buffalo feel that we are earning the confidence and support of the Black and Puerto Rican communities, both off and on campus, and that this trip together is a very challenging and rewarding one indeed. We have not nor are we operating in an atmosphere of fear, but in an atmosphere of innovation and exciting change. We have come to admire the dedication, the sense of timing and strategy, and the commitment to both a high quality and relevant education reflected in the programmatic goals and accomplishments of our Black students.

My experience with Black Students on other campuses recently, limited to be sure, has not been substantially different. Although they may be studying in different educational milieu and come from slightly different socio-economic backgrounds, the demands that they are making upon their respective institutions to be relevant to the kind of world in which they will live and justify the high purposes that these institutions claim for themselves, has been almost uniformly the same. During this past year, I have come to know well students at Howard University, where I taught two courses in African Research Methods, served as discussant or consultant on Black study programs at such varied kinds of institutions as Vassar, the State University of New York at New Paltz, the State University of New York at Stony Brook, and very recently have had the occasion to become familiar with the Black students and their projected program at Harvard University. The most notable thing that marks off this generation of Black students from any that I have known previously is their singleness of purpose with respect to full inclusion within the University communities of this country and their close links and identity with the Black communities in which they live or study, and black communities elsewhere in the world. It is because I see Black students through these kinds of lenses—tinted I am sure—that I find it hard to comprehend the plethora of criticism and abuse which is increasingly being mounted against them and their programs. Because of the growing attacks on Black Studies programs, and a deafening silence from those who support them, I have decided to stand up and be counted among those who strongly endorse the underlying motives for such programs, the predominant direction which they have taken, and the present and potential contribution that these programs are making to a re-evaluation of the purposes to be served by higher education in a democratic society.

The kinds of criticism lodged against Black Studies are cast in legal, emotional, intellectual, racial and, indeed, comical molds. Similarly, the attacks touch upon curricular, cultural, social, political and personnel aspects of these programs. I would like to discuss first the kinds of criticism read and heard most frequently about Black Study programs.

The first legal assault upon Black Studies programs has been threatened by the National Association for the Advancement of Colored People in response to the establishment this past academic year of separate social and living facilities by Black Students at Antioch College in Ohio. At about the same time Black students had successfully negotiated similar arrangements at Northwestern, Cornell and Harvard Universities among others. Roy Wilkins, Executive Secretary of the NAACP, addressing his remarks to the demands of Black students for separate social and study facilities, labels these facilities "Jim Crow Schools" and charges colleges and universities that permit such arrangements with encouraging and supporting racial segregation:

"The system of segregated education must not be revived. It must not be invited back at the request, nay, the ultimatum of black

students themselves . . . The key word in the current spate . . . of demands of black students is 'autonomous.' No university administration faithful to its trust can grant this. There is substantial informed opinion that tax money cannot be used to set up racial enclaves within campuses. I am sure that sooner or later a court test would arise." [3]

Indeed it is reported that Mr. Wilkens has threatened to file suits to block the establishment of autonomous Black Studies departments on the ground that they are unconstitutional.[4] The first concrete step in this direction, however, has been taken by the Office of Civil Rights of the U.S. Department of Health, Education and Welfare in a memorandum issued on March 5, 1969. In the memorandum the Office warned that separate housing, social activity, space and separate Colleges, Schools and Institutions stand in violation of Title VI of the Civil Rights Act of 1964.[5] The Office warned colleges and universities that HEW "must enforce the Congressional intent of prohibiting federally assisted institutions from offering services and benefits which result in segregation on the basis of race." Thus, the stage has been set for the initiation of legal action against any federally assisted college or university that establishes separate black student facilities.

A more didactic, but no less tautologically incorrect position on separate black facilities is that expressed by Sir W. Arthur Lewis in an article published in the *New York Times Magazine* section in May, 1969.[6] Professor Lewis views the role of education for Blacks in America as serving the technical and managerial leadership requirements for a predominantly White American society. In Professor Lewis' view, about fifty American colleges and universities turn out nearly all of the top people in American corporations and other leading institutions. If Blacks want to move into this top stratum of the power structure of American society, he argues, they cannot do so in isolation from the Whites who now control these positions. Thus, writes Professor Lewis:

"Blacks in America are *inevitably and perpetually* a minority. This means that in all administrative and leadership positions, we are going to be outnumbered by white folks, *and will have to compete with them not on our terms but on theirs.* The only way to win this game is to know them so thoroughly that we can outpace them. For us to turn our backs on this opportunity, by insisting on mingling only with other black students in college is folly of the highest order." [7]

Professor Lewis, however, is evidently not opposed to segregated higher education *per se*, but only to segregated higher education in predominantly White institutions. Neither the NAACP nor Professor Lewis seem prepared to carry the case of segregated Black colleges and universities into the courts, although only a token number of white students attend these institutions:

Alabama A & M College, 6 White students of 1900 Blacks.

Miles College, Alabama, 4 White students of 1000 Blacks.

Arkansas A & M, 7 White students of 3000 Blacks.[8]

In fact, Professor Lewis is quite prepared not only to accept the fact of segregated Black colleges and universities, but he is equally prepared to assign to them the training of Black students for more limited, mediocre roles strictly within the Black community. In this regard, he asks the question:

"What can the good white college do for its black students that Howard, or Lincoln or Fisk cannot do? It can open the road into the top jobs . . . To put it in unpopular language, it can train them to become top members of the establishment . . . if what one wants is people trained to live and work in black neighborhoods, they will do much better to go to the black colleges, of which there are, after all, more than 100, which know much better than Yale or Princeton or Dartmouth, what the problems of black neighborhoods are, and how people should be trained to handle them." [9]

The point that I am emphasizing is that the goals of Black students in predominantly Black institutions are not substantially different from those in White colleges and universities. Perhaps the Black colleges differ in only one particular—segregated spatial, social and instructional facilities—for these they already have—without anybody's complaints. Some comments from a Black Fisk student suggest that he perceives his present educational objectives and future objectives through different eyes than those of Professor Lewis:

"The goal of this black program (Fisk University) on campus is simple: make this educational institution speak to the needs of the black community; *that is structure the curriculum so that it educates and frees the black mind to deal with the system. The goals are limited and are a step in the process of changing the total society.*" [10]

Black students, North and South, in the community and on campus know full well that the dividing line between themselves and their economically less fortunate brothers and sisters is as thin and fragile as a thread. These students are sophisticated and knowledgeable enough to know that they are both the products and victims of a racist society, and that to survive in that system calls for societal structuring and transformation in the direction of unbargained, nonnegotiable equal opportunity for all Blacks. The anger and rage of Black students is no less at Fisk, Howard and Atlanta Universities than at Harvard, Cornell or the University of Buffalo. A Fisk student summarizes the mood on Fisk's Campus: "As a black student at Fisk, I don't feel that we have been quiescent at all. The fact that we have not sought publicity in the white news media, however, might have indicated this." [11] I doubt seriously that apparent deafness is at the heart of the White media's ignoring of black student protest within the context of Black educational and cultural experience. More than that, I see the scant attention devoted to activities on the predominantly Black campuses by the white media as clear indication that they perceive the Negro colleges as of little consequence for the current changes taking place in race relations in this country, and of even lesser significance to those in position to determine the major directions in which American society is to move in the decades ahead. Thus, the criticism lodged against Black Studies in predominantly white colleges and universities takes on more than casual importance. Those who oppose such programs on White campuses have a ready audience—a growing population, fearful of the threats to the status quo that these programs pose on the major campuses, and by inference generalizing these criticisms where they suit their purposes to Black student programs across the country—black and white.

Thus, Professor Lewis capsules a variety of descriptions of Black Studies programs in two relatively short paragraphs:

"In its most extreme form, what is asked is that the college should set aside a special part of itself which is to be the black part. There will be a separate building for black studies, and separate dormitories and living accommodations for blacks. There will be seprate teachers, all black, teaching classes open only to blacks. *The teachers are to be chosen by the students, and will for the most part be men whom no African or Indian or Chinese university would recognize as scholars, or be willing to hire as teachers.*" [12]

Since I know of no Black Studies Program in the country that fits Professor Lewis' example, I not only consider it arrant nonsense, but an affront to the Black students who have and are devoting their time and energy to developing curricula of cultural and intellectual significance with an admirable respect for academic integrity. Their demands for separate social, educational and cultural facilities are no different in kind than those presently available to Jewish students in Hillel Houses or to Catholic students in Newman Clubs (and one could cite other examples where exclusion is based upon such accidental features as class or sex) on college campuses across the country. Directors of Black Studies Programs such as Hollis Lynch, an African Historian, my colleague at Buffalo last year, but who now joins the faculty of Columbia; Charles Hamilton, a political scientist, and St. Clair Drake, who contributed so much to the program at Roosevelt, and the distinguished roster of Black scholars suggested by Black students to direct the program at Harvard—may not be known by "African or Indian or Chinese Universities . . . as scholars," but these universities would, or should be honored by their presence. I consider, therefore, Professor Lewis' description of black faculty members associated with operating Black Studies programs of which I have knowledge, equally as gratuitous as his remarks about black students.

If it is "bewildering" to Professor Lewis that proponents of Black Studies programs should favor Black faculty over Whites in teaching subjects of significant interest to Black students, and that in their rhetoric, at least, some Black Studies programs exclude Whites from their courses dealing with various aspects of the "Black Experience," I'm afraid I do not find it so. If the scholars in the fifty major colleges and universities to which he refers have in good conscience and with the intellectual rigor fashioned and interpreted American history and the role of Blacks in American culture in such a way as to either exclude or demean Black contributions, then let these same distinguished scholars and their students with equal objectivity and passion rewrite the history and culture of American Negroes as it should have been and as it is. They do not need either the encouragement or presence of Black students or faculty to do this. Indeed, it is a special obligation which truth and candour imposes upon them to do this on their own. Black students, and, I would think even Black artists, writers, and just plain Black common folk, are tired of trying to be sensitively viewed and seriously heard by Whites who are both blind and deaf to the beauty of their souls and to the anguished cries from their heart. While I, personally, feel that if White students and faculty want to sit in on special courses for Black students, and can sit quietly and learn and absorb much of what they know little (and few Whites can do this), then I would favor permitting them to share in this search by Black students and scholars for an integrated perspective on what life in America can and does mean for the life chances and hopes of its Black citizens. I cannot, however, share the venom that the critics of Black Studies programs feel about this issue, nor can I assign the importance to this aspect of the program as do they.

Professor Lewis continues:

"I yield to none in thinking that every respectable university should give courses on African life and on Afro-American life, which are of course two entirely different subjects, and I am very anxious to see such courses developed. It is, however, my hope that they will be attended mostly by white students, and that the majority of black students will find more important uses for their time; that they may attend one or two such courses, but will reject any suggestion that black studies

Footnotes at end of article.

must be the major focus of their programs." [13]

This same delusion that Black Studies programs seek to supplant substantive courses required for successful pursuit of traditional vocational and professional careers is shared by other critics of these programs: Martin Kilson, Assistant Professor of Government at Harvard University, himself a Negro, describes Black Studies programs as exercises in "ethnocentric manipulation" and supporters of such programs as "blissfully unaware that their bigoted and paranoid outlook makes shambles of scholarship and learning." [14] More acrid, bitter and crude denunciation of Black Studies programs has been made by Bayard Rustin, prominent labor and civil rights leader: Rustin in a recent interview accused American colleges of taking "a cheap way out by agreeing to Negro students' demands for Black Studies programs." He views it as "tragic" that Black students, instead of taking advantage of their opportunity for learning . . . are reducing the situation to a series of courses that cannot really prepare them for the kind of life they have to live." [15]

Elaborating on this same theme, Rustin, in a commencement address to the College of the Virgin Islands, inveighed against Black student militance and what he called "confrontation tactics." The kinds of changes that Black people seek to effect in present day America can only be achieved he argues "through honest politics and . . . those youngsters who are wasting their time in college, learning how to cook pigs feet are going to be in very serious trouble." [16]

While all of the foregoing critics of Black Studies Programs are Black, grumblings from Whites are similarly in vogue. They too, like most of their Black counterparts have had little or no direct experience with Black Studies programs, but this fact does not seem to them to suggest qualified assessments nor sensitive questioning of these programs. In a recent article entitled *Black Studies: Trouble Ahead,* Eugene Genovese categorically states the problem:

"No problem so agitates the campuses today as that posed by the growing pressure for Black Studies Programs and department . . . The universities must now choose between three courses: a principled but flexible response to legitimate black demands: a dogmatic, repressive adherence to traditional, liberal and essentially racist policies; and a cowardly surrender to all black demands, no matter how destructive to the university as an institution of higher learning or to American and Afro-American society in general. This last option, which has been taken in a notable number of places, ironically reflects as much racism in its assumptions and implications as the second, and it takes little skill in prophecy to realize that its conclusion will be a bloodbath in which blacks are once again the chief victims." [17]

While moderate in tone as compared with other pieces written on the same subject, Professor Genovese does not instruct us as to what are the "notable number of places" which have fully surrendered to Black student demands and how such surrender has destroyed the fabric of both American Institutions of higher learning and Afro-American society in general. One would even hope that the Black and White opponents of Black Studies Programs would "get themselves together." It is ludicrous for Rustin as a Black, to make the absurd statement that "There is no Italian history of the United States. There's no Jewish history, there's no black history, there is American history . . ." [18]

It is less than perceptive for Oscar Handlin—although not a vocal opponent to Black Study programs—to equate the experiences of Blacks in America, brought here against their will and left bereft of any family and cultural ties to the countries of origin, with European immigrants who came to this country of their own free will and permitted to build upon sustaining skills, traditions and social foundations while moving into the mainstream of American life.[19] On this issue, Genovese appears more sensitive to the Black Studies impulse than either Rustin or Handlin when he writes:

"The demand for Black Studies and for special black studies departments needs no elaborate explanation or defense. It rests on an awareness of the unique and dual nature of the black experience in the United States. Unlike European immigrants, *blacks came here involuntarily, were enslaved and excluded from access to the mainstream of American life, and as a result have had a special history* with a profoundly national-cultural dimension. Unlike, say, Italo-Americans, Afro-Americans have within their history the elements of a distinct nationality at the same time that they have participated in and contributed immensely to a common American nationality. Despite the effort of many black and some white scholars, this paradoxical experience has yet to be explored with the respect and intellectual rigor it deserves." [20]

But, while generally open to the possible legitimacy of Black Studies programs, Genovese raises also the familiar spectre of the intellectual mediocrity of Black students and consequently any programs proposed by them; the irresponsibility of Black students for proposing courses and departments that would exclude white students and faculty, and thereby imposing a racist cast on American universities inconsistent with their high purpose and obligation to society. He bemoans the "shortage" of well-trained Black scholars and views as unfair the imposition upon American universities the major responsibility for closing the educational gap between Whites and Blacks. Finally, while making the same laudable effort to weigh the pros and cons of Black Studies programs, Fred M. Hechinger nevertheless concludes:

"The drive toward separatism in black studies is a reaction to the all-white history that has often been academia's standard fare. The 'black is beautiful' approach in history, as elsewhere is an absurdity comparable to, say, the 'white man's burden' concept. It is of little help in the task of weaving an honest non-racist pattern of history, research and teaching." [21]

One is prompted to ask how can supposedly knowledgeable people about Black America stray so far from reality in their assessments of Black Studies Programs? Is it naivete? Is it a lack of sophistication about what is happening in current American race relations? Is it purposeful distortion of the truth about Black American scholars in order to forestall what to many of us seems inevitable, namely a demand for a reordering of society in such a way that all men, regardless of color or condition of birth will and can experience the reality of the democratic experience? Whatever the answer, the charges hurled against Black Studies programs are far removed from what I have discerned to be the general pattern of their development. First of all, Black students are no more in revolt against the inequities of the system than are White students both in this country and abroad. If White students are calling for a return of scholars to the classroom so that they may both experience human contact with their professors and challenge them to relate learning to the cumulative knowledge of man about himself and his environment, so are Black students calling for the same measure of relevance with regard to the particular life experiences of Black people in America. If White students are calling for increased participation in the decision making process on issues that directly affect their life and their life chances, so are Black students calling for the same rights. If White students are increasingly looking beyond their own shores for clues to the universality of human oppression and human challenge, so are Black students becoming internationalized in their orientation. If White students feel frustrated about their chances for effecting change within the existing social system because of the imbalance of power between the "haves" and the have-nots" so are Black students selecting the universities and colleges of this country as testing grounds for proof of America's integrity and worth as the major democratic power in the world today. These are aspirations which Black students share not only with White students in America, but with "have-not" students in other parts of the world as well. But there are particular, *legitimate* aspirations which Black students seek to satisfy as Black students over and above the communality of concerns that they share with white students. Let me try to enumerate some of them.

Black students drawing upon a legacy from the past of educational, cultural and psychic damage imposed by Whites upon the Black community refuse to accept any longer fragmentary, pollyannish solutions to the very serious racial ills in this country. Whether they look at their older siblings or back upon the life experiences of their parents, they observe with bitterness and anger that their own chances for survival are not substantially better than it has been for other members of their family. Token integration and piecemeal improvements in the social and economic spheres are seen for just what they are—an insult to the intelligence and role perceptions of Black people who are supposed to be grateful for gradual progress.

The professional nigrah experts (white and negro) are fighting each other, each one trying to be the first to board the plane to Washington in order to testify about *our* problem . . . 'What we need is more housing, jobs, schooling, etc.,' is the expert's stock answer to what they perceive to be our problem. What these dumb hustlers refuse to understand is that many of the freedom fighters came out of the so-called better ghetto housing, better known as 'the projects' and also off the college campuses and that they in many instances were not hurting for lack of bread. We do *not* want housing, we do *not* want handouts—we want real (economic and political) power. Power with which we can build our own houses, design our own environment.[22]

The demand for a more equitable distribution of power within the Black and White communities in this country lies at the core of Black Studies programs regardless of the predominant racial population of the University involved. Black students know: That in order to confront the White power structures in their campuses, in their community, in their nation, and in their world, they need to see their survival as a function of their own organized strength and unity, thus the demand for more Black Study Programs, centers, Black Students and faculty.

Black students (and I consider myself a Black student as well as teacher), both past and present, know that next to the corporate structure, universities are perhaps the most racist enclaves within our social system. If one teaches or studies in a predominantly Black institution, he knows that the White professor on that campus is likely to enjoy a faster rise in the structure as well as earn higher pay than his Black colleague in the same institution. My experience, over recent years at Howard University, suggests that there is very little social or intellectual intercourse between White and Black faculty on staff. Nor is the picture brighter at predominantly White colleges and universities. During my freshman year at Fordham University, I was the only Black student enrolled, and I took an oath of no association with any of my classmates after they refused to permit me to attend our freshman class

Footnotes at end of article.

dance. In later years while teaching at Union College in Schenectady—where, somehow, Union could only manage to accept one Black student a year—I asked a Black student what was his social life like that year. He replied, "Dr. Moss, you know there is only one Negro girl at Skidmore (an all-girl college 50 miles away) and I'm the only Negro freshman at Union, so you know who I'm dating." Only up to recently, if a Black student, enrolled in a predominantly White institution, elected to live on campus, he had no choice but to live in practically all-white dormitories, where social tastes, events, and interaction was shaped and dominated by White students. The Black student had no alternative to this arrangement unless he chose to move off campus. Since Black students have seen the proportion of Black to White students in predominantly White colleges and universities move dramatically since the founding of the Republic from 0% to about .03% ten years ago to something slightly better than .05% this year, the possibility of any kind of Black cultural experience on the White campus is almost nil.

Is it any wonder then that Black students on white college and university campuses are calling for a substantial increase in the enrollment of Black and Puerto Rican students. Yet, I know of no major civil rights organization or leader—Black or White, who has even *threatened* to sue American institutions of higher learning for the social and cultural isolation which has been the Black students' lot to endure. If facts are needed to substantiate the pitifully small number of Blacks or Whites who attend integrated institutions of higher learning, one needs only to refer to recent statistics compiled and published in the *Chronicle of Higher Education*, April 21, 1969:

THE ENROLLMENT OF BLACK STUDENTS IN PREDOMINANTLY WHITE INSTITUTIONS

University of Alabama, 128 of 10,000.
Arizona State, 141 of 1,400.
University of Arkansas, 80 out of 7,000.
University of California at Berkeley, 381 of 16,000.
UCLA, 421 of 18,000.
University of Connecticut, 167 of 9,000.
University of Illinois, 690 of 22,000.
University of Iowa, 84 of 13,000.
University of Massachusetts, 158 of 12,000.
University of Chicago, 104 of 2,700.
Harvard University, 154 of 4,000.
University of Michigan, 546 of 21,000.
Princeton University, 95 of 3,000.
State University of N.Y. at Albany, 104 of 6,000.
State University of N.Y. at Binghamton, 40 of 3,000.
State University of N.Y. at Buffalo, 400 of 11,000.
State University of N.Y. at Stony Brook, 125 of 5,000.
Brooklyn College, 450 of 10,000.
Queens College, 222 of 11,000.
Hunter College, 270 of 5,000.
City College, 500 of 10,000.

What these statistics tell us is that even in the large State Universities, Black students comprise even less than one per cent of the total student population. The presence of Black faculty in these same institutions is miniscule.

I think that the all but token presence of Black Faculty on the campuses of predominantly White colleges and universities has been a particularly painful thorn in the side of Black students and scholars. Throughout my entire college career—Fordham University, The New School for Social Research, and Columbia University—I never had the experience of studying with or under a Black professor. Since my research for the Ph.D. was on Black Professors in predominantly White colleges in New York State, it was felt proper that a Black scholar experienced in research on racial integration should at least sit on my committee. Dr. Kenneth Clark of City University generously agreed to undertake the assignment that should have fallen within the province of a regularly appointed professor in the Sociology Department of Columbia University. I have always felt that research areas close to my heart—much influenced by the exposures and experiences I have had as an American Negro—were not those that fell within the professional concerns and interests of my peers or professors. Incidentally, throughout my whole tenure as a Ph.D. candidate at Columbia, I was the only Black student in residence. So the sociology that I learned, and the concepts which I intellectually internalized were all cast within the framework of white perceptions and white interpretations. Indeed, while many will dispute this, the sociology which I brought away with me from Columbia was the sociology of the White experience with its Anglo-Saxon and Teutonic roots. It certainly did not nor does it now touch, except peripherally, upon the sociology of the Black experience either in this country, in Africa or the Caribbean. I don't think the experience has been substantially different for most other Black scholars in America: Dr. Charles Hamilton of Columbia University recalls his experiences:

"I graduated from Roosevelt, I got a law degree from Loyola University and I got a Ph.D. from the University of Chicago. And I'm going to tell you very clearly that my education over that twelve to fifteen year period was geared toward making me a middle-class Black Sambo. Nothing devious in that, and I'm not blaming my professors. It's just that that was their orientation. They were saying to me in no uncertain terms that in order to succeed, I would have to orient myself to a Western Anglo-Saxon culture."

The White stereotyping of subject matter in the social sciences is strengthened and reinforced by White stereotyping of the "ideal" college or university professor. The middle-class, White, Anglo-Saxon, Protestant, male prototype of the university professor and administrator in the predominantly white college, is too well known to elaborately document here. But for purposes of this paper, he certainly is not Black. In fact, he is not even faintly brown. When the writer asked Dr. W. E. B. DuBois, the distinguished historian and sociologist, what he thought the role and contribution of the Black teacher in the White college to be, and this was over a decade ago, his reply was, "none, he's not even there." Ten years ago there were not more than 40 Black teachers in positions leading to tenure in all of the colleges and universities in New York State. This was about one third of the total number of Black teachers employed in predominantly White institutions across the country. Five years ago in a repeat survey, the number of Black teachers in New York State had increased to 70. Given the pitifully small number of Negroes who go on to complete the Ph.D. (the minimal entry requirement for permanent appointments in major colleges and universities), one can anticipate that there will not be a substantial increase in the overall supply of Black candidates for teaching positions in predominantly white institutions at any time in the near future. Ironically, however, although almost without exception, Negro holders of the Ph.D. degree received their degrees from major white institutions, they are almost universally confined to predominantly Black schools. I recall the remark made to me seven or eight years ago by a Black scholar who had just received an appointment as chairman of a department in a large Eastern university. When I asked him had he anticipated the possibility of such an appointment, his reply was: "I have earned an international reputation as a scholar in my field, and I was determined not to solicit or seek appointments elsewhere. If America was content to restrict my professional career to teaching within the predominantly Negro College, that was where I was prepared to remain."

More recently, I had the opportunity to discuss with the Dean of a professional school in a predominantly Black university the possibility of assuming a similar post at the University of Buffalo. When I asked him how he felt about leaving the university where he had demonstrated remarkable leadership in developing a school with a national reputation for excellence, he replied: "I am still relatively young in my professional career and I have gone as far as I can go where I am. I need new and more demanding intellectual and professional challenge if I'm to continue to set increasingly higher standards of performance for myself." In spite of the hue and cry raised by those critics of Black Studies programs who argue that there is a shortage of competent Black faculty to man such programs without raiding the staffs of predominantly Black institutions, there is still shameful underutilization of Black faculty who are able and willing to advance themselves through transfer to larger and more prestigious colleges and universities. The faculty recruitment standards of the State University of New York at Buffalo are high when compared with other major public or private universities in this country. The Select Committee for Equal Opportunity, anticipating Black Student demands for a larger number of Black faculty at the university, met with disappointing failure in its efforts to intensify Black faculty recruitment and appointment by individual departments within the university. When, however, the administration of the University set up a Black faculty recruitment task force, in late May of this year, and freed ten lines for such appointments, within two weeks the task force received more than sixty recommendations for new Black faculty appointments—mostly from within the university itself. Without damage to either traditional criteria or customary high standards, our ten slots were filled within a two month period. If predominantly White universities want to enlarge the number of Black teachers on their faculties, they can take steps immediately to enter into joint appointments with very able Black scholars in predominantly Black schools, sharing the expertise of these scholars between the two institutions. Since there are, perhaps, not more than two dozen Black scholars holding full professorships in major white institutions, they can include in their competition for such slots more Black professors locked in at the lower ranks in lesser White colleges and universities.

These institutions can begin to seriously look at their present cohort of Black graduate students to see what additional financial help and professional encouragement is needed in order to expedite their completing their Ph.D. work and thereby qualify for faculty appointment in their own institutions. Finally, graduate schools should tax their resources and recruit in larger numbers Black graduates from predominantly Negro schools and, with financial help where necessary and intensive academic support, enlarge the pool of Black graduate students from which Black teaching personnel may subsequently be drawn. Despite the almost total absence of Black teachers on White faculties in the United States, I know of no major civil rights organizations—Black or White—that have systematically sought to remedy this situation, or even threatened to do so. Black students need and should have the psychological perspective and dimension of a Grier and Cobbs, a Kenneth Clark and an Alvin Pouissaint as much as they need the insights and intellectual contributions of a Freud, Fromm or a Kurt Lewin. Black students deserve the sociological excitement of a C. Eric Lincoln, a Hugh Smythe, an Andrew Billingsley, a Hylan Lewis and an Oliver Cox as much as they can flourish and grow on the contributions of a

Talcott Parsons, a Robert Merton, a Paul Lazardsfeld or a Seymour Martin Lipset. Black students should be able to question the relevance of the anthropological teachings of an Elliott Skinner or a James Gibbs, as much as they are encouraged to test the theories of a Margaret Mead or a Carlton Coon. I do not want to be caught in the verbal trap as to whether or not there is such a thing as a Black psychology, or a Black sociology, or indeed, a Black anthropology. I do contend, however, that there are widening vistas of knowledge about human experience, that shaped and modified by varying cultural, social and even physical milieu can and do suggest possible recasting and reformulating existing theortical constructs and concepts about human behavior. That is what Black professors focusing on the Black experience in the Social Sciences can do for us and we should welcome it. Thus, the alienation and isolation of Black students from all but a mere semblance of their cultural roots and experiences makes their demands for substantial increases in the number of Black students, faculty and staff legitimate and compelling. I took the position earlier in the paper that current Black student demands reflect the long and unmet insistence of the Black community in America for full inclusion into the American social system. Dr. Gloria Joseph states the Black student position well:

"The black students' problems at the universities are largely based on the fact that White America has not included Black America in its mainstream of life. Now that numbers of intelligent, militant and dedicated black youths are demanding a first-class role, the institutions of higher learning should embrace them jubilantly. For in so doing universities have an opportunity to rectify one of our most glaring problems . . . If one were to examine the 'demands' made by Black students to their colleges, one would be hard pressed to find an unreasonable or irrational request. The vast majority of these demands and requests are things that the university should have implemented years ago."

Let's look at a sampling of the "demands" that have variously been described as "folly," "ridiculous," "fascistic," "stupid," "bigoted" and "paranoidal."

The Black Studies program at the University of Buffalo was conceived and designed by members of the Black Students' Union. It's chief architects were two Black Ph. D. candidates in History. The original proposal, though approved in principle by the Select Committee in the Summer of 1968, underwent several revisions before becoming the present working document for the program. With student consultation, Dr. Hollis Lynch, newly appointed as Associate Professor of History, was named as the first director of the program. Faculty members, both Black and White, teaching courses pertinent to Negroes were asked by the Black Studies Committee to consider reorienting their courses where feasible to take into account some of the more current issues and problems facing the Black community. Some professors were asked if they would be willing to initiate new courses that would focus upon one or more dimensions of the Black experience. Support from the faculty was quite gratifying. Twenty-four professors, mostly from the social sciences and the humanities joined the program as Associates. This Fall these men will be strengthened by the addition of 10 half-time faculty who will divide their time between teaching assignments in their respective disciplines and serving as core faculty in the Black Studies Program. Students can major or minor in Black Studies social sciences or Black Studies Humanities; with two courses required for admission into the Program:

Black Studies 100: The African Background: An introduction to the History and Culture of traditional Africa. Also to be surveyed are the slave trade, the black diaspora, survival of Africanisms in the New World and the attitude of New World Blacks to Africa.

Black Studies 200: The Afro-American Today: Problems and Prospects.

There is a strong international dimension to the Black Studies program at the University. The Black Studies Program in cooperation with the Council for International Studies at the University sponsored this past Spring one of three conferences on the subject of Africa and Afro-Americans, with participants drawn from the United States, Africa and the Caribbean. A second conference is scheduled for late Fall or early Spring in Ghana and a third for the latter part of 1970 in the Caribbean. Further inter-ethnic cooperation and support has been assured by the assignment of one of the most attractive buildings on the campus by the University as a Center for Inter-Ethnic Studies. The Building will house in addition to the Black Studies Program, a Black Student Lounge, an International Student's Lounge, Offices of the Experimental Program for Black and Puerto Rican minority students, the offices of the Select Committee for Equal Opportunity, library and research facilities for the Center for the Comparative Study of Race and Ethnicity, the African, Latin American, Pacific and European Research Committees, and the Offices for Foreign Student Affairs. The Black Studies Program is integrally tied in with a facility located within the Black community of Buffalo, formally identified as the Educational Service Center, but more popularly known as the "University of the Streets". At the Center, courses for credit and non-credit are offered on subjects of immediate bearing and interest to Black Students and members of the Black community.

I had come to know some of the Black women at Vassar fairly well during two visits on campus to discuss with them and the administration a proposed Black Studies Program. But the high point of my visits there was a session which I attended where the Students Afro-American Society (SAS) came in a body to present their "demands" to the Dean of the College: The slightly less than fifty students accompanied by a community leader and Ossie Davis, the Black actor, whose daughter was in the group, displayed a quiet dignity, calm and sense of determination that is so often the occasion of adult pride in this generation of young people. The students called for the establishment of a center for black studies in downtown Poughkeepsie. The center, for which funds will be sought independently, will engage in research into and offer courses "on the experience of being black as well as the education of black students in their history, their present situation in America, and the positive steps necessary for the betterment of their lives in the future." Study at the center will focus on such specific areas of action, as Black Philosophy, psychology of racism, Black religion and contemporary Black art. Although students will receive credit for work carried out in the Center, most of their college work will continue to fall within regular Vassar courses. The Director of the center may either be appointed as a member of an existing department, employing the traditional criteria for faculty appointments or may be appointed as an administrative officer upon recommendation of the Dean of the Faculty and the Faculty committee of the urban center. In either case the appointment would be made in consultation with the members of SAS.

Black students at Vassar have also proposed the creation of a black center on the main Vassar campus. This center will provide housing accommodations for a limited number of Black students and also serve as a cultural and social facility for other Black students. Finally, Vassar students have asked for the appointment of a Black advisor for black students, and a budget to support black-oriented cultural and educational activities on campus and in the community.

Harvard offers a final illustration of Black student maturity to which I would like to refer. At the invitation of a committee of Black students representing the Association of African and Afro-American Students of Harvard and Radcliffe, I spent a day on the Harvard campus discussing their plans for an Afro-American Studies Program. For one and a half hours, I enjoyed one of the most intellectually stimulating and provocative discussions that I have ever had barring age, race, sex or level of educational attainment. The topics ranged from political ideologies to parameters of Black student action within the Harvard structure, the Black communities adjacent to Harvard and the Black communities from which they come and to which many of them hope to return. As I discussed with them requisite qualifications for their first senior appointment to their program, it was evident that they had given much thought to this search. One student, a freshmen, remarked to me, "We want a man who is not only intellectually sharp in his discipline, but one whom we can be proud of when he stands up to speak for our program and for us before the faculty." The following are pertinent excerpts from the Harvard Report on American Negro Studies:

"Black students feel alienated from, even neglected within Harvard; but so, as we know, do many whites. Black students seek and expect 'relevance' from their Harvard education, but obviously they are not alone, at this time, in voicing such an expectation.

"However, the black experience is not simply a mode of the general student experience, it is different, and not merely in degree of intensity, from that of Harvard's white students . . . The absence of course offerings in many areas of Afro-American culture is emphatically a matter of more than academic or pedagogical concern to black students. Indeed, it seems likely that the absence of such offerings is the single most potent source of black student's discontent at Harvard . . ."

"Among black students there is a strong and definite, indeed presumably unanimous, desire for the creation of a social and cultural center for black students. Such a center is conceived as something of a counterpart of Hillel House, the Newman Center or the International Center."

The University Committee charged with responding to the above Black student concerns offered the following recommendations:

1. Development of undergraduate and graduate degrees in Afro-American Studies.

2. Appointment of new faculty members—term, tenure, and visiting—in Afro-American studies and other degree granting programs within the university to conduct these degree programs and offer appropriate courses.

3. Greater emphasis on the experience of Afro-Americans in courses offered by departments and committees.

4. Stimulation of increased research in Afro-American studies, throughout the university.

5. The establishment of a research center or institute concerned with Afro-American studies.

6. Among black students there is a strong and definite desire for the creation of a social and cultural center for black students. It is recommended that the dean urge all appropriate elements of the university to use their good offices in securing and financing a building and providing continued support to the activities of such a social and cultural center.

One can only conclude from the excerpts cited above that Black students are not asking for any diminution in the quality of education demanded by all students in American universities. Rather, they are calling for

increments to the higher educational process previously overlooked or ignored.

This generation of Black students in their demands upon our colleges and universities for an education relevant to their quest for equality in America, continues a tradition that spans over 200 or more years. Denied any meaningful role in the economic sector for American Blacks, education has been traditionally viewed as the most salient instrumentality for upward economic and social mobility in the United States. For some, like Phyllis Wheatley and Sojournor Truth, education was obtained through the paternal benevolence of a charitable slave master. Others such as John Chavis and Henry Russwurm secured their education in leading White universities, although their life's work was to be spent in behalf of enslaved Black peoples. Still others were to be first students, then teachers and finally administrators of the more than 200 predominantly Black colleges and universities located mainly in the South. Finally, Black students and faculty began the emotional and intellectual push into predominantly White institutions of higher learning. Out of this historic educational search for a wider, deeper, cultural and social outreach into American life, at no mean economic and personal sacrifice, have come the major core of Black leadership in this country, past and present. They worked against almost insuperable odds. They frequently made inhuman demands upon themselves in performance and goals—but they made it. It is in this same spirit and tradition that I view Black student development in the present period. They are telling us that they are prepared to come from some of the worst housing of any major minority group in the United States; that they have sustained some of the most serious educational damage, in some of the worst educational systems in our country; that they have had to run faster to catch up with advantaged Whites than any other disadvantaged minority; and that regardless of the cost in social tension and stress, there is no turning back for them. Nor is there any turning back for their universities either.

The presence of black students in the white college communities has been a jolt to many people who thought that the scholarly world would be immune to the problem of racism. It has brought some academic practices and habits of mind to the surface where they can and must be examined. Our universities and colleges are in an excellent position to help us understand and deal with the racial problem. There is no rigid formula to present to universities that would enable them to solve the problems that their institutions must confront and meet. Primarily, the colleges must realize that there is no overnight cure and that things cannot be swept under the rug. Indeed, to try to do so may be to guarantee a social explosion of incalculable dimensions. Rather, the task of the university is to face these problems squarely, openly, and compassionately . . . The problem of achieving a truly democratic campus may seem impossibly intricate, but there is no turning back.

While Black students deserve much more than they are demanding, they cannot, nor should not be asked to settle for any less.

MISREADING THE RECORD

HON. ANDREW JACOBS, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. JACOBS. Mr. Speaker, I found the following editorial from the Milwaukee Journal to be most incisive:

MISREADING THE RECORD

Richard Nixon came to the presidency asking people to lower their voices, to speak softly, calmly, responsibly. Yet at times he ignores his own advice.

At the recent Governors' conference he said of federal social programs during the Kennedy-Johnson era that, "far from solving our problems, these expenditures have reaped a harvest of dissatisfaction, frustration and bitter division." Then he declared: "Never in human history has so much been spent by so many for such a negative result."

What were the elements of this supposed disaster? They were things like medicare for the elderly; medicaid for poor families; aid to education that helped millions of grade, high school and college students; housing programs for millions of low- and middle-income families; spending for cleaner air and water, for hospital construction and health manpower, for libraries, for vocational rehabilitation, for attacks on cancer, heart disease, mental retardation, mental illness, street crime, juvenile delinquency.

Not all programs have worked well. Many mistakes have been made. Too many promises were uttered and not kept. But to characterize these and other federal efforts in the social field as a kind of collective catastrophe is nonsense. An enormous amount of good has been done. Significantly, the Governors, after politely listening to Nixon, came out in favor of enlarged federal programs in vital areas.

As for expenditures, they may appear relatively large, but often they have been tragically inadequate. Too many programs, such as the "war on poverty," were given enough funds to falter, but not enough to achieve dramatic breakthroughs. Despite howls about the cost of welfare grants to the poor, the nation spends at least twice as much on alcoholic beverages. The total outlay of the Department of Health, Education and Welfare in 1968 for over 250 programs (including social security) came to only 4.8 per cent of the nation's gross national product; defense took a bite twice as large.

Nixon, to be sure, has inherited troubles. But to attribute them so heavily to the activism of the Kennedy-Johnson era is to forget what matters would be like if the federal government had been docile and indifferent. Surely Nixon is not suggesting a return to the leisurely Eisenhower period, when a President would do such things as seek elimination of federal grants for water pollution control at precisely the time the problem was moving into the acute stage.

RURAL HOUSING—AN AID TO URBAN HOUSING

HON. JOHN M. ZWACH

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. ZWACH. Mr. Speaker, in the committee report for H.R. 13827, the Housing and Urban Development Act of 1969, the following is stated:

The Census Bureau projections for 1970 and other studies indicate that there are a total of 5.9 million substandard housing units in the Nation and that 4.2 million of them, more than two-thirds, are in rural areas.

Throughout my district, indeed, throughout many of my colleagues' districts, there is a crying need for housing. There is no question about it. And yet, could not our housing problems be contained if we would direct our priorities to solving the rural housing situation as well as the urban. All areas of our Nation need improved housing and we must begin today to give it. It is my belief that if housing in the rural area is improved the pressure on our cities will be proportionately reduced in this area.

Mr. Speaker, section 411 of H.R. 13827 covers rural housing in this bill. I support this section and hereby insert it in the RECORD so that all may know that we are moving in the right direction:

RURAL HOUSING

Section 411(a) would extend for a 1-year period from October 1, 1969, to October 1, 1970, the various rural housing authorities which would otherwise expire this year.

Section (b) removes the $100 million ceiling applying to the amount of unsold insured mortgages that can be held at one time by the Secretary of Agriculture.

The fund was taxed to capacity last year to make about 50,000 insured home loans, a volume which can be classed as only tokenism in terms of the Nation's rural housing needs, indicated by a backlog of 70,000 loan applications on hand at Farmers Home Administration in May of this year.

The Census Bureau projections for 1970 and other studies indicate that there are a total of 5.9 million substandard housing units in the Nation and that 4.2 million of them—more than two-thirds—are in rural areas. Moreover, this rural housing recession is even more severe when it is viewed beside census data showing that 46 percent of the Nation's poverty stricken—11 million people—live in rural areas despite the fact that rural America has only 30 percent of the Nation's total population.

Rural America suffers from a chronic shortage of adequate housing. In many rural communities the only source of loan funds, outside of Farmers Home, is the local bank. More often than not the bank's resources are too limited for it to extend long-term credit for housing while trying to meet other credit demands of the area it serves. The result is that Farmers Home has been—and is—the only vehicle consistently supplying mortgage funds at reasonable rates in most of rural America for credit worthy families

who cannot obtain loans from any other source.

Farmers Home Administrator, James V. Smith, testified before the House Banking and Currency Committee Housing Subcommittee that 300,000 assisted housing units must be supplied annually in rural America if the Nation's housing goals are to be met within the 10-year period established by Congress in the 1968 Housing Act. His estimate is one-half of the total assisted housing required annually for the entire Nation.

Meeting the assisted housing needs for rural areas alone will require an annual investment of at least $3.6 billion, or $36 billion for the 10-year period—and this is a conservative estimate when it is assumed that the average cost of assisted housing would be $12,000 per unit.

Again utilizing the $12,000 per unit figure, a conservative estimate for rural America's entire housing needs would be 780,000 units a year, or 7,800,000 units in 10 years. This in turn would require a total investment of $10.9 billion a year or $109 billion for the 10 years.

At first glance, such estimates may seem to be unrealistically high, but they are supported by data developed by the Commission on Mortgage Interest Rates which reported the average annual cost of the investment required to meet the Nation's housing goals is $49.4 billion. To say the least, this parade of figures makes it imperative that every effort must be made to marshal the resources needed to meet rural housing needs, which are far more severe on a proportionate basis than those of urban centers.

This is particularly true in terms of expanding the capacity of Farmers Home Administration since it is the only vehicle which has consistently supplied mortgage credit in rural areas and, under the present circumstances, it is the only vehicle which can be expected to do so in the future.

By the same token, there should be no hesitancy to recognize and respond to the needs of Farmers Home through the special assistance fund of the Government National Mortgage Association. Farmers Home should receive treatment proportionately equal to that afforded to all other Government housing programs.

Section (c) would amend the Rural Housing Act to enable the Secretary of Agriculture to sell insured notes in blocks, as well as individually. These transactions are to be treated as the sale of assets for budgetary purposes. Proceeds from the sale of such notes would be invested in insured mortgages, or part interest therein, so that the investment of the purchaser would remain constant over a period of time.

At present Farmers Home is restricted to the sale of individual mortgage notes to investors. Under the best of circumstances, this arrangement must be described as awkward. The nonstandard character of the paper now requires that purchasers keep records on the notes, which are subject to return to Farmers Home for periodic servicing as well as liquidation. They also create the task of continual reinvesting of the proceeds by the investor.

These circumstances are viewed as troublesome by investors, with the result that Farmers Home must pay ¼ to ¾ of 1 percent more in interest rates as compared to other Government agencies when it sells its paper on the open market.

These conditions contributed to a crisis in Farmers Home last spring when it had a very large backlog of unsold paper which could not be moved on the open market—beset then, as it is now, with a high interest-tight money situation. The amendment is proposed to streamline the structure under which Farmers Home sells its notes so that its paper can be purchased and handled as similar obligations normally are.

Section (d) amends the act to allow Farmers Home to make advance commitments to builders so that a number of homes can be constructed at one time where a definite market exists. Thus, a far greater number of homes, possibly at lower costs due to volume construction, can be provided in a given time period. As it stands now, Farmers Home is authorized to obligate funds only after a loan is approved and the contractor starts construction only after the loan is closed, with the result that building is done on a single-unit-at-a-time basis. Volume construction is made virtually impossible. Under this amendment, Farmers Home could agree in advance to make home ownership loans to qualified families for houses built in accordance with approved plans and specifications and for sale prices that do not exceed the appraised value and other specified limitations. The builder would understand that the house is his responsibility until all Farmers Home conditions have been met and the sale has been completed.

Section (e) amends the act to merge the Farmers Home Administration direct home loan program with the insured home loan program.

Until 1965 Farmers Home was restricted to making direct loans only. In that year Congress, in order to significantly expand the home loan capacity of the agency without a corresponding increase in annual appropriations, created the insured loan program with an allocation of $100 million. The insured loan program was inaugurated through establishment of a revolving fund with the sale of insured notes on individual mortgages in the open money market, bring private money into the program. Specifications governing the operation of the insured loan program have meant that, from 1965 on, almost all the home loans approved by Farmers Home for low and moderate income families were made through the insured loan account which, as stated earlier, is totally inadequate to meet rural housing needs. Since that date, the main focus of the direct loan program has been on the issuance of relatively small loans to low income families for home repair purposes, and for loans to persons whose homes were damaged or destroyed as a result of a natural disaster. During the following years the payback on outstanding direct home loans, coupled with the appropriation that was made in preceding years, has produced about $250 million in uncommitted funds in the direct home loan account. These funds are desperately needed for the insured home loan program because almost all home loans are being made from it. Merging the direct home loan fund into the insured home loan fund will assure the utilization of money which was specifically appropriated for home loan purposes. In addition, the amendment would serve to streamline the Farmers Home loan program.

All Farmers Home Administration loans being made are, in essence, direct loans, whether they are insured or not because borrowers receive the funds from the agency. The difference between the two rests on the fact that, in the case of direct loans, a number of years pass before the borrower is able to refinance the loan and retire the obligation to Farmers Home whereas, in the case of insured loans, the money is replaced within a year through the sale of notes on the open market. Over the years it has become apparent that there is little logic in having two separate housing loan accounts.

It should be emphasized that the amendment in no way diminishes the authority of Farmers Home to continue making direct home loans. The importance of such loans cannot be overemphasized since they provide the only avenue for many low-income rural families to finance improvements that move them toward adequate housing.

Section (f) repeals the 5,500 population limitation which applies to areas in which Farmers Home now serves. In effect, the Secretary of Agriculture is left to determine what areas of the country are basically rural in nature and, therefore, can be served by the agency.

The rural housing programs of the Farmers Home Administration have reached with increasing effectiveness into most of our small rural communities. But because of the arbitrary 5500 population limit in section 520 of the act, many families living in other areas which are just as truly rural have not had access to credit needed for decent and adequate housing.

The committee's purpose in proposing the repeal of section 520 is to remove an arbitrary fixed barrier and, instead, entrust to the agency which has had 20 years of experience in administering rural housing loans, the responsibility of defining rural areas in a manner consistent with the basic purpose and limitations of the title V program. Rural areas should be defined by the agency so that the program will be able to serve families living in a community which is truly rural even though its population exceeds 5500 or it lies within the boundaries of a municipality containing a total population in excess of 5500.

The committee does not intend that rural areas be defined so as to permit rural housing loans to be made in a community which is geographically or economically part of or closely associated with an urban or suburban center or complex or in any other urban-type community where home mortgage credit is normally available to low and moderate income families in adequate supply.

It should be clearly recognized that even with the expanded capacity of its insured home loan program proposed in this act, Farmers Home will, at best, be able to finance little more than half the assisted home loans required to meet the Nation's housing goals as they apply to low- and moderate-income rural families.

The gap between need and response is even more pronounced if the requirements of families at or below the poverty level are viewed alone. Over the past 20 years Farmers Home Administration has provided financial assistance for approximately a quarter of a million rural families through its housing programs but there still are some 4 million families living in substandard homes in rural areas.

None of this is meant to slight Farmers Home, which has done an excellent job despite the restrictions of inadequate loan funds, administrative budget, and staff. Nevertheless, these restrictions, even with some expansion of the insured home loan program, gives rise to the question of whether this agency can realistically be expected to meet the housing needs of rural America.

It was never the intent of Congress to make Farmers Home responsible for all the insured and assisted housing loan requirements of rural areas. But it clearly was the intent of Congress that the Department of Housing and Urban Development is to serve the entire Nation, both rural and urban and that in fact HUD was created to be the Nation's housing department.

An analysis of cumulative figures supplied by HUD for its low rent public housing projects, 221 housing program and water and sewage programs leaves no doubt that the vast bulk of that Department's resources have been concentrated in the Nation's urban centers and that rural America has been virtually excluded from the assistance that it by law is supposed to provide.

As of December 31, 1967, HUD had provided a total of 680,664 low rent public housing units for the Nation, but only 100,090 units, or 14 percent of the total, were for rural communities of 25,000 population or less.

As of March 31, 1969, HUD has provided 150,285 units under its 221 assisted housing program, but only 4,847 units, or 3.23 percent of the the total have gone into rural America.

The conclusion to be drawn here is that the Nation has two housing programs, nei-

ther of which is even approaching adequacy in terms of rural housing requirements. If the Nation's housing goals are to be met—including those of rural America—then the structure, funding, and operational procedures of both HUD and Farmers Home should be closely examined from the point of view of developing necessary improvements.

PARTNERS OF THE ALLIANCE

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. OTTINGER. Mr. Speaker, one of today's most impressive and energetic overseas programs is the Partners of the Alliance—a unique and successful conception joining States of the United States with similar areas in Latin America. They are united by the common goal and desire of working together to attain social and economic development through a people-to-people relationship.

An article describing the Partners' activities in Latin America recently appeared in the National League Journal and I am pleased to insert it herewith for inclusion in the RECORD:

THE ALLIANCE HAS MANY PARTNERS

On May 14, 1969, in Salt Lake City, 350 delegates from 17 hemispheric nations rose to their feet and cheered as they unanimously adopted a special resolution requesting air transport assistance for the movement of program volunteers and donated equipment in grassroots projects of the Partners of the Alliance program.

Their action was not the result of convention platitudes and resolution-passing, but of a demonstrated need.

In 1968, funds provided through the National Association of the Partners of the Alliance by A.I.D. enabled 350 program volunteers to work on Partners projects. During the same period, private donations in the United States enabled 1200 project volunteers to travel in Latin America, and funding from Latin America enabled 560 Latin American volunteers to work on activities in the United States.

Last year, more than 660 tons of new and carefully screened used equipment were shipped to Latin American Partners through privately arranged means.

The tragedy, however, is that the Partners committees in the United States could have made available several hundred more professional and technical volunteers and literally thousands of tons of hospital equipment for rural hospitals; tractors and other implements for agricultural schools or cooperatives; educational equipment and supplies; steel cable for suspension bridges to bring isolated villages into national life; generators; engines; new books for libraries; rice hullers for Amazonian settlements; and countless other types of commodities for people-oriented projects.

The problem was transportation.

This was the setting in Salt Lake City when the private sector leaders from throughout the hemisphere sprang to their feet and cheered in support of the resolution which called for the assignment of one airplane to the Partners of the Alliance . . . one airplane to be devoted to bringing together the citizens of the Americas in an action program dedicated to the cause of understanding and peace.

The airplane—and the program itself—can be justified by the cost-benefit ratio in terms of dollars, but the real value of the Partners of the Alliance and the contribution which could be made by the assignment of the air transport is to be found in the intangibles which come from people working together with people in a spirit of partnership.

After the resolution was passed, a petition was presented to the Assistant Secretary of State for Inter-American Affairs, Charles Meyer, by action of the delegates to the IV Interamerican Conference of the Partners of the Alliance.

But what is the Partners of the Alliance? Who are the people who met in Salt Lake City, and what are they trying to do?

The Partners are people . . . people doing something about hemispheric understanding by working together in an action program. They are men and women of many fields of interest bound together by a common determination to help make the hemisphere a better place in which to live.

They are such men as Rex Baker of Houston and Arthur Tonsmeire of Mobile; Royden Derrick of Salt Lake City and Hickman Price of Washington, D.C.; Will Pirkey of Denver and Edgar Ribas of Curitiba, Brazil. They and thousands of their private sector colleagues from throughout the hemisphere are working in the cause of orderly development and hemispheric peace.

In its early days, the Alliance for Progress was little understood by people throughout the hemisphere, and while its goals were nobly expressed in the Charter of Punta del Este, its translations in terms of citizen participation was lost in the organizational drive of government-to-government programs.

To the rural campesino or to the citizen living in the barrio of an urban area, there was little understanding and little visibility in the early stages of building a savings and loan system even though such a system would help meet the basic need of housing and ultimately have high visibility. The expansion of institutions of higher education, the development of distant ports, the improvement of communications, and the effect of agricultural research were lost in the maze of day-to-day problems of the campesino or barrio dweller.

To them, the Alliance for Progress had meaning to the degree to which there was response to their own self-help efforts . . . a roof for a school which they had constructed of adobe; a pump for the well they had dug; hand tools with which to convert a trail into a farm-to-market road; or a loan to a cooperative for the purchase of a truck to haul products to market.

These high-impact but economically low-priority activities could not fit into the nation's economic development plan. The citizen level initiative, however, reflected the spirit of the Alliance for Progress at its best.

While a need existed to respond to local level self-help activities in Latin America, many citizens and private organizations in the United States were ready and willing to help. In the early days of the Alliance, those who were working in the government-to-government programs were asked by highly skilled and motivated individuals, "What can I do? Is there a constructive way in which I or my organization may give of time or means to the Alliance?"

The answer could have been, "Write your congressman and ask him to support the foreign aid bill." This, however, would have been neither effective nor appropriate.

While support of the AID appropriations was vital, the people wanted to be involved directly. No means existed, however, to articulate that interest in the form of an operational program of private citizens.

In bringing about involvement of people at the grassroots level, another factor had to be considered, the factor of human dignity. The people of Latin America, just as the people of the United States, strongly resent and properly reject any program which is put forward in a patronizing way. While real and recognized needs in the economic and social areas were receiving attention, very little thought was being given to the contribution which Latin America could make to the United States.

A need existed to bring the people of Latin America into the role of participants, rather than recipients. Combining this principle with the fact that the people of other American Republics have much to contribute to the United States, we had the elements of "partnership" activities which give full recognition to importance of "dignidad." Private sector groups in the United States can respond to local self-help efforts in Latin America, but they can also receive contributions from their Partners in the form of touring art collections, visiting teachers in language, music, art, history, and other fields.

Thus, the Partners of the Alliance was born of a set of opportunities, as well as needs.

First conceived on a cold and bouncy train ride from Puno to Arequipa on the high plains of the Peruvian Andes, the Partners of the Alliance now involves citizens in 37 states and 37 areas in 16 Latin American nations. The goal: to bring people into the action orbit of the Alliance for Progress, and by so doing establish friendships that transcend not only official national borders, but national differences in terms of official policies on trade or aid.

The Partners of the Alliance office in AID was established to serve as the initial catalyst to bring together private citizen groups in the United States and Latin America. Partners of the Alliance committees are formed on a state-wide basis by interested leaders in the fields of education, business, health, labor, agriculture, and finance. Civic clubs, student groups, trade associations, and individual citizens can participate through the instrument the Partners committees.

Following the formation of the counterpart committees and after basic information has been exchanged, funds provided by the Agency for International Development are made available for the transportation and per diem expenses of a "program development team" representing the U.S. Partners committee to meet with the Latin American Partners organization.

For approximately two weeks, the U.S. team visits schools, hospitals, agriculture projects, rural medical posts and hospitals. They eat the dust and wade in the backwash of the rivers. The final two days of the team visit are given to discussions from which evolve mutually identified projects of a self-help nature which the Partners will implement from private resources.

Most Partners projects fall into the categories of: (1) education, (2) public health and medicine, (3) agriculture and rural development, (4) business and industry, and (5) cultural exchanges.

By March of 1969, the U.S. Partners had been responsible for a flow of more than $13,000,000 in hard contributions to their Latin American partners. This figure does not include another $2,000,000-plus from Partners-inspired foundation assistance.

Nor does it include very significant contributions in the form of packing, shipping to port, transporting donated equipment by sea or air, room and board for students on scholarships or for volunteer participants from Latin America, or local administrative costs and a significant amount of local and international travel.

As the resolution says, one airplane—designed for purposes for war to be converted to serve the cause of peace and understanding in the hemisphere—is wanted by the Alliance for Progress Partners of the Alliance.

POINT REYES NATIONAL SEASHORE

HON. JULIA BUTLER HANSEN

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mrs. HANSEN of Washington. Mr. Speaker, much has been written and said during the past several weeks with regard to the preservation of the Point Reyes National Seashore as a unique and pleasant recreation area to be enjoyed by the people of this Nation.

The Point Reyes National Seashore was authorized by Public Law 87–657, enacted September 13, 1962. This legislation provided an authorization for the appropriation of $14,000,000 for the acquisition of land and waters and improvements thereon, and interest therein, and incidental costs relating thereto in accordance with the provisions of the act.

Approximately 4 years later, Public Law 89–666, enacted October 15, 1966, increased the authorized appropriation from $14,000,000 to $19,135,000.

To date, a total of $19,135,000 has been appropriated pursuant to the provisions of the authorizing legislation for Point Reyes.

In the meantime, Mr. Speaker, for various reasons, principally the escalation of land prices in this area, it has been determined that an additional appropriation of funds for land acquisition of between $47,000,000 and $57,000,000 is urgently required for the acquisition of the remaining acreage at Point Reyes. According to information furnished the House Appropriations Committee, approximately 20,000 acres have been acquired of the total 53,000 acres authorized for acquisition.

The current crisis is caused by the fact that much of the acreage still to be acquired by the Federal Government is facing the immediate threat of development by various construction contractors. Naturally, if this should occur, the price of the developed acreage could increase to the extent that the Federal Government would be unable to acquire it.

The House Committee on Appropriations on numerous occasions has been implored to "do something to save Point Reyes." Mr. Speaker, I take this opportunity today to make the record clear that there is not much we can do through the appropriations process at this time and place to alleviate the current predicament.

The full amount of the authorization has been appropriated. We cannot appropriate additional funds for Point Reyes until the authorization has been increased. In view of the current position taken by the Bureau of the Budget, even if we did have the additional authorization and additional funds were appropriated, I cannot be certain such action would ease the Point Reyes situation. The Bureau of the Budget says it is necessary to limit expenditures in view of the current budgetary situation, and that priorities must be drawn.

The recent amendment of the Land and Water Conservation Fund Act provided that a total of $200 million would be available each year for 5 years for the acquisition of recreation areas. The budget estimate we received for fiscal year 1970 was for $124 million. That was the amount appropriated. Previous experience has shown that when the executive branch is disinclined to use funds for a particular activity, even though the Congress may appropriate additional funds, the excess appropriation is very likely to be placed in budgetary reserve.

I have followed very closely the dialog my colleague, the esteemed chairman of the Interior and Insular Affairs Committee has had with the Bureau of the Budget with regard to the use of land and water conservation funds. I must say that I am in agreement with his philosophy, that it is useless for Congress to authorize new parks and recreation areas if the executive branch is not willing to allocate funds for their acquisition.

So that there will be complete understanding of the problem involved, I am inserting in the RECORD a copy of the letter of September 10, 1969, to Hon. WAYNE N. ASPINALL, chairman, Committee on Interior and Insular Affairs, from Mr. Robert P. Mayo, Director, Bureau of the Budget.

BUREAU OF THE BUDGET,
Washington, D.C., September 10, 1969.

Hon. WAYNE N. ASPINALL,
Chairman, Committee on Interior and Insular Affairs, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: This letter reflects the separate views of the Bureau of the Budget which the Department of the Interior advised your Committee we would be transmitting in regard to several bills establishing new Federal park and recreation areas or increasing the monetary authorization for such areas.

As you know we have been deeply concerned over land acquisition problems and particularly the problem of escalating land costs as they have related to the acquisition of areas for Federal park and recreation purposes. We know that your Committee has fully shared our concern.

We believe there is general agreement that agencies should acquire parks and recreation areas as promptly as possible after authorization in order to (1) avoid the cost of prolonged land price escalation; (2) avoid the possibility of adverse developments in the authorized areas; and (3) minimize the period during which property owners are adversely affected by imminent Federal acquisition. However, despite a substantial increase in the funds available for parks and recreation land acquisition through the Land and Water Conservation Fund, in many cases it has not been possible to acquire the properties necessary for properly administrable areas.

While our concern extends to all three Federal agencies for which amounts are budgeted under the Land and Water Conservation Fund, the National Park Service accounts for the largest and most specific share of the commitments against the fund and typifies the problem that concerns us. We can illustrate the problem and its implications by discussing the acquisition program for the National Park Service.

The acquisition program for the National Park Service after FY 1970 would cost about $275 million assuming no new areas are added and assuming current land prices. While we do not know at this time what the 1971 fund availability for the National Park Service land acquisition program will be, we see little likelihood of the FY 1971 program being larger than the FY 1970 program. In fact, even to maintain the 1970 level of program obligations will require substantially increased budget authority, since the 1970 acquisition program is being financed in substantial part by balances carried over from prior years, all of which will be used during 1970.

If budget constraints approximately equal to the present ones continue in 1971, 1972, and 1973, and *at current prices*, the Department of the Interior will not be able to complete its program for land acquisition in existing areas by the end of fiscal year 1973, when the current augmented fund authority expires. Thus, even without authorization of new areas and under optimistic assumptions about the stability of land prices, deferrals in the Park Service land acquisition program in recently authorized areas or a reduction in the amounts proposed for acquisition of inholdings in older areas, or both, will probably be necessary. The allocation of funds for acquisition of areas yet to be authorized would require still greater reductions in funds for acquisition of existing areas or inholdings. This would also be the case if funds were allocated under proposed increases in land acquisition authorizations, as for Point Reyes.

Even if the 1970 budget authority for the National Park Service were doubled in 1971, 1972, and 1973 to $75 million annually—which would utilize less than the total authorization available—not more than $44 million would be available for not yet authorized Park Service areas. (Some additional amount would be available for acquisition of not yet authorized Park Service areas if it is unnecessary to use the full amount authorized for appropriation for the Redwood National Park.) However, in order to have as much as $44 million available for such new areas the present constrained levels of inholding acquisition by the National Park Service would have to be maintained during those years. Also, to the extent land prices increase above their present levels some part of the $44 million would be absorbed just to complete acquisition of already authorized areas.

This difficult situation, which has continued despite augmentation of the funds available for land acquisition purposes, has led us to give a great deal of thought to the possibility of developing and establishing generally acceptable priorities for proposed areas. We have been unable to accomplish this within a time frame that would avoid unduly delaying Congressional consideration of pending legislation.

The priority of a particular area seems to us to be a complex product of perhaps six principal and several additional factors, most of them highly judgmental. These six principal factors are: (1) the priority of the principal Federal purpose to be served by the area (bearing in mind that areas are authorized for a wide variety of purposes), (2) the overall quality of the area for its principal purpose (recognizing that most areas are authorized for more than a single purpose), (3) the relative supply of other areas serving a similar purpose for potential users as well as the number of such users and the proximity and accessibility of the area to them, (4) the relative cost of the area compared with other areas which would serve a similar purpose, (5) the threat to the area by conflicting purposes or adverse development, and (6) price escalation potential, particularly as escalation might be affected by authorization.

While we believe these are the key factors, we have not as yet been able to apply them in sufficiently precise fashion to provide a clear and objective basis for allocating a higher or lower priority, for example, to Point Reyes acquisition than to Cape Cod, or to give a seashore recreational area higher or lower priority than areas with other principal purposes. We believe, however, that these criteria are appropriate ones for both

authorizations and appropriations involving land acquisition for park, monument, and recreational purposes. We intend, therefore, to work further on this difficult task with Interior and other interested agencies, especially through the Environmental Quality Council.

While in the circumstances we would have no objection to enactment of H.R. 3786, increasing the authorization ceiling at Point Reyes National Seashore, H.R. 1187 and H.R. 5246, increasing the authorization ceiling at Cape Cod National Seashore, or S. 853, establishing the Sawtooth National Recreation Area, we must reiterate that funds likely to become available will not be sufficient to permit acquisition of such areas without extensive curtailment in already programmed land acquisition.

Sincerely,

ROBERT P. MAYO,
Director.

WAS THIS TRIP REALLY NECESSARY

HON. JOHN KYL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. KYL. Mr. Speaker, the following article was written by Reporter Tom Kuncl for the Davenport, Iowa, Times-Democrat. I believe the story should have wide distribution.

IOWA BOY'S "TRIP" PROVES NEARLY FATAL

(By Tom Kuncl)

He didn't answer roll call at Davenport West High School last Wednesday morning.

The boy was "off on a trip."

A drug trip, that filled four days with terror and pain, and nearly killed him.

When they found him last Saturday in Blue Grass he wasn't a boy anymore. He was like a whimpering animal, only half conscious, sobbing mindlessly in pain.

Wearing only undershorts and socks, he had run through the timber for a day, maybe two days. He doesn't know for sure.

Hundreds of cuts criss-cross his arms and chest. His hands and legs are gashed and swollen with infection. His knees look like raw hamburger because for some part of his tortured journey he crawled through rough country on his hands and knees.

Much of the skin from both his ears has been torn away. From his nose, too. Even his eyelids are cut above his vacant and staring blue eyes.

He ran through barbed wire, through brush and corn and bumped into trees and limbs, but doesn't remember much of it.

What he can remember is being patiently drawn out piece by piece by Scott County deputy sheriffs who have been with him in the intensive care unit of Mercy Hospital, Davenport, for many hours since he was found.

Saturday night, Deputy Ken Paulsen was sure that what had happened would never be known.

"The doctor said we were going to lose him because of what the pills had done. So we prepared to try for a dying declaration from him, to try and find out where he had got the stuff," Paulsen said.

"I'd rather have taken a beating. I didn't know how to tell a 15-year-old kid he was going to die," Paulsen said.

To take the dying declaration, and satisfy the law, Paulsen would have had to give it to him straight—that he was going to die.

Someone pulled a miracle, and the boy lived. Monday a Times-Democrat reporter listened at his bedside as he tried again to put the story together for Sheriff William Strout and Paulsen.

He headed for school Wednesday morning and met a friend outside. They didn't go in, but hitchhiked to Blue Grass and went to the house of another boy whom they both knew. There was another guy there, too. He had some pills.

"He had some that were black and yellow and some that were green and yellow. He had some more that were white and red.

"He was high and said he had some real good stuff, and it wouldn't hurt you unless you got an overdose.

"He said he could build me up to the right level and then taper it off," the boy in the hospital bed said.

Through the first day he remembers taking 10 of the capsules which he guessed contained a drug the junkies call "Speed." After that he doesn't remember another thing until three or four days later when he found himself in the woods, with most of his clothing gone.

"It started to rain and I hollered and hollered for help, but nobody could hear me. I was on my knees and I couldn't make my legs get me up.

"I tried counting to three and then pulling myself up, but I couldn't

"I crawled out of there on my hands and knees and finally I was in front of this house and I tried to get in.

"The woman who came to the door must have been alone and she must have been afraid when she saw how I looked, she wouldn't let me in," he said.

The woman called police and the boy continued to crawl on his hands and knees into a nearby garage. They found him there and took him to the hospital.

His mother and father were stunned. They had reported the boy missing when he failed to come home from school. They were sure that something had happened, but nothing could prepare them for what they saw at the hospital.

"We were sure he was going to die, it just didn't look like he could make it," his father said.

"We'd talked to him about drugs before. His brother had been in California and seen what it could do. We thought we'd told him all the right things," his mother said.

Did they think something like this could ever happen to their son?

"You want to believe they have more sense," his father said.

"Every parent must be afraid it could happen. Now we know it can happen," his mother said.

The anguished mother said that when her son became able to speak again he told her he thought God had deserted him, out in the timber, when he couldn't get to his feet.

"I told him maybe it was the other way around," she said.

"We've tried to be religious people," his father added.

In the hospital room. Strout asked the boy, "Why?"

"I didn't think anything like this could happen. He said it would be a good trip. Then I was in the woods and I thought 'I'm going to die down here, and no one is ever going to find me.' "

"Never again," he said, "Never again. I know it all now. I know all about it. There's nothing in it. Nothing for anybody."

Strout said Monday his department is continuing to put the pieces together.

One of the major problems in such cases is getting solid enough evidence against "dope pushers" to make a criminal charge stick.

"It's got to be stopped and stopped fast," Strout said, "or it's going to be out of control here.

"The youth is still in a dazed condition and efforts to question him about the identity of those responsible are slow at this point," Strout said today.

The investigation is continuing as the sheriff's offices seek those responsible for supplying the drugs.

"I wish every parent of teenagers could see the terrible condition of this boy to be convinced of the danger in use of drugs," Strout said.

"There's got to be more education. The government has got to get behind it; these kids have got to know what this stuff can do to them," he added.

For the boy's shaken parents there is anger and sorrow in the wake of what happened to their son.

"If I ever saw the kid that gave him those pills I would kill him, and I'd do it slowly," the boy's father said.

But in their shock the parents want also to help.

"You tell the real story," his father said. "Our boy has learned his lesson, but how many other kids are playing with drugs?"

"If I didn't think it would hurt his recovery I'd ask the high schools to send every one of their classes to the hospital to take a look at him," his mother said.

"They couldn't want to take a chance with their lives after that."

M-DAY FROWNED UPON BY MAJORITY IN SURVEY

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. BOB WILSON. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following:

[From the Los Angeles Times, Oct. 18, 1969]

M-DAY FROWNED UPON BY MAJORITY IN SURVEY—SINDLINGER POLL OF 995 PERSONS FINDS RISE IN SUPPORT FOR NIXON'S VIET POLICY

NEW YORK.—A majority of Americans polled following national moratorium day were unsympathetic to the antiwar demonstrations and an even larger percentage endorsed President Nixon's Vietnam policies, it was reported Friday.

Sindlinger & Co., a marketing and opinion research organization in Norwood, Pa., conducted the survey by telephone Thursday, the day after the moratorium observance, questioning 995 persons throughout the country. Most of those questioned were over 25.

NIXON BACKED BY 68.5 PERCENT

The firm said that of the 78.6% who knew about moratorium day, 57.4% thought it was "an overall bad idea," 31.7% thought it was an "overall good idea" and 10.9% had no opinion.

Asked whether they believed Mr. Nixon "is doing all he can to settle the war in Vietnam," 68.5% said "yes," 20.9% said "no" and 10.6% had no opinion.

This was a rise in support for Mr. Nixon's Vietnam policies since a similar Sindlinger poll conducted in September. In that poll 61.5% of those questioned supported Mr. Nixon on Vietnam and 23.3% thought he could do more.

The support did not, however, reach the level of a Sindlinger poll in June when 72% backed Mr. Nixon and only 13.4% thought he could do more to end the war.

Albert E. Sindlinger, president of the firm, said it was significant that the percentage of persons with no opinion dropped from 15.2 in September to 10.6 in the latest poll.

"I think the moratorium actually solidified support for Nixon," he said, "The people

we questioned were more vocal on this than on any survey we have ever done before."

Of those who did not endorse Mr. Nixon's Vietnam policies in the new poll, 67.9% wanted the war stopped with an immediate troop withdrawal and 27.6% wanted the war stepped up to "get it over with." The remaining 4.5% believed that Mr. Nixon should concentrate on domestic problems which they considered more important than the war.

NO LITTLE PROBLEM—NICKEL

HON. JOHN S. MONAGAN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. MONAGAN. Mr. Speaker, I am deeply disturbed with a problem that confronts a large number of small manufacturers in Connecticut, attributable to prolonged strikes of Canadian nickel producers.

I have called upon the Secretary of the Treasury, the Honorable David M. Kennedy, to take immediate action to release nickel from the Treasury Department's reserve supply in the interest of the economic welfare of manufacturing firms and their employees who rely upon a normal nickel market. I have called upon the Treasury Department to release nickel because it is my understanding that there is on hand 40 million pounds of nickel, an accumulation equal to 4 years' supply for coinage.

There are strong indications that settlement of the Canadian strikes is imminent. However, it is anticipated that following settlement of the strikes there will be a period of several months before the nickel market can be expected to return to normal. For this reason I have asked the Secretary of the Treasury to act immediately and I urge my colleagues who recognize the urgency of the situation to join with me in this effort.

I enclose herewith a copy of my letter to Secretary Kennedy.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., October 21, 1969.

Hon. DAVID M. KENNEDY,
Secretary of the Treasury,
Washington, D.C.

DEAR MR. SECRETARY: I am writing to you in the interest of a large number of metal products firms in the State of Connecticut which face serious financial difficulties because of the high cost of nickel and the difficulty of obtaining supplies. I am hopeful that the settlement of the STELCO of Canada strike will serve as a pattern for other settlements and help restore the nickel market to normalcy.

Despite this one settlement and the prospect of others, however, it is apparent that there will be several months delay before the nickel shortage is eased.

In the interest of the economic welfare of the manufacturing firms and their employees who rely upon a normal nickel market, I urge that you take immediate steps to release nickel from the Treasury Department's reserve supply. I am informed by official sources that the Treasury Department currently has 40 million pounds of nickel in reserve which, I understand, is a four-year supply.

I am hopeful that action to release nickel may be completed administratively, but if Congressional action is necessary I am immediately available to cooperate with you toward that end. It is urgent that immediate action be taken.

Sincerely yours,

JOHN S. MONAGAN,
Member of Congress.

KINGMAN BREWSTER'S VIETNAM MORATORIUM ADDRESS

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. OTTINGER. Mr. Speaker, much has been said and written about last week's Vietnam moratorium and those who planned and participated in it. On reflection I was impressed not only with the order and decorum of those events I attended and at which I spoke but the many profound statements made by a good number of speakers at observances throughout the country. One of the most impressive was the speech by Yale's Kingman Brewster at New Haven.

The New York Times' Anthony Lewis has captured the spirit and intent of the moratorium and, particularly, Brewster's remarks and I am pleased to insert his article in the RECORD:

[From the New York Times, Oct. 17, 1969]

A THOUGHTFUL ANSWER TO HARD QUESTIONS

(By Anthony Lewis)

NEW HAVEN, CONN., October 16.—There was no ambiguity in this city about the effectiveness of the Vietnam Moratorium. It was a moving, an unforgettable expression of deep public desire to get the United States out of the war.

The police said there were 50,000 people at the meeting on the Green, which would be a third of New Haven's population. It was a mixed crowd, old and young, square and hip. And the speakers also covered the spectrum, old-style politicians and reformers, white and black, leaders of business and labor. For two hours they sounded the theme that we must get out.

But even in New Haven, one could not forget that there are Americans on the other side. A sound-truck filled with counter-demonstrators circled the Green, bearing a savagely simple sign: "Destroy, Not Appease."

And in Washington it is clear that the politicians worry about the other side. They fear that if things go wrong after an American withdrawal—if people in South Vietnam are killed, if respect for our other world commitments is eroded—there may be a delayed and damaging public reaction. Some call this fear the Weimar syndrome, one aroused by memory of the German feeling after World War I that victory had been frustrated by a stab in the back.

KINGMAN BREWSTER'S SPEECH

That is why the most impressive speech on the Green in New Haven yesterday was one that lasted barely five minutes. It came at the end, and it was by the president of Yale, Kingman Brewster Jr.

In a dozen paragraphs of understated rhetoric, he addressed himself to the basic political concerns that held Lyndon Johnson in Vietnam and that obviously inhibit Richard Nixon in his search for a way out. Eschewing the simple emotion of righteous anger, he told those who understood him that hard political questions had to be faced if the war was now to be brought to an end.

"Let us not make the mistake of saying that defeat is easy to take," he said. "If our country is to survive this wound, let us be more honest in the pursuit of peace than we have been in the pursuit of this war.

"Let us admit that it is not easy to stop short of victory in a cause for which so many have fallen.

"Let us say simply that we cannot tolerate the abuse of their memory as a justification for continuation of the killing and the dying at the behest of a corrupt Saigon Government which rejects both democracy and peace.

"Let us admit that it is not easy to abandon the anonymous masses of South Vietnamese who have relied upon us.

"Let us say simply that their interest as well as ours can no longer be served by the perpetuation of terror and death.

THE POLITICAL RISKS

"Let us admit that the retreat of our power in the face of a persistent enemy might invite other aggressors to doubt—and doubting, to test—our will to help keep the peace, in Europe, in the Middle East, in Asia.

"Let use say simply and proudly that our ability to keep the peace also requires above all that America once again become a symbol of decency and hope, fully deserving the trust and respect of all mankind."

Kingman Brewster would not pretend that his answers are a program; he has separately offered specific suggestions for a cease-fire and a timetable of withdrawal. But what he said on the Green—in those few phrases, almost Gettysburg-like in their simplicity after so much oratory—should have significance for both President Nixon and his critics.

He admitted to supporters of present policy, and reminded its critics, that there is a political risk in a bold program to withdraw on a fixed schedule and thus put the Saigon government at hazard. But there always is a risk in hard political choices, and Mr. Brewster's argument was that to temporize further in Vietnam carries even more terrible risks. Perhaps, because he recognized the difficulties, the Administration will listen.

DICK CASEY

HON. THOMAS P. O'NEILL, JR.

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. O'NEILL of Massachusetts. Mr. Speaker, this week joyously ended the 1969 baseball season with "Mets" day in New York City. I would like to add to the long list of accolades in this extraordinary season. Bernard "Dick" Casey, a lifelong Red Sox fan was greatly honored by the city of Boston a few weeks ago when the Town Field at Fields Corner was renamed in his honor—the Dick Casey Field.

Dick Casey has had a long career serving the public in many areas. He served for many years in the Great and General Court of Massachusetts with my good friends and colleagues, EDDIE BOLAND, JIM BURKE, and myself. Yet Dick Casey's most lasting and vital contribution to the citizens of Boston was his work pursuing his favorite hobby, baseball. He formed the Dick Casey Club and in 1934 joined the Boston Park League and subsequently helped the league gain its status as the best known semipro league in the Nation. Mr. Casey, therefore, was able to provide good and wholesome recreation for the young men of Boston. He has

always been one of the Boston Red Sox best fans. He started working at Fenway Park as an usher in 1915 and has continued to attend most of the Red Sox games since then.

Baseball has always been America's favorite sport. As we all witnessed last week, New York City, a city of much diversity, was united under the Mets banner.

Dick Casey had added copiously to the world of baseball and, through his efforts in this area, to the basic fibers of this great country. I am proud and grateful that Dick Casey comes from the great city of Boston.

SECRETARY FINCH TAKES STRONG STAND ON QUESTION OF PUBLIC HEALTH

HON. FRED SCHWENGEL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. SCHWENGEL. Mr. Speaker, the Christian Science Monitor carried a fine editorial today with respect to the actions of Secretary Finch on the question of cyclamates. I concur wholeheartedly in the comments contained in the editorial. Secretary Finch is certainly to be commended for taking this forthright action. I hope this type of action continues to be a hallmark not only at Health, Education, and Welfare, but throughout President Nixon's administration. The editorial follows:

FROM CYCLAMATES TO POLLUTION

The United States Government's ban on the use of cyclamate artificial sweeteners is bold, far-reaching, and first-rate. It:

Demonstrates a federal readiness to move swiftly and decisively to protect the public health.

Raises hopes that Washington will also begin to move with like toughness against other health and comfort threats, above all the sundry kinds of air and water pollution now besetting life in America.

Lifts the standard of federal concern over whatever can be clearly shown to be inimical to the public interest.

This newspaper has never advocated or accepted the theory that public authorities, particularly health authorities, have the right or the duty to regulate individual treatment of the human body. Such interference should be kept to a minimum. But the banning from sale of a product which can be shown to carry physical danger does not constitute interference. It is a normal measure of protection.

Health, Education, and Welfare Secretary Robert H. Finch's order to withdraw all products using cyclamates (other than with a physician's prescription) is a justified use of federal policing power.

Furthermore, it shows considerable governmental boldness when it is recalled that the cyclamate industry is reckoned to be a billion-dollar one and the products affected have been highly popular and sought-after.

We hope that, where it is right and fitting, the government will act with equal boldness in other fields where only broad governmental action can do away with a continuing threat to human well-being. The foremost of such fields is that of pollution.

As is well known, the American public is now fully ready to give strong support to measures to end the disgraceful befouling of the nation's air and waterways. In fact, there is an increasingly sharp note in the public's demand to know why more is not being done on this crucial challenge. This public dissatisfaction is heightened by the feeling (supported by official studies) that air pollution (and indeed water pollution as well) is still rising. One federal study reckons that 140 million tons of contaminants are being loosed into the American air every year compared with 130 million tons just two years ago.

HEW has acted bravely and well in the matter of cyclamates. Let us hope that it will find the legal means to act with like boldness where pollution is concerned. There is one thing of which the government can be sure. And that is that the public will heartily back it in any such efforts.

A LACK OF FAITH NEIGHBORHOOD DEVELOPMENT PROGRAM

HON. LAURENCE J. BURTON

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. BURTON of Utah. Mr. Speaker, an editorial appeared recently in the Ogden Standard-Examiner of Ogden, Utah, regarding the neighborhood development program of the Department of Housing and Urban Development. Since the situation described in the editorial is of considerable consequence to the city of Ogden, and I am sure of considerable importance to those other cities which have made NDP applications, I wanted to share this editorial with you:

OGDEN'S NEIGHBORHOOD DEVELOPMENT: BOGGED DOWN BY INACTIVE CONGRESS

The authorities operating the Neighborhood Development Program (NDP) of the Department of Housing and Urban Development (HUD) are almost like a mother hen who has but one worm to pop into open mouths of 10 hungry chicks.

There's one important difference.

Mother HUD doesn't have the worm—yet.

We're worried.

Ogden's among the hungry chicks.

Unless Congress gets off its inactve, politically glue seat the NDP in Ogden and at least 299 other U.S. cities will die of starvation.

If it does succumb, it'll be next to impossible to revive.

The story, like the tale of Mother Hubbard and her renowned bare cupboard, is long and sad.

Ogden voters earlier this year enthusiastically responded to the call of a citizen's committee, the Ogden City Council and administration and this newspaper by voting to participate in a Neighborhood Development Program.

The Ogden vote was in defiance of the previous trend in Utah, Salt Lake City had turned down an ambitious urban renewal program. Provo had done the same.

Instead of being No. 2 in Utah our city, for a change, was going to be No. 1 in the long-overdue movement of upgrading the housing of its less fortunate residents.

We "bought" the NDP program on the promise of HUD representatives that for every dollar our municipality spent there would be matching federal funds.

"Great," Ogden voters said as they went to the polls.

But they didn't realize (Who did?) how the Democratic majorities in both the House and Senate and Washington would go to almost any length to embarrass the Republican administration of President Richard M. Nixon.

Historically, the appropriations for the fiscal year beginning July 1 are voted by the Congress just before or just after that year begins.

It's different this year.

The calendar insists it is now Oct. 19. But most of the departmental appropriations for fiscal 1970—the financial year that began three months and 19 days ago—are still hung up along the winding tracks of the congressional route.

HUD's one of the casualties.

Like the other departments who don't know what they'll be able to spend this year for sure, HUD has been operating on a basis of assuming—with Congress' permission—that it will get as much as it did in fiscal 1969 for basic missions.

The Neighborhood Development Program's not quite basic.

The requests by Ogden and 299 other cities for funds can't be honored until the actual appropriation is in hand. HUD and the administration asked for $1 billion for all urban renewal activity in fiscal year 1970. This is $63 million less than appropriated for fiscal 1969. But the House, following the recommendation of its appropriation committee, approved only $850 million. The Senate hasn't voted yet so anything can happen there.

Even if the administration-HUD request for $1 billion had been doubled and been granted by Congress, all 30 requests for neighborhood development funds couldn't have been satisfied.

If the House figure holds, that worm Mother HUD will get for those hungry chicks will be skinny and not capable of providing nourishment for all the communities that have their mouths open.

A spokesman for HUD, calling us at the request of Rep. Laurence J. Burton, told the Standard-Examiner on Thursday that all 300 NDP applications were "under review" pending some determination of what the final policy will be.

Ogden's is among them.

"The requests we have on hand far exceed," he said in a masterful understatement, "the amount of money likely to become available."

That's bad.

But there's one thing good, comparatively.

Both the House and Senate are considering legislation, in different forms, that would extend the deadline for credits to be granted for local improvements. Without such an extension the matching fund credit for the thousands of dollars spent on the new Weber County Library wouldn't count, if and when regular funds become available.

The Senate has already passed a bill that extends from three to four years the period of eligibility for matching funds in NDP applications filed before last Aug. 11—about the time our library credit ran out under the three-year limitation.

A House version, reported out by the Banking and Currency Committee, would give a similar extra year for both NDP and urban renewal credits for "which pending applications were filed on or before the date of enactment of the bill."

This is even better—for Ogden—than the Senate proposal.

Our HUD source predicted that favorable action on a compromise extension should come soon.

That's only a temporary victory, however.

In the first year of NDP projects, only 35 cities were approved for funding. And that was when HUD actually had funds.

So, if and when Congress finally passes the overdue HUD appropriation for fiscal

1970, our odds on getting our matching funds are around 10 to 1. Or less.

We think we should get the grant so we can show the way to better housing in Utah. After all, Ogden voters did believe the federal authorities when they said "approve this legislation and you'll get better housing." If we don't get the HUD funds, it'll be a cold day in Utah before we believe any word from Washington again.

STIFFER LAW URGENTLY NEEDED TO KEEP SMUT FROM MAILS

HON. THADDEUS J. DULSKI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. DULSKI. Mr. Speaker, the Postal Operations Subcommittee of our committee is continuing its hearings on legislation to ban smut mail from being sent to homes where minors reside. The bill I introduced some weeks ago is among those being considered.

In today's session under the leadership of the able subcommittee chairman, the gentleman from Pennsylvania (Mr. NIX), there was further impressive testimony in behalf of enabling legislation. Full study of the problem and possible remedies is essential.

Among those testifying were two other members of our full Committee on Post Office and Civil Service, our vice chairman, the gentleman from North Carolina (Mr. HENDERSON), and the gentleman from Montana (Mr. OLSEN).

Others who gave their views were Mario Procaccino, comptroller of the city of New York; Lawrence Speiser, director of the Washington office of the American Civil Liberties Union; and Randel Shake, director of the American Legion's National Child Welfare Commission.

Mr. Speaker, today's testimony of my colleagues, Mr. HENDERSON and Mr. OLSEN, merits the attention of all Members and I include their texts with my remarks:

TESTIMONY OF THE HONORABLE DAVID N. HENDERSON AT HEARING ON CONTROL OF SMUT MAIL

Mr. Chairman: First of all, I want to commend this subcommittee for the interest it has shown in moving to take prompt action to restrict smut mailers.

The press release issued by Chairman Nix on October 6 was, I am sure, welcome news to thousands and thousands of citizens who have been outraged by the receipt, unsolicited, through the mails of pandering advertisements with pictures and descriptions lurid almost beyond belief.

All of us know the background which has brought us to our present state of affairs. Obviously, we do not all agree on what is and is not obscene and pornographic.

It has been pointed out that the Venus de Milo and Michaelangelo's David might be considered obscene by some. It has been pointed out that Shakespeare and the Holy Bible use four-letter words and describe sexual activity.

And seizing upon this fact and the ruling by the Supreme Court that not only must material, to be obscene and pornographic under the meaning of present statutes, be designed to appeal primarily to prurient interests, but must also be utterly without redeeming social value; smut mailers have been able, virtually with impunity, to flood the mails with unsolicited advertisements that almost literally would make your hair stand on end.

I believe that no matter what this committee and this Congress do, the question of what is and is not obscene and pornographic is going to continue to be raised in the Courts and is going to continue to plague us for a long time.

And as we all know, the House Judiciary Committee is going into this question in a broad and general way.

ANTIPANDERING LAW GOOD START

Our full committee reported; the Congress adopted and the President signed into law the present antipandering law. It is good, as far as it goes, but it does not go far enough.

It provides a tool by which a recipient of offensive mail can sign a form which the local Postmaster will send to the mailer and have the recipient's name taken off the list of that particular mailer.

The weakness here is that the protection is only after-the-fact protection and protection against only a particular mailer.

In the President's proposal on this subject, which many of us have introduced, is a provision for a nationwide list to be made up of persons who do not want to receive pandering advertisements.

The list would be sold, at cost, to those intending to mail out such advertisements, and the mailer would subject himself to penalty if anyone whose name had been on the list for as long as thirty days received any such material.

This is a step in the right direction, but in my judgment after considerable thought and study, it has three serious drawbacks.

The first is that it is cumbersome, complicated and would undoubtedly result both in administrative headaches and considerable expense to the Post Office Department.

The second is that there is a 30-day time lapse between the placing of the name on the list and the affording of protection. Revised lists would have to be issued every month.

The third is that the smut mailer would be delighted to get his hands on such a list as he would save a lot of expense by deleting those names.

COMMISSION MADE INTERIM REPORT

Last year the Congress created a Commission on Obscenity and Pornography and directed it to report back to us and to the President in January, 1970 its findings and recommendations with regard to this vital subject.

Although not directed to do so, this body filed an interim report in August of this year, and the only specific recommendation it made for action now is the provision incorporated into HR 13585 and related bills.

HR 13585 takes the approach of the President in establishing a list of mail patrons who do not wish to receive sexually-oriented materials, but makes it a local list to be maintained at each local post office. The procedure is quite simple and should not involve any serious administrative burden or much cost.

The bill directs that the Postmaster General, through normal administrative action, devise a symbol. This symbol would be required to be placed on the cover of any piece of mail containing sexually-oriented matter as such matter is described in the bill.

Then it provides that any mail patron can advise his local Postmaster that he would like his name and the names of minor members of his household placed on a local list to be maintained in the local Post Office. Then any mail received bearing the designated symbol simply would not be delivered to anyone whose name was on the local list.

The bill does not attempt to declare that sexually-oriented mail is obscene or pornographic. It does not attempt to declare that such material cannot be sent through the mails. It does not attempt to prohibit a transaction between consenting adults involving such material. For these reasons, I believe that the Constitutional arguments involving the First Amendment and freedom of expression do not come into play at all.

AIMED AT UNSOLICITED MAIL

All the bill does is provide the mail patron with a mechanism for exercising his right *not* to receive any such mail unsolicited.

It is superior to the President's nationwide list in that:

(1) It is much less of an administrative burden and much less expensive.

(2) It affords the patron immediate protection from the time his name goes on the list.

(3) It does not do the smut mailer a favor by forewarning him not to send his materials to certain persons.

To guard against a mailer pleading that placing the symbol on the cover violates his Constitutional rights against self-incrimination, the bill specifically provides that compliance by a mailer with this law cannot be used as evidence against him or as a basis for initiating or pursuing an investigation against him.

It does not, of course, grant him immunity from prosecution under the basic laws governing obscenity, but it does guarantee him that the compliance with the law involving the symbol shall not be a basis for such prosecution.

We need other laws, such as the one so many of us have introduced providing for the protection of minors.

ONE MORE STEP—AND NEEDED

But this one bill, which goes a step beyond the present antipandering law, but which avoids the bramble thicket of what constitutes pornography and obscenity is one which we should enact separately and without delay.

It is one in which this subcommittee and our full committee has unquestioned jurisdiction since it relates only to the use of the mails.

It has been co-sponsored by a substantial majority of the members of our full committee, both Democrats and Republicans and thus would be assured of favorable consideration by the full committee if reported by this subcommittee.

Mr. Chairman, I urge this subcommittee report HR 13585 and its companion bills promptly as a separate measure; one which does not bog down in complications as so many of the other measures do, and one which we can use as the vehicle of fulfilling the pledge so many of us have made to give to our postal patrons some real protection against receiving unsolicited smut mail.

STATEMENT BY THE HONORABLE ARNOLD OLSEN BEFORE POSTAL OPERATIONS SUBCOMMITTEE

Mr. Chairman: I want to take this opportunity to endorse the work of this Subcommittee in taking up the matter of obscenity legislation.

The subject is an emotional one. Those who express their opposition to any regulation of pornography do so by means of ridicule rather than meeting the issues.

Over 250 thousand Americans have applied for postal orders banning erotic advertising from their homes under the pandering law passed during the 90th Congress as the result of hearings held by this Subcommittee and as a result of an amendment to the postal rates bill.

The pandering law authored by Congressman Cunningham went into effect a year and a half ago. It was a courageous first step on a long road.

But much needs to be done and the quarter of a million Americans who have complained to the Post Office Department, and

the thousands of outraged constituents who have complained to the Congress want more help and their voice will not be silenced by ridicule.

I am confident that this Subcommittee will answer their indignation with sensible and constitutional legislation.

MUCH MISUNDERSTANDING OF RULINGS

There has been a great deal of misunderstanding about the position of the Supreme Court of the United States on the subject of obscenity regulation.

The Court's basic position in the case of Roth v. United States 254 U.S. 476, 1957 was a common sense one. This decision reversed a 100-year old English case, Regina v. Hicklin, which held that the basis of obscenity legislation was the protection of weak persons from themselves by keeping pornography out of their hands.

It made the standard for all reading matter childlike in order to protect children and the immature. What is more, under the decision a book could be judged not only by its cover but by portions of it rather than as a whole.

This decision, while establishing a more restricted standard for obscenity regulation, should not have interfered with obscenity prosecutions. It did interfere because law enforcement officers prefer to proceed against a book or thing rather than the person selling pornography.

Because of the conflict over procedure, the method of prosecution, Court decisions became confusing in that the Court itself, as stated by Justice Marshall in Redrup v. New York 386 U.S. 767, split into 5 schools of thought over the definition of obscenity on a 9 member court.

THERE IS COMMON FRONT ON COURT

What has emerged, however, is a common front on the part of a majority of the Court on matters they do agree on and that agreement covers considerable territory.

The Court in the Redrup case pointed out that the State and Government in general had an interest in protecting the morals of children, in protecting the privacy of the home and individuals from offensive salesmanship and in protecting the public from what the Supreme Court had defined as pandering advertising in Ginzburg v. United States 383 U.S. 463, 1963.

This Subcommittee has before it bills which specifically define nonmailable matter in medical terms, places the administrative burden for keeping pornography away from the homes of those who specifically request that the Government so protect them, and protects children through provisions based on a New York State statute discussed in Ginsburg v. New York 390 U.S. 629, 1968.

This is the approach taken in H.R. 10867, a bill by Mr. Dulski, the distinguished Chairman of our Committee. I agree with this approach and I support it.

ABOUT DENMARK SITUATION

I know that in the near future we are going to hear that Denmark has abolished its obscenity laws. The implication will be drawn that Denmark has little or no obscenity regulation. I disagree.

A staff study based on personal discussions with the Subcommittee Staff reveals that Denmark has extensive local regulation of obscenity. Shops, for instance, are not allowed to display erotic matter in shop windows. In addition, there is no third class mail advertising industry.

As a result, the Denmark example has no bearing on the hearings today which are aimed at mail advertising and establishing protection for the privacy of individuals.

The problem we are all interested in is a specific one. It is a Federal problem and it deals with a Federal instrumentality—the United States Postal Service.

I congratulate the Chairman of the Subcommittee, Mr. Nix, in his effort to keep the issue specific. His diligence will overcome the defense of those who will attempt to escape from the need for sensible action by wrapping themselves in the flag and the constitution.

AMERICAN PEOPLE WANT ACTION

Such individuals have their constituents and we have ours—the American people. I don't believe that 250 thousand Americans are wrong, and I believe that literally millions more want action to protect the family mailbox and their children from smut mail.

Mr. Chairman, at this time I would like to have submitted for the record examples of the kind of material that my constituents have received and to also submit an outstanding article on the subject of obscenity generally.

The article by Larry Elison of the University of Montana Law School entitled "Obscenity: A Compromise Proposal," suggests that what needs to be done is to establish firmly the right of privacy by providing a tort right for citizens so that they can protect themselves against any pornographer, no matter how important in the publishing industry, through litigation.

I would like to request that your staff look into the matter of providing a means of court action in our Federal courts so that citizens do not have to rely entirely on the criminal law. Whether or not such a provision is added to legislation recommended by this Committee, the very fact that such a study is taking place should give smut mailers cause for concern. Thank you.

MACARTHUR'S RETURN TO THE PHILIPPINES—25 YEARS AGO

HON. THOMAS M. PELLY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. PELLY. Mr. Speaker, October 20 marked the 25th anniversary of Gen. Douglas MacArthur's return to Leyte in the Philippines, and this is a fitting time to take a moment for reflection on this great turning point in the war in the Pacific.

General MacArthur splashed ashore from a landing craft onto the shores of Leyte and issued his rallying cry to the people of the Philippine Islands. He said:

I have returned . . . Rally to me . . . Rise and strike!

The seizure of Leyte, in the center of the Philippine archipelago, meant the splitting of this island chain and with it the immobilization of the main Japanese forces on Mindanao and Luzon.

By day's end, Allied forces were ashore in force in spite of enemy resistance, difficult terrain and terrible heat. General MacArthur and the free world forces had returned. Before another year had passed, the entire Philippines would be liberated.

It was the promise of this return that kept up the resistance of the Phillipine people for 2½ years, Mr. Speaker, and maintained the morale, spirit and loyalty of the people.

Mr. Speaker, I urge the Citizens Stamp Advisory Committee of the Post Office Department to begin work on a commemorative stamp in honor of the service given his country by General MacArthur and time the release of this stamp to coincide with the anniversary of the general's birth.

NATIONAL BUSINESS WOMEN'S WEEK

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. GAYDOS. Mr. Speaker, the Nation this week is observing National Business Women's Week, October 19 through 25. Across the country more than 3,800 member clubs of the National Federation of Business and Professional Women will spotlight the role of women in today's world.

This is an annual observance that has special significance this year since the federation is marking its 50th anniversary. During the past half century, the federation has worked constantly, not only to achieve equal rights as citizens for women, but to elevate standards for them in business and professional life; to promote their interests and bring about a spirit of cooperation; to extend opportunities to them through education in industrial, scientific, and vocational activities.

The federation's success can be measured by its enormous growth since its founding July 16, 1919, in St. Louis, Mo., by 212 women representing 42 of the 45 States then in existence. Today the federation numbers 180,000 members from every State, the District of Columbia, Puerto Rico, and the Virgin Islands. It has made its voice heard on legislation in the past and this year, during its annual convention, it outlined a five-point program for the future which includes the following items:

Support of legislation to amend the Constitution of the United States to provide equality of rights under the law will not be denied or abridged because of sex.

To work actively for pending legislation to provide a broadened head-of-household benefit under the Internal Revenue Code; to increase personal exemption and credit for dependents and to provide a more equitable distribution of the tax burden.

To propose and support legislation providing uniform working hours, conditions, pay, and opportunities for men and women; equal treatment for them in survivor and retirement benefits and increased child care education.

To propose and support State legislation for uniform jury services and qualifications in the selection of men and women for jury duty.

To propose and support legislation for more effective crime control and law enforcement.

Mr. Speaker, I am proud to note the Pennsylvania branch of the national federation met this past weekend in Harrisburg and honored three of my constituents in the 20th Congressional District for their services and efforts on behalf of the organization's ideals and objectives. Cited by the State group were O. Jean Hoffman of Dravosburg, a member of the McKeesport Area School Board; M. Rigby Hill, now retired as administrative secretary of the school board but still treasurer of the teachers' pension fund, and Irene M. Atwater, a past president of the McKeesport BPW

Club and the assistant to the solicitor of the city of McKeesport.

I salute these women, Mr. Speaker, and I extend my congratulations to the national federation on the occasion of its 50th anniversary.

TRUTH MUST RISE ABOVE CLAMOR

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. BOB WILSON. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following:

[From the San Diego Union, Oct. 9, 1969]

TRUTH MUST RISE ABOVE CLAMOR

Again there is a strong riptide of activity in the United States of America which seeks to induce President Nixon simply to abandon South Vietnam.

The riptide is visible in Congress where, individually and in small groups, legislators are urging a condemnation of the American commitment in Southeast Asia.

The riptide is also visible in the national agitation—professional or naive—for a demonstration Oct. 15 to force President Nixon to make a more firm but generally undefined commitment to retreat.

Amid the clamor of the claques, there are some things that are evident and even more that are not—things that Americans would do well to keep in mind as they try to distill some truth from the confusion.

The first is that whatever the mistakes of the past, the United States cannot roll back the calendar in South Vietnam. We have to deal with the war on the basis of the present realities.

And we must, in seeking the truth, challenge the depth of thinking as well as the credentials of the experts, be they self-styled or real.

It is a truth and a reality that the United States is diminishing its Vietnam commitment at a rate deemed prudent by the person upon whose shoulders falls the responsibility for making the awesome judgment—the President of the United States.

What exactly do the critics of our current actions want? More rapid withdrawal? How rapid? Is open retreat their real object?

Do the critics of the war know whether it is possible to move our men home from Vietnam more rapidly simply from the standpoint of logistics?

Would those who favor pellmell withdrawal be willing to endorse the inevitable bloodbath in Southeast Asia that such a retreat would create?

Are those who urge our surrender in Vietnam prepared to accept the responsibility for its effect upon the hundreds of our young men being held prisoners by North Vietnam? Several already have been executed and Hanoi says it may "try" the remainder as war criminals.

Is the Greek chorus baying at the heels of the President prepared to face the world-wide implications of a United States' surrender?

The fact is they advocate nothing but the negative—get out. Has anybody heard acceptable positive programs from these self-styled experts to preserve the seedling of self determination in Vietnam and prevent the writing of an ignominious, bloody chapter in our history?

We have not heard them.

All that we have heard so far is that if we vaporize the American presence in Vietnam immediately, somehow everything will turn out all right despite the obvious and imminent dangers. It will not.

Americans should view with suspicion the thought that there is an instant solution in instant surrender.

SOUTH AFRICA ADVERTISES LEGALIZED RACISM

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. FRASER. Mr. Speaker, Mr. Leslie H. Whitten in "South Africa on Madison Avenue," which appears in the October 1969 issue of the Progressive, writes that the racist South African Government has allocated more than $1.75 million in 3 years to the propagandizing of the American people. During a similar period, Mr. Whitten estimates that black South Africans spent about $8,000.

This disparity in public relations investment, fortunately, is not reflected in the editorial treatment the South African Government usually receives in our mass media. The first requisite of a successful public relations campaign is a good product. And modern advertising techniques cannot hide the true face of the apartheid system.

I introduce the Whitten article into the RECORD because it illustrates the great effort the South Africans make to give a positive image to their social system. While they may score minor successes, the vast majority of the American people recognize apartheid for what it is—legalized racism.

The article follows:

SOUTH AFRICA ON MADISON AVENUE

(By Leslie H. Whitten)

(NOTE.—Leslie H. Whitten is assistant bureau chief of Hearst Newspapers in Washington. Previously he was on the staff of The Washington Post, United Press International, and Radio Free Europe. He has specialized in investigative reporting, and he is visiting associate professor at Lehigh University.)

In Washington's Montgomery county suburbs, "apartheid" is losing ground—one $20,000 Negro breadwinner at a time. The laws of country and county, a generally liberal outlook, and the high cost of housing have combined to make integration possible, marginal, and middle-class.

But the schools, during the unpleasantness of the 1968 elections, sprouted a dragon's teeth minority of Wallaceites, animating a number of teachers to try to find the dragon—either by plain talk on American racism or, indirectly, by asking students to explore race in other parts of the world.

At Northwood High School, where my sixteen-year-old son goes, an imaginative history teacher proffered South African race policies as one subject for the final essay examination. My son, apple of an ACLU tree, had shown some soft spots toward Wallace, and my wife and I cooed approvingly when he opted for an essay on apartheid, the official policy of racial segregation in the Republic of South Africa to promote and maintain white domination. A newspaperman, I plied him with our office "morgue" files, made up mainly of critical articles from *The New York Times* and *The Washington Post*. He also chewed through the *Encyclopedia Britannica*, which gave South Africa a slower but equally hot roasting on such things as the Sharpeville massacre.

The preliminary results—which he allowed us to read—were gratifying in a prima facie way. They reflected his sources. But, conscience-panged, I suggested he get the other side of the story from the South African embassy in Washington.

He made the arrangements. I drove to the chancery, a gracious mansion in the grand Washington diplomatic style across Massachusetts Avenue's "Embassy Row" from the larger British Embassy.

The blonde receptionist, pneumatically Dutch, dirndl pretty, seemed honestly touched that anyone would voluntarily seek out South Africa's official version of apartheid. She left me only a breath's span to thank her between her own "thank you's." I drove home with the apartheid packet, already impressed with its weight and variety, and turned the expensively-printed material over to my son. He balanced out his essay, managed to extract a "B" from it, and was subsequently able to debate us creditably on every one of our anti-apartheid points but this one:

"If you believe that one human being ought to have the same basic rights as another, then how come 3.6 million whites, minus a scattering of dissidents, are dictating much of the lives of more than fifteen million non-whites?"

When the dialogue was done, we wondered why he had not gotten an "A." Intrigued that anything could prevail with my independent-minded son where eleven years of educators had only endured, I browsed through the packet's thirteen separate articles, books, and pamphlets. Someone was spending a great deal of money to get the South African government's story told—and told expertly.

The 583 pages of material had something for us all.

The prestige-minded curious get a *Foreign Affairs* article (though surely there was something fresher than October, 1964 of the same distinguished kidney). The writer, Charles A. W. Manning, London School of Economics professor emeritus, born and educated in South Africa, describes his theory of the source of bad publicity about apartheid: "In few cases, if any, can a Communist-encouraged, if not necessarily Communist-inspired, campaign of systematic mood-engineering have met with comparable success in the Western world . . ."

For the lumpen bourgeois, there is a *Reader's Digest* reprint, also vintage, Pleasantville 1963 in this case. In it, industrialist and former Presidential adviser, the late Clarence B. Randall, concluded that "the white people of South Africa are charged with a great responsibility toward the black people, and they know it. In the end, they will do right . . ."

The packet has a mixed bag for the businessman, including a leaflet of the conservative American Security Council which both soothes ("the flag of the United States is not subject to insult" in South Africa) and incites ("the Communists are trying to use the issue of apartheid in South Africa to accomplish their ever-present purpose of splitting the Free World's united front").

For the culture buff, there are 128 pages of "cultural and art" with striking native graphics and summaries of South African writing and poetry, both black and white. The poet D. J. Opperman, a white poet little known outside South Africa, is much praised. The internationally-respected novelists, Alan Paton and Doris Lessing, get also-ran notice. Both novelists deplore the plight of the blacks.

There is much more: a fact book telling that each white South African family pays

$280 a year for Bantu education and development; a 114-page apartheid white paper called "Progress Through Separate Development," and, most beautiful, eighty-one pages on "Photogenic South Africa," with frameable pictures of elephants, klipspringers, impala, and Ndebele tribesmen.

The aggregate effect of all this is, at the least, to wonder whether one has been fair. True, there is a patronizing quality to the picture of the black doctor surprising white surgeons in a Bantu hospital with his agility. True, there is an uncharitable moment of confused recall over a fatherly white among the many smiling young of Transkei (a native reserve): Stalin, was it, with the Ukrainian kids? Hitler collecting a bouquet from a rosy Gretchen? But the total is enormously winning—until, and unless, one is burned by the saving fact that this stuff is prepared by white men for white men. The authentic voice of the fifteen million nonwhites is nowhere heard. The thoughts of South Africa's Nobel Prize winning chief, the late A. J. Luthuli, are missing. So is the harsh yawp of Mangaliso Robert Sobukwe of the proscribed Pan Africanist Congress. So are the political ideals of countless others in that vast mute or gagged or exiled majority. They are being witnessed for by the 3.6 million whites.

Weeks later, as part of my regular newspaper checks, I went by the Foreign Agents registration section of the Justice Department where non-diplomats working for foreign governments must register and detail their activities. I leafed through the recent reports.

When I reached the items on South Africa, my sixteen-year-old's packet about apartheid surfaced on my mind. How much was South Africa's government spending to convince us that apartheid was the humanitarian final solution for the country's non-whites—Xhosas, Zulus, "Cape Coloreds," Bapedi, Indians, Tswanas, Shangaans, and so many others who, since they do not qualify as whites, do not qualify as full citizens?

The files, ably tended and far more complete than those for domestic lobbyists kept by the House Clerk in Congress, gave this answer:

Through the South African Information Service, the South African Tourist Corporation, and the South Africa Foundation, its three main organs in the United States, the Republic has allocated more than $1.75 million, in less than three years, to publicize the country's natural, social, and political wonders.

The other side of this substantial coin, clearly, is how much the black South Africans are spending to tell *their* story. There are five of their organizations registered with the Justice Department. Assuming their filed reports are equally correct, they have spent less than $8,000 during the same three years.

Eight thousand dollars against $1.75 million! The David and Goliath character of this communications contest would be musical comedy material were it not that even this tiny pebble in David's slingshot, this $8,000, has produced some pamphlets—included in the files—that raise nasty, weltish questions. Is it true, as one of the minuscule black African groups claims, that South African police and troops cold-bloodedly murdered people demonstrating peacefully against a relocation program in South West Africa? (This is a territory held by the Republic under a 1920 League of Nations mandate, now in dispute.) I found no record of this incident—in which it was reported that some blacks were killed—in the government's apartheid packet. There were no dead bodies among the klipspringers and impala.

My son's packet, I soon discovered from the Justice Department filings, is only a fragment of the South African government effort. The Tourist Corporation, with offices in Rockefeller Center, describes some of its activities for just one six months period:

"Tourism promotional tours were undertaken by staff members to travel agents in the following cities: Boston, Hartford, Chicago, Detroit, Cleveland, Columbus, Houston, Dallas, Miami, Palm Beach, Pensacola, Clermonth, Gainesville, Fort Walton and Louisville.

"The South African Tourist Corporation in conjunction with South African Airways, South African Railways, and the South African Commercial Consul in New Orleans, had a joint exhibition at the Texas State Fair in Dallas . . .

"Film show presentations were held at the following cities: Boston, Hartford, New York, Chicago, Detroit, Cleveland, Columbus, Houston, Dallas, Miami, Pensacola, and Palm Beach."

There were also 969 telecasts with an estimated combined audience of more than thirty million. One travel film, with unthinking irony, was named "Portrait in Color." There was a guest trip for a magazine writer; almost 100,000 pieces of travel literature for agencies, individuals, and newspapers were distributed, and 6,867 telephone and mail inquiriies were handled.

While this flood of good news from the South African government was reaching a considerable percentage of the American people, the black African National Congress (whose president for many years was Chief Luthuli) was mailing out fifty copies of its monthly to libraries and to a newspaper or two. Its U.S. representative, Bethuel Pitori Setai, a thirty-year-old student, was speaking to a small gathering of Presbyterian ministers on apartheid and to a group of Quakers on "non-violence in South Africa."

The contrasts go far deeper than the volume of word-flow.

Setai, whose headquarters in New York has no telephone, operates with no budget. His only big contributions totaled $6,252, given more than two years ago so the office could be set up. South African born, Setai fled to Tanzania and entered the United States in 1962.

Poverty being relative, Setai's group is the plutocrat among the black South African organizations in the U.S. The four others, the Pan Africanist Congress, the South West Africa People's Organization, the South West Africa National Union, and the South West Africa National United Front, reported a total intake of $1,350 in the last three years. The figure may be somewhat higher because of the irregularity of their reporting—much of it without benefit of typewriter.

For comparison with the five minigroups, the Information Service of South Africa, with offices on Madison Avenue, spent $209,417 in one six month period last year, almost all of it for films, printing, and related costs.

The director, Lourens Erasmus Smit de Villiers, like his countrymen in the minigroups, is in his thirties—thirty-four to be exact—and born in South Africa. Unlike them, when he came to this country he stayed first at New York City's St. Moritz and then moved into the fashionable East Sixties. His salary (reported only as on the scale of South African diplomats), unlike the uncertain income of the black Africans, need not be plowed back into his cause. For the fiscal year ending March 31, the South African government has allocated $381,318 to the Information Service.

De Villiers accurately points out that this total cannot be broken down to reveal expenses to defend apartheid. In a telephone interview, he said there is trade publicity and other information turned out by his office and staff which have nothing to do with apartheid. But the same is true on a pathetically smaller scale for the Pan Africanist Congress, for example. Its representative, Peter H. Molotsi, forty, laid out $93 between January and March, 1969, to help clothe and feed some of his colleagues.

The South Africa Foundation opened its government-sponsored office in New York late last year "to promote international understanding of South Africa, her achievements, her problems and her potential, and by so doing, to advance the welfare of all her peoples."

A Durban-born South African, John H. Chettle, thirty-one, was named head of the office at $19,800 a year plus housing. Some $18,000 was advanced by the government to set up shop, and Chettle reports he paid out $2,400 in a six months period, ending this May, for "entertainment, travel, and hotel." This is twice what all five of the black South African groups say they received in the past two years.

The result of this chasm in funding is apparent. Few Americans remember reading of Sharpeville, where South African forces shot scores of natives. Few Americans see the Justice Department files, or receive one of those fifty African National Congress mailings, or are Presbyterian ministers who heard that lecture by Setai.

The atrocities of South Africa get small lineage even in newspapers otherwise serving their communities well. Who knows, for example, that the International Commission of Jurists has urged a United Nations investigation of jail "suicides" in South Africa that smell of torture and police murder? Who knows of the 119 executions by hanging that took place in South Africa last year (forty-seven per cent of all executions recorded in the "free world," according to a University of South Africa study)? In the Republic, capital punishment can be imposed under a number of laws including the Suppression of Communism Act and the Terrorism Act.

Midnight arrests, months of solitary detention without habeas corpus rights or any court intervention, and judicial ostracism of prominent anti-apartheid individuals have all been testified to by responsible South Africans. The limited coverage given to such horrors generally is accorded whites—such as the gallant newspaperman Laurence Gandar who exposed prison barbarism and was convicted. Deeds against the black man, in South Africa as in America, seldom emerge from the darkness in which they are committed.

Meanwhile, the American investments in South Africa bubble along merrily: up from $450 million in 1965 to $750 million in 1968, according to South African figures. General Motors, Ford, Goodyear, Coca-Cola, and the Chase Manhattan bank are among the 275 or more U.S. firms with interests in South Africa.

The investment by Americans in telling what the blacks, "coloreds," Indians, and other non-whites suffer from apartheid is, however, not in the hundred-millions, but in the tens of thousands. Not many know the literature of the American Committee on Africa, a private group backing black Africans and supported by Americans. Nor do most know of its opponent, the American-Southern Africa Council which promotes the white government and was built up by former Youth for Wallace chairman John Acord.

The Committee spent $165,000 in fiscal 1968, concentrated on events in Rhodesia and Portuguese colonies in South Africa as well as the Republic of South Africa. The right-wing Council spent $200,000 in 1967.

A fact sheet distributed by the South West Africa People's Organization, which describes apartheid as "sordid, inhuman, and undemocratic," did not achieve 969 television showings to thirty million people. It did not make it into my son's packet.

And yet, to believe in America is to believe that there are outrages which will be disclosed, even when the odds are $1.75 million

to $8,000. Setal, in conversation, tried to explain why.

"Well, we don't have a budget! We spend our own money. But I work at it because I can *feel* the struggle inside Africa. I'd feel guilty to get paid for it." In the 583 pages of the apartheid packet I found no topper for that.

JOSEPH W. BARR NAMED PRESIDENT OF AMERICAN SECURITY & TRUST CO.

HON. RICHARD T. HANNA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. HANNA. Mr. Speaker, the Washington Post reported this morning that former Secretary of the Treasury, Joseph W. Barr, has been named as president of American Security & Trust Co.

I have known Mr. Barr for a number of years and have always been impressed by his great abilities and brilliant personality. I wish to take this opportunity to publicly congratulate him on his new position. American Security is indeed fortunate to have such an outstanding leader of the Nation's financial community at its helm.

I insert the Washington Post article in the RECORD, as follows:

A.S. & T. SELECTS BARR AS BANK PRESIDENT—ALMOST SURE TO SUCCEED BAKER

(By Robert J. Samuelson)

Joseph W. Barr, former secretary and under secretary of the Treasury, was named yesterday president of the American Security and Trust Co., a position from which he should ultimately become the head of the city's second largest bank.

Barr, 51, now vice chairman of the bank's board of directors, will almost certainly be appointed to succeed Robert C. Baker, the bank's chairman and chief executive officer, when he retires. The mandatory retirement age is 68, and Baker is now 67.

As head of the bank, Barr would automatically become one of the most prominent and important men in Washington's financial elite.

Since he joined the bank earlier this year, Barr has helped guide Washington bankers' efforts to allow the city's 14 banks to move beyond the city limits and establish branches in the nearby suburbs.

He has consistently argued that Congress must allow the expansion if the District banks are to attract the necessary deposits to maintain a healthy rate of growth. A bill authorizing the change, which has been vehemently opposed by suburban banks, is currently pending before a Congressional committee.

In a short interview yesterday, Barr indicated that the additional deposits of the suburban areas could help Washington move more aggressively into financing international trade.

"It seems to me that this is a logical center for a lot of international business," he said.

Many of the world's major international financial institutions—the International Monetary Fund, and the World Bank—are located here, Barr noted. Moreover, he said, "We're equidistant between the Baltimore and Norfolk ports, and we're near Dulles Airport, which should be one of the major centers for air freight in the next five years."

Most international business is now diverted to New York, according to Barr. Any increase here, he said, would naturally result in additional deposits.

Barr actually served as secretary of the Treasury for less than a month before the Nixon administration took office in January. However, he held high government posts for eight years during both the Kennedy and Johnson administrations.

A former Indiana Congressman who was defeated in 1960, Barr first became the assistant to the secretary of the Treasury for congressional relations, then moved to the Federal Deposit Insurance Corp., where he was chairman, and finally received the No. 2 job at Treasury, under secretary, in 1965.

During these years, Barr earned a reputation for candor. In 1968, when Congress was debating whether the United States could afford both "guns and butter," Barr bluntly told a Congressional committee that the country could not—contradicting the administration's official policy.

"I'll either get fired or impeached before I get out—and either is not too bad," Barr said after that session.

Early this year, when he was secretary of the Treasury, Barr coined a phrase—"taxpayers revolt"—to explain the rising sentiment, both in and out of Congress, for tax reform. Barr's statement immediately attracted attention and was widely quoted in the press.

Before coming to Congress in 1958, Barr worked in a variety of businesses in Indiana.

In size, American Security and Trust is surpassed only by Riggs National Bank within the District. As the end of last year, American Security and Trust had $624.9 million in deposits, and Riggs had $830.9 million.

THE NAME McCORMACK DEFINES CREDIBILITY

HON. JOHN M. SLACK

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, October 20, 1969

Mr. SLACK. Mr. Speaker, current events have brought to our attention the difficult position in which our eminent Speaker JOHN MCCORMACK finds himself as a result of an apparent error of judgment by one of his staff members. All of the facts in this case have yet to be revealed, but I am confident that nothing will be discovered which casts the slightest shadow on the Speaker himself.

In any congressional office there are dozens of decisions made each day, and since the decisions are made by fallible human beings, occasionally some of these are bad decisions. At one time or another, every Member of Congress has found himself in hostage to a decision made by a staff member. At that point a Congressman pays in embarrassment in proportion to his prominence, and for this reason Speaker MCCORMACK has been required to stand public scrutiny far beyond any suggestion of actual implication in the events recently reported.

I would not dignify this whole affair by lengthy comment in support of the Speaker. I would simply say that during my years in the House I have learned from experience that the word of JOHN MCCORMACK defines the word "credibility." Anything further that may be said from whatever source must be measured against the word of JOHN MCCORMACK, and his word is more than enough for me.

FARM PROGRAM RECOMMENDATIONS

HON. ED FOREMAN

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. FOREMAN. Mr. Speaker, the New Mexico Farm and Livestock Bureau is one of the most active, effective industry organizations in the State of New Mexico. Their membership is made up of a broad cross section of our citizens including farmers, ranchers, manufacturers, retailers, suppliers, and various others.

They are good, solid, honest, down-to-earth individuals who work for a living and they are not ashamed of it. They are willing to shoulder their share of responsibility and they expect others to do the same.

During a visit to New Mexico last week to meet with some of the county groups of the New Mexico Farm and Livestock Bureau, I was presented this list of suggestions and recommendations for consideration as we develop an agriculture program. I am pleased to present it for the review and comments of our colleagues:

Be it Resolved that the New Mexico Farm & Livestock Bureau go on record in favor of the following:

Farm Program—General: 1. If it is determined that land retirement should be part of any agricultural program, it is recommended that the producer be given a choice of:

a. no grazing with a higher payment rate.

b. limited grazing permitted with less payment rate, provided permanent cover is not damaged.

2. Any land retirement program should have provisions that would assure land renters a fair share of the retirement payments.

3. Establish and strengthen the advice and participation of the agricultural industry in the administrative decisions made with respect to the federal agricultural programs.

Farm Credit—Be it Resolved that the New Mexico Farm and Livestock Bureau urge federal legislation to increase present limitations on farm operating loans ($35,000) and ownership loans ($60,000) for the purpose of encouraging individuals to become established in agricultural production on a scale large enough to be economically feasible.

Tax Laws—Whereas, it is almost impossible for a young person to buy a farm or ranch and recognizing that many older people that own land would prefer to sell if the tax was not so great; Therefore, Be it Resolved that it is recommended that the tax laws be changed to provide that older people could sell their farms and ranches and collect all the money if the money is invested in stocks, bonds, other securities, deposited or loaned out to draw interest and not be subjected to the present tax regulations. This would permit the transfer of agricultural property to individuals that desire to continue in agricultural production. This arrangement would allow older farm and ranch people to retire in dignity and have the satisfaction of living off the proceeds of their accumulated savings.

Be it Resolved that the New Mexico Farm & Livestock Bureau go on record in favor of the following:

1. Cotton Research—Promote legislation to increase funds for production, harvesting, and marketing research and education to lower the costs of production and improve the quality of cotton that is demanded by the industry.

2. Cotton Program—Until the cotton industry can recover from the present cost and price squeeze, it is necessary that some form of cost adjustment be provided, similar to the cost-of-living index reflecting wage adjustments, in order for producers to sell at competitive prices and receive a reasonable return for labor, management and investment; that such cost adjustment be made to the commodity rather than to the producer.

3. Payment Limitations—Oppose limitations on any farmer's benefits from a price support or payment program.

4. Cotton transfer—Recommend that no limit be placed on the acreage allotment which may be transferred from farm to farm; that transfers be permitted between any farms in a cotton-producing state, and that the transfer period be permitted as long as practical.

---

1. Gun Laws—Be it Resolved that the New Mexico Farm & Livestock Bureau is opposed to any new gun registration laws and go on record to repeal present gun registration laws.

2. Federal Income Tax—Be it Resolved that the New Mexico Farm and Livestock Bureau support the present system of federal income tax reporting as regards the choice of a cash of an accrual basis and we oppose removal of the present exemptions on fertilizer, seed, feeds, insecticides, chemicals, and other materials that are used in production of agricultural products, and we also oppose the removal of any exemptions that promote industry.

3. Fiscal Irresponsibility.—Whereas, we have expended countless billions in foreign aid with little benefits to the recipients and none to ourselves and have wasted many more billions in innumerable boondoggles at home and, Whereas our public debt has increased to such a staggering sum that the interest for the year starting July 1, 1968, is likely to be more than 16 billion; Be it Resolved that the New Mexico Farm & Livestock Bureau go on record as favoring a substantial reduction in domestic and defense spending and stopping foreign aid

4. Be it Resolved that the New Mexico Farm & Livestock Bureau notify the American Farm Bureau that we oppose the Excess Deductions Account section of H.R. 13270 which the American Farm Bureau has endorsed and strongly urge their reconsideration of their endorsement of this section of the bill.

5. Be it Resolved that the New Mexico Farm & Livestock Bureau is opposed to the H.R. 13270 as passed by the House and urge its defeat by the Senate. We direct that copies of this resolution be sent to our four Congressmen.

HAZELWOOD MARINE IS DEAD IN VIETNAM

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. GAYDOS. Mr. Speaker, it is with deep regret that I announce the death of another of our brave fighting men, Pfc. Patrick McClintic, of Hazelwood, Pa., who was killed in Vietnam.

We owe a profound debt of gratitude and appreciation to our dedicated servicemen who sacrificed their lives for this great country. In tribute to Private First Class McClintic for his heroic actions, I wish to honor his memory and commend his courage and valor, by placing in the RECORD the following article:

HAZELWOOD MARINE IS DEAD IN VIETNAM

Marine Pfc. Patrick McClintic, a son of Mr. and Mrs. Hunter McClintic of 215½ Glen Caladh St., Hazelwood, died of complications from malaria in Vietnam, the Defense Department told his parents yesterday.

Pfc. McClintic, 19, had enlisted in the Marines seven months ago, and was in Vietnam not quite two months.

A graduate of Boyle High School, Homestead, last June, he attended Hiram Scott College in Nebraska and worked at Kaufmann's store part-time during the holiday season last year before enlisting.

While at Boyle he was a fullback on the football squad. He also played Pony, Colt and Little League baseball.

Her son, who loved the Marines, enlisted because he felt it was his duty to be in service, his mother said.

In addition to his parents, Pfc. McClintic is survived by a brother, James, and his grandmother, Mrs. Helen Brenn, at home.

BIG TRUCK BILL

HON. FRED SCHWENGEL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. SCHWENGEL. Mr. Speaker, my editorial for today is from the Portland Evening Express, Portland, Maine, in the State of Maine. The editorial follows:

[From the Portland (Maine) Evening Express, July 24, 1969]

BIGGER TRUCKS TO THUNDER DOWN ROADS IF BILL PASSES

(By Richard L. Lyons)

WASHINGTON.—To the motorist who shudders when he sees a big tractor-trailer truck pounding down a hill from behind or approaching on a narrow road ahead, take heed.

The bill to permit even bigger trucks on the highways, which nearly slipped through Congress last year until public outcry killed it, is back again.

A House public works subcommittee headed by Rep. John C. Kluczynski (D-Ill.), a former truck driver and an enthusiastic sponsor, is conducting hearings on the measure to permit wider, longer and heavier trucks on the interstate highway system. The bill won committee approval last year, but some members now appear to be having second thoughts because of public criticism.

The bill was denounced as an "antisafety bill" by the American Automobile Association. It was defended by trucking interests as a means of enabling construction of safer trucks and as a long overdue unfreezing of truck size limits set by the 1956 Highway Act. For truckers, bigger vehicles mean bigger loads and more profits.

The measure is called a permissive bill, as it would merely permit the states to authorize larger truck sizes on interstate highways within their borders. But in the past states have been quick to go along with the trucking interests. And inasmuch as trucks have to get off the big interstate highways to make pickups and deliveries, they presumably would be permitted on smaller roads as well.

The bill would allow an increase in maximum width from 8 to 8½ feet (plus side mirrors and other outcroppings), and it contains a formula that would increase maximum loaded weight from 73,280 pounds to 108,500 pounds.

For the first time the bill contains a length limit—of 70 feet. Only two of the 48 contiguous states now permit trucks that long in general use, though larger trucks operate under special use permit in several states. Rep. Fred Schwengel (R-Iowa), who has led the fight against the bill, said expert testimony showed a "grandfather clause" in the bill makes the length limit meaningless and would permit use of triple-trailer trucks 105 feet long in some states.

Last year the Bureau of Public Roads predicted that the wear and tear of an estimated 300,000 bigger trucks would add $8.5 billion in repair and construction costs to the interstate highway system during the first 10 years.

Rep. Richard D. McCarthy (D-N.Y.), another leading House opponent of the bill, said, "8.5 billion dollars to benefit one-third of one per cent of the nation's vehicles is a steal. I wouldn't believe it if I weren't here."

During the campaign last fall, President Nixon promised to "take a hard new look" at the trucking bill to "make certain that the interest of the traveling public and also the life of our highways are fully protected." The Administration will testify to conclude the hearings the first week in August. Both sides are waiting to hear what officials have decided.

The American Trucking Association said the bill would mean safer trucks—for instance, bigger tires gripping larger segments of pavement. William A. Bresnahan, ATA's managing director, said truck technology has been frozen since 1956 at levels of another era and added it would be "gross injustice" not to permit the larger dimensions.

THE FEDERAL GOVERNMENT AND HIGHER EDUCATION

HON. WILLIAM A. STEIGER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. STEIGER of Wisconsin. Mr. Speaker, on September 20, 1969, Health, Education, and Welfare Secretary Robert Finch addressed the "Presidents to Presidents" conference of the Association of Student Governments.

Speaking on the topic "The Federal Government and Higher Education," the Secretary first outlined the traditional role of the Federal Government in the field of higher education—increasing knowledge and skills, assisting institutions in meeting growth problems, helping to make the option of higher education available to all Americans, and pervading all of these—striving for quality education.

But Mr. Finch pointed out:

What is not settled is the Federal role with respect to the new political life emerging on college and university campuses.

In rejecting the role of policeman as appropriate for the Federal Government, the Secretary challenges us to look for a positive response which will serve us not only now but in the future.

The Secretary's insight into this issue as well as his observations on how our decisions with regard to student involvement can and will affect the future will, I believe, be of interest and value to my colleagues, and I include the text of the Secretary's statement as part of my remarks at this point:

REMARKS OF THE HONORABLE ROBERT H. FINCH, SECRETARY OF HEALTH, EDUCATION, AND WELFARE

Presidents, all, I am honored to be here tonight . . . and rather intimidated. It's

hard enough to collect my thoughts on a topic like "The Federal Government and Higher Education" and on the ongoing problems of education at every level when I report to just one President. Tonight, I have to report to a whole host of Presidents.

I'm sure you were struck today in your visit with President Nixon, even in the brief minutes you had together, by the deep concern he has in this area. This concern is profound and is a constant daily subject of our conversations. I know that your sessions today with him and with each other are going to be most helpful to the President and to members of Congress on the range of problems we must confront, generally, on the Federal level.

The lecture system, I gather, is subject increasingly to question. In that spirit I want to move rapidly to the dialogue . . . to questions and answers. My operating premise is simply this—that if the young ever decide the old are perfectly right . . . we all are lost—and so I hope we will have had as much discourse as possible before my portion of the evening is over.

Let me begin with a few brief observations—to help structure the dialogue. I want to give you some sense of how those of us with official responsibilities in the field of higher education see our job, and our roles.

We are launched, at least, into a series of programs designed to achieve three broad goals relating to higher education. The first is to assist in increasing the fund of knowledge and the reservoir of skills upon which our society depends, today more than ever. The second is to assist in the process of growth—growth in the numbers of students attending institutions of higher education, and parallel growth in the capacity of these institutions to receive them. And the third is to make the option of higher education available to all Americans—and to broaden the varieties of approaches, and curricula such as the community college and an improved elementary and secondary system within this option.

These, then, are settled policies—settled goals with respect to the Federal Government's commitments in higher education. What is not settled is the Federal role with respect to the new political life emerging on college and university campuses. And I have at least two strong misgivings about defining in a very precise way a Federal role or a Federal presence in the area of "student unrest" so-called.

First: from all the data we have available, from session after session this summer, from surveys, and from common-sense observation—the phenomenon of unrest . . . the syndrome of discontent obviously goes far beyond "students." It embraces all young people—and it also embraces much of the adult population at whatever socio-economic level. Indeed, for all the emphasis on "the generation gap," the differences within the youth community may be greater even than differences between parents and children. There is no single cleavage of opinion—neither is there a particular ideological polarity in the discontent that unquestionably pervades our national life.

My second misgiving follows from the fact that one of the most honored traditions of our free society is the autonomy . . . the pluralism . . . of its higher educational institutions. Campus governance must be the proper concern of each institution, and of every component—faculty, students, administration, alumni, and governing boards—within that community.

It is my strong conviction that the Federal intrusion onto the campus in the guise of policeman as has been suggested by so much in the way of legislative proposals is no more desirable than authoritarian intervention in any form. If some of the bills pending before Congress were enacted . . . we would have, in effect, a national code of student conduct—and this I utterly reject . . . along with all the conformity and authoritarianism it implies.

One bill which has been proposed would, in effect, have the Secretary of HEW place a man on each campus. It proposes that if X percent of the students at the campus engage in disruptive activities, then the Secretary of HEW is to cut off all funds flowing to that institution. And so I get a picture of a man standing out there—my man on X campus—and he's counting, you know—"8, 9 . . ." and he can't tell whether that's a student or a teaching assistant or a graduate student or some guy wandering through the campus—but he hits a certain magic number and he calls me and says, "cut off the money" and there we are. Administratively, it just can't work. We cannot create that kind of apparatus—we cannot create that kind of Federal presence and still maintain the integrity of higher education in this country as we know it today.

Our response has to be tempered by our responsibilities—and our allegiance to academic freedom and the integrity of each institution must and will continue.

We are looking carefully, then, to the positive response—over the long range—which is appropriate for the Federal role. Particularly because of budgetary constraints, we are seeking responses which can be replicated as widely as possible.

The new orientation in HEW toward higher education will increasingly be on innovation . . . quality. And we seek also student involvement in higher education . . . involvement not only in the processes of higher education, but also in the areas of broader social concern to today's student. We want not merely to maximize the numbers of students who reach the college gates—we are particularly concerned about the quality of educational experience that awaits them once they have passed through the gates.

And this must be particularly so when the gates—the symbolic boundary between community and campus, town and gown, if you will—are less and less of a boundary at all. Like it or not, we do seem to inhabit Marshall McLuhan's "global village"—with instant communication . . . instant participation. Much indeed is falsified and distorted by this life process. But in such a context, we have to ask ourselves anew—what does the educational experience mean? How is it imparted? How do we make it more viable?

The opportunity to confront these questions is, it seems to me, the unique value of sessions such as this. Our dialogue has only begun. One of the exciting things about the campus visits undertaken in an unannounced way last spring by Congressman Brock, Congressman Steiger and their colleagues—and by the sessions we have had since—is the opportunity for dialogue and a learning experience that for all of us has not stopped. All of us recognize this commitment. We see, too, that the concerns extend beyond the campus to larger social issues in community and nation. And I was struck in my visit last night to Harvard that we must also mobilize this concern to go to some of the less visible, less glamorous issues affecting our national existence, such as the whole ecological-environmental spectrum. The extension of that same commitment and involvement must be engaged with a whole new range of qualitative problems.

We recognize and seek to tap the commitment of college youth. In the resolution of our social problems, I suspect the major contribution our universities can make is the time, intelligence, and dedication of their students. There is fruitful interaction here, too, because non-academic experience may well be a crucial component of quality education.

When I talk about involvement . . . and encourage young people in particular to join the fray . . . I'm not talking about what a friend of mine calls 'the Joshua effect"—certainly not only this. It is easy enough to grab a trumpet . . . stake out a position in the middle of the campus quad . . . and blast away and seek whatever constituency can be held together—but this doesn't really get us very far toward problem-solving. Politics is an infinitely slower, more subtle process than that, and those who want to make a real difference will have to do more than just blow trumpets.

I suppose I would put all I have said tonight about the University into perspective by pointing out a simple fact which is so obvious that we don't give it the thought it deserves. That fact is the level of expectations we impose on the university. America puts more burdens on the university—and charges its educational institutions generally with more fundamental tasks—than perhaps any other institution in our society. We ask that it serve many masters—government, business, the church, to name but a few—and consequently it probably serves none as it really should, while at the same time protecting its basic integrity.

In the context of all these burdens on our institutions, we see developing today another set of burdens—the burdens of an escalated political rhetoric.

The young charge that their elders are hypocrites. They confront the plethora of America's unsolved social problems—its unmet needs, against the context of incredible abundance—and the criteria of economic success seem to turn them off. Some observe those at the top of the material heap and seem to say, "I don't want to be that kind of person." "I want a different 'life style'."

On the other hand, their elders urge them to treat existing institutions with respect and with affection, and to initiate change with mature and reasoned judgment. And the young reply—"this is not maturity but senescence." The counsels of caution represent, to them, the atrophy of their elders' moral sense.

Their elders reply, in turn, that the young fail to apply the ethical standards they claim for themselves to their own modes of operation.

They observe the confrontation tactics of some—the violence calculated to "politicize" and "radicalize" their peers—and elders conclude that cynicism, hypocricy, and manipulative politics are not the exclusive domain of those over thirty.

In a sense, I am not surprised that the campuses are the focal point for all of the rhetoric, deplorable as its excesses unquestionably are. I sometimes suspect that the late-night radio talk shows in all of our cities around the Nation have increased so dramatically in popularity because the talk show is about the only modern analogue to the town meeting of our early history. It attempts to do for us what the ubiquitous coffee houses did for 18th Century London . . . or the country-store crackerbarrel for 19th Century mid-America. It provides a place for the confrontation of ideas.

But what a faceless, impersonal, synthetic medium we have today . . . what a sad and bloodless substitute for face-to-face dialogue.

And this is one more reason, one more critical reason, to preserve our universities as open forums. That is why they must always remain open to all viewpoints, the arena for the confrontation of ideas.

We really have almost no alternatives. Otherwise, we might as well fold up shop as a free pluralistic society.

My predecessor, John Gardner, stated our problem eloquently in his recent Godkin Lectures:

"There are many ways in which a nation can die. It can die from internal strife, tearing itself apart. It can die of indifference, of an unwillingness to face its problems, an

incapacity to respond to the suffering of its people. Or a nation can die of old age, not chronological so much as psychological old age, a waning of energy and an incapacity to learn new ways."

It is the unending process of renewal, institutional and self-renewal, then, to which we must all be dedicated. Although the process of formal education sometimes creates a facade, an artificial feeling of removal from the world's concerns, I urge you, those who are still in school, not to be misled. You are not preparing for life; you are already living it. As Bob Dylan says, "If you're not busy being born, you're busy dying."

Life—renewal—challenge—opportunity—these are not things as persons, or as a society, that we can put off. You're a part of it all; it's happening here—and now—and we either make a difference—or we don't. But it's a matter of choosing.

As John Gardner put it:

"A nation is never finished. You can't build it and leave it standing as the Pharaohs did the pyramids. It has to be recreated in each generation by believing, caring men and women. It is now our turn. If we don't believe or don't care, nothing can save this nation. If we believe and care, nothing can stop us."

LEGAL SERVICES AMENDMENT

HON. JOHN V. TUNNEY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. TUNNEY. Mr. Speaker, Senator MURPHY'S October 14, 1969, legal services amendment which grants to Governors absolute veto power over specific legal service programs and in effect permits one man in the State capitol to dictate the nature and extent of legal advice to be provided to thousands of individual clients, was intended to prohibit the continuation of a specific California legal service program, California Rural Legal Assistance.

The Senator's opposition to this program was predicated on what he contended were its law reform activities, such as its successful prohibition upon the importation of illegal foreign labor and its requirement that the U.S. Department of Agriculture provide food to hungry children in 19 California counties.

Mr. MURPHY'S amendment is a classic example of overkill. In effect it is an anticivil rights amendment and constitutes an interference with the canons of ethics and a lawyer's relationships with his client. Whatever may be Congress position in regard to the role of legal service programs, two issues should be considered.

First, the effect, albeit unintentional, of Senator MURPHY'S amendment, is to eliminate all southern legal service programs that vigorously represent Negroes. Virtually every southern legal service program that has vigorously represented Negroes in the area of civil rights has been under attack by both southern Governors and southern Senators.

At present the Mississippi legal service program is the object of just such anti-Negro attacks by local political figures. To give absolute veto power to a Governor will mean the termination of legal service programs for Negroes in most Southern States. That this is the hoped-for effect of the Murphy amendment is best illustrated by the unanimous and vigorous support provided by southern Senators to Senator MURPHY. Not one southern Senator voted in opposition to the Murphy amendment. Florida's Senator HOLLAND, for example, who recently failed along with Florida Governor Kirk to block the refunding of south Florida's migrant legal service program, was the most vigorous supporter of the Murphy amendment. Thus, the present amendment is an anti-civil-rights amendment whose effect will be to discourage Negroes from using the courts and to inadvertently encourage the use of the streets.

Second, the amendment is intended to and has the clear effect of interfering with the historical independence of the lawyer and the relationship of trust that he has with his client. Canon 15 of the American Bar Association's canons of ethics which have been adopted in virtually every State and are presently embraced in revised canon 7:

> The lawyer owes entire devotion to the interest of the client, warm zeal in the maintenance and defense of his rights and the exertion of his utmost learning and ability, to the end that nothing be taken or be withheld from him, save by the rules of the law, legally applied. No fear of judicial disfavor or public unpopularity should restrain him from the full discharge of his duty. In the judicial forum the client is entitled to the benefit of any and every remedy and defense that is authorized by the law of the land, and he may expect his lawyer to assert every such remedy or defense.

The American Bar Association on October 13, 1969, asserted this very position in a letter to the Honorable Senator YARBOROUGH, the chairman of the Committee on Labor and Public Welfare and that appeared in the CONGRESSIONAL RECORD S12569.

In the judicial forum the client is entitled to the benefit of any and every remedy and defense that is authorized by the law. To encourage any less and in effect to prohibit the most effective remedies, could place each of the 2,000 OEO legal service lawyers in the dilemma of violating the canons of ethics they are pledged to uphold. Moreover, it could open a Pandora's box of malpractice and disbarment proceedings against such lawyers, should they, in seeking to preserve their legal service programs from political attack by Governors, fail to seek every remedy and defense authorized by the law.

I, therefore, call upon the Members of this body to show to the poor the same commitment to the law that we ask of them. If respect for the law is to have any meaning we must first see that the poor are permitted to effectively use the legal system. With this in mind, I believe that the Murphy anti-civil-rights amendment should be rejected and that the eventual decisionmaking power for legal service programs should rest with the President's appointee, the OEO Director. Only he can effectively judge the efficiency and the effectiveness of legal service programs.

As Chief Justice Burger stated to the Tenth Circuit Judicial Conference on July 1 of this year, legal services for the poor can only be effective if wholly removed from political conflicts and from Executive control.

It seems especially ironic that we should permit a Governor to dictate the extent and nature of legal advice to a client while at the same time seeking to encourage the poor to use the courts rather than the streets.

DANGERS OF INVOLVEMENT IN ASIA

HON. LEE METCALF

OF MONTANA

IN THE SENATE OF THE UNITED STATES

Thursday, October 23, 1969

Mr. METCALF. Mr. President, the distinguished Senator from Montana (Mr. MANSFIELD), the majority leader, has warned us repeatedly of the dangers that could flow from our deepening involvement in Laos. Senator MANSFIELD is once again speaking out directly, telling it, as the young people say, like it is. I profoundly hope that our Government will take heed this time.

For years my distinguished colleague from Montana has warned while others have soothed. No alarmist, rather a realist and a man of peace, Senator MANSFIELD has tried to show us how badly our Vietnam policy has served our own interests, even if we could ignore its cost in men and resources.

In an article published recently in the Great Falls Tribune, William D. James, the executive editor, described Senator MANSFIELD'S position and cited his many warnings about Vietnam. Mr. James has also drawn a parallel with our situation in Laos. In the hope that it will reinforce his warnings of additional tragedies there and so that all Senators may have the advantage of this recapitulation of MIKE MANSFIELD for the right statements, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Great Falls Tribune, Sept. 28, 1969]

MAJORITY LEADER MANSFIELD WARNS UNITED STATES ABOUT FURTHER INVOLVEMENT IN ASIA

(By William D. James)

A warning Sen. Mike Mansfield made last week that a deeper U.S. involvement in Laos could develop into a Vietnam-style military entanglement is drawing national and international attention because of the accuracy of his grim predictions about the course of the Vietnam war.

The Senate Majority Leader based his warning about Laos on a trip he made to Southeast Asia in August at the request of President Nixon.

The trip was his sixth fact-finding trip to Southeast Asia in the last 16 years. He made such trips in 1953, 1954, 1955, 1962, 1965 and 1969.

Mansfield, who has investigated conditions in Asia at the request of Presidents Roosevelt, Truman, Eisenhower, Kennedy, Johnson and Nixon, has been consistent in warnings that the U.S. should avoid getting lured into the quicksand of Asiatic wars.

The Montana senator has been lauded frequently by national co respondents for analyzing Vietnam events accurately. Clayton Fritchey, nationally-syndicated columnist, complimented Mansfield last year for being "the one man, who from the beginning, has been uncannily right about U.S. involvement in Vietnam."

After investigating conditions in Indochina in 1953, when the French were still fighting, Mansfield recommended that the U.S. should improve its Vietnam programs. Noting that we then were spending about $25 million a year there, he stressed that the aim of our programs should be to build up the self-reliance of the people.

Mansfield has maintained consistently since 1953 that it would be better to have the Southeast Asians solve their own problems than to have U.S. military forces involved.

"The situation in Vietnam and in a larger sense in Indochina, is grim and discouraging," he reported after his 1954 visit. (On that trip, he also attended the conference of the Southeast Asia Treaty Organization (SEATO) in the Philippines at the request of President Eisenhower.)

"It would be misleading and futile," he said in his 1954 report, to tell the Senate or the people of the U.S. that conditions were other than grim and discouraging.

The need, he explained, "is not to bury the realities of this situation but to face them, however grim and discouraging they may be. If we do so, it is possible that the reversal which has been sustained in Indochina may yield experience which has application elsewhere in Asia."

"This experience could be useful in avoiding still other setbacks and damaging waste of untold millions of dollars of the resources of the citizens of the U.S.," he said.

Mansfield pointed out in 1954, when discussing the French defeat in Vietnam, that there had been a general tendency to "make the wish father to the thought and consistently and seriously underestimate the strength" of the forces fighting the French.

"If there was one overriding cause of the failure, however," he said, "it is to be found in the distorted emphasis given to the capacity of military measures alone to bring about an end to the Communist advance in Indochina."

He said it would be difficult to see what more the U.S. could have done to avert a Communist victory over the French, "short of some foolhardy commitment of American troops on the Asian mainland."

After a visit to Vietnam in 1955, Mansfield again accented the need to encourage the Vietnamese to take care of their own affairs.

"What is at stake is the active loyalty of the preponderance of the population of South Vietnam. That can be won and held only by a Vietnamese government which alone can understand and respond to the needs of the people."

Mansfield urged the U.S. to concentrate on helping with economic recovery and development programs. He said that ought to be done with a view to creating over a set period of time a self-sustaining Vietnam free from further direct reliance on U.S. assistance.

After visiting Vietnam in 1962, Mansfield expressed serious doubts about U.S. policies there. He said there were about 12,000 Americans there and that U.S. spending totaled hundreds of millions annually there.

"It would be a disservice to my country not to voice a deep concern over the trend of events, since my last visit," he said in his 1962 report.

It was seven years and $2 billion of U.S. aid later but yet, substantially, the same difficulties remained if, indeed, they have not been compounded, he reported.

He expressed fears about having the U.S. intensify support of the Vietnamese armed forces.

"This intensification, however, inevitably has carried us to the start of the road which leads to the point at which conflict in Vietnam could become of greater concern and greater responsibility to the U.S. than it is to the government and people of South Vietnam," he said.

"In present circumstances," he cautioned, "pursuit of that course could involve an expenditure of American lives and resources on a scale which would bear little relationship to the interests of the U.S., or, indeed, to the interests of the people of Vietnam."

To avoid that course, he asserted, it should be clear to ourselves as well as to the Vietnamese where the primary responsibility was in this situation:

"It must rest, as it has rested, with the Vietnamese government and people."

Concerned with the possibility that the war would be converted into an American one, fought primarily with American lives, he said:

"It should be noted in all frankness that our own bureaucratic tendencies to act in uniform and enlarging patterns have resulted in an expansion of the U.S. commitment in some places to an extent which would appear to bear only the remotest relationship to what is essential or even desirable in terms of U.S. interests."

Mansfield and congressional colleagues who accompanied him on the 1962 trip agreed that the U.S. should make a thorough reassessment of its security requirements.

Such security requirements could be met, they indicated, without any further extension of the U.S. commitment in Southeast Asia.

Pointing out the perils of having the U.S. assume too strong a role in Southeast Asiatic policies, Mansfield said in his 1962 report:

"It is doubtful that it is the best way in any Southeast Asian nation, if the responsibility for its independent survival were to come to rest more heavily with the U.S. than with indigenous leadership because of the failure or inadequacies of that leadership in meeting its own responsibilities to its people."

The Montana senator's warning of the "open-end danger of an expanding war" received worldwide attention following his 1965 trip to Southeast Asia.

Mansfield was pessimistic about chances for an early end of the war—in sharp contrast to optimistic views of top U.S. military and civilian officials.

"A rapid solution to the conflict in Vietnam is not in immediate prospect," he cautioned.

Mansfield contended that despite the great increase in American military commitment, it was doubtful, in view of the acceleration of Viet Cong efforts, that the Saigon government's position could be held without more U.S. forces.

He said there was no assurance as to what ultimate increase in U.S. military forces would be required.

The question, he said, was not one of applying increased U.S. pressure to a defined military situation, but rather of "pressing against a military situation which is, in effect, open-ended.

"How open is dependent on the extent to which North Vietnam and its supporters are willing and able to meet increased force by increased force," he said.

The senator's "open-ended" warning was discussed frequently in the next three years as the U.S. saw its military forces in Vietnam grow to 560,000 and fatalities go over the 30,000 mark.

At the conclusion of his trip in August, Mansfield recommended to President Nixon that the U.S. place an immediate ban on increases in U.S. personnel in Southeast Asia.

In a report to the Senate Foreign Relations Committee, of which he is one of the ranking members, Mansfield noted that our involvement in Laos already has cost hundreds of millions of dollars and hundreds of lives.

The involvement in Laos carries the threat of even a deeper commitment by the U.S., he said.

Congressional colleagues of Mansfield, who regard him as their leading authority on Southeast Asia, have been impressed by the accuracy of his scholarly reports after each of his fact-finding trips. Many of his Senate friends say it is tragic that his advice and warnings were ignored.

The record shows clearly that Mansfield was correct in his grim warnings about the dangers of a growing U.S. involvement in Vietnam.

The senator now is warning the nation of what might develop if the U.S. makes the same mistakes in Laos it did in Vietnam.

OVERLY OPTIMISTIC VIETNAM QUOTATIONS

(EDITOR'S NOTE.—There have been so many optimistic statements about the Vietnam war that Philip Geyelin, editorial page editor of the Washington Post, made a collection of them. Geyelin published his list in the summer after Defense Secretary Laird declared, "We have certainly turned the corner in the war."

(Since then, he probably has added a comment by President Nixon. The President described the war as possibly "one of America's finest hours, because we took a difficult task and we succeeded."

(We are reprinting the article to show the difference in views between the men quoted by Geyelin and those of Sen. Mike Mansfield appearing on this page.)

"We have never been in a better relative position."—General Westmoreland, April 10, 1968.

"We have reached an important point when the end begins to come into view. . . . The enemy has many problems: He is losing control of the scattered population under his influence . . . He sees the strength of his forces steadily declining . . . His monsoon offensives have been failures. He was dealt a mortal blow by the installation of a freely elected representative government . . . the enemy's hopes are bankrupt."—General Westmoreland, Nov. 21, 1967.

"We are generally pleased . . . we are very sure we are on the right tack"—President Johnson, July 13, 1967.

"Progress has been made . . . We have pushed the enemy farther and farther into the jungles . . . We have succeeded in attaining our objectives."—General Westmoreland, July 13, 1967.

"I expect the . . . war to achieve very sensational results in 1967."—Ambassador Lodge, Jan. 9, 1967.

"We are beginning to see some signs of success . . . There is an erosion of (enemy) morale."—Secretary of State Rusk, Aug. 25, 1966.

"We have stopped losing the war."—Secretary of Defense McNamara, October, 1965.

"We are not about to send American boys nine or ten thousand miles from home to do what Asian boys ought to be doing for themselves."—President Johnson, Oct. 21, 1964.

"The war in Vietnam is on the right track."—Ambassador Lodge, June 30, 1964.

"I think the number (of U.S. personnel) in Vietnam is not likely to increase substantially."—Secretary of Defense McNamara, May 14, 1964.

"The Vietnamese . . . themselves can handle this problem with their own effort."—Secretary of State Rusk, Feb. 24, 1964.

"The United States still hopes to withdraw its troops from South Vietnam by the end of 1965."—Secretray of Defense McNamara, Feb. 19, 1964.

"I am hopeful we can bring back additional . . . men . . . because I personally believe this is a war the Vietnamese must fight. "I don't believe we can take on that combat task for them."—Secretary of Defense McNamara, Feb. 3, 1964.

"Victory . . . is just months away, and the

reduction of American advisors can begin any time now . . . I can safely say the end of the war is in sight."—Gen. Paul D. Markins, commander of the Military Assistance Command in Saigon, Oct. 31, 1963.

"Secretary McNamara and Gen. (Maxwell) Taylor reported their judgment that the major part of the U.S. military task can be completed by the end of 1965 . . ."—White House statement, Oct. 2, 1963.

"I feel we shall achieve victory in 1964."—Tram Van Dong, South Vietnamese general, Oct. 1, 1963.

"South Vietnam is on its way to victory . . ."—Frederick E. Nolting, U.S. ambassador to South Vietnam, June 12, 1963.

"The South Vietnamese themselves are fighting their own battle, fighting well."—Secretary of State Rusk, April, 1963.

"(The struggle) is turning an important corner."—Secretary of State Rusk, March 8, 1963.

"The corner has definitely been turned toward victory in South Vietnam."—Arthur Sylvester, Assistant Secretary of Defense, March 8, 1963.

"There are definitely encouraging elements . . . the ratio of casualties . . . indicates some turning in the situation."—Secretary of State Rusk, Feb. 1, 1963.

"The war in Vietnam is going well and will succeed."—Secretary McNamara, Jan. 31, 1963.

"The South Vietnamese should achieve victory in three years . . . I am confident the Vietnamese are going to win the war. (The Viet Cong) face inevitable defeat."—Adm. Harry D. Felt, U.S. Commander-in-Chief of Pacific Forces, Jan. 12, 1963.

"Every quantitative measurement shows we're winning the war . . . U.S. aid to Vietnam has reached a peak and will start to level off."—Secretary of Defense McNamara, 1962.

"The Communists now realize they can never conquer free Vietnam."—Gen. J. W. Daniel, official military aide to Vietnam, Jan. 8, 1961.

"The American aid program in Vietnam has proved an enormous success, one of the major victories of American policy . . ."—Gen. J. W. Daniel, official military aide to Vietnam, Sept. 7, 1959.

CHILDREN'S PRAYERS

HON. RICHARD L. ROUDEBUSH

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. ROUDEBUSH. Mr. Speaker, one of the most incredible decisions ever rendered by the Supreme Court outlawed voluntary prayer in the public schools of America.

Defenders of this outrage like to split hairs and advance the argument that only "prescribed" prayers were outlawed.

This is fiction, of course, because, as all of our educators are well aware, the interpretation of the decision has had the devastating effect of banishing all word of God, prayer, and the Bible from our public schools.

Some people see great danger in allowing a group of schoolchildren to start their day with a simple, child's prayer.

But the same people applaud Supreme Court decisions which have given every pornographer in the Nation the green light to flood our mailboxes and magazine stands with filthy books and magazines.

For the past several weeks we have been inserting five children's prayers weekly into the CONGRESSIONAL RECORD which may be used by our public schools if they so choose.

The Supreme Court would ban all religious aspects from American public life, but I do not believe the American people desire this, nor will they allow such action.

This week's children's prayers include the following:

I

We thank you, God,
For meat and drink;
We thank You for
Each happy day;
We thank You for
Long hours of play;
We thank You for
Bright butterflies;
We thank you for
Our own two eyes;
We thank You for
The birds that sing;
We thank You for
Just everything.

II

O send out Thy
Light and Thy truth:
Let them lead me
Let them bring me
Unto Thy holy hill.
(Forty-third Psalm.)

III

Jesus, from Thy throne on high,
Far above that bright blue sky,
Look on me with loving eye;
Hear me, Holy Jesus.

IV

Be Thou with me every day,
In my work and in my play,
When I learn and when I pray;
Hear me, Holy Jesus.

V

I will praise Thee, O Lord,
With my whole heart;
I will show forth all
Thy marvelous works.
I will be glad and rejoice
In Thee: I will sing
Praise to Thy name
O Thou most high.
(Ninth Psalm.)

FORMER POSTMASTER GENERAL DAY OPPOSES POSTAL CORPORATION AND SHOWS THAT NO CASE HAS BEEN PROVEN FOR DESTRUCTION OF THE POST OFFICE DEPARTMENT

HON. RALPH YARBOROUGH

OF TEXAS

IN THE SENATE OF THE UNITED STATES

Thursday, October 23, 1969

Mr. YARBOROUGH. Mr. President, last Thursday morning, October 16, Mr. J. Edward Day appeared before the Senate Committee on Post Office and Civil Service to give his views on the administration's Postal Corporation proposal, H.R. 11750.

Mr. Day is particularly well qualified to speak on this subject not only because he served as President John F. Kennedy's Postmaster General from January 21, 1961, until September 9, 1963, but also because it is widely agreed by former Post Office associates and Washingtonians generally that he was one of the best administrators to ever serve in that vital Cabinet position.

Examples of his progressive and innovative services are legion. He conceived and inaugurated Zip Code service, he began A. B. C. D. business service—a service recently abandoned for so-called economy reasons—and he was the first Postmaster General to come before Congress himself and recommend a salary increase for the postal employees.

Aside from Mr. Day's direct experience as Postmaster General, his illustrious background in both business and public service lend even greater weight to his views regarding this corporation proposal. Admitted to the Illinois bar in 1938, he served as legislative assistant to Gov. Adlai Stevenson in 1949 and was Illinois Commissioner of Insurance from 1950 to 1953.

His business career with the Prudential Insurance Co. of America began when he was made associate general solicitor of that firm in 1953. He was later to serve as associate general counsel and then as vice president in charge of western operations—Los Angeles 1957–60—before President Kennedy virtually drafted this highly capable citizen for duty as our Nation's Postmaster General.

The administration's corporation proposal is quite complicated and Mr. Day's statement before the Post Office Committee was therefore of some length—but it was direct and to the point and it brought with it the depth of experience and good judgment that J. Edward Day has always been known for.

In his statement, he covered every facet of the corporate proposal. Highlighting his remarks, Day pointed out that H.R. 11750 recommends, among other things, that a postal corporation, entirely owned by the Federal Government, be chartered by the Congress to operate the postal service on a self-supporting basis. Yet there is no clear and convincing argument why reform cannot be accomplished within the framework of the present structure.

Day went on to conclude that a departure from congressional control of Federal activities should be made only where it is clearly demonstrated the activities can be more efficiently and economically operated through the corporate structure, and a net advance to the Government will result. There is no evidence to that effect in the case of the postal service.

The basic contention of critics is that the Post Office is "on the verge of collapse." Nothing could be further from the truth. The so-called deficit in "real" dollars is less per capita today than in 1950. We have fewer employees in proportion to mail volume than does Great Britain, Switzerland, the Netherlands, Belgium, West Germany, Italy, and Japan. In truth, we operate the most efficient postal service in the world.

The unusual Chicago tie-up of October 1966 is also cited as a symptom of impending disaster—yet critics fail to mention there has been no reoccurrence in the 3 years since.

The postal service is compared unfavorably to TVA, yet such a comparison is really not valid. TVA is geographically

concentrated, capital intensive, and employs less than 20,000 people. The postal service is a sprawling, labor intensive giant employing three-quarters of a million people, and offering a variety of services to the public throughout the United States.

The Post Office has a history of working relationships and traditions that would be destroyed through a reorganization, whereas TVA began as a Government corporation. In fact, TVA, like the Rural Electrification Agency, was created in an area where private enterprise failed to do the job and it was necessary for the Federal Government to step in.

With the proposed corporation's break-even obsession, we would probably see skyrocketing postal rates as such costs as depreciation of facilities, debt retirement, and public service costs were incorporated in postal rates. Yet there is no objective reason why the postal service should retrieve all of its costs from charges. The post office serves all the people—and since these users are taxpayers, it is entirely appropriate that Federal tax revenues should provide a significant part of the postal budget. However, the proposed corporation concept would, with its system of incremental costing, in all probability put the vast burden of these additional expenses on the first-class mailer, the person least able to afford such an increase.

Under the administration's bill, the Post Office would not necessarily be responsive to the desires of the people and the Congress would be almost powerless to force it to comply with its wishes. Congress should not abdicate its role as overseer of this vast Department. There is too much at stake.

Day goes on to point out that while there is a need for meaningful postal reform, it can and should be carried out within the present structure of the Post Office Department whereby control of the Post Office would remain in the hands of the people through their elected representatives in the Congress.

Reorganization is, to a large extent, an avoidance of the real problems that plague the postal service. The postal service will always be a labor intensive organization, as are most service industries, and it is unrealistic to assume that all, or even a major part, of the mythical billion dollar savings projected under the administration's bill would ever materialize.

The real problem is not so much one of reorganization but one of bringing the postal service into the 20th century. In the past, funds have actually been turned back to the Treasury for lack of knowing what was needed. The problems that should be attacked are those of personnel, facilities, and mechanism—both large and small scale. When these questions are answered to the satisfaction of the Congress, moneys should be appropriated and corrective action taken.

Mr. President, the case against this proposal is a strong one and it was eloquently presented by former Postmaster Day. I therefore ask that this important message be printed in the Extensions of Remarks with the hope that it will receive the consideration it deserves from Congress and the American people.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

PROPOSAL FOR POSTAL CORPORATION

(By J. Edward Day)

I had decidedly mixed feelings about the invitation from the Committee to appear today to give my views on the proposals for post office reorganization and for a postal corporation.

I certainly don't want to appear to be in some kind of a cat and dog fight with as fine a man as Mr. Blount. I don't want to be misunderstood as being infatuated with the *status quo*. I don't want to be misunderstood as seeming to favor politics in the Post Office, because I certainly don't. In a way I wish I could just ride along with all the slogans and over-simplifications and accept the corporation proposal as the cure for everything that isn't perfect about the Post Office.

But I think the best way for the Congress to make an objective analysis of this proposal is to hear both sides. I don't particularly relish the role in which this casts me because I much prefer to be a nice noncontroversial type. But I feel very strongly that this corporation bill for so-called total reform would in fact mean total disarray.

First, I want to bring the Committee up-to-date on some of my background, so far as it bears on this subject, and on some of my current activities.

When I resigned as Postmaster General in August, 1963, I became a partner in the law firm of Sidley & Austin. This is a large Chicago corporation law firm with which I began practice 30 years ago, and I am in charge of their Washington office. On July 1, 1968, our firm began representing as one of its clients the Associated Third Class Mail Users and I am the General Counsel of that organization. However, many of the points involved in the postal corporation proposal are of no direct concern to ATCMU as such. Since my opinions on each of the endless separate points involved in this far reaching proposal of course could not be passed upon by the ATCMU Board of Directors, the views I will give today should be treated as my personal opinions. Many of the members of the Associated Third Class Mail Users might be expected to agree, in general, with my views on the postal reorganization proposals. However, it is difficult for an organization with a diverse membership of people who cannot follow all the details of postal legislation to be expected to have an agreed position on each of the many separate features of a complicated proposal such as the postal reorganization and postal corporation plans.

In April 1967, when Larry O'Brien first announced his proposal for a postal corporation, I wrote a nationally syndicated article at the request of the North American Newspaper Alliance explaining the reasons why I opposed the idea. That was a year before I or our firm had any connection with ATCMU. That article started out as follows:

"With all due respect to my good friend Larry O'Brien, I feel that his much publicized speech about turning the Post Office over to a non-profit government corporation revives an old and unrealistic suggestion at a very bad time.

"The impending lengthy discussion and study of this plan will, in my opinion, only postpone facing up to some urgent but achievable needs of the Post Office. In addition the speech has provided ammunition from a surprising source for those who delude themselves by believing that business has a monopoly on brains and efficiency and that government employees and managers are lazy incompetents.

"The fouled-up Post Office Mr. O'Brien describes in his speech is a Department I never knew."

North American Newspaper Alliance republished the article in an up-dated form a year ago when the Kappel Commission Report was first issued.

I realize that your Committee is principally interested today in hearing about the bond financing provisions of the Administration's corporation proposal. I will try to concentrate on that aspect. But the bond provisions can't be isolated and dealt with in a vacuum. The bond financing provisions of the bill would necessarily and unavoidably require forcing our postal service into a break-even straitjacket. Supporting the bonds would be the first and foremost goal—the be-all and end-all of postal policy. Everything else would have to give way. Considerations of full service to the public, reasonable postal rates, public service allowance, and all the rest would have to come second. Supporting the bonds would become the new Postal Policy.

To me, it is quite remarkable that, in spite of the many objections which can be made to the corporation proposal, there has been very little published notice of these objections. On the contrary, there has been a barrage of one-sided propaganda and Chamber of Commerce slogans put forward in support of the Kappel proposal, much of it—I am afraid—by people who have limited qualifications as experts on the Post Office or even as experts on operation of large organizations generally.

To qualify myself a bit, I might mention that prior to my 929 days as Postmaster General, I was for eight years one of the top senior officers of the Prudential Insurance Company of America, which, in terms of assets, is the largest private corporation in the world. In a remarkable number of respects, Prudential is similar to the Post Office. Both have offices and personnel in every part of the country; both have a need for giving good service and establishing favorable relations with the public; both have regional offices, with continuing problems of the degree of autonomy to give to regions and to local offices; both have major real estate responsibilities in building or leasing buildings large and small; both handle large amounts of money; both have employees who are organized in highly aggressive unions; both are basically paperwork operations; both have an inspection service; both have complex problems of levels of management, chains of command, and internal communications; both are highly regulated as to their policies and operations by detailed legislation; both are faced with problems of turnover and the necessity of competing in the labor market for rank and file personnel (in contrast with earlier years when there was a situation of highly stable and dedicated employment of people for whom employment security was the major incentive). In addition, both organizations have for years experienced the headaches associated with attempting to automate and mechanize operations. Both have even had several changes in the top chief executive just in the past 8½ years.

I may seem to be overdoing the close comparison between these two giant organizations, one public and one private, but it is a fact that when I came from Prudential to the Post Office in 1961 I often felt that I had merely moved to a different desk in the same organization.

As a matter of fact, and only partly in jest, I have frequently pointed out that a very large private bureaucracy even has another feature which is often thought of as associated only with government. This is illustrated by an apocryphal story about a top officer of a large life insurance company who was asked to run for United States Senator. After thinking it over, he declined, saying, "I don't want to leave the Metropolitan Life. I like politics too much." It is definitely a fact that there is a certain

amount of politics in all large organizations, public or private.

I mention all this background because of the fact that I did have an unusual experience in acquiring a top level inside familiarity with one of the largest public organizations in the world and one of the largest private organizations. This is important because too many of the editorials and columns commenting on the postal corporation idea have indicated that—

(a) anyone who understands business management will necessarily be an all-out advocate of the postal corporation idea, and

(b) that business management is *a fortiori* better than government management.

There are thousands of pages in the Kappel Commission Report and its supporting volumes and thousands more pages have been written about the Report and about related or alternative proposals. Therefore, in a statement of this kind, one can only touch on some of the highlights.

THE KAPPEL COMMISSION

I agree with most of what appears in the statement made before the House Committee by former Deputy Postmaster General Fred Belen on this subject on May 20. I am convinced that even if the post office—corporation or not—could pay six figure salaries, they could not get a better executive than Fred. It is regrettable that he was not even consulted before the postal corporation proposal was launched by Mr. O'Brien in April, 1967. It is equally regrettable that someone with his long and deep knowledge of postal problems was not a member of the Kappel Commission. The members of the Commission were, of course, all important men. However, I think it a remarkable fact that not one of them had any background in postal matters. I doubt if the President of Campbell Soup Company—who was a member of the Commission—would have been impressed by the results of a critical survey of his company by a group that did not include even one person with the slightest experience in the food business.

The same can be said about the President of General Electric, of the Bank of America, and of Cummins Engine Company—all members of the Commission. The same is even true of AT&T—a company for which I have the most intense personal and professional respect. Some might think that there are many parallels to the Post Office in a telephone system because both involve communications. However, electronic communications are, by their nature, readily susceptible to a most far-reaching degree of standardization and automation. Electronic switching makes it possible to have the customer get his individual call through to its destination without any direct participation by a telephone company employee. On the other hand, regardless of all the superficial ideas that some may have, any postal system will necessarily remain to a large degree a manual operation. As one example, 42% of Post Office cost is for delivery service and it is certainly never going to be possible to have mail delivered door-to-door by clanking robots.

Similarly, there are over 30,000 post offices and only two or three hundred of them at the very most are large enough to justify a high degree of mechanization.

Although no person having any post office background was included on the Commission, one of the 10 commissioners was a former Director of the Bureau of the Budget. I have no hesitancy in saying that I think the Bureau of the Budget is the No. 1 enemy of the Post Office and accountable more than any other one reason for Post Office difficulties.

Federal money generally is handed out to the glamourous or politically potent agencies, such as Defense and Space. Nearly all of the old-line, non-glamourous agencies such as the Post Office, Customs Bureau and the regulatory agencies are strangled to death for funds to try to do a decent job. The Post Office problem is lack of money and that problem can't be solved by re-shuffling the organization chart or giving new titles to the people in charge.

ASSUMPTIONS BEHIND THE PROPOSAL

My objections to the Kappel approach largely relate to the premises and assumptions on which the proposal is based. I disagree with nearly all of them. Some of these premises and assumptions, which are either explicit in the Report or implicit in its tone and recommendations, are as follows:

(1) The Post Office is generally a mess.

(2) The difficulties in the Chicago Post Office in October 1966 were a symptom of an approaching catastrophe in the Post Office generally.

(3) Participation by Congress in postal policy, postal rates and postal pay represents intolerable interference and has fouled up the Department's operations.

(4) Huge savings on the order of $1 billion a year can be achieved by adopting the Kappel recommendations.

(5) There is some magic of efficiency, economy and error-free management in a corporate form of organization. (I might mention here that it was not a federal department that brought out the Edsel automobile, or the Convair 880 airplane, or that hired the private detectives to tail Ralph Nader.)

(6) An organization is political only when Congress has a major say in its affairs and is pure and pristinely non-political when presidential appointees run things.

(7) The first and foremost goal of the Post Office should be a break-even operation.

(8) There is a better chance of continuing the Post Office's long history of strike free labor management relations by halting the program of having postal pay set by Congress and to, instead, have it determined by collective bargaining. In my opinion, this collective bargaining would, at best end up almost every time with arbitration and a decision by one or two men on the pay level of over 700,000 employees.

(9) Postal employees can and should be separated from and treated differently from other federal employees on job status, fringe benefits and other features of employment.

THE BREAK-EVEN OBSESSION

To go back to number 7 on this list of premises, I feel that the greatest flaw in the Kappel approach is the adoption of what I call the break-even obsession about the Post Office.

If a state university were run on the philosophy that its educational program was limited to what it could pay for out of tuition it collected, it wouldn't be expected to be much of a university. The goal of a great public university is to provide an educational program of top quality. Consideration of the relationship of financial outgo to amounts collected from the students is purely secondary.

The same should be true of the Post Office—and will be if historical policy is followed in setting Post Office goals and priorities. The Post Office receives part—at the moment a very large part—of the amount it needs to pay its costs from charges by users. But since it serves all the people—and since those users are taxpayers—there is no objective reason why it should retrieve all of its costs from postal charges.

Charges for postage are really just another tax. Taxpayers are already paying for government services. The Post Office provides one of the most vital and widely needed and used of government services. It is entirely appropriate, therefore, that federal tax revenues should provide a significant part of the postal budget.

Chamber of Commerce groups, conservative newspaper editorial writers and others, have talked for years about the need for a break-even operation in the Post Office. Their speeches and articles assume that the desirability—even the necessity—for a break-even operation needs no proof, in fact does not even leave room for argument. They talk as though the proposition were carved in stone on Sinai. A remarkable job has been done of turning slogans for a particular point of view into something approaching gospel.

All of this talk, usually unanswered talk—has tended to balloon the break-even philosophy into a break-even obsession. From time to time certain postal officials, nearly all Budget Bureau officials and many so-called analysts of the Post Office, fall victim to this break-even obsession and come to regard it as the be-all and end-all of postal goals and thinking.

From a financial standpoint the Post Office is much like a metropolitan public transit system. Since nearly everybody uses it, it makes little difference whether it is paid for by user charges or, to a substantial degree, by general tax revenue. The fact that the Post Office has a so-called deficit is no more relevant to judging its effectiveness and goals than the "deficit" of the Department of Commerce, the Veterans' Administration, or the Department of the Interior.

Yet the reason the Post Office has this so-called deficit is purely and simply because its costs continue to go up with all other costs and Congress has used common sense and regard for the public interest in avoiding overly frequent and overly precipitous rate increases.

ATTACKS ON THE POST OFFICE

Nonetheless, the existence of the so-called deficit is used in the Kappel Report and by others as supposed proof that the Post Office is archaic, inefficient, poorly managed and all the rest. This is perhaps understandable in view of the fact that we live in an age where scoffing, criticism, carping and cynicism are the order of the day. It is not fashionable to see the good side of much of anything or to be understanding about work situations where occasional human errors make it difficult to achieve 100% perfection. In our frenzied, impersonal society it is popular to find fault, and the Post Office and its employees are natural targets. Add to this the human quality of nearly all of us to think of his own problem as the really big problem, so that every mistake or delay as to his own mail by the Post Office, no matter how isolated or infrequent, is magnified into a sweeping generalization that the Post Office is poorly organized and poorly run. It is hard for any individual to think of the occasional delay in one of his own letters in the context of delivering 80 billion pieces of mail a year—which number is considerably more than the number of *seconds* which have ticked by since the death of Julius Caesar.

My principal argument, therefore, with the Kappel proposal is its top priority emphasis on the break-even goal, rather than on service as the top consideration.

If the corporation were established, as proposed, with the rigid break-even requirement, with participation by Congress in the rate-making process diluted almost to the vanishing point, and with the proposed bond issue authority, the result would be that rates for all classes of mail would have to go up as much as 100%. We have seen what has happened to the parcel post system as the result of giving rate-making power to the Executive Branch, rather than to Congress. The rates have been raised so frequently and so precipitately that the whole system is on the verge of being wrecked and parcel service at moderate rates is no longer available to the general public from the Post Office.

UNREALISTIC PREDICTIONS OF SAVINGS

I feel that the Kappel predictions of savings which can be achieved by adopting its recommendations are so unrealistic as to be strictly of an ivory tower nature. The biggest single saving is to come from mechanization

for superseding certain activities of city letter carriers. The Report says that 15% of the cost of delivery operations can be saved by this means. This figures out to about $450 million in view of the fact that the delivery operation accounts for 42% of Post Office costs. This idea of trying to mechanize the change of address and casing work which the letter carrier performs when he first comes on duty is an old idea. It has been thoroughly tested in the past and found to be completely unworkable. If it would work, it could be instituted immediately and certainly would not have to wait for reorganization of the Department. This, and other suggestions relating to increased mechanization, cannot fairly be described as savings related to having a corporation take over.

Unrealistic statements by study committees that the Post Office could save hundreds of millions of dollars a year are nothing new. Back in 1954 a 10 member Advisory Council claimed that "economies totaling hundreds of millions of dollars are possible" in the Post Office. Mr. Summerfield had a detailed analysis of this Council's recommendations made by the Department and by outside experts including Mr. Maurice Stans, and issued a 350 page report which, among other things, demonstrated in detail that any claim of great potential short term savings was totally unrealistic.

RATES WOULD SKYROCKET

Since I am convinced that no one billion dollars of real, near term savings, or anything close to it is possible, it seems clear to me that the break-even policy prescribed by the Administration Bill could be carried out only by financial shock treatment in the form of drastic rate increases and continuing cutbacks in service.

As a lawyer I believe that radical general rate increases could, under this Bill, be made entirely by administrative action by the Corporation and could then remain in effect for two years or more, without any power in *either* the Congress or the courts to veto or even modify the increases during those two or more years. This is possible under the temporary rate authority in Sec. 1253(d) and Sec. 1257(e) of H.R. 11750 and is something new that the Kappel Report did not recommend. I think the Post Office Department is realistic in recognizing that if break-even is to be achieved in order to support the bonds, then the Corporation must have this unprecedented, unrestricted "temporary rate" power. This one feature of H.R. 11750 alone dramatizes how the whole concept of postal policy would be dislocated by this proposal.

My prediction is that adoption in toto of H.R. 11750 would bring us a 12 cent first class rate in just a few years and enormous rate increases for each of the other classes, too.

Here are just some of my reasons for this prediction:

First, despite all the glowing statements about the saleability of the proposed non-government-guaranteed bonds, I am convinced they would be saleable only at sky high interest rates—10 or 12 percent—and even then only with extremely generous sinking fund and mortgage lien provisions. Even now the commercial mortgage rate for fully secured loans to profitable corporations is 9.5 percent. Sound business concerns are paying an effective rate of 10.4 percent for bank loans. I would expect the servicing—combined interest and principal amortization—of the projected $10 billion of postal bonds to cost the Corporation as much as $2 billion a year. This would be an entirely new direct cost to the postal service to be paid for from postal rate increases.

(It must be borne in mind that a general rate increase affecting first, second and third class, such as is now being proposed by the Post Office Department, brings in about $660 million a year, assuming no loss in volume.)

Second, the backers of the corporation proposal say much about the lack of opportunities for promotion for rank and file postal employees. I would assume that these backers therefore contemplate tens of thousands of new higher level jobs. This could cost hundreds of millions of dollars annually.

Third, the Department has committed itself to an improved cost ascertainment system. This is bound to show that too much postal cost is now being assigned to some of the non-priority classes of mail. This would mean a further increase for first class. I am not so naive as to think that a corporation or Congress or anyone else is going to institute these staggering increases for first class mail without increases at the same time for other classes, regardless of what proper cost ascertainment shows. When I predict 12 cents for first class, I am assuming huge increases for other classes too.

Fourth, Mr. Blount has pointed out quite realistically in testimony before the House Subcommittee on Postal Rates, that the Post Office "faces the loss of some of its more lucrative third class mail business" to private carriers. He then stated: "Loss of third class mail [volume] ultimately works to increase the postage required of first class mail." This is just what I contemplate would happen as a result of the drastic rate increases for all classes which I foresee resulting from the bond financing proposal.

Fifth, the existing level of the public service allowance would, under the Administration Bill, be sharply reduced. This means rates would have to go higher.

Sixth, the special carrying charge and imputed charge features for parcel post ratemaking included in Section 1203 of H.R. 11750 is bound to mean even further acceleration of rate increases for that class, further cream skimming by competitors and more huge losses of the profitable portion of parcel post volume. Parcel post makes a big contribution to post office institutional cost. When parcel post volume plummets, this institutional cost has to be picked up by the other classes.

Seventh, the Kappel Commission (Report. p. 82) recommended that "the Corporation fix its rates to earn its projected costs, including interest and appreciation, plus about 3 to 5 percent to cover unanticipated costs." This is a recommendation that would in all likelihood be followed by a postal corporation determined to meet a break-even goal, and, particularly, to try to provide adequate support for servicing its bonds. Sec. 1201 of H.R. 11750 says that "costs", which, with limited exceptions, are to be covered by postal revenue, shall include "a reasonable provision for contingencies." Five percent of postal costs would come to several hundred million dollars.

Eighth, Section 1201 of H.R. 11750 also says that "costs" to be covered shall include "depreciation on capital facilities and equipment." The Kappel Report Annex material indicates depreciation should be $35 million per $1 billion of capital investment. (Annex I, Sec. II, p. 30.)

Ninth, it is unrealistic to assume that all or even the major part of projected capital improvements to be acquired with the bond proceeds are going to save dollars, particularly on a near term basis. If a postal building is antiquated and poorly ventilated and crowded it should be replaced regardless of whether a dollar saving can be claimed. If the capital improvement program is well balanced and service oriented, it should include many facilities directed toward faster delivery which facilities could not be expected to result in significant savings in operating costs. Hamburg, Germany, has a three foot diameter large capacity pneumatic tube system for carrying mail under its streets. London has a special subway system just for carrying mail. New York City, Chicago, Boston and eventually Washington should have hundreds of millions in federal money spent on adaptation of the subway systems for carrying mail. As an aisde, let me say that I think any federal financial support for an urban rapid transit system should be conditioned upon that system being adapted to carrying mail. A mail truck can't move any faster in Mnahattan crosstown traffic snarls than your taxi can.

Tenth, one of the earliest and most prestigious backers of the postal corporation plan, Mr. Gronouski, told the House Committee: "I support the postal corporation idea, also, because * * * I would look for a substantial improvement in postal worker wages and fringe benefits" under that system. I doubt if that prediction was foremost in the minds of those who gave overwhelming support to the corporation proposal in the U.S. Chamber of Commerce poll among its members. But because of Mr. Gronouski's experience and good judgment, we must accept this prediction as at least a possibility and it certainly would not result in dollar savings for the corporation.

These are just some highlights of why first class rates would, in my judgment, skyrocket under the corporation proposal. First class is where the money is—particularly in view of the very real competitiev situation which must be faced in pricing other classes of mail.

I have attached to this statement as Exhibit A an itemized schedule of estimated increases in postal costs under this corporation proposal. The total is $2,419,000,000 which I believe is a most conservative figure.

SERVICES WOULD BE CURTAILED

In my opinion the break-even policy and the break-even obsession would also result in service curtailment by the corporation. Just in the past nine months we have seen repeated announcements of reduced servic by a highly capable but definitely break-even oriented postal administration. For example, in these nine months there has been announcement (a) of abandonment of the ABCD program for same day delivery in business areas, (b) of reduction of weekday business area deliveries from three to two, (c) of reduction of Saturday business area deliveries from two to one, (d) of curtailment of special delivery service and (e) of proposals to require detached address cards for merchandise samples.

It also seems a near certainty that under the pressure of the break-even obsession the corporation would drastically curtail rural routes and rural post offices. Under H.R. 11750 Congress would have no veto power over this. The story of what happens to service to less densely populated areas when an intense cost squeeze is on can be seen in the recent history of REA.

Now, in view of the special focus the Committee wishes to achieve at today's hearing. I will turn to an analysis of the bond financing provisions of the bill.

ANALYSIS OF THE FINANCE PROVISIONS OF H.R. 11750

The provisions of H.R. 11750 relating to finance are found in Sections 1001–1008 of the proposed Bill. The Bill, in Section 1005, authorizes the Postal Service to issue up to $10 billion in obligations. In any one fiscal year, the net increase in the amount of obligations outstanding issued for the purpose of capital improvemetns may not exceed $1.5 billion. Under Section 1006 of the Bill, the Postal Service may require the Secretary of the Treasuyr to purchase up to $2 billion of Postal Service obligations. There is no provision for the Postal Service bonds to be guaranteed by the United States Government. The General Accounting Office, in its testimony before the House Post Office and Civil Service Committee, criticized many of the main features of the finance provisions of H.R. 11750. (See House Hearngs, pp. 1115–1116, 1134–1139.) The following is a detailed

analysis of the essential parts of the finance provisions of H.R. 11750. It covers these basic points:

(1) The finance provisions of H.R. 11750 do not contain adequate controls over the borrowing power of the Postal Service.

(2) The finance provisions of H.R. 11750 do not explain what would happen to the Postal Service in the event of default on the bonds.

(3) Since the Postal Service bonds would not be guaranteed by the United States Government, acceptable interest rates could not be obtained.

(4) Since there is only limited authority requiring the Secretary of the Treasury to buy the bonds, large amounts of the bonds could be sold only at very high interest rates.

At the outset, it should be noted that the Kappel Commission Report did not make a detailed study of the feasibility of finance provisions similar to those contained in H.R. 11750. One of the staff studies of the Kappel Commission prepared by Price, Waterhouse & Co. makes the naive and unrealistic statement that "variations in interest rates would have a relatively minor effect on overall operating costs . . ." (Vol. I, Section II, p. 29.) The question of whether or not a U.S. Government guarantee would be necessary was discussed but not resolved. (Vol. I, Section II, p. 38). The Report of the Commission did recommend that the Postal Corporation be authorized to float up to $2 billion in revenue bonds and possibly a larger authorization for secured bonds (Report, p. 81).

H.R. 11750 does not contain adequate controls over the borrowing power of the postal service

H.R. 11750 does not contain any limitations as to what the proceeds from Postal Service bonds could be used for. While most of the discussion of the legislation has been related to the use of the borrowing power to build new post offices and modernize facilities and equipment, there is no requirement in the Bill that the bonds be used for any such purpose. Mr. Blount, in his testimony before the House Committee, conceded that the bond proceeds can be used for *operating expenses* (Hearings, p. 339). It also can be noted that Section 1005(a) of H.R. 11750 provides that the net increase in bonds in any one fiscal year *"for the purpose of capital improvements"* may not exceed $1.5 billion. There is absolutely *no limitation* on the net increase of bonds used for purposes *other than* capital improvements.

Even if the proceeds of the bonds were used only for capital improvements, the Postal Service could have a net increase of $1.5 billion in bonds each year. At that rate, the entire authority for new borrowing for the Postal Service could be exhausted in 7 years. The experience with other government corporations has been that the borrowing authority has been, at later dates, increased tremendously over the original authorization. For example, TVA obtained increases of their borrowing authority in 1959 and 1966. The Commodity Credit Corporation started with a borrowing authority of $500 million in 1938. Since then there have been 10 increases in its borrowing authority and the Commodity Credit Corporation is now authorized to borrow $14,500,000,000—twenty-nine times its original authorization.

H.R. 11750 also contains a provision—Section 1006(b)—which would enable the Postal Service to require the Secretary of the Treasury to purchase up to $2 billion of the obligations of the Postal Service. Since the Postal Service could not be expected to achieve a self-sustaining operation for a number of years, it is likely that the $2 billion borrowing authority from the Treasury would be used up in the first few years of the Postal Corporation. See testimony of Postmaster General Blount, House Committee, pp. 177–78.

If the Postal Service did attempt to offer its bonds to the public, there are no controls that the Secretary of the Treasury could exert over the issuance of the bonds. Section 1006(a) of H.R. 11750 states in pertinent part:

"If the Secretary does not purchase such obligations, the Postal Service may proceed to issue and sell them to a party or parties other than the Secretary upon *notice* to the Secretary and upon *consultation* as to the date of issuance, maximum rates of interest, and other terms and conditions" (emphasis supplied).

The above provision requires only that the Postal Service give "notice" to the Secretary of the Treasury and engage in "consultation" with him. The section does *not* require the *approval* of the Secretary of the Treasury in order to sell bonds to the public. It should be noted that the issuance of TVA bonds is subject to control by the Secretary of the Treasury (Section 16 U.S.C. § 831n–4(c)).

Section 209(3) of H.R. 11750 states that "Chapter 14 of title 31, the Government Corporation Control Act" shall apply to the Postal Service "except as otherwise expressly provided in this title."

Section 868(a) of the Government Corporation Control Act, 31 U.S.C. § 868(a) provides that all bonds and other obligations issued by the government corporations and offered to the public "shall be in such forms and denominations, shall have such maturities, shall bear such rates of interest, shall be subject to such terms and conditions, shall be issued in such manner and at such times and sold at such prices as have been or as may be *approved* by the Secretary of the Treasury" (emphasis added). However, the language already quoted from Section 1006(a) of H.R. 11750 providing for "notice" and "consultation" is the only provision which would give any control over the public issuance of postal corporation bonds to the Secretary of the Treasury. Section 1005(b) of H.R. 11750 states:

"The issue of obligations by the Postal Service shall be subject to the requirements of Section 847–849 of title 31 *and of no other law*" (emphasis supplied).

Since Section 1005(b) of H.R. 11750 only refers to Sections 847–849 of the Government Corporation Control Act, it is evident that Section 868(a) of the Government Corporation Control Act, which requires that the Secretary of the Treasury approve the terms and conditions relating to the issuance of bonds to the public, would not apply to the Postal Service. Robert F. Keller, Acting Comptroller of the United States, pointed out in his testimony before the House Committee that "The Corporation . . . would be subject to less congressional control than most other wholly owned Government Corporations subject to the Government Corporation Control Act." (House Hearings, p. 1115.)

It should be noted that Section 1005(b) gives the Postal Service wide discretion to make "binding covenants" with the bondholders. Such covenants could cover such matters as "application and use of revenues and receipts of the Postal Service" and "such other matters as the Postal Service may deem necessary or desirable to enhance the marketability of said obligations." Under this authority, the Postal Service might even try to make "binding covenants" with respect to postal rates and other important matters of postal policy. There is no provision for an independent review and approval of the covenants contained in the bonds by the Secretary of the Treasury or by anyone else.

If bonds of the Postal Service can be offered to the public without approval of the Secretary of the Treasury, it would enable the Postal Service to make bond offerings in such a way as to impair the saleability of Treasury bonds. It also gives the Postal Service a right that *no other wholly owned government corporation would have*—the right to sell bonds to the public *without any control by the Secertary of the Treasury.* Consequently, on the absis of a careful analysis of the finance provisions of H.R. 11750, it is evident that the Postal Service could issue large amounts of bonds without effective or adequate controls.

The finance provisions of H.R. 11750 do not explain what would happen to the Postal Service in the event of default on the bonds of breach of the covenants contained in the bonds

Section 1005 (b) of H.R. 11750 provides that the Postal Service may "pledge its assets and pledge and use its revenues and receipts" for the payment of the principal or interest on Postal Service bonds. The Postal Service is authorized to enter into "binding covenants with the holders of said obligations . . . as the Postal Service may deem necessary or desirable to enhance the marketability of said obligations." Section 1005(c)(7) states that the obligations "may be entitled to such relative priorities of claim on the assets of the Postal Service without respect to principal and interest payments . . . as the Postal Service determines."

H.R. 11750 and the Kappel Commission Report (Vol. I, Part 3, p. 37) both contemplate that obligations *secured by assets of the Postal Service* may be issued and that "binding covenants" imposing various conditions on the oPstal Service could be used to enhance the marketability of the securities. Postmaster General Blount, in his testimony before the House Committee (p. 335), stated that "the Act gives the Board of Directors broad authority in his area. They could encumber specific properties . . . or they might furnish more general security." However, the mere existence of such security provisions and covenants in the Postal Service obligations is meaningless unless there is some mechanism to enforce the covenants if they are not kept. Investors are not likely to buy these ungauaranteed bonds if they do not have complete assurance that the "binding covenants" would be enforced.

Nevertheless, the Bill does not specify what would happen if the postal corporation were unable to meet the interest on the debt. Would major postal buildings actually be foreclosed and turned over to the creditors? The Post Office Department has now conceded that a debtor could foreclose on a postal facility. (See House Hearings, p. 1271.) Could the Postal Service Fund be attached? If it were attached, would the secured creditors have priority over salary payments to postal employees? It can be noted that Section 1005(b) of H.R. 11750 states that the issuance of obligations by the Postal Service shall be "subject to the requirements of Sections 847–849 of title 31 and *of no other law.*"

Thus, there is no legal provision which would prevent the attachment of the Postal Service Fund, and if the Postal Service Fund were depleted as a result of the attachment, the oPstal Service might be unable to pay its employees and meet its current bills. Under what law would there be a bankruptcy proceeding or a reorganization plan? Could the postal corpoartion, and the government, lose control of Post Office finances and facilities? What wuld be the remedies available to bondholders in case of default? What would be the remedies of the bondholders if one of the "binding covenants" were breached? These and other questions are not answered by the finance provisions of H.R. 11750.

Since H.R. 11750 does contain provisions providing for liens on Postal Service assets and for covenants with the bondholders, these are logical and reasonable questions to ask. When you have a Post Office with a long history of losses amounting to billions of dollars, the possibility of action by the bondholders is not remote. In these circumstances, if the bondholders are to rely on covenants

and representations that they have a prior claim to the assets, there must be a means for assuring that the Postal Service would keep its commitments. If there were no means for enforcing the covenants and the obligation to repay the bonds, there is no reason why anyone would want to take the risk of purchasing these unguaranteed bonds.

Acceptable interest rates could not be obtained unless the bonds were guaranteed by the United States Government

In discussing the potential marketability of the Postal Service bonds, it is revealing to examine the actual facts as to the experience of TVA. The Tennessee Valley Authority was established in 1933. Much of the initial financing consisted of substantial appropriations from Congress. The original Act authorized the sale of up to $50 million in bonds and in 1935 and in 1939 the statute was amended to authorize additional borrowing. All of these bond issues were *fully and unconditionally guaranteed* both as to interest and principal by the United States. See 16 U.S.C. § 831n–1 and § 831n–3. Moreover, *all* of these bond issues were sold either to the Reconstruction Finance Corporation or the U.S. Treasury. It was not until November, 1960—twenty-seven years after TVA was first established—that TVA first obtained financing from private investors. At this point, the bonds were no longer guaranteed by the U.S. Government. TVA still issues short-term notes to the U.S. Treasury and currently there are about $100 million of such notes outstanding.

It was only when TVA had been operating for many years on a successful basis that its bonds were issued to private investors for the first time. TVA bonds have the highest rating by the investment services, and the principal purchasers of TVA bonds are pension and retirement funds of state and local governments. Not long ago, $100 million of TVA bonds, noncallable and due in 1994, were sold at an interest rate of 8.25 percent. A rate covenant in the TVA bond resolution provides in part that TVA shall charge rates sufficient to cover all operating costs (excluding depreciation), debt service on the bonds, payments to the Treasury for repayment of the appropriation investment and such additional margin for other purposes as the Board may determine. The resolution further provides that rates shall be sufficient to cover such requirements if there were substituted for "debt service" for any fiscal year an amount which, if applied annually for 35 years, would retire, with interest, originally issued amounts of all bonds outstanding on July 1 of that year. TVA has escalator provisions in its rate schedules which provide for rate increases in proportion to the interest that TVA has to pay. It was recently announced that TVA was utilizing these escalator provisions for the third time in two years. Thus, TVA has used the automatic escalator provisions in its rate schedules to increase rates 27% in two years.

If TVA bonds are currently offered at an interest rate of 8.5%, one can well speculate as to what rate of interest the Postal Service would have to pay. The Post Office has a long history of large gaps between postal income and outgo. Its rate schedules could not contain any automatic escalator provisions such as TVA has. In additon, it is highly doubtful that the Postal Service could properly make any covenant in its bonds covering postal rates, because its rates are subject to approval by the Rate Commissioners and the Board of Directors as well as the theoretical possibility of a veto by Congress. There is also the strong possibility that the postal rates would be subject to judicial review. In contrast, TVA rates are not subject to review by any other government agency and rate increases can be promptly implemented by the use of an automatic escalator provision in the rate schedules. In light of all the difficulties which confront the Post Office, it undoubtedly would take a number of years to determine if the Postal Corporation experiment were going to succeed. Prudent investors would probably select bonds of proven soundness unless the interest paid by the Postal Service bonds were sky high.

It is significant that Paul A. Volcker, Under Secretary of the Treasury for Monetary Affairs, conceded in his testimony before the House Committee that unguaranteed Postal Service bonds would not sell as readily in the open market and at the same interest rate as guaranteed bonds. See House Hearings, p. 1168. I have a letter from a top partner in one of the largest and most prestigious investment banking firms in New York and here is what he says:

"I have talked over the Post Office bond situation with several of my Partners and we are rather amazed that anyone contemplated selling such bonds to the public unless they were guaranteed as to principal and interest by the government. As we understood the situation, the government itself was going to buy the entire issue and then possibly at some later date have a public issue. We see no good reason for an institution or an individual buying the bonds without, as mentioned, some form of guarantee."

While the Postmaster General did submit to the House Post Office and Civil Service Committee a number of letters from investment firms, it is clear that these letters discussed primarily the relative merits of H.R. 4 (the Dulski Bill) and H.R. 11750 and concluded that H.R. 11750 provides a more acceptable basis for financing than H.R. 4. See House Hearings, pp. 1204–1206. These letters do not contain any comments on the desirability of a government guarantee of the bonds or a requirement that the Treasury Department purchase all of the bonds, as the General Accounting Office recommended in its testimony before the House Committee. See House Hearings, pp. 1115–1116. Moreover, these investment firms indicate that the Postal Service would be subject to the same disciplines and credit restraints as other securities and would have to demonstrate during a suitable seasoning period that it could operate on a basis that at least covers its cost.

There is another factor that would make it difficult for the Postal Service to obtain reasonable interest rates: overloading of the market. H.R. 11750 contemplates that the Postal Service would borrow $10 billion. In comparison, TVA is authorized to borrow up to $1.750 billion and only about $845 million of this authorization is outstanding at the present time.

TVA has never issued more than $100 million in bonds at any one time. There has never been an offering of bonds by any private company that exceeded $300 million at one time. Therefore, if the Postal Service tried to sell a large amount of bonds at any one time, it would undoubtedly have difficulty in unloading the bonds becaues of the size of the offering. If the Postal Service had a poor rating by the investment services—and it would seem a poor rating would be inevitable—these difficulties would be compounded.

A recent example should illustrate the problem. Wisconsin Gas Company not long ago offered $16 million of 25-year 8½% first mortgage bonds. The bonds had five years of refunding protection. However, the bonds had mediocre credit ratings, Baa-1 from Moody's and triple B from Standard & Poor's, and as a result, only 50% of the issue was sold on the first day, which is typically a sign of poor public acceptance of a bond offering.

Wisconsin Gas Company was only offering $16 million in bonds. If the Postal Service were trying to make an offering of $100 million or more, or if it repeatedly entered the bond market (as it would have to do to use a $10 billion authorization) its chances of success would be even more limited—unless the interest rate were so high that investors were willing to take the risks involved. When Mr. Kappel was asked by Congressman Corbett whether he would buy these Postal Service bonds which were not guaranteed by the government, Mr. Kappel responded (p. 261):

"Without the guarantee of the Government? I doubt if you could, until their house was in order. . . . It is a good question to ask—would you buy any of these bonds—and I would say it depended on whether it was a good buy."

It can be noted that the Commodity Credit Corporation, a government corporation which borrows money on the scale contemplated by the Postal Corporation, does have its obligations fully and unconditionally guaranteed both as to interest and principal by the United States. See 15 U.S.C. § 713a–4. The Commodity Credit Corporation presently has over $12 billion in outstanding obligations.

It may be that the advocates of H.R. 11750 feel that the inclusion of sinking fund provisions in the public bond offering would eliminate the necessity for a U.S. Government guarantee of the bonds. However, the use of a sinking fund, as contemplated by Section 1005(b), would require regular deposits for paying off the principal. Section 1201(b), which sets forth the basic policy for rate-making, states that costs shall include "provision for sinking funds or other retirements of obligations to the extent that such provision exceeds applicable depreciation charges." Thus, it would be necessary to have the rates high enough to cover any sinking fund costs, which could be substantial. It is interesting to point out that TVA bonds contain no provision for sinking funds.

For all these reasons, it is clear that the marketability of the bonds would be significantly impaired and the interest rates on the bonds would have to be unreasonably high if the Postal Service bonds are not fully guaranteed by the U.S. Government.

Large amounts of postal service bonds could be sold at acceptable interest rates only if the Secretary of the Treasury purchased them

Section 1006(b) of H.R. 11750 enables the Postal Service to require the Secretary of the Treasury to purchase Postal Service obligations up to $2 billion. Section 1006(a) provides that the Secretary of the Treasury has the first opportunity to purchase any Postal Service obligations. The fact that the Secretary of the Treasury is given the first opportunity to purchase all Postal Service bonds is a recognition of the fact that such obligations may be difficult to sell to the public. It can be noted that TVA sold its bonds only to government agencies in the first 27 years of its existence. The bulk of the obligations of the Commodity Credit Corporation, which has shown consistent losses in its operations, were purchased by the United States Treasury, even though the bonds are fully guaranteed by the United States. The bonds of the Saint Lawrence Seaway Development Corporation were never offered to private investors, but were issued solely to the Secretary of the Treasury. See 33 U.S.C. § 985. The Export-Import Bank of the United States is authorized to issue up to $6 billion in obligations, and the Secretary of the Treasury is "authorized and directed" to purchase any obligations of the Bank. See 12 U.S.C. § 635d. It is interesting to note that the obligations of the Bank must be purchased by the Secretary of the Treasury even though it has been in successful operation for over 34 years, its earnings have been running in excess of $100 million annually, and it pays

yearly dividends of $50 million to the U.S. Treasury.

The testimony of the Acting Comptroller General of the United States, Robert F. Keller, before the House Committee fully confirms the conclusion that large amounts of Postal Service bonds could be sold at acceptable interest rates only if the Secretary of the Treasury purchased them. Mr. Keller stated as follows:

"We are concerned that the sale of bonds to the public by the corporation would result in higher financing costs than would be incurred if the corporation used the financing facilities of the Treasury Department. Studies made by our office have disclosed that interest costs are generally higher when agencies obtain financing directly from the public rather than through the facilities of the Treasury Department."

"If borrowing authority is to be granted, we recommend that the corporation borrow all of its funds from the Treasury rather than borrow directly from the public." (House Hearings, pp. 1115–1116)

In addition to the more acceptable interest rates which could be obtained by selling the obligations to the Secretary of the Treasury, there are other advantages to borrowing from the Treasury. In order to keep interest costs reduced to a minimum, the Commodity Credit Corporation borrows each day the amount required to finance the net of the prior day's activity. Based upon daily wires from all Federal Reserve banks and branches, plus Washington activity, the Commodity Credit Corporation computes the net amount required to cover the excess of disbursements over deposits for the prior day. This amount is borrowed from the Treasury. When deposits exceed disbursements, CCC makes a payment to the Treasury against its notes. This method not only reduces interest costs, but keeps cash on hand at a minimum level. Also, when bonds are purchased by the Treasury, there is no conflict with the marketing of other government securities. On the other hand, if Postal Service bonds were offered directly to the public in large amounts, the regular offerings of Treasury securities for other purposes could be adversely affected.

Thus, it should be evident that large amounts of Postal Service bonds could be purchased at acceptable interest rates only if the Secretary of the Treasury purchased them.

If the Treasury purchases them, what is the point of having the elaborate bond issuing authority. All this complicated machinery would merely be an indirect way of getting money needed for postal purposes out of the Treasury. It is far more realistic and sensible to get it out direct—by appropriations.

I mentioned in my list of premises behind the Kappel Report the great emphasis in that report on the problems in the Chicago Post Office in October 1966, which have been picked up and magnified by many of the columnists and editorial writers as though that one situation showed that the entire Post Office was on the verge of collapse. The fact is that there was just one big problem there which resulted from a well-meaning but disastrous error in management decision making. A new postmaster had taken over at a time when an unusually heavy volume of mail hit the office. He needed overtime to cope with the work load. It was denied him. That was the whole trouble.

It is a really remarkable fact to me, and an indication of a pre-judgment of the Post Office problem by the Kappel Commission staff, that even though this 1966 Chicago problem was used as the lead off horror story in the Kappel Report, no one on the Kappel Commission or staff ever sat down with that new Postmaster of Chicago and got his explanation of what the problem really was. To me, that is just as unfair as it would be to take the isolated case of the Consolidated Edison power blackout in New York a few years ago and to conclude from that that the entire privately operated electric utility system in the country was poorly managed and on the verge of catastrophe.

During the hearing on June 5, 1969, before the House Committee on the postal corporation plan recommended by the Kappel Commission, Mr. Kappel insisted that because the Post Office Department does not operate in the black, business is being "subsidized."

But would he feel that the businessman who goes to the Department of Commerce for advice or information is being subsidized because the Department does not make him pay a fee? Of course not. Mr. Kappel would readily recognize that service from the Department of Commerce is something he pays for with his tax money and is entitled to get as a taxpayer.

A man who takes his family to Yellowstone National Park is certainly not being "subsidized" merely because the entrance fee he pays is small in relation to what it costs the government to make the facilities available.

The simplistic talk about subsidies to users of the mail is based entirely upon the unproven and unprovable assumption that the taxpayer is entitled to nothing whatever for his tax money where the Post Office is concerned, but is entitled to all kinds of free services—very often much less essential—from other federal agencies.

The Post Office furnishes a service which practically everyone wants and uses and is glad to have. Because of this, taxpayers today should, more clearly than ever before, be entitled to have their taxes pay for some of the service they get from the Post Office. With taxes at sky high levels many taxpayers are getting less and less that they really want for their tax dollars. They are getting Viet Nam. They may, according to a high administration source, be paying for a trip to Mars. Many of the things the rank and file taxpayers pay for never come to them at all: farm price support payments, foreign aid grants, rent supplements, and much, much more.

Let us first ask ourselves what per cent of the total federal spending is for things the average taxpayer really wants and would ask for if the government weren't already providing them. It could be a rather modest per cent. The service provided by the Post Office would, however, certainly be included in this per cent, even if it were small. And yet there are those who say this average taxpayer is not entitled to have his tax dollars pay for *any* part of his postal service.

It is a strange thing how, in the eyes of many, delivery of a letter is a "business" type activity for which a taxpayer should pay in full through user charges, while other types of government activity, even when performed by the Post Office, is a service which a taxpayer is entitled to get for this tax dollar. For example, if a householder complains to the Post Office about receiving an advertisement for obscene material he is not expected to pay the Post Office for its efforts—often extensive—in investigating the case.

If a businessman asks the Post Office to check into and prosecute a scheme to use the mails to defraud, no one thinks he is being subsidized because he does not reimburse the Post Office for the expense it incurs.

So what is it about the government delivering a piece of mail which is so different? Nothing but custom. It has been traditional to make a charge. But there is nothing in logic that decrees that that charge must pay the full cost. There is certainly nothing in common sense or orderly thinking that compels the conclusion that, if that charge does not pay the full cost, the agency handling the transaction is archaic, inept, inefficient, unmanaged, or unmanageable.

There are other things done by government for which it is easy to make a charge, but which by equally accidental custom, no charge is made. Public libraries could easily charge everyone a rental fee. But they don't. They operate as a service to taxpayers. True, they may charge a daily fee for certain much-in-demand recent books. But the fact they obtain some of their revenue from user charges certainly isn't used by the editorial writers to "prove" that public libraries are unbusinesslike and poorly managed because they do not set their charges so they will operate in the black.

It is easy to assign a user charge for sewer service or trash collection service. But most cities don't.

It is easy to charge for use of highways. We have some roads for which a toll is charged, even though the motorists using them have already paid gasoline taxes for road building. But toll roads are the exception.

There is a simple explanation for all these examples. All levels of government are hard up for money. They have tapped nearly every source of tax revenue. They like to call taxes by euphemistic labels. But nonetheless user charges, such as tolls for using highways, or monthly fees for sewer service or trash collection service, or tuition for attending state colleges, are merely different forms of taxes. It is really immaterial—from the standpoint of showing whether or not the activity is "efficient"—that a user charge pays all, or only a part, or none at all of the cost to provide the service to taxpayers.

Some of the statements which are made about how much prouder the postal employees will feel, and how much higher their morale will be, if user charges pay the full costs of the Post Office, are of doubtful validity. Does anyone really think crews who work on repairing toll roads are happier and prouder than crews that work on roads that have no user charges?

A positive thing that could be done for the morale of postal employees is to stop the endless sloganeering about how the Department is supposedly a mess because it doesn't operate in the black. Once it is frankly and clearly recognized that the Post Office provides a service to taxpayers the cost of which should be paid in part by tax dollars, the so-called "deficit" of the Post Office will be as irrelevant as the deficit of the Department of Interior or of the Veterans Administration.

There are many things which should be and are being done to improve the Post Office. But "total" reform—if it means embracing the break-even obsession—will mean regression rather than improvement. "Piecemeal" is not a popular word. People want instant solutions to every problem. But piecemeal progress is what reasonable men learn to hope for. This Committee has certainly shown a willingness over the years to try to help the Post Office do its job better.

I favor many parts of the postal reform proposals. I favor greater continuity in the top positions at the Department—I was myself part of the problem on that score. But continuity like everything else can be overdone. I don't favor having a General Hershey at the head of the Post Office. I favor taking postmaster appointments out of politics. I favor generally the provisions on postal transportation in both the Administration Bill and H.R. 4.

I personally favor most of the employee relations provisions of H.R. 4. I favor strong provisions for control of pornography. I favor more opportunities for advancement of postal personnel—such as having most of the regional directors and the chief postal inspector come from the career postal service. I favor sensible, proven mechanization. I favor better, larger, cleaner, more modern postal facilities.

But I don't think any of this should come through the stranglehold of a rigid break-

even policy. I don't think it should come about with post office assets turned over at an artificially low original cost figure to a new corporation while onerous postal liabilities would be left behind for the general government to bear. I feel the Post Office needs a 15% annual increase in its budget to be earmarked for acquiring modern buildings and mechanization. The money should best come from a reassessment of our national priorities. But until that happens, any indebtedness resulting should be part of the overall federal debt.

In an effort to be helpful to this Committee I want to make a suggestion as to a major step you should consider taking before making a decision on any of the variations of the major postal reform bills. This suggestion applies not only to the bills, such as the Administration Bill, which would turn the Post Office over to a corporation, but it also applies to any of the bills which provide for the setting of rates by an agency other than the Congress or which provide for the issuance of a large amount of bonds, the interest and principal of which would be payable out of postal revenues.

It is impossible for me to convey to you adequately what complex problems are involved in consideration of these rate-making and bond issue provisions. You have an unusually capable staff working for this Committee. However, even in a large law firm such as ours where we have specialized familiarity with problems of public utility rate-making and corporate bond financing, we have found the attempt to adequately analyze these provisions of the pending bills so overwhelming that we feel we have only been able to scratch the surface. I feel that you need the services of both a qualified and well staffed law firm and a qualified and well staffed investment banking firm to assist in analyzing these provisions. I hasten to take our law firm out of the running so that no one might think I am trying to propose that we get in on something. We already have enough to do and because of our representation of a major segment of business mailers and our work on parcel post rates and various postal problems for some of our other clients, someone might claim we could not be completely objective—although in this statement I certainly have tried to be.

This isn't a proposal for a two or three weeks job from each of these specialized firms resulting in a brief opinion of law or financial analysis. This will require the same type of extensive and in-depth study by specialists which the Kappel Commission obtained on a great variety of points from other types of specialists: principally accountants and management consultants. The Congress of the United States not long ago undertook to pay to a large New York City law firm hundreds of thousands of dollars as a fee for representing Congress in connection with an unusual and complex case. Similar use of outside firms—legal and financial—is needed here in order to see where these unprecedented proposals for non-Congressional postal rate setting and for issuance of huge amounts of non-guaranteed postal bonds would lead us.

No one can now do any more than speculate as to what would happen if the postal corporation or the postal authority were unable to meet the interest on the bonds. Would major postal buildings actually be foreclosed and taken over by the creditors to be used as bowling alleys and warehouses? If that happened, where would the mail be handled? If there would not be actual foreclosures, under what law would there be a bankruptcy proceeding or a reorganization plan? Could the postal corporation, and the government, lose control of Post Office finances and facilities?

To make the bond saleable, what would the provisions of the proposed bonds have to be as to interest rate, redemption penalties, sinking fund, liens on specific properties and other features? What would be the remedies available to bondholders in case of default?

In my opinion, government guarantee of the bonds would not help because that would mean, under other laws, the Secretary of the Treasury would have control over whether the bonds could be issued and I am convinced he would conclude he could not give his consent. However, in the meantime, in the hope of making the bonds acceptable, postal rates would have been raised to sky high levels.

It simply isn't sound business judgment to move ahead with something this monumental on the basis of statements that if it doesn't work, we won't be any worse off than we are now. My conviction is we would be many, many times worse off and that no one would know how to untangle the mess.

The expense to the government of hiring experts at such a time of possible financial disaster would, in my opinion, be many, many times what the expense would be now to get an objective, deliberate, expert look at the legal and financial aspects of just these two particular aspects of the proposal: rate-making and bond financing.

Various ones of you gentlemen may or may not be enthusiastic about the efforts and methods of large law firms and investment banking firms. However, the fact is that there are certain types of situations, much less complex than proposed here, where it takes literally years to work out all of the legal and financial ramifications. A merger of two major railroads takes six or eight years of legal proceedings before it can be consummated. A bankruptcy reorganization of a major corporation often takes years of the work of lawyers and experts.

Government agencies and departments cannot be expected to do the technical analysis job required here. The President has endorsed this proposal. How could his subordinates presume to pick it apart?

The mammoth size and variety of the legal and financial problems involved in these proposals cannot be exaggerated. I have tried to make a start on at least sorting out the questions, but it has not been possible to get to the bottom of these thorny issues.

There have been dozens of references in testimony on the corporation proposal to the TVA, for example. Yet as I have pointed out, the differences are far greater than the similarities. Neither the TVA nor any of the other government type corporations were set up to take over an existing government agency. They have all been set up from scratch to start something new. TVA is basically just another electric utility and electric utilities have been operated both by private corporations and by government agencies—such as the consumer power districts in Nebraska—for decades. There is no great problem in an electric utility producing revenue to fully cover cost. Electric utilities are not labor intensive and cost of electricity is one of the few items in our list of goods and services that have actually been holding still or going down during these years of inflation. TVA has rate escalation covenants in its bonds and automatic rate increase provisions in its contracts with its power customers.

CONCLUSION

In summary, it is clear that the finance provisons of H.R. 11750 do not contain adequate controls over the borrowing power of the Postal Service. The bonds could be used to pay operating expenses without any limitation as to the amount that could be issued in one year. The Secretary of the Treasury would not be required to approve any of the terms relating to the sale of bonds to the public. Moreover, the lack of a guarantee by the U.S. Government and the limited authority of the Postal Service to require the Secretary of the Treasury to buy the bonds would make it very difficult to sell the bonds at favorable interest rates. The end result of these problems would be to saddle the mail users with the high costs of debt service and it would necessitate substantial rate increases to achieve the breakeven requirements of H.R. 11750.

I hope the material in this statement on the bond issuing authority provisions will be of assistance to the Committee. But I think my comments only make a start on analyzing the innumerable tricky problems involved. Therefore I urge the Committee to retain the two types of top experts I have referred to and to have them make full-scale, in-depth studies before any action is taken on these "total reform" proposals.

I am honored by the opportunity to testify today.

HOW POSTAL COSTS WOULD INCREASE UNDER H.R. 11750

Inclusion of interest as required by § 1201; assuming $10 billion outstanding debt, with average interest rate of 8½ %	$850,000,000
Inclusion of depreciation on capital facilities and equipment as required by § 1201 (b); assuming $10 billion in assets with depreciation computed in accordance with Vol. I, Sect. II, p. 30, Exhibit A of Price, Waterhouse & Co. Study for Kappel Commission	359,000,000
Inclusion of public service costs as required by section 1202, including 10% of costs of operation of third class post offices and star route system and 20% of gross cost of operation of fourth class post offices and rural routes using figures from Postmaster General Blount's Testimony, June 24, 1969	122,800,000
Inclusion of Public Service Costs as required by section 1202 for special services and non-postal services	162,000,000
Inclusion of provision for amortization of debt and provision for sinking funds or other retirements of obligations minus computed depreciation charges as required by § 1201(b); assumed retirement of $500 million in bonds per year	141,000,000
Inclusion of reasonable provision for contingencies as required by § 1201(b); contingency allowance is computed at three percent as recommended by Kappel Commission Report, p. 82, and based on adjusted costs of Post Office according to Postmaster General Blount's Testimony, June 24, 1969	221,295,000
Recovery of deficit as indicated by Postmaster General Blount, June 24, 1969	563,400,000
Grand total	2,419,495,000

PRIORITIES NEEDED TO HALT INFLATION, SAYS FRANCIS E. FERGUSON

HON. HENRY S. REUSS

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 16, 1969

Mr. REUSS. Mr. Speaker, Francis E. Ferguson, president of the Northwestern

Mutual Life Insurance Co., of Milwaukee, recently addressed Northwestern Mutual's 22d all-Western meeting at the Fairmont Hotel in San Francisco. Portions of Mr. Ferguson's timely remarks follow:

Hedging against inflation through investment in the stock market provides no basic, permanent answer for anybody. The only real answer to inflation is control.

We're going to have to establish national priorities, and let those objectives with low priorities wait. We know we can't have guns and butter, and we know we can't do everything we want to do at once.

Uncontrolled inflation will swamp the short-term advantages gained by hedging, if large pools of capital turned away from fixed dollar investments in favor of equities.

The first effect would be to bid up prices, as a great many more dollars began chasing a limited number of equities.

The next effect would be to push interest rates on money still available for borrowing to such heights that the orderly capital markets presently existing would be destroyed.

Once the shortage of money and prohibitive interest rates foreclosed corporations from borrowing capital, they would have to raise it through common stock issues. That would dilute the equity values and drive share prices down. Even the common stock of blue-chip corporations has significant value mainly because of the leverage provided by large proportions of borrowed money in the corporations' capital structures.

UTILITY RATE INCREASES

HON. LEE METCALF

OF MONTANA

IN THE SENATE OF THE UNITED STATES

Thursday, October 23, 1969

Mr. METCALF. Mr. President, we are all familiar with the oft-repeated slogan of the electric utility industry; while the price of everything else is going up, the price of electricity is going down.

Both parts of the slogan are untrue. The price of some other principal items is going down. For example, I know of no one whose livelihood depends on the price of wheat—as do many families in Montana and a number of other States—who has detected a rising trend in wheat prices over the past 20 years.

The other part of the slogan is equally fallacious. The price of electricity is not going down. It is going up. This is a national trend. It applies to telephone and gas utilities as well as electric utilities. The major utility corporations are enjoying substantial profits, as they always do, despite recessions which affect agriculture and other risk enterprises that do not enjoy the protection of commission regulation.

The Federal Communications Commission has been conducting closed meeting with the American Telephone and Telegraph Co. which could result in additional costs, running into hundreds of millions of dollars, for telephone subscribers. These costs would be borne principally by residential customers, who are regularly overcharged by A.T. & T. in order to permit the company to offer lower rates to industrial customers who might otherwise obtain communications service from A.T. & T. competitors.

As of June 1, approximately $1 billion in proposed rate increased by investor-owned utilities were pending before State utility commissions. A survey of the State commissions, conducted by the Senate Subcommittee on Intergovernmental Relations, presided over by the distinguished junior Senator from Maine (Mr. MUSKIE), showed that as of June 1, rate increases pending before them amounted to $961,160,505, not including a number of pending cases where a specific dollar amount was not stated. Of the $961,160,530 total, $317,411,571 was requested by electric utilities, $175,742,171 by gas utilities and $468,006,763 by telephone utilities.

Since June 1, the investor-owned utilities have asked another half a billion dollars annually of the State commissions. In settlements announced during the past 4 months the utilities have received more than 75 percent of what they asked. Sixteen requests totaling $312 million a year, were settled for $239 million. At least 182 rate increase requests are pending, and in 60 of those cases the utilities are asking from $1 million to $175 million more annually.

The rate increases, if granted will be equivalent in a number of States to substantial tax increases. For example, as of June 1, according to the State commission's report to the subcommittee, rate increases pending before the New York Public Service included $175,000,000 by a telephone utility, New York Bell, $1,300,000 by two gas companies and $21,800,000 by an electric utility, Niagara Mohawk. Subsequently, as reported by Electrical World, Consolidated Edison filed a request for a $117,500,000 rate increase. The New York Commission said it would not give Niagara Mohawk $21.8 million, but would give it $18 million more a year. Thus in New York State, pending rate increases amount to about $300,000,000 a year. The stakes are especially high in Michigan and California, as will be seen from tables I shall subsequently insert in the RECORD.

Mr. President, this huge and unprecedented wave of rate increase requests comes at a time when inflation is seriously eroding the paycheck of the ordinary residential consumers who would bear the increased cost. And they come at a time when the utilities are doing well financially.

I do not wish to minimize increased costs, for utilities, as for other businesses, in certain areas, such as interest. The utilities themselves do an excellent job of emphasizing these cost increases. What they tend to minimize is the fact that their average interest costs on long-term debt are low, averaging—in the case of electric utilities—4.3 percent in 1968. That is not much more than it was 30 years ago, when it was 4.1 percent. At that time, the electric utilities averaged 6.9 percent return on their common stock equity. By 1948 return on common stock had risen to 9.7 percent, by 1958—a wonderful year for electric utilities—it had risen to 10.7 percent. But 1968 was beautiful. They averaged 12.3 percent on their common stock last year. I find it difficult to justify the highly inflationary escalation of utility rates in the light of high profits by the IOU's.

Unfortunately, significant data on the natural gas industry is even more difficult to obtain than electric utility data. However, the return on common stock equity of gas utilities appears to be increasing at approximately the same rate as for electric utilities. The industry-wide average return on common stock equity of gas distribution systems—not including transmission companies—according to computations by the American Gas Association, has been as follows, during recent years selected by AGA:

	Percent
1955	9.63
1960	10.08
1965	12.18
1967	12.63

The trade literature of the telephone industry alternates between dark observations on the deadly menace of consumerism and reports of record gains. Allied Telephone of Little Rock, Ark., reported record operating revenues for the first half of 1969. Its operating revenue almost doubled and its net income more than doubled over the first half of 1968. During the same period Central Telephone & Utilities' revenues rose a record $20 million, with net income rising from $1.21 per share to $1.29 per share. Net income of Rochester Telephone rose from $0.99 to $1.09 per share. For Continental Telephone—which this summer picked up six more independent companies, four community antenna television systems and a cable products distributor—net income increase from $0.50 to $0.57 per share. United Utilities reported a 10-percent increase in earnings, amounting to $0.59 per share as compared with $0.53 per share during the first half of 1968.

Mr. President, it is possible that some of the requests by utilities for rate increases can be justified. However, because of the generally excellent financial condition of utilities, substantial doubt exists whether many of the proposed increases are merited. The rate increases need to be challenged, on behalf of the public. For it is the public that pays, not only the increased rates, but also the cost of the utilities' expensive presentations for rate increases and the utilities' misleading advertisements.

But nowhere, through either the rate or tax structure, does the public provide for adequate presentation of its own case in utility matters. Nor is the public provided with much of the basic information needed, on the performance of each utility, to permit reasoned judgments on the validity of rate increase requests.

The small staffs of the State utility commissions and the commissioners themselves, encumbered by the constant and tender loving care of utility officials, are in no position to be tough advocates for the consumer in the crucial issues of rates, reliable service, and environmental protection. These most serious gaps in regulatory procedure could be rectified through passage of S. 607, the Utility Consumers' Counsel Act, on which hearings have been completed by the Senate Subcommittee on Intergovernmental Relations. S. 607 would provide the public and regulators with the facts they need

to know about utility performance, and provide meaningful adversary proceedings in utility hearings.

Mr. President, I ask unanimous consent to have printed in the RECORD the tables prepared by the Subcommittee on Intergovernmental Relations from information supplied by the State utility commissions, showing rate increase requests pending as of June 1, 1969, a table showing requests filed since that date, as reported by Electrical World, Public Utilities Fortnightly, and the weekly NARUC bulletin, and a table, based on the same three sources, which shows actions taken during the past 3 months on rate increase requests pending before State utility commissions.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

TABLE 1.—UTILITY RATE INCREASES PENDING, BY STATE COMMISSION, JUNE 1, 1969, AND RELATED DATA

Commission	Increases pending	Name of company	Category	Amount	Date requested	Status of request
Alabama Public Service Commission	None					
Alaska Public Service Commission	3	Golden Valley Electric Association, Inc.	Electric	$82,000 (estimated) (2 percent of current annual revenue).	Apr. 23, 1969	On basis of staff protest, commission suspended proposed tariff for 60 days.
		Alaska Electric Light & Power Co.	do	$130,000 (estimated) (8 percent of current annual revenue).	May 8, 1969	Will become effective June 8, 1969, unless protest is filed.
		Glacier Highway Electric Association, Inc.	do	$7,000 per year (4 percent of current annual revenue).	June 2, 1969	Pending—no action on filing taken as yet.
Arizona Corporation Commission	1	Citizens Utility Rural Co	Telephone	To 8 percent rate of return on fair value.		Under advisement—hearings on the matter have been held.
Arkansas Public Service Commission	2	Western Arkansas Telephone Co.	do	$493,600, or approximately 32.35 percent increase.	Oct. 31, 1968	Formal order issued Apr. 11, 1969. Granted increases totaling $83,000 subject to filing of new tariffs by the company and acceptance of same by the commission, contingent upon the company meeting certain requirements of the commission.
		Arkansas Western Gas Co	Natural gas	$1,062,877, or approximately 13.78 percent increase.	May 29, 1969	Investigation in process as to propriety.
California Public Utilities Commission	11	Southern California Edison Co	Electric	$60,137,000	July 1, 1968	Submitted. Reply briefs due June 23, 1969.
		Pacific Gas & Electric Co	Gas	$33,050,000	Dec. 27, 1968	Hearings in progress.
		Pacific Lighting Service Co	do	$5,705,000	May 5, 1969	Hearings scheduled.
		Southern California Gas Co	do	$5,939,000	do	Do.
		Southern Counties Gas Co	do	$4,310,000	do	Do.
		Southwest Gas Corp.:				
		Placer County	do	$90,000	Oct. 2, 1967	Hearings in progress.
		San Bernardino County:				
		Phase I	do	$33,000	Feb. 6, 1969	Submitted.
		Phase II	do	$26,000		Hearings to be scheduled.
		California-Pacific Utilities Co	Telephone	$98,000	Jan. 2, 1969	Hearings scheduled.
		General Telephone Co	do	$46,300,000	Dec. 1, 1967	Submitted.
		California-Oregon Telephone Co	do	$26,000	Apr. 7, 1969	Hearings scheduled.
Colorado Public Utilities Commission	1	Mountain States Telephone & Telegraph Co.	do	Not specifically stated, but between $30,000,000 and $33,000,000 annually.	Apr. 1968	Commission order issued granting increase $5,878,000. Hearing held on spread of the rates but turned down by the commission. 2d hearing held on spread of the rates week of June 16, but to date no order issued.
Connecticut Public Utilities Commission	2	Pequot Gas Co	Gas	$50,600 per year	Mar. 28, 1969	Hearings being held.
		Greenwich Gas Co	do	$290,000 per year	Apr. 1, 1969	Do.
Delaware Public Service Commission	None					
District of Columbia Public Service Commission.	2	The Chesapeake & Potomac Telephone Co. of Washington, D.C.	Telephone	$13,282,000	Dec. 8, 1968	Hearings begin June 9, 1969.
		Potomac Electric Power Co	Electric	$24,900,000	Feb. 27, 1969	As of June 3, 1969, no date set for hearings.
Florida Public Service Commission	7	General Telephone Co. of Florida.	Telephone	$7,751,000	Mar. 4, 1968	Temporary increases in the amount of $4,269,854 were granted under bond, on Nov. 26, 1968. A further hearing has been set for July 29, 1969, for a final determination in this matter.
		Southern Bell Telephone & Telegraph Co.	do	$5,775,625	Aug. 15, 1968	Pending hearing now set for June 24, 1969 to determine final disposition. Requested increases were granted under bond on Nov. 26, 1968, subject to refund if not made permanent. The increases granted were based on the 10 percent Federal income tax surcharge imposed by Congress in 1968 and was calculated to restore the previously allowed return. During the past 10 years the commission reduced the rates of this utility approximately $20,000,000 on an annual basis. Its last increase was in 1961 and was for only $1,600,000. The bulk of its rate reductions were subsequent to 1961.
		United Telephone Co. of Florida.	do	$2,800,000	Oct. 15, 1968	Temporary increases in the amount of $1,872,359 were granted under bond on Nov. 1, 1968. The matter is now pending further hearings to determine what final disposition shall be made of the requested increases. At the time the temporary increases were granted the company's rate of return had dropped to 3.15 percent. Further hearings are awaiting completion of separation studies so that a proper apportionment can be made of investment, revenues, and expenses to interstate and intrastate operations.

Footnotes at end of table.

TABLE 1.—UTILITY RATE INCREASES PENDING, BY STATE COMMISSION, JUNE 1, 1969, AND RELATED DATA—Continued

Commission	Increases pending	Name of company	Category	Amount	Date requested	Status of request
Florida Public Service Commission—Con.						
		Florida Public Utilities Co.:				
		Deland Division	Gas	$20,692	Dec. 19,1968	Docket is presently pending further hearing for the purpose of allowing the company's attorneys to cross-examine commission staff witnesses. The further hearing has not been set as of this date.
		Sanford Division	do	$14,128	do	Same as above.
		Winter Park Telephone Co	Telephone	$600,000	Feb. 17, 1969	Hearings have been completed and the matter is now ready for decision by the commission.
		Florida State Telephone Co	do	$143,923	Mar. 4, 1969	Pending further hearing to receive further testimony from the utility.
Georgia Public Service Commission	5	General Telephone Co. of the Southeast (Georgia operations).	do	$1,548,632 (7.18 percent—resulting rate of return on net investment.)	Mar. 26, 1969	In process of being heard.
		General Telephone Co. of Georgia.	do	$1,326,491 (8.12 percent—resulting rate of return on net investment.)	do	Do.
		Mutual Telephone Co	do	$65,675 (6.77 percent—resulting rate of return on net investment.)	do	Do.
		General Telephone Co. of Georgia (for EAS).	do	$42,291 (Resulting rate of return on net investment—not available.)	Apr. 16, 1969	Assigned to be heard June 25, 1969.
		Pembroke Telephone Co., Inc	do	Not available at this time	May 19, 1969	Do.
Hawaii Public Utilities Commission	3	Kauai Electric Co., Ltd	Electric	$691,000	Sept. 19, 1968, amended Nov. 1, 1968.	Application pending before commission. Hearings have not been held on said application because of other legal problems, involving this company. As soon as these problems, which are now in process of being disposed of, are acted upon the rate application will then be heard.
		Maui Electric Co., Ltd. (Lanai division).	do	$60,400	Apr. 8, 1965, amended Apr. 16, 1969.	Application was not acted upon because information regarding the cost of power was not submitted to the commission. The Lanai Division of Maui Electric Co. is a distributing company and has no generating capability of its own. The Lanai Division purchases all its power from Dole Corp. and pays said corporation for the power.
		Hilo Electric Light Co., Ltd	do	$870,000	Nov. 21, 1968	This application is now in the process of being disposed of. Public hearings on this application have already been held.
Idaho Public Utilities Commission	3	Albion Telephone Co	Telephone	$7,864	Mar. 17, 1969	Order pending.
		Cambridge Telephone Co	do	$6,576	Oct. 2, 1968	Pending hearing.
		General Telephone Co. of the Northwest, Inc.	do	Filed complaint requesting commission find reasonable rate of return, and therefore no set amount was requested.	Jan. 7, 1969	Hearings scheduled June 25–30, 1969.
Illinois Commerce Commission	5	Union Electric Co. (St. Louis, Mo.).	Electric	$2,150,000 (6.55 percent per year).	Nov. 6, 1968	Currently under hearing.
		Central Illinois Light Co. (Peoria, Ill.).	Gas	$1,472,000 (5 percent per year).	Apr. 1, 1969	Do.
		Lakeside Telephone Co. (Champaign, Ill.).	Telephone	$12,000 (17 percent per year)	May 8, 1969	Currently waiting for hearing.
		Prairie Telephone Co	do	$18,000 (21.3 percent per year)	do	Do.
		Rossville Telephone Co	do	$20,000	Aug. 1, 1968	Currently pending decision by Commission.
Indiana Public Service Commission	12	Boonville Natural Gas Co	Gas	$64,000	Feb. 3, 1969	Awaiting order.
		Clay County Rural Telephone Co.	Telephone	$90,000	Feb. 21, 1969	Do.
		Hendricks Telephone Co	do	$161,000	Mar. 7, 1969	Do.
		Uniondale Telephone Co., Inc	do	$55,000	Mar. 11, 1969	Do.
		Hoosier Telephone Co	do	$60,000	Mar. 27, 1969	Hearing Sept. 3, 1969.
		Thontown Telephone Co	do	Undetermined	Apr. 1, 1969	Hearing July 30, 1969.
		Ohio Valley Gas Corp	Gas	do	Apr. 10, 1969	Hearing Sept. 15, 1969.
		Ohio Valley Gas, Inc	do	do	do	Hearing Sept. 16, 1969.
		Dome Gas, Inc	do	do	do	Hearing Sept. 17, 1969.
		Richmond Gas Corp	do	$644,000	Apr. 24, 1969	Hearing Aug. 4, 1969.
		Northern Public Service Co	do	Undetermined	Apr. 30, 1969	Hearing Oct. 20, 1969.
		Indiana Telephone Co	Telephone	do	do	Hearing not set.
Iowa State Commerce Commission	3	Iowa Telephone Co	Telephone	$135, 346	Apr. 20, 1967	Audit staff examining books and records of company and conferences between staff and company representatives have been held in an attempt to limit areas covered at hearing.
		Hawkeye State Telephone Co	do	$210,004	Dec. 16, 1968	Audit staff examining books and records of company prior to setting hearing date.
		Union Electric Co	Electric	$450,000	Feb. 21, 1969	Application was rejected by order of the commission dated Mar. 17, 1969, for noncompliance with rules of the commission.
Kansas State Corporation Commission	2	Cuba Telephone Co	Telephone	$4,053	Nov. 8, 1968	Matter was partially heard on Feb. 25, 1969, and at said hearing applicant requested a continuance to a date to be determined. The status as of June 1, 1969, is that said matter was scheduled for further hearing for June 4, 1969.
		Salemsborg Farmers Telephone Co.	do	$2,061	May 12, 1969	This matter is scheduled for formal hearing on July 1, 1969.

Footnotes at end of table.

TABLE 1.—UTILITY RATE INCREASES PENDING, BY STATE COMMISSION, JUNE 1, 1969, AND RELATED DATA—Continued

Commission	Increases pending	Name of company	Category	Amount	Date requested	Status of request
Kentucky Public Service Commission	1	South Central Bell Telephone Co.	Telephone	$920,052	Feb. 11, 1969	Commission granted increase totaling $839,662.
Louisiana Public Service Commission	1	do	do	$17,000,000		Scheduled for hearing.
Maine Public Utilities Commission	None					
Maryland Public Service Commission	3	The Chesapeake & Potomac Telephone Co. of Maryland.	do	$34,000,000 (involves 3 jurisdictions).	Oct. 18, 1968	Company completed its direct case, reserving the right to introduce new separations testimony. All company witnesses were cross examined. People's counsel will present its direct case beginning June 12, 1969.
		Potomac Electric Power Co	Electric	$24,900,000 (involves 3 jurisdictions).	Feb. 27, 1969, amended May 15, 1969.	Not assigned for hearing as of this date.
		Columbia Gas of Maryland	Gas	Undeterminable at this time	Apr. 1, 1969	Company will present its direct case on June 11, 1969.
Massachusetts Department of Public Utilities	9	Boston Gas Co	do	$3,500,000 (estimated)	Feb. 12, 1969	Suspended.
		Lawrence Gas Co	do	$184,500 (estimated)	Dec. 26, 1968	Do.
		North Shore Gas Co	do	$322,400 (estimated)	do	Do.
		Northampton Gas Light Co	do	$98,700 (estimated)	do	Do.
		Wachusetts Gas Co	do	$53,100 (estimated)	do	Do.
		Central Massachusetts Gas Co	do	$115,500 (estimated)	do	Do.
		Mystic Valley Gas Co	do	$994,900 (estimated)	Dec. 19, 1968	Do.
		Lynn Gas Co	do	$252,800 (estimated)	Dec. 26, 1968	Do.
		New England Telephone & Telegraph Co.	Telephone	$3,120,000 (estimated) increase in message toll.	Dec. 17, 1968	Do.
				$2,000,000 (estimated) increase in service toll.	Dec. 23, 1968	Do.
Michigan Public Service Commission	12	Climax Telephone Co	Telephone	$16,520 (approximate)	May 15, 1969	Hearing scheduled June 10, 1969.
		Consumers Power Co	Gas	$37,972,900	Apr. 19, 1968	Hearing combined. Some hearings completed and further hearings scheduled for late June 1969.
			Electric	$70,934,000	July 15, 1968	
		Detroit Edison Co	do	$48,000,000	July 22, 1968	Some hearings completed and further hearings scheduled.
		Michigan Bell Telephone Co	Telephone	Not specified	Aug. 1, 1968	Hearings scheduled for mid-June 1969.
		Michigan Consolidated Gas Co	Gas	$26,986,000	Apr. 11, 1968	Hearings completed and decision pending.
		Michigan Gas Utilities Co	do	$2,150,000	Sept. 18, 1968	Some hearings completed with further hearings scheduled. Interim relief of $642,547 granted Apr. 16, 1969.
		Tri-County Electric Co-op	Electric	$100,725 (approximate)	Apr. 30, 1969	Hearings to be scheduled.
		Upper Peninsula Power Co	do	Not specified	Nov. 15, 1968	Do.
		Whiteford Telephone Co	Telephone	$122,935 (approximate)	Dec. 14, 1967	Hearing held, but case rescheduled nearer June 1969.
		Wisconsin Public Service Corp	Gas and electric.	Not specified	Aug. 7, 1968	Hearing to be scheduled.
		Wisconsin Michigan Power Co	Electric	Full amount not specified, but requests emergency rate relief of $1,600,000 immediately.	Sept. 5, 1968	Do.
Minnesota Public Service Commission (does not regulate electric or gas utilities).	2	Gopher State Telephone Co	Telephone	Not available	Mar. 21, 1969	Hearings completed—order not yet issued.
		Pioneer-United Telephone Co	do	do	June 4, 1969	Hearing scheduled July 1, 1969.
Mississippi Public Service Commission	None					
Missouri Public Service Commission	7	Missouri Public Service Co	Electric	$5,300,000	Apr. 3, 1969	Submitted on record for final determination.
		The Gas Service Co	Gas	$4,020,000	Oct. 30, 1968	Case to be heard.
		Union Electric Co	Electric	$12,200,000	Nov. 6, 1968	Do.
		Missouri Telephone Co	Telephone	$521,500	Nov. 12, 1968	Submitted on record for final determination.
		Southwestern Bell Telephone Co	do	$44,500,000	Nov. 15, 1968	Case to be heard.
		Laclede Gas Co	Gas	$6,870,000	Jan. 10, 1969	Do.
		Missouri Utilities Co	do	$135,000	Jan. 15, 1969	Do.
Montana Public Service Commission	None					
Nebraska State Railway Commission (does not regulate electric and gas utilities).	None					
Nevada Public Service Commission	None					
New Hampshire Public Utilities Commission	None					
New Jersey Board of Public Utility Commissioners.	None					
New Mexico Public Service Commission	4	Southwestern Public Service Co	Electric	$711,662	Oct. 10, 1968	Granted.
		Public Service Co. of New Mexico	do	$2,700,000	Oct. 24, 1968	Denied.[1]
		Southern Union Gas Co	Gas	$4,309,772	Jan. 28, 1969	Hearing held.
		Rio Grande Gas Co	do	$67,929	Apr. 1, 1969	Granted.
New York State Public Service Commission	5	Niagara Mohawk Power Corp	Electric	$22,000,000 (approximately)	Oct. 7, 1968	Suspended to and including Oct. 2, 1969, unless otherwise ordered by the commission. Hearings are closed.
		Corning Natural Gas Corp	Gas	$100,000 (approximately)	May 12, 1969	Proposed effective date July 1, 1969. Under investigation.
		Columbia Gas of New York, Inc	do	$1,200,000 (approximately)	May 1, 1969	Suspended to and including Oct. 1, 1969, unless otherwise ordered by the commission. First hearing scheduled for June 19, 1969.
		General Telephone Co. of Upstate New York, Inc.	Telephone	$81,000	May 29, 1969	The proposed effective date is July 1, 1969. The matter is under investigation.
		New York Telephone Co	do	$175,000,000	Mar. 20, 1969	Schedules suspended and hearings are in progress.
North Carolina Utilities Commission	4	Lee Telephone Co	do	$239,013	Oct. 2, 1968	Hearings completed. Briefs filed. Ready for decision and order.
		Southern Bell Telephone & Telegraph Co.	do	$3,135,100	Nov. 29, 1968	Hearing completed. Order being filed.
		Denton Telephone Co	do	$29,571	Jan. 6, 1969	Hearing completed. Order being written.
		Eastern Rowan Telephone Co	do	$45,986	do	Hearing completed. Order being filed.
North Dakota Public Service Commission	2	Northwestern Bell Telephone Co.	do	$3,000,000 (approximately)	Mar. 27, 1969	Application was filed and hearings were completed on May 13, 1969. No order as yet issued.
		Montana-Dakota Utilities Co	Gas	$1,208,783	May 19, 1969	Application is filed and hearing has been scheduled.

Footnotes at end of table.

TABLE 1.—UTILITY RATE INCREASES PENDING, BY STATE COMMISSION, JUNE 1, 1969, AND RELATED DATA—Continued

Commission	Increases pending	Name of company	Category	Amount	Date requested	Status of request
Ohio Public Utilities Commission	5	Farmers Mutual Telephone Co.	Telephone	$3,168	Dec. 17, 1968	Staff report issued May 15, 1969.
		North Creek Mutual Telephone Co.	do	$1,278	Jan. 27, 1969	Staff report issued May 1, 1969. (The above companies are small and were in violation of the commission's rules and regulations which had to be corrected before a staff report could be issued.)
		The Champaign Telephone Co.	do	$123,293	Mar. 13, 1969	Staff report issued May 22, 1969.
		The Ohio Valley Gas Co	Gas	(Cannot be determined until staff report is completed.)	Mar. 17, 1969	Staff report in process.
		The Ohio Valley Gas Co., East Liverpool, Ohio.	do	$238,088	Dec. 13, 1968	Staff report issued.
Oklahoma Corporation Commission	1	Southwestern Public Service Co., Amarillo, Tex.	Electric	$360,000	1969	Pending audit examination.
Oregon Public Utility Commission	1	Pacific Northwest Bell Telephone Co.	Telephone	$11,804,400	Feb. 21, 1969	Continued hearings to be held August 1969.
Pennsylvania Public Service Commission	3	Philadelphia Electric Co	Electric	$29,707,184	Dec. 5, 1968	Suspended Feb. 3, 1969, for 6 months to Aug. 3, 1969. Prehearing conference Mar. 14, 1969, in Philadelphia. Hearings in progress.
		Equitable Gas Co	Gas	$762,500	May 16, 1969	Permitted to become effective July 15, 1969. This increase only offsets the increase in rates that Equitable must pay one of its wholesale suppliers. The latter's rates were increased by FPC.
		Mercer Gas Co., The	do	$17,261	Dec. 3 , 1968	Permitted to become effective Mar. 1, 1969. Noncommission case pending before commission.
Puerto Rico Public Service Commission	None					Prehearing conference continued.
Rhode Island Department of Business Regulation.	3	New England Telephone Co	Telephone	$9,200,000	Apr. 1, 1969	Suspended pending investigation.
		Newport Gas Light Co	Gas	$239,000	July 15, 1969	Suspended.
		Bristol & Warren Gas Co	do	$140,000	Apr. 28, 1969	Do.
South Carolina Public Service Commission	3	Greenwood United Telephone Co.	Telephone	$803,998	Dec. 9, 1968	Hearings completed. Matter will be taken under consideration as soon as briefs are filed in July by the parties involved.
		The Bowman Telephone Co	do	$31,008	May 14, 1969	In process of audit.
		The Elloree Telephone Co	do	$59,485	do	Do.
South Dakota Public Utilities Commission (does not regulate electric and gas utilities).	2	Sioux Valley Telephone Co	Telephone	$21,269 (13.9 percent) increase in local service revenue).	May 21, 1969	Request filed. Conference held. Public notice being given.
		Armour Independent Telephone Co., Inc.	do	$8,148 (26.8 percent) increase in local service revenue—includes conversion to dial operation).	do	Do.
Tennessee Public Service Commission	1	United Inter-Mountain Telephone Co.	do	$2,052,212	Dec. 31, 1968	Heard May 6, 1969, order pending.
Texas Railroad Commission (does not regulate electric and gas utilities).	3	Lone Star Gas Co	Gas	$10,848,253	May 2, 1969	Pending.
		High Plains Natural Gas Co	do	$48,849	Dec. 3, 1968	Do.
		Houston Pipeline Co	do	$5,236,539	Apr. 25, 1969	Do.
Utah Public Service Commission	1	Utah Telephone Co	Telephone	Unknown—claim insufficient revenue. Ask increase without specifying amount.	Apr. 14, 1969	Hearing set for June 10 and 11, 1969.
Vermont Public Service Board	1	Citizens Utilities Co	Electric	$2,364,000	March 1969	Due for hearing on remand from Vermont Supreme Court.
Virginia State Corporation Commission	1	United Inter-Mountain Telephone Co.	Telephone	$822,526	Dec. 10, 1968	Hearings concluded; decision pending.
Washington Utilities and Transportation Commission.	1	Pacific Northwest Bell Telephone Co.	do	$26,700,000	Dec. 12, 1968	Concluding hearings are set to begin June 9, 1969.
West Virginia Public Service Commission	9	Consolidated Gas Supply Corp. (Hope Natural).	Gas	$2,000,000	Oct. 30, 1967	Completion of audit and set for hearing.

[6] In July.
[7] New York Public Service Commission has advised company it will accept revised request for $18,000,000.

MRS. LOUISE BOWKER, PRESIDENT, NEWSPAPER ASSOCIATION MANAGERS, INC.

HON. J. W. FULBRIGHT

OF ARKANSAS

IN THE SENATE OF THE UNITED STATES

Thursday, October 23, 1969

Mr. FULBRIGHT. Mr. President, I was pleased to learn that Mrs. Louise Bowker, of my State, recently has added to her many accomplishments her election as president of the Newspaper Association Managers, Inc. The NAM is fortunate to have the talents and industry of this Arkansan leading this organization.

I ask unanimous consent to have printed in the Extensions of Remarks an article published in the Missouri Press News outlining some of Mrs. Bowker's civic and professional contributions.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Missouri Press News, October 1969]

ASSOCIATION MANAGERS ELECT ARKANSAS WOMAN PRESIDENT

Mrs. Louise Bowker, secretary-manager of the Arkansas Press Association, was elected president of Newspaper Association Managers, Inc. at the group's 46th annual meeting August 22, in Williamsburg, Virginia. NAM is an association composed of managers of state, regional and national newspaper organizations. She is the first woman ever elected to the NAM board, having been chosen secretary-treasurer in 1967 and moving to the vice presidency in 1968.

She joined the Arkansas Press Association as office manager in April 1956, was promoted to assistant manager in 1961 and became the first woman to head the 97 year old association in 1962.

In 1962 she was chosen APA's "Man of the Year" an award bestowed on the person considered to have made the greatest contribution to the programs and progress of the Arkansas Press Association. She was elected Woman of Achievement in 1963 by Arkansas Press Women, Inc.

She is currently serving as secretary of the Arkansas Highway Users Conference; vice president of the Arkansas Council on Children & Youth; and vice president of the Mid-America Newspaper Mechanical Conference, the first woman in the country to be elected to such a board. She is a member of the Little Rock Advertising Club and is active on its legislative committee; the Salvation Army Auxiliary; North Little Rock Boys Club, and other civic organizations.

She is a native of Jonesboro, where she was graduated from the public schools and Jonesboro Baptist College, majoring in business administration. Mr. Bowker is married to S. W. Bowker, an insurance executive of North Little Rock, Arkansas.

Other officers and board members elected were: Vice President, Robert M. Shaw, Minnesota Press Association; Secretary-Treasurer, Richard W. Cardwell, Hoosier State Press Association; and Director, Ray Hamley, Maryland-Delaware-D.C. Press Association.

GREEK REGIME TOKENISM

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. CONYERS. Mr. Speaker, a recent dispatch in the New York Times reports that the military government of Greece is undertaking a liberalization program. The press is now free—except there is a two-page list of banned topics. Summary arrests and imprisonment are barred—except in cases involving "the public order and security." Military courts will no longer have jurisdiction over civilians—except in cases of treason, espionage, sedition, disturbing the peace, spreading false information, and arousing discord. In short, the people of Greece are now free—as long as they do not do or say anything the colonels do not want them to.

Verily, the junta is preserving Greece as a bastion of freedom.

I include the article entitled "Greek Regime Eases Martial-Law Curbs, but With Exceptions" from the New York Times of October 4, 1968, in the RECORD at this point:

GREEK REGIME EASES MARTIAL-LAW CURBS, BUT WITH EXCEPTIONS

ATHENS, October 3.—Greece's Army-backed regime today modified three martial-law rules—on press censorship, arbitrary arrest and trial by military courts—but the new measures contained a number of qualifications, assuring that controls would continue.

Greek newspaper editors were told today that the press was now free. But they were handed a two-page list of banned topics and were told that although they no longer needed to submit galley proofs to the censors, a copy of each paper must still be submitted for approval before it goes to the newsstands.

At the same time, summary arrests and imprisonment were barred "except in cases involving crimes against public order and security" and the jurisdiction of special military courts was narrowed.

ANNOUNCED AT NEWS TALK

The new measures were announced by Premier George Papadopoulos at a news conference in the marble-walled Senate chamber in downtown Athens.

The timing of the measures puzzled foreign diplomats in Athens.

Some noted that that they came 24 hours after George Tsistopoulos, an Under Secretary in the foreign office, returned from the United States, where he had talks with Secretary of State William P. Rogers, and passed on to the Greek leaders the strength of feeling in Washington in favor of substantial liberalization in Greece.

It is also possible that the announcement was intended to counteract a statement in Paris Tuesday by former Premier Constantine Caramanlis, who said that the regime was making no progress toward democracy and intended to perpetuate its oppressive rule.

It came a day too late to prevent the approval of a resolution by the Consultative Assembly of the Council of Europe in Strasbourg condemning the regime.

The list of taboo newspaper topics included these:

All news and comments "directed against public order, security and national integrity," such as "slogans or statements of outlawed parties or organizations aiming at the violent overthrow of the prevailing lawful order."

Topics of a subversive nature, including incitement to ctizens or the armed forces to violate orders and laws, or instigating demonstrations, mass meetings or strikes.

Publications directed against the national economy, including rumors likely to provoke anxiety on the progress of the economy or the stability of the currency, or divulging state economic secrets.

Reports likely to revive political passions and feuds.

The 50-year-old Premier said the new measures were justified by a substantial improvement of the domestic situation since the coup of 29 months ago and by the support his regime enjoyed from the Greek people.

"The patient is no longer in the plaster cast," he said, using his favorite analogy in which Greece is the patient and he the surgeon. "The patient is now in small splints. Let's hope he won't break his limbs again."

Mr. Papadopoulos told reporters he had issued orders, effective at once, abolishing press controls as well as banning arbitrary arrests and trials of civilians by special military courts. These controls had been authorized under the martial law in force since the coup.

"FREEDOM IS INVIOLABLE"

"Personal freedom is inviolable," the Premier declared. All arrests and imprisonments from now on will be carried out in accordance with the Constitution—"except in cases involving crimes against public order and security," he said.

EXPLAINS EXCEPTIONS

The jurisdiction of special military courts, set up by the regime to punish security offenses, will now try only cases of treason, espionage and sedition, including charges of disturbing the peace, spreading false information and arousing discord, he said.

Most of the cases tried by special military tribunals since the coup have involved charges of sedition.

Mr. Papadopoulos said the regime was negotiating with the International Red Cross for investigating allegations of torture of Greek political prisoners. He said, "This should put an end to the infuriating campaign of lies about tortures in Greece."

Mr. Papadopoulos, asked to comment on the statement by Mr. Caramanlis, said he was not prepared to discuss the future of Greece with "anyone except the Greek people."

Mr. Caramanlis, a rightist whose attack on the regime drew wide support from most Greek political groups warned the Athens rulers to make way for democracy or face violent overthrow.

Mr. Papadopoulos said that he, as a citizen who had voted in the past so that Mr. Caramanlis could become Premier, could only say: "Pity, I regret."

Commenting on elections, he said: "We, and only we, shall decide when they will be held in Greece."

Asked if, in view of the fact that he had announced the freedom of the press, he

would now allow the Greek papers to publish Mr. Caramanlis' statement, Mr. Papadopoulos replied: "I will not."

BRIG. GEN. FRED W. VETTER, JR.

HON. J. CALEB BOGGS

OF DELAWARE

IN THE SENATE OF THE UNITED STATES

Thursday, October 23, 1969

Mr. BOGGS. Mr. President, it has often been said that "little things mean so much." And I am certain that the commander of the Dover, Del., Air Force Base believes it, for his example at the base illustrates that phrase accurately.

In January of this year, Brig. Gen. Fred W. Vetter, Jr., assumed the top post at one of the Military Airlift Command's largest installations.

Initially, the general expressed a desire to improve and maintain the physical appearance of the property and to strengthen the ties to surrounding communities. This ambitious officer set a personal example for all to follow.

In the quest of better community relations, the air base recently hosted a "Salute to Delaware," a daylong program of aircraft displays, parades, demonstrations, and a performance by the precision flying team, the Thunderbirds. Attendance was in the thousands despite the fact that it was a weekday.

Delawareans are proud of this military base. I am confident that all Delawareans join me in commending and thanking General Vetter for the fine job he is doing.

An Associated Press article written concerning General Vetter, by Edgar Miller, was published recently in the Delaware State News. I feel it is an excellent character sketch and illustrates quite well why those under his command and the citizens of the first State appreciate this fine officer and the job he is doing.

Mr. President, I ask unanimous consent that the article published in the Delaware State News of October 17 be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

GENERAL PUTS SELF ON SPOT AT AIR BASE

(By Edgar Miller)

DOVER.—Brig. Gen. Fred W. Vetter Jr. left himself wide open shortly after taking command of the 436th Military Airlift Wing at Dover Air Force Base last January.

"Put me on the spot," he challenged the base's 25,000 officers, enlisted men and dependents in an unusual—for a general—column in the base's weekly newspaper, The Airlifter.

One of his first takers did just that.

The writer was a sergeant with two children who said that with a third straight hardship assignment staring him in the face—this time in Greenland after previous tours in Korea and Vietnam—his wife was threatening to divorce him if he didn't give up his Air Force career.

Vetter investigated, found the man's complaint was indeed legitimate and replied:

"The assignment of this man was carefully investigated and discussed with higher headquarters. He has been released from the assignment . . ."

Such swift, decisive action made the column an immediate hit and Vetter now is deluged with mail, so much that he can only publish a representative selection. But he gives personal attention to all letters and each writer gets a personal reply.

The letters have had results in several areas, from film processing at the post exchange to spraying for Japanese beetles in flower gardens.

While there are a few which are "petty and self-serving," most letters serve a useful purpose, Vetter says.

"It's amazing the number of good and practical suggestions we are picking up", the general says.

Some of the letters really do put him on the spot and "can be utter dynamite" if not handled right, Vetter says.

Of course, Vetter's reaction to a given letter might not always be what the writer had in mind.

Take the case of the three lieutenants who complained that officer of the day duty offered "very little in the way of a sense of job accomplishment" and suggested it be discontinued.

Vetter agreed that junior officers weren't getting enough out of the long, tedious hours of OD duty at night and on weekends so he expanded their chores to include "educational as well as meaningful responsibilities" so they wouldn't be bored any more.

The column has done much to give Vetter a reputation on the base as a man who gets things done—in a hurry.

He has particularly emphasized spit and polish—often to the anguished groans of many airmen—at all levels of base life, from his own office down the base housing area.

As a result, the base has taken on a neat and trim appearance. Housing area roads have been resurfaced and buildings are being painted throughout the base. "The men look smart and one senses a new feeling of urgency and pride," one staff officer, Lt. Col. Maurice G. Steele, said.

Vetter begins his day with a brisk mile run at 6:30 a.m. through the housing area. During the run he takes note of any unkempt lawns or houses. If he spots one he jots down the address and the occupant gets a call from him later. He also calls those who have done a particularly good job of keeping up their quarters.

Vetter's hobby is big game hunting and his office walls are covered with trophies from hunts on several continents. His latest trophy is still being mounted—the 61-inch antlers of a moose shot in Alaska.

A native of Snohomish, Wash., who now calls Houston, Tex., home, Vetter began his career as an aviation cadet in 1942. He was promoted to general in April 1968.

Vetter's lean, 5-foot-11 frame, his dashing salt and pepper mustache and graying temples and his straight military bearing led one newsman to write in a biographical sketch:

"If Hollywood were type-casting for an Air Force wing commander, Fred Vetter Jr. would get the role."

JIM COMSTOCK, WEST VIRGINIA'S AMBASSADOR EXTRAORDINARY, PORTRAYS STATE WITH IMAGINATION IN UNIQUE NEWSPAPER

HON. JENNINGS RANDOLPH

OF WEST VIRGINIA

IN THE SENATE OF THE UNITED STATES

Thursday, October 23, 1969

Mr. RANDOLPH. Mr. President, West Virginia is fortunate to have within its borders a journalist of the talent and capacity of Jim Comstock, whose base of operations is Richwood in the forest lands of my State.

His keen powers of observation and his ability to find new insights in nearly every situation make the West Virginia Hillbilly a most popular and eagerly awaited weekly newspaper. Under the guidance of Comstock, his partner, Bronson McClung, and their erudite master of the print shop, C. Donnee Cook, the Hillbilly has become an institution known across the United States and overseas.

It is more than just a weekly newspaper. It devotes itself primarily to the discussion of life in West Virginia, its strengths, it weaknesses, its heritage, and its future. Hillbilly likewise is ever alert to ways in which West Virginia can be improved.

But it is also a light-hearted publication, filled with humor and Comstock's own, often-irreverent comments on events of the day.

In the course of bringing Hillbilly to its present state of journalistic eminence, Jim Comstock himself has become a sought-after personality who frequently graces speakers' platforms in West Virginia and other States. He reports on his travels and observations weekly in a lengthy column called the Comstock Load.

Elsewhere in the publication there may be discussions of many subjects under intriguing headlines such as these from recent editions of Hillbilly: "West Virginia Cole Slaw Signs As American As Apple Pie," "Memories of a B. & O. Dispatching Man," "A Mighty Mingo Chieftan," "How the Teacher Nipped a Riot," "All You Need Is a Peach Tree Limb To Find Water," "By Rail Up Shaver's Fork River," "Look What a Big Dog Dragged In," "In the Land of Buckwheat Cakes," "Hillbilly Ramblings," "The Man in the Henhouse," "Have Sleeping Bag, Will Travel," and "Old Likker in a New Jug," a regular compilation of quotations and poetry. Hillbilly also features a regular heritage page, a lively exchange of letters from readers and periodic reviews of various industries that contribute to the West Virginia economy. A picture of a pretty West Virginia girl always brightens Hillbilly's pages.

Mr. President, Jim Comstock recently spoke at Salem College, my beloved alma mater, telling of the trials and tribulations of an editor. His appearance was reported in the September issue of the Salem College Bulletin, and I ask unanimous consent that excerpts from the article be printed in the RECORD.

There being no objection, the excerpts were ordered printed in the RECORD, as follows:

EDITOR JIM COMSTOCK GIVES ADDRESS AT SALEM COLLEGE

"I founded The West Virginia Hillbilly because I wanted to tell the world that West Virginia is a notch above the other states," Editor Jim Comstock told the Salem College students.

Comstock, West Virginia "ambassador extraordinary," spoke at Salem College and was received by the students with enthusiasm.

He told of his special "ramp edition which caused quite a stink with the subscribers and especially with the Post Office Department." He explained that the stunt drew national attention on the wire services and resulted in The National Geographic doing an article about the paper, ramps and Rich-

wood—the home of the Comstock and McClung publications.

"Every Monday morning I have 16 blank pages in front of me to fill," Comstock said. "To a literate person that paper, when published, has meaning. I ask myself, 'Is there some little thing in it that will lift the world?' "

READERS HAVE POWER

The West Virginia Hillbilly really belongs to the readers, and the readers have the power, he declared. Among the many things which Hillbilly readers have done are—founding a "Past 80 Club," building a hospital in Richwood, sending a boy to Williamsburg, Pa., for rehabilitation, saving the scenic Cass steam railroad—the last of its kind in the country—for a tourist attraction, starting the drive to buy Pearl Buck's birthplace home in Hillsboro for West Virginia.

MELVIN MILLER

Comstock told the story of Hillbilly's collapse a couple of years after its birth and of Melvin Miller who came to Richwood to encourage the two publishers to start again. Miller, who had just graduated from Bethany College, was on his way back when his small sports car failed to make a curve and he was killed.

Inspired by Melvin Miller's faith, Comstock and McClung started the publication again. The first issue of the reborn paper was dedicated to Miller in Comstock's story, "Here, Melvin Miller, Is Your Paper."

"Each week I ask myself, 'Have I done something good? Have I been true to the dreams of a boy who wanted to start a paper?' "

PRESS AGENT FOR STATE

Comstock is one of the state's best press agents. He has publicized its writers, sculptors, painters and musicians; worked to bring in new industries; and plugged its tourist attractions.

In Hillbilly he has satirized West Virginia's politics, described its beauties in glowing words, and kept alive its rich folk heritage.

AUTHORITY ON APPALACHIA

Otto Whittaker, who compiled and edited the recent book, Best of "Hillbilly," says that Comstock probably knows more than any man alive about the yesterdays and todays of Appalachia and how it got that way, and for the past year he has been enlarging this knowledge with a fellowship from the Ford Foundation.

In addition to editing the Newsleader and Hillbilly, Comstock is compiling and editing a 25-volume encyclopedia on West Virginia. "In this encyclopedia we hope to preserve West Virginia's heritage which is rapidly being lost," he said.

THE 75TH ANNIVERSARY OF THE UNION OF POLES IN AMERICA

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. STOKES. Mr. Speaker, October 26, 1969, marks the 75th anniversary of the Union of Poles in America. A fraternal service organization, the Union of Poles in America was founded in Cleveland, Ohio, in 1894 and has since provided innumerable benefits to the Polish-Americans of Ohio. But more noteworthy is the great service this organization has provided to our community through its many juvenile and adult social programs. The Union of Poles is headquartered in Cleveland and its national president, Mr. Richard E. Jablonski, also resides in that city. As a Representative for the city of Cleveland, I commend the Union of Poles for their 75 years of unselfish service and I wish them continuing success for the future.

In saluting this organization, I would like to provide my colleagues with the following historical review of the Union of Poles in America prepared by Mr. Richard E. Jablonski:

The Union of Poles in America, under the protection of our Blessed Mother, came into being as a result of the merging of two Unions, The Polish Roman Catholic Union under the protection of the Immaculate Heart of Mary and The Polish Roman Catholic Union, under the protection of Our Lady of Czestochowa. This merger occurred at the joint convention in Cleveland, Ohio on May 30, 1939.

The Polish Roman Catholic Union, under the protection of the Immaculate Heart of Mary, was organized on July 1, 1894, in Cleveland, Ohio. Its first president was A. Skarupski.

The Polish Roman Catholic Union, under the protection of Our Lady of Czestochowa, was organized on March 11, 1898, in Cleveland, Ohio. Its first president was Francis Szemplachowski.

Both of the unions, after many preliminary discussions, held special conventions during the month of May 1938. Finally it was decided to hold a common convention on May 30, 1939 in Cleveland, for the purpose of finalizing the merger. Its first president was Joseph Missal.

During the 30 years of existence, the Union of Poles has considerably increased its membership and financial resources. The financial resources are now approaching the $4,000,000 mark. The entire organization stands on a firm financial basis and is one of the leading fraternal organizations in America.

From an earned surplus, dividends have been paid to its members every year for the past 25 years.

During World War II, the Korean War and the present War in Vietnam, the Union of Poles has guaranteed the entire payment of life insurance in case of death of an insured member serving in the Armed Forces—not excepting the policy with war reservations.

The Union of Poles is a participating member in the Polish American Congress and for many years has taken an active part in the social, cultural, and economic affairs of the "Polonia."

The Union of Poles in America, a fraternal organization, strongly believes in serving its country; and taking an active part in helping the free world emerge a very great power in the service of mankind, for a better, stronger, and happier society of Free and Independent Nations.

Today, we observe, together with the "Polonia," the Diamond Jubilee, the 75th year of the founding of the Union.

STUDENTS FOR WHAT?

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. DERWINSKI. Mr. Speaker, I have repeatedly called the attention of the Members to the rampage perpetrated in Chicago on October 9, 10, and 11 by militant members of the SDS.

It is important that people around the country understand the developments in Chicago and therefore I insert into the RECORD a very effective commentary carried in the Sunday, October 19, Chicago Heights Star, a publication whose staff kept very close to the situation:

STUDENTS FOR WHAT?

By all accounts, militants of the self-styled Students for a Democratic Society alienated or at least embarrassed all but the most knuckle-headed of their admirers during the group's most recent descent upon Chicago. They came to tear the city apart, and they remained to demonstrate how badly decent people would fare if they indeed achieved whatever brand of society they really want.

Emerging as heroes, ironically, were the very Chicago policemen whom the anarchists proposed to discredit. Much has been said and written about the professionalism and restraint which characterized the police work. The praise was deserved. It is reasonable, meanwhile, to pay some attention to the cost of the soft approach in dealing with mad-dog tactics, exemplary and well-reasoned as that course proved to be.

Reports indicate that virtually all injuries of consequence were suffered by policemen—although some members of the liberal establishment might have risked mishap in the rush to back away from identification with the SDS. In any case, it can be assumed that the policemen not only acted in a most temperate manner, but did so at their own considerable peril.

A less serious but nevertheless significant aspect of these confrontations is the question of whether citizens are to be denied the use of their streets and sidewalks if they don't choose to be trapped on the rim or in the midst of a revolution.

But at least when the scum surfaced in Chicago this time, there were no non-militant idealists on the scene to blue the image; the true nature of the demonstrators was laid bare. The next time revolutionaries boast of their intent to bring a major city to its knees, the authorities should again be ready for them. And with real luck, the television cameras will grind as feverishly as they did when it was considered stylish to represent that only policemen break the law.

MORATORIUM DAY

HON. MARTIN B. McKNEALLY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. McKNEALLY. Mr. Speaker, under leave to extend my remarks in the RECORD, I am pleased to include the following statement by a former distinguished Member of the House, Hon. Hamilton Fish, Sr., with reference to the recent moratorium day.

Mr. Fish has been opposing communism for more than 40 years and is a strong supporter of our divine heritage of constitutional and free government. He always has an interesting point of view.

The statement follows:

For a quarter of a century in Congress, I supported every move to promote and maintain peace. I join with all Americans who want an honorable peace and favor an immediate Cease Fire to be followed by peace negotiations.

The police and firemen are the guardians of order and security in New York City. The best way to fight crime would be to take the handcuffs off the police.

God bless the police and firemen for refusing to lower the American Flag in support of the proposed cowardly, dishonorable, and

treasonable total withdrawal from Vietnam; thereby aiding and abetting our Communist enemies. This would make the United States a constant target for ridicule and abuse in both the Communist and the Free Nations, and be a mockery of the heroic sacrifices by our Armed Forces in Vietnam.

SUEZ CANAL CLOSING: EFFECTS ON SHIPPING

HON. DANIEL J. FLOOD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. FLOOD. Mr. Speaker, one of the consequences of major geopolitical significance resulting from the closure of the Suez Canal in the 1967 Arab-Israeli war was the diversion of interoceanic commerce around Southern Africa. Another was the stimulation of the construction of super tankers that can transport oil more economically by this route than by the Suez Canal. This means that this canal has permanently lost a large part of its traffic even if the Suez Canal should be opened.

An informative article on the effect of the closure of the Suez Canal on South Africa follows:

[From the Chicago Tribune, Oct. 19, 1969]

SUEZ CLOSING IS A BOON FOR SOUTH AFRICA

JOHANNESBURG, SOUTH AFRICA.—October 18.—Closing of the Suez canal following the six day Israeli-Arab war in 1967 has been a boon to South Africa's harbors.

Since 1967 ships have sailed around the Cape of Good Hope into South African ports at a rate that has reached about 1,000 a month, with resulting far-reaching economic and strategic implications for this country.

The number of ships rounding the cape and calling at one of the country's major ports—Durban, Cape Town, Port Elizabeth and East London—has nearly doubled since June, 1967.

SOUTH AFRICA CONFIDENT

And while some ship owners may still be looking toward the Suez canal and wondering about the possibility of it reopening, shipping authorities in South Africa are confident the Suez will never again become one of the world's major waterways.

Many shipping people agree that Suez has seen its best days. For as ships grow in size, they say, the canal will become too small. It also is a fact that altho the canal has been closed for more than two years, there has been remarkably little disruption of world trade.

Figures for immediately before and after the closing of the Suez canal show a phenomenal jump in the number of ships rounding the cape and the amount of tonnage handled. In the year June, 1966, to June, 1967, 7,370 ships rounded the cape, and the gross tonnage handled at Cape Town harbor was 46,487,000. Then from June 1967, to June, 1968, the number of ships rose to 12,268, and cargo handled at Cape Town harbor was 95,337,000 tons.

SEE NO SLACK

The latest figures available for the year 1968–69 indicate there will be no slack in the activity that has gripped South African ports—especially Durban and Cape Town, the two biggest. At the end of April this year 13,890 ships already had used the cape sea route.

According to one shipping source, the revenue to South Africa from ships entering its harbors can be calculated on an average of between $560 to $700 per ship. Since June, 1967, 3,000 diverted ships called at Cape Town and 4,000 at Durban Harbor. This gives an estimated extra revenue of 4.5 million dollars in berthing fees alone to which must be added income from food and provisions and other trade.

STOP OUTSIDE HARBOR

According to a spokesman for Cape Town's office of the port captain, several thousand other ships stopped outside harbor limits for stores and mail to be taken to them by launch and helicopter, thus escaping harbor charges.

The decision taken in March, 1968, by the major oil companies never again to rely heavily on the Suez canal for transporting oil has had a major impact on South Africa. Since they were forced to use the cape route, oil companies have found that oil can be transported via the cape in super tankers at a saving of up to 20 cents a barrel.

Shipyards already have orders for about 200 new tankers of which more than half are more than 200,000 tons and the rest more than 100,000 tons. None of these tankers will be able to get thru the Suez canal.

TOURIST BOOM

Apart from these considerations the closing of Suez also has resulted in a South African tourist boom. It is estimated that about 170,000 tourists have passed thru either Durban or Cape Town from rerouted liners on their way to the far east or Australia. It is estimated further that they have spent in the vicinity of 1 million dollars on sightseeing and shopping excursions.

Lord Chalfont, Britain's minister of state, reported that the number of British registered ships passing around the Cape of Good Hope had more than tripled since the closing of the Suez canal.

Russia's use of the route also has risen dramatically. According to the Cape Town port captain more than one-third of the 13,980 vessels that passed during the year ending April, 1969, were from communist countries, and of the 5,500 communist ships, nearly 3,900 were Russian.

"TURNING THE CORNER"—THE WRONG CORNER

HON. RICHARD T. HANNA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. HANNA. Mr. Speaker, an optimistic administration spokesman has cited as "encouraging" the most recently reported rise in the Consumer Price Index the Washington Post reported this morning. Another Presidential spokesman was quoted as saying September's rise means we are "turning the corner."

Is it possible that there is some statistic these fellows are looking at that the rest of us have not been made privy to? I am under the distinct impression that this morning's paper reported a 0.5-percent increase in the Consumer Price Index. If this half percent rise is "encouraging" and "turning the corner" then I suggest we have turned the wrong corner, and are encouraging the wrong policy.

It seems to me one can seriously question the credibility of a "spokesman" who is "encouraged" by a half percent rise in the Consumer Price Index. According to the Washington Post:

The bellwether industrial commodities component, considered by some analysts as the best measure of inflation, jumped 0.4 percent. It matched the August increase, which had been the largest since March.

The September rate gives no indication that there is any slowdown in the record 4.5 percent rate of increase in the Consumer Price Index for 1969. The rate for this year is up 1.1 percent from 1968, and the "encouraging" September figure suggests no decrease in this record annual rate.

I have no doubt that few if any Americans will feel "encouraged" when they read the Associated Press report that—

Clothing prices rose at about double the usual increase for September . . . Food prices failed to show their usual decline for the month, (and) housing costs continued to rise and there were increases for all kinds of consumer services.

Who is being kidded? Certainly not the public, and hopefully not the Congress. Is it not time the administration dealt candidly with this issue, instead of feeding us this meaningless pablum? We do not need self-serving statements so obviously out of kilter with the real circumstances. What we do need is some honest analysis and some responsible discussion about solutions.

GREAT HARDSHIP TO OUR FARMERS

HON. WILLIAM L. HUNGATE

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. HUNGATE. Mr. Speaker, Congressmen whose districts include large rural areas as mine does are greatly concerned about the affects inflationary trends are having on farmers. I believe all the Members will share our concern as they read the following speech being delivered today by Hon. W. R. POAGE which clearly points out the problems causing great hardship to our farmers:

REMARKS OF CONGRESSMAN W. R. POAGE AT FARMERS UNION APPRECIATION DINNER, GATESVILLE, TEX., OCT. 23, 1969

Mr. Chairman: It is always a pleasure to meet with my friends. It is especially a pleasure to meet with them when they have gathered to do me honor. I recognize that I am not worthy of the kind of exaggerations which have been indulged but I do appreciate the spirit of friendship which has prompted my friends of Coryell County to arrange this dinner, and I especially appreciate the fact that my friends in the Farmers Union have made this dinner possible.

I feel a special responsibility for the welfare of agriculture, just as does the Farmers Union, and I realize that the problems of agriculture are probably the most serious and the least understood of the problems of any substantial segment of our economy.

Like all other Americans, farmers are vitally affected by the inroads of inflation. The first evidences of inflation are always welcomed by the overwhelming majority of our people because cheaper money makes it possible for them to pay their debts more easily, and higher wages put more money in circulation and for a time provide a higher standard of living. People begin to feel a sense of prosperity, but as inflation progresses costs soon catch up with increased income and there

are demands for a new round of wage increases. Then there is a new round of higher prices, a substantial reduction in the buying power of our money, and shortly a lowering of our living standards.

Our economy in general is, I believe, just now entering this stage of the inflationary spiral. The farmers entered it some time ago. Your costs have gone up far faster than your income, and this is really the thing which hurts in connection with inflation. Most everyone knows that the cost of things farmers buy, like the cost of things city people buy, has increased rapidly. A tractor which cost $2000 twenty years ago costs about $8000 today. Barbed wire which sold for eight dollars a roll twenty years ago now costs around twelve dollars a roll.

The public generally concedes that the cost of farming has increased but they say, "So have our costs." The thing the public does not generally recognize is that the price of the farmers' products have not increased. Wages have gone up and again the public says, "The farmer is a wage earner as well as an investor so he has benefited." They do not realize that the farmer receives practically nothing in payment as wages from his farming operations. True, farmers devote their time, but their time must be paid for out of the proceeds of what they produce and what they produce is today very often bringing less per unit than it brought twenty years ago.

For instance, corn sells for a little more than a dollar a bushel. A little over twenty years ago it sold for $2.00 a bushel. Wheat, which with the government payments, averages out at about $1.50 a bushel was bringing over $2.00 a bushel twenty years ago. Middling inch cotton, which very few of us were able to raise this year is worth, with all the government payments, around 29 cents. Twenty years ago, it brought nearly 33 cents in the open market, without payments.

There has been an especially loud complaint about the price of beef. It is true that round steak went up to $1.60 a pound in Washington a short time ago, but on the same day choice steers were bringing just over 30 cents a pound in Omaha. That was approximately 15% less than they brought twenty years before.

Certainly it was not the price cattlemen were receiving which forced the price of beef to its present levels, but even with all of the costs which have been added after the food leaves the farm, the American housewife is still buying the greatest bargain available in any country at any time in history. In the Far East many people spend two-thirds to three-fourths of all they earn throughout their lives just to secure a very meager diet. The people of the Soviet Union today spend nearly one-half of their disposable income on food. In Western Europe the figures are from 25 to 30%. In the United States we enjoy a far more varied diet and actually buy a tremendous amount of "Built-in maid service" at the grocery store but last year our people spent only 17.2% of their disposable income in the grocery store, and a substantial portion of these expenditures were for non-food items, and of the food the farmer was paid only about one-third of the retail price. By any standard, food in America is one of the world's greatest bargains.

Let us keep this one point in mind—the American people are not being overcharged for food and fiber. On the contrary, they are receiving more for their dollar—that is, in buying food and fiber they are getting more of somebody else's labor and investment—for fewer dollars than they are in almost any other segment of our economy.

Just who in America, other than the farmer, is today taking less for what he produces than he got twenty years ago? Oh, I know that there are those who would immediately point out that the efficiency of production has increased on our farms, and this is certainly true, but the efficiency of production has increased in the General Motors plant, the Bell Telephone Company, United Airlines, and all of the rest of our great corporations, but their unit prices are all up. The farmer's is down.

This is the great difference which I think cries out for rectification, but I don't want to take your time simply to discuss the inequities of our agricultural price system. You are familiar with them just as well as I am. We need not tell ourselves of our troubles, although we do need to tell this story to city people. I think the American people are basically fair when they understand the facts, and I have been trying to give them the facts, but it is extremely difficult to get a city audience to listen to the facts.

What you want to know and what I need to know is how can we change this situation. How can we improve farm income? When we ask these questions we involve ourselves in far more complications than most of us realize. It is not enough to know the simple laws of economics. Most of us know that if we reduce the supply of goods, other things remaining equal, prices will tend to go up. It is, of course, on this fundamental truth that most of our farm programs are based, whether they be land retirement programs, grain storage programs, cotton allotment programs, or any other variation of supply control.

But we are faced with all kinds of related influences and activities. A massive land retirement program certainly involves the destruction of community life across broad areas, and the bankruptcy of many small-town businesses. An arbitrary, mandatory reduction of any kind involves the use of governmental controls which most of us resent. The use of the present "carrot" type program of inducements, as contrasted with the "stick" of compulsory controls, requires the cooperation of large land holders to be effective, and this in turn opens the door for what seems to me to be some of the most effective demogoguery, such as we have seen in connection with the advocacy of limitation of agricultural payments. Demagogues or not, these advocates of limitations have enough votes that we must devise a program which will not involve such large payments—and most important of all, no farm program deserves to succeed which denies the American people of all of the food and fiber they need at reasonable prices. Now, I said "reasonable" prices, and that is what I mean. I mean prices which will enable the producer to enjoy the same kind of living standards in return for the same contributions of labor and capital which are enjoyed by other segments of our economy.

Parity is not an exact measure of such standards, but it is probably the best we have. I would therefore suggest that while we should seek to bring the price of farm products up to parity, we should also seek just as diligently to prevent the development of a price level in excess of parity. That is actually what our farm programs throughout the years have sought to achieve. They have not always achieved their objectives, but they have done much toward maintaining a higher standard of living on our farms and ranches.

I know that it is considered "smart" in some circles to say that if we had no farm programs we would all be better off. Well, it isn't but 250 miles from here to the Mexican Border. I suggest that any farmer in Coryell County who feels that he can do better without any farm programs ought to move across the river. He won't have any farm programs there, but he won't get as much for his cotton, his cattle, or his wool.

Then there is another group who like to say, "Just Look—cotton, wheat and feed grains are the major crops with farm programs and they are in far worse shape than some of the commodities without any programs; therefore, farm programs must destroy the value of our commodities." My wife was recently in Scott & White Hospital at Temple. There were hundreds of other people there. Most of them were in real bad shape but they were not in bad shape *because* they had gone to the hospital. They had gone to the hospital because they were sick. So it is with our crops. The crops which are in trouble are the ones which need and are getting the programs. Those of us who are well do not need hospitalization and those farm products which are in sound balance do not need farm programs.

For this reason, farm programs do not mean nearly as much in Coryell County as they do in some other parts of the country, but farm programs put enough money into this county during the past bad years to not only help a great many of our farmers but also to mean the difference between profit and loss to a great many merchants, businessmen, bankers and doctors. You would find it much harder to keep the City of Gatesville solvent if we had no farm program.

The existing farm program has many faults and shortcomings but on the whole it is probably the best we have yet devised. Anyway, I think it would be foolish to give it up until we get something better. I had hoped that we could maintain this program, and of course it was my bill of last year which gives us the program for next year, but with the end of the next crop year we will have practically no farm program unless we are able to pass a new bill. Our Committee has been trying for many months to reach some concensus on legislation which can be passed, because it is not sufficient to know what we should have. It is just as important to know what we *can* have—and I recognize that we cannot pass a bill through the Congress which does not have considerable support from both Republican and Democratic members. We can't pass a bill which is simply a Committee bill. We can't pass, simply a Farm Bureau bill, or even a coalition bill. We can't pass a bill which is simply a Departmental bill. But our Committee must work with all the farm organizations and with Secretary Hardin and the Department of Agriculture.

I have felt that the Secretary was a reasonable man, but he doesn't feel the urgency for new legislation which I think exists. I know that unless we have made considerable progress before the end of this year that our farm program will probably still be before the Congress as the end of the next session draws to a close. This is not the way to get good legislation, and it is no way to give farmers the opportunity to use good farming practices. I had hoped, and I still hope, that we will be able to get a bill through the Committee and to the Floor of the House before adjournment of Congress this fall—but time is running out and it was just last Monday night that the Secretary came up with the first specific language he has indicated he would accept, and this related only to feed grain. It was a start and I am glad we have made this start.

Our Committee has been meeting with the Secretary and his staff every Monday night in informal discussions which I think have been most helpful but we have a long way to go. The Secretary has indicated a large degree of flexibility on his part, and I think this is helpful. While we need suggestions of specific language, at the same time we need a willingness on the part of the Secretary, on the part of the farm organizations and Committee members to accept many details which are not a part of their own plans or programs. I have been pleased that the Farmers Union and most of the other major farm and commodity organizations have been able to get together on specific legislation. It is helpful that we can have this degree of unity.

On the other hand, I hope that this will not result in fixing their ideas in cement.

Neither the so-called Coalition Bill, the Poage Bill, the Farm Bureau Bill, or the Departmental Bill is going to be passed as it is introduced. There are going to be many modifications and once those of us who are especially interested in agriculture have come together in support of a program, we must still recognize that we must have the cooperation of the consumers. We are all consumers but about 90% of our people are consumers without any personal interest in production, and altogether too many of those people feel that their interests and those of agricultural producers are in conflict. I think this is a mistaken viewpoint. I think it is based upon a failure to understand the fundamental elements of agricultural production but people do not act upon the facts. They act upon what they believe the facts to be.

As I have pointed out, the American people are buying a bargain in food. The truth is they are getting this bargain because of the tremendous technological advances made by American agriculture. Our schools, our scientists, our extension service and our agribusiness firms have all teamed up to make modern technology available to our farmers, but it doesn't come free. Probably every farmer in this audience knows how to do a better job of farming than he has been doing, but in very few cases could he afford to do any better than he has done. Most of you know you could grow more if you applied more fertilizer, if you irrigated, if you used better machinery, etc., but in most cases you feel that it might not pay to make the expenditures necessary to get the increased production.

If the consuming public is unwilling to pay a fair price for agricultural products the volume of those products will in the long run decline—not because of the perversity of our farmers, but because they just wouldn't have the ability to use the expensive technology necessary to produce abundantly. If we are so foolish to restrict the ability of our farmers to produce cheaply and efficiently because of an inadequate income, we must be prepared to pay substantially higher prices for everything we eat and wear, and that within a matter of a relatively few years.

Admittedly, a policy of low farm prices and no production controls could bring about increased production for one, two or three years. Farmers, like everyone else, seeing their unit prices going down would seek to maintain their living standards by increasing the number of units they could offer for sale. As long as they had any reserves or could get any credit they could do this, but as existing machinery wore out and farm credit was restricted, as a lower price level would automatically restrict it, farmers would more frequently find it impossible to use the techniques which our modern science and research have made available and production would fall.

A failure to understand this relationship between cost of production and volume of production has, I think, been the basic error in the philosophy of so many who have in recent years been bemoaning the fact that the world could not feed itself. I want to make a categorical statement that the world can feed its present population with a very good diet but to do so farmers the world over are going to have to have a return which will allow them to share with other producers on a more comparable basis than they have done in recent years.

If they can't get such a share, obviously many more of our American farmers will be forced to leave the farm. Production will fall into fewer hands, and right here I want to make it clear that I am talking about what will happen—not what I would like to see happen. When we get to the point where we have no more agricultural producers than we have producers of gasoline, the price of agricultural products will respond as does the price of gasoline to the needs and wishes of those who control the production. I don't want to see this happen, I think it would be a tragedy for all America—just as much a tragedy for urban America as for rural America.

A HELPING HAND PAYS IN THE REPUBLIC OF CHINA

HON. ELIGIO de la GARZA

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. DE LA GARZA. Mr. Speaker, the United States extended a helping hand to the Republic of China after its government was forced off the Chinese mainland by Communist forces 20 years ago. The assistance paid off. In a few short years the Republic of China became self-sustaining and now it is extending help to other nations.

In 1960, a year in which no less than 17 African countries achieved independence, the Government of the Republic of China decided to strengthen its friendly relations with these newly independent countries. Considering the similarities in climatic conditions and the stage of economic development between Taiwan and most of the African countries, the Chinese Government felt that the valuable experience China had acquired in Taiwan in her rapid agricultural development might be of use to the African people.

Accordingly, a technical cooperation program for Africa in the field of agriculture was conceived. In November of 1961 the Chinese Government sent to Liberia its first farming demonstration team following the signing of a technical cooperative agreement between the two countries. Since then additional agricultural teams have been dispatched to all the newly independent African nations.

Responsible personnel of the cooperating countries have visited Taiwan to observe its agricultural development and the methods employed to increase farm production. Fellowships have been granted to technicians of friendly countries to attend seminars or to receive on-the-job training in Taiwan. Following the dispatch of agricultural specialists on survey teams to determine the needs of the countries concerned, farming demonstration missions and agricultural technical missions were sent to the cooperating countries. Assistance has been given in helping to set a general pattern for the development of a sound rural economy so that the host country can carry on future development on its own.

Mr. Speaker, this continuing effort by the Republic of China deserves high praise. In these African countries the key to the improvement of the economy and to raising the standard of living of the people lies in increased agricultural production. It is gratifying to know that the Republic of China for the last decade has thrown its energies and knowledge into extending precisely the kind of assistance the African peoples most need. We should cooperate with them in this endeavor and in everything which strengthens our friendship and solidarity.

NATIONAL BUSINESS WOMEN'S WEEK

HON. THOMAS S. KLEPPE

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. KLEPPE. Mr. Speaker, it is a privilege to join with the National Federation of Business and Professional Women's Clubs, Inc., in saluting the business and professional women of America during National Business Women's Week, October 19–25.

The club has 180,000 members in the 50 States and in the District of Columbia, Puerto Rico, and the Virgin Islands. They comprise not only a vital and constructive force in the business and professional community but in the areas of civic responsibility and service as well. From the many letters I receive from club members, I know they take a deep interest in legislation and are extremely well informed.

Over the last half century, they have played a most important role in American public life.

I insert at this point in the RECORD the legislative platform of the National Federation of Business and Professional Women's Clubs:

NATIONAL LEGISLATIVE PLATFORM ADOPTED BY THE NATIONAL CONVENTION JULY 20–24, 1969, ST. LOUIS, MO.

ACTION ITEMS

Item 1. Constitutional Amendment. Support legislation to amend the Constitution of the United States to provide that equality of rights under the law shall not be denied or abridged on account of sex.

Item 2. Actively work for pending legislation providing for: (a) a broadened head-of-household benefit under the Internal Revenue Code; (b) increased personal exemption and credit for dependents under the Internal Revenue Code; and (c) a more equitable distribution of the tax burden.

Item 3. Propose and support legislation to provide: (a) uniform laws and regulations for men and women as to working hours, working conditions, rates of pay, equal employment opportunity, including retirement for age; (b) equal treatment for working men and women in the area of survivor and retirement benefits; and (c) increased child care deduction under the Internal Revenue Code.

Item 4. Propose and support state legislation to provide for uniform jury service and uniform qualifications in the selection of men and women to serve on grand or petit juries in any court.

Item 5. Propose and support legislation to bring about more effective crime control and law enforcement.

POLICY ITEM

Support measures within the framework of the Constitution of the United States that promote peace and strengthen national security and make more effective the United Nations and such other international organizations of which the United States is a participant, without relinquishment of our basic freedoms.

Special note is called to the United Nations Convention pending before the United States Senate on the political rights of women and to the long-standing support for ratification of this convention by the Federation.

PROCEDURE

State federations and clubs are urged to review the National Legislative Platform as published in *National Business Woman.*

Who May Submit Proposed Changes: National Legislation Committee, Executive Committee, National Board of Directors, State Federations. Clubs may also submit suggestions for changes in the National Legislative Platform, but such proposals must be submitted through their state federations for review and possible recommendation.

Procedure For Submitting Proposed Changes:

State federations shall submit proposed changes to the National Executive Offices within ten days after adjournment of their state conventions. Such proposals shall be signed by the state president and forwarded by certified mail with return receipt requested.

The Executive Committee, National Board of Directors and the National Legislation Committee shall submit proposed changes, properly signed, to the National Executive Offices at least 30 days prior to the date the National Legislation Committee convenes, except in cases of emergency. If such proposals are mailed, they shall be forwarded by certified mail with return receipt requested.

NATIONAL BUSINESS WOMEN'S WEEK

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. LONG of Maryland. Mr. Speaker, October 19 through 25 is National Business Women's Week. Thousands of America's business women are members of the National Federation of Business and Professional Women, and one of the most important interests that the federation's members share is legislation. I know this because some of my constituents are members of the Baltimore and Towson Clubs of the National Federation of Business and Professional Women.

At the 50th anniversary convention, the federation adopted a national legislative platform—which I have long supported—calling for action on legislation concerning women's rights. One item of legislation concerning women's rights includes a proposed constitutional amendment providing that "equality of rights under the law shall not be denied or abridged by the United States or any State on account of sex." A second item calls for broader head-of-household benefits under the Internal Revenue Code which the House of Representatives provided in the Tax Reform Act of 1969. A third item calls for equal treatment for working women and men in retirement and survivor benefits. In this area, I have sponsored legislation that would permit working couples to pool their Social Security credits and thus draw higher benefits. My bill would also permit widows with minor children to earn income without reducing their benefits.

No Congressman who manages to keep his job underestimates the power of a woman. During National Business Women's Week, I commend the National Federation of Business and Professional Women's Clubs on their continuing interest in legislation that is important to their members and to all other women in the United States.

PORNOGRAPHIC MATERIAL—A THREAT TO OUR YOUTH

HON. JOHN M. MURPHY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. MURPHY of New York. Mr. Speaker, the Honorable Mario A. Procaccino, the distinguished comptroller of the city of New York, testified before the House Postal Operations Subcommittee yesterday morning.

His remarks go to the substance of the pornographic and salacious material that plague our entire society, but particularly are a threat to our Nation's youth.

I insert in the RECORD today his testimony before the committee:

TESTIMONY FROM TRANSCRIPT OF COMMITTEE ON POST OFFICE AND CIVIL SERVICE HEARING ON PORNOGRAPHY, OCTOBER 22, 1969

Mr. NIX. Our next witness is the Honorable Mario A. Procaccino, distinguished Comptroller of the City of New York and the gentleman from Montana, our distinguished colleague on this committee, Mr. Olsen, will present Mr. Procaccino.

Mr. OLSEN. Thank you very much, Mr. Chairman, it is a real pleasure to present to the Committee the person, a very distinguished person, the Comptroller of New York City, Mario Procaccino. I know that he has long been strong in support of law and order and it is in keeping with his career that he would come here and support legislation that would protect people against the pandering of smut through the mails.

Mr. Chairman, it gives me great pleasure to present Mr. Mario Procaccino.

REMARKS BY NEW YORK CITY COMPTROLLER MARIO A. PROCACCINO AT HEARING BEFORE THE SUBCOMMITTEE ON POSTAL OPERATIONS AT THE HOUSE OF REPRESENTATIVES, WASHINGTON, D.C., OCTOBER 22, 1969

At the outset, let me thank you Mr. Chairman (Robert Nix) and the members of your Committee for giving me this chance to be here today. I want to congratulate the Committee on what it is doing to combat one of the most growing evils of our times, the peddling of smut through the mails.

I came to Washington from New York because I am deeply troubled over what is happening. I speak not only as a parent concerned for his own family, as a citizen concerned for his neighbors, but as an American concerned for the future of our country.

There is no question that the way to destroy our nation is to corrupt its youth, to capture the minds of the young, to enslave them to the evils of perversion. The easiest way to prey upon the unsuspecting and the innocent is through the mails.

The situation has become so bad that I have been stopped by people in the streets begging me to do something to curb this vicious assault upon the senses of their growing children. Pornography has become a mailbox menace.

This crime against society doesn't stop with youth. It promotes perversion in all people at all ages. It seeps poison into the minds of rich and poor. It reaches into all levels of society and destroys not only the morals but the principles of every person it touches.

Unbridled pornography is a disease that can ravage a nation, rob it of its strength, dissipate its talents, and lay waste its national heritage. History, itself, proves that either we must destroy it or it will destroy us.

There has been testimony of national importance to prove that American homes are being bombarded with the largest volume of sex oriented mail in history.

This mail is unsolicited, unwanted and deeply offensive to those who receive it.

There is no question that the law of our states and our nation must be strengthened to prevent this disease from spreading its infectious poison any further. Steps must be taken and ways must be found to deal with the people who make money out of pornography.

One of the things that moved me to take action myself against this menace was a note from a woman who refused to identify herself but just signed her plea "Desperate Mother."

She sent me a copy of a pornographic publication her 13 year old son had received through the mail illustrated with nude men and women in various poses called "Love's Picture Book."

Under it was the title—Love Lust and Pleasure. What startled me most was the fact that this unsolicited publication had come through the mail right out of my own city, the City of New York.

I am submitting this advertisement to this Committee for examination.

One may argue all he wishes about the right of free speech and the liberty of human expression but there are other rights involved. For example, the right of a person not to have his privacy invaded, the right of a parent to shield his child from what he may consider harmful, the right of a community to maintain high moral standards.

Sending obscene and lewd material through the mail benefits no one but the peddlers of smut. No one becomes richer except hoodlums and racketeers.

It is bad enough to see the newsstands cluttered with filth and perversion, on a scale never before known. It is difficult enough to find a theatre where one can take his child to see a good family movie.

However, in dealing with mail we have an even more serious problem because the mails reach everybody. It goes into every street, and every highway, and to every city, every region, every state.

I know the problem of control is difficult. I know there will be opposition to those of us who wish to stop this menace. We must be mindful of our constitutional guarantees, we must also respect our obligations to our families and the necessity of protecting our communities.

In the general distribution of smut liter- this Committee will come up with the kind of meaningful legislation that will stop the mails from being used to distribute this smut.

The bill pending before your Committee H.R. 10867 represents a new legislative weapon to be used in attacking this issue. I support the passage of this bill vigorously.

In the general distribution of smut literature our powers of control have become weak because the courts have had great difficulty in wrestling with this problem.

The mail, however, offers us the one field in which we can fight for regulation and protection to some extent. The mail which is under Federal control is the one area which we can take a giant step to combat pornography.

The law must be strengthened to stop promotion of the kind of advertising that goes through the mails, that reaches not only into the home, but into colleges, seminaries, churches, and even prisons. The peddlers and dealers of smut must be dealt with harshly and the punishment made severe enough to discourage those who would make a business of it.

Once the profit is taken out of smut, the evil of pornography will die or destroy itself.

I think the job of this Committee is not merely to find ways and means of combatting pornography in itself, but to help educate

the public, the parent as well as the children and the need to maintain a vigorous and healthy society, and the need to conduct a higher state of well being.

I thank you Mr. Chairman and the members of your Committee for giving me this opportunity to express my views.

I think it is an obligation of every Mayor to do what he can in his own City to fight smut and thus help the Congress in this area.

Mr. NIX. Mr. Procaccino, let me say to you I think it is most encouraging to this Committee that because of your deep concern over the pernicious evil that we have under discussion that you come here at a time that I consider you are at your busiest period in life to give us the benefit of your views and give the American people the benefit of your deep concern.

And I particularly wish to express my deep appreciation for the fact that you have come.

Mr. DULSKI. Thank you, Mr. Chairman. First of all I would like to apologize for being late, but as you know, Mr. Mayor, that we have many duties that we have to perform before we have a meeting, and I just want to join my friend from Pennsylvania who has been in the forefront as the chairman of this subcommittee, and the other members of this committee, leading the attack against smut that is being carried on in our mails today.

Of course, we had the privilege to be in New York City a few years ago when we were with quite a few members of a committee of citizens dedicated to removing smut from the mails and I just want to say that I am very happy that you have endorsed the bill before us and I am sure the testimony you have given us will give us a guiding light in a true way of dedicating ourselves to removal of smut from the mails.

I want to thank you and wish you every luck on November fourth.

Mr. PROCACCINO. I feel my trip has been worthwhile Mr. Chairman. Thank you, gentlemen, very much.

Mr. OLSEN. I want to join both of these gentlemen in commending Mr. Procaccino on his taking time from a very, very busy time. It demonstrates a genuine dedication to his point of view that he would come down here and take his whole day out of his campaign and I congratulate the gentleman. I sincerely hope that your message gets to the people of New York City, in this field and in all other fields, that they have the wisdom to elect a fine, leading Democrat to be Mayor of the City of New York. Thank you very much.

Mr. PROCACCINO. Thank you very much. Gentlemen, I didn't expect this. Thank you very much.

NATIONAL BUSINESS WOMEN'S WEEK

HON. WILLIAM L. ST. ONGE

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. ST. ONGE. Mr. Speaker, it is a pleasure to take note of the fact that the period of October 19 through 25 is National Business Women's Week. This event is being marked by the more than 3,800 Business and Professional Women's Clubs and their 180,000 members located in every State, the District of Columbia, Puerto Rico, and the Virgin Islands. During this special week the clubs will focus on the role of women in today's world by means of congresses of career women leaders.

The role of women in business and in the professions has grown tremendously in this century to the lasting benefit of every area in which women have become involved. In spite of the progress which has been made in eliminating the discrimination which has hindered their full participation in the past, much work remains to be done toward guaranteeing the equality of rights for women.

The Business and Professional Women's Clubs have made a most valuable contribution by building an active and informed electorate on the part of their members. Through these efforts we may look forward to an increasing participation of women in the political life of our Nation.

On the occasion of National Business Women's Week, I am glad to stress the role of women in the economic, political, and professional vitality of the United States. In addition, I commend to my colleagues the legislative platform of the Business and Professional Women's Clubs which contains many constructive recommendations worthy of our further consideration.

QUINCY WATER-INTAKE FACILITY

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. FINDLEY. Mr. Speaker, for over half a century the community of Quincy has gotten its water supply from the Mississippi River, which flows along the western border of the State of Illinois. Periodically, it has been necessary for the city to install new water-intake pipes at great expense and to repair and maintain existing ones, as the river has changed its course and as silt has covered up the pipes. Sometimes it was the meandering river which caused the problem. At other times it was due to relocation of the navigation channel by the Army Corps of Engineers, which was carried out as an aid to boats using the river.

From the turn of the century to 1959, the city was able to keep the water intakes functioning satisfactorily, but in that year the navigation channel was relocated and once again siltation began to cover up the last remaining intake pipe. The Corps of Engineers was responsible for relocating the channel, and one would think that therefore the Corps would also be responsible for the consequent siltation problem.

The citizens of Quincy cannot afford further delay. They must be able to plan for a new water intake facility, and they must begin that planning now. To wait any longer may bring on a severe and ironic water shortage in a city which is situated next to one of the largest rivers in the world. Therefore, I am today introducing special legislation which would authorize the Army Corps of Engineers to construct a new water-intake facility for Quincy residents.

SOCIAL SECURITY

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. ROSENTHAL. Mr. Speaker, I introduce today an omnibus social security bill which tries to take proper measure of the enormous role this program plays in our society and which tries, correspondingly, to correct the many deficiencies in social security today.

I have tried frankly to incorporate in my bill every worthwhile improvement which has been suggested since Congress last amended the Social Security Act nearly 2 years ago.

Our goal today should be, as it was in 1935 when Congress created the social security system, to secure social justice for the aged, the handicapped, and the poor.

Today 25 millions of Americans depend on social security for their existence. As our concepts of social and economic justice improve, we should add many more millions under this program.

Today one out of every eight Americans—the elderly, the poor, and the mentally and physically disabled—count on their monthly social security check for the essentials of a decent life.

It is true that two-thirds of all social security beneficiaries are able to maintain a level of living somewhat above the minimum poverty line. But it is also true that 8 million social security beneficiaries still live in poverty, and many millions more are discovering that despite the failure of Government criteria to classify them as poor, they are in reality, living in poverty.

MEDICARE AND MEDICAID

It is true that we now have medicare and medicaid. But it is also true that medicare and medicaid met only 70 percent of all health care expenditures of the aged in fiscal 1968; and the amount paid privately by the aged remains higher per capita than for the nonaged.

It is true that the average social security benefit for retired workers has been increased to $98 a month; for aged couples to $166; for aged widows to $86; and for disabled workers to $122. But it is also true that many people still get lower amounts, and about 2.8 million beneficiaries get the minimum benefit—a meager $55 for single persons, and $82.50 for couples. And it is also true that nearly 30 percent of the 25.9 million persons counted as poor in 1967 lived in households headed by an aged or disable person.

In short, the progress we have made in recent years toward helping the aged, women who must support families, the disabled, and others who need governmental help to live at a minimal standard of living—shrinks under close inspection. It has been paper progress, harshly undermined by reality. Our expenditures for social security compare unfavorably with that of Western European countries.

An efficient, up-to-date, and compassionate social security system is needed

to protect and improve the quality of human values for important segments of our population.

The legislation I am proposing today embodies the basic steps we must take toward this goal. Below are the highlights of my bill:

GENERAL BENEFIT INCREASE

I propose a 35-percent increase in retirement benefits with average monthly benefits of $133 for individuals, and $220 for couples, and minimum benefits of $100 and $150 respectively. Together with my plan for automatic cost of living increases to eliminate the effects of inflation, I could foresee a gradual total increase in monthly benefits amounting to 50 percent over the next few years. The key point is that the upward adjustment on monthly payments would be dependent on the general economic picture, and a tool to insure such flexibility would be built into the legislation.

Increasing the monthly benefits under social security is the heart of my bill. An aged couple or person living alone must no longer be asked to live on less than half the money available to a working couple or single person. We must reverse the shrinkage of social security benefits which met half of a couple average retirement budget in 1950 but which today meets less than one-third.

OLD AGE BENEFITS

My bill will allow anyone to retire at age 60 with full benefits. This proposed legislation will also restore to full benefits those who are already retired on early and reduced annuities. In addition, a woman with 120 quarters of work credit would be able to retire at age 55.

RETIREMENT TEST

My bill increases the ceiling on earned income for persons over 65—thus a person could receive social security benefits even if he earned $3,600 a year, and if he earned more, would have his benefits reduced only $1 for each $2 above $3,600.

DISABILITY INSURANCE BENEFITS

It liberalizes the definition of disability, eliminates unrealistically long time periods for disability insurance to become operative and in other important ways broadens the coverage for the blind and disabled.

MEDICARE

Medicare benefits will be extended and retained under my bill. The elderly spend three times as much on health care and service as other age groups—the greatest amount going to longterm care in hospitals or nursing homes, and out-of-hospital drugs. My bill reduces the age requirement for beneficiaries under medicare and removes the present limits on the number of days for which benefits may be paid for posthospital extended care services; for $1 per month, beneficiaries will be reimbursed for 80 percent of the cost of prescription drugs. Medicare coverage will be extended to Federal employees.

FINANCING

My bill would provide for Federal contributions from the general revenue to supplement the amounts now drawn from the funds earmarked for social security payments. The fact is that reasonable comfort cannot be provided to beneficiaries without this Federal participation.

OTHER FEATURES

There are a number of other features of my bill which have a significant impact on those affected. For example, full benefits would be provided to disabled widows and widowers regardless of age and to widows and dependent widowers at age 50. Parents of recipients and otherwise eligible widows who remarry would be eligible for benefits. Men and women at age 60 would be eligible for full benefits; women with 120 quarters of coverage could qualify for benefits at age 55. Single persons who support brothers and sisters, and unremarried widows and widowers, would have the same benefits rights as married persons. When a husband and wife both work, their earnings would be pooled to compute their benefits. States would be permitted, under Federal-State agreements, to provide coverage for hospital insurance benefits for the aged for certain State and local employees not covered by the insurance system established under the Social Security Act.

The changes in the social security system which I propose in my bill may sound generous, but actually make possible only a modest lifestyle for the elderly. The crucial point is that this legislation would reverse a disturbing trend; three out of 10 people 65 and older were living in property in 1966—and an additional one-tenth of the elderly in this country were on the brink of poverty. Many of these aged people did not become poor until they became old.

My bill will not eradicate poverty. But it will provide the retired, the widowed, the orphan, the disabled, the temporarily unemployed, with income sufficient to insure an adequate level of living. And that, to 25 million Americans may bring some comfort.

NATIONAL BUSINESS WOMEN'S WEEK

HON. SAM GIBBONS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. GIBBONS. Mr. Speaker, it is with great pleasure that I join my colleagues in saluting the National Federation of Business and Professional Women's Clubs and its 180,000 members as they observe National Business Women's Week.

Once again, this occasion gives us the opportunity to pay tribute to the millions of able and dedicated women who are making outstanding contributions in every segment of business and professional life in our Nation. Largely through their own determined efforts, American women have proved that ability and achievement need not be limited by sex. In recent years the doors of every profession have been opened to them, and they have been able to exercise their talents and capabilities to the maximum.

The National Federation of Business and Professional Women's Clubs has played a large part during the 50 years of its existence in raising the status of American women. It has sought to elevate the standards of women in business and professional fields, and has inspired many young women to leadership and outstanding community service.

I am proud to applaud the efforts of this fine organization as we celebrate National Business Women's Week.

REPORT TO CONSTITUENTS

HON. GARRY BROWN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. BROWN of Michigan. Mr. Speaker, earlier this year I sent the residents of Michigan's Third Congressional District a questionnaire designed to elicit their opinion regarding the pressing problems confronting them and their Representative in Washington. I was most pleased to receive over 13,000 responses, many of which contained additional helpful comments. It is interesting to note that approximately 70 percent of the questionnaires returned favored direct election of the President.

I am reporting the results of my poll in my newsletter to constituents and thought other Members might be interested. I therefore am inserting at this point in the RECORD, my "Washington Report" and the results of my questionnaire stated in percentages:

WASHINGTON REPORT

DEAR FRIENDS: The 91st Congress is now a little over eight months old. Some political analysts are saying that, in that time, it has shown little sign of life. In my judgment their diagnosis is less than accurate. The first months following the organization of any new Congress are traditionally devoted to study, drafting of legislation, and hearings on pending bills. In turn, the speed with which legislative proposals are reported out of Committee and brought to a vote in the House depends upon the coordinated impetus supplied by the President and Committee Chairmen. When these latter forces are fellow partisans, the impediments to prompt action are easily brushed aside—when the politics and philosophy of the President are different from those of Committee Chairmen, messages from the White House proposing legislation do not receive the automatic "green light" from the "traffic officers"—the Committee Chairmen on the Hill.

It should, therefore, be constantly kept in mind that a new Administration in the White House does not effect a change of administration in the Halls of Congress. We have a new President, but we in Congress still have the same leadership, the same Chairmen.

Some may promptly criticize this fact of life as permitting "politics" to override public welfare. I cannot agree, although I do feel a more consistent, responsible government results when a President has a receptive ear in the leadership of the Congress. I think the Congress should take an independent look at what the President is proposing, but that look should not be a furtive glance, predisposed to reject what the President is suggesting.

The foregoing should not be interpreted as praise or censure of the present situation in Washington. But, it is a fact that many Presidential proposals have been sent to the Hill, yet few have been seriously and actively considered by the appropriate Committees.

This may be characterized by some as a do-nothing, disinterested attitude by the Congress. Still, it should be remembered that even members of the outgoing Administration said this new Congress and this new Administration should spend most of their time implementing the programs, laws, etc., passed during the previous Administration rather than enacting new legislation.

The Banking and Currency Committee, on which I serve, is typical. We have been busier this year than in either of the previous years I have served in the Congress. We have had Committee meetings almost daily and have even had Saturday sessions. We have sought answers to many problems, including the prime interest rate increase, skyrocketing lumber prices, irregularities in the operation of Small Business Administration programs, housing programs, one-bank holding companies, urban growth, state taxation of national banks, and export control policies; yet, the Committee has had only two rather insignificant bills before the House for its consideration. Obviously, we will have an active fall and winter session of the Congress.

Although few truly important legislative proposals have been acted on by the Congress, the Nixon Administration has urged action in several areas deserving of mention. The rather bold reform of the postal system advocated by President Nixon, Postmaster General Blount, and supported by me, provides the potential for a better postal service whether one is an employee of the system or only a customer. The steps toward deactivation of our participation in the Vietnam conflict, selective service reforms, and his recently announced welfare and Federal assistance programs, are examples of the President's responses to the challenges of today.

They may be viewed as too little or too much; too fast or too slow; too costly or too austere, but, they represent attempts at improvement in each case.

SURTAX—TAX REFORM

Despite lack of formal action on some of these proposals, several tough issues have been faced and favorably acted upon by the House of Representatives. Foremost of these issues was the surtax and the related matter of tax reform.

I supported the extension of the surtax primarily because I thought it was the only responsible thing to do to help curb inflation and to make possible a balanced Federal budget, an essential element in stabilizing the economy while meeting the domestic and foreign demands of Federal policies and programs. It should be remembered that a slight reduction in the rate of inflation would have almost the same beneficial impact as a surtax reduction with respect to spendable income. Whereas inflation eats away at your purchasing power at the rate of 4% to 5% presently, the surtax amounts to only 2% to 3% for the average taxpayer.

Most of you have informed me of your displeasure over the impact our present tax structure has on the middle-income taxpayer. The tax reform measure passed by the House recognizes this inequity and provides significant relief to this group of taxpayers as well as specific relief to the low-income person. Much too comprehensive to discuss here, the tax reform bill adjusted the tax liability or imposed new tax obligations with respect to private foundations, heretofore tax-exempt organizations, charitable contributions, farm losses, tax preferences, depletion and depreciation allowances, capital gains, and numerous other special tax treatment areas or "loopholes" as they have been called. Applauded by many, criticized by some, it is without doubt one of the most comprehensive tax revisions to have been acted upon by even one House of the Congress in many years.

Needless to say, it is not yet the "law of the land"; having been passed by the House of Representatives, it now must receive Senate approval. Those of you who feel changes should be made in the House-passed bill should contact Senator Griffin and Senator Hart. Not bound by the rules of our chamber, which prohibited the offering of amendments, the Senate can make such changes as it deems advisable.

I cannot conclude this part of these introductory remarks without commenting briefly on our over-all economy and fiscal situation. There are many indications that our economic well-being as a nation is improving and that the inflationary pressures may be subsidizing. To the extent that government policies have contributed to those pressures in the past, it can be said that the caution and hold-the-line attitude of the new Administration have helped.

Stabilization of our economy still poses this nation's greatest domestic challenge because of its impact on the resolving of other critical homefront problems.

RESULTS OF THIRD LEGISLATIVE QUESTIONNAIRE

[In percent]

	His			Hers		
	Yes	No	No response	Yes	No	No response
I. 18-year-old vote, ABM, Welfare:						
1. Favor extension of vote to 18-year-olds	34	63	3	36	60	4
2. Support President's proposal on deployment of ABM	52	40	8	46	38	16
3. Favor national welfare standards	56	34	10	57	29	14

	His	Hers
II. The Nation's economy:		
4. Should 10 percent income tax surcharge be:		
(a) Extended 1 more year	18	14
(b) Extended 1 more year at reduced rate	12	14
(c) Extended as (a) or (b) above only if Federal spending is cut	56	56
No response	14	16
III. Electoral reform:		
5. Preferred method for electing President:		
(a) Direct popular vote	70	70
(b) Use State electoral vote with modification	16	15
(c) Continue present system	10	9
No response	4	6

	His	Hers
III. Electoral reform—Continued		
6. (a) If (a) selected, should minimum be established	50	48
(b) If (b) selected, apportion electoral vote among candidates in relation to number of popular votes received	11	11
(c) Assignment of electoral vote in congressional districts by presidential plurality, and 2 "at large" electoral votes determined by total presidential vote in State	7	6
No response	32	35
IV. International trade:		
7. Extension of Export Control Act:		
(a) Renew without change	14	11
(b) Modify to accomplish a restrictive trade policy under which all free-world nations would apply same restrictions	43	41
(c) Liberalize trade policy to promote better trade and political relations with Eastern European bloc nations	25	23
No response	18	25
V. Vietnam:		
8. Vietnam policy:		
(a) Continue present negotiations	33	32
(b) Commence unilateral withdrawal of troops	29	34
(c) Increase military activity to effect military victory	32	25
No response	6	9
VI. Campus disorders:		
9. Solution to campus disorders:		
(a) Allow college administration complete jurisdiction	18	18
(b) Restrict Federal assistance to involved students	28	29
(c) Restrict Federal assistance to involved students and colleges where administrations do not take effective preventive steps	45	43
No response	9	10
VII. Social Security:		
10. Amendments to reform Social Security Law:		
(a) Liberalize outside income limitations	35	32
(b) Automatic cost of living increases	42	42
(c) Liberalize medicare benefits	3	4
No response	20	22

THE FORT CUSTER STORY

For the past two and one half years I have been working with Federal, State and local officials on resolving the problem of how to put surplus government-owned property at Fort Custer to the best possible use, both for now and in the future. Following is the status of the various proposals.

STATE PARK

I am most pleased to be able to announce that an exchange of land, under negotiation between the U.S. Forest Service and the State of Michigan for the past 18 months, has now been agreed upon. According to the terms, the State will obtain nearly 3,000 acres of Fort Custer land for public park and recreational use, and some 15,000 acres of undeveloped State forest land in the Upper Peninsula will be added to our National forests—a benefit for both governmental units. Although land appraisals in the UP will delay completion of the exchange for some months, arrangements are underway to make this land available under a license arrangement for hunting this fall and for other recreational purposes pending actual State acquisition.

NATIONAL CEMETERY

A lack of grave space in existing national cemeteries, and the non-existence of burial sites near urban population centers such as Detroit and Chicago, have created a national cemetery crisis of gigantic proportions. Recognizing the pressing need for expanding

our present system, I have introduced legislation to establish a national cemetery at Fort Custer. However, this bill and similar ones have been locked in Committee until legislative action is taken to first consolidate Federal cemeteries into one system administered by the Veterans Administration.

Because both the State and Federal governments recognize the significance of this issue, the State has agreed to withhold its interest in some 600 acres of excess property surrounding the present Fort Custer Post Cemetery until such time as Congress acts upon the question of expanding our national cemetery system. Thus, the way has been cleared for the creation of a cemetery at Fort Custer when the basic policy decisions I have described above have been resolved.

REGIONAL AIRPORT

Another recommended use of Fort Custer acreage was to establish a regional airport. The rough, wooded terrain was, in my judgment, more ideally suited to recreational use than to airport construction. The report of the Burke Airport Consultants and the Federal Aviation Agency concurred with this reasoning. Both recommended a location south of I–94 between Galesburg and Climax as the best possible site. I believe few will disagree that a new airport facility will be needed in the near future and will attract industry and stimulate the regional economy. However, the decision to proceed is properly a decision to be made by the citizens of Kalamazoo and Calhoun Counties who will vote on the issue. Should their decision be to go ahead, you may be assured I will do all in my power to help obtain the needed Federal funding to make the proposed regional airport a reality.

INDUSTRIAL PARK

The closing of Fort Custer has also given the City of Battle Creek and surrounding townships the chance to acquire some 1,892 acres of surplus property at the eastern and northern—most portions of the Reservation. Battle Creek City and Bedford Township officials have responded and have taken steps to obtain this property for industrial and residential development. Consummation of this aspect of the utilization of Fort Custer lands is expected to be finalized in 60 to 90 days.

We have tried to look at the whole picture—the most advantageous use of Fort Custer. By keeping in mind the location and acreage requirements of all the proposed uses of the Fort Custer land, we have been able to assure that each will have its place in the non-military development of this historic site. As a result, the entire Third Congressional District will benefit whether one's interest is in park and recreational activities, development of a national cemetery or furtherance of housing and industrial projects. For myself, it has been gratifying to participate in a project like this which will help meet the needs and desires of today's residents and future generations.

NEW MILITARY "ID" SYSTEM

To initiate Congressional action on inquiries involving a member, or former member of the Armed Services, it is necessary to provide my office with complete identifying information.

On July 1, the Army and Air Force instituted a *new identification system* for all personnel on active duty, retired, and in the reserve components. Issuance of the traditional "serial number" was discontinued and replaced by their civilian *Social Security number*.

Because of this new system, I ask that all future inquiries include the following data: Full name, grade, social security number, MOS or branch, current duty station.

The use of Social Security numbers to identify servicemen applies only to *Army and Air Force personnel*. The Navy and Marine Corps will not adopt this procedure until 1972. Therefore, be sure to advise me of his *military serial number* when making an inquiry regarding a member of the *Navy* or *Marine Corps*.

"SAFEGUARD"—THE ABM ISSUE

The Administration's controversial Safeguard missile defense system will soon be up for consideration by the House now that the Senate debate has culminated in a close, approving vote. As the lines of battle are drawn it appears that in the House the margin of victory will not be razor-thin as occurred in the Senate. The Armed Services Committee has approved ABM deployment by a 10–7 vote and approval by the entire House is considered likely.

This will be one of the toughest decisions to properly analyze I have had to face. I am predisposed to accept the decision made during the Johnson Administration as restrictively modified, but reaffirmed, by the Nixon Administration regarding the ABM program. I feel both Administrations in arriving at their decisions assessed the considerations of cost, relative priority in the context of national goals and objectives, current technology and the impact upon arms limitation and international relations. Both Administrations have decided an ABM system is necessary in the interest of our national security.

I have not blindly accepted these decisions. I have tried to examine completely and carefully all of the arguments in opposition to the proposed ABM system. Although cogent and convincing, and voiced by very interested and sincere spokesmen, public and private, these arguments against the proposed ABM system have not to date overcome what I believe to be the more convincing arguments in support of the President's proposal.

Probably no recent issue has been as energetically debated, formally and informally, as the ABM issue. Although, as I have indicated, I intend to support the appropriation which is being asked for full fiscal year 1970 for the system, I commend the in-depth study and well-articulated position of those who oppose the system.

It is truly unfortunate that mankind has not reached a stage of development in relations among men and between nations that would make unnecessary the use of our resources for tools of destruction or for devices for defense of ourselves and our nation. I would hope that progress will be made in arms limitation talks and in international relations so that it will not be necessary in the years to come to agonize over the decision we make this year. I reject the proposition that a decision to initiate the steps toward deployment of an ABM system this year commits one to support a continuance of the program in succeeding years. Our government can only be as successful as it is flexible in recognizing changes in conditions, circumstances, and technology rather than steadfastly adhering to decisions of the past.

BROWN BILLS OF INTEREST IN THE 91ST CONGRESS

H.R. 3778. To limit the categories of questions required to be answered and subject to criminal penalties in the decennial census of population and housing.

H.R. 3860. To establish a catalog of Federal Assistance programs to aid potential beneficiaries in identifying types of aid available, determining eligibility, and making applications.

H.R. 8267. To amend Internal Revenue Code to increase the deduction allowable for expenses of medical care of persons over 65.

H.R. 8973. To improve the operation of the Legislative Branch of the Federal government by instituting congressional reforms.

H.R. 10208. To authorize Federal Credit Unions to provide employment disruption insurance to member-borrowers.

H.R. 10483. To increase the membership of the Advisory Commission on Intergovernmental Relations by two members who shall be elected town or township officials.

H.R. 11563. To make the Export Control Act more effective and to promote a trade policy under which all free-world nations apply the same restrictive guidelines on products sold to Eastern Europe.

H.R. 11752. To improve the postal system by removing the Post Office Department from the President's Cabinet and establishing a Postal Service public corporation, owned by the Federal Government.

H.R. 11902. To promote public health and welfare by expanding, improving, and better coordinating the family planning services and population research activities of the Federal government.

H.R. 12064. Directs the Government Accounting Office to provide regular, annual scrutiny of government contracts of all executive agencies with respect to cost increases and delivery delays.

H.R. 12222. To amend the Food Stamp Act of 1964 thereby providing for a more effective food stamp program.

H.R. 12341. To provide for a National Cemetery at Fort Custer.

H.R. 12440. To provide for the more efficient development and improved management of national timber land thereby promoting long-range lumber supply and price stability.

FIRST ANNUAL CONSERVATIVE AWARDS DINNER

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. ASHBROOK. Mr. Speaker, I was indeed pleased to participate in the First Annual Conservative Awards Dinner held at the Sheraton Park Hotel in Washington, D.C., on October 4, 1969.

Jointly sponsored by the two leading conservative national publications and the two major conservative political action groups, the dinner was a success from every point of view. This was the first occasion on which the four sponsors, the American Conservative Union, Human Events, National Review, and Young Americans for Freedom, have joined together in presenting such distinguished service awards to conservative leaders in Congress.

Those present included many officials of the Nixon administration and Members of Congress who joined in applauding the distinguished recipients of the awards, our colleagues, Hon. JOHN J. WILLIAMS, U.S. Senator from Delaware, and the dean of the Iowa delegation in the House, Hon. H. R. GROSS.

At this point I would like to include an article from the October 18, 1969, issue of Human Events which describes the First Annual Conservative Awards Dinner.

The article follows:

CONSERVATIVE AWARDS DINNER

More than 300 leaders of the American conservative movement turned out Saturday

night, October 4, for the First Annual Conservative Awards Dinner at the Sheraton Park Hotel, Washington, D.C. The dinner was sponsored by the American Conservative Union, National Review, Young Americans for Freedom and Human Events.

The highlight of the dinner was the presentation of awards for outstanding congressional service to Sen. John Williams (R.-Del.) and Rep. H. R. Gross (R.-Iowa). The awards were bestowed by Rep. John Ashbrook (R.-Ohio), chairman of the ACU, who reminded the guests of how thankful Americans should be for the valiant work Sen. Williams and Rep. Gross have each performed in Congress for more than 20 years.

Sen. Williams, first elected in 1946, is planning to retire next year upon the conclusion of his fourth term and many times during the evening he was urged to reconsider. But the Delaware senator who has sparked so many important congressional investigations remained firm in his resolve not to run again now that he has reached age 65. The guests were disappointed, but had to admire a man who insists upon standing by his principles even if it means giving up a job he enjoys.

Rep. Gross, a conservative known nationally for the sharp "no" he so often hurls at various spending schemes, received perhaps the biggest ovation of the night when he turned to the subject of Viet Nam. "We should win that war," he said, "or get the hell out."

The evening's keynote address was delivered by columnist James J. Kilpatrick. While noting that opposition to foolish government programs was certainly necessary, Mr. Kilpatrick also urged conservatives to "apply their talents to affirmative answers to American problems"—problems like conservation, pollution, penal reform and low-cost housing. Conservatives have the proper principles at heart, he said, but "if I had only one political wish, conservatively speaking, I would wish to see us translate broad conservative principles more frequently into specific, affirmative action." Mr. Kilpatrick applauded those men and women who for so many years have volunteered their services to the conservative cause. He said that more than ever before their dedication was needed, because "there is much work to be done."

Other remarks at the dinner were delivered by William F. Buckley Jr., editor of National Review, and Robert Bauman, secretary of ACU and a former national chairman of YAF, who served as master of ceremonies for the evening.

Among the members of Congress who attended and joined in honoring two of their congressional colleagues were Sen. Strom Thurmond and Reps. Don Clausen, Jim Collins, John Hammerschmidt, Manuel Lujan, William Scherle, and E. Ross Adair.

Guests from the White House staff included presidential adviser Dr. Arthur Burns, speechwriter Patrick Buchanan, Special Presidential Assistant Dr. Martin Anderson, congressional liaison man Bill Timmons, "inspector-general" Clark Mallenhoff and presidential staff aides Mort Allin and Tom Huston. Among the other Administration appointees in attendance were USIA director Frank Shakespeare, Ted Humes of the Labor Department and Defense Department aides William Baroody Jr. and Jerry Friedheim. Other guests included John Mahan, chairman of the Subversive Activities Control Board, and Ken Towsey of the Rhodesian Information Service.

Also attending the dinner were such well-known conservatives as Holmes Alexander, Lemuel Boulware, Allan Brownfeld, Ralph de Toledano, Dr. Lev Dobriansky, Willard Edwards, Victor Lasky, Fulton Lewis III, Dean Clarence Manion, Neil McCaffrey, Stefan Possony, William A. Rusher, Phyllis Schlafly, George Schuyler, Paul Scott, Ken Thompson and Tom Van Sickle.

The sponsoring organizations hope that next year's dinner will be even better attended and that conservatives from all over the country will try to get to Washington to help honor two more members of Congress who, like Sen. Williams and Rep. Gross, have done so much to strengthen the conservative cause.

NATIONAL BUSINESS WOMEN'S WEEK

HON. SAMUEL N. FRIEDEL

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. FRIEDEL. Mr. Speaker, the occasion of National Business Women's Week, October 19 through October 25, coming this year during the 50th anniversary of the National Federation of Business and Professional Women's Clubs, presents us with a most appropriate opportunity to pay tribute to those women who have made a particularly significant contribution to our communities.

For myself, the selection of a truly outstanding professional woman who deserves special recognition was made easy for me, when earlier this year President Nixon nominated Mrs. Helen Delich Bentley of Baltimore, Md., to be Chairman of the Federal Maritime Commission. Mrs. Bentley will be sworn in on Monday, October 27, 1969, when she will become the first woman ever to occupy this vitally important post.

I was proud to testify in favor of her nomination before the Commerce Committee of the United States Senate earlier this month, and I would like to share with my colleagues the remarks I made at that time:

STATEMENT OF HON. SAMUEL N. FRIEDEL

President Nixon has made a wise choice in his selection of Helen Delich Bentley to fill this important post. When the President announced Mrs. Bentley's nomination he stated, "she has established a record of professional excellence unsurpassed by any maritime expert in the country." In this judgment, I agree with the President one-hundred per cent.

During her distinguished career as Maritime Editor of the Baltimore Sun, Helen Bentley has been recognized throughout the world as one of our foremost contemporary writers on maritime affairs. She has gained this recognition and also gained the respect of the men who man the ships, the longshoremen on the docks, the ship owners, and Members of Congress, who are concerned with our Merchant Marine, because she works hard and is not afraid to go where the action is.

From the docks in Baltimore, to the military bases in South Vietnam, to the icy Northwest Passage, Helen Bentley goes where the ships go and writes about them from first-hand knowledge.

For many years she has warned us of the alarming decline in our Merchant Marine, and the growing threat to our commerce and trade, posed by the buildup of the Soviet merchant fleet. Although her primary concern as Chairman of the Federal Maritime Commission will be the regulation of services and the rates of our waterborne commerce, I am confident that she will work closely with the Federal Maritime Administrator in insuring a maximum effort to revitalize our Merchant Marine.

And while I normally am not a betting man, I am confident enough to make a small wager—that Mrs. Bentley will be wearing a brand new hat the day she is sworn in."

EDITORIAL PRAISING POST OFFICE

HON. ARNOLD OLSEN

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. OLSEN. Mr. Speaker, on October 2 and 3, the CBS affiliated television station here in Washington, WTOP, Channel 9, carried an editorial critical of the part played by unnamed postal unions in opposing the administration's postal corporation plan. That editorial has been brought to the attention of the Members. However, Station WTOP, on October 3 and 4, carried an editorial of rebuttal by Don E. Dunn, national executive vice president of the United Federation of Postal Clerks. For the benefit of those Members who may have been back in their districts that weekend, I am inserting a copy of Mr. Dunn's editorial in the RECORD:

STATEMENT BY DON E. DUNN, NATIONAL EXECUTIVE VICE PRESIDENT, UNITED FEDERATION OF POSTAL CLERKS, AFL–CIO

Station WTOP poorly serves its public by scolding un-named postal unions for fighting the postal corporation scheme.

The postal service is not on the brink of disaster. And we in the United Federation of Postal Clerks think we know more about it than the author of the offending editorial.

Just today, for example, we moved 270 million pieces of mail. That's more letters and packages than there are people in the United States.

In the course of just one year our members will move 80 billion pieces of mail—a figure that exceeds the number of seconds that have ticked by since the death of Julius Caesar.

In the context of this enormous volume anyone who tries to translate occasional human error into sweeping generalizations of bad service just doesn't know what he's talking about. It's like saying that because direct dialing doesn't always work the phone company ought to be turned into a government monopoly.

WTOP also goofed when it claimed the administration has given us a major concession by agreeing to binding arbitration in postal labor disptues.

Not true. The administration would bar us—but not management—from initiating such arbitration unless a separate federal panel decides first that our complaint is justified. Even the New York Times in an editorial last month called our objections to this procedure "reasonable enough."

We see nothing reasonable either in depriving us of our right to appeal to Congress without some offset such as the right to strike. And that really is the heart of the issue right there.

There's nothing wrong with the postal service that can't be cured by paying decent wages and by treating its employes as human beings with rights equal to those of other American working people. Lacking these, nothing can save it.

SDS EXPERIMENTS WITH WORK AND CLEAN LIVING

HON. JOHN R. RARICK

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. RARICK. Mr. Speaker, the clairvoyance of the U.S. Supreme Court ruling that American citizens have a constitutional right to travel in Communist countries—although, apparently, not in Rhodesia—may prove fruitful on several accounts:

First. Further the education of recruits with a firsthand experience at work.

Second. Give the People's Volunteer Corps a firsthand encounter of living the clean life under a closed society under a Communist dictatorship which does not tolerate such progressive freedoms as marihuana and fornication.

Third. Castro can exploit for propaganda purposes our youth as examples of capitalist decadence.

Fourth. While they are out of the United States, the American people can enjoy a brief respite from their activities.

Perhaps someone should advise the sugar volunteers not to try to liberalize the power structure in Havana—lest the respite be permanent.

[From the Washington Evening Star, Oct. 22, 1969]

ONE HUNDRED AND FIFTY FROM THE UNITED STATES TO HELP IN CUBA

(By Michael Anders)

More than 150 Americans have registered so far to work for two months without pay in the Cuban sugar cane fields this winter.

Radical organizers of the "Youth Brigade" ultimately hope to sign 300 workers from across the nation for the work tour beginning Nov. 30. A second two-month work tour of 300 persons is set for Jan. 30.

The organizers said the harvesting invitation was extended by the Cuban government after such a work force had been suggested by several Americans there this summer. The Cuban government has agreed to provide housing, food and support facilities.

When the group leaves, it will be the largest batch of Americans to visit Cuba since Premier Fidel Castro knocked Fulgencio Batista out of power in January 1959. Castro is pushing for a sugar harvest of 10 million tons in "The Year of the Decisive Effort," symbolic of his decade as Cuba's leader.

The U.S. State Department, unaware of the planned trip until queried yesterday by a newsman, said it was powerless to interfere due to a recent U.S. Supreme Court decision allowing citizens the right of unrestricted travel. The Department formally still denies citizens, however, the privilege of franchising to certain Communist-bloc countries including Cuba.

The trips are being coordinated by a nameless, loosely-organized group with a six-man executive board. Members include Julie Nichamin, a member of Students for a Democratic Society and the North American Congress on Latin America; Carol Brightman, editor of Leviathan Magazine; Lucas Daumont of SDS, and Phil Hutchison of the Student National Coordinating Committee. Two seats are vacant.

Bruce Jacobs, a staff member, said in a telephone interview from his New York headquarters that the volunteers are being forewarned that they face hard work and that their living conditions will be the same as those of Cuban workers.

The application form states that volunteers must obey all Cuban laws and explicitly warns that marijuana and other drugs and narcotics will not be tolerated because of the "very stringent" drug laws there.

Dormitory facilities, consisting of huge tents and barracks, are to be sexually segregated at the request of the Cuban government, Jacobs said. There will be no accommodations for couples.

Jacobs said the group hopes to recruit an equal number of blacks, whites and Latin Americans for each trip. He said the trip is not for "politically sophisticated people" but for the average young American who "wants to see what a revolutionary and socialist society is like. . . ." Teenagers under 18 must have parental permission.

Still to be definitely settled, according to Jacobs, are the embarking point, mode of transportation and financing. The organizers are hoping the Cuban government will pick up the transportation tab but have raised several thousand dollars in the event Castro does not.

A State Department spokesman said although "we can still deny people the right to travel to certain countries, we can't prosecute them."

"If they want to go, the Department of State is not going to wring its hands," he added. "But suppose the kids get into trouble?

"They find themselves up to their eyeballs in trouble and then we have parent trouble and congressmen calling us."

In Washington, Bert Garskof, the local organizing chairman for the harvest, said the response has been excellent although the drive started only last week. He could not say how many persons have registered.

A SALUTE TO THE BUSINESS AND PROFESSIONAL WOMEN OF AMERICA

HON. SPARK M. MATSUNAGA

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. MATSUNAGA. Mr. Speaker, I consider it an unusual privilege for me to join in this well-deserved salute to the business and professional women of the Nation during the observance of National Businesswomen's Week.

Over the past 50 years, the pride and the promise of the National Federation of Business and Professional Women's Clubs have been reflected in the outstanding accomplishments of its members in the economic, social, cultural, business, and professional life of our Nation.

As the sponsor of House Joint Resolution 370, proposing an amendment to the Constitution of the United States relative to equal rights for women, I was pleased to note that the NFBPW endorsed this legislation at its 1969 national convention in St. Louis, Mo.

Mr. Speaker, I believe it is in order that we extend our congratulations to the 180,000 members of the federation throughout the United States, the District of Columbia, Puerto Rico, and the Virgin Islands. May the next 50 years of progress for the women of this Nation be as golden as those of the past half century.

NICKEL STOCKPILING

HON. JERRY L. PETTIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. PETTIS. Mr. Speaker, I wish to express my support for the legislation proposed today by our colleague from Illinois (Mr. ANDERSON) aimed at ameliorating the present tight nickel supply situation confronting thousands of user firms in this Nation. To those fellow Members who might not have affected businesses in their districts, or to whom this problem is aline, let me emphasize that the nickel supply picture is indeed desperate. When I hear from companies in my own 33d California District that their very existence is threatened by the nickel shortage, I believe them because their cases are amply documented and I have to feel that there must be thousands of similar type firms around this country facing an equally uncertain, precarious future.

Allow me, please, to pass among just one pertinent quote from a letter which I have just recently received from a company in San Bernardino County. Here is what the head of a Pomona electrochemical company says about the shortage:

> If this severe condition continues we will not only have to pay a ridiculous premium, but we will not be able to obtain nickel, period. Being in the nickel-plating business this means we are out of business, unless we we are able to obtain some kind of relief in securing nickel supplies.

What that reflects, and what has been stated in previous correspondence, is a series of frustrations in trying to obtain nickel either from suppliers or from the national stockpile. I believe that our colleagues here will realize that this is not any lobby-inspired or frivolous letter. This is the plea of an individual company president who is virtually standing on the brink of financial disaster. And it is my hope that every Member will keep this in mind when the time comes for definitive action on this bill.

The provisions of this legislation pose no threat to our national defense supplies. What we are seeking, simply, is congressional approval for the immediate disposal of 15,000 short tons from the national stockpile. This would leave untouched 35,000 short tons, which is 15,000 more than what the Office of Emergency Preparedness considered essential from January 1967 up until May of this year. Furthermore, we would not tap the 2,000 additional tons available to the Treasury Department for coinage purposes. I will conclude with the ardent wish that our colleagues recognize the validity and worthiness of this proposal and give it the support it deserves.

URGENT NEEDS OF THE AGED

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. PEPPER. Mr. Speaker, it was my privilege to be the first Member to testify before the House Way and Means Committee at its opening public hearings on proposals to improve and expand our social security and medicare system. I feel most urgently the need to act now to meet the acute needs of our older citizens and I include my statement in the RECORD:

STATEMENT OF THE HONORABLE CLAUDE PEPPER, A U.S. REPRESENTATIVE FROM THE 11TH DISTRICT OF THE STATE OF FLORIDA

Mr. PEPPER. Thank you very much, Mr. Chairman, and members of the committee.

It is a great privilege and pleasure for me to appear before this very distinguished Committee on Ways and Means in behalf of the many thousands of older citizens in my congressional district and the many millions in our nation who depend upon the Social Security System for the hope of living out their remaining years with some measure of security and dignity.

I have always been an ardent supporter of this system, and I am proud to have had some part over the years in improving and expanding its provisions, especially into the area of hospital and medical care.

The Social Security System, although still far from perfect, is one of the major achievements of humanitarian social policy which the Congress has ever adopted. In its one-third of a century of existence, it has become the firm and indispensable foundation of our social defenses against the fear of poverty and dependency which so often has prevented the average citizen from approaching old age with any degree of hope and anticipation of repose and reward for a long life well lived.

Today, 92 per cent of all of our senior citizens, 65 and over, rely upon the old-age insurance program for a significant part of their incomes. Many millions more rely upon the provisions for early retirement, for total and permanent disability, and for the protection of surviving mothers and children.

You in this committee and we in the Congress, should not shrink, however, from the fact that an inadequate income is still the number one problem of one-third of the 20 million Americans now over 65 years of age, and we cannot hide from the reality that an inadequate income will continue to be the number one problem for years to come if we continue to allow inflation to outrun our best efforts to improve the Social Security System.

The fear of facing poverty in their retirement years also plagues new millions in the younger generation. They have but to look around them to see that the fundamental economic problems of old age are still unsolved.

I feel most strongly that we in the Congress must act now to remove the threat of poverty from our elderly and enable them to enjoy meaningful retirement years.

The economic events of this year have already outrun the principal provision of the bill, H.R. 1273, which I introduced early in this session. I proposed at that time a 15 per cent across-the-board increase in monthly benefits and an increase in the minimum primary benefit from $55 to $70 a month. I had hoped that in addition to compensating for some increase in the cost of living, we might give Social Security beneficiaries a real increase of some 10 per cent in their standard of living.

Now, I believe nothing less than a 25 per cent increase, effective immediately, will offset rising living costs and give a meaningful increase in real benefits. I have asked the Social Security Administration to give me a benefit table based upon a 25 per cent increase and a minimum primary benefit of $80. I have not yet received this table and have, therefore, not introduced new legislation incorporating this proposal. I intend to do so at the earliest possible date and make this information available, as it will be, of course, to the committee.

An immediate 25 percent increase in benefits is required to offset the nearly 10 per cent increase in the cost of living since the last benefit increase, which went into effect on February 1, 1968. This inflationary rise in the cost of living for our older citizens makes a 10 per cent benefit increase, effective April 1, as proposed by the Administration, totally inadequate to the needs of the aged or to our responsibilities as Members of the Congress.

I feel we should adopt a cost of living provision to raise Social Security benefits automatically in the future. But I do not feel we should lock our older citizens into benefits at their current standards of living. We must, I think, make significant improvements in the benefit level at the same time. Indeed, I believe we should incorporate provisions in legislation now which would provide for a real increase of at least 50 percent over the present level of benefits. This increase might well be staged over several years. But I favor making the decision to raise the living standards of our senior citizens now.

I also believe, as I mention later in discussing my bill, H.R. 5849, that we might well experiment with the principle of the guaranteed minimum income by appying it to our senior citizens who have little opportunity to work and who are not expected to compete in the labor market. We could begin, I feel, by guaranteeing a $100 a month income to our older citizens, supplementing Social Security and other incomes with direct payments from the Treasury.

Now, that is simply to guarantee that from all sources, Mr. Chairman and members of the committee, an older citizen would receive $100 a month, and I don't see how anybody can expect anybody to live in America today on less than $100 a month.

At this point, Mr. Chairman, I wish to urge, as I have urged previously, that you include in your legislation raising Social Security benefits provisions which would prevent the poorest of our Social Security beneficiaries from losing the supplementary payments made to them under the Public Assistance Program. I hope you will also provide that our veterans will not have their benefits diminished, but that they also will get the full benefits of any Social Security increases. We should not let the technical provisions of our public assistance and veterans programs deny to the poorest of our citizens and to our veterans the full benefits of the better living standards which I hope the Congress will approve at this time.

In H.R. 1273 I also recommend what I believe is a fairer system of computing benefits on the average of the five highest wage years rather than on the present basis using all years except the lowest five. And, incidentally, that precedent has been just established by the Congress in respect to Federal employees.

Another change I propose would help the 2½ million widows now receiving inadequate Social Security benefits. At this time the average benefit paid to widows is only $86 a month which is considerably lower than the $100 average monthly benefits paid to retirees. I do not understand why widow's benefits should be so much less. Therefore I am proposing that their benefits be increased to 100 percent of the deceased husband's benefits. These benefits should also be increased as the cost of living increases.

In addition, I introduced H.R. 10754 which amends Title II of the Social Security Act so that a widow or widower would retain a larger portion of insurance benefits when he or she remarries.

The social security program benefits more than just the aged. For years I have wanted changes in easing disability qualifications, and I remember, as do many of you who have been here a long time, the struggle we have had back over the years to try to get the benefits payable to the disabled at an age lower than the age at which they are entitled to Social Security. Under the present law a blind person under 55 years of age is not able to qualify for disability benefits on the same basis as older blind people. Older blind people who are unable to do a job calling for the skills they used in their previous work are eligible for benefits even though they can do other types of work. I feel that we must act now to liberalize the qualifications under Title II governing eligibility of blind persons so that every person who is blind and who has at least 6 months of coverage will receive disability insurance benefits.

What does age have to do with it, Mr. Chairman, and members of the committee, if a person is condemned to the eternal darkness of night?

In addition, as I provided for in H.R. 1273, the waiting period for receiving disability insurance should be reduced from the present 6 months to 3 months and the requirement that a disability must last for a continuous period of at least 12 months or consumate in death in order for a worker, widow or dependent widowers to receive benefits should be eliminated. People who are disabled need benefits immediately. All you need to do is to establish the character and assurance of the disability and not have the arbitrary waiting period.

I say people who are disabled need benefits immediately and any delay may complicate their disability and their rehabilitation.

I also introduced in the 90th Congress and have introduced in the 91st Congress in H.R. 1273 a necessary provision to make Medicare benefits available to all those receiving disability benefits. There is no doubt that disabled Social Security recipients have a great need for Medicare in view of the simple truth that medical costs are high and their incomes are too low to cover the costs. The Social Security Administration says that as many as 54 percent of the disabled receiving benefits today are without some kind of health insurance and that their costs are three times the comparable costs for older people now under Medicare. We must make it a right for the disabled to be eligible for Medicare. For many it would be their sole means of meeting medical costs.

Another serious problem concerns me, and I am sure every member of this committee, which is why I introduced a provision in this bill that would further amend the hospital insurance program. I would like to see Medicare cover the cost of prescription drugs for our elderly. Medicare is not fully meeting the needs of our elderly as long as they are burdened by the cost of prescription drugs. As I have emphasized over and over again the major item in medical expenses is the cost of drugs. I only have to repeat the statement by the August 1968 task force on prescription drugs set up by the Department

of Health, Education, and Welfare to point out the severity of this problem. The task force concludes in a 1968 estimate "that 20 per cent of the elderly would have no drug expenses, while the costs would be less than $50 for 41.5 per cent, between $50 and $99 for 19 per cent, between $100 and $249 for 15.5 per cent, and $250 or more for 4 per cent."

In light of these figures we know that Social Security recipients could only afford adequate drugs if they were reimbursed under the Medicare program. I strongly feel that the cost of prescription drugs should be a reimbursable medical expense under the supplementary insurance program.

The last provision in H.R. 1273 would authorize the financing of the supplementary medical insurance program (Part B) from general revenues. I feel that the Social Security program has become such an integral part of our national economy that it should be fully integrated into the Federal budget. This step can begin by eliminating the monthly charge for medical insurance and transferring this charge to general revenues. This small change would aid poor people and at the same time only cost the Federal Government $940 million a year—not a large amount when its purpose is to rid the effects of poverty from our nation's citizens.

We in the Congress must also give firm attention to another principle which I have embodied in my bills. I introduced H.R. 5849 because I firmly believe that it is of immediate importance to this nation. Today's Social Security recipient who has the will and the ability to work is punished for his initiative, yet we continue nurturing this system.

I do not deny, Mr. Chairman, that under the economic conditions which prevailed in 1935, when this great measure of social security was inaugurated, the concept was the one that we have followed since that time, but I do respectfully submit that the time has come when the Social Security System must not be thought of as a way of getting people off the work rolls and into retirement so there can be jobs for the younger citizens. I think the Congress committed this country in 1946 to the principle that it was the duty of the Government of the United States not to provide everybody a job but to provide an economic climate in which everybody ready, willing, and able to work could work, and that did not exclude older people.

I know you have your problems in funding it, but I respectfully submit that the time has come for us to admit, as I think we should candidly, that any recipient of Social Security should be permitted to draw whatever the law allows and to work and derive as much from earned income as that individual can earn and not have his or her Social Security benefits diminished on account of whatever the earnings may be. They aren't going to earn too much, most of them, but it would simply enable them to have a higher standard of living.

Senior citizens must be able to work indefinitely and still reserve their social security benefits. And, as you know, I happen to be 69 years old. If anybody were to tell me that I had to quit work, that I couldn't be active and try to do something, I know life would fade in significance, in meaning to me and it is that way with a lot of other people who pass the age of 65.

Give them an incentive. If they want to work, give them an opportunity to work and, at the same time, don't deprive them of their Social Security benefits to which at least they have contributed half of the cost.

I commend this great committee and the Congress for the relaxation of those restrictions from time to time, but I have long believed that we should relax them entirely.

Just raising the income limits in the retirement test as proposed by the present Administration's bill is not enough nor is it at all acceptable to a nation that prides itself on hard work. I have been a long time advocate of supporting any system which encourages one's ambition to work for a decent living. I do not believe the Federal Government should implement any programs contrary to this ideal.

This is why I urge the passage of my bill H.R. 5849 which removes completely the limitation upon the amount of outside income an individual may earn while receiving benefits under the Old-Age, Survivors and Disability Insurance program. The retirement test for all Social Security beneficiaries and for all survivor annuitants under the Railroad Retirement Act must be eliminated.

In addition this bill provides a new title, Title XX, which is guaranteed minimum annual benefit for every person reaching 62 years of age who has an annual income of less than $2,400 in the case of a head of a family and $1,200 for an individual not supporting a family. This would mean providing a guaranteed minimum income of $100 a month per person or $200 a month per couple.

These benefits would be paid on a monthly basis unless benefits payable to an individual for any month is less than $5 in which another plan would be implemented. The amount of benefits received would be determined by the total amount of annual income any individual receives during a calendar year and benefits would come out of general revenue.

All I am suggesting is that we assure that every individual 62 years of age or over be able to receive from all sources, including Social Security, a minimum income of $100 a month.

In conclusion, I would like to say that the Congress over the years has taken great steps of improving the Social Security Act which so many citizens in this country depend upon for part or complete survival. There is still, however, an urgent need to do more. We must not rest until we assure Americans an opportunity for a good life. At a time when all Americans are concerned with priorities we must advise all our colleagues to reflect the needs of the real world by immediate passage of my very necessary amendments.

Mr. Chairman, and members, I add only this: A few weeks ago I went down to the southern part of Miami Beach, which is one of those typical American paradoxes where a lot of very rich people are living contiguous to a lot of very poor people. We had about three or four hundred, I suppose, in a hall which we were addressing and talking to them primarily about Social Security matters. I asked them, "All of you who are living on Social Security hold up your hands," and nearly every one of them held up their hands. All these were older people.

I said, "All of you living on less than $100 a month hold up your hands."

Well, I am sure at least 75 percent of them held up their hands.

I said, "All of you living on, getting less than $75 a month hold up your hands."

Well, I am sure between 50 and 60 percent of them held up their hands.

Now, the City of Miami Beach has just passed a rent control ordinance trying to protect those old people down there on South Beach, who are living in conditions that should be shameful to us. I am going from here to an appointment to see if we can't get some help for better housing for this area, but if they had a little bit better income they could pay a little bit more rent. It is just hard for us to realize how many people in this country in the midst of plenty are really living in poverty.

The great Chairman of this great Committee has done a marvelous job for the people of this country and I know you are going to continue to press forward, making things even better for these people so we can finally realize, in Browning's words, "Grow old along with me; The best is yet to be; the last of life, for which the first was made."

As a senior citizen, I salute you, Mr. Chairman, and members of the committee.

LEGAL AID PROGRAMS

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. EDWARDS of California. Mr. Speaker, one of the most controversial, but most worthwhile programs in the antipoverty program, has been legal aid to the poor. The efforts of such organizations as the Legal Aid Society of Santa Clara County, California Rural Legal Assistance, and the Legal Assistance Center of Washington Township have been controversial because they have been effective. At one time the journalistic profession took as its motto the job of "comforting the afflicted while afflicting the comfortable," while many members of the legal profession took the role of "comforting the comfortable while afflicting the afflicted." Today, the legal profession, through such organizations as the Legal Aid Society, has reversed that role.

By taking up the challenge of providing everyone, including the poor and the minorities, with equal protection under the law, these lawyers are attacking a system which has long needed attack. We all know of the truth in the statement that the rich do not go to the gas chamber, or to jail for drunken driving. But the poor, without legal defense, have not been so lucky. They have no guarantee of equality under the law, acquittal when innocent, or protection from those with money enough to hire attorneys. It is natural that such a radical concept as equal protection under the law should come under attack. It is also natural that some of those in authority should be angered when their decisions, sometimes arbitrary, are put under attack.

A county board of supervisors, which denies hunger exists in a rural county, may well be incensed when another government agency challenges that fallacy and takes it to court in order to make it provide food-stamp programs. Equally, when a store has for years abused the collection provisions of the law, or a slum landlord has abused his tenants, then it comes as a rude shock when the rights of the poor are protected. Sadly, not all of the above examples are content with equal justice under the law and they have rallied powerful forces in support of their demand for more than equal protection under the law for the rich and powerful.

Yet, such organizations as the Legal Aid Society, Legal Assistance Center of Washington Township, and California Rural Legal Assistance have proved one

of our best hopes for continuing and improving the society in which we live. The kind of conditions they are attempting to correct are the kind of conditions which breed revolutions and revolutionaries. Our problem today is not with those disenchanted with the system, but making the system work so that all can live under it. The keystone for bringing peace to this society is in providing and making work the guarantees which are written into our Constitution. Such talks may sound revolutionary, or too idealistic, or irrelevant, but I do not believe so. I am one who believes in the American system and I believe that it can be made to work. I am proud that fellow members of the legal profession are setting out on this task, and I am proud of this new generation of attorneys who are more interested in justice than in money.

I cite the work of the Legal Aid Society and the California Rural Legal Assistance as examples of this new breed and new concept.

Dick Flood, San Jose Mercury-News staff writer, an excellent reporter who has done much to make known the complexities and the problems of living in the Santa Clara Valley, reported on the activities of the Legal Aid Society in Sunday, October 19, 1969, edition of the Mercury-News. I include his report in this RECORD.

In addition, at the request of Marc Poché, a professor of law at the University of Santa Clara and my executive assistant, the California Rural Legal Assistance has reported on some of its most significant cases. I include that report in this RECORD.

The reports follow:

CALIFORNIA RURAL LEGAL ASSISTANCE,
Gilroy, Calif., August 6, 1969.

Hopefully the following will serve as a summary of some of the more significant cases this office has handled (for constituents of Mr. Edwards or persons representing a class including constituents of Mr. Edwards) since I became Directing Attorney on October 1, 1968:

(1) A class action against a major multi-store California retailer. (The settlement agreement provides that neither the defendant's name nor the precise infraction involved may be publicly dicussed.) The terms of the settlement agreement bind the defendant to cease and desist from filing improper litigation and to set aside upwards of ten thousand judgments which it has irregularly obtained against its customers in the past five years.

(2) *Hernandez* v. *Hardin* U.S.D.C. #50333—as a result of a temporary restraining order issued against the Department of Agriculture in this action every California county now has a Food Stamp program.

(3) *Macias* v. *Finch* U.S.D.C. 50956—action to overturn welfare practice whereby persons fully employed (but making less than their actual needs as calculated by the Welfare Department) are not eligible for a welfare grant to supplement their income up to their minimum actual needs. Under this rule, a family can receive funds sufficient to meet its minimum actual needs only by refusing to work and going on welfare. Case is now under submission before a three-judge federal court.

(4) *Jenish* v. *State of California* U.S.D.C.—Action to challenge welfare rule by which families in need of Aid to Families with Dependant Children (because the father has deserted the family) are ineligible for welfare for three months from the date of the desertion unless the mother divorces the father. The rule is challenged as discriminatory against Catholics and as depriving women who desire to reunite their families of the opportunity to do so.

(5) *Cline* v. *Credit Bureau* Cal. Supreme Court—Action to challenge prejudgment wage attachment. Wisconsin prejudgment wage attachment statute (which is very similar to California's) was recently declared unconstitutional by the U.S. Supreme Court. The Court found that a statute allowing attachments without notice, hearing or preliminary finding of liability deprived low-income Defendants of due process, right to counsel and opportunity to defend themselves. Not being able to survive while their income is being attached, they are forced to compromise with alleged creditors.

(6) *Perez* v. *Russo; Russo* v. *Perez,* Santa Clara County Superior Court—Action to enjoin a slumlord from evicting a tenant because she complained to housing authorities and because she engaged an attorney; also seeks damages and return of rents because the premises were in massive violation of health and safety code requirements.

Although there are three or four other important cases, this letter has probably occupied too much of your time already. If you are interested, please phone me or drop me a note and I'll send a supplemental letter. Thank you very much for your kindness.

Yours very truly,

DON B. KATES, Jr.,
Attorney at Law.

LEGAL AID ATTORNEYS BRING EQUAL PROTECTION OF LAWS TO POOR

(By Dick Flood)

Equal protection of the laws, a byword of the social revolution, has become a reality for thousands of Santa Clara County residents through the efforts of a hard-working band of young attorneys.

The 11-member staff of the Legal Aid Society, headed by acting chief attorney Leon Poe, last year provided free legal help to no less than 5,216 county residents, 92 per cent of whom had incomes below the federal "poverty line" and 47 per cent of whom earned less than $1,500 a year.

Cases handled by Legal Aid attorneys ranged from consumer and domestic problems to major class suits designed to bring about peaceful change within government and educational institutions.

Beneath the froth of day-to-day legal problems of the poor, staff attorneys put in long hours advising community organizations, providing "Preventive education," and developing and pursuing legal, administrative and legislative reforms in areas adversely affecting the poor.

According to Poe, the salaried staff members put in an average 55-hour work week. A non-attorney, Dee Harris, was recently hired to take charge of community education and seven IBM Corp. attorneys have volunteered their evening hours to free regular staff to work on major issues.

Legal Aid offices are located at 235 E. Santa Clara St., San Jose; 222 S. Jackson St., Jose; 111 Willow St., San Jose; and 377 S. Murphy Ave., Sunnyvale.

Funded with a $300,000 anti-poverty grant and directed by the Legal Aid Society board, the program has been designated by federal officials as one of those which will be continued if the embattled Economic Opportunity Commission is disbanded.

Perhaps the most far-reaching action since the program started in June, 1967, is the society's attempt to abolish the tracking system in Santa Clara Unified School District and the ability grouping system in the East Side Union High School District.

A petition for injunction pending before the U.S. District Court in San Francisco declared that children of Mexican descent and their parents are denied equal protection of the law by the ability grouping system.

Disproportionately large numbers of children of Mexican descent are placed in "lower" ability groups, including those for "mentally retarded" and "educationally handicapped" children, and a disproportionately large number of them fail to complete high school or to go beyond the 12th grade as a result, the suit alleges.

It challenges the validity of group tests, given in standard English, to place students in ability groups. Such tests, the petition declares, "cannot provide meaningful or accurate information about the intelligence or learning capacity of pupils of Mexican descent."

The suit also alleges that East Side Union High School District service boundaries are drawn to segregate students of Mexican descent into a few schools, that counselors consistently fail to give them information to prepare them for college work and that disciplinary rules of the district are enforced in a "racially discriminatory fashion."

Legal Aid attorneys Steve Manley and Grace Kubota, the team that produced the school tracking suits, recently won another class action to prevent the San Jose Housing Authority from evicting a welfare mother with seven children.

The court granted their motion to quash the three-day eviction notice on grounds the woman had been denied her constitutional right to a hearing, an action certain to have far reaching effects on landlord-tenant relations.

Other "class" court actions pending include a federal court challenge of Article 34 of the State Constitution, which requires a referendum election for public housing programs.

Working with attorneys from California Rural Legal Assistance and the National Housing Center in Berkeley, Legal Aid attorneys are challenging Article 34 on the grounds it deprives low-income citizens equal protection of the laws in that they do not have equal access with middle and upper-income citizens to federal housing assistance.

The suit, pending before a three-judge panel in San Francisco, claims that California, with 10 per cent of the population, received 15 per cent of all FHA-insured housing and 14.9 per cent of all VA-insured mortgages from 1934 to 1966.

By way of contrast, the suit points out California has only 23.4 units of public housing per thousand population compared with 66.7 units per thousand in New York, 73.1 units per thousand in Illinois and a national average of 45 units per thousand.

Only 52 per cent of the public housing referendums placed before California voters during the past nine years have been approved, according to the suit.

On appeal before the State Supreme Court is a Legal Aid suit which would give juveniles the right to counsel whether their families can afford it or not.

The case involves a 17-year-old who was sentenced to the California Youth Authority after he waived his right to counsel because he did not want his father billed for the services of a public defender.

With the National Consumer Center at Boston College of Law, Legal Aid attorneys are opposing the uniform Consumer Credit Code proposed by the National Conference of Commissioners on Uniform State Laws.

According to Legal Aid attorney Richard Elbrecht, the proposed credit code would be a "disastrous step backward for the California consumer," providing for an increase in interest rates up to 36 per cent a year and higher in some cases.

The present limit in California is 12 per

cent a year, with exceptions ranging up to 30 per cent.

The uniform credit code, now under joint hearings by the Assembly Judiciary and Insurance and Finance committees, would replace all existing California credit statutes.

Also in the consumer field, Legal Aid attorneys have processed 26 violations of the state's truth in lending laws.

VIETNAM—PEACE THIS YEAR

HON. JOHN R. RARICK

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 22, 1969

Mr. RARICK. Mr. Speaker, in the last few days there has been great discussion about ending the war in Vietnam. All Americans seem to be agreed that it should be ended as speedily as possible. The disagreement is over method and cost.

The loudest and most certainly voiced solution—immediate withdrawal—is advocated by those who know the least about war.

Our trained and experienced military commanders, whose profession is ending wars, have scarcely been heard.

Mr. Speaker, on May 1, 1968, at the request of 28 distinguished retired officers, I filed with the Clerk of the House their petition for redress of grievances.

Retired from active duty, and free to speak, their voices are worth listening to. They represent a cumulative total of more than 600 years service. They volunteer their advice which is not only professional but entirely unselfish, prompted only by love of country.

I am reminded of the admonition which was delivered with the presentation of the petition:

> This petition, we hope, will go just a little way toward attaining the victory of peace and overcome just calmly writing off our dead and maimed heroes and prisoners for nothing—as we did in Korea.

We should give weighted consideration to their experience and expert advice. It make sense to listen to Dr. Wernher Von Braun, rather than college freshmen or Dr. Benjamin Spock, on questions of space travel, but no one proposes to call Dr. Von Braun to treat a sick child.

These officers tell us that the way to bring peace in Vietnam is to end the war by winning it. They say unanimously that our Armed Forces can do this, with conventional weapons, within 6 to 8 weeks. All that is required is to free our fighting men from the political restrictions which forbid victory.

Had President Johnson followed their advice then, the war in Vietnam would have been over 14 months ago. If President Nixon follows their advice now the war will be over this year. And we will be able to bring home, not only our soldiers, but also our prisoners of war.

Mr. Speaker, I include the petition, together with an article from the March 1968 issue of Science & Mechanics magazine, setting forth the views of 12 other illustrious American officers, following my remarks:

PETITION FOR REDRESS OF GRIEVANCES BY RETIRED OFFICERS OF RANK AND EXPERIENCE

Whereas we who have served our country long and faithfully are grieved and shocked at the manner in which the war in Vietnam is being conducted, wasting our blood and treasure without hope of victory, and

Whereas experienced professionals all agree that the control of the conduct of the war cannot be successfully concluded from Washington by civilian politicians not fitted by training or experience, and some of doubtful devotion to this country, and

Whereas many of our greatest former military leaders have publicly stated in Science & Mechanics Magazine of March 1968 that this war can be won in 6 or 8 weeks or less:

Therefore, we respectfully petition the Government of the United States, in accordance with the First Amendment of the Constitution of the United States of America, for a redress of these grievances:

1. That the Congress assert its constitutional right and duty by declaring war against North Vietnam.

2. That the Chief Executive mobilize our armed forces according to recommendations of the Joint Chiefs of Staff.

3. That the military commander in the theatre of war be given the responsibility and authority for its rapid and victorious conclusion.

4. That the U.S. Government inform all nations concerned that we are at war with North Vietnam and will consider any assistance in whatever form given to that country as an act of war against the U.S.A.

5. That the Government of the United States secure the services of the 600,000 Free Chinese Armed Forces for the prosecution of the war, as offered by Free China.

6. That P.L. 87-297, The Arms Control & Disarmament Act, be instantly repealed.

7. That every person in public office or military command whose loyalty to the United States and its Constitution is by their acts shown to be diluted by other loyalties inimical thereto, such as World Government or Limited World Government, be promptly cashiered or impeached as provided in the United States Constitution.

8. That the criminally insane policy of relaying our strategic and tactical plans for conduct of the war in Vietnam to the communist controlled Security Council of the United Nations be stopped instantly.

SIGNATURES TO PETITION

NOTE.—General Cates, before signing the petition, deleted paragraph #5 and made the following comment concerning paragraph #1: "The time has come, in my opinion, to do one or two things. Either admit a defeat and execute a gradual withdrawal or declare war and prosecute it to the fullest. The latter is strongly recommended."

Gen. Clifton B. Cates, USMC (Ret.) Former Commandant, U.S. Marine Corps.

Gen. Edwin A. Pollock, USMC (Ret.), Battalion Commander, landing on Guadalcanal, Commanding General, 2nd Marine Division Commanding General, 1st Marine Division in Korea, 1962–1963, Commanding General, Marine Corps Recruit Depot, Parris Island, S.C., Commandant, Marine Corps Schools, Quantico, Virginia, Commanding General, Fleet Marine Forces, Pacific, Commanding General, Fleet Marine Forces, Atlantic.

Lt. Gen. P. A. del Valle, USMC (Ret.), Commanding Artillery, Guadacanal, Commanding Artillery, 3rd Amphibious Corps, Guam, Commanding, 1st Marine Division, Okinawa, Inspector General, U.S. Marine Corps, Director of Personnel, U.S. Marine Corps.

V. Adm. Ralph W. Christie, USN (Ret.), Commander Submarines, Southwest Pacific, W.W. II.

Lt. Gen. Ralph J. Mitchell, USMC (Ret.), Commander, Marine Air SOPAC, W.W. II, Commander, Air SOPAC, W.W. II, Commander, Air SOLS, W.W. II, Commander, Air NORSOLS, W.W. II.

Lt. Gen. James P. Riseley, USMC (Ret.), Forty-one years of military service; last troop command, 1 Prov. Corps, Army and 3rd Marine Division in Japan, 1954–55.

Lt. Gen. George E. Stratemeyer, USAF (Ret.), Commanding General, Far East Air Forces under General of the Army Douglas MacArthur.

Maj. Gen. Charles A. Willoughby, AUS (Ret.), Asst. Chief of Staff, G–2, to General of the Army Douglas MacArthur.

R. Adm. Chester Ward, USN (Ret.), Former Judge Advocate General of the Navy.

R. Adm. Joseph H. Nevins, Jr., USN (Ret.), Principal Command: Commanding Amphibious Attack Group wth Marines embarked in Sixth Fleet.

R. Adm. John G. Crommelin, USN (Ret.).

Brig. Gen. Hanson R. Thyng, USAF (Ret.), Air Defense Command.

Brig. Gen. William C. Lemly, USMC (Ret.), Last Command: Marine Air Defense Command One, Marine Air Wing Two, Okinawa, Ryukyus.

Brig. Gen. Eugene S. Bibb, AUS (Ret.).

Brig. Gen. Robert Lee Scott, Jr., USAF (Ret.), Former Director, Information, USAF; Fighter Commander for General C. L. Chennault in China 1942–43; Commanding Officer, 23rd Fighter Group in China, 388 combat missions; Fighter Ace with 13 confirmed victories in aerial combat. Author: "God Is My Co-Pilot" and a dozen other books; At present, Senior Vice-President American Triad Corp., Tacoma, Washington.

Brig. Gen. William L. Lee, USAF (Ret.), Commanded the 49th Bomb Wing in Italy during W.W. II and the 13th Force in the Philippines, 1954–56.

Capt. E. C. Beck, USN (Ret.).

Lt. Col. Charles Richardson, Jr., JAGC (Ret.).

Lt. Col. John L. Hitchings, AUS (Ret.), Flying instructor, W.W. I, Commanded Anti-Aircraft Group in S.W. Pacific, W.W. II.

Col. Charles Ellis, Cavalry AUS (Ret.), W.W. I, W.W. II, Comdg. 91st Cav., RCN Sqdn & 3 Task Forces W.W. II; Chairman, Nat. Def. Committee, Military Order of the World Wars.

Cmdr. Homer Brett, Jr., USNR (Ret.).

Capt. Frank Stoutenburgh, S.C., USN.

Col. H. A. Mathews, AUS (Ret.).

Capt. B. Y. Ramsey, Jr., USN (Ret.).

Lt. Col. Matthew P. McKeon, AUS (Ret.).

Capt. Medrick G. Johnson, USAF (Ret.).

Lt. John C. Williams, USN (Res.). Thirteen letters of commendation in thirteen years commissioned service.

Brig. Gen. Richard B. Moran, USA (Ret.).

SIGNATURES OF CIVILIANS

Mr. Thomas Crompton, Commander, MacArthur Post, V.F.W.

The Honorable John G. Schmit, State Senator, California.

WE CAN WIN THE WAR IN 6 WEEKS

(NOTE.—Why is the world's most powerful nation being frustrated in its attempt to defeat its relatively tiny Vietnamese foe? Science & Mechanics sent writer Lloyd Mallan to Washington to get the views of military experts on this question. His surprising and informative findings are reported here.)

(By Lloyd Mallan)

I spoke with a dozen top-ranking military officers, most of them at great length, as the basis for this exclusive article. Among these leaders are two former Chairmen of the Joint Chiefs of Staff, a famed Chief of Naval Operations, a retired Chief of Staff of the Army, two Vice Chiefs of Staff of the Air Force and the former Commander-in-Chief of the Strategic Air Command (SAC). Two of the dozen, still on active duty, cannot be named or even identified as to their military departments.

The others are identified by their ranks and positions below:

1. General Maxwell D. Taylor, former Chairman of the Joint Chiefs of Staff.

2. General Nathan F. Twining, former Chairman of the Joint Chiefs of Staff.

3. Anonymous, General, U.S. Army.

4. Admiral Arleigh A. Burke, former Chief of Naval Operations.

5. General George H. Decker, former Army Chief of Staff.

6. General Frederic H. Smith, Jr., Former Vice Chief of Staff, Air Force.

7. General Thomas S. Power, former Commander-in-Chief, Strategic Air Command.

8. Lieutenant General Ira C. Eaker, former Vice Chief of Staff, Air Force.

9. Lieutenant General Arthur G. Trudeau, former Army Chief of Research and Development.

10. Major General Gilbert L. Meyers, former Deputy Commander of both the Second Air Division, Pacific Air Force, and the Seventh Air Force in Vietnam.

11. Brigadier General Henry C. Huglin, former U.S. Representative to the NATO Military Committee and Standing Group and presently Senior Military Scientist with TEMPO, General Electric Company's Center for Advanced Studies.

12. Anonymous, Brigadier General, U.S. Army.

If you are a parent with draft-age sons, if you are any draft-age male, if you are simply a decent American who desires all peoples of the world to live in peace and freedom—then you will be happy to learn that the war against North Vietnam can be irrevocably won in six weeks. It may also make you happy to know that Communist intimidations and aggressions in the free areas of Asia can also be struck a paralyzing blow in that same brief frame of time.

And once the war in the North is ended, the remaining Vietcong guerrillas in the South could be conquered within six months—their tactics of terror and murder reduced to sporadic individual acts of desperation. Eventually, these, too, would vanish under pressure from the free Vietnamese people.

The foregoing time-estimates for victory in Vietnam are based on serious, lengthy discussions with some of the most experienced and astute military strategists in this country. Not one of these military authorities knew in advance what the others had told me. Yet every one of them was in strict agreement with every other one. They were also unanimous in their confidence that neither Russia nor Red China would dare step in physically to confront us—if we did what we have to do for victory.

Here are their recommendations for a quick victory in Vietnam:

Officially declare a state of war against the Hanoi Government.

Immediately close the port of Haiphong, through which Hanoi receives at least 70 percent of her war supplies.

Invade the North above the 17th Parallel.

Swiftly destroy all targets of consequence, after first warning the North Vietnamese people to get out of the target areas.

Warn Red China and Russia that we are now legally at war with North Vietnam—and that any attempt to supply the North with arms would be answered militarily as an overt act of war against us.

Harsh as these measures may appear to be, they are the only way abruptly to stop a war that may go on for another five, ten or more years—if it continues to be fought as at present.

The average person—no matter how well-informed he may be in other matters—cannot possibly know what goes on behind the scenes of Government. He cannot know the spurious political "reasoning" that determines why we are fighting a war in a weak-sister manner that is unprecedented throughout the history of military science—when we have the strength to squash North Vietnam in practically a single blow.

Feeling that the American public has an inalienable right to know why our Government is not doing just this, Science & Mechanics assigned me to the task of finding an answer. The task took three months of steady digging and interviewing for behind-the-scenes information.

My first bit of information was surprising: I tried the Pentagon and discovered that no military officer of either high or low rank was permitted to talk about why we are doing things the way we are in Vietnam. They are allowed to give you a "briefing" on the way things are going in the war, but they are not allowed to give you their personal criticisms—even "off-the-record." As one Public Affairs Officer in the Department of Defense explained it to me: "Even if you would not attribute your quotes to a specific officer, his name would be known after you published your article—because there would be a record here of the officers we cleared you with for interviews. That record is mandatory."

In other words, the press of this free nation does not have a right to inform the public about Government policies that could be wrong. I was effectively blocked by the Department of Defense at the very beginning—or so they thought. Since I happen to have a few old friends in the Pentagon who are willing to see me without the intervention of the DoD Public Affairs people, I went directly to one of them who had spent more than a year in Vietnam and was not long back in his new job. To make things "legal," I talked with him outside of the Pentagon. Although I cannot identify either him or the military department in which he works (otherwise he would be in deep trouble), I can say that he is a ranking officer with considerable experience. Here's what he told me:

"I can't understand the way we're fighting this war. We knew about the SAM (Russian Surface-to-Air Missile) sites at least five months before the first one was fired—and we did not knock them out for fear of killing Russians working on them! Now the SAMs are killing our boys. So now we attack those missile sites—after the enemy has had a chance to protect them with modern radar-controlled weapons.

"In fact, our slowpoke way of fighting this war has given the enemy the time and security to build up the most concentrated antiaircraft firepower in military history."

What would he suggest doing to win the war faster than we are now doing?

"Although the element of surprise is now gone," he answered, "the North could be paralyzed quickly with an all-out invasion by air, sea and land. Blockade all of Hanoi's harbors. We could do this effectively by filling some of our old Liberty Ships with cement, drive them on up there to the harbor-mouths and scuttle them—sink them in the shallow waters. Of course, they would have to be convoyed to their scuttling destination by our Navy and protected against enemy fire by both the Navy and our Air Force. But it can be done.

"I would also mine the Haiphong harbor. It would be comparatively easy to drop the mines from our aircraft. Hell, the enemy has mined the harbor at Saigon—and caused a lot of damage to our shipping. Why don't we do the same thing to North Vietnam?

"Meanwhile, an amphibious landing of our forces in the area surrounding Haiphong would be decisive. It would force Ho Chi Minh's hand. He would have to recall his troops from the South to fight for survival in his own homeland. And I might mention that our firepower is superior to that of the North Vietnamese Army. Another factor, an extremely vital one, in this kind of invasion is the psychological one. The people of North Vietnam would see that we meant business. It would shake them up. And Ho would be faced with internal dissent as well as with external military force.

'Add to this an invasion over the 17th Parallel and concentrated bombardment of every important target by air and sea—and the war in the North would be finished within six weeks."

"But how about the Vietcong in the South?" I asked. "Wouldn't they continue to fight their guerrilla war against Saigon?"

"They would—for awhile," he said. "But anyone who wants to fight effectively needs food as well as arms. Their major supply of both would be cut off with the defeat of Hanoi. Then you blockade the borders of Cambodia and Laos—and you cut off their minor sources of supply. The Vietcong couldn't last. They would just dry up and drop off the trees."

There remained a great big question: why are we not fighting the war in Vietnam the way it should be fought? I asked this of another officer, even higher in rank and broader in experience. Understandably he wants to remain anonymous. His answer was: "Politics, people who mistrust the military, naivete and fear resulting from misinformation. Another important quality involved is the concept of 'flexible response,' which was derived from the personal aspirations of a single individual."

This very high-ranking military officer then told me the following story:

"Just after the Air Force was disengaged from Army control and set up as a separate military department, the emphasis was being placed on air power. At the time, President Eisenhower saw the vital importance of building a powerful Air Force, second to none in the world. So the biggest portion of the Defense budget went into realizing this aim.

"General Maxwell Taylor, then Army Chief of Staff, resented this. He personally had two dislikes. Number one, with a vengeance, was the Air Force. Number two, with lesser intensity, was the Navy. He saw the Army being neglected, losing the elite prestige it had held during all the years before. He tried persistently to persuade the President to build up the Army rather than the Air Force. His reasoning was that, if a shooting war ever again got started, there would be a huge vacuum if the Army were not supported.

"Ike wouldn't buy this reasoning. There are some enemy armies—the Red Chinese, for instance, with their multitudes of potential conscripts—that you cannot effectively fight with a land army. But you can destroy an enemy's capability to support an army with superior firepower from the air and sea; you knock out his means of communication, industrial production and food production. Thereby you paralyze not only an enemy's capability but his will to wage war. So who cares about the vacuum? You can't step into it anyway.

"Nevertheless, General Taylor continued to badger General Eisenhower about the need to fill that vacuum. He finally went to his friends in the Congress, asking them to put pressure on the President. Ike got mad. He called Taylor in and very firmly demanded that Taylor stop hitting away at the subject on Capitol Hill and elsewhere.

"General Taylor was silenced until a new President was elected. Then he went to JFK with his old pitch. He also proposed a new approach to warfare—because he wanted to get some Army troops into Vietnam. (During Ike's Administration, a comparative handful of U.S. military advisors had been sent to Vietnam at the request for aid of the Saigon Government. And Ike had insisted that these advisors wear civilian clothes.) Taylor's new plan would be step one toward rebuilding the Army's prestige and power.

"He proposed the present system of minor escalations: hit an enemy, but not too hard, and stop and wait tc see what he will do

next. This was the theory of 'flexible response.' It is a slow-moving way to fight a war because it keeps you basically on the defensive. But it served its purpose for General Taylor.

"The idea appealed to President Kennedy and his intellectual advisers in the White House, Department of State and Department of Defense. Most of them mistrusted the military anyway. They thought that this would be a 'humane' way to show the enemy we were supporting the South Vietnamese Government—without any danger of an actual confrontation with Red China or the Soviet Union.

"After they bought the idea, General Taylor saw his Army gradually come to life again. The comparatively few American military advisers wearing civilian clothes in Vietnam under Eisenhower soon expanded to 16,000 troops in uniform under Kennedy. Because the 'flexible-response' technique actually bought time for the enemy to infiltrate more and more troops from the North into the South, the United States was forced to meet the challenge by sending an ever-increasing number of troops to Vietnam. As of right now (mid-November 1967), there are almost a half-million of our men in Vietnam, much more than half of them being troops of the U.S. Army. Little more than ten percent of them are Air Force and Navy personnel.

"So under LBJ, the war has escalated in terms of men and firepower But both are restricted to a 'flexible response'—which is not so flexible after all, because it places us in an unscientific straightjacket of limiting our objectives. In the minds of those civilian Government intellectual advisers to the President, the phrase 'Limited War' has been equated with 'Limited Warfare.' And this is a no-win policy."

After listening to this story, I was stunned. It just couldn't be true that a tiny group of intellectual advisers could control the destiny of the most powerful nation on Earth. Whether or not they were sincere in their beliefs is beside the point. I decided to check out the story at its source: I phoned General Maxwell D. Taylor, now retired from the Army, at his home in Washington, D.C. He was at work and his wife gave me the phone numbers for his two offices. One of these was in the White House. It was late in the afternoon and I could not reach him. But next morning I caught him in at home. Here's how our brief conversation went:

"I'm Lloyd Mallan from Davis Publications in New York."

"Yes. What can I do for you?"

"One of our magazines *Science & Mechanics*, is trying to do an objective article on the war in Vietnam, from a military point of view. I wonder if you'd mind answering a few questions?"

"No. I'm not for quotation, thank you."

"Well, at least, can you give me some background information?"

"No. Just read (he laughed) . . . Just read the record. (A pause.) Call General (Earl) Wheeler. He's on duty. I'm not."

"I did try the Pentagon. They won't talk."

"Well (another laugh), they're the people that ought to talk. I'm just another private citizen, out here reading the newspaper."

That was it. But I was curious about his having an office in the White House, so I phoned to ask for his title. General Taylor wears two hats in the White House. He is Special Consultant to the President and a member of the President's Foreign Intelligence Advisory Board. Some "private citizen"!

My two anonymous military friends had earlier given me an excellent suggestion: try to get in touch with general officers of outstanding experience and insight, who are now retired. No Pentagon restrictions can prevent them from talking and being quoted by name. They suggested a few names to start and this led me to others. Altogether I interviewed nine generals and an admiral. All of them took valuable time away from other work to talk with me for periods of one to two-and-a-half hours.

I will now present their cases for a quick end to the war in Vietnam, trying to list them in the order of their position and rank, as well as alphabetically in these terms wherever possible.

Air Force General Nathan F. Twining is a former Chairman of the Joint Chiefs of Staff and the recipient of 27 medals from the United States and numerous foreign governments in recognition of his skill and courage. During World War II, among many other duties, he was respectively Commander of the Mediterranean Allied Strategic Forces and Commander of the 20th Air Force in the Pacific.

General Twining feels most strongly that "either we should hit the North of Vietnam with everything we've got, bring them to their knees fast—or get out. My own opinion is that we should declare a state of war and invade the North. Then we could legally blockade the harbor of Haiphong—and sink any foreign shipping that attempts to violate the blockade. Running the blockade would be a tacit act of war against us—and the Russians as well as Red China and any other nation supplying the North well know this."

He is not worried one bit about China or Russia coming into a war against us. He is only worried that the longer we wait to finish the job, the more strength we're allowing the enemy to build. "I would tell them all that we're changing our strategy, that as of right now we are starting a new war. I'd ask them to get their people out of important target areas—and then I'd lower the boom on them! We'd win that kind of a war real fast."

Regarding the desultory way we are now fighting in Vietnam and the way in which we give Hanoi sanctuaries to build strength by stating that certain targets are off-limits to our flyers, General Twining has this to say: "I played a lot of football in my day. You are in there to win the game, so you don't ever tell the opposing team when you are going to try a pass or make an end run. But this is exactly what we *are* doing in Vietnam. We even tell Ho that we have no intention of destroying either his economy or Government. Therefore he *knows* that there are vitally important targets we cannot destroy."

General Twining told me an exceptionally interesting inside story to illustrate how Russia and Red China have our Government's civilian advisers hoodwinked—and how these same advisers can impress their views upon the highest office in the land, unless at least one person with ranking authority bothers to investigate all sides of the issue. The issue in this case was the crisis in Lebanon, when the Russians were preparing to send in their tanks and armies to take over that small Middle Eastern nation. If the Kremlin could take over Lebanon, they would feel confident to attempt other coups among the Cento (Central Treaty Organization) and even the NATO nations. President Eisenhower was worried about engaging us in a war with Russia if we took military steps to prevent a Kremlin invasion of Lebanon. Secretary of State John Foster Dulles was even more deeply disturbed because the President was depending upon his advice.

At two o'clock in the morning on the day of decision, General Twining received a phone call from the Secretary of State. The Chairman of the Joint Chiefs was asked to come over and discuss the situation from a military point of view. The Lebanese Government had requested American troops to thwart the Kremlin, but Dulles' civilian advisers had warned him that by making a show of force in Lebanon, World War III would be started.

Twining found Dulles pacing the floor when he arrived. The Secretary's first words were: "Nate, I want you to advise me about this. Is there any real danger that the presence of our troops in Lebanon would cause the Russians and their allies to go to war against us?"

The Chairman shook his head. "Negative. Not a chance," he answered. "They know our response would be massive—and our power is superior to theirs."

"Are you *absolutely* sure of this?" asked Dulles.

"Nobody can be *absolutely* sure of anything," said Twining. "But I am sure as anybody can be that it will not happen."

Dulles was still disturbed. "If that's the real truth, why are my advisers so worried?"

"I don't know," answered General Twining. "But maybe they misread the situation and underestimate our military strength—something that the Russians never do. But if you want, I'll phone the Chiefs of Staff and ask them to come over here and verify what I've just told you. They'll tell you, I'm sure, that the real danger to world peace would be to allow the Soviets to get away with this maneuver."

The Secretary of State smiled "That won't be necessary, Nate. I've known you for a number of years and asked your opinions on many serious questions. You've never let me down yet. Go back home and go to bed."

Not long after that early morning meeting, more than 3,000 Marines were landing on the shores of Lebanon. Khrushchev, who had been loudly rattling his tanks and rockets, never sent a single weapon to stop them.

According to General Nathan Twining, John Foster Dulles was one Secretary of State who *wanted* to stay on top of military matters. He frequently consulted with the Joint Chiefs of Staff for information about current opinions and strengths. He understood that the validity and effectiveness of any foreign policy are dependent upon the military force ready to back it up.

This is something that the civilian intellectual advisers in the White House, State Department, and Department of Defense have yet to learn. Their naivete not only promotes the concept of "flexible response" in Vietnam but goes even farther afield with another concept: that of military parity. They feel that by reducing our own military power to the level of our next most powerful enemy, we will gain the confidence of that enemy to the point where he will be content with a status-quo deadlock. In other words the Government civilian intellectual advisors feel that the destiny of this nation is in *their* hands, that world peace can be maintained only by reducing American superiority in arms to a parity with Russian military strength.

As General Twining put it to me: "I was never afraid of our military superiority causing a war. I *knew* that we had no intention of using it in an aggressive way. It was there solely as a deterrent, to discourage any other major power who is a potential enemy from attempting acts of aggression."

One thing that bothers the former Chairman of the Joint Chiefs most is the misuse of airpower in Vietnam: "What is going on there now might someday reduce our Air Force to a small ineffectual fighting force—when we will most sorely need it! In Vietnam, the role of airpower is being played down. Research and development of new aircraft is practically at a standstill. And everything in Vietnam is controlled from Washington—all the target-strike decisions are made here, none by commanders in the field—even down to the platoon level in the case of the Army and Marine Corps."

In full agreement with General Twining about the way the war in Vietnam is being mishandled is Admiral Arleigh A. Burke, the

only man ever to hold the position of Chief of Naval Operations for three successive terms. During World War II in the Pacific, he became known as "31-knot Burke" because he pushed the destroyers under his command to their targets at just under boiler-bursting speed. The nickname is symbolic of how you win wars: strike fast, hard and with full force. Admiral Burke was a member of the United Nations Truce Delegation in Korea to negotiate with the Communists for a military armistice—so he is well-familiar with the sneaky and evasive tactics of the Reds. He has been decorated many times for "extraordinary heroism," for "conspicuous gallantry and intrepidity," for "exceptionally meritorious service to the Government of the United States" and for "exceptionally meritorious conduct." He has received three Distinguished Service Medals and three Legion of Merit awards.

At present, Admiral Burke is Director for the Center of Strategic Studies of Georgetown University. I spent more than two hours with him in his spacious oak-paneled office. Against the wall facing his desk are three flags: flanking each side of the centrally placed American Flag are the Navy Department Flag and his personal 4-Star Flag as Chief of Naval Operations. A large ashtray on his desk is filled with pipes. Shortly after we shook hands, he picked up a pipe, filled it with tobacco—and then forgot to light it as we talked.

Well over six feet tall, he stood up and paced the room to emphasize his answers to my questions. There was an interesting contradiction in his quietly philosophical attitude as he made emphatic points.

When I asked him: "What would you do to win the war in Vietnam? his answer was instantaneous.

"I would put our entire nation on a war footing. Mobilize the Army, Navy and Air Force. Go into mass-production of airplanes, take battleships out of mothballs (we are only just now beginning to use the "New Jersey"). I'd call up the reserves. Then I would attack the enemy on *all* fronts—and show him that we really *mean* what we are doing, that we *want* to win.

"Individuals always act on an emotional basis—not on the basis of logic. When an enemy sees that you *mean* to win, his emotional response will be to retreat. He may still try to harass you and come back at you on a small scale—but if you *convince* him that you are out to win he will psychologically know he is defeated. Provided you have superior war power—as we do.

"At no time in the entire history of warfare has a war been won through minor escalations. Yet this is what we are doing in Vietnam—using minor escalations. So the enemy *must* feel that he can hold out. His reasoning goes: 'We're not being hit as badly as we thought we would be. We can hold out this way long enough for the peace-doves in the United States to prevail.'

"So we escalate ten percent at a time—and each time the enemy feels that he's not being hit so hard after all that we're not hitting him as hard as we *can* hit him, *if* we wanted to.

"Of course, if you go all-out to convince an enemy that you *really mean* to win, it may at the moment appear to cost more money. But it's much better to have more men and equipment than you need—than to have too little.

"This is where Mr. McNamara makes a sad mistake. He is basically interested in 'cost-effectiveness': 'Do I get the maximum value for each dollar I spend? And does this value represent the minimum necessary force to maintain our military strength?' But he is so much concerned with minute details that he cannot see the broad picture. He is lost in a murky morass of details—yet he is absolutely self-assured that he is correct.

"Only God and McNamara *know* they are right.

"In fact, the reason that Mr. McNamara was chosen as Secretary of Defense by the Administration was precisely because of his attitude—his interest in saving money—and not in saving lives or equipment. His is truly a political job—and not a military one. To him, war is a game of showmanship, often of salesmanship but rarely of a deep desire to win.

"Then there's the matter of body-counts. I believe this was Mr. McNamara's idea—to release counts on the number of enemy dead versus our own dead. But body-counts don't mean a thing—they're barbaric to begin with—because you don't *want* to kill people; you want to paralyze an enemy to the point where he is *convinced* that he *must* lose if he continues the war.

"We are not doing this today in Vietnam. And as a result, our own people are becoming discouraged, tired, disinterested and disenchanted. Many of them want us to pull out of Vietnam—and that would be fatal now.

"We can't pull out, because if we do, the Communists—and the world—would think we are weak. But nobody in the Pentagon—particularly Mr. McNamara—among the civilian planners ever asks the question: 'If we fail with our present attitude in Vietnam, what is our alternative to win the war?' We have no alternate plan.

"At the present rate of minor escalations of the war, we'll be in Vietnam for another five or six years—or more. Maybe we'll eventually contradict the known facts of military history and win. We probably will. But the cost in lives, equipment and money will have been tremendous."

"Well," I ask, "if we take your approach toward winning the war, how about the Soviet Union and mainland China? There are a lot of intelligently thoughtful people who feel that a third global war would be started if we invaded North Vietnam.

Admiral Burke nodded and smiled. "You're right. Many people who know nothing about military science are afraid of what Mainland China and the Soviets would do if we invaded North Vietnam—and I *would* invade the North as well as mine the harbors, Haiphong and all the rest. In the case of Red China, they have their own internal political problems. Besides, their logistics to support an expeditionary force in Vietnam would be *formidable*. Our Navy and Air Force could strike and destroy vital targets anywhere inside the great Chinese land mass, thereby cutting off supplies from the Chinese Army in Vietnam. As for the USSR, their logistics would be also formidable—and their economy might be so strained in these conditions that they would just say to themselves: 'It's not worth it. Let's pull out altogether.'

"These are alternatives that the Administration and many of our people never seem to consider."

"Admiral Burke," I said, "if you were given full command of the war in Vietnam, how long do you think it would take you absolutely to defeat the enemy?"

He smiled again. "Nobody really can know how long it will take to win a war. There are too many variables and individuals involved. But considering the time required to mobilize and deploy the required forces, I would guess at from eight weeks to three months. At any rate, it would be a *much, much* shorter time than the years it will take using our present rate of minor escalation."

Supporting Admiral Burke's thesis that the war in Vietnam, if properly fought, could be won quickly is four-star General George H. Decker, a former Chief of Staff of the U.S. Army. Among his many important assignments, General Decker has been Deputy Commander-in-Chief, U.S. European Command; Commander-in-Chief, United Nations Command; Commander, United States Forces in Korea; and Commanding General, Eighth United States Army. He is a soft-spoken, earnest and intelligent man—a thoughtful person who is not given to snap judgments. Before our interview began, he asked me to emphasize that he was not on a soap box to promote his ideas, but any answer that he gave to my questions would be carefully considered. I spent a full hour talking with him.

My first question was: "What can we do, that we are not now doing, to win the war in Vietnam fast?"

His answer was: "Invade the North and blockade the port of Haiphong."

"Wouldn't that actively bring Red China and Russia into the battle?" I asked, to see whether or not his answer would match the answers of Admiral Burke and General Twining.

It did: "I am not afraid of mainland China or Russia. We are the most powerful nation on Earth today. We might not be able effectively to inactivate the Chinese foot armies, but we wouldn't have to. If we destroyed their strategic targets—notably their nuclear development installations—they would be defeated. They know this and it could be a strong deterrent to their entering a war against us. People around the world would cheer if we knocked out Red China's future potential as a nuclear power."

My next question was: "Then why don't we invade North Vietnam and blockade Haiphong?"

He grinned. "We try to build the illusion that this is *not* our war, that we are cooperating with friends—which we are. That illusion would be destroyed if we formally declared war against the North. But although this is essentially an Asian war, it is actually our war—a war to protect our national interests. A Communist-controlled Asia would be a real threat to those interests. Yet unless we do declare war against the North, we cannot *legally* invade or blockade.

"We do not have to fire shots to blockade. We merely tell the Soviet Union, Red China, Britain—whatever nation is delivering supplies to Hanoi—to keep their ships out of the area, if they do not want them damaged or sunk. This would be an effective deterrent.

"We have to be credible. Because of our present position of weakness, neither Hanoi, nor the Soviet Union, nor Red China believes us. They do not believe that we are *determined* to win.

"China entering the war physically would be abhorrent to Hanoi because they would overrun the North. They would probably pretend that their armies were comprised of volunteers, as they did in Korea, but this would make no difference if we were *legally* at war with the North.

"How about the Vietcong in the South?" I asked.

"They would dry up on the vine," answered General Decker. "Without supplies from the North and/or the Soviet Union and Red China, they could not continue to fight. Right now they have trouble getting recruits from among their own Southern people. They have had to draw on the North for 'recruits.'"

"Then you do believe that the only answer to sure and quick victory is to go 'all-out' to win right now?"

He nooded. "Now our stated policy is that we do not want to destroy the Government of North Vietnam. Invasion might do this—but not if we handled things as General MacArthur did in Japan. We could make a treaty with Hanoi and place restrictions on their aid to the Vietcong among other things. They would have to abide by that treaty, whether or not they wanted to, because we would police them."

"General Decker, would you mind elaborating a little more on why Red China would not enter a war against us if we invaded North Vietnam?"

"Well, there are a half-million National-

ist Chinese troops on the island of Taiwan. I saw them practice maneuvers—and they are excellently trained soldiers and airmen. They are eager to take a crack at the Red Chinese. In case of war, we, of course, would have to transport them to the mainland of China. But in the doubtful event that we are in a formal state of war with Red China, such a move would be routine.

"I don't know how nervous mainland China would be about this threat from Taiwan, but the threat is not inconsiderable—in a pracical physical sense."

General Decker's personal attitude is, in summary: "We have never won the war in Korea—because of our methods. We are not winning in Vietnam for the same reason. If we are going to fight a war—we should fight it."

General George Decker should certainly know whereof he speaks. As Commander of all United Nations troops, including those of the United States, in Korea for two years his experience is firsthand.

Another officer with great firsthand experience is Air Force General Thomas S. Power, who not too long ago was Commander-in-Chief of the Strategic Air Command. In fact, as Vice Commander of SAC under General Curtis E. LeMay, he was responsible, along with his boss, for building the command into the world's most powerful strategic force. This was accomplished within six short years. Today, SAC remains the world's most potent force for peace, since no potential enemy of the United States would dare to challenge its power.

Apart from his combat duty of North Africa and Italy as a B–24 pilot with the 305th Bomb Wing, during World War II General Power was also Commander of the 314th (Very Heavy) Bomb Wing in the Pacific. He directed the first large-scale B–29 fire-bomb raids on Tokyo. He was also Commander of the Air Research and Development Command (now the Air Force Systems Command). In 1959 he was presented the Air Force Association's H. H. Arnold Award as "Aviation's Man of the year."

His decorations include the Distinguished Service Medal, the Silver Star, the Legion of Merit with one cluster, the Distinguished Flying Cross, the Bronze Star Medal, the Air Medal with one oak-leaf cluster, the Commendation Ribbon with one cluster, and the French Croix de Guerre with palm.

I asked General Power: "What would you do to end the war in Vietnam—fast?"

"First I'd close the port of Haiphong," he answered, "and then I would keep going until the works of man were literally destroyed. At any time along the way, the North Vietnamese could end the war—if they wanted to. All they have to do is say: 'We will stop the killing in South Vietnam. We will get out of South Vietnam.' And the war would end at that minute. They have complete control over ending the war."

"So if you were in command, what specifically would you do to convince Hanoi that their goal was futile?"

Without hesitation, General Power said: "I'd destroy the works of man in North Vietnam."

"You mean, all strategic targets?" I asked.

"I mean *all* targets. *All* the works of man." He paused and then stated emphatically: "If you show them that you mean what you say, you're going to defeat them."

"Do you feel that they think we mean what we say right now?"

"Well, right now we're doing things in a very restrained and moral way—but in this way we lose the psychological impact. We cause the enemy to think he can survive, because someday we'll be forced to quit due to internal pressure.

"And of course all these damned fools here in this country who are creating the wrong image—one of weakness—cause Ho Chi Minh to think that he is going to win this war in Washington. And this is what keeps him going."

"How would *you* change his mind?"

"I think that the thing to do is just increase the level of pressure on him—so that he'll be damned well convinced that these knotheads in the United States who are so loudly protesting for peace are not going to be able to stop our actions. Because those actions will be coming at him too fast for him to be encouraged.

"The worst thing you can do in a war is to fight it piecemeal—because then you encourage the enemy to keep going. And we're piecemealing the whole thing right now. I think we're winning, but very slowly. The enemy can't take all that pounding day after day and not be somewhat discouraged. But air power—and any other power—is not being used properly in North Vietnam. We're piecemealing it.

"One of the lessons we learned in World War II was: never go back to a target: In other words, you're going in to destroy it—so destroy it. For two reasons: one, it saves your life—you don't have to keep on going back into that flak again and again. But the second thing is: the psychological impact of destroying a target—all at once, for good. This has a tremendous impact. Now if the enemy survives an attack, this kind of gives him hope that he'll survive all attacks—which, psychologically, is bad."

"If our Government acted on your advice, how soon do you think the war would end?"

General Power paused. "It would depend upon the condition the North Vietnamese are left in. There's not too much in their country to begin with. But after all, they have to have something—they have to have food. So if you closed their ports and then *really* hammered them—that war would be over, but quick!

"My only point is this—and this is a crude example: if we leave Ho Chi Minh sitting on a broken down orange crate with his bare butt sticking out of his ragged trousers while he looks over his whole country in ruins, then he would have to ask himself: 'Well, Little Man, was it such a good idea after all to invade the South?'

"I think we ought to ask him if he'd like to be in that position.

"And if he *does* end up in that position, I think we ought to tell all other potential gangsters who are trying to grab countries, such as Thailand, for instance: 'Take a look at Ho!' This is what can happen to you. This is no child's play. We're just not going to let you get away with aggression. And if you try, here's what will happen to you. That's the way I feel about the war in Vietnam."

Another Air Force General, Frederick H. Smith, Jr., has equally strong feelings about the way the war in Vietnam is being fought. General Smith was Vice Chief of the Air Staff under General LeMay. His other credentials include: Chief of Staff, Strategic Air Command; Commanding General Eastern Air Defense Force; Vice Commander, Air Defense Command; Commander, Fifth Air Force; Commander, United States Forces in Japan; and Commander, United States Air Forces in Europe. He has been awarded 14 major decorations, several of them with clusters, and is a keen, earnest student of military history.

How does General Smith feel about our present tactics in Vietnam?

"The war could continue for years if it is carried on at the present rate. We allow the North Vietnamese to get used to our bombing each time before we step it up. Then they get used to the step-up. And so it will go for a long, long time. Using this approach, at the very beginning we lost the element-of-surprise advantage that is vital to winning a war. That war would have been over in less than a year—if we fought it correctly at the beginning."

"What would be the correct way to fight it?" I asked.

His answer matched the answers of every other knowledgeable military man I had spoken with: "Blockade or mine the port of Haiphong. At least seventy percent of all supplies to Hanoi come through Haiphong and ancillary ports. Once the ports are knocked out, the main supply-load would be placed on a couple of railroads from mainland China—which could easily be knocked out at strategic points.

"Then there are the dikes and canals in North Vietnam which feed the rice paddies. If we knocked them out, the people would soon be without food—and give up. Once they surrendered, we could supply them with food, of course, and help them rebuild their agriculture and industry."

I asked: "How soon would the war be over if we did as you suggest?"

"A couple, three months—maybe less," he answered immediately.

"Would this apply to the Vietcong in the South as well?"

"Well, they would be cut off from supplies because Hanoi was cut off. We could then go all-out to pacify the Vietcong—divide, 'splinter' them. When the Southern villagers saw that we meant business, when they *knew* that we were fighting for them, then they would not cooperate with the Vietcong—who get their support by intimidation and terrorism. The villagers really do not care for the Vietcong—but under the pressure of threat they really don't know what else to do but support and supply the Communist guerrillas."

The question of small nuclear weapons came up, since General Smith is an expert in this field. He does not recommend their use—but feels that if we did use them the war would be over in a week, without any radiation danger either to the people of Vietnam or of the world. As he put it:

"The radiation effects would be local, they would not spread if we used small two-tenths-of-a-kiloton bombs in air bursts. Only the dust kicked up would be radioactive and soon would be dissipated harmlessly to the atmosphere. A nuclear ground burst, of course, would create a 'hot spot' at the site of the explosion. But you could get away with air bursts for specific targets.

"The public, including the press in general, doesn't know the difference between tactical nuclear weapons of low yield and strategic weapons of megatonnage yield. They equate both—and our own Government has laid the foundation for this belief by years of 'abhorring' the use of nuclear weapons. Now this present Administration *cannot dare* to employ even the smallest tactical nuclear weapons. It would take a new Administration, using a solid educational program on the subject, to be able to build up to the use of small nuclear weapons.

"Of course, if we did employ these small 'nukes' there would be a big fuss kicked up by Russia and Red China. But neither would dare attack us. They would know that we meant business. The Russians would try to harass us in Europe, of course, as they did in the situation that caused the Berlin airlift—but they would not want to start a global war over our use of small nuclear weapons in Vietnam. Neither would China want to start such a war. They know that the odds would be against them. Peking is extremely sensitive to the well-trained half-million troops on Taiwan. Before employing any small tactical nuclear weapons, we could make a big show of getting those troops ready for an invasion of Red China; we could openly build their efficiency even further by giving them practice in war-games. We could have a number of landing barges sitting in the Taiwan harbors. This would intimidate the Red Chinese leaders—who would expect an

invasion of their homeland if they entered the war against us in Vietnam. But I don't really advocate the use of nuclear weapons—except for their element of surprise and to clear out the Demilitarized Zone in Vietnam."

Regarding the so-called Demilitarized Zone, which is used as a staging area by the North Vietnamese Army, General Smith pointed out that a tremendous saving in time, American lives and equipment could be accomplished swiftly by the use of low-yield nuclear bombs. One 20-kiloton tactical nuclear bomb would be equivalent in its effect to 16,000 sorties of tactical aircraft each carrying two napalm-tanks under its wings. If Hanoi wants to fight dirty, he feels, so should we. But we can do it without any dirty fallout of radiation—even if we used tactical nuclear weapons.

Still another Air Force General, one with three stars this time, who is bitterly critical of the way that our Government is waging the war in Vietnam is Lt. General Ira C. Eaker. General Eaker is an oldtimer with considerable military experience and insights. He has assiduously kept himself current on all aspects of world affairs, and especially on the war in Vietnam. General Eaker was Vice Chief of the Air Staff under the famous and forward-looking General "Hap" Arnold, the man who founded and developed the science of air supremacy. General Eaker was Commander of the Eighth Air Force in England during World War II. Later, he became Commanding General of all U.S. Army Air Forces in the United Kingdom. Following this assignment, he was named Air Commander-in-Chief of the Mediterranean Allied Air Forces. He has also been Chief of the Air Staff.

One of General Eaker's many citations reads: "His contribution was of major importance in the successful prosecution of the war against the Axis."

As regards the prosecution of the war in Vietnam, I'll let General Eaker speak for himself:

"Without question, Ho Chi Minh is encouraged to continue his efforts against us by the Vietnam war-critics in this country. His continued aggression is now causing more than 2,000 U.S. casualties each week.

"Having a few of our people give aid and comfort to the enemy appears to be a price we pay for fighting an undeclared war. Such criticism of national policy was not tolerated in World Wars I and II—and it probably would be muted now if we were officially and legally at war.

"Our civilian leaders have also said that they do not wish to build up a war-psychology in this country. This might bring irresistible pressure upon them to use more force than they presently desire to employ. Well, they can't have it both ways. They can scarcely expect all-out popular support when they themselves are not sure whether we are really at war.

"The most serious form of dissent and criticism of our tactics in Vietnam is the constant expression, in some quarters, of a morbid fear that our effort there may bring Red Chinese or Russian forces into the conflict. This hand-wringing, craven attitude is an open invitation for such an intercession. If the Red Chinese become convinced that our national leadership is palsied with fear and can be deterred from our just purpose in Vietnam, they will certainly invade there as they did in Korea.

"The clearest lesson from fifty years of dealing with Communists must be this: negotiate only from strength and with firmness. Our leadership should now issue an unmistakable warning that any Russian or Chinese forces which invade South Vietnam will be destroyed promptly."

Among the many points made to me by General Eaker, the following are most pertinent to our quick success in Vietnam:

1. "After our determination to go to war, subsequent decisions involved the forces to be committed and the strategy and tactics to be employed. These have been made by our political leaders, sometimes without—or heedless of—military advice. These leaders made such frequent and pleading proposals to the enemy to come to the peace table that Ho Chi Minh drew the natural conclusion that he was winning. At times our political leaders have appeared to be palsied by fear of world opinion, or of what Russia and Red China would do. The Israelis recently demonstrated that these need not be controlling considerations."

2. "Our political leaders elected to fight a land war, where every advantage lay with the enemy, and to employ our vast sea and air superiority in very limited supporting roles only."

3. "Surprise, perhaps the greatest of the principles of war (confirmed by the Arab-Israeli conflict), was deliberately sacrificed when our leaders revealed our strategy and tactics to the enemy. For example, they told the enemy that he need not fear invasion of North Vietnam. Whether or not we ever intended to invade the North, we should have employed every ruse known to the military art to convince Ho Chi Minh that invasion was imminent."

4. "The enemy was told also that we would not bomb populated areas, heavy industry, canals, dams and other critical targets—and thus sanctuaries were established by us along the Chinese border and around Haiphong and Hanoi. This permitted the enemy to concentrate antiaircraft defenses around the North Vietnamese targets that our Air Force *was* permitted to attack—greatly increasing our casualties. Missiles, oil and ammunition were permitted to enter Haiphong harbor unmolested and without protest."

5. "Unified command in the war zone, a necessity for military success as demonstrated in World War II and Korea, has not been established in Vietnam."

6. "U.S. political leaders have said that we do not desire to eliminate a viable economy in North Vietnam. This is tantamount to foreswearing victory—since a prime essential for military success is a viable economy. If Allied leaders had pursued such a policy in World War II, Hitler and Tojo might now be in charge of Europe and the Pacific nations."

7. "The Vietnam war is costing Russia about one billion dollars a year (at the dubious Russian established rate-of-exchange). It is costing the Red Chinese even less. The United States is spending more than twenty-five billion dollars in Vietnam annually. And the Allies are suffering over ten thousand casualties a month, of which about seven-or-more thousand are Americans. The Kremlin and Peking obviously look upon Vietnam as a very profitable venture in the overall East-West conflict. They can be expected, therefore, to insure that it continues so long as it proves profitable."

8. "Our leaders have elected to remain on the defensive in Vietnam. If we had stayed on the defensive in Korea, we might still be fighting there. If the Israelis had remained on the defensive in the Arab War, they would not have won."

What is General Eaker's recommendation to end the war in Vietnam quickly? It is exactly the same as the recommendation of every other experienced military expert with whom I have spoken: invade the North, close Haiphong and destroy every target that permits Hanoi to continue carrying on the war against us and the South.

One of the most astute of the military experts I questioned is Lt. General Arthur G. Trudeau, former Army Chief of Research and Development. His earlier assignments of importance, to name only a few, include: Commandant, Army War College; Assistant Chief of Staff, Intelligence; Deputy Chief of Staff for Plans, Headquarters, United Nations Command and Far East Command; and Commanding General, Headquarters, First Corps, in Korea. At present, General Trudeau is President of the Gulf Research and Development Company, Gulf Oil Company. He has been awarded a dozen important decorations for heroism and distinguished service.

Regarding the "threat" of mainland China and the Soviet Union, he said: "Red China doesn't bother me. They won't enter the war. They have too many internal troubles. And to support a war today would be beyond their logistic capabilities. Soviet Russia would not overtly enter the war either. They might try to harass us in many ways—to divert our efforts and energies. But again, their logistic lines would be impossible for them to support a war against us in North Vietnam."

With that big bugaboo cleared away, General Trudeau then proceeded to analyze the war situation in Vietnam as it stands now: "Two years ago, we could have quickly defeated Hanoi. When you decide to apply force—as we have decided to do—then you must apply it once and on as massive a scale as possible.

"But the way we're doing it is like someone suffering from a long illness that gradually gets worse. The gradual development allows the victim to become accustomed to more and more pain—so he learns to bear it. While if he were in an accident and broke a leg, or suffered an even worse, more abrupt shock, his tendency would be to give up. It's an 'unbearing' situation—because he was not prepared for it. In warfare, the element of surprise shock is vitally important. And we have not used that element in Vietnam."

"Is there any possibility," I asked, "that we can still recover that advantage of surprise and shock. How would you do it now?"

General Trudeau was thoughtful for several moments. "What would I do to bring this element into being again—although now it's late and much tougher to achieve? One, I would close the port of Haiphong. Two, I would destroy the rail communications between Hanoi and Red China. Three, I would cross the Seventeenth Parallel and set up a land army at two positions above the line to command passes and roads to the South.

"This would not be easy to do, but it's possible—if we controlled access to the sea, we could supply our troops by sea. It appears to me that we are already in control of the sea—if we wanted to make a point of it."

General Trudeau picked up a pencil and drew a map for me. He pictured the Chinese island of Hainon, on which Russian MIG fighters are based, safe from our bombs because we are afraid to irritate Russia and the Red Chinese. From the sanctuary of Hainon, the MIGS fly out to engage our tactical bombers and fighters. They've shot down far too many of our pilots as of this writing. But General Trudeau was not talking about control of the sea. "Our ships pass by this island at will right now. The Chinese have done nothing to stop us."

Next he drew the Vietnamese seacoast and indicated the positions of Haiphong, Vinh and a small mountainous area with a high point of 3,000 feet. The area is 150 miles north of the Seventeenth Parallel. He continued to draw in the Ho Chi Minh Trail and the roads that branch from it into Laos and Cambodia. Over these roads come a percentage of war supplies for the Vietcong from the two "neutral" countries. He indicated the position of a pass along the Ho Chi Minh Trail, which lies south of the roads and just below the 3,000-foot high-ground area. Finally, he penciled in the railroad from the Port of Haiphong to Longson on the Chinese Border, as well as another railroad that branched off from it at Hanoi to No Cay in China.

"Now," said General Trudeau, "if we make an amphibious landing of troops and settle them in on the high ground, they can control that pass and prevent supplies from going south to the Vietcong. Then we close Haiphong and destroy those railroads—to

prevent supplies from China and anywhere else from reaching Hanoi. If we do this, the war will be over fast."

"How fast?" was my natural question.

He paused long and thoughtfully. "That's tough to answer. But let me put it this way: if we close off the enemy's supply lines as I suggest starting now, it would be a great big boost to the Democrats' convention next August. I am not saying that it would take that long for the war to end. I am just giving you a time-envelope so you can make your own deductions.

"Personally, I am a Republican—and I would hate to see the Democrats gain such a boost. They would win the election, probably. But I would like to see them do this right now—for the good of our country. The security and survival of the United States must not depend upon partisanship. It must cut across all political considerations.

"The war in Vietnam is not merely an Asian war to give the South Vietnamese a chance to govern themselves. It is much bigger than that. It is a policy war to stop those behind *both* the Bamboo and Iron Curtains. It is aimed at preventing both Russia and Red China from gaining their stated objectives—which are to defeat their mightiest 'enemy', the U.S.A.

"In this sense, it is a war of survival for us. And the sooner the people of the United States understand this, the healthier *and safer* we will be."

As to closing the port of Haiphong, General Trudeau believes that the easiest way would be to sink the North Vietnamese barges that are continually clearing out and deepening the port's shallow channels. The barges could be sunk from the air.

General Trudeau punctuated our interview with an indignant postscript:

"McNamara claims that Haiphong supplies only a small percentage—he says about fifteen percent—of war materials to Hanoi. He is simply *not* correct. A major source of supply is Haiphong. It's more like seventy percent."

Neither General Trudeau nor Admiral Arleigh Burke is alone in their censure of the Secretary of Defense. One very high military authority, who doesn't want to be named, told me: "Mr. McNamara has never made a major military policy, decision or forecast about the war in Vietnam that has been correct." Still another authority said of the Defense Secretary: "He reasons from a conclusion to a hypothesis."

A more bitter critic of the Secretary is Air Force Maj. General Gilbert L. Meyers, a man who has been intimately associated with the Vietnamese war. In fact, until about a year ago, he ran the air war both inside and outside of Vietnam. As Deputy Commander of the Seventh Air Force, he had the practical nuts-and-bolts job of not only managing the air strikes over the North but also of directing the Thailand-based B–52s in their bombing of the South. One of my Pentagon friends says of him: "Gil Meyers is the most knowledgeable man you'll ever find regarding the war in Vietnam."

General Meyers himself says of Secretary McNamara: "If you can't come up with a numerical figure that proves we're going to win, why he won't buy any plan or suggestion. He's always looking for evidence. And you just can't look at a war on a facts-and-figure basis. For example, Mr. McNamara uses a figure to show why we don't have to knock out Haiphong. He claims that in South Vietnam the Vietcong and the North's regulars need only a relatively small tonnage of supplies to continue the war. And that if we knock out Haiphong, they could still bring in that minimum amount of tonnage without any difficulty."

"Is that true?" I asked.

"*No*, it isn't true!"

General Meyers continued. "I think the best description I've heard about the way Washington runs the war in Vietnam was General Eaker's. The sum and substance of his comment was that in the past, wars were fought by the civilians and managed by the professionals. But in this war, it's being fought by the professionals and managed by the amateurs."

General Meyers certainly has the professional background to speak out authoritatively. He is a fighter pilot with many important credits and 22 major decorations and medals. He was Commander of the First Fighter Group, the first jet fighter unit in the Air Force. For two years, during the Korean War, he was Director of Operations of the Fifth Air Force. Under his command, the 368th Fighter Group was the first Air Force unit to land in Normandy during World War II. More recently, before he was assigned to Vietnam, he was Commander of the USAF Tactical Air Warfare Center. His personal philosophy of life is: "Initiative and hard work will solve any problem." This is borne out by his survival of almost 60 tough combat missions on which he destroyed tanks and gun positions.

What does General Meyers think we should do to end the war in Vietnam quickly?

"You go after the lighters that unload the ships in Haiphong Harbor. The water is fairly shallow up there and the ships from Russia, China and Eastern Europe have to anchor some distance offshore—which means that the lighters have to travel a considerable distance. They can obviously be intercepted and destroyed by our Navy and some of them by air. I don't see any reason why we'd have to come in contact with the ships themselves—if we're afraid of angering the Russians and Chinese—in order to destroy their cargo.

"And I'd keep going after those lighters until the enemy ran out of them, could not build any more. Then there are other important targets I'd hit. There's the Command Headquarters in Hanoi. The Air Defense Headquarters are there too. These are the kinds of targets, for example, that we hit all the time in World War II. And all I'm suggesting is that we use the same kind of targets in North Vietnam."

"So why don't we?" I asked.

"Well, that question defeats me. Of course, in Washington, the big bugaboo they talk about is a fear that the Russians and the Chinese will come into the war. I think that's ridiculous! Our civilian planners in Washington always refer to the 'increased risk.' Now, I'll admit that there would be some increased risk. But you have to qualify that risk. It's a one-in-a-thousand kind of thing—which is a heck of a lot different than if it were one out of two. Nobody has ever attempted either to qualify *or* quantify it. And as you well know, our Secretary of Defense is a great man for quantifications. He quantifies many other things. Why not this risk?

"Personally, I think that the greatest risk we ever took in the war was our initial attack against the enemy in the Gulf of Tonkin. If the Russians and Red Chinese wanted to come in against us, that was the time to come. Obviously, today, in Vietnam, we're in a much better position to fight the Russians and the Chinese if they decided to come into the war. But if they were afraid to come in against us earlier, why would they want to come in against us now? There are too many reasons against it.

"As far as Russia is concerned, she'd have to bring her troops in through Chinese territory—and obviously, the Chinese wouldn't let Russian troops come into her territory, I know. Sure, China would permit the Russians to support the war—just as she's doing now, with supplies and instructors. But Russia couldn't *really* do much about fighting us—not much more than she could do about our confrontation with her over the Cuban missiles.

"On the other hand, China is so occupied at home that she needs all the troops she's got just to maintain law and order within the country. So when you add these two facts together, I just don't see how there can be any chance at all of those people coming into the war against us."

If we fought the war as General Meyers feels it should be fought, how long does he think it would take to victory?

"Well, I'm going to estimate this on the long side intentionally. It would probably be much shorter than this—but I'd say we'd have it over in six months, at the most."

Hypothetically, if General Meyers were given complete command of the situation, what would he do?

"In the air war, I'd hit the North with everything we had. And in the South, I would give Westmoreland the ground troops that he needs to win the ground war. He's never been given what he's asked for. And I know this, though it never comes out publicly. I know what he thinks: I've talked with him many, many times about this. What we're doing now violates every principle of warfare that we in the military have ever known. For comparison take the Israeli-Arab affair. Israel got there 'firstest with the mostest'—and the war was over in six days. That's because they went all-out.

"You can't win wars necessarily by killing people. You've got to *overwhelm* the enemy. And when you overwhelm him, you kill fewer people than you do by picking at him day after day—as we do now. This has been my feeling all along. And Westmoreland and the Army people certainly feel the same way about this as I do.

"But you never read this in our newspapers. This is why I feel so strongly about the situation. It really hurts me to see American people over there dying unnecessarily. You have to understand all the little details—how the targets are picked, for instance—to really know how closely this war is being run from the White House and the Department of Defense. Every target, of course, is cleared with the President. I don't think the general public knows this.

"Let me give you an illustration: when Lyndon Johnson was sick with his first operation a year ago, we didn't get any new targets. I'll give you the mans name who told me this, but please don't use it. (It was someone exceptionally high up in Government.) I met him in Vietnam on a visit. And I asked him: 'Why aren't we getting more air targets?' And he said: 'Gil, you've got to remember the President is sick—and nobody wants to bother him.' "

My final interview was with Brig. General Henry C. Huglin. General Huglin is a military-political scholar and a specialist in strategic warfare. He was Deputy U.S. Representative to the NATO Military Committee and Standing Group from 1959 to 1963. He is a graduate of the National War College and a member of the Council on Foreign Relations, New York, as well as the Institute for Strategic Studies, London. At present he is Senior Military Scientist with TEMPO, General Electric Company's Center for Advanced Studies.

General Huglin's is the objective scholarly approach. He feels that we're coming along fairly well now in the Vietnam War—but not well enough. He told me:

"I think that several years ago we should have put on a lot more concentrated pressure with our air strikes—and I think that would have helped to defeat the enemy. Right now I would like to see the port of Haiphong mined—or closed off. And I would like to see more overall pressure used against Hanoi.

"I also think that we would have had the results we were seeking if we hadn't had the dissent in this country that Hanoi has misread into thinking that they could hold on a little bit longer—until finally the dissenters would prevail."

"How about mainland China and the Soviet Union?" I asked him.

"I'm not worried a bit about them. Never have been.

"Why should Soviet Russia take us on over Vietnam, when she didn't take us on over Cuba—where she was directly concerned? And China—belligerent though she is verbally—has been extremely cautious in actual actions wherever our interests or commitments are involved. And rightly so. Because things are so much different now than they were during the Korean War—where we were relatively weak. We are so very much stronger now. And China isn't any stronger today than she was during the war in Korea. Politically, she's much weaker. The atom weapons that she may have don't make that much difference. And she's not about to give us an excuse to launch even conventional air strikes against key installations that we would choose to strike. Such as her nuclear research center or her transportation system—or anything.

"We wouldn't have to fight a land war with China. And I don't think we would choose to do it. So I don't think there ever has been any real chance of China coming into the Vietnam War—although, of course, a lot of people have been worried as hell about this. Many of these are really thoughtful people, not merely peaceniks. But they just don't assess the situation the way I think that the Chinese *have* to assess it—before taking any action."

Thus General Huglin, from the scholarly point of view, is in agreement with everyone else I interviewed regarding the tenuous "risk" we would be taking if we went all-out to win the war in Vietnam. So why don't we win it?

(EDITOR'S NOTE.—The foregoing represents a body of opinion which, we feel, deserves to be and should be heard by the American people, who for too long have been given piecemeal and confused reports on the causes, the meaning, and the conduct of our war effort in Vietnam. While we recognize it is our duty to give this opinion a medium of expression, we do not necessarily concur with the conclusions of these respected retired military leaders. We invite your attention to another article in this issue, in which a very wide range of views on the war are expressed by leaders in a variety of walks of life. We feel that only by weighing carefully all the informed opinions that are expressed on this matter, and judging them in the light of our own knowledge, can we firmly decide in our own minds on the wisdom, justice, and efficacy of our course in Asia.)

CEASE-FIRE

HON. MARTIN B. McKNEALLY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. McKNEALLY. Mr. Speaker, under leave to extend my remarks in the RECORD I am pleased to include the following address delivered by a former distinguished Member of the House, Hon. Hamilton Fish, Sr., before the Oak Grove Grange on September 26, 1969. Many Members of the House know Mr. Fish and will be interested in his point of view:

CEASE-FIRE

(Speech of Hon. Hamilton Fish)

Fifteen years ago, in opposing the SEATO Treaty before the Senate Foreign Relations Committee, I stated that the signatories would run out on us and leave us holding the bag, which they did, including France and Britain. I further stated that if we became involved in a civil war in Southeast Asia, and sent our armed forces there, "that the Communist Politbureau and the Communist General Staff would get drunk for a week, as they would like to keep our armed forces in the jungles and swamps of Vietnam". And that is exactly what they have succeeded in doing by draining our financial resources, killing 36,000 Americans and wounding a quarter of a million while they are taking over economically, politically and militarily, the Arab Nations in the Eastern Mediterranean area.

I am convinced that the time has come for constructive action to end the war. I believe in the integrity and sincerity of President Nixon in his determined efforts to end the war in Vietnam on the basis of a fair and honorable peace. I commend him for taking the first step by the withdrawal of 25,000 American troops from Vietnam and believe that within a year, it will be reduced by 100,000. But why continue the killing of American soldiers, those of our allies in Vietnam for a single day in this tragic war; the longest in the history of the United States and the fourth deadliest.

I urge President Nixon to offer a cease fire by all our Armed Forces and those of the enemy without any reservation of any kind on the basis of the status quo. This should be done not later than November 11, 1969—Armistice Day. Such an offer by the President would be welcomed by most Americans, except a few militants who insist on all-out victory regardless of the cost in lives. It would be acclaimed by all neutral nations as a definite act by the United States to secure peace in Vietnam and to stop the bloodshed.

If North Vietnam and the Viet Cong turn down a peace offer based on cease fire, then all the neutral nations will place the stigma for any continued fighting and killing upon the Communists in North Vietnam and the Viet Cong. There may be some risks but there are always risks in war. But as a former member of Congress, I think they have been grossly exaggerated and am inclined to think that many of our top Generals would favor a cease fire. Actually, a cease fire may be a military advantage for us, as a major part of North Vietnam is a sanctuary against air bombing. If more North Vietnamese troops invade South Vietnam or Laos, they would be a constant target for our bombing if the war of attrition continues.

If President Nixon publicly urged a cease fire, it would stop all Vietnam War sniping going on in the United States and change overnight our prestige and influence with the free nations of the world. "Blessed are the peacemakers, for they shall be called the sons of God."

Speaking to one of the largest Granges in the Hudson River District, I know that all Grangers are interested in the preservation of freedom and peace. I urge the Congress to adopt a constructive policy that no American citizen or his family, shall go hungry, if he is willing and able to work. We have large surpluses of food available. Americans and their families should have preference over foreign hand-outs. If necessary, foreign aid should be reduced to provide food for our own under-fed citizens.

I disapprove of the recent proposal of Senator Goodell of N.Y. to have Congress cut the funds for our armed forces in Vietnam by the end of 1970. This proposal would be playing into the hands of the Communists and would undermine the peace conference at Paris.

If a Cease Fire is agreed on, it may take a year or more to finalize peace terms which will afford time to the armed forces of South Vietnam to be trained and equipped on a larger scale.

The American people want to stop the fighting and killing at the earliest possible time with honor. As a member of the Foreign Affairs Committee of the House of Representatives for 25 years, I hope President Nixon will give these suggestions his constructive approval to end the war on a fair basis. The greatest Christmas present that President Nixon could give to all Americans, regardless of partisanship, would be an immediate Cease Fire agreement in Vietnam.

THE ALASKAN NATIVE STORY: AN INDIAN CHIEF SPEAKS

HON. ED EDMONDSON

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. EDMONDSON. Mr. Speaker, last week a subcommittee of the House Committee on Interior and Insular Affairs traveled more than 3,000 miles in and across Alaska, seeking facts regarding the Alaska native claims question.

An impressive witness was Alfred Ketzler, president of the Tanana Chiefs Conference.

The Ketzler statement tells a great deal about the origin of the native claims and the legislation now pending before the Congress. The text of that statement follows:

STATEMENT OF ALFRED KETZLER

My name is Alfred Ketzler. I was born and raised in Nenana, Alaska. I am president of the Tanana Chiefs Conference. First, I would like to tell about the Tanana Chiefs Conference.

The Conference was organized in 1962, shortly after statehood and long before the discovery of oil. A number of people in Fairbanks and Nenana got together and discussed the sure and gradual loss of the native land around the homes of people present at the meeting.

We asked ourselves: Was this the same all over Alaska? We had no way of knowing. We then decided to call a meeting of villages at Nenana. The Nenana Native Council had dog races and a potlatch scheduled for early March.

In mid-February, we wrote a letter of invitation to 30 villagers in Interior Alaska. Of these, 10 responded to the meeting which was held in early March.

At this meeting, we found the land problems to be similar in all the villages. It was decided that we would hold a meeting at Tanana and we would invite all villages to attend. At Tanana, where the Tanana and Yukon Rivers meet, Athabascan Indian chiefs traditionally met.

The Nuchulayya, meaning both the location and the meeting, was the seat of government for all the Interior Athabascan tribes.

We decided to revive the meetings and called the Tanana conference for late June of 1962.

Thirty villages responded to our invitation. At that time, I stated that main motive for the meeting was the land problems. Other topics under discussion included hunting, trapping, and fishing rights, as well as educational needs.

Each village attending the meeting was represented by the village chief or a representative appointed by him. A name, Dena Nena Henash, was selected. The Interior Athabascan Indians were once again joined into one central organization.

The name of the organization has since been anglicized, now being called the Tanana Chiefs Conference. When the Conference was formed, there was yet no statewide organization which would represent all the Alaska Native Peoples.

Four years passed by. Other regional associations were formed. As greater challenges were made to Native owned lands and subsistence rights held by Natives, the need also grew for a statewide organization.

This need was fulfilled with the organization of the Alaska Federation of Natives in 1966, with which we are affiliated and through which we seek a settlement of our native land claim.

The Tanana Chiefs Conference supports legislation proposed and authored by the AFN and their counsel.

We support all proposals included in the A.F.N. legislation: $500 million as compensation for lands lost prior to the enactment of the bill, 40 million acres in fee title, and retention of a two per cent overriding royalty, and the creation of native owned and native operated development corporations as specified in the A.F.N. legislation.

Although we support the proposals, we believe that our claims do not ask for the full measure of what we deserve. When Alaska Natives first began to push the claims, we thought that the figure of 80 million acres was not enough land to support our people. Should we have asked for as much land as each village historically used and occupied, the figure would have vastly exceeded 80 millions of acres.

When we began to discuss the 80 million acre figure, representatives of the Interior Department and the State of Alaska said that such a claim would be unacceptable; we compromised at 40 millions of acres. The attachment of the Native people to the land is so great that they would reject any of their leaders who attempted to compromise further.

Native people have been told that we do not have a title, a piece of paper which asserts our ownership to our lands.

We believe our ownership and our ties to our land far exceeds any deed. We never did need any document to tell us the land is ours. This we have always known.

It is true that we have fished, and hunted, and harvested our livelihoods from the land, as did countless generations of our people before us. This, with our instinctive feeling of ownership, tells us that the land belongs to us.

We need the land for other reasons, too. We would like to establish a very long-term economic base with our land. It is our belief that we must receive the amount of land which we request so that we may retain a share of the benefits from our land.

It is our belief, also, that we should receive a fair land settlement, so that what we receive will be equal to the true value of the land with respect to future development. In this way, we hope to insure a permanent settlement.

This is also why we ask for the two per cent overriding royalty. Our ancestors maintained a share in the land; we now claim a share to the land; we want our children and their children after them to retain a share in the land.

This we feel can be done if we receive a 2 per cent overriding royalty.

Should you render justice to the Alaska Native, in granting us the full amount of money, the full amount of land, and the overriding royalty, you must also allow us self-determination in managing our settlement.

We present our case to the Congress of the United States so that we might avoid the legal entanglements involved in going before the courts. To further avoid entanglements and the complications of federal bureaucracies, the administrative patterns of the settlement must be developed by Natives.

The major property interests must be held by Natives, and not by state or federal agencies. Those who are the owners must have the greatest say. The royalty benefits must be spread widely, but with full regard to private property concepts.

The legislation which we have authored and proposed through the AFN is designed to utilize modern corporate forms, so that we will be able to compete along with anybody else in a capitalistic society.

Among the most important aspects of our bill are the safeguards which are therein provided. The Alaska Native Commission is such an example.

You have heard other than myself who have told you of how our people used and occupied more land than that which we request. I hope that you can now understand, that even by the most conservative estimates, we request only from five to ten percent of the true worth of our claim.

Please give the matter of our claim the most serious consideration. It is the final opportunity for justice—both for the Nation and for our people.

Thank you for the opportunity to present you with this statement.

KENT UPHELD IN HANDLING SDS TROUBLE

HON. DONALD E. LUKENS

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. LUKENS. Mr. Speaker, a recent survey conducted at Kent State University in Kent, Ohio, revealed that 81 percent of its students and 91 percent of its faculty approved firm handling of SDS disruption on their campus.

I think these are interesting statistics highlighting the fact that the broad body of students and faculty at Kent State are fed up with the radical tactics and goals of SDS. It is heartening news when one may wrongly interpret from the media that universities are ready to spawn revolution.

I include an article from the Cleveland Press on October 7 which details the results of the survey of Kent State University:

KENT UPHELD IN HANDLING SDS TROUBLE

(By Bud Weidenthal)

A survey at Kent State University shows 81% of its students and 91% of the faculty approved of calling police to put down a Student for a Democratic Society disruption on campus last spring.

The findings are contained in an opinion study conducted by a Columbus firm.

The cross section sample of more than 600 students showed that 54% approved of everything the KSU administration did in reacting to the SDS incidents.

The encounters came to a climax when about 50 student radicals smashed their way into a campus building to break up a disciplinary hearing involving some of their leaders. Fifty-two students and outsiders were arrested.

The firm of Goettler and Associates reported to KSU president Robert I. White that 64% of the students were critical of "communications between the administration and the students." But that 90% felt that the incidents were "primarily related to national problems and not specifically related to Kent."

Of campus activities protested by SDS, 87% of those interviewed favor continuing Reserve Officers Training Corps (ROTC) in some form on campus, 91% favored continuation of the law enforcement training courses and 80% had no objection to criminal investigation research projects.

The report said in general that "the overriding conclusion is that the majority of students and faculty are quite satisfied with Kent State University."

It found that students believe "racism, racial problems and racial prejudice are the most important issues facing the American people today." The Vietnam war was second.

A DAY FOR THE HISTORY BOOKS

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. UDALL. Mr. Speaker, it is obviously too early to know what long-range significance will attach to the Vietnam moratorium observance held on October 15. However, the assistant managing editor of the Tucson Daily Citizen sees it as possibly the beginning of a new force in American political action.

Three days after the event Tony Tselentis wrote an article for the Citizen which I think is eloquent in its description of what occurred in Tucson that day. I should like to call it to the attention of my colleagues. I insert it in the RECORD at this point:

A DAY FOR THE HISTORY BOOKS

(By Tony Tselentis)

"Beautiful, you're beautiful," the speakers told the crowd during the downtown segment of the Vietnam Moratorium.

And the predominantly student crowd indeed was beautiful in its behavior.

They came, several thousand strong, to make a peaceful protest and fulfilled their mission to a T.

They were dignified and disciplined. In view of much that has gone before, this does add up to beauty.

They exercized their rights of assembly and free speech without infringing on the rights of anyone else.

They said their aim is to preserve the nation—though many believe their action could lead the other way.

There's nothing wrong in arguing with their logic. But there's everything wrong in questioning their patriotism.

These participators in the Vietnam Moratorium were to a large degree the sons and daughters of Tucson.

When the day's activities were over, many of them went home out Broadway, out East 5th, out Speedway, out First Avenue, out Oracle Road, out South 6th Avenue and out the other routes that Tucsonians take home.

What did they and their counterparts throughout the country accomplish?

The answers are varied. The pros say it was a success—that the Vietnam Moratorium will lead to a greater national mandate for peace. The antis say that either nothing has been changed or that the days of peace has been retarded because the enemy will draw new strength from the moratorium.

Each person saw the day through his peculiar perspective. For some, it was dressed with sunshine and hope; for others, with darkness and foreboding; for others, mixed feelings; and still for others, puzzlement—detached questioning.

One conclusion is certain: Oct. 15 will not be forgotten.

Although there have been large-scale peaceful protests in this land before, there never has been any quite like last Wednesday's.

The jury will be out—perhaps for a long, long time—on what effect the Vietnam Moratorium has on the war.

When the answer is known, it will go into the history books.

Probably an even larger effect than what Oct. 15 meant to the Vietnam War will be what the day meant as the crucible of a new force in American political action.

SOUTHWEST WOMEN'S ASSOCIATION FOR FINE ARTS

HON. JOHN M. ZWACH

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. ZWACH. Mr. Speaker, too often in this day and age, many people think there is a lack of initiative in rural America. And yet this is not so. Rural Americans are doing more for themselves than ever before. A perfect example is the Southwest Women's Association for Fine Arts, which is located in my district, in southwestern Minnesota. This organization is working to bring exceptional talent to its communities.

So that all may know of how rural Americans are working to bring the arts to their communities, I hereby insert a letter to the editor of the Redwood Gazette written by Mrs. Thomas Ehlers, which explains the organization:

TO THE EDITOR:

A year and a half ago a group of women from 19 counties met to discuss how we could enrich our lives in rural America. Mrs. James Flinn and I represented Redwood county. All present agreed that our small communities guaranteed the most peaceful and rewarding mode of living in America, with the exception of live entertainment and enjoyment of the fine arts. Other than the impressive concert series held in most all of our communities, we had very little culturally to offer ourselves or our children.

The Hill Foundation had very generously offered to help fund a rural organization that would work to bring exceptional talent to rural communities. We found, also, that a certain percentage of our tax dollars on both a federal and state level were available for such activities. (Metropolitan areas had made use of these government funds for many years, while the money from the rural areas had sat untouched.) Thus, having the necessary funds, we organized together to form Southwest Women's Association for Fine Arts (SWAFA). We are the first such organization in America, and many communities, all over the United States, are watching the growth and success of SWAFA, hoping to copy our example.

The past year SWAFA has sponsored four presentations of the Minnesota Orchestra, 118 performances of professional theatre (the majority being given to high school audiences), and numerous art exhibitions. We have, thus, brought outstanding artists and talent to deserving communities all over southwestern Minnesota.

In May of this year, SWAFA held a charter membership drive, with 650 women joining. Seventy-five of these women joined the Redwood Falls SWAFA chapter. This month we are having a second membership drive, which will terminate with a big Redwood SWAFA kickoff, for all members, October 27. We wish to extend an invitation to join SWAFA to all of the women in this area, especially those that live in communities outside of Redwood Falls. We have many wonderful programs and opportunities planned for the months ahead, and we want our efforts to be enjoyed in every community, no matter the size.

Anyone interested in belonging to SWAFA may do so by contacting our membership chairmen, Mrs. James Wetherbee, 501 Veda drive, Redwood Falls. There is a $2 membership fee.

Sincerely,

Mrs. TOM (SANDY) EHLERS,
Publicity Chairman.

NIXON ADMINISTRATION AND VIETNAM

HON. CHARLES E. CHAMBERLAIN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. CHAMBERLAIN. Mr. Speaker, two recent editorials broadcast by WJIM–TV of Lansing, Mich., were devoted to Richard Nixon's handling of the Presidency, both generally and with regard to the situation in Vietnam. I believe these two statements offer a particularly well balanced view of the first months of the new administration and deserve to be carefully noted by all observers of the national scene. I, therefore, insert them at this point in the RECORD:

EDITORIAL

SEPTEMBER 18, 1969.

The political columnists profess to be confused by the Presidential performance of Richard Nixon during his initial eight months in office. This, we believe, is a sure sign he must be doing something right.

Columnists like labels. They're handy and all-purpose and take thinking out of their work—thinking, they find, is difficult at best.

Try as they may, they can't put a label on the man currently occupying the White House.

Early in the game they tried out the "conservative" tag—then further confused them by proposing the most far reaching and liberalized tax reforms in the nation's history. So they went back to the thesaurus and trotted out the "hawk" label—then lo and behold, for the first time in this decade Nixon became a President who took troops *out* of Vietnam instead of putting more in.

Now, the Restons, the Alsops and the Novaks were really concerned—lights burned late in Georgetown libraries and overnight the word for Nixon became "flexible." Well, maybe this time they've hit it right. In desperation the pundits have settled on the non-label and admitted they just can't classify this President with their typical, simplistic transparency.

As far as we're concerned that's first rate. It's also what the country wants in a President in our estimation. A man who works hard at the job every day, who changes and shifts as conditions change—a man *for* all seasons, because he is a man *of* all seasons.

OCTOBER 9, 1969.

The nation's two major newsweeklies are on the stands declaring, as if with one voice, that the country is heading into a Winter of discontent. Indeed, there are indications aplenty that the coming months will vex, try and perhaps decisively test this nation and its President of less than a year . . . Richard M. Nixon.

On October 15, unless current predictions widely miss the mark, we will witness the greatest anti-war demonstration in America's history.

And now, finally, in this gold and crimson autumn, over a decade since the first fatal steps were taken in Southeast Asia . . . it is Vietnam that is "Topic A."

The latest polls demonstrate conclusively the majority opinion ranging across the troubled face of America is that ending the war is our major national concern. So while there is a wide spectrum of expression on *how* to bring the war to a conclusion there is no longer any doubt that Americans are united in saying "get it over with."

WJIM believes this singleness of purpose . . . this unity . . . can be a source of national strength, welding together, even in fiery disagreement, the frayed, steel nerve ends of a divided national purpose.

On October 15, in our judgment, the key word should be "Understand" . . . now that we know the goal is "end the war", each of us, and each group of us, should think on October 15 about trying to "understand" the point of view of those who approach the identical goal from a different direction.

President Nixon certainly wants to get this country out of Vietnam . . . and in our judgment, criticism of his policy has been immoderate and thoughtless. Eisenhower, Kennedy and Johnson each increased our commitment in Vietnam while failing to establish goals and priorities. Nixon has reversed that trend, he is taking American troops out of Southeast Asia and has clearly indicated his intention to keep doing so.

AMERICAN PROPERTY SEIZED BY BOLIVIA

HON. FLETCHER THOMPSON

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. THOMPSON of Georgia. Mr. Speaker, the news coming out of Bolivia over the weekend which indicated that the property of Gulf Oil Co. is being seized is a further indication of the continued deterioration of American prestige throughout the world. According to the chairman of the Subcommittee on Foreign Operations, the gentleman from Louisiana (Mr. PASSMAN), foreign aid has cost America more than $175 billion since 1946. And, yet, we allow countries such as Bolivia to seize American properties. These countries then set up a commission to determine the worth of the properties with the thought that at some indeterminable future date partial compensation will be paid. But in the meantime, those Americans who have had their property seized are the losers. I have today written the chairman of the House Foreign Affairs Committee and have asked that consideration be given to including a clause in the foreign aid bill which would require the immediate cessation of all American aid and loans to any country who seizes American property unless they have first made adequate compensation. The mere promise that at some indeterminable future date compensation would be made would not satisfy this requirement of law.

It is time, Mr. Speaker, that we stood up on our hind feet and told the nations of the world that we are not going to have our citizens kicked about and then continue to take taxpayer's money and give to these nations because of a device which holds out hope of payment for property seized.

THE ALASKAN NATIVE STORY: A YOUNG ESKIMO SPEAKS

HON. ED EDMONDSON

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. EDMONDSON. Mr. Speaker, one of the most eloquent and moving witnesses to appear before the Subcommittee on Indian Affairs during hearings in Alaska last week was a young Eskimo by the name of Martha J. Sara.

A junior student at the University of Alaska, Martha Sara was a registered nurse at the age of 19 and director of an important State institution before reaching the age of 21.

Her statement was one of the most eloquent appeals for confidence in the young people of America that I have ever heard, and provides many convincing arguments in support of the native claims legislation.

The text of Martha Sara's statement follows:

DO NOT REFUSE US

(Statement of Martha J. Sara)

Mr. Chairman, members of the board, my name is Martha J. Sara. I'm an Eskimo. I was born and raised in Bethel. I'm a junior at the University of Alaska. My major is Sociology and I plan to go on and become a social worker.

On behalf of the Theata Club, which is an organization of native students on the University of Alaska campus, and on behalf of myself, I would like to say that I'm grateful for the right and am happy to take the responsibility to testify on behalf of the Native Land Claims.

Along with hundreds of other native young adults, I've taken the responsibility of becoming educated to better equip myself for our coming responsibilities in the management of our own affairs.

This is not an easy undertaking.

Although I am not the best example available, I will use myself. After high school I entered a school of nursing in Los Angeles. It was difficult for me because I had to overcome handicaps not faced by most American youths. I entered a different culture. Along with the dynamic process of learning what the school offered, I also had to adjust to new values and surroundings. I graduated and became a registered nurse at the age of nineteen. I was filled with a sense of accomplishment and I applied for employment at the Public Health Service Hospital in Bethel. Never before had they employed an Associate in Arts degree registered nurse—and so young. They had to get permission from Washington; permission was granted. I worked only one year when our community decided to open a Prenatal Home in Bethel through the assistance of the Office of Economic Opportunity. A Director was needed with the qualifications of a registered nurse. I enthusiastically wrote a letter of application even before applications were printed. I knew the people and a lot of the future clients having worked most of the year in the Maternity Ward in our hospital. To my delight I was hired. Complications arose, however, because someone pointed out that in order to be a Director of a Prenatal institution in the State of Alaska one had to be twenty-five years old, and I was not yet even twenty-one. Letters were written on my behalf and permission was granted from Juneau for me to keep and fill the position. The funding was unsure because the deadline for occupancy was nearing and the building was unfit for expectant mothers as far as the State Sanitarian, State Fire Marshall, and Child Welfare Institution Directors were concerned. Complete renovation of the physical plant and procurement of necessary equipment was urgent. Needless to say, I became an amateur painter, plumber, carpenter, electrician, diplomat, beggar, and petty larcenist. Local men did the plumbing, carpentry, and electrical work in conjunction with the BIA. Local boys under the Neighborhood Youth Program did the painting. Used furniture was procured from the hospital through GSA. Supplies were ordered and opening day saw us admitting our first lady! We struggled and worked for what we wanted and got it. Of course we had the assistance and backing of the agencies, but the native peoples involved made it work. We were competent and proved it.

I am here representing a body of eager, willing young adults ready to learn, work, and show our capability in the management of our own affairs. I am just one of many who are willing to struggle for an education, who are willing to work hard, the way we worked on the Bethel Prenatal Home.

We are not asking for all our land—just a portion of it and if you grant it to us, we will have to strive very hard because what we are asking for is less than what we believe is fair. But we are capable of striving very hard.

And how shall you refuse us? You who have centuries of learning, education, civilization, colonization, expansion, domination, exploitation behind you? How shall you refuse us?

Do not refuse us because we are young! In youth there is energy, drive, ambition, growth, and new ideas. Do not refuse us because we are young! For we shall mature!

Do not refuse us because we are undereducated! We are learning fast; and utilizing our newly gained knowledge, comparing and weighing the truths and benefits of this knowledge. We know that the 40,000,000 acres we are asking for will provide a minimum protection to hunting and fishing. We understand that we need the identification with, and the feeling for our *own land*. We also realize that we need this land as an economic base for our people. The land will be used as a commodity in our economic base. We can accomplish this with 40,000,000 acres. $500,000,000 is a lot of money. We understand what a vital role this can play in the economic base of our people. We realize that with proper and careful handling and investment of this money we can make it work for us. We do not plan to make improvements without first establishing a sound economic base which will provide for growth and return. After this is established, then we can begin our improvements. We will then be able to maintain and expand these improvements. We realize that we can not only benefit our people, but *all* of Alaska. All this for $500,000,000. Do not refuse us because we are still learning! For we are fast learning!

Do not refuse us the chance to progress! We too have a dream for the progress of our land. We hold a superior position to develop our country because it is our country, and we love it. We will be more cautious in its utilization—and I deliberately use the word "utilization" instead of "exploitation." We will weigh each prospect carefully to assure ourselves that we are making the best decision for our generation and those generations to come. We are not here to grab; we are here to live with the growth of our native land. Do not refuse us the chance for progress. For we too share the dream of progress.

Do not refuse us because you are afraid we don't have competent leaders! I represent a generation of paradoxes. We are paradoxes in the fact that we are the closest links to the parties farthest separated in this issue. One of these groups is our beloved elders whom we left back home only a short time ago, who, along with others, still cling to the old ways and depend upon the land for subsistence. Another group is made up of our able leaders, Native and White, who are presently in positions of decision. We are close to the old ones and the people back home because, having recently left them, their problems, worries, and fears burn deep in our hearts. We know what makes them happy; we know what can fill them with contentment; we know what gives them hope. At the same time we are close to our leaders in the fact that we are striving and aspiring to their positions of decision. Native young people are rising up to meet the demands and expectations of a foreign and sometimes hostile society. The day of our leadership is not too far off. When that day of fulfillment comes, I would like to think that we can proudly take our places side by side with the present leaders to direct the affairs of our own people. In their wisdom they can quell our fears, channel our energy, help shape our innovative ideas, direct our aggression, and interpret our anxieties. Together we can provide able leadership! Do not refuse us for fear of poor leadership! For we are capable leaders.

Do not refuse us simply because you purchased the sovereign right of our land! Our fathers since time began have paid dearly for our homeland every generation. They struggled against the harshest environment known to man and survived to teach us to do the same. Each generation paved the way for the next. Do not refuse us because you purchased this right! For our forefathers paid for it long before your forefathers had the money!

Do not refuse us because we are a minority! For this is America! We have proved in many ways that, not only do we take advantage of our rights and freedoms along with other Americans, but we are willing to, and have, fought equally for all its privileges. Our native soldiers fought and died for the United States in World War II, the Korean War, and in the present war in Viet Nam. As American citizens, we have equal rights and have taken on equal responsibility. So do not refuse us because we are a minority! For this is America!

In closing I would like to say that competence is something that has to be proven. And as young native adults we have demonstrated our abilities and are now proving it.

I would like to add that we are deeply grateful to you all for taking time out of your busy schedules to come and hear our testimonies. It is deeply appreciated. Thank you! Quyana caqneq!

HUNGARIAN REVOLT

HON. GLENN CUNNINGHAM

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. CUNNINGHAM. Mr. Speaker, 13 years ago today, the world witnessed one of the most brutal episodes of modern times. The people of Hungary revolted against the Communist masters who held their nation in bondage.

While the world stood aside, the freedom fighters of Hungary—men, women, and children—were crushed beneath the treads of heavy Russian tanks.

The streets were red with blood of those whose crime was a longing to be free and a love of country. Some estimates of the slaughtered and executed reached 32,000. Another 200,000 fled.

Mr. Speaker, let us never forget these brave people who fought and died for freedom.

VIETNAM MORATORIUM AT THE UNIVERSITY OF IOWA

HON. FRED SCHWENGEL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. SCHWENGEL. Mr. Speaker, the Vietnam moratorium demonstrations on October 15 have evoked a good deal of emotion, both pro and con. Personally, I feel that peaceful dissent is part of our American tradition. Our Constitution gives us the right to make our views known through legal and reasonable methods. That right must be preserved.

Unlike the SDS demonstrations in Chicago recently, which were violent, illegal, and which cannot be tolerated, the demonstrations on October 15 were, for the most part, peaceful and legal. The right to dissent, however, should not be confused with the rightness of the dissenters. If they were demonstrating for peace, few people would argue. I want peace and I am sure all Americans do.

If the demonstrations were aimed at President Nixon's Vietnam policy, I think the dissenters were wrong, even though they have a right to say so. It is my belief that President Nixon is moving rapidly toward a peaceful solution to the Vietnam problem, and I support his policy, even though I feel we could move faster.

The moratorium resulted in a particularly delicate situation for the officials of our universities and colleges. The president of the State University of Iowa at Iowa City, Iowa, Willard L. Boyd, has done an excellent job of handling this problem and drawing a distinction between the right to dissent, and supporting the policy advocated by the dissenters. I would like to take this opportunity to share with my colleagues the memorandum which he issued on that occasion, together with an editorial from the Des Moines Register of October 9 respecting this policy:

OCTOBER 15, 1969: DAY OF INQUIRY

(Memo from the Office of the President—A statement to students, faculty, and friends of the university)

I believe that The University of Iowa should devote itself on October 15 to a discussion of the issues involved in the war in Vietnam. I urge departments, colleges and other University organizations to arrange for seminars and discussions throughout the University during that day. To facilitate such consideration of the issues, all University facilities not otherwise in use, including the Pentacrest area, will be available for these discussions. In this way, students and faculty members will have the opportunity to participate when they desire to do so.

I have been requested to suspend all classes on October 15. I decline to do so for two reasons:

(1) As a matter of practice, adherence to class schedules and the question of attendance have been primarily collegiate matters at this University. Neither has been a matter for the central administration in the past, and I do not feel that this practice should be altered at this time. The varying circumstances and needs of each college, in light of the special requirements of its diciplines, staffing, facilities and responsibilities, warrant the decentralization of such decision making in this University.

(2) Even if I felt that decisions of class schedules and attendance should be withdrawn from the colleges, I would not be inclined to suspend classes because of the internal civil liberties issue involved. Many faculty members wish to teach on October 15th, and many students wish to attend classes as usual on that date. They should not be denied an opportunity to do so. This institution has a special obligation to respect the rights of all of the many individuals on its campus with divers viewpoints and interests.

I believe that the existing scheduling practices of the colleges will permit widespread participation in the day-long collegiate and departmental discussions. By providing programs throughout the day, students will be able to attend sessions during their free hours. Because scheduling conflicts occur in a university of this size, faculty do on occasion cancel classes to permit students to attend important discussions which occur at the class hour. Makeup classes are provided for when the loss in time adversely affects the course plan.

The question of student class attendance is a matter determined individually by students and faculty members. Since October 15 is a day of personal conscience, I recommend that no student be penalized who fails to attend a class on that day because of his personal convictions. And where a faculty member cancels his classes and sets a future makeup date, I feel that none of his students should be penalized for inability to attend such a makeup class if he had been willing to attend class at the time originally scheduled.

It seems clear that October 15 cannot be considered as an isolated event, in light of announced intentions in the press with regard to moratorium action in November and December. Although I have been assured that there is very little likelihood that a two-day suspension of classes will be proposed for November, I feel we must face that possibility now. Moreover, there are other great issues which will face this country in the years ahead, and I believe that to cancel classes now would set a precedent with which we would have to reckon frequently.

At the same time, I believe that these great issues are the appropriate subjects of discussion on a university campus. Therefore, I urge the Faculty Senate, the University Calendar Committee, the Student Senate and the collegiate faculties to consider carefully in the period from now until November what the proper University policy should be which will afford opportunity for discussion of great issues and at the same time protect the rights of the individual members of the student body and the faculty.

Among the possible ways of affording discussion in the future would be to alter the University calendar in advance, so that one or more days would be set aside by the calendar each semester for discussion of national issues.

Another possibility would be to schedule an open hour once each week for this purpose.

Still another possibility is to increase the length of the academic year so that time for makeup classes can be provided. One problem posed by this alternative is that it would infringe upon the rights of faculty and students who wish to hold classes on the regularly scheduled day.

As with the agonizing question of Vietnam itself, there are no simple answers to these complex issues. They also cannot be realistically discussed without considering such factors as institutional autonomy and the politization of the University. Debate last week in the Faculty Senate, and letters and comment directed to me in recent days, clearly reveal great and sincere differences in opinion on such questions.

I urge not only the faculty and students of the University to listen to each other in the debate of October 15, but I urge everyone within and without the University to listen to the discussions.

WILLARD L. BOYD.

[From the Des Moines Register, Oct. 9, 1969]

MORATORIUM DAY AT THE UNIVERSITY OF IOWA

University of Iowa President Willard Boyd has done a commendable job of sorting out the issues in deciding what the university's role should be on the Oct. 15 Vietnam War Moratorium Day.

Boyd said he will not suspend classes. In this, he overrode a close 27–23 vote of the Faculty Senate which favored a one-day suspension. He said, however, that all university facilities not otherwise in use would be available for seminars and discussions about the war. He urged faculty members and students to take part in these meetings. He said no student would be penalized for not attending classes "because of his personal convictions."

This moderate policy probably won't satisfy extreme doves or hawks. The sharpest critics of the war may see the university as against them, because classes will be held. The stoutest defenders of the war will be unhappy with any university concession to the anti-war Moratorium Day.

The U. of I. president gave one strong argument against suspending classes. A civil liberties issue is involved, he said. Many faculty members want to teach, and many students want to attend classes. They should not be denied these opportunities.

The university is an institution which fosters the scholarly pursuit of truth. The scholarly goal often is in conflict with political goals, such as those of the war's critics. Scholarship requires the hesitant statement of opinions, the careful evaluation of alternatives and the qualified assertion of conclusions. Politics requires the quick retort, the brusque dismissal of criticism and the dramatic overstatement of one's platform.

Students and faculty members are both scholars and political actors. They should combine a reverence for scholarship and a zest for political action.

But they shouldn't confuse the two. They shouldn't distort the scholarly function of the university by seeking to make it an agent of political change.

U. of I. students and faculty members, as political men and women, should, if they choose to, take part vigorously in Moratorium Day activities. They should not demand, however, that the university, the steward of scholarship, become a tool of their political action.

President Boyd's ruling shows a wise understanding of the separation of academic and political functions.

RECOGNITION OF NATIONAL BUSINESS WOMEN'S WEEK

HON. JOHN MELCHER

IN THE HOUSE OF REPRESENTATIVES

OF MONTANA

Thursday, October 23, 1969

Mr. MELCHER. Mr. Speaker, this week is National Business Women's Week. It is a week during which we mark the accomplishments of American women in business and the professions.

We have by no means yet fully recognized the value of our women, and we continue to exclude them from many oc-

cupations and professions. We need to assure women of the same occupational opportunities that are now provided to men.

We Montanans, and Westerners in general, feel a particular admiration for women, who provide sound judgment and persistent work in the development of a good environment and a better life for all of us.

LOWERING OF THE VOTING AGE

HON. DONALD E. LUKENS

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. LUKENS. Mr. Speaker, this November the State of Ohio will vote on whether to lower the voting age from 21 to 19. It has been a topic of not only State concern but of national interest in the movement to enfranchise young people.

A particularly reasoned and convincing argument for lowering the voting age to 19 comes from Mr. Chester T. Cruze, who is a State representative to the Ohio General Assembly. I think my colleagues would benefit from learning of Mr. Cruze's remarks. His comments not only apply to the State of Ohio; they have relevance for any government body's consideration of lowering the voting age to 19, a move that I heartily endorse.

I include Mr. Cruze's statement for insertion in the RECORD in full:

AMERICA'S YOUTH—TOO YOUNG TO VOTE?

On November 4, 1969, the voters in Ohio and New Jersey will be given the opportunity to amend their respective state constitutions, in Ohio enfranchising young people at 19, and in New Jersey at 18[1]. It has been a long fight in those particular states, and is a fight that will spread across the country in years to come.[2]

The real issue is: "Are 18, 19 and 20-year-olds really incompetent," and should the older generation "show them" that they must "graduate," not only from high school, but "mature" for three years before they can claim citizenship—or shall the efforts of those in Ohio, New Jersey and those other states who have manifested their political maturity be rewarded with that valued prize—the vote.

The history of the American franchise has been one of constant expansion ever since President Andrew Jackson in 1830 advocated the abandonment of property ownership as a voting qualification. The expansion of the franchise continued after the Civil War and proponents of expanding the franchise saw the passage of the 14th and 15th amendment to the U.S. Constitution which finally brought suffrage for the American Negro. The 19th amendment, fought for in the 1920's, brought the franchise to the American women and in the 1960's Americans again acted to enlarge the franchise by eliminating the poll tax as a qualification for voting.

In preparing the legislation, the fight for Women's Suffrage was reviewed and noted; opponents claimed women were too emotional and too stupid to vote. The dire results predicted have not materialized. It is obvious that similar charges against young people are equally fallacious.

There are two basic issues that ought to govern qualifications for voting. The first is that voting is a public decision, not merely a personal right. It is the act by which the people choose men to occupy public offices and to govern the community. From this point of view, the question is whether lowering the voting age will tend to produce an electorate that is superior to the present one and better qualified to choose honest and capable public officials.

The other issue is this: No segment of the community should be excluded from the electorate, if its rights and interests cannot be adequately safeguarded by an electorate of which it does not form a part.

Pro and con discussions are waged on a number of levels; some appealing to the intellect and others not. "If you're old enough to fight, you're old enough to vote" is perhaps the number one phrase used by proponents of reduced voting age, not because they see it as a super-relevant statement, but because it sells.[3] That is the job to be done, to sell the idea, on a non-partisan basis.

President Nixon in March 1969 stated the more relevant Pro reason: "I favor voting at 18, not because, as many say, "if you're old enough to fight you're old enough to vote but because you are smart enough to vote."

Today's young people are smart enough to vote, not only because of their formal education, but because of the areas of political involvement that are open to them. The public media of television, radio, the increasing numbers of politically oriented reading matter, etc., factors omnipresent in everyone's lives, sometime give young people, I am ashamed to say, a better understanding of issues and problems than many of their elders.

The average 18 to 21 year old is a high school graduate.

He has extensive knowledge of the world around him, and the breath of his knowledge and even of experience is far more than the great majority of our populace had during any previous generation—certainly for more than previous generations. People should acknowledge the product of excellence in education by bringing youth into full participation in public decisions.

A prime pro argument, seldom heard, is that in the immediate post high school years a young man will decide just which way he will go in his life. The U.S. Census Bureau backs this idea up and terms the years from 18–25 as "the ages at which adult roles and responsibilities are assumed". Not only can the habit of voting be matured in those important years, but a young person can discover a way to vent his political feelings, in a sedate and peaceful way—the vote. For example, New York Senator Jacob Javits notes that the political activism among 18 to 21 year olds is "all happening outside the existing political framework." Therefore, he and others of his persuasion, feel that enfranchising 18 year olds would bring that activism within the acceptable democratic framework for instituting social and political change.

In the same vein, Dr. Thomas E. Shaffer, Professor of Pediatrics at Ohio State University, feels that "a lot of irresponsibility (among 18–21 year olds) is the result of not being given responsibility in the first place." Thus, in his estimation, giving the vote to 18 year olds would be a vote of confidence in their ability to assume political responsibility, thus encouraging them to exercise such responsibility wisely.

Also several million young women and more than one million young men 18 to 21 years old have established homes and families but have no vote on the issues at city hall, the courthouse, or the capitol.

A more basic argument is that 18, 19 and 20 year olds pay taxes and in numerous areas of law are considered adults at present. "Taxation without representation is tyranny" applies to the twentieth century as it did to the eighteenth century. Young adults pay heavily in sales, use, gasoline and income taxes. Beyond the idea that the young help support government monetarily, it is easily seen that there is a legal inconsistency—seeing law enforcement as an adult province, while the privilege to vote is withheld as being beyond youth's capabilities. A person is responsible to the law—but not responsible enough to make law in the representative sense.

Most, however, are committed to it, because of the therapeutic nature it will have upon this country. In a society that is adding to its longevity but also to its youth population, the average age 27.7. Yet the average voter's age is 45. How can a nation sustain itself when such a large share of its population has no voice in choosing its government?

Though no organized opposition has yet formed, the "silent vote" is feared by all supporters of a lowered voting age, and it is there task to dispel words such as "ungrateful and immature". These words are currently being leveled at the younger generation, while they should actually be directed at the less than – percent who have earned such a name.

The Con discussion invariably begins with those persons who are in the political activision of 18 year olds dangerous tendencies that should not be given political expression. For example, they fear that 18 years olds would tend to vote for extreme leftist parties and issues, and presumably their vote could not be balanced by the more conservative votes of their elders. Some even see such philosophies as "anti-adultism" being translated into political policy. There is a hesitancy to unleash a new tool to those people in our society who riot, disturb the peace generally, and appear ungrateful to the past generations who so painstakingly constructed this country to be the finest in the world.

These same people who will vote against the issue see the further consequence of allowing persons as young as 18 or 19 to hold office or be inconsistent suggesting less than true confidence in the work of majority rule. However, the Founding Fathers felt that a

[1] The authority of the states to determine voting qualifications is embodied in the 10th amendment of the U.S. Constitution providing that any power not specifically granted to the federal government, nor denied to the states, is reserved to the respective states or to the people. The 14th amendment protects against the denial of suffrage to persons twenty-one years of age, but it does not purport to set twenty-one as the legal voting age.

Every state, except West Virginia, has a constitutional provision setting an age qualification upon suffrage. Therefore, any state changes in the age qualification to vote would require a constitutional amendment in the other forty-nine states.

[2] Mexico may beat the U.S. to the punch giving 18-year-olds the right to vote. The change is now under study. President Diaz Ordaz likes the idea. He says youngsters today are better prepared to vote at 18 than his generation was at 21. More than 58 percent of Mexico's population is under 21. With youth clamoring for change, the President says, the vote could head off possible future violence.

[3] U.S. News & World Report disclosed that of the 34,000 U.S. Servicemen killed in Vietnam since 1961, about half of them were too young to vote in most states.

person should be 25 years of age to be a U.S. Representative, 30 to be a Senator, and 35 to be a President, which certainly indicates they saw no major problem with an "inconsistency" between being able to vote for an office and actually holding one.

Tied to the issue, is concern from both parties that the new voters would register more in one party than another, a thought which is easily dispelled by several polls.[4] Partisanships on the issue, nevertheless is better kept out, placing country above party or personal gain.

The political question is really neutralized since both parties support it, but you will still hear that it is generally recorded by political scientists that newly enfranchised voters are, for a period of time, grateful to the party that enfranchised them. The Whigs made a big thing of it during the 19th century in England, as did the Republicans and then the Democrats in the United States in vying for the Negro vote.

The drinking issue too is drawn into the discussion, many persons being hesitant to vote for Vote 18 or 19 if it allows people that young to drink hard liquor. The fact here, is that the drinking age is determined solely by statutory enactment, i.e. acts of the legislature.

The pocketbook certainly cannot remain divorced from any political issue and we find this true with the voting age discussion. Many persons fear that the young voters would vote unnecessary and additional taxes—a thought buried by political scientists in Kentucky and Georgia, both states with 18 year voting.

It remains only to be said, that the reasoning of those who favor the lowered voting age is extremely logical, they look at the increased responsibility; the de-facto situation of the young person in this modern, complicated society. They stare in wonder at the change of society as every newer and closer (to them) generation states responsibility and they wonder why they are excluded. Is the age of knighthood, *"21"* an extremely arbitrary determination, to remain the institution it is? Will those who ask for a change be successful in persuading a majority of the electorate that it will be a competent and equitable change or will we force them to the streets.

---

[4] A George Gallup poll revealed the following breakdown:

George Gallup poll

[In percent]

21–29 years:	
Republicans	22
Democrats	38
Independents	40
29–49 years:	
Republicans	25
Democrats	44
Independents	31
50 and older:	
Republicans	30
Democrats	46
Independents	24

An examination of the results by other groups among those 21 to 29 shows the democratic party with an advantage in each case except among persons with a college background, where party allegiance is evenly divided.

Independents among young voters are found more frequently among men than women, white persons than Negroes, and the college-trained than persons with less formal education. The political affiliation of persons in their early twenties (21 through 24) closely parallels the results for persons in their late twenties (25–29), although the proportion of Independents is slightly lower among the older group.

THE AMERICAN HUNGARIAN FEDERATION MEMORANDUM

HON. SEYMOUR HALPERN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. HALPERN. Mr. Speaker, the American Hungarian Federation recently circularized a memorandum to some of us in which this time-honored organization of Americans of Hungarian descent, uniting in its ranks most American Hungarian churches and associations, called for a restoration of voluntary prayers in public schools.

Several of my colleagues led by the distinguished gentleman from Ohio (Mr. LUKENS) discussed both the memorandum and the various constitutional amendments pending before the House Judiciary Committee on this subject in the form of a special order last Monday.

In the meantime the American Hungarian Federation also sent me an article written by its chairman of the board of directors, Rt. Rev. Zoltan Beky, D.D. some years ago on the regents case in the New York State Court of Appeals, insofar as the issue which appeared in the July 30, 1962 issue of American Hungarian People's Voice—New York—was the same than in the later Board of Education against Schempp and Murray against Curlett, 1963, cases of the Supreme Court and the author at that time was the bishop of the Hungarian Reformed Church of America. I include the article in the RECORD at this point:

PRAYERS AND THE DECISION OF THE HIGHEST U.S. COURT

(By Bishop Dr. Zoltan Beky)

The Supreme Court of the United States decided by majority vote that prayers used in the elementary and high schools in the State of New York for commencing the school day is in violation of the Constitution of the United States. This court decision shocked many million American citizens and many, including two former Presidents, numerous Senators and Representatives and countless ecclesiastical leaders raised their voices in opposition to the decision. Though this decision wil probably be followed by others by the Supreme Court, we must still analyze: what does the separation of church and state, guaranteed by the Constitution mean in the American society of the Twentieth Century?

Those Protestants in favor of the decision of the Supreme Court point out that the prayer used in the State of New York was not a definitely Christian prayer and that the decision only bars the state educational authorities from prescribing to the public schools prayers which must be said by the students.

This view cannot be shared by us, Reformed Christians, but it is also impossible for us as American citizens, to share it as an interpretation of the United States Constitution, for it is not based on valid arguments either in practice, or in the light of history. The constitutional provison expressed n the First Amendment was written in an age where eight of the thirteen original states had an "established" religion which had the characteristics of a "state religion" vis-a-vis the other existing religions. The state was supporting this denomination financially, guaranteed its rights by state legislation. The other Christian churches were allowed to function but without the above rights, support and advantages. At the end of the 18th century state churches were common in Europe and the minority churches were either tolerated, repressed and in some cases, even eradicated. In order to avoid any such abuses the United States Constitution wanted to guarantee the freedom of all churches.

We must state clearly that in light of this historical development the recent Supreme Court decision violates the true meaning of the Constitution by giving preference to the followers of secularism (agnosticism), a minority in the American nation and society as against the followers of Christianity, Judaism and Islam. . . .

In practice, too, the new dictum of the Court is incorrect. For every area of life which will play a decisive influence in the life of the coming generation must form an organic part of the instruction material of the schools. Church, religion and ethics form such an extensive area in the culture of humanity that they cannot be written off as unconstitutional instruction material at the expense of the coming generation in America.

As Reformed Christians we cannot admit that the state can live without recognizing God. Faith is not a private matter as disbelief and free thoughts are not private matters either as it was proven by the example of those few families in New York who fought their way successfully to the Supreme Court against the prayers to be recited in state schools. If, however, the state expresses its disinterest in God, and in public schools no prayers may be said to the Creator, it will soon become a problem of conscience for Reformed Christian parents: in what kind of school should he send his children?

MAN AND HIS ENVIRONMENT: FROM HERO TO MONSTER

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. DINGELL. Mr. Speaker, my good friend and coconservationist from the State of Pennsylvania, the Honorable JOHN P. SAYLOR, recently echoed my sentiments and concern over the problems of water pollution before the Pennsylvania Governor's Conference on Water Pollution Control held in Harrisburg, Pa. In a speech before the conferees, Representative SAYLOR pointed out that man in his heroic role as the conqueror of nature, has also become a monster as the great polluter of the environment.

There are many examples of man's monstrous use of his environment, but the three which our colleague picked out to emphasize with respect to the Nation's water supply are of particular concern to us in the Congress because we can do something about reversing the pollution buildup from these causes. Congressman SAYLOR called attention to the pollution resulting from highway and road construction, from the increased use of waterways by commercial and recreational vessels, and from agricultural uses. In a short speech, he has outlined the magnitude of the problems we face and pointed the way we should take to begin the cleanup job.

I highly recommend that all Members concerned with the problems of water pollution give this speech close attention.

The speech follows:

SPEECH BY U.S. REPRESENTATIVE JOHN P. SAYLOR

It is hard to believe that anyone reasonably aware of the world about him is not also aware of the growing menace to the Nation's health and welfare caused by the pollution of the great natural resources of air, land and water.

Here on this continent man has been the conqueror and adapter—utilizing an ever more complex technology to develop a rich and comfortably affluent economy.

But almost unwittingly man has made the transition from conquering hero to monster. The very technology which has created so much of material good, is also destroying the natural environment.

Man has interfered with the balance of nature, his waste products have become a threat to the capability of this planet to support life, not only of man, but all life. The pressure of world population growth is a major part of the current ecological crisis.

It has reached the stage where it is a question of whether we can survive in the unstable environment we have created. We must rid ourselves of the belief that we can arbitrarily change nature—without accepting some unusual, unwanted, unexpected, and unexplainable consequences.

Water of at least reasonably good quality is essential for almost every necessary use, but is becoming increasingly difficult to secure. If we are to survive, the quality of the Nation's water resources must be protected and improved.

Municipal and industrial sewage and other wastes polluting the Nation's waters have become so obvious that they have received the attention of Federal, State and local governments. The effect of this combined effort is that at least a start has been made at controlling this menace to the environment.

However, there are less obvious sources of pollution potentials of equal importance to the deterioration of the quality of the Nation's water resources. I would like to discuss a few of them and consider what must be done about them.

A major problem affecting the quality of water today is silt and sediment being deposited in the Nation's waterways as the result of earthmoving activities of the construction industry, in particular highways and building construction.

In most instances the natural vegetative cover is completely removed or altered and bare earth is left for extended periods of time. Consequently precipitation washes loose soil, debris, and rocks into streams. These substances cause turbidity and vastly increase the problems of water users downstream in addition to causing undesirable deposits of sediment and silt. Treatment for domestic and municipal use is more complex, costly and variable.

There are 3.7 million miles of highways in the nation of which fourteen percent are urban, twenty-four percent primary and sixty-two percent are secondary and rural roads. It is this latter category which poses the major pollution problem. Much of the suburban community is included.

Excavations and fills in highway construction alter the natural drainage patterns. In many cases the water table or aquifers are penetrated or exposed. At road construction sites it has been found that during a rainstorm, sediment yield is ten times that of cultivated and, two hundred times that of grassland and two thousand times that of forested lands.

It is imperative that erosion control measures be provided at road construction sites and provision be made for future run-off.

The U.S. Bureau of Public Roads can play an important part in this by its administration of the Federal highway program. For lesser highways it is up to State and local road construction agencies together with planning and zoning bodies to cope with this prolific source of pollution. The Bureau of Public Roads and Federal Water Pollution Control Administration are engaged in research on the problem and developing guidelines for use in designing and constructing highways. Much remains to be done in this connection.

For example, only one State now has water quality standards for temporary turbidity which could be used as a basis for enforcement under the Federal Water Quality Act.

Urban area construction is an equally important contribution of pollution in the form of sediment and silt. In building construction the necessary excavations leave the surrounding surfaces bare of vegetation and normal drainage patterns are altered. The large areas paved for parking lots and new streets also tend to aggravate the situation. They prevent natural percolation of moisture and cause concentration many times in natural drainage areas far in excess of their capacity.

Planning and zoning bodies should be on the alert and require adequate preventive measures, so as to prevent these overloads, on drainage ways and on the local sewer system.

It is estimated that on at least three hundred thousand miles of the Nation's waterways, erosion is a serious problem—contributing to a deterioration of water quality.

The watershed protection program of the Department of Agriculture—Public Law 83–566—is directed to minimizing erosion of agricultural lands. This program is inestimable value in preserving farmland and in controlling sedimentation and should be accelerated to the point of complete coverage. Landowners' consent and cooperation are required for this to be effective. To be truly effective all land should be included in a nationwide program.

Sediment in water increases the cost of making it usable, it also has a damaging effect on aquatic life such as gamefish and shellfish, a serious economic loss.

Sediment also accelerates eutrophication by serving as the vehicle for harmful chemicals and minerals and by hindering the oxidation of organic pollutants. Ironically, however, turbidity may actually decrease algae growth by preventing the penetration of sunlight into the stream. This is a small gratification in comparison to the total harm done.

Silt deposited in rivers, lakes and reservoirs is a costly polluting agent. It has been estimated that the annual reduction in reservoir capacity can be evaluated at approximately one hundred million dollars annually and that silt in estuaries, harbors and navigation channels must be removed at an annual cost of one hundred and twenty-five million dollars.

Greater attention should be given to correction of the causes of erosion. Preventive measures to be developed by cooperation of Federal, State and local agencies should be stimulated to protect our vital water resources as well as to preserve land resources.

My next example is that of pollution from watercraft.

There are forty-six thousand federally registered commercial vessels, sixty-five thousand unregistered commercial fishing vessels, sixteen thousand federally owned vessels and eight million recreational watercraft using the navigable waters of the United States.

At the present time forty vessels operating on the Great Lakes, a hundred Coast Guard vessels and a slowly growing number of Corps of Engineers vessels are equipped with sewage treatment devices. Only a very small number of ocean going ships which use these waters treat their sewage prior to discharge. The remaining great majority of vessels have no means of treating sewage.

Besides the sewage, since practically all vessels are fueled by oil, there is the ever-present danger of oil leakage or breakage or emptying of bilge water or ballast tanks.

At the present time this potentially prolific and growing source of pollution is subject to almost no control whatsoever.

The estimated impact of the untreated sewage of five hundred thousand people derived from these sources is destined to grow as the use of waterways for recreation as well as commerce increases.

Few states have any control programs in effect. Many are holding legislation in abeyance until more uniform standards for equipment approval are available or more acceptable methods of disposal or treatment are developed. Meanwhile pollution from these sources is growing explosively.

Legislation is at present before the Congress to make a start controlling this source of pollution. Within a stated period of time all newly constructed vessels would be required to provide sewage treatment equipment and in a slightly longer period existing vessels would be required to install such equipment.

Standards and specifications would be subject to approval by Federal Agencies in cooperation.

Cost of such a program is subject to wide variation with estimates ranging between a half and one billion dollars over a period of several years; from one hundred dollars for small recreational vessels to sizeable amounts for large commercial ships. Nevertheless the caliber of the problem, and the damage to the nation's water resources which would be averted, make this a small burden to be willingly borne.

My next example is pollution from agriculture.

As technology applied to the nation's agriculture becomes more sophisticated and efficient it is unfortunate that an important by-product is a threat to our water resources. This is the pollution derived from the agricultural process, not only from soil erosion caused by faulty procedures but from fertilizers, pesticides, herbicides, animal wastes, inorganic salts and minerals and forest and crop residues which are in the run-off from the land into the nation's water courses.

An estimated 1.7 billion tons of waste results from livestock and poultry production. Until the recent development of corporation type concentrated farming, animal wastes were usually returned to the soil of the same farm. Now feed lots and poultry farms may be located far from grain fields so that the historical disposal methods are not practical.

The highly concentrated nature of these activities permits greater efficiency of production but results in a need for a new technology in handling and disposing of wastes in a manner that is compatible with public restrictions set up to avoid pollution.

Animal wastes are prolific sources of matter causing eutrophication of lakes, fish kills, nitrate contamination of soil and aquifers, annoying odors and dusts, depreciation of recreational values of rural land and streams, proliferation of insect pests and dissemination of agents infectious to animals and man.

Existing technology for control of animal wastes must be improved and new methods be developed. Establishment and enforcement of standards and criteria for land use planning must be developed to minimize the impact of pollution from this source.

Processing raw agricultural products to food, leather, pulp, paper, wood products and industrial chemicals results in inevitable losses of organic and inorganic matter, ranging up to twenty-five or even fifty percent of the raw material entering the plant.

Total pollutants resulting from the activities of these many thousands of processors have been estimated to equal the sewage load

caused by a population of one hundred and sixty-eight million people, almost our entire country.

Farm products are processed by some eighteen thousand establishments. The pulp and paper industry is a large one and individual plants are themselves large and prolific sources of damaging pollution, difficult to cope with. Other major pollutant sources from agricultural-based industries are cotton and wool processing, leather and soap manufactures, and production of industrial chemicals from farm and forest products and by-products.

Pollution from these sources is of such major proportions that immediate and forceful procedures are called for. These must take the form of modernization of harvesting and processing to minimize waste in initial stages; more efficient recovery and utilization of by-products; treatment and disposal of processing plant wastes and changes to make agricultural raw materials more readily processed.

In a recent year it was estimated that thirty-nine million tons of chemical fertilizers were applied in the United States to supply nitrogen, phosphorous and potassium needed for the growing process. Too copious or inefficient application of these substances has resulted in deposition in surface waters of such quantities as to encourage excessive growth of algae and other aquatic plants, adversely affecting water quality for fish, recreational use and even human consumption. Some forms of nitrogen are highly mobile and contaminates ground as well as surface waters. Eroded material containing phosphorous and potassium is deposited in streams and surface water systems.

Control of these sources of pollution is mandatory. In order to accomplish this it will be necessary to develop programs of research and demonstration of the behavior and fate of applications of fertilizers, minimization of run-off and percolation of nutrients by more effective and efficient application. Excess plant nutrients must be controlled or removed from a surface or subsurface drainage to maintain the desired quality of receiving waters. Better knowledge should be developed on the effects of nutrients on algae and other noxious aquatic plants. Another possibility would be to develop some use for algae and other water plants.

Residues from forests and crops are also major sources of pollution in the form of plant diseases, insects and rodents. They are the result of harvesting operations and pest damage or natural deterioration. They are dangerous also because of fire hazards and as hosts for diseases and insects.

These sources are widespread and numerous and constitute major sources of pollution of air, soil and water, our most vital natural resources.

Control of this type of pollution requires minimizing production of undesirable crop and forest wastes, improved utilization of residues, treatment or removal of hazardous or excessive residues from the environment and the development of guidelines for local programs of control and disposal of these residues.

All streams contain some dissolved inorganic salts and minerals. Water diverted for irrigation and containing these substances is subject to concentration by evapotranspiration and either accumulates in the soil or returns to the stream in concentrated form. This has become a problem of major proportions throughout the vast irrigated areas of the West and Southwest.

A great deal of work must be done to minimize this problem. Programs must be undertaken or stimulated to reduce the salt concentration of irrigation water supplies, improve irrigation and drainage practices to minimize the effects of salts and minerals on soils and quality of returning water; possibly by treatment of return flows to remove salts and minerals and also by improvement of plant tolerance and utilization of salts and minerals.

Little is known of the nature and effect of many substances used as pesticides and herbicides. There are some such as DDT and dieldrin which are persistent and accumulate in the environment, be it soil, air, water or animal tissue. Some, after accomplishing their purpose or failing to do so, remain in the environment.

The actual effect of these substances still remains much of a mystery but they are justifiably believed to have a long range deleterious effect on some or all forms of life when in sufficient concentration or in accumulation.

Full cooperation of the best efforts of a number of Federal agencies as well as other entities should be directed to a concentrated effort to evaluate the nature, extent, significance and impact of pesticides in the ecosystem. This should be aimed at reducing the amount of hazardous or persistent pesticides, in the environment, at treating, controlling, or removing pesticides from soil, air and receiving waters. Pesticide wastes should be disposed of in a manner least detrimental to the environment. Finally uniform effective pesticide regulatory programs should be established.

Agricultural activities are prolific sources of water pollution and full recognition of this state of affairs must precede any effective means of control.

Some sources lend themselves to legislative control only to a limited degree. Primarily control would proceed from a concentrated program of research and establishment of guidelines, to be followed by a strong enforcement program.

Initially the Federal Government could expand its research program and in cooperation with State and local governments develop controls which will minimize if not eliminate many of these sources of pollution.

I realize that the picture I have presented is not a pretty one—but it is a factual one—one that must be forcibly brought to the attention of the public. The public must be made conscious of the threat—not to their children and grandchildren, but to the present generation.

The problems are present and the solutions are attainable—solutions which will be arduous and costly but if man is to retain his place in the eternal scheme they must be fulfilled.

PROFESSIONAL WOMEN

HON. WALTER FLOWERS

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. FLOWERS. Mr. Speaker, we are now celebrating National Business Women's Week and I am privileged to join with my colleagues in saluting the working women of America. The National Federation of Business and Professional Women's Clubs—which annually sponsors this special week of tribute—has for over 50 years given encouragement to women seeking a role in the professional, academic, and economic life of this Nation.

The State of Alabama is fortunate in having over 100 affiliated clubs with a total membership in excess of 4,000. Many of these clubs are located in the Fifth Congressional District and we are especially honored that Dr. Minnie Miles, professor of management at the University of Alabama, has served as past president of the National Federation.

The Business and Professional Women's Clubs that are located in the Fifth District of Alabama are as follows: Linden, Verbena, Tuscaloosa, Queen City, Northport, York, Chilton County, Aliceville, Bibb County, Marion, Montevallo, Moundville, Pickens County, Bessemer, Fairfield, and Hueytown.

It is indeed fitting that we should pause and pay tribute to the accomplishments of our business and professional women, for they are now more than 29 million strong, or one-third of this Nation's total work force.

COTTON PAYMENTS IN 1970

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. CONTE. Mr. Speaker, in U.S. Department of Agriculture press released 1352, issued October 15, Secretary Hardin increased the 1970 national cotton acreage allotment 1 million acres. This is an increase of more than 6 percent.

Under existing legislation, this announcement increases the 1970 cotton subsidy payments at the same time that it increases cotton acreage allotments. The domestic cotton allotment for each producer is set at 65 percent of his farm allotment and is increased by the October 15 announcement. Furthermore, the Secretary is required to support the price of cotton on the domestic allotment at 65 percent of parity.

Thus, cotton producers are being given larger allotments and larger payments in 1970. This might be considered fair and equitable for many small producers who have suffered a series of bad crops in the past three years.

Approximately a third of the cotton, however, is produced by 7,000 producers, who receive over $20,000 each in Government payments, with acreage allotments averaging several hundred acres per producer.

These 7,000 producers received approximately a third of the cotton subsidies totaling over $800 million in 1969. They will be permitted to grow more cotton per producer next year, at the same time that their payments are increased from an average of $34,000 in 1968 to $37,000 or $38,000 in 1970.

The extra bonus to the very large cotton producers is even more striking. Over 900 cotton producers received payments of $50,000 or more under the cotton program in 1968.

The October 15 announcement increases each of their 1970 cotton acreage allotments which already are several hundred acres per producer and increases their total payments several thousand dollars.

This is outrageous. I have written Secretary Hardin that this would be irresponsible administration of outdated legislation. I have called on him to propose emergency changes in the cotton legislation which will permit him to increase the 1970 cotton acreage allotment without at the same time increasing the subsidies to the large producers.

My letter to Secretary Hardin follows:

OCTOBER 21, 1969.

HON. CLIFFORD M. HARDIN,
Secretary of Agriculture,
Washington, D.C.

DEAR SECRETARY HARDIN: May I call your attention to the payment implications of your press release 3215 of October 15, 1969, increasing the 1970 national cotton acreage allotment by one million acres.

On the basis of your analysis of 1968 farm program payment data, some 7,000 cotton producers, who would have been affected by a $20,000 payment limitation, produced about a third of the cotton with acreage allotments averaging near 300 acres per producer. In addition to the market income from their cotton production, these 7,000 producers received government payments averaging about $34,000. As you know, several corporations received over $1 million in payments in 1967 and 1968 and are expected to again receive over $1 million each in 1969.

Taking into account the increase in the minimum price support level occasioned by the increase in the parity price and your announced increase in the domestic allotment, legislatively set at 65 percent of the farm allotment, these large corporations and other large producers will receive about a third of the increase in the national acreage allotment plus an increase in payments of 10 percent or more.

Except for the reduction in estimated yield per acre from 545 pounds in 1969 to 500 pounds in 1970, the increase in 1970 payments would have been even greater.

It appears that the 1970 cotton program, on the basis of your October 15 press release will permit the 7,000 largest producers to increase their production of cotton and they also will have their payments increased from an average of $34,000 in 1968 to $37,000 or $38,000. About 1,000 of the largest producers, most of which are corporations, who received over $50,000 in cotton program payments in 1968 will have their acreage allotments increased and their payments increased by more than $5,000 by your October 15 increase in the national allotment.

This is outrageous. It would be irresponsible administration of outdated legislation.

You opposed my amendment limiting 1970 farm program payments to an individual producer to $20,000. I now call on you to propose emergency changes in the cotton program legislation which will permit you to increase the 1970 national cotton acreage allotment without this built-in increase in subsidies to the large producers.

Perhaps this could be done most easily by amending section 350 of the Agricultural Act of 1938, as amended (7 U.S.C. 1350) by striking the second to the last sentence "Provided, that no farm domestic allotment shall be less than 65 percentum of such farm allotment" and inserting "Provided, that no farm domestic allotment shall be less than 65 percentum of such farm allotment set on the basis of a national allotment of 16,000,000 acres."

I am bringing this matter to the attention of the House of Representatives before it acts on the Agricultural Appropriations Act for 1970 and would appreciate an early reply.

With all my best wishes, I am

Cordially yours,

SILVIO O. CONTE,
Member of Congress.

MRS. BENTLEY: WHEN AMERICAN TRADE FLOURISHES, EVERYONE WINS

HON. MARGARET M. HECKLER

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mrs. HECKLER of Massachusetts. Mr. Speaker, today the President of the United States has announced his commitment to the challenge of rebuilding and expanding the U.S. merchant marine so that the American flag may again fly proudly in the shipping lanes of the world and so that the shipbuilding and ship operating industries may again achieve a vitality that will contribute to the industrial growth and the strength of of this Nation.

His message to the Congress echoes the philosophy and the thinking of the new chairman of the Federal Maritime Commission, Mrs. Helen Delich Bentley, who stated her allegiance to this same cause in an address to the National Press Club on October 17, 1969. Mrs. Bentley's dedication to the cause of a strong merchant marine was evidenced time and time again in her writing for the Baltimore Sun during the years when she was probably the Nation's best-known, and only woman maritime editor for a great metropolitan newspaper.

Her statement to the National Press Club that "when America trade flourishes, everyone wins," is a clear expression of the course she has chartered to renew the merchant marine. I am proud to have played a part in urging President Nixon to appoint her as Chairman of the Federal Maritime Commission, where she can be instrumental in achieving this desirable objective.

Mrs. Bentley's speech, which I submit for the RECORD, is a strong statement of the need for a revitalized shipping industry under the American flag. I urge my colleagues to read it:

REMARKS OF MRS. HELEN DELICH BENTLEY, CHAIRMAN, FEDERAL MARITIME COMMISSION, OCTOBER 17, 1969

Mr. President, Members of the Board of Governors, Chairmen and Members of the various Committees, resident and non-resident members and associate members of the National Press Club wherever you are chasing news, uncovering malfeasance, misfeasance and nonfeasance throughout the world—I bring you greetings from your sisters down the elevator shaft on the fifth floor of the National Press Building, the Women's National Press Club.

I bring you greetings, too, from your counterparts in the American Newspaper Women's Club, and all other similar distaff organizations.

I must admit that I have no authorization to do so, but I think it nice to start off offering the olive branch of peace in a divided newsworld. I am not, however, taking a George McGovern or a McCarthy approach toward the settlement of the internecine war. I do not favor a cessation of all resistance on the part of newsdoves in the face of imperialist aggression of newshawks. I favor no unilateral action on our part looking toward the cessation of this class struggle in which your majority discriminates against our minority.

On the other hand, I do not hold, as some do, that there is no good in any newspaperman. I am sure there must be, if we could only find it. Nor do I believe that all newspaperwomen are good through and through, and even though we have not been able to uncover it yet, I say there must be *some* flaw in one of us.

In similar fashion, I know that there must be many fine, discriminating, distinguished, wise, knowledgeable, gentle men among you besides those few I know, the kind and thoughtful men who inhabit the Washington Bureau of the Baltimore Sunpapers. How it tears my heart to leave them, to know no more of their courtly ways, their stepping back from the water-fountain—I don't require that, but they insist—should I want a sip of water, and the dear fellows holding the door for us women members of the Sun staff to pass through, or doffing their hats in the elevators, undoubtedly the results of their early training in the City Room in Baltimore. How I shall miss it and them. How I shall miss the loud cry of "Copy" as some raucous male voice two feet away splits my eardrums.

I shall miss—if only for a period of time—being a member of the Fourth Estate.

Say what one will, damn it as our critics may, when they are caught in their own maneuverings and machinations by some alert newsman or newswoman, the news media of this Nation and those who comprise it serve our country and our society on a scale and on a depth and breadth of front unequalled by any other private industry or profession.

True, we are often the accuser, sometimes the defense attorney, too often the judge and jury, but most often the ombudsman, the conscience, of our people. We are a force for honesty, we are a form of social conscience, we are a means by which to attain justice and oppose injustice.

On the whole and by and large, we develop our stories from the facts, and stick to facts. There are always some, as in any profession, who do not let the facts stand in the way of a story, who substitute innuendo for proof, rumor for certainty, but they are few.

Newsmen or newswomen, by far the vast majority of us are high practitioners of the ethics of our profession. Oh, of course, there are accepted areas of open hunting—government officials—particularly newly appointed ones—are always fair game, as are all things having to do with the government at any level, be it national, state, or local. And, we newspaper people have our "hang-ups", each of his own kind, but we handle them, or try to, in such manner that the columns of our papers, pages of our magazines, our TV screens or our radio sets do give fair and honest coverage. I am sure you will agree that for most of us journalism is more than a business, a profession, a means of livelihood. If we would admit it, for most it is a love, a passion.

For me, it will not be easy to think of myself as being dubbed a "news source," rather than "Press." And I have already found that it is easier to make and throw balls than to have them coming at you. I already know that to the Press "the other side of the street" of Government is in reality "the other side of the tracks." I hope my newspaper experience will help me in the dealings with the Press on my new job. I must be even more like Caesar's wife in dealing with you. Certainly there can be no excuse for me to fall into the trap of withholding at the Federal Maritime Commission that which is in the public domain and that which the American public has a right to know. As the FMC's Chairman, I can promise you that in such areas the Press will find the Federal Maritime Commission will exist in a goldfish bowl.

As I look forward to my new job and its opportunity for accomplishment, I cannot help looking back over my shoulder at the world of the Press I leave.

You can understand this since my last major assignment was aboard the SS *Manhattan* trekking through the Northwest Passage. I am not going to say anything about the plug being pulled on communications because of four-letter words because I understand you have a question-and-answer period and that nobody worries about the questions being embarrassing.

The accomplishment of this newest and largest icebreaking tanker which crunched through more severe ice than any other vessel in history, will be recorded in the archives of history because the *Manhattan* opened the forbidden and awesome Northwest Passage to commercial operations and thus the door for real development of the mineral rich but frozen arctic areas of the North American Continent.

Roald Amundsen, the Norwegian explorer whose expedition in 1906 carved out its place in history by becoming the first to transmit the entire waterway east to west by ship—the 45-ton Gjoa—took three years to do so, by hugging the Canadian coastline along the mainland shore.

Sixty-three years later, the 155,000-displacement tonnage *Manhattan,* laden with modern technology and icebreaking assistance, plowed through ice floes ranging from four to fifty feet continuously and maintain a ten-day schedule for transiting the formidable passage between Baffin Bay and Amundsen Gulf, named after the famous explorer. The ten-day timing had been established many weeks before in conjunction with the $40 million over-all experiment arranged by Humble Oil and Refining Company.

Shortly before the 1005-foot long mass of steel entered Amundsen Gulf, the location where Roald Amundsen holed up for 18 months while also striving to locate the precise site of the magnetic North Pole, glasses of champagne were drunk aboard the *Manhattan*—on schedule.

The achievement is monumental. At this point, the feat indicates positively that the modern technology built into ships will permit the waterway to be used more economically than any other form of transport to haul out the untold billions in wealth of oil, copper, iron ore, zinc, tin, and other minerals of the Canadian Archipelago and Alaska's frozen north.

When one considers the many months it took the explorers of old to struggle even a nautical mile in their wooden-hulled ships fighting the elements of the treacherous waterway, the 10-day passage of the *Manhattan,* right on schedule, is a modern miracle, and recalls much of the old aura of romance and adventure of the sea, so much missing in our modern life.

But looking forward, there is a much more important matter for me to deal with than the nostalgic thoughts of a newspaperwoman.

Now, I know that in my new position I am not the Nation's shipping promoter but rather one of that industry's regulators.

To me, this opportunity to speak at the National Press Club offers the very thing I seek in joining the official family of President Nixon's Administration. That is, to focus attention on the American Merchant Marine, to alert the American public to the straits in which we find our shipping—half afloat on a sea of public indifference. If I can bring home to you—the Press—the bitter truths, the present and future dangers that exist for us as a Nation in letting our merchant fleet go down the drain, then I will have served my major purpose at the very beginning of my term of office. I ask you, then, to bear with me for a few more minutes while I spell out some of the cold, hard facts of life in an area of which I do have specific knowledge of shipping and its vital importance both to our country's commerce and its defense. If I can convince you that the concern I feel is justified and warrants further delving on your part, then you in turn will alert the American people to the dangers they face.

Let me start by plagiarising and paraphrasing a key phrase from another mode of transportation in its current massive promotional campaign. *"Who Needs Ships? You Do!"*

Why do you and I, and every other American need ships? The answer is simple—in raw materials we are a "have not" nation. Our whole economy, our prosperity, relies—and must continue to rely—on the raw materials we import from other nations, 96% of it aboard foreign ships. Our productive capacity, the jobs of tens of millions of our fellow Americans, are dependent upon the millions of tons of iron ore, bauxite, petroleum, manganese ore, tin, lead, copper, rubber, nickel, zinc and many other vital and strategic materials brought into this country annually to maintain our industrial output. Name any article in your everyday life—the aluminum chair on your patio, the electric light by which you read, your TV set and radio, the car in your garage—and the likelihood is that the imports of raw materials make them possible. Even much of the newsprint that goes into our daily papers is imported by ship. Our Astronauts could not have walked on the moon without these imports. Indeed, there would have been no space program. And, I have not even touched upon the essentiality of our import of raw materials to our defense industries.

The need for ships to maintain the flow of vital raw materials to our shores appears self-evident. What now of the need for ships in order to carry our exports, and to what extent are our exports important to us individually and collectively? Even apart from the defense aspects, I doubt that any would argue against the importance of our foreign trade to the peacetime economy of the Nation, or of its importance in linking the economies of other Free World nations with our own. The $65 billions of goods we export and import appreciably add to our own gross national product. The goods we export provide the wherewithal by which we are able to purchase raw materials and the goods of other nations. They are the major means by which we maintain our balance-of-payments. And, the production of the goods we export contributes directly to millions of jobs for our fellow Americans. Our economic well-being as a people is irrevocably tied to our foreign commerce, a fact on which I am certain there can be no point of dispute. And for the export of vast quantities of goods, of millions upon millions of tons of cargo, there is no other means than by ship.

And so we come to a further question, a question for which I hope to be able to provide an answer sufficient to develop the same concern on your part as I feel in regard to the serious state of our shipping, and its possible effect on our economy and our security.

Simply put, the question would probably go like this: Granted our foreign trade is essential, and that ships are required to carry it, why must they be our own? Most of our trade is now carried in foreign-flag ships anyway, so why worry?

The question is a simple one, and unfortunately, over the period of years by its very simplicity it has evoked no concern in the nation that over 94% of our foreign commerce is carried by the ships of other nations, and less than 6% by our own.

There has been too little concern that in the area of raw materials, upon which we are completely dependent, we in turn are completely dependent upon the ships of other nations for transport.

If we could count upon the world remaining static, the interests and policies of all nations the same forever as they are today, then the answer might be an echo of the question—why worry? But you know, and I know, that nothing remains static, certainly not the relationship between nations, nor their national interests.

Too often in the past we have been forced by harsh reality to recognize this fact where shipping is concerned. Even during this century we have had to resort to relying on our own shipping in more than one instance. Relying upon foreign ships to carry 90% of our commerce, we were caught short at the start of World War I. Our traditional carriers were the belligerents, and the belligerents withdrew their ships from our trade to serve their war efforts. The result was that shipping rates skyrocketed, and our economy wavered until we began producing war materials for the Allies. World War II was a repetition, except that we had wisely begun building ships a few years earlier, and our productive capacity had shifted early in the war to the production of materials of war for those opposing the Nazis. We were the arsenal of democracy before Pearl Harbor, and the builders of ships to replace the losses for the British and their allies. With Korea, we were fortunate, for we had the ships left over from World War II in reserve, and pulled out some 600 from lay-up to serve our troops in Asia and maintain our commerce. With Vietnam, we were also lucky, for we still had World War II ships that could limp into service to supply our military and essential civilian needs.

But let me note one fact, in regard to Vietnam. Our own aging ships have been impressed into serving our supply lines, while the ships of many of our friends go to Haiphong.

There have, in fact, been instances where ships of friendly nations have been denied us.

Just as we denied our ships the right to trade with belligerents prior to World War II, a Mexican ship was ordered by its government not to carry war supplies to South Vietnam.

In other instances, foreign-flag ships have been loaded with U.S. Defense supplies, and their crews have refused to sail them. And so, when the chips are down, upon whose ships can we be certain we can rely? Our own, with Americans crewing them. And to have them when you need them, you must build and crew them to serve your peacetime commerce, far in advance of any sudden national defense need.

Under President Kennedy and President Johnson, unfortunately the "Whiz Kids" reigned at the Pentagon. For some reason, they were turned off on seapower. They had persuaded Secretary of Defense McNamara that airlift was the future—that anything could be handled by air. The Air Force had a powerful lobby and a strong persuasive public relations program. They believed this. But when the Vietnam build-up began and McNamara turned around to ask about the airplanes and airlift capability, he learned to his horror it wasn't there. He was going to have to depend on sealift.

In the first two years of the build-up in Vietnam, more than two-thirds of the G.I.'s who were sent over were transported by ship. Some 98.6 per cent of the supplies were transported by the seas. Once the 500,000 basic troops were on hand in Vietnam, the military has been able to handle the replacements primarily by airlift because the numbers involved were only a hundred or two at a time.

More than 97 per cent of the supplies are still going by ship.

Apart from emergency need, however, a peacetime merchant marine composed of modern, productive ships of our own registry serves many purposes.

Among others, the carriage of our trade on our own ships enhances our balance-of-payments position. The British, for example, estimate that transportation of cargoes on their own ships constitutes the equivalent of 4% of their total exports, while the Russians speak glibly in capitalistic terms of the earn-

ings in foreign exchange of their hammer-and-sickle ships.

American merchant ships contribute to the national gross product, and provide jobs both in their building and operation for tens of thousands of Americans. They provide the Treasury with tax revenue, both corporate and personal income tax on employees' wages. And, our own ships constitute a major customer for American suppliers and the products of our farms. Not so with foreign-flag ships, who purchase little and pay the bulk of their taxes at home.

Our shipping companies aid our exporters to develop foreign markets, thus increasing our foreign trade.

Finally, U.S.-flag ships guarantee access to our foreign markets and—if we had them in sufficient numbers—could guarantee our access to the raw materials essential to our economy and defense.

I will not take much more of your time, but let me turn to two final facts I would like to develop.

The first is this—history has shown that no nation achieves greatness nor maintains it without also being a major maritime power. History also shows that from time immemorial right up to the present, seapower—including merchant shipping—is an instrument of national policy. History also shows that a nation pays to achieve and maintain its seapower—or it pays the penalty for not having it!

Now, what do we have in the way of a merchant marine?

About as poor an example of one as can be imagined for the world's greatest trading nation!

Over two-thirds of our privately-owned merchant ships are pushing or are over 25 years old. They are slow, they are inefficient, they are wearing out, and expensive in repairs to keep them sailing. In other words, Gentlemen, well over 600 of the 975 ships under the U.S. flag are heading straight for the shipbreakers. We now have about 15,000,000 tons of privately-owned merchant ships under the U.S. flag. If we do not act now, by 1975 we will be down to about 9,500,000 tons, all also growing older. As for the Government's reserve of World War II ships, by that time it is estimated that only some 135 or so will be available for any emergency need. Our merchant marine is on the skids, and the skids are greased. Why, even today we are fifth in tonnage among nations, with Liberia, Norway, United Kingdom, and Japan ahead of us; while in numbers of ships, we rank sixth behind those countries and Russia.

In the shipping industry, there is a great body of international opinion that looks upon American regulation as highly unnecessary and definitely troublesome. Much of this criticism stems from our foreign friendly trading Allies.

I believe I can say to them at this juncture, that if they will just keep their eyes and ears open and watch the game that I intend to play at the Federal Maritime Commission, their apprehension might well be alleviated. I can assure them that as an umpire in the regulatory affairs that are going to come before me, I intend to carefully avoid even the appearance of a troublemaker.

They can be assured that I am going to call them as I see them.

Oceanborne United States foreign trade and commerce is at present running somewhere over the 40-billion dollar mark. According to very carefully kept statistics, the American Merchant Marine is carrying somewhere in the neighborhood of 5.4% of that total commerce. This means, in plain language, that the vast remainder of that cargo goes in foreign bottoms.

Let me say, that all of us in the United States should be grateful that the foreign merchant marines have the capacity to service our essential commerce, because certainly, nowhere in the near future could American-flag shipping hope to have the capacity to handle it all.

It is my hope that the foreign-flag shipping business community appreciates the opportunity to earn profits, at least to the same extent that we in America appreciate their service to our trade.

It strikes me that when the Congress of the United States drafts a law which grants foreign-flag enterprise the right to combine in a manner that might be improper under our anti-trust laws, and then Congress, through the Shipping Act of 1916, and through the Federal Maritime Commission, grants those foreign shipping lines immunity from our anti-trust laws, that everyone concerned should be grateful, and a great number of them are.

"Baiting" the Federal Maritime Commission has become sort of a fair game in foreign shipping circles, and has, in my belief, been costly and unrewarding to those who engage in it. As one of the umpires in this game of world trading, I believe it would profit us all to keep our eyes on the ball, and to ignore the heckling that arises on the coaching lines.

When American trade flourishes, everyone wins.

It is a paradox that this nation, once a major seapower, has turned from the sea; while Russia, traditionally a land power, has turned *to* the sea. Since the USSR is now our major competitor in the world for both the minds of men and their adherence to our economies and our divergent philosophies on freedom and the rights of the individual, a final look at our divergent attitudes toward a merchant marine will be of value.

One thing is certain, the Russians and ourselves are 180 degrees out of phase in regard to the importance we attach to a merchant marine. There is no in-between. Either they have been and are 100 per cent right, and we are 100 percent wrong, or we are right and they are wrong.

At the time of the Cuban confrontation, the Soviets paid through the nose for the lack of their own merchant ships, forced to charter the ships of other nations for their Cuban adventure. But, Cuba taught the Soviets a lesson, and from that day forward they have concentrated on building a merchant fleet second to none. Since that date, from about 5 million tons they have risen to 12 million, and they are continuing to build at the rate of one million tons a year. Russian officials themselves state—and I can *show* you the statements—that by 1975 they will have achieved 16.5 to 18 million tons of new merchant shipping. They speak of the profits made by their ships in trade with the world. They speak of the foreign exchange they make for "the motherland." They speak of the foreign ports they enter and boast of the fact that their seamen serve as ambassadors to the people of other countries, cementing friendship for Russia and advancing the Communist view among the people of foreign lands. They speak of the flag in world ports and the prestige it brings to the USSR. They speak of the use of their ships in developing trade ties with developing nations and others. What they do not speak of publicly, but what has become evident to maritime nations, is the extent to which they have now begun to undercut world shipping rates in competition with the ships of other nations. They have entered third-flag trade, their ships never touching Russian ports, between Japan and Canada, undercutting American-flag and other national shipping between Japan and the West Coast of the United States. In doing so, they provide a perfect example of what I mentioned earlier—the use of ships as an inherent instrument of national policy.

I now rest my case for the need for this nation to immediately reverse its position on the need for an American Merchant Marine, and begin the long haul up toward attaining a merchant fleet equal and adequate to our national needs, before our own stupidity and the Russians bury us at sea! I ask you of the Press to consider what I have said, check the facts and if you are convinced, then tell the American public, "and tell it like it is!"

And, just in case anyone should question how valid the comparison between Russia's massive maritime buildup is in relation to our own lack of effort, and whether any real weight should be given to these recent Russian publications, provides the answer to the question "why worry?" They indicate that the USSR's intention is not one of peaceful coexistence with the U.S.A. They recognize our Nation as the single major roadblock to achieving their worldwide goals, and merchant shipping as one of the major weapons for conquering the globe.

Thank you for hearing me out, and thank you for having invited me to appear. It is an honor of which I am fully aware, for I realize that a few days ago I would have had to be quietly sitting up in the gallery, a newsdove watching the newshawks feasting!

THE NEW MORALITY—SODOM AND GOMORRAH II

HON. JOHN R. RARICK

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. RARICK. Mr. Speaker, yesterday I called to the attention of the House two recent issues of "the Herald of Freedom," published by Mr. Frank Capell—31144. These publications summarized in an exceptional manner the moral deterioration which is taking place in our country, and the role of so-called "sex education" in this national tragedy.

Mr. Capell's articles related the connection between SEICUS, the Elysium Research and Development Institute, and its parent Elysium, Inc., the Los Angeles publisher of pornography. All three of these operations are engaged in dispensing pornography in the guise of education.

Sex education means many different things to Americans. It may be something as simple as instruction in biology or physical hygiene—or it may encompass such certainly moral, ethical, or religious fields as contraception, promiscuity, and homosexuality. Whether or not the subject belongs in our elementary and secondary schools depends entirely on clearly defining its scope.

I include in my remarks Mr. Capell's October 3, 1969, edition, entitled "Sex and Subversion," together with a published discussion of the sex education envisioned by Elysium, Inc., taken from its current pornographic publication, Nude Living—which promotes the Elysium Institute and SEICUS in the same issue:

[From the Herald of Freedom, Oct. 3, 1969]

SEX AND SUBVERSION

Of concern to many Americans is the wave of illicit and degenerate sex promotion which engulfs the land and saps the moral strength of Americans young and old. Many oldsters are accepting the "new morality," while the youngsters will have "sex educa-

tion" forced upon them (if the "sexperts" have their way) and become well acquainted with sex long before they are old enough even to begin to think of marriage. If the older ones wish to become depraved, that is their own business except for the example they set for their children. Children, however, need to be protected from the forces which seek to destroy their self-respect and morality. Observers cannot fail to note that lack of morality and radical left-wing philosophy seem to go together. Love-ins have replaced love and protesters have replaced patriots, that is if you are in with the In-crowd.

A lost generation is being promoted and this is all that is necessary for the downfall of the United States. Congressman James Utt has stated:

"Leaders of the world-wide Communist conspiracy are too well aware of the great impetus given to their plans by the destruction of moral standards, and they have taken full advantage of it with amazing success in our country. . . .

"Pornography has been all but completely legalized and has pervaded every medium of communication. . . . Appealing to prurient interests is profitable, and pornography publishers are cashing in. What better . . . 'public relations' expenditures can they make than those which destroy moral values through the schools."

Rep. Utt links the promotion of "sex education" with Communism, stating:

"One of the basic activities of the Communists is their promotion of complete sex education in almost all school grades. . . .

"Throughout history, nations which deteriorated morally have experienced a simultaneous decline in economic and military strength. It is morality which elevates morale, which depends so much upon pride. Lacking moral discipline, one cannot have true pride in his accomplishments, nor can he have the altruistic motivations which combine with natural selfish incentives to render constructive progress possible.

"Anyone doubting the demoralizing effect of the degradation of ethical values need only consider that the Scandinavian countries have had compulsory sex education for two decades. A third of the brides in Denmark are pregnant at marriage. . . . Venereal diseases have reached catastrophic proportions. . . ."

The youth of America feels that it is being "liberated" and that it is building a brave new world which will arise from the ashes of the old one they seek to destroy. Testifying before the Senate Internal Security Sub-committee on the "Extent of Subversion in Campus Disorders," Ernesto E. Blanco, now an associate professor at Tufts University, formerly of Villanova University in Havana, Cuba, stated:

"As far as I can see, the influences I see active in the American universities are the ones I have presented here (in a chart outlining the Communist takeover of Havana University). The anarchists referred to in here involve some of the groups that are followers of Herbert Marcuse, professor of philosophy at the University of California, at San Diego . . . we have the intellectual leadership . . . composed of Fabian Socialists, Communists, and anarchists. The Fabian Socialists, as you probably know, are extremely active among intellectual groups in the United States, and they form that mass of the intellectual community which is inclined and sympathetic toward Marxist ideas, but they do not belong to the Communist Party. They pose themselves as 'progressive liberals,' and their ideas are to impose Marxism through nonrevolutionary methods. They feel that violent revolution could completely spoil the imposition of Marxism by creating a reaction; therefore, they try to intellectually subvert the population. That is, to have them willfully accept Marxism by education, by influence through the mass media and by exercising what I call the influence multiplier which consists in influencing a very influential person, and when you do that, that influential person, either a newspaperman or a respected college professor, can influence thousands of people without even belonging to the party or being known as a Marxist. . . .

The second leadership group, the Communists and Marxist-Leninists, of course, we know much better because they are more outspoken.

"In the third group we have the anarchists. The anarchists are violent destroyers; they are nihilists. We can include in this group some of the black radicals, black extremists, and also in this group we have the followers of Marcuse, the existentialists, the drug pushers, and so on. . . .

"The theories of Marcuse are that the youth should liberate themselves from any moral codes, that they should do anything they like; that the unrestrained satisfaction of their bodily tendencies and pleasures are entirely acceptable, and that they should try to get the most satisfaction out of life by doing things that are known to be debasing and immoral, which he claims are not really immoral but serve to purify the future society. He is essentially trying to enhance and reorient the lowest of human tendencies and direct them toward the destruction of society. The drives and the immaturity of youth are being oriented toward the satisfaction of lowly bodily pleasures, and in so doing youngsters become tne moral destroyers of our society . . . (Marcuse) encourages promiscuity, intercourse with animals, absolutely anything that could destroy the fabric of morals and the dignity of the individual. The resulting moral anarchy fertilizes society for eventual totalitarianism."

J.G. Sourwine, chief counsel of the Senate Subcommittee interjected the following description of Marcuse:

"Marcuse preaches . . . that we must completely destroy the present society . . . he is a self-confessed anarchist and nihilist . . . He preaches that we must not have any goals, because the new society will shape itself on the basis of the conditions existing when this society is destroyed, and if we have any goals, we will be tempted to make compromises toward the attainment of those goals, and, therefore, our single goal must be the complete destruction of society . . . He also follows . . . what has been called the line of Freudian-Marxism that human drives originate in self-preservation and sex and have to be channeled in other directions in order for civilization to rise, and if we can channel those drives back into sex and violence, there will not be any drive left. We will have a generation that goes nowhere."

Anyone, looking at today's college campuses and the meadows full of freaked-out, dropped-out hippies and yippies turning on with pot and pop-music, who would place much of a bet on our country's chances for survival when it is up to such as these to guide it would be betting against very great odds, indeed. Pornography, pacifism, pot and promiscuity cannot nourish leaders with strength and integrity. When young America's idols are the Beatles and Andy Warhol, and books like "Portnoy's Complaint" can find publishers, much less become best sellers, things are really bad. Today's youth is not just "letting off steam," it is actually injuring itself irreparably. Drugs permanently damage minds and bodies as well as leave criminal records; promiscuous sex can also injure minds and bodies. Males are unmanly and females are unwomanly and they are getting harder and harder to tell apart. Advice and help of parents are spurned by children who believe the "generation gap" propaganda which alienates them.

When hearings on pornographic literature were held in California ten years ago, evidence revealed that the sale of sexy and "girlie" magazines constituted a multimillion dollar business; that in California alone some $500 million was spent for such material each year and that 75 percent of some 15,000,000 issues each month fell into the hands of teenagers. Efforts to stop such publications have not been fruitful, with the courts becoming more and more lenient with pornographers. In fact, the courts are deliberately challenged so that precedents may be set and, when action is taken against pornographers, powerful forces rush to the rescue. In the forefront of the defense of pornography and subversion is the American Civil Liberties Union. An article signed by clergymen of four religions who cooperated in an anti-pornography organization called Operation Yorkville, stated:

"In the area of pornography . . . which is recognizedly having a degenerative effect upon the mental and moral health of American children, the ACLU has consistently defended the pornographers' rights under the first amendment, ignoring the rights and liberties of children and their parents. The director of the New York Civil Liberties Union admitted that the $2 billion traffic in pornography could not exist without the union's defense of pornographers."

Another successful challenger of anti-pornography laws is publisher Barret Lee (Barney) Rosset of Grove Press. In a non-critical article by Albert Goldman, we are told:

"That's Barney Rosset, 'Grove Press' Rosset, the old smut peddler himself, turning his dubious attentions to home movies and the debauching of the American family. Good old Barney, always gnawing away at the props of middle-class morality. . . . First he changes the rules of the publishing game by winning the right to print Lady Chatterley's Lover. . . . Then he dips into real filth with . . . 120 Days of Sodom . . . Finally he pollutes the very shrine of American culture by smearing the silver screen with the meat-rack obscenities of I Am Curious (Yellow)."

Barney Rosset has made millions from his pornographic publications and has plans for bringing pornography into the home through cassettes, operating through TV sets. Rosset is the son of a Jewish banker father and an Irish Catholic mother and the product of permissive, progressive education. He became a millionaire when his father died and found his niche in life when he bought Grove Press and proceeded to publish and peddle pornography which was formerly unobtainable legally. He was the first to breach the censorship code with a "carefully planned and skillfully executed court battle."

Barney Rosset paid $25,000 to a Swedish firm for sole American rights to the pornographic movie, I Am Curious (Yellow) and his profits on this venture are expected to amount to $3 to 4 million. He actually has an empire of enterprises which consists of publishing books written by Communists and revolutionaries, and filthy sex books; distributing obscene type movies; operating a movie theatre; publishing a magazine and even college textbooks. Rosset has been described as "an enigma" and spent many years in psychoanalysis. He destroys his publicity man's efforts to make him appear to be a "solid businessman" by talking too freely about sex, drugs and political revolution, his interest in this being long-standing as shown by his having written a paper called "SOCOM" (Socialist-Communist) during his early school years. Continuing into the present, a recently published photograph of the Grove Press office shows Russian Communist posters on the walls.

Among the pro-Communist books Rosset has published are the reminiscences of Che Guevara, Edgar Snows; "Red Star Over

China" and Soviet spy Kim Philby's "My Silent War." He has also published books by Bishop James Pike, Dr. Joseph Fletcher (Situation Ethics) and Dr. Albert Ellis. The Sex Information and Education Council of the U.S. (SIECUS) lists Barney Rosset as a source of information. This is the organization which is leading the fight to introduce sex education courses into grammar schools across the country. They are also supplying the material to be used.

Phoebe Courtney states in her expose, The Sex Education Racket (Pornography in the Schools): "A large portion of the teaching materials presented to America's children in the schools today under the guise of sex education, is too disgusting to be reprinted in a book such as this. 'Pornographic' is the only adjective that can properly be applied to some aspects of the so-called sex education programs." Mrs. Courtney in her chapter on "The Communists' Stake in Sex Education" quotes many sources to show that there is a close tie-in between Communism and the present-day efforts to destroy morality in the United States. She states, "The similarity between the philosophy of Communist (William Z.) Foster and that being pushed by the sexologists in the schools, is not mere coincidence."

In the person of Isadore Rubin, Communism, pornography and sex-education are all tied up in one package. Rubin, an identified Communist, is editor of the pornographic magazine Sexology and, from its inception until unfavorable publicity forced him out, was treasurer of SIECUS. Sexology has started publishing a "plain-cover" edition, concealing its content formerly luridly advertised on the cover. Rubin is the champion of the homosexual and speaks annually at the New York Mattachine Society, a homophile organization. He has been active in trying to "liberalize public attitudes on homosexuality" and has been quoted as stating:

"For some men it is the only way they can have any emotional life at all. . . . We have no evidence whatever that homosexuality is an illness. We do a great disservice to these people by talking of curing them and implying they are sick."

The interest of the Communist Party in pushing pornography was shown when one of the most important pornographic publishers in the United States, Samuel Roth, was indicted by a Federal Grand Jury in New York in July 1955. The indictment read:

"1. That from in or about March 1951, and continuously thereafter up to and including the date of the filing of this indictment, in the southern district of New York and elsewhere; Samuel Roth, the defendant herein, unlawfully, willfully, and knowingly did combine, conspire, confederate, and agree with Chief Miller G.I. Distributors, Inc., Morris Sorkin, Philip F. Foner, Remainder Book Co., Abraham Lieberman, Book Sales, Inc., and diverse other persons to the grand jury unknown, to commit offenses against the United States in violation of title 18, United States Code, section 1461.

"2. It was part of said conspiracy that said defendant and co-conspirators would publish, print, distribute, deposit, and cause to be deposited for mailing and delivery obscene, lewd, lascivious, and filthy books, pamphlets, pictures, papers, letters, writings, prints, packets, packages, articles, and other publications and things of an indecent character."

Roth was convicted and jailed. Foner and Sorkin were partners in the ownership of Remainder Book Co. and Foner was an identified Communist who was also associated with Sorkin in the Citadel Press which published books by such Communists as John Howard Lawson and Herbert Aptheker. As an indoctrinated Communist, Foner would not be likely to do anything not ordered by the Communist Party.

The latest New York City telephone book still lists Foner's Citadel Press and Remainder Book Co. at 222 Park Avenue South, New York City. It also lists Samuel Roth and Seven Sirens Press, Book Awards, Bridgehead Books and Continental Books at 458 Broadway in New York. The old pornographers go on and on and the not-so-old ones do likewise. An example of the latter is Ralph Ginzburg who has progressed from publishing Eros and Fact to his newest effort, Avant Garde. Although Ginzburg was convicted on obscenity charges in 1963 he has yet to serve his first day in jail because of it. The conviction was upheld by the Supreme Court in March, 1966 but legal maneuvering allows Ginzburg to continue operating his poronography business.

Legal moves have been made to have the five year sentence suspended with judges being shifted around and one judge even testifying in Ginzburg's behalf. Civil Court Judge Irving Younger appeared as a witness in Ginzburg's behalf at a hearing in Philadelphia on April 9, 1969, praising Ginzburg's "exemplary" moral character. Judge Younger was well acquainted with Ginzburg, having been corporate counsel to Fact and Avant Garde and ceasing his representation of Ginzburg only after ascending the bench in January, 1969.

It is obvious that Ginzburg is a big time operator and has important friends. In promoting his pornographic publication Eros he sent out nine million pieces of advertising which resulted in 150,000 subscribers and $3 million in revenue. His magazine Fact published a libelous article on Sen. Barry Goldwater at the time he was the Republican nominee for president of the U.S. Senator Goldwater sued and obtained a libel judgment against Ginzburg for the article which questioned Goldwater's sanity and undoubtedly had a disastrous effect upon his election campaign. Ginzburg is much in evidence with the "kids" of the "New Left" and his Avant Garde is an expensively and elegantly produced "underground press" type magazine. Drawings by the same artist, Ron Cobb, appear in Avant Garde and the cheap shoddy underground papers. Ginzburg gives his writers an opportunity to promote anti-American and atheistic propaganda.

In an uphill fight to protect the youth of America an anti-smut law was finally allowed to stand by the U.S. Supreme Court in 1968. This New York law has encouraged other efforts and at present there are 187 bills pending in Congress to control the tidal wave of pornography. For the first time since the Warren Court began "liberalizing" the obscenity laws in the early 1950's, there reportedly is hope of passing legislation which the Supreme Court will approve. The bill which has the most support is that of Rep. Charles E. Bennett (D., Fla) who describes it as follows: "It would be a violation of federal law to knowingly sell, offer for sale, loan, deliver, distribute or provide to a minor in interstate commerce or through the mails material which is defined as 'harmful to minors' under the bill." The same test would be applied to movies and the graphic arts. He stated that "the spread of smut literature and other materials through the mail, on newsstands and other places is a great national problem." The American Civil Liberties Union is expected to testify against all the bills.

Pornography is big business and a big problem. There is in existence an 18-member commission established by Congress (the Commission on Obscenity and Pornography) which has been investigating the situation since 1967 and has come up with no results as yet. It is scheduled to report its findings next summer but dissent, reportedly, has made progress almost impossible. One of their major points of disagreement is the effect of pornography on conduct. Concerning this J. Edgar Hoover has stated: "The increasing number of sex crimes is due precisely to sex literature presented in certain magazines." Postal authorities received 167,792 complaints concerning pornographic material in the mails during 1968, and 234,072 during the fiscal year 1969.

The effect of the constant preoccupation with sex which today's youth cannot escape is not only dangerous, it is sad. They are missing out on the happiness which can come from love and marriage now that sex has become the scientific satisfaction of physical needs, rather than the climax of love. Dr. E. Merrill Root in his article in American Opinion magazine, entitled "On Love," states:

"Ours is not an age of the liberation of sex; it is the age of the destruction of the sexes. . . . We (who oppose the sex-mongers) would save the rapture and the bliss from being made cheap and promiscuous and slight and easy and vulgar and crass, we would save its quality and value by seeing it not as fireworks-in-the-glands, but as a fugue of Bach's or a symphony of Beethoven's."

(Nude Living, published bimonthly by Elysium Inc., 5436 Fernwood Avenue, Los Angeles, California 90027, is a cultural, scientific, educational, sociological publication produced and distributed to illuminate the conviction that the human body is clean and wholesome, and that increased public understanding of that basic nudist viewpoint will contribute materially to the advancement and well-being of all people, whether or not practicing nudists, as well as to the cultural heritage of a free press. Except where specifically stated to the contrary, the textual and pictorial content of this publication are independent of one another, and no interrelation of the two should be inferred.)

SCHOOLS FOR SEX: A PSYCHOLOGICAL NECESSITY

(By Iris Bancroft)

Webster defines education as "the action or process of educating or of being educated." Hardly much help. It isn't until we reach the word teach that we find a definition that gets to the heart of the matter. Here Webster is most definite. Teach is defined as meaning: "To instruct by precept, example, or experience." Most good educators will accept that definition as adequate, and will attempt to act upon it in a teaching situation. They will be especially careful to provide opportunities for experience.

This emphasis on practice has been proven pedagogically sound, and good schools provide opportunities for the learning individual to experience a skill to be learned. Educators insist that this is necessary. That is, they insist until the act to be learned becomes sexual in nature. Then, suddenly,

great resistance develops against any form of personal practice at all! It is as if a growing human is expected to learn this most important function subliminally.

It is unnecessary to explore in depth the reasons for this illogical attitude. All of us are aware of the taboos and regulations that, in our society, surround the entire sex act. We know the religious, the "moral," the conditioned emotional reactions that are evoked when the subject arises. Unfortunately, many of us are willing to accept these controls without question. We simply accept the "fact" that sex is different. It "cannot" be taught by educator-approved methods. We "must" leave it to the grey area of "by-gosh-and-by-golly."

It is my contention that this timidity and foolishness is the cause of many of the personal emotional problems that we face today. It also is my contention that, until we face up to the situation, we will not appreciably improve the mental health of our people.

Let us look at the problem as dispassionately as we can. Ideal learning and teaching conditions require that instruction be given by skilled persons, and that practice be permitted on the part of the students until they master the subject involved. Daily, we see the effects of following such procedures—in the fields of music arts, graphic arts, reading, writing, athletics—in fact, in all of the areas of living that people encounter—except in that of sex.

Daughters learn to cook by helping their mothers until they are capable of doing it alone. Then mothers step aside and watch while the daughters practice. The same procedure is used when a son learns to repair a car, cut a lawn, build a set of shelves—literally everything he ever will have to do as a grown man. Everything, we must reiterate, except the sex act. Then no one instructs, no one permits practice, no one watches and corrects as the practice takes place. The children who are so carefully tutored in general housekeeping chores are never taught how to perform with competence the most vital act of marriage.

The results of this one-sided instruction are myriad. Women who are considered to be "good wives" are divorced or abandoned by husbands starved for sex. Men who are "excellent providers" lose their wives to more exciting men who promise sexual pleasures. Millions of others live lives of dull boredom. And the terrible fact is that few people even dare to admit that such problems exist.

That, of course, isn't literally true. Society has reached the point where most people acknowledge that married couples should be helped. "Marriage clinics" and "marriage counselors" are available, so that couples can discuss their problems. This is some improvement over the past, when no one would admit that there were problems to be solved. But it still is a most unbalanced situation. Compare it with the following:

What would be thought of an orchestra director who hired 100 men and women to form an orchestra but did not concern himself with their performing skills? Instead of seeking polished musicians, this imaginary director would hire all who applied, set them down before music stands, put instruments into their hands, and then—only then—begin to "discuss" the techniques of playing the various instruments and producing the desired ensemble effects. What's more, he would do this experimentation on stage before a full house, and with an assortment of music that would challenge polished musicians!

Insane? I'm sure you would agree that such a conductor would have to be! The audience would laugh him off the stage. And if some leader in the community insisted that it was "morally wrong" to teach music skills to musicians before they gathered on stage for a performance, he would be considered a raving fool!

But change the circumstances: Limit the "performers" to two and put them in a marriage bed and, somehow, the whole situation becomes distorted. Now we are willing to accept all these impossible requirements, and to agree that it would be "morally wrong" to prepare the two young people for the vital activity. We accept without question a decision that it would be "bad" to provide the "performers" with adequate training and instruction. This, too, is in every sense of the word, ridiculous!

Such a situation must be corrected! We have no right to deny instruction in sex to our children, when sexual pleasure and sexual ability are so vital to happiness and successful living. And vital they are. For a man or a woman who feels incapable or "cheated" sexually is bitter, unhappy, and basically maladjusted.

A possible solution is presented in the works of some modern anthropologists. They have discovered communities of people for whom sex instruction, in the best sense of the word, is an accepted practice. The Samoans, natives of New Guinea, are such a group. In their society, sex education begins with puberty, when the child is taken in hand by one of the older relatives of the opposite sex. He is carefully instructed, through actual doing, in the sex act. These are not lessons in words only—nor are they vague "birds and bees" tales. The child learns through practice, guided by an experienced, mature teacher. Only when the lessons are mastered is the teen-ager ready to marry and to thereby establish sexual relations with his peers.

I propose that this is the form of procedure that we must follow. Obviously, because we are not a simple primitive society, we will have to alter the details. For one thing, until some time has passed, we cannot assume that immediate relatives are equipped to serve as teachers. We will have to look elsewhere for the skilled instructors.

For this reason and, because it fits in with our established behavior patterns, I suggest that we establish "schools for sex." Many of the teachers would have to be accepted on the recommendation of others—until we could establish some standards. But such "good lovers" would be likely to be superior teachers.

I recognize that, to our prudish ears, such a system of sex instruction sounds strange. It certainly lacks the intimacy that surrounds sex education in Samoa. But it is in keeping with our general societal standards. We don't permit parents to instruct in subjects in which they are not qualified. The child learns from specially-prepared instructors who have mastered the subjects to be taught and who are acquainted with the most approved teaching techniques. Why not include sex in the list of important subjects to be learned? Why leave sex to chance?

Because this formal establishment would be difficult to start, I propose that we permit sex schools to be started as were our "regular" schools. As soon as possible, we should permit individuals to open tutoring establishments in sex. Naturally, for health reasons, they should be required to be examined regularly, as should the students who enroll. In fact, it might be wise to require that pupils refrain from all outside experimentation for the duration of the lessons, in order to protect the teachers.

Certainly important changes would occur were such a step to be taken. Those persons who graduated would be capable of teaching their chosen mates—if they wished to—though they probably would choose to marry other graduates. As more people became skilled, more elaborate schools could be set up. It probably would be advisable to limit the age of teachers to between 30 and 50, in order that advanced age or extreme youth would not interfere with proper instruction procedures.

It is obvious that such a drastic change in social behavior would not be simple to effect. There would be some people who, due to archaic morality, would object to such instruction for themselves or for their children. But there are already established channels for handling such situations. Educational hold-outs are around today.

I do not deny that sex instruction would be better administered on the personal level found in Samoa. But this, we must admit, is not possible here. We cannot permit the blind to lead the blind. And, at present, it is the abysmal ignorance of the adult population that has precipitated our problems.

I can hear critics of this proposal now: "What she's talking about is pure-and-simple legalized prostitution!" But this just is not so. A prostitute considers it her job to behave in a manner that satisfies the desires of her customer. She is there to please him, not to educate. The teachers I propose would instruct, conveying knowledge and skill to their pupils.

Such instruction, in which actual practice would be possible would produce graduates better able to act successfully in the area of sex than before they entered the school. A learning situation would have been in effect. This is no more prostitution of the body of the instructor in sex than a standard classroom is prostitution of the mental capacities of an instructor in music.

A wild dream? Possibly. But one which, if realized, would result in a society free from many of the sexual hangups and fears that now shroud our minds and inhibit our living as joyful members of a successful human society.

THE PSEUDO MAJORITY: THE TYRANNY OF THE LOUDEST VOICE

HON. CLEMENT J. ZABLOCKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. ZABLOCKI. Mr. Speaker, the recurring chant of "Peace Now" echoed across the Nation last Wednesday, moratorium day. The moratorium was intended to demonstrate in the words of Nicholas von Hoffman of the Washington Post, that the American people do not care whether we "bug out, run out, march out, stumble out, crawl out, or fade out of South Vietnam."

There are undoubtedly some Americans who do indeed feel this way. However, I would seriously contest any assertion that they are anywhere near a majority, even though they shout the loudest.

And the shouting is what I fear, what we—the representatives of all the American people—must fear. We must not let those who shout the loudest become a pseudo majority. We must beware of the tyranny of the loudest voice.

Even more importantly, with respect to the war in Vietnam, we must not be moved to act irrationally in response to the irrational, emotional cries of "Peace Now."

Instead, we must maintain a rational perspective. Such a perspective was shown in an article which appeared in this morning's Washington Post as a rebuttal to Mr. von Hoffman's article on the moratorium.

The article, entitled "A Rebuttal," was writen by Mr. Ward Just, an editorial writer for the Post. Mr. Just covered the war in Vietnam for 2 years as a correspondent for the Post. Because he exhibits both historical insights and a responsible position, I submit his article to the attention of my colleagues and recommend it to their careful reading:

A REBUTTAL

(By Ward Just)

I suspect that Nicholas von Hoffman is right when he says that people in their heart of hearts don't care whether we bug out, run out, march out, stumble out, crawl out or fade out of South Vietnam. Who wants to negotiate about cancer? He is talking about a substantial minority in this country, people who have had it, as the President once said in another connection, up to *here;* thus frustrated, convinced the nation is acting immorally, they want to quit.

It would not be difficult to do, and sure as shooting there is a paper in the White House describing the scenario, how Kennedy and Johnson were responsible for the war, how Nixon, Kissinger and Company gave it the good college try but saddled with an impossible Saigon government and an intransigent and seemingly inexhaustible enemy, had concluded, for the good of the country, that losses must be cut. Add a few juicy charges of past mismanagement of the war (God knows there is enough evidence of it), and conclude that the South Vietnamese must now proceed on their own. America has done all it could, and Godspeed to the survivors. And the kids and their parents are pacified. They won't have to go to war in South Vietnam.

It is a pointless exercise to argue the politics of it, whether or not the loss of Vietnam will lead to the loss of Waikiki or even of Bankok. Even so, that's a detail—arguable either way with most thoughtful men probably believing that yes, a loss in Vietnam probably means the "loss" of Southeast Asia, but if it did, which it might, so what. Southeast Asia, like China, is not our's to lose. "In the last analysis it's *their* war," President Kennedy said, blah blah blah. So it is necessary to set up the argument another way, to make it relevant, as they say, to what's happening now. This is to speak of the war in terms of its morals, and to do that is to examine it from the perspective of the Vietnamese.

Many of the Americans who so vehemently oppose the war do so from the position that the United States has virtually destroyed what it has tried to save. It is a fair point and an accurate one, far fairer and more accurate than they might suspect.

The Vietcong had all but won the war in early 1965, before the introduction of American combat troops. The test of strength was decently fair, with the indigenous Southern army with American support fighting the indigenous Southern guerrillas with North Vietnamese support. It seemed clear then that the Communists had the support of the people of South Vietnam. Theirs was the strong tide, and in that Buddhist nation, a nation with an ear tuned to the flow of history (in American political argot it means riding with the winner), the strong tide was the one that would win. The ordinary citizen, not wishing to be out of harmony, would go along; to refuse was to commit an unusual act of defiance. Defiance in that sense is not the Vietnamese way. So in 1965 the Saigon government was playing out a very weak hand, with little support in the country.

The Americans changed all that, first with the money and the men and then, in 1966, by taking charge of the prosecution of the war. What that did was free the South Vietnamese from the necessity for choice. The Americans ran the war now, and the South Vietnamese were obliged to go along with it—whether they wanted to or not. Many of them did. Others did not. Some of those who had managed to sit on the razor's edge were now forced to ante in with the allies. In a society as astoundingly resilient as South Vietnam's, many more continued to play both ends. But it became increasingly more difficult as 100,000 men became 200,000 men and finally half a million and $30 billion a year. What this means is very simple. It is that the responsibility for prolonging the war is this country's, not Saigon's nor Hanoi's.

The problem is that the tragedy is much, much deeper than Nicholas von Hoffman and others would have it. It would be wonderful if we could just walk away from it, pull the boats up to Camranh Bay and steal away into the night, leaving Saigon and Hanoi to work things out their own way. But if you did that you would want the journalists to leave along with the soldiers because the stories that would come with the Communist victory would be pretty grim stories, 20 years of scores to settle.

Our responsibility is not to Thieu or Ky or any of the other generals or merchants, nor is it to the South Vietnamese constitution nor to Freedom, nor even to the Americans who have died there, almost 40,000 now and 250,000 wounded. The responsibility is to those South Vietnamese who have been obliged to fight or otherwise resist the Communists because the Americans disturbed the normal course of events and changed the war. That is why the responsibility goes so deep, and it is a responsibility that will not be discharged by importing three million Vietnamese and parking them in the middle of Utah. But it is either that or stand by and watch the slaughter. Of course there may be no slaughter. Possibly not, but I know of no one who would make a bet on that. Twenty years of scores to settle.

That is not an argument bound to find much favor anywhere, because the Vietnamese are not nature's noblemen and we have had them around our necks for too long. For God's sake, for how much longer are we going to pick up the morning paper and find Vietnam all over page one? Whoever heard of Danang before 1965? The bitterness and anger sifts down and finally people say the hell with it. Get out, get out; get out, and we don't care how; get out, and get out right now; get out, or we'll blow the house down. And we don't care what happens later. What happens in the future doesn't matter, because nothing could be worse than the present.

But huh uh, kiddies; it won't work. This particular tragedy isn't going to go away because American college students are excused from duty in the rice fields. It's there with us now, and is going to be there for a generation and the question the moralists ought to ask themselves is where they intend to assign the responsibility for the blood left in the wake of the American boats, pulled up there in such haste at Camranh Bay. When the newspaper displays the photographs of those killed, what do we do then? Avert our eyes? Blame Lyndon Johnson? Perhaps pretend it isn't as bad as it looks, that the victims are war profiteers, or corrupt generals, or pimps or double agents. To the neurotic young it won't matter; American imperialism will be to blame, and that will be that. But what of the rest of us?

All we can do now is play out the tragedy, and try to learn the right lessons. On the ground in South Vietnam, revise the rules of engagement, initiate a cease-fire, keep withdrawing troops, but keep security as well; try to keep people alive, ours and theirs; wind all of it down, but in the winding be mindful that there are people whose lives are at the mercy of the Americans. What is entirely misunderstood in the current flight from reality is that this war is not Kennedy's war or Johnson's war or Nixon's war, it's America's war and we all bear some responsibility for it, and for its decent resolution. And the heroes of it are not in Sweden. The heroes are dead.

Our accountability to the South Vietnamese is not without end, but it is there for the immediate future. That is the price you pay for undertaking the direction of someone else's life. What extraordinary courage and toughness it will take now for Americans to be decent.

NATIONAL BUSINESS WOMEN'S WEEK

HON. MARGARET M. HECKLER

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mrs. HECKLER of Massachusetts. Mr. Speaker, a most distinguished organization, the National Federation of Business and Professional Women's Clubs, is focusing attention on woman's role in today's world through the observance of National Business Women's Week, October 19 through 25.

Since its founding in 1919, the National Federation of Business and Professional Women's Clubs has played a leading role in seeking to advance women's rights and secure fair and equal treatment for men and women alike in various fields of employment. Further, it has worked for beneficial legislation to advance these causes. In addition, aware of its responsibilities to improve or assist in improving world conditions and conditions of our society, the federation has worked on behalf of significant international and national causes.

At its national convention last July in St. Louis, the federation stated as policy its support for measures within the framework of the Constitution of the United States which will promote peace, strengthen national security, and make more effective the United Nations and such other international organizations of which the United States is a participant, without relinquishment of our basic freedoms.

It adopted a strong legislative program which seeks to end discrimination against working women and to advance efforts to bring about more effective crime control and law enforcement.

Copies of the federation's legislative platform have been sent to each Member of Congress. I would strongly urge each Member, as I will, to carefully review and consider the recommendations proposed by the legislative platform so that many of these just and reasonable proposals may soon be translated into law.

In my own Commonwealth of Massachusetts, and the 10th Congressional District which I represent, I have long been aware of the leadership exerted by local federation groups. I commend National President Myra Ruth Harmon for her succinct and admirable statement of the federation's purposes:

Our members are imbued with the importance of an informed, active electorate; with the necessity for civic responsibility and service. Accordingly, our members endeavor to be knowledgeable about and to influence

legislation . . . We look to the Congress for leadership and support in our legislative aims.

National Business Women's Week is an appropriate time to consider the vast and unrealized potential which women can offer our society, given the opportunity, and to resolve to eradicate the unfortunate discrimination which has wasted this source of strength and leadership to our Nation's great disadvantage.

LEAD POISONING DRAFT

HON. WILLIAM F. RYAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. RYAN. Mr. Speaker, lead poisoning is a serious problem in our Nation's cities.

This disease, the nature and effects of which were largely ignored until recently, plagues an estimated 25,000 to 30,000 children in New York City alone.

Children get lead poisoning by eating bits of old lead-based paint which falls off the interior surfaces in the substandard housing of our urban centers.

Often, the disease is not detected until it has reached its most serious stages. At this point, lead poisoning results in epilepsy, cerebral palsy, permanent mental retardation, and death.

I have introduced three bills, H.R. 9191, H.R. 9192, and H.R. 11699, which are aimed at combating this silent epidemic. These bills were reintroduced in July with 18 cosponsors as H.R. 13256, H.R. 13254, and H.R. 13255.

I include in the RECORD an article which appeared in the October issue of The Sciences, published by the New York Academy of Sciences. The article was written by Estie Stoll and titled "Lead Poisoning: Price of Poverty?"

I urge my colleagues to read this article, and to support legislation which will combat and eradicate this unnecessary children's disease.

The article follows:

LEAD POISONING: PRICE OF POVERTY?

(By Estie Stoll)

For ghetto children, home may be more deathtrap than sanctuary. Largely unsupervised, with a high craving for non-foods, between 10 and 35 per cent of the East Coast slum children are estimated to have high blood levels of lead, caused by ingesting lead-base paint and plaster that flakes off the walls of their homes. Two to five per cent of these children develop symptomatic lead poisoning; a fourth of those who go on to develop lead encephalopathy suffer irreversible brain damage. (Medical Tribune, April 7, 1969.)

Permitting lead paint to constitute this health hazard in deprived areas "is a social crime and should be punishable as a crime," Dr. René J. Dubos told a Conference on Lead Poisoning at Rockefeller University. Professor of Environmental Medicine and Chairman of the Conference, Dr. Dubos insisted that a more concerned citizenry could force effective legislation to eliminate lead-poisoning just as it eliminated contamination of unpasteurized milk at the beginning of the century.

Lead paint is illegal in many cities, including New York, but the fines for failure to remove old lead paint are sometimes less than the cost of removal. Although medically unsafe, partial paint removal is often legally acceptable. The primary obstacle to successful treatment of plumbism is re-exposure to a lead-filled environment, Dr. J. Julian Chisholm, Jr., Associate Professor of Pediatrics at Johns Hopkins University, told the Conference. For surviving encephalopathy patients return to a high-lead environment, the chance of permanent brain damage increases from 25 to 100 per cent, he estimated. In Baltimore, a highly successful program against lead poisoning resulted from the combined efforts of physicians and city agencies to seek out patients for treatment and prevent their re-entry into unsafe homes. After in-hospital therapy is completed, a patient goes to a convalescent home while lead paint is removed from his old home, or new housing is found for the family. "Fifteen years ago, before the program began, most of our cases of lead intoxication were at the encephalopathy stage before the time of hospitalization," Dr. Chisholm said. "Now most are asymptomatic, and we see only two or three encephalopathy cases a year."

Other cities have been less successful in solving the lead poisoning problem. In New York's major lead belts—the South Bronx and Brooklyn—400 to 700 people per 100,000 are affected each year. Of these, about 500 are hospitalized yearly, and 30 to 60 of them already have encephalopathy, according to Dr. Joseph A. Cimino, Medical Director of the Department of Health's Poison Control Center. Returned to an unaltered situation, Dr. Cimino estimates, these children have a 10 per cent chance of being poisoned again.

Because the pocketbook is often more vulnerable than the conscience, Dr. Chisholm points out that prevention of lead poisoning is cheaper than victim care. In Baltimore, more than $220,000 is needed to treat each permanently brain-damaged individual; estimated costs for paint removal, or door and window replacement, are only $300 and $600–$1,200, respectively. Where prevention is not possible, a new urinalysis technique being tested in New York which measures δ-aminolevulinic concentration may help screen asymptomatic victims before they progress to more acute stages.

CALL TO ACTION BY DR. DUBOS

A Congressional bill for a national program to assist cities in eliminating lead paint in inner-city housing, and to treat patients, has already been introduced by Rep. William F. Ryan, New York Democrat. A bill pending in the New York State legislature would allocate funds to detect asymptomatic children. "If we do not act ruthlessly to control this simple problem," says Dr. Dubos, "it is an admission that our society is socially and intellectually dishonest, and it will deserve all the disaster that will come to it."

BIG TRUCK BILL

HON. FRED SCHWENGEL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. SCHWENGEL. Mr. Speaker, my editorials for today are from the Hillsdale, Mich., News and the Midland, Mich., News of August 13 and September 12, 1969, in the State of Michigan. The editorials follow:

[From the Hillsdale (Mich.) News, July 28, 1969]

BIG ENOUGH NOW

Public opinion last year set up a roadblock against a Senate-passed bill permitting states to increase the weight and width of buses and trucks operating on the interstate highway system.

Now the bill has turned up again in the House public works subcommittee on roads, and trucking and bus interests are attempting to get a favorable recommendation.

The Senate-approved bill would allow states to increase the maximum weight of single-axle trucks from 18,000 to 20,000 pounds; of tandem-axle trucks from 32,000 to 34,000 pounds; and to replace the existing gross weight limit of 73,280 pounds with a sliding scale formula based on the distance between the front and rear axles and the number of axles on the vehicle. The maximum width would be increased from 96 to 102 inches.

The American Automobile Association has charged that the 1968 legislation would open the door to triple-trailer trucks on the interstate system. Motorists who find it difficult to pass the mammoth trucks on highways today would be up in arms if triple-trailer trucks were permitted.

Even a six-inch increase in the width of trucks would increase the safety hazard. The problem exists mainly on highways and streets removed from the interstate system. Drivers of many of the huge trucks already find it difficult to make turns at right-angle intersections.

Even though the federal legislation permits states to raise the limits, the bill should be blocked in the House. Citizens are all too familiar with the success of the trucking lobby in heading off increases in license fees and in diesel fuel taxes, and getting its way on other legislation.

[From the Midland (Mich.) News, Aug. 13, 1969]

TRUCK "SAFETY" NEEDS SCRUTINY

When the trucking industry talks about "safety" and "economy," the words mean something quite different than they do to the general public. The industry is talking about trucks, not about the rest of the traffic.

In testimony before the House public works committee, William A. Bresnahan, managing director of the American Trucking Association, said that permitting longer (70 feet), wider (8½ feet), heavier (a ton more per axle) trucks would "provide a family of trucks which would be safer than the existing units."

The story goes that wider trucks could have more adequate tires, more space between tires, for cooler running and use of chains, more adequate springs and bigger brakes. The proposed length—which states would be empowered to adopt, and Wisconsin's limit now is 55 feet—would permit greater cubic and weight capacity "without any additional stress on roads and bridges," the spokesman went on.

Fogging up the safety issue further was the association's research counsel, Edward V. Kiley, who cited Bureau of Public Roads figures to show 26.8 passenger cars are involved in accidents each million miles of travel, compared to only 3.23 trucks. How this speaks for bigger trucks was not explained.

A private study done for the Automobile Manufacturers Association shows .3 fatalities per hundred persons in collisions of passenger cars and pickup trucks, 7.1 in collisions of cars and tractor-trailer combinations and 13.3 in tractor-two-trailer combinations, the so-called double bottoms encouraged by the bill.

The American Automobile Association, which introduced the latter statistics to the committee, noted that, when a truck collides with a car, those in the smaller vehicle are more liable to injury or death.

The truckers' statements on road and bridge wear also can stand no close scrutiny. The American Association of State Highway

Officials has reported that increasing single axle loads by 2,000 pounds adds the effect of 1.6 applications of the present 18,000 pound limit and cuts remaining life of pavement 25 to 40 percent. If tandem axles were increased from 32,000 to 34,000 pounds, federal highway maintenance might jump $1.6 billion, and the "overstress" in bridges would increase.

The kind of "safety" and "economy" the trucking industry is talking about we can do without.

DO THE BIG TRUCKS PAY ENOUGH?

Whether the biggest trucks put as much into highway taxes as they add to the cost of road building continues to be a lively question.

It has been asked for years without an answer that ends the questioning. For lack of convincing proof it is still a drag on those who lobby for bigger trucks.

They were shouted down by letters from the public to members of Congress a year ago, but the big-truck interests are trying again.

The question is back in this year's record.

The authoritative voice of Douglas B. Fugate, first vice president of the American Association of State Highway Officials, was heard by the House subcommittee on public works.

He said larger trucks already on the roads pay less than their share of highway costs. Mr. Fugate said that studies made by these men who build and maintain the highways show that allowing axle weights to increase only one ton from the present nine-ton limit would reduce the life of pavement 25 to 40 per cent.

This is a fresh statement from an engineering viewpoint of an attitude that has been around continuously since the interstate system was begun.

In the discussion preceding adoption of the law in 1956, there was a House Ways and Means * * * J. S. Giles, chairman of the highway committee of the American Automobile Association said heavy trucks then were paying less than "an equitable share of Federal-aid highway costs."

One of the compromises was that the interstate program was to be started while the heavy truck portion of the taxes was still undetermined.

Millions of dollars were used for a pavement-testing program at Ottawa, Ill. Technically, it was a "highway cost allocation study."

After many months of intense interest on the part of truck fleet owners, a voluminous report was issued. It said: "There is a definite indication . . . that the heavier trucks and combinations (particularly the latter) should be paying considerably more, in relation to the payments by the lighter vehicle groups, than they do now."

NATIONAL BUSINESS WOMEN'S WEEK

HON. ROMAN C. PUCINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. PUCINSKI. Mr. Speaker, 50 years ago, the National Federation of Business and Professional Women's Clubs was formed, which has become one of the largest and most outstanding organizations in all 50 States, the District of Columbia, Puerto Rico, and the Virgin Islands, with a membership of 180,000.

During the week of October 19–25, they are observing National Business Women's Week in recognition of the innumerable contributions made by the professional and business women of this country and the world.

Mr. Speaker, I would like to honor these ladies who from all walks of life have contributed so much in all fields of human endeavor. I have stated before this House the fact that exclusion of women from responsible positions, jobs with good pay and good prospects can be traced largely to myths and generalizations about women as a class. For that reason I introduced House Joint Resolution 801 which would permit a constitutional amendment to provide equal rights for women in America.

Title VII of the Civil Rights Act of 1964 has been a most forceful step in the direction of securing equal rights for women, but the realities of sex discrimination still exist in many facets of our society. The national federation has done an outstanding job in removing many of the barriers in our society by providing leadership, guidance, and inspiration.

I would like especially to pay tribute to the Jefferson-Norwood Business and Professional Women's Club in my district, which has just celebrated their 10th year as a member club of the national federation.

Jefferson-Norwood BPW Club has diligently pursued the objectives set forth by the federation, to elevate standards for women in the professions and business, to promote women in business and professions through scientific, industrial, and educational opportunities; several scholarships have been awarded to female students of the junior level in college who are top-grade students in need of financial support. A foster girl-child has been supported in Hong Kong, through PLAN. The support of Chinese Nurses Home in Formosa and the Ramallah School for Girls in Jordan have been projects of the club as well as support of the national federation foundation and the Illinois State headquarters building. Other charitable projects have included contributions to the Klingberg School of Mentally Retarded and the New Horizons Retarded Foundation.

This club can quite properly boast of its many outstanding career women, one of whom is the current president, Miss Lois Altmann, who held the same position in 1966–67.

Another outstanding career woman is Dr. Fonda Stewart, a Naprapath, and a past president of the club. Dr. Stewart is in her second 2-year term as president of the Illinois Naprapathic Association and a director of the American Naprapathic Association. She is a faculty member of the profession's college, chief librarian of the college and cochairman of the department of naprapathy of the college, and holds the distinction of being the first woman to have held the office of president of her professional association. Dr. Stewart has served in many community projects and is presently serving as recording secretary and legislation chairman of the BPW Club, and has been a delegate to all National and State BPW conventions.

Many professions are represented in the Jefferson-Norwood BPW Club, including law, education, nursing, dental technicians, natural healing arts, and engineering; salaried accountants, secretaries, bookkeepers, and personnel workers, owners of secretarial services, beauty shops, realty and insurance firms, and gift shops.

I take great pride, Mr. Speaker, in saluting these wonderful and outstanding women.

NEWSPAPER FAVORS FEDERAL PAY BILL

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. UDALL. Mr. Speaker, in the October 29 edition of the Federal Times there appeared an editorial supporting the House of Representatives' recent action in passing H.R. 13000. This editorial correctly noted that Federal employees are the victims of inflation rather than the cause of it. In order to share this with my colleagues, I insert it in the RECORD, as follows:

THE PAY BILL

The threat of a Presidential veto has failed to deter the House of Representatives from passing a pay raise bill for federal employes.

Whether the threat will be carried out or not remains to be seen.

In an obvious last-minute effort to block passage of the bill the President has warned that it would create the need for cuts in personnel and services.

We can sympathize with his concern over inflation. We can agree that the raise will add to the inflationary pressures in the country.

But, we fail to see why the government workers always are elected to be the ones to make the sacrifice.

The same considerations should have prevailed when the Congress voted its own huge pay raise; but they were strangely lacking.

A few years ago an experiment was conducted in the use of wage guidelines. Government employe organizations went along with the test and settled for a smaller raise than they would have sought normally.

They got the smaller raise. But, industry ignored the guidelines and the comparability gap grew larger.

This is a year in which we have seen workers in some crafts granted wage increases which are truly inflationary. In the meantime, living costs have continued to rise.

Yet, once again, the government worker is asked to hold back and set the pattern for the rest of the nation. Of what use is a pattern if no one follows it?

The plea to help fight inflation is indiscriminately coupled with suggestions that there is laxity and much "fat" to be cut from government.

If there is, in fact, undue waste in government, then this should be stopped. If this makes possible a cut in the size of the work force—without dropping essential services—then the cut should be made. If inefficiency is rampant, then it should be corrected.

The poorest way to handle the wage increase request is to tell the government worker he risks cutbacks or other reprisals if he seeks a fair return for his efforts.

That there is room for increased economy in government is no secret. That there are other ways to achieve it besides threatening cuts in service and personnel also is no secret.

The biggest need right now is for the government to stop using the federal employe payroll as a political football.

Honest dealing with the problem, instead

of the constant maneuvering for political advantage would be a far better solution.

Threats, even against children, soon lose their value. They are neither an effective motivator for good nor a long-range deterrent to evil.

We have said repeatedly that we believe the people of the United States can afford and are willing to pay for good government.

It is time to stop treating the government employe like a child and afford him the same status he could expect working in industry.

WASHINGTON STATE REPUBLICANS SUPPORT PRESIDENT'S PEACE EFFORTS

HON. THOMAS M. PELLY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. PELLY. Mr. Speaker, the King County Republican Central Committee has adopted a resolution in support of President Nixon's efforts to reach a conclusion of the Vietnam war. This resolution was passed by the more than 500 precinct committeemen in a special meeting October 16, 1969, in Seattle.

Under unanimous consent I include this resolution at this point in the RECORD:

RESOLUTION

We, citizens of the State of Washington and these United States in public assembly on this 16th day of October, 1969, having a great concern for the security of our nation and the welfare of our people, do hereby declare the following to be the expression of our disposition toward the conduct of our public affairs by the leaders of this Republic.

We take note that in the course of the affairs of man and nations there occur crises which can neither be evaded nor avoided and we understand that we are now living in such a period and as a people and as a nation are confronted by just such a crisis.

We understand this crisis to be one of the spirit and of the will which is now testing our resolution as a people and a nation to defend and preserve those principles of self-government upon which this nation was founded.

We accept that this nation and its institutions are under attack by a militant enemy both foreign and domestic and we here declare that it is our considered and deliberate intention to resist these attacks with all the strength and resources at our command.

We have just witnessed within the preceding 48 hours, demonstrations which, in their effect if not in their intent, have served the cause of those forces which would destroy our nation, its institutions and the liberty of its people.

We here express ourselves in full and complete disapproval of the actions of our fellow citizens who would have us desert our allies in battle, repudiate our national commitments or withdraw into the illusory world of isolation. We will not allow the world to fall prey to the predatory forces of international communism, despotism or reaction.

We declare our full and complete confidence in President Nixon, our nation's leaders, and our gallant fighting men to bring this engagement in Vietnam to a successful conclusion; a conclusion which will strengthen and preserve the interests of this nation and the forces of liberty for all mankind.

We congratulate President Nixon on his demonstrated determination to resolve this painful conflict in Vietnam on an honorable and reasonable basis. We declare our confidence in him and his policies. We know that peace in this hostile world will come and be kept when the forces of freedom are strong and when those who command have the will to use that strength.

We ask God to strengthen and guide us all through these perils of our times.

AMERICA'S YOUTH—STILL THE SPEARHEAD OF CHANGE

HON. THOMAS P. O'NEILL, JR.

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. O'NEILL of Massachusetts. Mr. Speaker, last week we witnessed one of the most impressive and peaceful demonstrations in this great Nation's history. Moratorium Day was a nationwide outpouring of dissent in the best tradition of democracy and it was led by thousands of our young men and women.

On October 14, the day previous to this thoughtful and constructive event, Ambassador George Feldman delivered a speech at the National Industry Leader Award Dinner of B'nai B'rith. He took this occasion to speak about America's youth—their sometimes violent dissent, which, as he pointed out is the expression of a small minority and their great promise to the Nation and the world.

George Feldman has served the United States as Ambassador to the great and soverign nations of Malta and Luxembourg. He is a brilliant attorney whose work with the House Subcommittee on Space and the Federal Trade Commission was innovative and outstanding. He has a beautiful and loving family which is a pride to this country.

Mr. Speaker, I submit Ambassador Feldman's speech so that you and my colleagues in the House may benefit from his wise and cogent ideas on "America's Youth—Still the Spearhead of Change":

AMERICA'S YOUTH—STILL THE SPEARHEAD OF CHANGE

(Address by the Honorable George J. Feldman)

I am honored by the opportunity to take part in this tribute to a great industrial statesman. Individual enterprise and private industry are under constant attack today, even in this highly developed nation of ours. The contributions of corporate enterprise to our economy in terms of employment, taxes and goods and services must be supplemented with a direct concern for the problems that beset our society.

Kendrick Wilson, whom it has been my pleasure to know for many years, typifies that kind of corporate responsibility. In his personal life as well as in his business leadership, his genial manner is matched by an awareness of key problems and a strong will in finding solutions.

He symbolizes the enlightened outlook of the corporation he heads, a company that has been in the forefront of corporate efforts to train and bring job opportunities to the seriously disadvantaged people in our society. In conducting Avco Corporation's business affairs and in leading its enlightened, businesslike programs in the areas of human and urban problems, Mr. Wilson measures up to every criterion for statesmanlike industrial leadership.

His career typifies the best qualities of the leaders of our generation. If our nation can continue to produce men and women of Kendrick Wilson's calibre, its future will be in good hands. In view of some of the activities of today's young generation, many people are worried that that may not be the case.

American youth, they say, want either to drop out of our society or to tear it down. Since my return to the United States I have been troubled by the alarmist nature of our concern over youthful unrest. An excerpt from one angry letter to an editor especially stays in my mind. Quote:

"A great many of the students of today are the most self-centered, self-pitying, confused generation of parasites in history." Unquote. When we ponder the destruction of college offices, the shrilling of "non-negotiable demands," the chanted obscenities and the evidence of drug use, it is easy to nod our heads in sad agreement.

And so the stereotype is hardened. "The new generation is decadent; they can't pick up the torch," we lament, as we repeat a cry that has rung down the ages.

We do have many self-centered young people today. Many *are* confused. Many are indeed parasites. But how many is many? Can we generalize, can we sustain that stereotype about 23 million young men and women in this complex country of ours?

What does the boy from a Scarsdale mansion have in common with the son of a jobless ghetto family? Does either of them share in any common outlooks with the lower-middle class workingman's son? Being young, they share in the desire for change, but not always the same kinds of change.

I think that in talking about America's young people we can use the old analogy of the iceberg, with nine-tenths of its mass invisible from the surface. The vast majority of American youth may not be totally content with our society—I hope they are not—but their desire for change does not lead to loud demonstrations, destruction or bizarre modes of living.

That's why they don't catch our eye. Conflict and noise get news coverage, make headlines and earn appearances on the nightly TV newscasts.

But the national meeting of the moderate, rational Association of Student Governments in Washington, D.C. went relatively unnoticed in the press, even though their leaders met with President Nixon. I did see an editorial on that convention in *The New York Times* and I warmly concur with its conclusion about the basic soundness of America's college students. It said, and I quote:

"The majority is neither revolutionary nor contemptuous of American institutions, on and off campus. Only a lunatic fringe has embraced nihilist chaos or hedonistic escapism." End of quote.

But is it merely wishful thinking to say that moderate, sensible students comprise the relatively invisible nine-tenths of our iceberg? Am I whistling in the dark because I don't want to believe what I have seen and read since my return from Europe?

No, my friends. We in this country have a passion for facts. We do research to find out what a problem really looks like. The major American opinion research firms have been hard at work interviewing college students and other young people all over America. Thorough studies have been made. And here is one of the principal conclusions: True revolutionaries and violence-prone youth on campus comprise no more than three to five percent. American youth remains basically reformist rather than revolutionary. After studying survey results, *Fortune* magazine commented that, "Eighty-eight percent of young adults agree . . . that there are legitimate channels for reform . . ."

Don't think for one moment that I am saying everything is just fine. We all know that it is not. Dissidence is growing and it is spreading beyond the campus. But is that really so surprising? Our society is not perfect. We have been patching and reworking and adapting it to change since 1791, when the first ten amendments to our Constitution took force.

In the mid-1960's the time was ripe for a big change. Societies adjust themselves in spurts and cycles to relieve stresses that build up gradually, like the sporadic movements of earth alongside a geological fault. By the mid-1960's virtually one generation had elapsed since the veterans of World War II, who had matured during the Depression, began building a prosperous economy in the shadow of the Cold War. Their big challenge was an economic one—to make a decent living, to provide security and comfort for their families. And they succeeded on a scale never before seen in the history of the world.

That is why many of their children are able to look for different challenges. Many of today's generation are free from single-minded concentration upon money and security, free to be idealistic, even free to be irresponsible without having to pay severe economic penalties.

During that same World War II-post-war era we created the greatest change of all. We let the Geni out of the bottle for all time: we brought about the technological revolution. Nuclear energy, electronic computers, automated factories, television, space exploration—Benefactors of mankind, all of them, yet each has its dark underside, its capacity for evil, for despoliation, for waste of human resources or insult to human sensibilities, if it is not properly used and controlled.

So a major problem concerning today's youth is not a "youth problem" after all. It is a problem for our entire nation, old and young alike. Technology has advanced so fast that our political structure, our educational system, our social forms have not been able to keep up. We see technicians emerging as leaders in business, in government, in education, because traditional sources of such leadership do not produce the specialized technical knowledge necessary to understand how this awesome new machinery functions.

Technology has revolutionized communications and transportation. For the first time in history news events can be seen while they are actually happening, at virtually any spot on the globe. Ideas, modes of dress and action travel literally with the speed of light into homes throughout the nation and around the world. Jet aircraft have brought any spot in the world within a day's travel. Our affluent young people consider foreign travel for recreation and education as a normal part of their experience. So technological change has brought people into one vast community, and young people sense this and react to it.

Then, we are faced with what is probably the greatest single cause of unease and dissent among the young. The tragic war in Viet Nam obsesses their thoughts. For many of them it has been part of the world ever since they emerged from childhood. The skepticism and bitterness about the war are shared by college and non-college students alike.

So the problem of youth, dissent, generation gap, call it what we will—is upon us.

A new generation has emerged in the midst of a revolution in technology and a cruel, controversial war. The result has been a churning among young Americans that makes parents sick with anxiety. Let us look quickly at the rash of symptoms we find so upsetting:

The violence, the protests, the dress, the drugs are symptoms of a basic dissatisfaction with American society and the individual's place in it. A sizeable majority of young people in college and out see a need to improve our basic institutions—our system of business and industry, our politics, our judicial system, our higher education.

And herein lies the outstanding characteristic of today's student dissent. It is the young person's *concern* over inequities and injustices in our society. Naturally, there is a good deal of self-seeking in the protest and dissent. But there is more than selfish complaining. Our young people *are* concerned about others and about society as a whole. It is one of the healthiest signs of our times.

And here again I would like to cite a statistic, because so many unfounded assumptions permeate discussion of youthful dissent. Dr. Gallup reports that 51 percent of college students have done social work. He goes on to make this interesting point, and I quote: "It wasn't so long ago that doing extracurricular social work while in college was considered in some quarters to be 'square.' Now it is frequently a normal and effective part of one's college experience." Unquote.

When concerned but affluent young people scold their elders because of injustices in our society, how can we look them in the eye and say, "Why are you so ungrateful when you have been given so much?"

Yes, as a nation we have developed and prospered, but we have left many things undone. We have strenuous work to do on problems of poverty, job opportunities, education, housing, the environment, and so many others. The young critics accuse our society of tolerating injustices because we have not eliminated them. No doubt there is some basis for the charge, but history shows that a society's basic problems can never be solved quickly and neatly, and that a fast-growing nation inevitably creates new problems as it evolves.

America has a long heritage of problem-solving. Just 100 years ago the nation was torn by a dissent so widespread and so bitter that those Reconstruction days were known as "The Age of Hate." Whites and Blacks rioted against one another. The Ku Klux Klan was born. The president was impeached. Yet the nation survived, knitted itself together and resumed its progress.

In our own time the United States survived the Depression, then went on to build unparalleled prosperity for most of her people. In World War II America and her Allies put down the effort to impose a new Age of Darkness on all of Western civilization.

Looking to the future, I see still another cause for optimism. It lies in the technological revolution which helped to foster so much of today's dissent. When our three astronauts landed on the moon, people throughout the world, from sheepherder to statesmen, were caught up in the emotional impact.

Communications satellites carry events around the world in a fraction of a second, linking peoples to watch together as a president is inaugurated or an Olympics champion is crowned. And that is but the beginning. In 1972, millions of villagers in India will see, on community TV sets, shows about planting and cultivating, pesticides and other valuable information. Those programs will be beamed from an orbiting satellite.

I admit to a strong parental interest in communications satellites. And as one who has represented our country abroad I am fascinated by the prospect of daily face-to-face diplomatic contacts via satellite TV and picture phone.

It is hard for most of us, reared in a simpler mechanical and electrical era, to contemplate the implications of today's unfolding technology. But the young people who grew up with the story of space exploration in their daily newspapers are attuned to accepting what has seemed impossible. And they are the people to whom the torch is being passed.

Their number includes agitators who want chaos for chaos' sake, but it includes far, far more of tomorrow's scientists and engineers, doctors and executives, professors and statesmen. Many of them will fight to bring change and reform to the professions they enter. Their concern, their new perspective and their advanced education are needed by America.

As always in the past, the emerging generation will be the source of renewal of America's heritage. *Our* generation still has much hard work to do on problems that trouble the young and sap our national strength.

We must extricate the United States from the war in Viet Nam, which, more than any other issue of the day, has caused dissention and grief in our nation.

We must put an end to the cruelty and sheer waste of discrimination.

We must find ways to restore the soundness of our dollar.

We must discover means for operating our complex industrial machine which are consistent with the preservation of a healthy, ecologically sound natural environment.

Our responsibility as business leaders, governmental leaders and professional men and women is to recognize that we are in an era of convulsive change, to recognize our own increasing obsolescence. We must be prepared to assign to the most capable members of this new generation a heavy burden or responsibility and leadership.

In closing, I think it is appropriate to emphasize to you in this mature audience, the same thoughts I have expressed to a class of graduating college seniors: Don't you lose faith in America! Our nation's people have a history of turning restlessness and dissatisfaction into progress. Overcoming obstacles lifts us to new levels of achievement.

SLOVENIAN FESTIVAL DAY

HON. FRANK ANNUNZIO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. ANNUNZIO. Mr. Speaker, on Saturday, October 25, 1969, thousands of Americans of Slovenian descent living in the city of Chicago will celebrate the 51st anniversary of their independence gained from the Austro-Hungarian Empire on October 29, 1918.

They will also be celebrating the 19th anniversary of consecutive broadcasting for Dr. Ludwig A. Leskovar, producer of the Slovenian radio program, which is heard each Saturday at 4:30 p.m., on WEDC in Chicago. Dr. Leskovar is president of the Slovenian-American Radio Club, which annually sponsors the Slovenian Day program. I want to congratulate him on the celebration of his 19th anniversary as producer of this outstanding radio program as well as for the tremendous contributions he has made to the civic life of his community over the years.

The other able officers of the Slovenian-American Radio Club are: Frank Mikec, vice president; Mary Foys Lauretig, secretary; Alma Helder, treasurer; Stephanie Osterman, recording secretary; Roman Possedi, Sr., sergeant at arms; Otmar Tasner, Michael Fleischhacker, and Minka Grasich, auditors; Frank A. Schonta, cultural narrator; Corinne Leskovar, director of special

events; Joseph Osterman, Fred Orehek, Anna Tasner, Frank Karner, Frances Maxwell, Anton Skamperle, Ludvik Jelenc, Jerome Soukal, Ursula Krzisnik, and Frank Gerzel, directors. The offices of the Slovenian-American Radio Club are located at 2032 West Cermak Road in the Seventh Congressional District of Illinois which I have the honor to represent.

Hon. Richard J. Daley, mayor of the city of Chicago, has declared October 25 as "Slovenian Day" in Chicago and has urged all citizens to join in observance of the day and to take part in the festivities planned for the celebration. Additionally, Gov. Richard B. Ogilvie has proclaimed October 25 as "Slovenian Day" in Illinois.

The festivities will begin with a dinner at 7 p.m. at the St. Stephen Hall, 1835 22d Place, Chicago, Ill. More than 1,200 people are expected to attend the dinner at which the winner of the 1969 Slovenian Award will be announced. This award has been given annually for the last 17 years to an outstanding Slovenian-American for his work and his achievements in the community. Last year's winner of this award was Mr. Anton Udovich, 2623 South Springfield Avenue, Chicago, Ill.

The festival will include a performance by Korotan, a 50-voice mixed chorus from Cleveland, which will present folksongs and classical songs in the Slovenian language, and the orchestra of Hanez Arko which will play dance music.

Master of ceremonies for the program will be Dr. Ludwig Leskovar, and among the distinguished guests will be Congressman ROMAN C. PUCINSKI of the 11th District of Illinois, and Alderman Vito Marzullo, of the 25th ward, who will be representing the city council of Chicago.

The gubernatorial and mayoral proclamations will be presented to the audience by Miss Rosemarie Gomilar who will reign as "Gospodichna" or "Miss Slovenian Day." Miss Gomilar was born 18 years ago on the evening of the first Chicago Slovenian Day celebration when her father, Joseph Gomilar, was an officer of the Slovenian-American Radio Club which each year serves as the sponsor of the Slovenian Day celebration. Miss Gomilar is a senior at the West Chicago High School.

The Slovenian Americans, over 400,000 strong in the United States, have much of which they can be proud. Through hard work, dedication, and loyalty, they have achieved high and honored positions in public life. Among such outstanding individuals are Congressman JOHN A. BLATNIK of Minnesota, and Ludwig J. Andolsek, Commissioner of the U.S. Civil Service Commission.

Not only as public servants, but as artisans and artists, as laborers and tradesmen, as men of letters and of science, and in many other occupations and professions, the Slovenian-Americans have made an outstanding contribution to the cultural advancement of our great country.

Slovenia forms one of the six South-Slavic groups, known as People's Republics, which make up today's Yugoslavia, and has a territory at present of about 8,000 miles and a population of about 1,500,000. Throughout their history, which goes back more than 1,000 years, the courageous Slovenians have always been indomitable fighters for freedom and for their national traditions. Therefore, they have never been totally submerged in the sea of other peoples which surrounds their country.

Their spiritual and intellectual attainments have been second to none in that part of the world. As an example, the Slovenians succeeded in printing the first book in the year 1550 in the Slovenian language which was also the first printed book in any Slavic language.

The first Slovenian immigrants came to the United States as early as 1750. Among the immigrants who came here was Bishop Frederic Baraga, a great missionary figure in the history of America. He was born in Slovenia in 1797 and came to the United States in 1830 to devote his life to the Indians of the Upper Great Lakes. He is called the Apostle of the Lakelands and for 37 years served the Indians in that territory. He died in 1868 and was buried in Marquette, Mich. Father Baraga's contributions to the people were so exceptional that today a canonical investigation is being made into his life and labors in order to promote his beatification.

As Congressman for the Seventh Congressional District of Illinois, where hundreds of Slovenian-Americans reside, I take great pleasure in congratulating and extending best wishes to the Americans of Slovenian heritage who reside in my district as well as to all those across our Nation who are joining in this celebration of Slovenian Festival Day.

Hon. Vito Marzullo, the alderman, and committeeman of the 25th ward, which is part of the Seventh District and where many, many Slovenians reside, joins me in extending his greetings to the Slovenian people on this happy occasion.

Mr. Speaker, at this point in the CONGRESSIONAL RECORD I would like to include the text of the mayor's proclamation, which follows:

PROCLAMATION

Whereas, thousands of Americans of Slovenian descent living in this City for generations, have contributed much to the progress and development of Chicago; and

Whereas, Slovenians of Chicago have taken an active part in the growth of our American culture, contributing notably in the field of music, as exemplified so well by the production of the Slovenian Radio Program, under the direction of Doctor Ludwig A. Leskovar, which is celebrating its nineteenth consecutive year of broadcasting; and

Whereas, Slovenians throughout the world are celebrating the 51st Anniversary of their independence gained from the Austro-Hungarian Empire on October 29, 1918:

Now, therefore, I, Richard J. Daley, Mayor of the City of Chicago, do hereby declare Saturday, October 25, 1969 as "Slovenian Day in Chicago" and urge all citizens to join in observance of the day and to take part in the programs to be presented by the Slovenian Radio Program of Chicago.

Dated this twelfth day of September, A.D., 1969.

RICHARD J. DALEY,
Mayor.

WEIZMANN INSTITUTE OF SCIENCE HONORED AT INTERNATIONAL TRIBUTE DINNER IN CHICAGO

HON. ROMAN C. PUCINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. PUCINSKI. Mr. Speaker, last weekend marked a most memorable occasion for the citizens of Chicago as the city paid tribute to the Weizmann Institute of Science at Rehovot, Israel.

The Weizmann Institute of Science is one of the truly great research institutions in the world and is attracting ever-increasing respect and attention for the great strides it is making in scientific pursuits.

In a most inspiring dinner held at the Conrad Hilton Hotel, a series of speakers paid tribute to the institute and also to the late Senator Everett Dirksen, who had been a strong supporter of the institute and in whose honor a chair is dedicated for continued research in cancer.

I should like to place in the RECORD today some of the inspiring remarks delivered at the dinner.

We were all thrilled to hear Dr. Albert B. Sabin, president-elect of the Weizmann Institute of Science, relate his views on the impressive responsibilities which he will soon assume.

We were also moved by the stirring invocation by Rabbi Benzion C. Kaganoff of the Congregation Ezras Israel.

The Israeli Consul General, Shaul Ramati, placed the entire evening into proper perspective.

We were inspired by the remarks of former Supreme Court Justice Arthur Goldberg who related some of his experiences with Senator Dirksen.

And, finally, Mr. Speaker, the excellent presentation to Mrs. Everett McKinley Dirksen delivered by former Ambassador Phil Klutznick, who captured the import of the Weizmann Institute of Science.

Chicago's favorite columnist, Irv Kupcinet, did an outstanding job as master of ceremonies, and I believe the highest gratitude goes to Lester Crown, general chairman of the evening, and Dr. William Novick, who was executive director of the banquet and who does such an inspiring job as director of the Chicago Committee for the Weizmann Institute of Science. We were most grateful to Mr. Philip D. Sang, one of the principal supporters of the Weizmann Institute for his generous contribution to the success of the evening.

Mr. Speaker, the remarks of these distinguished speakers in the order in which they were presented, follow:

INVOCATION AT SENATOR DIRKSEN MEMORIAL TRIBUTE DINNER OF THE WEIZMANN INSTITUTE OF SCIENCE, CONRAD HILTON HOTEL, OCTOBER 12, 1969

(By Rabbi Benzion C. Kaganoff, Congregation Ezras Israel, Chicago)

Almighty God—We invoke Thy blessings upon all assembled here tonight in behalf of the Weizmann Institute of Science in Israel, an Institution dedicated to learning, to re-

search, and to reverence for life, to honor the memory of a distinguished son of Illinois—the late Senator Everett McKinley Dirksen.

We honor his memory by re-affirming those principles of God and country and the highest values of humanity to which our city, our state, and our nation are committed.

"For what makes a state and its people great and strong?
Not architecture's graceful strength
Not factories' extended length
But men who will tolerate no wrong
And give their lives to make it right
To turn all darkness into light.

"What makes a State that man can love?
Not things charm the outward sense—
Not mere display of opulence;
But Right that no wrong can remove—
And Faith that no power on earth will turn—
And Truth and God and Honor for which men will yearn.

"This is the State that shall forever stand
As a light upon a nation's hill
A voice that evil cannot still
A source of blessing to the land.
Its strength—not brick, nor stone, nor wood
But Justice, Love, and Brotherhood."

May all of us witness the fulfillment of the vision of Thy ancient prophets:—"Nation shall not lift up sword against Nation—neither shall they learn War anymore, and the glory of the Lord shall be revealed, and all men shall see it together". Amen.

REMARKS OF THE HONORABLE SHAUL RAMATI, CONSUL GENERAL OF ISRAEL

Mr. Chairman, Mrs. Dirksen, Distinguished Guests: We are gathered here to honour the memory of Senator Everett McKinley Dirksen who stood for the old fashioned values that made this country great. Fortunately for this country and for mankind the mass of the people of this country still hold these values dear. This is the unbreakable bond between the United States of America and Israel, which cherishes them equally. These silent Americans, the unpublicized Americans, God fearing, untouched by big city vices. They who fearlessly and wholeheartedly support liberty for the individual a just society, the rule of law, the democratic system, equality of opportunity. No nation, race or class is their enemy. Their foes are tyranny, oppression, disease and poverty, ignorance and prejudice. They are moderate, honest, hardworking, observe the Ten Commandments, they are self reliant, still pioneers at heart, proud of their heritage, devoted to peace and progress. If the image of the United States in the World is very different to this, it is because these normal Americans are so unnewsworthy as far as the mass media and major newspapers are concerned. But Senator Dirksen, who embodied these qualities, because of his leadership, personality and eloquence, was always newsworthy and it was natural for him to support a land and people from which many of these ideals had sprung, which was doing its level best to live by them today in a region in which these ideals were rejected and spurned, which even whilst under bloody siege was beginning once against to make a unique contribution to the betterment of mankind.

No wonder that the mainstream of American opinion for which Dirksen often spoke supported the righting of a historic wrong in 1948; rejected a discredited opportunistic policy which had permitted the Soviet Union to establish bridgeheads in the Middle East after their clients were defeated in 1956. No wonder that he favoured the new policies, of which Ambassador Arthur Goldberg was such an important architect to maintain the 1967 cease fire situation until it could be superceded by a true and lasting peace. Senator Dirksen assured them the bipartisan support required for the effective continuity. He was convinced that American interest demanded denial of success to Soviet Imperialism, to tyrannical military dictatorships, to those whose minds were set on mass murder and the denial of those same rights of self-determination, independence and freedom to others which they claimed for themselves. In 1967 Israel had shown that it could defend not only itself but also the interests of all who love freedom in the Middle East. By their own unaided efforts against great odds they had saved the President of the United States and its Congress from having to make an almost impossibly difficult decision. No wonder that the Senator felt that Israel should receive the military aid and economic and diplomatic support, to assure its defence, to prevent war, and give the attainment of peace a chance, as well as to prevent a situation arising where the U.S. Government might be faced with the necessity of making the same agonising decision they had only so recently been enabled so narrowly to avoid.

Yet Dirksen realised Israel had much more to offer to the world than a demonstration of the power of free men defending their lives and liberty. He watched Israel's cooperation with the developing nations of Africa, Asia and Latin America, the alternative this offered to the panaceas promised by the Soviets and the Chinese. He watched their experimentation in making the desert bloom, of desalting sea water, frontiers that had to be conquered and conquered quickly if the calamity of mass starvation was not to engulf the world. He saw the efforts to harness solar energy to man's service, to find social forms and cultural expressions acceptable to men who brought with them the ways of life of the 100 lands from which they had come to Israel. Could it be that another great boon could come to mankind from Israel, the cure of cancer? And so, before he was himself struck down by this dread disease he singled out the Weizmann Institute and its Cancer Research for his particular project. Here the bi-annual Rehovoth Conferences of political leaders and scientists of how to make science serve rapid progress in the developing countries are held. Here promising scientists from the world over are brought to study and return to their countries with the keys to their progress. Here the use of isotopes is studied in medicine, in agriculture, and in the exploitation of ground water. Here advances were being made towards the discovery of the secrets of life and its enemies such as old age and cancer. He could not have chosen anything more worth while to support in Israel for the Weizmann Institute is serving all mankind. And neither could you ladies and gentlemen assembled here. And for this I congratulate you and I thank you.

SPEECH OF THE HONORABLE ARTHUR J. GOLDBERG

Mr. Crown, Mr. Kupcinet, Your Excellency the Counsel General, Mrs. Dirksen and Rabbis and guests, ladies and gentlemen:

I should like to address my first comments to Mrs. Dirksen. Luella, when we planned this affair and I was invited to come, your husband was very much alive. And we looked forward to this occasion as a fine celebration where old friends would get together and share the pleasure of his and your company in a cause to which he was dedicated and to which this very fine audience of friends of yours and his would gather together to really thank him for all that he has done as the Chairman has said in the Congress for this State which means so much to the Jewish people and to all freedom-loving people.

Now he is not with us. It is very hard to believe that he is not with us. You and I were talking before as we gathered at a dinner just a few weeks ago where Dorothy and I and you and Everett were at the German Embassy in Washington at a festive occasion and we visited together. Now, it would not be in keeping with Everett Dirksen's spirit for us to make a memorial out of this occasion. You and I agreed about that earlier this evening. If there ever was a happy warrior, it was Everett Dirksen. If there ever was a man who loved life, it was Everett Dirksen and we shall not make a memorial out of this affair. Rather it will be an occasion for happy reminiscence about this wonderful man, great friend, outstanding American, great friend of Israel so that you can carry with you a feeling of how high our regard was for him and maybe that is the best thing any of us can leave to our families when the inevitable happens to all of us.

I would like to share with this audience a few reminiscences about Everett Dirksen. I knew him for quite a long time as some of you know and I was the beneficiary very much of great acts of friendship on his part—acts of friendship which were very characteristic about the man. I would like to relate a few of them and then I'd like to point up the unique role that he has played in our body politic.

When President Kennedy asked me to assume the office of Secretary of Labor, the first thing that you are supposed to do is to make sure that Congress will confirm your appointment and therefore what you do is you immediately get in touch with the important people in the Congress. That is what you are supposed to do by the Congressional advisors of the President. I was a new Secretary of Labor. I was about to do it but I did not have time to do it, because the very first telephone call I received after my appointment was announced on the Georgetown steps in September of 1960, was from Senator Dirksen who called me, congratulated me and said, "Would it be convenient for you to come to my office to have lunch with me tomorrow." And, of course, when the high-ranking Senator says would it be convenient it's like a command performance for a queen or president. You say, certainly. By the way my Democratic friend had not yet called, although I had campaigned for him very vigorously as Jack Arvey knows.

I came to the Senator's office and found to my surprise there was gathered together in his office all of the Republican members of the Senate-Labor Committee, of which Senator Dirksen was the ranking member. We had a very convivial lunch with all that helps make a lunch convivial. You would expect that in Everett's office. We had no speeches. We just sat there with all of the Senator Republican colleagues and at the very end just as we were about to break up, as though it was an afterthought, Senator Dirksen got up and said, "Well, gentlemen, I just forgot something." He said, "Arthur Goldberg has been my friend for twenty-five years." Then he looked around and said, "Need I say more."

Then the lunch was adjourned.

The second bit of reminiscence I would like to point out is on that occasion when my nomination was reported out as on the Senate-Judiciary Committee unanimously, an art which seems to have been lost these days. I found the normal course under those circumstances, since it was submitted by a Democratic President, is for the Chairman of the committee, or the Chairman of the subcommittee, who is our friend at that time, Estes Kefauver, to report out the nomination to the Senate. But, without any consultation with me but to my great pleasure and gratification, my nomination was reported to the Senate by Senator Dirksen which may have had something to do with my nomination by the Senate, also confirmed unanimously.

And then there is a third reminiscence. My wife and I, like many in this audience, give an annual Seder. And I remember,

Luella, you remember too, when Dorothy and I had a Seder and we invited our two Senators—Senator Dirksen and Senator Douglas among other friends. It is our custom to sing songs which is the tradition of conducting a Seder to sing songs. All kinds of songs at the Seder, not only the traditional liturgy, but anything that anyone wants to sing. Well, having represented the labor movement for a long time, among the songs that we traditionally sing at our Seder are songs that come out of the labor movement from the songbook that is published by the AFL–CIO. I wondered about how that would do with Everett, who at that time was having a few problems with the AFL–CIO. So we went out and bought another songbook and at that particular Seder we alternated songs—from the NAM songbook and from the AFL–CIO songbook. And we had, as you will recall, Luella, a very fine time indeed.

Now, Senator Dirksen embodied something very important in American life. He was not only a very congenial man, with no malice in his system toward anyone. He had great friends like myself who differed with him on many issues, but he was also a man who understood the important role and limitations of the opposition in American political life.

Now, it is extremely important that the role of an opposition and the limitations of an opposition both be preserved if we are to have a healthy democratic country. And sometimes people forget this.

I am a great believer in an opposition. Of course, I like to be in the majority party but I am a great believer that it is extremely healthy for a country and for the administration in power to have a strong vigorous, articulate and determined opposition. Everett Dirksen played that role in two administrations—Democratic administration that I had to do with, and it was a very important role indeed because the party in power is not always right. And a party in power needs to be reminded that in our country, happily a country that is a two-party system, that in the opposition there is a repository of knowledge and understanding and suggestions and ideas which the majority party and the administration power may sometimes be deficient in. And, therefore, if we watch the show on television, and it often was a great show indeed—Kup, I think you will agree, the Senator's show—you had a man who understood that whatever his personal relations were with the Presidents, he had a role to play in representing the opposition viewpoint.

The Senator also knew what the limitations were on opposition and there is one paramount rule about what the essential limitation is and that is that the country comes before political parties.

And I would carry that even further, and am afraid to do this in front of Colonel Arvey's presence, but the country comes before political parties, the state comes before political parties, the city comes before political parties. We are Americans first. That's our first loyalty. A loyalty to a political party comes second, and Everett Dirksen understood that. I knew that when I was Secretary of Labor and U.S. Ambassador to the United Nations I could always come to Everett Dirksen and tell him frankly what the problems of the country were, and I knew that he would either agree or disagree and his agreement or disagreement would be fundamentally based ultimately on what he conceived to be the best interest of the country as a whole. I might not agree, as I said I often did not, but I never had any doubt that that was the basis upon which he made his decision as to the role that he ought to occupy.

I can tell you very frankly that the two Democratic Presidents under whom I served had the greatest amount of affection for him and sometimes I wonder whether he didn't feel that he could play a better role under the two Democratic Presidents than under a Republican President. But perhaps a new Republican President had to get the full measure of what type of man Everett Dirksen was.

Now, he's being honored in a very great cause—a cause of a great scientific educational institution in Israel. Israel could not be the country that it is if high in the list of priorities there was not the fact that it had to develop great institutions of education and knowledge and research—great universities and a great scientific institute named after the beloved Chaim Weizmann.

Last year my wife and I had the great honor of going to Israel for the 50th Anniversary of Hebrew University, and I thought back as I stood on Mt. Scopus that that University was established at the time the guns were still firing in World War I. And when the concept that there could be a Jewish State seemed like a concept utterly lacking in reality, those who were working towards the establishment started this to be the supreme act of realism; that they should, even though poor, impoverished and lacking in support, create a great university. And it is quite interesting that here before the establishment of the Jewish State, 25 years ago, it was conceived in Rehovoth that there ought to be a great scientific institute to contribute not solely, or indeed even primarily, to the problems of Israel but that Israel could be the type of country that had an institution devoted to scientific research which could benefit all of mankind. And this is what the Weizmann Institute has done and now I think the embodiment of that supreme realism is the fact that one of our great Americans, a great scientist of world-renowned who has contributed so much to the alleviation of disease for all people everywhere has assumed the Presidency of the Weizmann Institute in Dr. Sabin.

Israel has great problems. This is not the occasion to talk about them. It has the problem of survival—a problem which every nation must put first in all of its priorities. But I am sure were the Prime Minister of Israel here today, she would strongly second what I say to you—that all of the priorities of this country have to be met. There is no single priority which cannot be met. All of them have to be met if this country is to be the type of country that it must be and stand as a symbol of a democratic country dedicated to all of the great ideals and above all the great ideal that if there is to be peace it will be founded on the quality of its society.

I am personally very pleased, Luella, that Everett's name will be linked with this very distinguished and fine institution. I know that you would want it so and those of us who were his friends and are your friends want it so, too.

Thank you very much.

REMARKS OF DR. ALBERT B. SABIN, PRESIDENT-ELECT OF THE WEIZMANN INSTITUTE OF SCIENCE

I look forward to my new job as President of the Weizmann Institute because I see in it an opportunity to participate in the fulfillment of Weizmann's original goals to serve Israel, to serve science, and to serve humanity.

Weizmann's vision included not only a return of Jews to their ancestral home after 19 centuries of frequently tragic exile but also the creation in the reborn nation of a culture and scientific tradition that hopefully would achieve something more than the fulfillment of its own needs. In biblical times the tiny land of Israel with its teachers and prophets contributed cultural and religious concepts that had an influence far beyond its borders on the people who embraced Christianity and Islam. In modern times science is the force that has the greatest potential for influencing the shape of things to come. The great economic progress of the past in the U.S.A. and other economically advanced countries was based to a large extent on the exploitation of natural resources. Economic progress in the future must depend more and more on science as the most important resource. Good science should be supported by all wherever this important resource needs help—and the Weizmann Institute is general acknowledged by those who are competent to judge as a unique and outstanding scientific resource not only of Israel but of the world.

The Weizmann Institute, like all other great achievements in Israel, was built on faith—the faith that the men who came to work there would bring it the eminence it has achieved—and the faith that the tens of millions of dollars that had to be borrowed to make it the excellent scientific resource it has come to be would ultimately be provided not only by the Jews of the world but also by others who will benefit from the new knowledge that the Weizmann Institute has already created and will continue to create. The Weizmann Institute is in great need not only of support for its regular operating expenses, which are already in excess of 10 million dollars per annum, but also for the repayment of the 30 million dollar debt on which interest is now being paid annually. I have faith that the dedicated friends of the Weizmann Institute throughout the world will be even more generous in the future than they have been in the past.

During my stay in Rehovot last July, bomb shelters were being built on the campus of the Weizmann Institute. To me this was symbolic of Israel—work for the best without neglecting to prepare for the worst. If Israel is now living in a precarious balance of terror so is the rest of the world. Israel is in the process of creating the most heroic era in the history of the Jews, and as a Jew I shall derive a very deep gratification from the opportunity that I shall now have to play some small direct part in it. Israel is also a pilot plant for the hundreds of millions of people living in ever greater poverty and misery in the economically undeveloped countries of the world, and as a human being I also look forward to being a part of that important enterprise. And I hope that I shall live to see the day when the leaders of the Arab governments will accept a sovereign state of Israel in their midst and let their people work together with the people of Israel for the benefit of all who inhabit this historic region of the world.

PRESENTATION TO MRS. EVERETT MCKINLEY DIRKSEN

It was my first thought to use these moments to relate a few personal incidents. I would like to tell you when I first met the Congressman in Washington in 1941 shortly after I had arrived for sixty days' government service. The sixty days matured to nearly six years. Throughout I received at Congressman Dirksen's hands understanding and aid, which I sorely needed, especially since he was a member of the Sub-committee on Appropriations which concerned itself with my agency's budget.

Or, I could dwell on a critical moment in 1962 when following excruciating toil in the United Nations to save it financially and the outlook in the Senate was dreary, I appealed Senator Dirksen, as a heartsick and discouraged constituent rather than a public official. One should read and reread his eloquent speech endorsing the United Nations bond issue delivered on the floor of the Senate, which alone won the day and made a year's work a pleasant page in my own personal history.

Or, I could refer to moments only last fall when behind the scenes, his persistence as-

sured General Moshe Dayan's meeting with President-Elect Nixon. When I conveyed the General's appreciation to the Senator, he told me that all he would like to have happen is to be able to visit the General in Jerusalem soon—a hope which he never realized.

Or, I could fill several times my quota of minutes in documenting the incidents when he ignored all and sundry political considerations to come to the support of Israel as well as many causes in which our people had vital interests here and abroad. But this record needs no summary at my hands. If it were not so, we would not be gathered here tonight.

How good it would be if what has been said and what I am about to say could have been spoken in the presence of that unusual, personable and powerful leader of our day, the late Senator Everett McKinley Dirksen. But, in true Jewish tradition, we are not here to mourn a loss we are here to give thanks to the Almighty for the years that He gave us with our friend, counselor and leader. It is in this spirit I would make this presentation.

Tonight we entwine two names of history—Chaim Weizmann and Everett McKinley Dirksen. The scientist who traveled from obscurity in the little stetl of Motel in Russia to join the political struggle of Zionism and then as representative of a political minority to emerge as the first President of Israel—thereby helping to unite a small and struggling nation. And the man from another small town who traveled from the obscurity of Pekin, Illinois to the Congress and to the Senate in Washington, D.C. where he emerged in critical days as the Senate minority leader to help unite the varied peoples of this most powerful nation in the world.

One was first a deeply committed Jew with an overwhelming love for science, a devotion which he sublimated to enter the brawling, contentious and, at times, bitter struggle with and among his fellow Jews and the world at large seeking an age old dream—a national Jewish homeland.

The other, by his own admission a country boy, with love of drama and of words, who forsook the comfort of his environment for the brawling, contentious and sometimes bitter struggles of political life in our embattled nation.

I knew both men in their lesser as well as greater moments. Above all, they had one trait in common—they put love of nation and ideals above their own personal feelings. There was a dignity and a majesty as each rose time and again above narrow partisanship to superb patriotism. Smaller minds challenged each in turn because they changed their positions on occasions, but history will acknowledge that what they did was in the interest of a greater good. Only narrow, self-centered and fearful men stand pat irrespective of the changes about them. Big and courageous men can forget their own portraits long enough to place the nation and the people they serve above self.

When we recall the compatability of a Republican minority leader with Democratic as well as Republican Presidents; when we recall the numerous times when a Republican minority leader made possible a Democratic administration program, it should be with the reverence accorded a stalwart and honorable opponent who forgot partisan advantage in the interest of the nation's hopes and its needs.

Oh, how much this reminds me of Chaim Weizmann's moment of trial at the birth of a State, an idea to which he had given his life and his health only to see his political opponent of many years take over the helm. It must have been with unbelievable anguish that he pondered the offer of the ceremonial office of the Presidency that would effectively sideline Weizmann in the declining years of his life. At that poignant moment when Weizmann accepted, David Ben-Gurion uttered a sentiment that was in the hearts of most Israelis and Jews all over the world:

"I doubt whether the Presidency is necessary to Dr. Weizmann, but the Presidency of Dr. Weizmann is a moral necessity for the State of Israel."

Mrs. Dirksen, as we present to you this evidence of the action taken to eternally enshrine the name of your late husband in the Institute that bears a hallowed name in Israel, we are conscious of a sobering parallel. We doubt that the minority leadership was necessary to Everett McKinley Dirksen, but it was a vital necessity to keep a sense of balance and sanity in the midst of divisive, shrill and bitter challenges and partisanship in our beloved nation. No one can equate our loss with yours—but we, Democrats and Republicans, Americans all, will miss his quieting and eloquent optimism and his unique and unforgettable capacity to rise above personal and partisan consideration to help "heal the wounds of a nation" and to bring it closer to its true destiny.

How appropriate to our recollection of him are the words of Lord Byron: "Immortal, though no more; though fallen, great!"

NATIONAL BUSINESS WOMEN'S WEEK

HON. L. H. FOUNTAIN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. FOUNTAIN. Mr. Speaker, since women gained the right to vote, the National Federation of Business and Professional Women's Clubs has worked steadily to expand the role of women in all segments of our national life. It is with particular pride and pleasure that I salute this fine group as the Nation once again celebrates National Business Women's Week.

This annual observance gives all of us an opportunity to salute anew the millions of women in our national labor force and calls attention to the increasingly important role being played by women in all fields of endeavor today. Due to the increase in life span, decrease in time required for home and child care, economic independence, women now have the time and desire to use their abilities and capacities to their maximum potential. And our Nation needs women to be involved in all segments of our national life.

Only when we recognize that women comprise a third of today's labor force and that most of the increase has occurred since World War II, can we realize the tremendous advances women have made in every segment of our society. The doors to every profession have been opened to women in recent years, largely through their own determined efforts. Today, women doctors, lawyers, scientists, and business executives are making lasting contributions in their respective fields. At the same time, organizations such as the National Federation of Business and Professional Women's Clubs—B. & P.W.—still perform yeoman service in their endeavors to elevate the status of all women.

The Federation itself has an impressive membership of more than 180,000 than 3,800 chapters are promoting the district in the United States. Its more than 3,800 chapters are promoting the interests of business and professional women who have organized to extend opportunities to an even greater number of women at every level. Through its scholarships and awards, it gives many young women the opportunity to fulfill their ambitions in the business and professional community. The spirit of cooperation and understanding which the B. & P.W. has advanced among working women is illustrative of what can be accomplished by a determined organization with a worthwhile purpose.

The Federation has an outstanding national program calling for action beneficial to our entire Nation. Its interest extends to all areas of national concern, including air and water pollution control, conserving human and natural resources, improving safety conditions on our highways, and seeking ways to promote national security and peace. Exciting national aims are strengthened by local activities. To the individual, the organization offers encouragement to seek new channels of expression, needed information and sincere fellowship.

More and more, we are being made aware of the important contributions made to our Federal, State, and local governments, to our Nation's economy, to our own local communities and to the private business world by the American woman. She is meeting our Nation's manpower shortages and offering a new dignity to the affairs of this country by her inspiring presence, her dependability, and her many worthwhile contributions and activities.

The aims and ideals of career women everywhere, including such areas as equal employment opportunity, uniform taxation, and retirement laws, and equitable jury representation, are in perfect harmony with the precepts and traditions of our American democratic society. I am proud to acknowledge the endeavors of these courageous women especially in my own congressional district and throughout North Carolina as we celebrate National Business Women's Week and urge all concerned citizens from every strata of our society to give support and recognition to their worthwhile cause.

POSSIBLE FLAW IN H.R. 14195

HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. BINGHAM. Mr. Speaker, I have been impressed with the statements made by my colleague from New York (Mr. RYAN) calling attention to a possible flaw in H.R. 14195 with regard to the institution of a contest by one who has been wrongfully kept off the ballot in a State where there is no write-in procedure under State law.

This potential flaw could undoubtedly have been taken care of readily by an amendment to the bill, but no such amendment could be presented under

the suspension of the rules procedure in effect here.

It seems to me that such a significant and complex bill as this one should be brought up under a rule, so that perfecting amendments can be proposed and considered.

Accordingly, I voted "no" on the motion to suspend the rules and pass the bill.

CHANGE WITHIN THE UNCHANGING

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. TEAGUE of Texas. Mr. Speaker, my good friend Mr. Tim Paulsell of Fort Worth, Tex., is a member of the board of trustees of Baylor University, Waco, Tex. During their recent session which incidentally was the 125th annual session of the board of trustees, Abner V. McCall, president of Baylor made an address which I believe to be one of the finest of the times. Under leave to extend my remarks in the RECORD, I include President McCall's address:

CHANGE WITHIN THE UNCHANGING

(Address by Baylor University President Abner V. McCall)

CHANGE WITHIN THE UNCHANGING

We are beginning the 125th year of the life of Baylor University. It is the custom of all men to resort to ceremony to emphasize the importance of certain occasions. We put on different apparel, gather together, solemnly march about, and make speeches on such occasions. Thus, at christenings, weddings, inititaions, inaugurations, coronations, commencements, and other such important events, we put on special robes, gather, march, and speak in order to say to our fellows, "Stop and take note. This is an extraordinary and significant occasion." For this reason we have marched hither in these hot black robes and colorful hoods. So pause and take note at this the beginning of the 125th year of the life of Baylor University.

In this part of the world, Baylor is comparatively old; and some say that she is old fashioned. Indeed, the basic principles for which this University stands are old. They were proclaimed clearly about 2,000 years ago but indeed are far older than 2,000 years. We believe they are eternal. We believe that they are eternal truths which existed from the beginning and are related to the eternal Creator who is the same yesterday, today, and tomorrow. This aspect of Baylor University is unchanging and is the chief reason that this University was established, has operated for 125 years, and will continue to operate tomorrow.

WE BELIEVE IN A PERSONAL GOD

We believe in an infinite, eternal, omnipotent, omniscient God as revealed in His son Jesus Christ through Whom we are offered salvation. We believe in a personal God who created man uniquely in His own image, Who has an inalienable and infinite compassion for every man, and in Whose sight man is of inestimable value. We may study the history, sociology, economics, languages, art, anatomy, and psychology of man, but man is worth studying only because he is specially related to God. We believe that God has a purpose and a will for man and that this purpose and will is embodied in the Great Commandment to worship God with all thy heart, soul, and mind, and to love thy neighbor as thyself. We believe it is the divine will that man do justly, love mercy, and walk humbly with God. We believe there is a divine stamp on personal integrity, morality, and responsibility, upon respect, compassion, and concern for all fellowmen, upon justice, courage and freedom. We recognize that there must be a constant search for proper and effective implementation of these with differences of opinion thereon, but we regard the principles as immutable.

ETERNAL UNCHANGING TRUTHS

We know that there are many in the world who do not believe in our God, in His special concern for man, in man's unique nature, or in God's purpose and will for man. We know that many in our time have doubts as to these principles; and while all these matters may properly be discussed at this University, this University was established and still operates on the basis that these are not open questions but are eternal and unchanging truths, and the policies of the University shall not vary therefrom nor the University cease proclaiming them.

There are many who claim that there are no eternal unchanging truths, that such truths are relative and changing with the time, place, and people; and that all questions remain forever open, and the search for truth on every point is endless. They claim that the primary purpose of the university is to seek forever for the truth and that no restrictions or obstacles should ever be placed on this search.

There are over 2,000 accredited colleges and universities in the United States. There are junior colleges, four-year liberal arts colleges, and large complex universities. Some are public and tax-supported, and others are private and independent. Some of the latter are secular, and others are church-related. They differ vastly in philosophy and program. This pluralism is in accord with our traditional freedom in every area of American life. In the field of higher education, the student has a wide and varied field from which to select a school compatible with his personal philosophy and need. In the exercise of their freedom, Texas Baptists have established and operate Baylor University as a private, independent denominational university with policies and programs whch reflect their religious tenets. They invite those in fundamental agreement to come to teach and to learn. Those not in fundamental agreement should exercise their freedom by selecting one of the other 2,000 colleges or universities in accord with their philosophy and need.

PERSONAL FREEDOM, INTEGRITY, AND DIGNITY

In the Christian religion, certain fundamental truths are regarded as absolute, and these absolutes place restrictions on the search for truth in other areas. Our recognition of the inalienable right of man to personal freedom, integrity, and dignity places limits upon the search for truth in all areas. The medical researcher in his search for truth is not permitted to experiment upon human beings. We denounced the Nazis for doing so. The police official in seeking the truth concerning a violation of the law is not perimtted to use physical or psychological coercion to compel the accused to speak against himself. The right of man to be let alone in his own home and in his family and associations without unreasonable intrusions and invasions is, in our culture, accorded a greater value than the search for truth. This University subscribes to unchanging Christian values that are superior to the unrestricted search for truth.

Those who disagree often quote our Lord, "Ye shall know the truth, and the truth shall make you free." This is a quotation lifted out of context; and as in most cases, when removed from its context, has a much different meaning. The full text is found in the Gospel of John, Chapter 8, Verses 31–36:

"Then said Jesus to those Jews which believed on him, 'If ye continue in my word, then ye are my disciples indeed;

" 'And ye shall know the truth, and the truth shall make you free.'

"Then answered him, 'We be Abraham's seed, and were never in bondage to any man: how sayest thou, 'Ye shall be made free'?'

"Jesus answered them, 'Verily, verily, I say unto you, Whosoever committeth sin is the servant of sin.

" 'And the servant abideth not in the house for ever; but the Son abideth ever. If the Son therefore shall make you free, ye shall be free indeed.' "

Our Lord on this occasion was not talking of scientific truth, secular truth of and about the world, but eternal spiritual truth which frees men from the slavery and burden of sin. Certainly knowledge of scientific or secular truth may free man from the burdens of ignorance and superstition and give him power over nature and natural forces which may give him freedom from certain physical suffering and want. But the history of mankind contains no proof that scientific or secular knowledge alone makes men spiritually or politically free or makes them appreciate freedom. The fine scientific education afforded in the universities in Nazi Germany and Communist Russia equaled that found anywhere, but certainly did not bring freedom to the citizens of those countries. Truth in the sense of knowledge of facts does not alone make men just, merciful, or compassionate. It does not make them follow in the word of Jesus.

REAL FREEDOM

This University is founded on the belief that only the truth proclaimed by our Lord gives real freedom and that this truth is unchanging. An educational program that emphasizes this truth we believe is ever modern and ever relevant to the life of the student in the university and outside the university in the future.

It has been often said, however, that change is the chief characteristic of this age and that the rate of change is ever accelerating. A character in the Negro spiritual musical *Green Pastures* reported to the Lord, "Everything which is nailed down on earth is coming loose." We are experiencing an explosion of scientific knowledge. As much has been learned about the physical world since World War II as was learned in all the preceding history of man. The instruments for the discovery, collecting, storing, retrieving, and communication of scientific knowledge have become vastly more sophisticated and effective. The total sum and incredible complexity of discovered facts dwarfs that of a generation ago. The computer, television, recorder, and other electronic devices are revolutionizing the "knowledge industry." In these areas a university must be constantly changing to keep pace. The faculty, curriculum, facilities, and instruments must constantly change. This is a costly process and grows ever more costly as more specialized teachers are demanded and more complicated equipment is required. Baylor University must continue to be flexible, changing, and progressive in these areas.

We should note, however, that the basic traditional liberal arts courses are not irrelevant today. The courses on language and literature designed to teach a person to listen or read with understanding and comprehension and to speak or write with clarity and force are just as necessary for the education of a free man today as in the days of Socrates. The study of history is as essential to the understanding of the present and the planning of the future as it was a century ago. The same can be said of courses in economics, political science, sociology, psychology, biology, geology, art, religion, and other basic disciplines. The ability to gather and analyze

related facts and draw rational conclusions therefrom is still a prime end of education and is more essential to effective living today than ever before. Some current demands by student groups and others that these courses be abandoned in favor of social and political involvement and activism for credit are self-defeating. Meaningful and effective social and political involvement in the long run are possible only for those properly prepared with the basic background knowledge and insights and the basic skills of thinking and communicating. The chief contribution to social and political action a university can make is the preparation of its students by providing them with the basic knowledge and skills required therefor. The function of a university as an instrument of immediate social or political action is secondary and auxiliary to the basic educational purpose. This is one of the major areas of change in university programs today, and Baylor University must keep aware of such developments, but we should keep in mind that our function is primarily to operate an educational institution with order and deliberation and not a political party or a social action movement.

THE LIVING TEACHER REMAINS INDISPENSABLE

It should also be noted that, while all the new and rapidly changing educational equipment will produce changes in the educational processes, the combined effect of all of them will not be as revolutioanry in education as the advent of the book. The printed book was and still is the teacher's chief instrument. Theoretically, the book and all the other modern devices and facilities to record and communicate knowledge should make the teacher superfluous; but it has not been so.

The living teacher remains indispensable to effective education. A teacher with a genuine human concern for the student is indispensable to stimulating inspiration and dedication in a student. Particularly in the field of spiritual eternal values, computers, recorders, and other electronic equipment cannot replace the dedicated, compassionate Christian teacher. While this University must strive to provide its faculty with the best of such modern devices, let us keep firmly in mind that the quality of our educational program will continue to depend upon the quality and conviction of our faculty, and it is here we should continue to devote our main attention and our resources in the coming years.

GROW A FOREST IN 3 YEARS

HON. MASTON O'NEAL

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. O'NEAL of Georgia. Mr. Speaker, a revolutionary new concept in forestry is being explored in Georgia, and the U.S. Information Agency is spreading the good news around the world.

Forestry scientists in Georgia have been experimenting with a new method of planting sycamore trees at a very close spacing and then harvesting crops of sprouts with a silage cutter every 2 to 3 years. Harvesting trees for pulpwood every 2 to 3 years as compared to the present 20 to 40 years is indeed revolutionary.

This new system will help the United States and other nations meet their growing needs for wood-based products.

Dean A. H. Herrick of the University of Georgia School of Forest Resources has prepared a feature article on the subject for distribution by USIA to publications in Latin America, the Near East, Europe, and Africa.

I would like to share this most interesting article with my colleagues:

GROW A FOREST IN 3 YEARS

(By A. H. Herrick)

Harvesting trees for pulpwood every two to three years—compared to the present 20 to 40 years—is a revolutionary new concept being explored by forestry scientists in Georgia.

It holds promise of helping the United States and other nations meet growing needs for timber, pulp, and other wood-based products. And costs would be greatly reduced.

The new system, called "silage sycamore," consists of planting sycamore trees at a very close spacing and then harvesting crops of sprouts with a silage cutter every two to three years. Time and space savings are comparable to conventional wide-spaced tree plantations for pulpwood or other wood products. And higher yields of wood fiber per acre of land are expected. Trees are now harvested for pulpwood every 20 to 40 years.

Regeneration of forests by sprouts is not new. Willow shoots have been grown for basket weaving since the dawn of civilization. But bulk production of fiber or cellulose, by harvesting young sprout growth of trees, would be a real innovation. What we need for our two- or three-year forest is a tree that has the fiber properties sought by industry to make reconstituted products such as particleboard and paper.

Ten years of sycamore studies by the U.S. Forest Service at Athens, Georgia, proved the great versatility of that species. It occurs naturally in all states east of the Great Plains except Minnesota and grows on a wide range of soils and sites. Under reasonably good sunlight, soil and moisture conditions, sycamore grows fast. It sprouts prolifically from a low stump and responds well to fertilization. Then, too, it has relatively few insects and disease enemies in the South.

Not to be overlooked are other species such as sweetgum, yellow-popular, and cottonwood. Even boxelder is a possibility because of its rapid early growth, light wood color, seeding characteristics, and possibilities for direct seeding. But sycamore is favored.

In the beginning, the new sycamore forest should be planted on a well-prepared site by using seed, seedlings or cuttings. Use of cuttings is particularly attractive since genetic gains are realized quickly; superior stock can be selected in one or two years and reproduced vegetatively.

Mechanical weed control and cultivation improve survival and growth. Repeated croppings will require fertilizer applications, and intensive management may call for irrigation. Possibly both irrigation and fertilization can be accomplished by applying discharges from sewage treatment plants to the forest crop.

Fertilizers, and pesticides if necessary, can be applied from aircraft. Likewise, when the product to be manufactured will not tolerate leaves, an aerial spray can be used for defoliation during the growing season. It would be nice to do all the harvesting in the dormant season when the leaves have fallen but mills need supplies of chips the year around. The two- or three-year forest will replace itself by sprouting after each harvest cutting.

Sprout stands differ from annual crops which must be harvested when ripe and then stored. The sycamore tree silage can be stored on the stump for one or more years when harvesting needs to be delayed for any reason.

Experimentation so far suggests that initial growing space should equal the square of as many feet as there are years in the harvest interval. For example, in a planting designed for a three-year cutting cycle, the trees would be given nine square feet (.837 square meters) initially. The close spacings make full use of the site almost immediately. In conventional cuttings at eight-by-eight-foot (2.4-by-2.4-meter) or wider spacings, the three crowns do not fully shade the ground for several years.

Two-year-old rootstocks in a nursery planting of sycamore placed one foot (.3 meter) apart in four-foot (1.2-meter) rows produced an average of more than 17 tons of one-year-old sprouts per acre (42 tons per hectare). When a similar planting was harvested after six years, only a few of the trees had died, but growth was drastically reduced during the last four years. At the end of six years, 42 tons of green material were produced per acre (104 per hectare). This equals seven tons or a respectable 2.3 cords per acre (17 tons per hectare) per year. However, if the sprouts had been harvested each year for six years, the total yield probably would have exceeded 100 tons per acre (247 tons per hectare) or about two and a half times the total of the single cutting.

A rig like a forage harvester is used to convert the forest of sprouts to chips. In one pass, the machine severs the stem three or four inches (7.6 to 10 centimeters) above the ground, chips up the entire miniature tree, and blows the "silage" into a trailer towed behind. When full, the trailer is hauled to a loading dock or transport terminal for dumping. Chips are either stored or sent to the mill for processing.

Foresters are not the only ones pleasantly surprised with sycamore as a short-term wood producer. Pulp and paper technologists have been amazed to discover that this "upstart" of the timber world has excellent characteristics for making certain types of products. Its very thin bark permits use of the whole tree and eliminates the cost of debarking before chemical conversion.

Fresh samples of paper made from unbeaten pulp show green flecks from the chlorophyll in the leaves that were cooked with wood and bark just as the sprouts came out of the silage chopper. Yet, the strength properties, bleaching qualities and printability of whole-tree young sycamore sprouts command the respectful attention of the paper industry.

A vast variety of paper products, fiberboards and hardboards or molded articles for building and other purposes, can be manufactured from seedling-sprout silage, as is now being done from wood grown the conventional way. Soon, entire wall units as well as floor and deck units for homes and other small buildings may be molded in pairs, with a dead-air space in between to serve as insulation. These units would be light in weight and structurally very strong. The wall units would be ready to receive completed door and window units. Such buildings could be erected quickly at low cost.

With the silage sycamore concept, some tremendous cost savings in wood production can be expected. Gains are accomplished by cashing in on both biologic and economic principles. Every square foot of growing space is used. Yields are near capacity, and rotations (number of years between crops) are minimized. Consequently, both time and space are conserved.

Our sprout forest continually renews itself and yields heavy crops, thanks to close spacings and rapid growth. Rootstocks not only replace the newly-harvested stems by sprouting, but also stimulate new growth by giving the sprouts carbohydrates stored in root tissues. Yields per acre are tremendous. The young stems are easy to harvest and chip with fairly simple and light equipment. The young wood is relatively uniform in its characteristics. Bark and leaves are not considered trash in the manufacture of some products.

Maybe the young forest of sprouts will mass-produce raw material for mass-produced housing to help shelter exploding populations. What about the other two necessities of life—clothing and food? Rayon, along with other chemical converts, may also be an end product of the new forest, helping to clothe people in generations to come.

Sugar, molasses and yeast can also be derived from wood. They could help considerably to provide the world with vital and urgently needed foods and proteins at low cost.

MAYOR PAGE AND MAYOR KNIGHT RECOMMEND SOCIAL SECURITY INCREASE

HON. JAMES G. FULTON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. FULTON of Pennsylvania. Mr. Speaker, on Thursday, October 23, 1969, Mayor Peter Page of Bethel Park, chairman of the legislative committee of the Pennsylvania State Mayors Association made the following statement before the House Ways and Means Committee regarding an increase in social security. Mayor Page was accompanied by Mayor William Knight of Munhall, president of the Pennsylvania State Mayors Association, and Mr. Leo Kostman, State solicitor.

It is a pleasure to place this fine statement in the CONGRESSIONAL RECORD, as I believe my colleagues, as well as the American people will find it interesting and to the point:

WILBUR D. MILLS,
Chairman, House Ways and Means Committee, New Rayburn Building, Washington, D.C.

GENTLEMEN: Today, more than ever before, the United States is taking bold strides in many areas—in the field of science, in our vast space programs, in our changing system of attitudes toward the world in which we live. Much of what we have known as our "way of life" is severely tested, and in some instances, is being found inadequate in light of today's needs. Our method of provisioning for, and administering the federal insurance program known as Social Security is one such area of inadequacy. For some unknown reason, we still treat this plan, which is nothing more than a publicly operated, privately funded retirement program, as if it were simply another governmental dole, subject to the application of minimal concern and political expediency.

I think it is a generally recognized fact that partial revisions of the Social Security program can no longer be tolerated. If the plan is to function successfully for millions of our citizens dependent upon its benefits, a total re-structuring must take place without further delay. The following data sets forth what is felt could be certain meaningful changes in the basic concept of the Law. While they do not offer a Utopian approach to the problem, consideration of these measures, by this Committee, should at least provide a basis from which some answers may be found.

1. *An immediate increase of 15% in existing benefits*—There is little doubt that present benefits levels must be increased. Existing payments, in most cases, fail to provide even minimal subsistence standards. It is inconceivable to expect 25,000,000 people, all totally dependent upon Social Security to exist on incomes at or near the poverty level. While an immediate increase of 15% in present benefits would by no means provide a complete answer to the problem, it would at least offer a more responsible approach to this need.

The Pennsylvania State Association of Mayors, the people it represents, and our Nation's citizens who now receive Social Security recognize that a 15% increase in existing benefits is necessary now. They do not concur with the administration restrictive ceiling of 10%. They do not agree that such an increase will add to inflationary pressures. These people are totally disappointed and thoroughly confused by the President's recent pronouncement that he would veto any increase in excess of 10%. They feel, as do many of our country's leading economists and Social experts, that a Federally-enforced poverty level cannot be tolerated. They feel, and rightly so, that a 15% increase will not grant to each recipient an excess of disposable income; rather, it will serve to bring their meager existence more in line with their needs. In a great many cases, it will mean a very basic difference between an adequate existence, or life at a near starvation level.

2. *A revision of the Supplemental Earnings Ceiling*—At present a recipient of Social Security benefits can earn no more than $1,680.00 annually without forfeiting a disproportionate share of those benefits. Such a restriction not only imposes a severe hardship on those able to supplement their retirement, but it also places them in the rather dubious position of accepting a Federally-enforced guardianship, one that offers a sub-standard subsistence with no opportunity to improve their lot. The net result legislates against individual initiative and self-reliance, at a time when such qualities could prove most valuable, both to the recipient and our Nation.

There is no basis, in theory or in fact, to the retention of such a grossly restrictive penalty feature. There are few conceivable reasons to penalize a man or woman who earns more than the present allowable ceiling $1,680.00 yearly. Such a measure takes $1.00 from the recipient for every $2.00 he or she may earn. It makes little social, moral, or economic sense to prod a group of people to expand their energies and utilize their time with pronouncements of usefulness, on one side, and to literally "pick their pockets" once they have attained a degree of usefulness.

A more practical approach would be to revise this penalty feature of the program to a ceiling level of at least $4,800.00 before benefits would be adversely affected. Such a revision would enable the insured to maintain a better standard of existence, characteristics that are necessary but often lacking among our able bodied senior citizens once their initiative has been removed.

3. *A reduction in the Tax-Free Age*—Under the tenets of the present Social Security Law, the recipient may earn all of which he is capable without forfeiture of benefits, once he has reached 72 years of age. I am certain that many of our citizens are more than able to support themselves at 72, or even at 82 years of age. Realistically, however, these people comprise a minority. It would be far more practical to allow the individual to begin such penalty-free earnings at age 65. At this age, a vast number of professional and management people who are forced to retire by Company Policy, could move into similar areas, and continue their productivity without interruption. It is absurd to retire a life long contributor to our Society at 65 years of age, and then force him into further retirement, as mandated by the present law. If a man or woman is capable of subsidizing his Social Security benefits, he should not be penalized by virtue of this totally unjust measure.

4. One of the more critical benefits of Social Security, but one that, like the rest of the program, has been allowed to fall into a state of complete neglect, is the funeral and burial allowance. For many of the twenty-five (25) million recipients, the present $255.00 burial payment represents their total ability to pay the final costs involved in laying to rest themselves or their loved ones. In today's inflated economy, few burial arrangements can be made for less than $800.00 to $1,000.00. The present $255.00 allowance simply resigns a portion of those people to the disgrace and humiliation of a pauper's grave. This amount must be increased for the sake of practicality and in the name of humanity!

The Pennsylvania State Mayors' Association, acting in behalf of the seven (7) million people of Pennsylvania that it represents, is firmly convinced that actions of this Committee cannot and must not be swayed by partisan politics, administrative pressure, or personal expediency. It must act swiftly, directly, and humanely to correct the tragic faults now found in our out-dated and dangerously inadequate Social Security Program. We realize that such far-reaching changes will not come overnight. We also realize, however, that a purpose of service to our Senior Citizens must arise from this Committee. It must overshadow any easy or piece-meal answers that may be found in simply patching the existing law. The time for total revision is long overdue. It must come now, for many of our Senior Citizens live in a now world—in many cases, tomorrow will be a day too late—I urge this Committee to move in a way that will leave no doubt in the minds of these Americans as to whether or not our nation cares. Let your actions prove your concern.

Sincerely,

P. J. PAGE,
Mayor, Chairman Pennsylvania State Mayors Legislative Committee.

NATIONAL BUSINESS WOMEN'S WEEK

HON. MICHAEL A. FEIGHAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. FEIGHAN. Mr. Speaker, this week marks the 41st observance of National Business Women's Week. At this time we salute American business and professional women who have contributed time, effort, and ingenuity to business communities. Their successes have come only after a long struggle for recognition and equality.

Women have had to overcome the stigma of being the weaker sex and have had to prove their worth as productive working citizens. At the turn of the century the typical working girl was characterized as someone from the lower class who worked out of necessity. Education did not train women for jobs, rather it prepared them for social ends. The female labor force was largely unskilled. They had little job security and generally suffered from poor working conditions.

Conditions have improved since 1900 due to persistant efforts on the part of working women to improve their professional status. They now work to provide additional income for their families and often turn to business and professional fields for self-fulfillment. Moreover, they have proven themselves competent in business and professional endeavors and have tackled jobs which traditionally were handled only by men.

With the aid of an ever-growing female labor force today's industry has achieved monumental feats. Presently women are entitled to equal opportunities in hiring, training, pay, and promotion because they have merited equal status in the business world.

This week we salute American business and professional women for their industrial revolution and recognize their contributions to business and society through their untiring efforts and their unquestionable competency in what was once "a man's world."

"CALL FOR ACTION"—NEW VOICE FOR THE PEOPLE

HON. WILLIAM F. RYAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. RYAN. Mr. Speaker, a major problem in municipal government is the difficulty citizens have in getting help when they need it. Too often the maze of bureaucracy prevents such simple things as garbage being removed or a traffic light being installed.

In New York City since 1963 radio station WMCA has sponsored a unique social service program called "Call for Action," which has permitted New Yorkers with problems to call a number, be told what agency they should call, and get action. The project combines two elements:

One is a staff of volunteers who know what agencies offer certain services and then man the telephone calls from citizens who need help. The other is WMCA, a community-minded radio station which has been sponsoring the project. It provides desks and telephones for the "Call for Action" volunteers.

Similar programs have been encouraged by the urban coalition. Such programs have sprung up in Washington and Philadelphia, and will start soon in Chicago, Cleveland, Denver, Fresno, New Haven, Utica, San Antonio, and Altoona.

Mrs. Ellen Straus, the wife of WMCA's president and owner, R. Peter Straus, has been the inspiration behind the concept. With imagination and drive she has created a program which is a model for others to emulate. She and her band of volunteers deserve the gratitude of their fellow New Yorkers.

I include in the RECORD an article describing the project which appeared in the October Reader's Digest entitled "Call for Action—New Voice for the People," written by James Daniel:

"CALL FOR ACTION"—NEW VOICE FOR THE PEOPLE

(By James Daniel)

For two months, every time she looked out of her front window, Mrs. Georgia B. counted three abandoned cars, usually almost hidden under swarms of children. For two months, the New York City Sanitation Department promised to remove them "next week." Finally, when her small son cut himself on broken glass from one of the cars, Mrs. B. telephoned a number she had heard about over her favorite radio station. A volunteer taking the call gave Mrs. B. another number to call and the name of the person to talk to. Mrs. B. made the call—and next day the junk cars were gone.

Jacqueline C., 19, trustingly signed a contract with a correspondence school that guaranteed her a job as an airline hostess for a tuition fee of $700, of which $100 was payable in advance to the salesman. Because of her age, her father co-signed. When she discovered that the correspondence "school" was only a post-office box number, she tried to get out of her obligation. But the finance company holding the contract threatened to sue her father for the $600, plus court costs. Jacqueline, in anguish, called the same number recommended by the radio station and soon was put in touch with a Legal Aid Society lawyer. Though he was unable to catch up with the fast-talking salesman, he persuaded the finance company to drop its claim.

Mrs. B. and Jacqueline C. are just two of the 120,000 New Yorkers who in the past six years have received a sympathetic hearing and practical assistance from a unique social-service organization named Call for Action. This one-stop clearinghouse puts individuals with a problem in touch with the public or private agencies most likely to have a solution. If the problem is complicated, or if there is any suspicion that the agency will fail to do its job, Call for Action will itself make a call to a key person in the agency who can expedite service. Periodically—to see how well the agencies are functioning and whether its own referrals are on target—Call for Action checks out the end results of all the calls it has received for a day or a week. The checks reveal that four out of five callers are helped.

While Call for Action projects are now being initiated in several cities, the concept began and has been most fully tested in New York City. Here, as elsewhere, its effectiveness depends upon two distinct sources of support. One is the staff of 50 volunteers—mostly young housewives—who first survey the agencies of the community to find out what kind of help each is equipped to offer, and thereafter man the telephones. In New York, each works at least one day a week, from 11 a.m. to 1 p.m. Monday through Friday.

The other source of support is a sponsoring radio station. In New York the sponsor since the project began in 1963 has been WMCA, a rock-'n'-roll station with many free-wheeling "talk" shows. WMCA provides Call for Action with desk space and telephones. And at regular intervals it reviews Call for Action's cases to find topics for documentary shows and editorials which keep public and private agencies intensely aware that their services are being watched. (Callers are also urged to tell agencies that "WMCA–Call for Action said for me to call *you*.")

The range of problems handled by Call for Action is impressively diverse. Of 11,388 recent calls, 20 percent dealt with housing, 13 percent with consumer frauds, 10 percent with health problems. Others ranged from employment and schooling to traffic, police, Social Security, narcotics, racial and religious discrimination and air pollution.

Behind most of these calls lies a small but intensely human drama:

When a large public-housing complex suddenly experienced an inordinate number of burglaries, the rumor spread that a master key had been stolen. The tenants were near panic until one thought to telephone Call for Action. A series of phone calls led to an official determination that no master key was missing—but that after 18 years of service the lock cylinders were so worn that it was child's play to pick them. With a gentle nudge from Call for Action, housing-project officials agreed to install new cylinders in all the tenants' doors.

A blind man with four children was talked by a con man into selling merchandise over the phone. All he had to do was use his own phone, to which the con man attached a tape recorder. The promoter said that he would then take the tapes, make the sales and pay the blind man commissions, plus his phone charges. Instead, after picking up the tapes, the promoter made the sales and vanished. The phone company then disconnected the man's line because of an unpaid bill for more than $100. Call for Action persuaded the welfare department to pay the phone bill, and currently is pushing for tighter laws against such selling practices.

An expectant mother became hooked on drugs, and was deserted by her husband. Fearing that the child would be born defective, a neighbor phoned Call for Action. Volunteers located an agency willing to take on the multiple problem of abandonment, addiction and pregnancy, and the neighbor signed commitment papers to get the girl in a hospital. In due time this Good Samaritan was able to report the birth of a perfect baby and the reconciliation of husband and wife.

Not all cases have happy endings, of course. Call for Action volunteers still grieve for a 12-year-old boy whose mother reported that he was staying out all night drinking, stealing and experimenting with drugs. The mother went from agency to agency trying to get help. Finally, the boy was arrested. "Now," said the mother bitterly, "*everybody* wants to help. Why couldn't they before?" Call for Action and WMCA put the mother's recorded question on the air to dramatize the need for more community facilities.

Observers of Call for Action feel that it has social significance beyond the resolving of tens of thousands of domestic tragedies and near tragedies. First, it reinforces in poor people both the habit of making their grievances known and the expectation that if they have a just claim it will be resolved. Many of the callers have never before had the experience of really being listened to. They are astounded when they discover that you can fight City Hall—and win. It shows them that there are better ways of getting attention than starting riots or burning down buildings.

Second, it raises the quality of administration. While trying to find jobs for people in Harlem, for instance, Call for Action learned that there was no local employment office in the area of New York with the densest population and the highest incidence of unemployment. Call for Action leaned on officials until such an office was opened.

Perhaps the greatest victory over bureaucratic bungling came when R. Peter Straus, owner-president of WMCA, asked Call for Action volunteers to look into the reasons for the steady deterioration of much of New York's older housing. An invitation over the air to phone in about broken stairs, lack of heat, uncollected garbage and rats brought a flood of calls. In trying to refer callers to the appropriate city departments, Call for Action discovered incredible overlaps in bureaucratic jurisdictional lines. For example, the health department had charge of complaints about lack of hot water in faucets—while the buildings department had charge of complaints about the lack of hot water in radiators.

Unable to make city officials take notice, half a dozen volunteers, led by Straus's wife, Ellen, appeared one morning at the main city housing office and were accepted by the regular help as new employes. Proceeding to the files, they gathered facts about cases which eventually led to the flushing out of a syndicate of slumlords who milk properties dry, then abandon them. Two long-range results were the establishment of a central complaint number for housing calls in City Hall, and a joint city-federal project to investigate the possibility of computerizing property ownership records.

Currently, Call for Action is being expanded in two directions. In New York,

WMCA, which has won nine public-service awards for its sponsorship of the program, is encouraging the New York volunteers to double the time that the phones are kept open each day (from two hours to four), and to extend their coverage from New York City to surrounding suburban areas.

Nationally, the Urban Coalition, a group of businessmen activists who work closely with community groups to bring about peaceable change in the big cities, is encouraging Call for Action programs in other cities, and has arranged with Mrs. Straus to share her volunteer-group experience with others wishing to start Call for Action projects. In recent months, programs similar to the New York project have started up in Washington and Philadelphia, and are expected to begin soon in Chicago, Cleveland, Denver, Fresno, New Haven, Utica, San Antonio and Altoona, among other cities.

John Gardner, head of the Coalition and former Secretary of Health, Education and Welfare, believes that Call for Action has a major national role to play. "When I was in government," he recalls, "I was struck by the need for some procedure that would enable people to place their grievances before those in authority and get prompt action. Call for Action can do this because it stands apart from government or any other vested interest and thus is able to concentrate on getting results. It is an enormously constructive idea which can help all kinds of people cope with all kinds of problems. More importantly, it can help combat the sense of powerlessness that is so prevalent in our large cities."

MOST REV. MICHAEL KIEN, ARCHBISHOP OF THAILAND, SPEAKS OUT ON THE RECENT VIETNAM MORATORIUM ACTIVITIES

HON. GLENN CUNNINGHAM

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. CUNNINGHAM. Mr. Speaker, I think the following article which appeared in the Omaha World-Herald, bearing upon the recent Vietnam moratorium, will be of interest to the Members.

The Most Reverend Michael Kien, Archbishop of Thailand, should be in a position to know what effect the moratorium demonstrations would have upon our quest for peace.

The article follows:

THAI BISHOP: PROTEST HURT WAR PULL-OUT

Activities such as the Vietnam moratorium may actually slow United States withdrawal from Vietnam, the Most Rev. Michael Kien, Archbishop of Thailand, said Friday.

Archbishop Kien stopped briefly in Omaha to visit the Revs. James R. Cain, Anthony B. Mickells and Anthony Petrusic who visited him in Thailand last year.

He has been in the United States since June raising funds for Catholic missions in Thailand and is returning to Thailand after stopping in New York City.

"I don't blame the moratorium because I know the ways of American democracy." Archbishop Kien said in an interview. "But I wonder if this was the proper time for it. President Nixon is doing his best for American society and the American people."

The native of Thailand said events like the moratorium and other protest demonstrations will "make the North Vietnamese more intransigent and less willing to yield." He added:

"Patience is the key word. If you try to take things easier, you will get what you want quicker."

He predicted that the Vietnamese will be able to take over the war in a year or two, permitting the complete withdrawal of American troops.

He urged the United States to pull out of both Vietnam and Thailand gradually and said the presence of American troops in Thailand is "welcome."

THE ALASKAN NATIVE STORY: A BIT OF ESKIMO HISTORY

HON. ED EDMONDSON

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 23, 1969

Mr. EDMONDSON. Mr. Speaker, some interesting testimony concerning the early history of Alaska and the position of the Eskimo people who live on the Bering Sea was provided the Subcommittee on Indian Affairs last week by Jerome Trigg, Sr., president of the Arctic Native Brotherhood.

The Trigg statement told us much about the Eskimo people and about their view of the transaction by which the United States purchased Alaska from the Czar of Russia.

I believe the Trigg statement will make interesting reading for all Americans, and the full text of it follows:

TESTIMONY REGARDING ALASKA NATIVE LAND CLAIMS

(By Jerome Trigg, Sr.)

Mr. Chairman, Honorable Members of the Committee, Ladies and Gentlemen, on behalf of the Alaska native, I should like to welcome you to Alaska, and to thank you for this opportunity to enter testimony concerning issues vital to survival of our people, "The Alaska Natives." I am Jerome Trigg, Sr., President of the Arctic Native Brotherhood. Our organization's office is in Nome, Alaska, which is located on the Bering Sea coast of Seward Peninsula. My people are called in English the Kowaruk Nation of Eskimo.

It is proper and fitting that a brief history of our past as it relates to the issues before us today be included in this testimony. We have recorded the history in the memory of our people, and what we know to be true has been proven by the research of scientists.

Our people in the beginning lived in caves when Alaska was tropical. Later after a disaster of three days and nights of eclipse of the sun we started having seasons. We have used our land wisely since time before the coming of the white man. We of the Seward Peninsula were an organized nation, proud and unconquered. We didn't waste anything for we needed everything for survival. Both from the land and the sea, we had our hunting and fishing areas.

One could not infringe on others unless permission was given. Once yearly there were meetings of chiefs from all the villages to map out agreements. In time of trouble, all villages assisted those who were being attacked. We drove the warlike Siberian natives back, though there were others that were friendly and traded with us.

We didn't know of the Russians, much less that they were in our part of the world. Nor did we know about the United States. We were strong and proud, and today we still feel that we own the Seward Peninsula.

We have traded the products of the sea: seal oil, seal skins, dried meat, dried fish, rawhide ropes, and many other items to the inland natives for caribou hides, squirrel skins, copper, jade slate and other items. We crisscross the peninsula in search of game and fish and to trade with each other. Due to the short season and long winter, it takes a vast area of land to produce the game and fish the native needs.

Before the white man, the natives lived in sod huts, partially underground and warm. Today the Eskimo lives in cardboard shacks in the worst poverty in the nation.

I have briefly described a nation of people who live wisely and carefully. We are peaceful hard-working tax-paying people, able to make what we have go a long way. Our deep loyalty to the United States is well known. The graves of our men killed in the arctic on patrols of World War II and other graves from later wars in other parts of the world speak for us.

We have been isolated and forgotten because we are a quiet people who must work constantly to stay alive. Some of our people have been left behind the times, as things changed and the riches of our lands were needed by this nation and other countries of the world.

We did not invent the wheel, but the wheel does not work on tundra and snow. We developed sleds instead, and the skin boats. We have learned to adapt to new things if they are useful: outboard motor, snow machine and other items.

I would like to give a few reasons why we desire and need a full and just settlement. First, I would like to point out that we are permanent residents. Even after our land was exploited we remained. We love our land. We have united with the Alaska Federation of Natives. We are proud to be part of that organization.

We are in need of housing with utilities. We have Eskimo kids that never have baths. We have much skin disease and ear problems. Many related health problems due to poor housing and water problems.

We have one of the lowest death ages of any group in the nation.

We cannot borrow from banks to build houses, for you must have an adequate income to pay a loan back. Our children are going to school in distant places. We want them home. We would like to improve our villages to meet modern living conditions with running water. We would like to send our children to institutions of higher learning of our choice. We would like job training for the workers of our area.

We do not want to always live off the taxes that other people pay. We want to earn our own way and pay taxes to support public services we all need, and to have the same freedom to make the choices in our lives that other people do.

The single greatest cause for our present situation, as second-class citizens, is too much dependence on welfare and decision-making by government agencies.

The gold rush, even for all the gold taken from native lands, left the native worse off. Will the oil rush trample us too, and destroy the game and resources of the wide areas of land we still must depend on for food and clothing? The native, too, desires to benefit from development of the resources of the land but we wish, for once, to guide this development so that our children will never have to suffer the hardships that absentee exploitation brought to my generation and older generations.

We are prepared to take on the job of managing a large sum of money and to invest that money in our people, the future generations of our people, and in the good of our state and our nation.

If the settlement is too small we will only be able to attack the symptoms of our problems. This is all that tax money spent so far has been able to do. There must be large settlements in the beginning to establish the system and the means of accomplishing

all that must be done. There must be a regular amount of money which can be expected and planned for.

We think that the Federation's proposal for 40 million acres and $500 million with a two percent overriding royalty is a reasonable and just solution to our land claims. This combination of ownership in land and settlement money will allow the native people to promote and guide development of the land. This proposal will allow us to meet the demands of the future.

We believe that our Eskimo lands were illegally sold without our knowledge or consent by a country which had not conquered or lived on those lands. We also believe that our lands were sold by Russia to the United States when neither country had true knowledge of their use, occupation or ownership. We believe we are justly entitled to payments for non-renewable resources which were removed without benefit to our people and for the lands which are now occupied by the descendants of others.

We have here in Alaska native bank officers, commercial airline pilots, commercial boat and barge operators, airline managers, and other executives, air station managers, military officers, and school teachers. We have members of our people in other states who occupy a wide range of occupation. We have some native corporations.

The money received in the final settlement will provide the capital to enable us to obtain education, advice, and technical assistance for ourselves and our children. It will provide money for building safe, sanitary and adequate housing for our people. It will provide the foundation and support for private ownership of property and business. It will equip us to compete for jobs and to obtain funds for major construction in our communities, and give us the freedom to make our own choices and mistakes and to profit from them.

We are proud of our citizenship but not the limits that are placed upon it. We are proud of our willingness and ability to serve in our nation's defense. We now wish to contribute to its economy by becoming self-sufficient and independent people. We expect to use the money to which we are justly entitled to prepare our coming generation to take advantage of the opportunities and the choices which this nation can offer to them. We want our children and our children's children to be proud of their past and their heritage as American Eskimos, American Aleuts or American Alaskan Indians.

Thank you.

SENATE—*Monday, October 27, 1969*

The Senate met at 12 o'clock meridian and was called to order by Hon. JAMES B. ALLEN, a Senator from the State of Alabama.

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

O God and Father of all mankind, whose promise is to bless that nation whose people strive to do Thy will, make known to us the way we should think and work and live to fulfill the divine intention. Let Thy greatness overrule our mistakes and strengthen our weakness. Hasten the day when Thy purposes are fulfilled, not only in the hearts of a few wise and brave men but throughout the whole Nation, in Congress and court, in workshop and office, in field and forest, in city and in country. Draw us together in this Senate in unity of spirit and in the bonds of peace that the words of our mouths and the work of our minds may be acceptable in Thy sight, O Lord, our strength and our Redeemer. Amen.

DESIGNATION OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will read a communication to the Senate.

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., October 27, 1969.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. JAMES B. ALLEN, a Senator from the State of Alabama, to perform the duties of the Chair during my absence.

RICHARD B. RUSSELL,
President pro tempore.

Mr. ALLEN thereupon took the chair as Acting President pro tempore.

THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Thursday, October 23, 1969, be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the Senate by Mr. Geisler, one of his secretaries.

REPORT ON U.S. PARTICIPATION IN THE UNITED NATIONS—MESSAGE FROM THE PRESIDENT

The ACTING PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which, with the accompanying report, was referred to the Committee on Foreign Relations:

To the Congress of the United States:

In accordance with the provisions of the United Nations Participation Act of 1945, I am transmitting the 23d annual report, covering the calendar year 1968, on United States participation in the United Nations.

The large number of topics covered, the number of U.N. agencies involved, and the increasing contributions of the United States to U.N. programs all show how important the United Nations has become to the peace, security, and welfare of the world. In the United States, support of the United Nations and participation in its many activities have always been nonpartisan.

I therefore take pleasure in transmitting to the Congress this report of the President on our participation in the United Nations.

RICHARD NIXON.

THE WHITE HOUSE, *October 27, 1969.*

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to sundry committees.

(For nominations this day received, see the end of Senate proceedings.)

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, notified the Senate that Mr. WINN, of Kansas, had been appointed as a manager on the part of the House at the conference on the bill (S. 1857) to authorize appropriations for activities of the National Science Foundation, pursuant to Public Law 81-507, as amended, vice Mr. BELL, of California, excused.

The message further announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1689) to amend the Federal Hazardous Substances Act to protect children from toys and other articles intended for use by children which are hazardous due to the presence of electrical, mechanical, or thermal hazards, and for other purposes.

The message also announced that the House had agreed to the amendments of the Senate to the bill (H.R. 9946) to authorize and direct the Secretary of Agriculture to quitclaim retained rights in certain tracts of land to the board of education of Lee County, S.C.

The message further announced that the House had disagreed to the amendments of the Senate to the bill (H.R. 13763) making appropriations for the legislative branch for the fiscal year ending June 30, 1970, and for other purposes; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. ANDREWS of Alabama, Mr. STEED, Mr. KIRWAN, Mr. YATES, Mr. CASEY, Mr. MAHON, Mr. ANDREWS of North Dakota, Mr. LANGEN, Mr. REIFEL, Mr. WYMAN, and Mr. BOW were appointed managers on the part of the House at the conference.

The message also announced that the House had passed a bill (H.R. 14020) to amend the Second Liberty Bond Act to increase the maximum interest rate permitted on U.S. savings bonds, in which it requested the concurrence of the Senate.

HOUSE BILL REFERRED

The bill (H.R. 14020) to amend the Second Liberty Bond Act to increase the maximum interest rate permitted on U.S. savings bonds, was read twice by its title and referred to the Committee on Finance.

WAIVER OF CALL OF THE CALENDAR

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the call of the legislative calendar, under rule VIII, be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

LIMITATION ON STATEMENTS DURING TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that statements in relation to the transaction of routine morning business be limited to 3 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR ADJOURNMENT

Mr. MANSFIELD. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in adjournment until 12 o'clock noon tomorrow.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate go into executive session to consider the nominations on the Secretary's desk.

There being no objection, the Senate proceeded to the consideration of executive business.

The ACTING PRESIDENT pro tempore. The nominations will be stated.

NOMINATIONS PLACED ON THE SECRETARY'S DESK—MARINE CORPS

The bill clerk proceeded to read sundry nominations in the Marine Corps which had been placed on the Secretary's desk.

The ACTING PRESIDENT pro tempore. Without objection, the nominations are considered and confirmed en bloc.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to, and the Senate resumed the consideration of legislative business.

COMMITTEE MEETINGS DURING SENATE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that all committees be authorized to meet during the session of the Senate today.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

THE COST CRISIS IN MEDICARE

Mr. AIKEN. Mr. President, The October 13 issue of American Medical News, a weekly newspaper published by the American Medical Association, contains a front page story as well as an editorial on the subject of the costs crisis in medicare.

Both story and editorial are based upon a sobering statement of facts made by the chairman of the Committee on Finance, Senator LONG. In his disclosures, Senator LONG makes crystal clear the overwhelming dimensions of the problems confronting Congress with respect to medicare's skyrocketing costs and the need for heavily increased taxes if the program is to be brought into actuarial balance. But, it is also made equally crystal clear that the Finance Committee—indeed, the entire Senate—is going to thoroughly explore means and mechanisms to bring the runaway medicare program under control.

I want to say that I share Senator LONG'S concern over the careening course taken by medicare thus far. I agree with him that we cannot simply rubberstamp a "yes" vote on the request for an additional $126 billion tax increase to meet medicare's anticipated deficit over the next 25 years. A long, hard look by Congress is in order before the Nation's taxpayers are saddled with any new burden of that dimension.

The fact that the American Medical Association gave such prominent attention to Senator LONG'S statement indicates a sharing of concern over medicare's difficulties as well as, hopefully, a desire on the part of organized medicine to play a direct and responsible role in helping solve those problems.

I ask unanimous consent that the article and the editorial which appeared in the American Medical News be printed at this pointed in the RECORD.

There being no objection, the article and the editorial were ordered to be printed in the RECORD, as follows:

MEDICARE—THE HARD FACTS

The financial facts of life are forcing the Administration to reduce Medicare benefits and raise premiums paid by the elderly. Speeches of protest greeted the news in Congress where lawmakers pledged every effort to brake costs.

Though inflation has been the major cause of the rise in hospital and medical fees, hospitals and physicians have not escaped the wrath of lawmakers eager to pin the blame on someone.

The Medicare Part B premium next year will have to rise from the present $4 a month paid by the elderly to at least $5, a move that will cost the government an additional $280 million for its contributions from general revenues.

The previously-announced increase in deductibles the aged must pay for their hospital costs, in order to comply with the law's requirements tying the deductible to average costs of hospital stays, also did not sit well in Congress.

Senator Russell Long (D., La.), chairman of the finance committee, said the Medicare program, under present financing, would cost $126 billion more in benefits than it would collect in taxes. He told the Senate this is why the Administration recommended to Congress that Medicare taxes must be increased.

Long also stated it was his hope the investigation of the Medicare program, now underway by the finance committee, would point the way to a solution to many of the problems contributing to the sharp rise in costs of the program. Such action, he said could reduce the need for the large tax hikes now considered necessary.

"There are some very hard and sobering facts of life about Medicare which the Congress, every taxpayer, and every Social Security beneficiary should know," the senator declared. He listed, among other items:

The Medicare hospital plan's funds will be completely exhausted by 1973 under present financing—despite a 25% tax increase in 1967.

Under present financing, the costs of the hospital plan (Part A) will exceed income by $126 billion over the next 25 years.

Additional general revenues—above previous estimates—totaling $820 million will be required to pay Part A costs for uninsured persons during the period 1971 through 1975.

It is estimated that an increase in Part B (medical insurance plan) monthly premium per beneficiary from the present $4 to at least $5.20 will be necessary to bring that plan into actuarial balance. The government would match that $5.20 from general revenues. Total increased annual Part B premium costs would be about $560 million—of which general revenues would have to come up with $280 million.

Medicaid costs will also be substantially increased by the effects of increases in the Medicare Part A deductibles as well as the jump in the Part B premium.

Added Long:

"Very simply, this senator is just not willing to vote to impose new Medicare taxes of $126 billion over the next 25 years, without first trying to control the programs we now have. This senator is not willing to saddle 20 million older people with another $280 million a year in premium charges, without first trying to cut the fat out of the Part B program as we know it."

"I do not believe Congress will just sit by and finance a $126 billion Medicare mortgage, without first trying to get a responsible, hard-headed businessman's attitude into the administration of these important health programs."

Full-scale hearings on the Administration's request for increase in Social Security cash benefits, taxes, and its Medicare proposals are scheduled to begin about Oct. 15 before the House Ways and Means Committee. Administration witnesses are down for at least the first two days of testimony, to be followed Oct. 22 by other interested organizations, including the American Medical Association and other medical organizations. The hearings are expected to continue through year's end and possibly beyond. Proposals to extend Medicare to everyone, a national health program, will be heard.

Senate Finance Committee hearings, meantime, may concentrate on ways of reducing costs through more stringent physician fee regulations, review, and hospital cost cutting.

One of the reasons for the sharp jump in the Medicare Part B premium was the decision last year of former Health, Education and Welfare Secretary Wilbur Cohen to keep the premium fixed at its current $4 a month level through the fiscal year that ends next June. He said voluntary price freezing by physicians should make such restraint possible. The experience so far shows that a premium of at least $4.50 was needed. Thus, the rate next June will have to be set not only to meet future costs but to make up for deficits rung up due to Cohen's decision and rising medical care costs.

In an exchange on the Senate floor, Sen. George Aiken (R., Vt.) told Sen. Long that "instead of putting the doctors and hospitals first, maybe we should turn our attention to the old folks and have Medicare set all the fees without reference to Blue Cross and Blue Shield schedules."

Meanwhile, Sen. Abraham Ribicoff (D., Conn.) who has been scolding the sloppy administration of the nation's health programs, introduced legislation to allow state governments to buy Medicare coverage for employees who have their own state-sponsored

retirement but do not pay into Social Security. Another provision would give better tax treatment to those whose retirement income is taxable because it comes from private plans rather than tax-free Social Security.

MEDICARE'S COSTS

In July, 1965, as Congress was about to pass the Social Security Amendments establishing the Medicare and Medicaid programs, this newspaper warned:

"There is good reason to believe that those who drafted the program have underestimated its cost and its potential growth."

When the bill passed, Sen. Russell Long (D., La.), chief Senate conferee in the House-Senate committee which worked out the final details, said, "It's the most significant Social Security and public welfare legislation ever passed by Congress."

Now, the Administration says it'll have to reduce Medicare benefits and raise the premiums paid by the elderly.

And Senator Long says that the Medicare hospital plan's funds will be exhausted by 1973, despite a 1967 tax increase; that costs of Part A will exceed income by $126 billion in the next 25 years; and that the Part B monthly premiums will have to be increased to at least $5.20 per month, from $4 to bring that program into actuarial balance (the government matches that figure from general revenues).

And, he says, "This senator is just not willing to vote to impose new Medicare taxes of $126 billion over the next 25 years, without first trying to control the programs we now have. This senator is not willing to saddle 20 million older people with another $280 million a year in premium charges with out first trying to control the programs we now have."

It would be easy for the medical profession to sit back smugly and say "I told you so."

But this cannot be allowed to happen. Medicare is now the law, and millions of the elderly depend on it to finance their health care. If physicians and others in the health professions do not expend every effort to make the program work and to hold the costs down, they face the possibility of even more government regulations and controls.

THE PHILADELPHIA PLAN

Mr. JAVITS. Mr. President, this morning I appeared before the Subcommittee on Separation of Powers of the Committee on the Judiciary, on behalf of eight other Senators and myself, and read a statement on the so-called Philadelphia plan, relating to equal employment opportunity, which has been promulgated by the Department of Labor, sustained by the Attorney General, but objected to by the Comptroller General of the United States on the grounds of legality.

The Senators joing in this statement, in addition to myself, are Senators BAYH, BROOKE, CASE, GOODELL, GRIFFIN, HARRIS, HART, and KENNEDY. Senator BROOKE also appeared and read an individual statement.

I ask unanimous consent that Senator BROOKE'S statement and the statement I made be printed at this point in the RECORD.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

EXCERPTS FROM TESTIMONY OF SENATOR BROOKE BEFORE THE SENATE JUDICIARY COMMITTEE IN FAVOR OF THE PHILADELPHIA PLAN

The Philadelphia Plan, as you know, was designed to implement the intent of Executive Order 11246, promulgated by President Johnson on September 24, 1965. Under this order, all Federal government contracts and federally-assisted construction contracts were required to contain specific language obligating the contractor and his subcontractors not to discriminate in employment because of race, color, religion, sex or national origin.

This was no new concept in American jurisprudence. Evidence of this intent is clear in the Constitution, which talks not only about the general principles of Justice, the Blessings of Liberty, and the General Welfare, but which also speaks specifically of freedom of religion, due process of law, equal protection, and the privileges and immunities of all citizens. It is clear in the various civil rights acts passed since 1957, which provide protection specifically against discrimination in accommodations, voting, and employment. It is embodied in the National Labor Relations Act which forbids discrimination by labor unions and employers, and in the regulations issued by the Department of Labor pertaining to applicants, trainees and apprentices. The Government of the United States *does not condone* discrimination on the basis of external factors unrelated to individual capabilities.

Since 1965, however, we have learned that simple prohibition of discrimination is not enough. Overt acts of discrimination not only are becoming less common; they were never the heart of the problem to begin with.

The real problem of discrimination in America is what the Civil Rights Commission has referred to as "systematic discrimination," but what I prefer to call "systemic" or "intrinsic" discrimination. Discrimination against minorities, particularly in the employment field, is built into the very structure of American society. Three black children in *four* in America attends an essentially segregated school from the day he enters kindergarten. Negro children, on an average, complete little more than 10 years of school, as compared to 11.5 for white children. Their schools are for the most part of poorer quality—they are older and lack the facilities enjoyed by students in predominantly white institutions. Funds for job training equipment, for laboratory facilities, for typewriters and teaching aids, simply are not available in many of the schools attended by blacks. A Negro student is more likely than his white counterpart to find his formal education irrelevant to his surroundings. It goes without saying that it does not, in far too many cases, prepare him to compete for jobs or for higher educational opportunities. These circumstances are changing, to be sure, but for the vast majority of non-white youngsters in America they are still a tragic fact of life.

The policy of assigning minority employees to "traditional" jobs or departments is also an informal, systemic barrier to full opportunity in employment. This has been true throughout our society: Negroes have been clerks and custodians, nurses aides but not nurses, teachers in black schools but not in white ones, security guards but never supervisors. These conditions are slowly changing, but even now a past history of discrimination on the part of some employers deters many qualified minority persons from applying for positions.

These are the kinds of situations which the Philadelphia Plan is designed to overcome. Prohibition of discrimination is not enough; positive action is necessary.

In considering what kind of positive action might be employed without hurting present employees or dealing with them unfairly, the drafters of the Philadelphia Plan have come up with a simple yet effective formula. Present employees will not be affected at all by the plan; their jobs will be as secure as they have always been. The Plan does, however, seek to establish a formula for hiring minority members on future jobs. It has been determined by the Department of Labor that each construction craft should have approximately 7.5 percent new job openings annually due to death, disability, retirement, and loss of workers for any other reason. Operating solely on the basis of these anticipated new job openings, the Office of Federal Contract Compliance, working in conjunction with the Federal contracting agency, will devise a set of criteria for minority employment for each contract. These standards will be clearly spelled out in the bids and each contractor who desires to bid on the government contract in question will be obligated to include in his proposal a statement of his goals for attaining these standards. Once the contract is awarded, checks will be conducted to determine whether the employer is in fact living up to his obligation.

I favor this approach for two basic reasons. First, because, as I have stated above, I believe that *positive* efforts to eliminate discrimination are essential. But secondly, I appreciate the fact that there is no question of the Federal government dictating to the states, the cities, or the local contractors. There are, in fact, no Federal standards involved. There is simply a statement of Federal intent, embodied in Executive Order 11246, with the mechanics to be worked out on the local level, taking into account local factors such as: the current extent of minority group participation in the particular trade; the availability of minority group persons for employment in such trade; the need for training programs in the area; and the impact of the program upon the existing labor force. Even then, after all these criteria have been taken into account, the contractor and subcontractors are still allowed leeway in meeting the minority employment targets, and need only demonstrate that they have made a good faith effort to do so.

Mr. Chairman, nothing could be fairer, or more equitable, or ultimately more beneficial for all concerned. The spirit of the law has for too long been ignored in the field of equal employment opportunity. I welcome the promulgation of the Philadelphia Plan, I applaud the Administration's unequivocal support of it, and I hope to see similar plans worked out to achieve similar results in Boston and other communities all across the country. Only in this way can we truly make America a land of opportunity for all our people.

STATEMENT BY SENATOR JAVITS

We welcome this opportunity to reiterate our support for Executive Order 11246 and the Department of Labor's decision, based on the opinion of the Attorney General, to implement the Philadelphia Plan, notwithstanding the adverse ruling on the Plan by the Comptroller General.

Despite the passage of the Civil Rights Act of 1964, equal employment opportunity remains far from a reality in America today. Notwithstanding the efforts which have been made by the Federal government and private litigants, historic patterns of discrimination persist among employers and among unions, even though many trade unionists have been the victims of discrimination in the past. A vigorous program of action by the Federal government is, therefore, still essential to assure to members of minority groups the full participation in our economic system to which they are morally and legally entitled.

The federal program must include, if it is to be effective, a firm policy of requiring all federal contractors to insure that equality of employment opportunity exists for their employees, as well as the type of remedy made available through individual suits under Title VII of the Civil Rights Act of 1964.

We are thus directly in accord with the principles underlying Executive Order 11246, which requires each government contractor to agree that he "will not discriminate against any employee because of race, color,

religion, sex, or national origin" and also that he "will take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their race, color, religion, sex, or national origin."

The contract compliance program governed by Executive Order 11246 antedates the Civil Rights Act of 1964 and has received the recognition and support of Congress, through appropriations to the Office of Federal Contract Compliance, and its predecessor, the President's Committee on Equal Employment Opportunity for many years. In addition, it is to be noted that the Senate itself, during the debate on Title VII of the bill that became the Civil Rights Act of 1964, rejected an amendment offered by Senator Tower that would have made Title VII the exclusive remedy for ending discriminatory employment practices. Had the amendment been adopted, the contract compliance program would, of course, have ended. The vote on the amendment, in effect, approved continuance of the contract compliance program as separate and apart from the program under Title VII.

It is thus far too late in the day to maintain, as some are now doing, that Title VII of the Civil Rights Act of 1964 preempts the Executive Order program, or that the President may not require more, in the way of "affirmative action" by federal contractors as a condition of doing business with the government, than Title VII requires of operations in the private sector.

We recognize of course, that under no circumstances may the Federal government require anyone to violate Title VII of the Civil Rights Act of 1964, or any other law duly enacted by Congress. Insofar as the Philadelphia Plan is concerned, however, the Attorney General, who has the primary governmental responsibility for enforcing Title VII, has expressly ruled that the Plan does not require any contractor to violate Title VII. That is also what the Plan, itself, states on its face.

As we understand the Philadelphia Plan, and the Attorney General's opinion sustaining its legality, the goals which it establishes are to be used only as criteria to establish performance of the contractor's duty to take affirmative action to provide equal employment opportunity. If the goals are met, adequate performance will be assumed, absent other proof to the contrary. On the other hand, failure to meet the goals will not be presumed to establish non-performance if the contractor can demonstrate that he attempted, in good faith, to meet the goals. Such good faith does not include practicing "reverse discrimination," which is expressly forbidden by the Plan.

What the Philadelphia Plan really does, then, is to anticipate the result which should ensue from a good faith affirmative action program. If the result is achieved, compliance will be assumed; if the result is not achieved, it is still open to the contractor to show why not. If, for example, the contractor can show that to meet the goal he would have had to practice reverse discrimination, his failure to meet the goal could not be used as a ground for terminating his contract.

One virtue of the Philadelphia Plan in its revised form which deserves special emphasis is that it will remove a great deal of the uncertainty and confusion which have so far plagued the contract compliance program. Indeed, goals which the Plan establishes are the result of earlier criticism of the Plan by the Comptroller General on the ground that it was not specific enough to enable contractors to frame their bids intelligently. In the past, many contractors have voiced legitimate complaints that they simply did not know what was expected of them under the program. Little or no coordination seems to have existed among the different contracting agencies, the OFCC, the EEOC and State and local agencies concerned with equal employment opportunity. The result was bound to produce frustration among minority groups, and overlap, duplication, and confusion for businessmen and union officials who found themselves caught in the crossfire. The Philadelphia Plan, coupled with the interagency liaison and coordinating procedures which have recently been established, offers real promise of ending this anomolous situation, and at the same time, of demonstrating that the contract compliance program is more than the paper pledge it has been up to now in far too many cases.

We cannot stress too strongly the need for the Federal government to demonstrate this kind of unqualified commitment to the goal of equal employment opportunity to those millions of black and brown Americans to whom it has been denied for so long. As recent events in Chicago and Pittsburgh have shown, those who have suffered the brunt of exclusionary and discriminatory employment practices are willing to wait no longer to see the pattern of the past changed. The Philadelphia Plan is a way to meet these legitimate demands, and it certainly will prove far more satisfactory than the sort of "street demonstrations" we have witnessed in Chicago and Pittsburgh.

In sum, we believe that it is incorrect to characterize the Philadelphia Plan as a "quota System" and that the Labor Department was right in relying on the Attorney General's Opinion sustaining the legality of the Plan. We believe, also, that if there are any questions concerning the legality of the Plan, or its implementation, they should be settled in the Courts, which have the final authority to determine the application of Title VII of the Civil Rights Act of 1964 to Executive Order 11246.

Mr. JAVITS. Mr. President, the fundamental question involved in this matter is a legal one. In that regard I would prefer to let the memorandums speak for themselves, as to whether we are dealing with quotas or goals. I deeply believe, and so do my colleagues who joined in the statement, that we are dealing with goals and that all legalities are fully preserved.

The sociological and governmental problem involved is, Shall we give an opportunity to those who contract with the Government to use good faith efforts to deal with a very nettling and frustrating problem? This problem has very revolutionary implications, as shown by the experience of both Pittsburgh and Chicago, where groups marched on each side. It is a problem of the real limitation of educational opportunity which apparently exists in given areas for members of minority groups in the building trades. It involves a union problem and an employer problem, and the situation is one where both the employers and the unions seem to be satisfied, but where, in effect, members of minority groups who ought to have openings into these trades, are effectively deprived of those openings. There are also some grave arguments about the sufficiency of operatives to have an expanded building program in the United States.

For all those reasons, I welcome the hearings which are now being conducted by the Senator from North Carolina (Mr. ERVIN) before the Subcommittee on Separation of Powers of the Committee on the Judiciary.

Inasmuch as I believe that the matter will ultimately, through some amendment, find its way to the floor—though it could very properly and should be settled in the courts—I think it is desirable for Senators to have some concept of the legal questions which are involved, as well as the governmental questions. I believe Senators must think through whether the Federal Government is not in this case—and I give great credit to the administration for this—doing its utmost to find a realistic and imaginative way to deal with this very serious question of labor-management relations and employment opportunity in a peaceful, orderly, legal, fair and practical manner.

Mr. KENNEDY. Mr. President, will the Senator yield?

Mr. JAVITS. I yield.

Mr. KENNEDY. Mr. President, I commend the Senator from New York for bringing this matter to the attention of the Senate. I serve as chairman of the Subcommittee on Administrative Practice and Procedure of the Committee on the Judiciary. In the early part of the year we held hearings on the entire question of contract compliance and the very significant problems that are posed in connection therewith for employers and employees.

I think the administration is to be commended for the courage it has demonstrated in developing the Philadelphia program and for refining it. I think the Attorney General, with whom I have disagreed on a number of occasions, deserves commendation for the position he has taken in support of the program.

I think the administration, by taking a clear position on this question, has provided an example for various contractors around the country. It is a position which contractors can take as a model. It was a bold position taken in the early part of the administration. It has been fired at and hammered at since it was announced.

Again, I think the Senator from New York has performed a useful service in this area, and I commend him.

Mr. JAVITS. Mr. President, I greatly appreciate the statement of the Senator. It illustrates the genius of our system, for the distinguished majority whip feels free to give credit where he feels credit is due.

Mr. GRIFFIN. Mr. President, will the Senator yield?

The ACTING PRESIDENT pro tempore. The time of the Senator has expired.

Mr. JAVITS. Mr. President, I ask unanimous consent that I may proceed for 2 additional minutes.

The ACTING PRESIDENT pro tempore. The Senator from New York is recognized for 2 additional minutes.

Mr. JAVITS. I yield to the Senator from Michigan.

Mr. GRIFFIN. Mr. President, I thank the Senator from New York. The distinguished majority whip has given my speech; and I would much rather that he give it. I appreciate very much having those remarks come from the other side of the aisle, recognition of the policies which this administration is pursuing vigorously in this very difficult, controversial, and complex field. We recognize that from time to time the administration is criticized, but it is good to hear

the recognition from both sides of the aisle in that particular field, especially, the administration is moving in the right direction.

I particularly wish to join the distinguished majority whip in commending the distinguished senior Senator from New York for his leadership because I feel confident his leadership is a very important factor both with respect to Congress and the administration.

Mr. JAVITS. Mr. President, I am grateful to my colleagues. This is the first time that this plan has been exposed in a hearing to the give and take of debate, both on the law and the facts. I deeply believe we have presented a very credible position. The strength added by Senators who joined is critically important. Without them it could not be done.

I thank the Senators.

EXECUTIVE COMMUNICATIONS, ETC.

The ACTING PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

REPORT OF RECEIPTS AND DISBURSEMENTS TO APPROPRIATIONS FROM DISPOSAL OF MILITARY SUPPLIES, EQUIPMENT AND MATERIAL AND LUMBER AND TIMBER PRODUCTS

A letter from the Assistant Secretary of Defense, transmitting, pursuant to law, a report of receipts and disbursements pertaining to the disposal of surplus military supplies, equipment, and material, for expenses involving the production of lumber and timber products during the fiscal year 1969 (with an accompanying report); to the Committee on Appropriations.

PROPOSED AMENDMENT OF THE CENTRAL INTELLIGENCE AGENCY RETIREMENT ACT

A letter from the Director, Central Intelligence Agency, transmitting a draft of proposed legislation to amend the Central Intelligence Agency Retirement Act of 1964 for Certain Employees, as amended (with an accompanying paper); to the Committee on Armed Services.

SALES OF FIRM ELECTRIC POWER FOR RESALE

A letter from the Chairman, Federal Power Commission, transmitting, for the information of the Senate, a publication entitled "Sales of Firm Electric Power for Resale, 1965–1967" (with an accompanying publication); to the Committee on Commerce.

PROPOSED AMENDMENT OF TITLE 38, UNITED STATES CODE

A letter from the Administrator of Veterans' Affairs, transmitting a draft of proposed legislation to amend title 38, United States Code, to permit the furnishing of benefits to certain individuals conditionally discharged or released from active military, naval, or air service (with an accompanying paper); to the Committee on Finance.

REPORTS OF THE COMPTROLLER GENERAL

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on foreign aid provided through the operations of the U.S. Sugar Act and the International Coffee Agreement, Department of Agriculture, Department of State, Agency for International Development, dated October 23, 1969 (with an accompanying report); to the Committee on Government Operations.

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the effectiveness and administration efficiency of the Neighborhood Youth Corps program under title IB of the Economic Opportunity Act of 1964, Chicago, Ill., Department of Labor, dated October 24, 1969 (with an accompanying report); to the Committee on Government Operations.

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the effectiveness and administrative efficiency of the concentrated employment program under title IB of the Economic Opportunity Act of 1964, Los Angeles, Calif., Department of Labor, dated October 24, 1969 (with an accompanying report); to the Committee on Government Operations.

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the effectiveness and administrative efficiency of the concentrated employment program under title IB of the Economic Opportunity Act of 1964, Detroit, Mich., Department of Labor, dated October 27, 1969 (with an accompanying report); to the Committee on Government Operations.

REPORT ON RECEIPTS AND EXPENDITURES UNDER OUTER CONTINENTAL SHELF LANDS ACT OF 1953

A letter from the Assistant Secretary for Administration, Department of the Interior, reporting, pursuant to law, the receipts and expenditures of the Department in connection with the administration of the Outer Continental Shelf Lands Act of 1953; to the Committee on Interior and Insular Affairs.

REPORT OF PERSONNEL CLAIMS PAID BY THE VETERANS' ADMINISTRATION

A letter from the Administrator, Veterans' Administration, transmitting, pursuant to law, a report of the personnel claims paid by the Veterans' Administration during the fiscal year ended June 30, 1969 (with an accompanying report); to the Committee on the Judiciary.

PROPOSED AMENDMENT OF THE ATOMIC ENERGY ACT OF 1954

A letter from the Chairman, Atomic Energy Commission, transmitting a draft of proposed legislation to amend the Atomic Energy Act of 1954, as amended, to authorize the Commission to charge Federal agencies fees for the licensing of nuclear power reactors (with accompanying papers); to the Joint Committee on Atomic Energy.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the ACTING PRESIDENT pro tempore:

A resolution adopted by the township of Princeton, Mercer County, N.J., praying for the end of the war in Vietnam and to redirect all the resources to urgent domestic priorities; to the Committee on Foreign Relations.

REPORTS OF A COMMITTEE

The following reports of a committee were submitted:

By Mr. JACKSON, from the Committee on Interior and Insular Affairs, without amendment:

S. Res. 143. A resolution to refer the bill (S. 1343) entitled "A bill to relinquish and disclaim any title to certain lands situated in Yuma County, Ariz.", to the Chief Commissioner of the Court of Claims for a report thereon (Rept. No. 91–498).

By Mr. JACKSON, from the Committee on Interior and Insular Affairs, with an amendment:

S. 2062. A bill to provide for the differentiation between private and public ownership of lands in the administration of the acreage limitation provisions of Federal reclamation law, and for other purposes (Rept. No. 91–499).

EXECUTIVE REPORT OF A COMMITTEE

As in executive session, the following favorable reports of nominations were submitted:

By Mr. STENNIS, from the Committee on Armed Services: Brig. Gen. Ross Ayers, general of the line, Army National Guard of the United States, for promotion to major general; and

Col. Jackson Bogle, Adjutant General's Corps, Army National Guard of the United States, for promotion to brigadier general.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. TYDINGS (for himself, Mr. BAYH, Mr. BIBLE, Mr. EAGLETON, Mr. GOLDWATER, Mr. GOODELL, Mr. INOUYE, Mr. MATHIAS, Mr. PACKWOOD, Mr. PROUTY, Mr. RANDOLPH, Mr. SPONG, and Mr. HOLLINGS):

S. 3071. A bill to provide a comprehensive program for the control of drug abuse and drug related crime through improved law enforcement, strict regulation of the distribution of controlled drugs, and prevention, treatment, and study of drug abuse and drug dependence in the District of Columbia; to the Committtee on the District of Columbia.

(The remarks of Mr. TYDINGS when he introduced the bill appear later in the RECORD under the appropriate heading.)

By Mr. MAGNUSON (for himself, Mr. JACKSON and Mr. MUSKIE):

S. 3072. A bill to stimulate the development production, and distribution in interstate commerce of low-emission motor vehicles in order to provide the public increased protection against the hazards of vehicular exhaust emission, and for other purposes; to the Committee on Commerce.

(The remarks of Mr. MAGNUSON when he introduced the bill appear later in the RECORD under the appropriate heading.)

By Mr. MAGNUSON:

S. 3073. A bill to amend section 117 of the Internal Revenue Code of 1954 to exclude from gross income up to $300 per month of scholarships and fellowship grants for which the performances of services is required; to the Committee on Finance.

(The remarks of Mr. MAGNUSON when he introduced the bill appear later in the RECORD under the appropriate heading.)

By Mr. MAGNUSON (for himself and Mr. Moss):

S. 3074. A bill to provide minimum standards for guaranties covering consumer products which have electrical, mechanical, or thermal components, and for other purposes; to the Committee on Commerce.

(The remarks of Mr. MAGNUSON when he introduced the bill appear later in the RECORD under the appropriate heading.)

S. 3071—INTRODUCTION OF THE DISTRICT OF COLUMBIA COMPREHENSIVE DRUG ABUSE AND NARCOTICS CRIME CONTROL ACT OF 1969

Mr. TYDINGS. Mr. President, I introduce for appropriate reference, a bill, sponsored by myself, Mr. BAYH, Mr. BIBLE, Mr. EAGLETON, Mr. GOLDWATER, Mr. GOODELL, Mr. INOUYE, Mr. MATHIAS, Mr. PACKWOOD, Mr. PROUTY, Mr. RANDOLPH, Mr. SPONG, and Mr. HOLLINGS, en-

titled "The District of Columbia Comprehensive Drug Abuse and Narcotics Crime Control Act of 1969."

The ACTING PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 3071) to provide a comprehensive program for the control of drug abuse and drug related crime through improved law enforcement, strict regulation of the distribution of controlled drugs, and prevention, treatment, and study of drug abuse and drug dependence in the District of Columbia, introduced by Mr. TYDINGS, for himself and other Senators, was received, read twice by its title, and referred to the Committee on the District of Columbia.

Mr. TYDINGS. Mr. President, this legislation will create a comprehensive program to control drug abuse in the National Capital by strengthening criminal penalties against narcotics traffickers, applying realistic penalties and providing treatment for narcotics users, keeping drug addicts who commit crimes off the streets until they are no longer dangerous, and offering preventive programs.

That illegal narcotics traffic flourishes across the Nation today is a monument to the failure of existing drug laws to stop it.

Though the distribution and possession of narcotic drugs have been against the law for more than half a century, there is no indication that under present law the drug abuse problem will ever be controlled.

Illegal drug traffic is a most intricate system of transactions. It poses difficult and complex problems of law-enforcement officers. It involves both some of the most notorious kingpins of organized crime and the most uncriminal-like children of some of the Nation's most respected and trusted families.

Solving the drug abuse problem requires a comprehensive approach. Though there is a direct relationship between addiction to narcotics and crime, a drug addict cannot be treated the same as other criminals because extended incarceration does not reduce the likelihood of his returning to addiction and continuing to commit drug-related crime upon his release.

The National Capital might be expected to have developed model solutions to the problems of narcotics traffic and narcotics related crime. Unfortunately, it has not. In fact, the drug abuse crisis in Washington is a national disgrace.

In March and April of this year, my Senate Committee on the District of Columbia conducted oversight hearings on the drug crisis in the Washington area. In an additional day of hearings in June, the committee compared the efforts made in Baltimore to curb drug traffic with the efforts made here.

Those hearings painted a dismal picture of a drug abuse and drug-related crime crisis in the National Capital. I would like to relate some of the committee's findings:

Illegal narcotics traffic in Washington is increasing. Reliable estimates indicate that there are 10,000 or more drug addicts in the Nation's Capital. Drug abuse is increasing in both the low- and upper-income sections of the city.

The use of illegal narcotics is a principal cause of crime in the Nation's Capital and its metropolitan area. Between half and three-fourths of the serious crime in this area is drug related. Drug-related crime costs the law-abiding citizens of the metropolitan area upward of $30 million a year. There is absolutely no way an addict can secure money to buy drugs without resorting to crime.

Illegal drug traffic is clearly a metropolitan problem. The drug abuse problem is increasing in the suburban counties of Maryland and Virginia—and nearly all the illegal drugs flowing into those counties come out of the District of Columbia. In addition, suburban residents are continually victimized by narcotics addicts from Washington who come outside the city to commit drug-related crimes. If the suburbs are ever to be safe from drug abuse and drug-related crime, drug traffic in the District of Columbia must be controlled.

The illegal drug traffic—particularly the heroin traffic—feeds on itself. One of the principal ways heroin addicts make money to pay for their drugs is to sell drugs themselves. As a result, heroin addicts are constantly trying to hook new persons on drugs in order to increase the market for the heroin they sell. In some cases, addicts are known to give away drugs to nonusers in the hopes of hooking them.

Until the past few months, the police have been enforcing the narcotics laws more effectively against the minor violators than against the major traffickers. The result has been that marihuana-smoking youngsters and smalltime heroin pushers have felt the brunt of the enforcement efforts rather than the big-time dealers. When the new U.S. Attorney Thomas Flannery cracked a major narcotics ring 2 months ago, it had been 17 years since the last major trafficker had been arrested.

Many youngsters who experiment with marihuana are being led to experiment with heroin and other more dangerous drugs, often because the archaic laws on marihuana and more dangerous drugs result in one distribution system for all drugs.

Treatment of narcotics addicts by the Department of Public Health and in the criminal justice system has been wholly inadequate. The Health Department's sole drug treatment program, the Drug Addiction Treatment and Rehabilitation Center, is strictly an outpatient program and has been largely ineffective in its first year. Treatment for criminal addicts within the criminal justice system is virtually nonexistent. There is no program for pretrial treatment of drug addicts. Only 6 percent of the known addict prisoners in District of Columbia correctional institutions receive any kind of treatment at all for their addiction.

There is currently no protection for the law-abiding public from drug addicts who continuously commit crimes. Under current procedures, an addict arrested for a drug-related crime is immediately upon his arrest released back to the community to commit more crimes. Since the addict receives no treatment upon his arrest when he is released on bail or personal recognizance, he is still addicted and extremely likely to commit crimes to buy drugs. It is likely that several hundred addict criminals are freed each month to await trial.

District of Columbia officials have relied solely on law-enforcement efforts to control the narcotics and narcotics-crime problem, despite incontrovertible evidence that both a law-enforcement and treatment approach is needed. The District has ignored the conclusions of three Presidential Commissions that comprehensive treatment of criminal drug addicts is essential to reduce drug-related crime. In the words of the President's Commission on Crime for the District of Columbia:

> In view of the District's experience this Commission is persauded that a successful program of prevention and rehabilitation of drug addicts would contribute substantially to a reduction of serious crime.

The District's civil commitment statute is hopelessly outdated, and as a result is seldom used by prosecutors or the courts. The Federal Narcotic Addict Rehabilitation Act is not available for use by the court of general sessions and is too limited to be much use in treating addicts and combating drug-related crime.

No program has been developed for providing badly needed counseling and assistance in the area of drug addiction for law-enforcement, welfare, and vocational rehabilitation officials who encounter addicts and potential addicts every day in the course of their duties. The addiction problem is overwhelming all of our public agencies, with little or no effort to confront and deal with it.

The District has no education program about dangerous drugs for juveniles or adults.

There is no training program for lay professional workers in the field of dangerous drugs, in spite of the fact that it is a principal public problem in the District today.

Finally, the District of Columbia has no plan for dealing with the problem. No one knows where to begin, or what to do.

We can no longer afford to live with this national disgrace at the doorstep of our National Government. Every day we fail to enact a comprehensive narcotics program for the National Capital more persons are becoming addicted to narcotics and committing drug-related crime.

President Nixon's crime program for the National Capital contains nothing specific on the narcotics traffic or narcotics-related crime. Likewise, the Federal narcotics legislation sent to Capitol Hill by the administration contains no provisions to deal with the cancerous problem of drug-related crime.

I am introducing today the District of Columbia Comprehensive Drug Abuse and Narcotics Crime Control Act of 1969 to reduce both narcotics traffic and narcotics-related crime in the National Capital.

There are numerous reasons this legislation is vitally needed. First, it is

frightfully clear that existing narcotics laws simply have not worked. Despite the fact that existing laws have outlawed the use of dangerous drugs for more than 50 years, drug abuse today is more prevalent in America than ever before. Nowhere is that fact more clear than in the case of marihuana. Despite existing laws that make possession of marihuana illegal, it is estimated that as many as 10 million Americans have smoked marihuana, and it is acknowledged that a high percentage of high school and college age youngsters use it regularly.

Second, new legislation is needed because existing laws have failed to control the distribution and use of heroin—the drug that causes most drug-related crime—because they emphasize enforcement against drug users rather than against the traffickers. In other words, existing law hits as hard or harder at the victim of narcotics traffic as it does the perpetrators of this insidious activity. Legislation is sorely needed that puts the focus of law enforcement where it should be—on apprehending and convicting the major traffickers.

Third, new legislation is needed because existing District of Columbia law fails to provide strong enough penalties to deter major traffickers from engaging in illegal drug traffic. Current District of Columbia law calls for imprisonment of only 1 year for trafficking on the first offense and only for imprisonment up to 10 years on subsequent convictions of traffickers. Clearly, those penalties are insufficient to keep major traffickers out of the drug business.

Fourth, existing laws must be changed so they can deal more effectively with drug-related crime. They must, for example, be amended to permit the kind of comprehensive treatment for criminal addicts as recommended by three Presidential commissions. There is nothing in present drug laws—Federal or District of Columbia—to deal with the problem of drug addicts who commit drug-related crimes. For example, an addict who commits an armed robbery is likely, under existing law, to be returned to the streets still an addict and still in need of committing other crimes to support his habit.

My legislation is intended to make the approach to the drug abuse problem in the National Capital a model for the Nation.

Specifically, this legislation will strengthen the law enforcement and treatment efforts against narcotics in the National Capital.

The legislation will place major emphasis on narcotics law enforcement where it belongs—on the wholesalers and retailers who supply this area with drugs. In 1963, the President's Advisory Commission on Narcotics and Drug Abuse warned:

> The illegal traffic in drugs should be attacked with the full power of the federal government. The price for participation in this traffic should be prohibitive. It should be made too dangerous to be attractive.

The bill will make the price for trafficking drugs in the National Capital prohibitive.

Under this legislation, any person who is convicted of wholesale distribution can be sentenced to life in prison and fined an amount large enough to make him divest himself of his drug business. Just 2 months ago, U.S. Attorney Flannery indicted members of a major drug ring, including several underworld figures. Under the bill an underworld figure convicted of wholesale distribution of narcotics could be sentenced to life imprisonment and he would be mandatorily fined an amount large enough to divest him of any profits he made from drug traffic and any investments he made with those profits. In other words, if an underworld figure purchased a legitimate business with profits from his drug traffic, the court would have to fine him the value of that company.

Existing law makes the penalties for dealing in narcotics far less prohibitive. The Federal legislation proposed by the Nixon administration calls for penalties for distributing illegal drugs no harsher than those in the existing law that the Advisory Commission on Narcotics and Drug Abuse indicated were not strong enough to make participating in drug traffic "too dangerous to be attractive." Present penalties for distribution of either hard drugs or marihuana are on the first offense imprisonment of 5 to 20 years and a fine of $20,000 and on the second and subsequent offenses imprisonment of 10 to 40 years and a fine of $20,000. None of the alternative penalty schemes suggested by the administration for its narcotics bill increases those penalties for narcotics traffickers.

This legislation will give prosecutors and law enforcement officials additional investigative tools needed to stop narcotics traffic. In addition, it will give prosecutors and the courts flexibility in dealing with offenders they do not now enjoy. Specifically, my bill includes four provisions requested by the Metropolitan Police Department when police officials testified at our hearings. They are:

First. A provision that allows commitment of addict suspects to treatment before their release on bond.

Second. A "no knock" provision for officers in the confiscation of contraband drugs.

Third. A workable civil commitment procedure that will allow police to aid in the treatment and rehabilitation process.

Fourth. A provision to regulate the sale and use of gelatin capsules which are often used to package illegal drugs.

This legislation will deal directly with the problem of drug-related crime because, under my bill, an addict who commits a drug-related crime will be committed to treatment on the order of the U.S. attorney rather than released on bond or personal recognizance to prey on his community. Once committed to treatment, an addict will not be released from that commitment until he no longer poses a danger to his community.

Under the bill, an addict who commits an armed robbery, for example, could be detained for treatment before his trial. Then, if the judge so orders, he can be sent to prison to serve his sentence like any other felon who commits armed robbery. But the bill will allow the prosecutor and the judge option of committing the addict to treatment if they feel curing his addiction is the best way to prevent him from committing another armed robbery. If the treatment alternative is chosen, the addict will not be released from treatment until he is no longer dangerous. In other words, an addict can be held in treatment for the rest of his life if he continues to pose a danger to his community. A person detained under that bill can only be released when his medical officer decides, based on his record during treatment, that he is no longer dangerous or when the court orders his release based on the testimony of the medical officer and other witnesses.

The bill emphasizes the treatment of addict criminals. Unless we cure these sick people of their addiction, we can never expect them to stop committing crimes. I agree with the District of Columbia Crime Commission when it reported:

> In view of the District's experience this Commission is persuaded that a successful program of prevention and rehabilitation of drug addicts would contribute substantially to a reduction of serious crime.

This legislation will fill the treatment and rehabilitation void in the Nation's Capital. It recognizes that addiction, itself, is an illness that must be treated by medical professionals. The bill establishes a Bureau of Drug Abuse within the District government and authorizes it to develop immediately a comprehensive program of inpatient and outpatient treatment for addicts, including joint projects with the Department of Correction for inmate addicts. In addition, the bill creates a workable civil commitment procedure—something that has been badly needed here for more than a decade. And it will create an extensive drug education program to warn youngsters of the danger of experimenting with drugs.

The bill acknowledges the metropolitan aspects of the narcotics problem. There are specific provisions in my legislation requiring cooperation between the District and the Maryland and Virginia suburbs so that an areawide drug abuse program can be developed. Specifically, my bill will create a Drug Abuse Council with members from the District, Maryland, and Virginia to make sure the District's drug efforts are coordinated with those of the surrounding jurisdictions.

While under the bill, all dangerous drugs remain against the law, my legislation does differentiate among those drugs. I was disturbed during my recent committee hearings to hear witness after witness testify about the spread of heroin to high school and even grade school age youngsters. What disturbed me most was that several witnesses testified that because under present laws the penalties for using marihuana are as severe as the penalties for heroin, youngsters felt no particular risk in graduating from marihuana to heroin. Not only that but the present laws practically encourage a person selling even small quantities of marihuana to also sell heroin, since he risks no additional penalty.

Because in my view use of heroin is a far more serious habit and results in more dangerous antisocial behavior than does use of marihuana, the bill calls for

stiffer penalties for use of heroin than for use of marihuana. I want to make it clear: Marihuana is and should remain illegal and its use is still punishable under my bill by a criminal penalty, but a less severe penalty than for using heroin. I want to make every youngster who experiments with drugs aware that playing with heroin is considerably more dangerous to himself and to his community than experimenting with marihuana.

My view on this question is supported by both Dr. Roger Egeberg, the highest health official in the Nixon administration, and Dr. Stanley Yolles, the Director of the National Institute of Mental Health, the Government agency responsible for research on drug abuse. In his testimony before the Senate Subcommittee to Investigate Juvenile Delinquency, Dr. Yolles said:

I do not, at this time, advocate the removal of all restrictions on the use of marijuana. I believe that until we know more than we now do about the long-term effects of marijuana and other forms of *Cannabis* that use of the drug should continue to be controlled—Medically speaking, I cannot give it a clean "bill of health." But, penalties for its use should be lowered, in proportion to the danger and risk to the individual and society of this drug.

The bill recognizes that a high percentage of our high school age youngsters are experimenting with illegal drugs. I feel that these misguided youngsters should be discouraged from using drugs—and the greatest discouragement is a criminal penalty. Therefore, this legislation calls for a criminal penalty for every drug offense. But my bill contains a probation without verdict provision to give the judge an alternative to impose a criminal sentence on a first offender. If a judge feels jail is not the best way to deal with a drug offender, he can invoke the probation without verdict provision of my bill.

Probation without verdict is advantageous both to the defendant and to law-enforcement officers. It is advantageous to the defendant because it allows him to avoid going to jail and having a criminal record if he does not violate his probation. It is advantageous to law-enforcement officers because the defendant can be automatically put in jail if he violates the terms of his probation. In other words, a person given probation without verdict who continues to use drugs and gets caught can be sentenced to jail for his first offense.

My thinking of this subject is shared by others in the law-enforcement community. Every law-enforcement officer—policeman, prosecutor, or judge—who testified at my drug abuse hearings endorsed probation without verdict for first offenders. So did the President in the administration's narcotics bill. In fact, the probation without verdict provision in my bill is practically verbatim to that in the President's bill.

At the recent juvenile delinquency subcommittee, hearings, Attorney General Mitchell endorsed a flexible policy toward dealing with drug offenders. He said:

I personally believe in sentences which are reasonably calculated to be deterrents to crime and which also will give judges sufficient flexibility to tailor the sentences to the requirements of the drug violator or narcotic addict.

Prison is not the only logical alternative. In some cases, it may be advisable to use federal rehabilitation programs, halfway houses and private medical treatment while on probation or parole. Perhaps the most promising alternative is to approach the narcotics violator in relation to his function; the professional trafficker who should be given as severe a sentence as possible; the casual and intermittent user who is perhaps only experimenting out of curiosity; or the mentally or physically ill addict who, without additional help, cannot break a confirmed habit.

Expanding on the Attorney General's statement at that same hearing, John E. Ingersoll, Director of the Bureau of Narcotics and Dangerous Drugs, said:

The casual user or intermittent experimenter of drugs, usually of the non-addicting variety such as LSD, marijuana, and other hallucinogens, who, for a variety of reasons starts exploring the drug scene, is the second type of person that must be identified in any penalty structure. This type of person is far different from the professional criminal mentioned above. This is the group that is possessing, or giving away these drugs, usually among its own peer group. For these reasons the penalty structure should be more flexible and open-ended as these persons seem most likely to respond to rehabilitative efforts and the court should not have imposed on it rigid requirements. The penalties should be flexible enough to deter and, if deterrence fails, flexible enough to allow the judge, based on his observations of the defendant, to tailor the penalty to the nature of the crime and the person committing that crime. This type of person forms a major segment of the defendant population and for the penalties to be effective and rational, they must be geared to fit the punishment to this person with fairness.

I believe that this legislation is a most comprehensive and most progressive approach to the narcotics problem. I realize it encompasses new approaches to the narcotics problem. I, like the members of those three Presidential Commissions, think they will work. For too long we have sat back and watched old methods fail. Now is the time for action, not words—legislation, not messages. We must utilize the new methods and make an all-out effort to solve this old and evermore complex problem.

I ask unanimous consent that a section-by-section analysis and questions and answers about this bill be printed in the RECORD.

There being no objection, the section-by-section analysis and questions and answers, were ordered to be printed in the RECORD, as follows:

SECTION-BY-SECTION ANALYSIS—DISTRICT OF COLUMBIA COMPREHENSIVE DRUG ABUSE AND NARCOTICS CRIME CONTROL ACT OF 1969

TITLE I—FINDINGS AND DECLARATION OF PURPOSES

Section 101 relates that the Congress finds that drug abuse and illegal narcotics traffic are increasing in the District of Columbia, posing safety, health and welfare problems to the citizens of the District. This section also relates that the Congress finds that drug abuse is a metropolitan problem and that drug abusers commit a high percentage of the serious crime in the Washington Metropolitan Area.

Since drug dependence is an illness, properly treated by medical, health, welfare and rehabilitative services, the Congress finds the best way to decrease drug abuse is a combination of improved law enforcement against traffickers in controlled drugs and increased education, treatment and rehabilitation for drug dependent persons.

Finally, in this section, the Congress concludes that control of drug abuse requires a major commitment of health and law enforcement resources in the District, which has not been the case in the past.

In Section 102, the Congress declares that there shall be a comprehensive program for the control of drug abuse and drug-related crime in the District of Columbia through improved law enforcement, strict regulation of the distribution of controlled drugs, and prevention, treatment, and study of drug abuse and drug dependence.

Law enforcement will be aimed primarily at the major traffic of controlled drugs and the serious drug related crime. Drug dependent persons will be provided education, treatment and rehabilitation services under this act.

Those drug dependent persons who are likely to commit drug related crimes and constitute a danger to the public safety may be detained for treatment indefinitely, until such time as they no longer constitute a danger to their community.

Under this act, the Congress declares that all available law enforcement and health resources shall be brought to bear on controlling drug abuse and drug related crime in the District of Columia.

TITLE II—DEFINITIONS

Title II sets out the definitions that apply throughout the bill. They incorporate, or bring up to date, the definitions in prior or related Federal legislation.

A "controlled drug" includes any narcotic drug, marijuana, or any depressant or stimulant drug. Of particular importance, the definition of a "narcotic drug" and of "marijuana" are revised to bring them into line with the latest thinking of the National Institute of Mental Health and the Department of Justice's Bureau of Narcotics and Dangerous Drugs. The definition of a "depressant or stimulant drug", which includes all hallucinogens other than marijuana, is adopted by reference directly from the Federal Drug Abuse Control Amendments of 1965.

A "drug dependent person" is defined as any drug user who is so far dependent upon the use of a controlled drug as to have lost the power of self-control over the use of such drug. This is intended to include both physical addiction and psychological habituation. Whether a drug abuser has become dependent upon a drug will depend upon expert medical diagnosis in each individual case. A "drug-related offense" is defined to include both crimes committed by drug dependent persons to obtain funds to satisfy that dependence, and crimes committed while under the influence of a controlled drug.

The terms "courts" and "government attorney" are broadly defined to make it clear that the bill is intended to apply in both District of Columbia and Federal courts, and is to be enforced by both the Corporation Counsel's Office and the United States Attorney's Office.

The remaining definitions are routine, and are included primarily to make certain that there is no misunderstanding about the intended application of the bill's provisions.

TITLE III—REGULATION OF THE DISTRIBUTION OF CONTROLLED DRUGS

Title III establishes the legitimate and illegitimate channels of distribution for all controlled drugs, and the penalties for illegal distribution and use. Section 301 provides for the licensing of producers, manufacturers, and wholesale distributors of any controlled drug. Without such a license, no

person may engage in any of those practices. No such license may be granted without proof that the applicant has registered pursuant to applicable Federal laws. Upon such proof, a license will be issued for $10 per year. The Commissioner has the right under this section to suspend or revoke any license issued for failure to comply with the requirements of this Act.

Section 302 sets out the channels of legitimate distribution and possession of controlled drugs. Subsection (a) lists the persons to whom, and for what purposes, a controlled drug may be lawfully distributed. Subsection (b) lists the persons who may lawfully possess such a drug. Subsection (c) then provides that no person who may lawfully possess a controlled drug, other than an ultimate user, may divert it to his own personal use.

Section 303 specifies the conditions under which a controlled drug may be prescribed, administered and dispensed. This section provides that a pharmacist may dispense a controlled drug only upon the written prescription of a practitioner. As under Federal law, a prescription for any other controlled drug may be refilled no more than 5 times.

This section further provides that a physician or dentist may prescribe a controlled drug only in good faith in the course of his professional practice, within the scope of the patient relationship, and in accordance with treatment principles accepted by a responsible segment of the medical profession. Under this section a veterinarian may prescribe, administer or dispense a controlled drug in good faith in the course of his professional practice and not for use by a human being. This section also places stringent requirements on the dispensing of controlled drugs by pharmacists pursuant to a written prescription.

Section 304 allows for investigational use of controlled drugs in compliance with the requirements of federal law.

Section 305 prohibits the receipt of any controlled drug as a result of fraud or deceit.

Section 306 provides that every person who may lawfully possess a controlled drug except an ultimate user must keep certain records relating to the inventory and distribution of such products. Any loss or theft of these drugs must be reported promptly. The bill requires that these records be made available to law enforcement officers and that any such records that are to be made public must be divulged in such a way as not to reveal the identity of ultimate users of the drugs.

Section 307 contains prohibited acts and penalties.

Section 307(a) sets the penalties for the failure of any otherwise legitimate person to obtain a license for production, manufacture, or wholesale distribution of a controlled drug, or for distribution of gelatin capsules suitable for packaging a controlled drug as follows:

1. First offense is punishable by imprisonment of not more than 6 months or a fine of not more than $10,000, or both.

2. Second and subsequent offenses are punishable by imprisonment of not more than 2 years or fines not more than $40,000 or both.

Section 307(b) establishes five degrees of illegal trafficking and sets the penalties for each.

Trafficking in the first degree includes wholesale distribution of any controlled drug except marijuana and carries penalties as follows:

1. First offense carries a penalty of imprisonment for 5 years to life, at least a part of which must be served, and a fine without limitation of an amount sufficient to exhaust the assets utilized in and the profits obtained by the illegal activity.

2. Second offense carries a penalty of imprisonment for 10 years to life, at least part of which must be served, and a fine without limitation of an amount sufficient to exhaust the assets utilized in and the profits obtained by the illegal activity.

Trafficking in the second degree includes retail distribution of any controlled drug except marijuana and carries penalties as follows:

1. First offense is punishable by imprisonment for 2–20 years, at least part of which must be served, and a fine without limitation of an amount sufficient to exhaust the assets utilized in and the profits obtained by the illegal activity.

2. Second and subsequent offenses are punishable by imprisonment for 4–40 years, at least part of which must be served, and a fine without limitation of an amount sufficient to exhaust the assets utilized in and the profits obtained by the illegal activity.

Trafficking in the third degree includes persons under 26 who distribute small amounts of any controlled drug except marijuana for small remuneration as incidental to their own experimentation and not as a regular source of income or for the purpose of making another dependent upon the drug and carries penalties as follows:

1. First offense is punishable by required education, or imprisonment for up to 4 years, or a fine not exceeding $20,000, or any of these.

2. Second and subsequent offenses are punishable under the provisions for trafficking in the first or second degree.

Trafficking in the fourth degree includes any distribution of marijuana and carries penalties as follows:

1. First offense is punishable by imprisonment for 1–10 years, at least part of which must be served, and a fine without limitation of an amount sufficient to exhaust the assets utilized in and the profits obtained by the illegal activity.

2. Second and subsequent offenses are punishable by imprisonment for 2–20 years, at least part of which must be served, and a fine without limitation of an amount sufficient to exhaust the assets utilized in and the profits obtained by the illegal activity.

Trafficking in the fifth degree includes persons under 26 who distribute small amounts of marijuana for small remuneration as incidental to their own experimentation and not as a regular source of income and carries penalties as follows:

1. First offense is punishable by required education, imprisonment of not more than 1 year, or a fine not exceeding $2,000, or any of these.

2. Second and subsequent offenses are punishable under the provision for trafficking in the fourth degree.

Under a proviso in this section, any person who sells drugs only to feed his own drug habit, other than large distributors, shall be handled under the civil commitment procedures of this act, except that the court may in its discretion order the defendant to stand trial and sentence him to not more than six months in prison before his being civilly committed to custody with treatment for as long as he remains a danger to his community. The six months imprisonment provision is not applicable to persons who volunteer for civil commitment.

Section 307(c) provides the following penalties for any person who acquires a controlled drug in violation of this act and subsequently places it in legitimate channels of distribution:

1. First offense is punishable by imprisonment of not more than four years, or a fine not exceeding $20,000, or having his license revoked for not more than six months, or any of these.

2. Second and subsequent offenses are punishable by imprisonment not exceeding 10 years, or fines not exceeding $50,000, or having his license suspended or revoked, or any of these.

Section 307(d) establishes the penalties for illegal possession of controlled drugs for personal use and distribution of controlled drugs without remuneration.

Possession in the first degree includes possession of any controlled drug except marijuana and is punishable on the first offense by required attendance at a drug abuse school, imprisonment of not more than 2 years, or a fine not exceeding $10,000, or any of these.

Possession in the second degree includes possession of marijuana and is punishable upon the first and each subsequent offense by required attendance at a drug abuse school, or imprisonment of not more than 30 days, or a fine not exceeding $500, or any of these.

This section also provides that any person, except for a large distributor, in possession of a controlled drug in violation of this act for the purpose of his personal use to satisfy his drug dependence shall be handled only pursuant to the civil commitment procedures of this act.

Section 307(e) contains penalties for illegal prescription, administration, dispensing, or investigation of any controlled drug as follows:

1. First and second offenses are punishable by imprisonment not more than one year, or a fine not more than $5,000, or have his license revoked for not exceeding three months, or any of these.

2. Third and subsequent offenses are punishable by imprisonment of not more than 10 years, or a fine not exceeding $30,000, or having his license revoked for not more than five years, or any of these.

Section 307(f) provides penalties for the illegal receipt of a controlled drug by fraud or deceit as follows:

1. First offense is punishable by imprisonment for not more than one year, or a fine not more than $5,000, or both.

2. Second and subsequent offenses are punishable by imprisonment not more than two years, or a fine of not more than $10,000 or both.

This section provides that a drug dependent person, except for a large distributor, who illegally receives a controlled drug by fraud or deceit to satisfy his own habit shall be handled only pursuant to the civil commitment sections of this act.

Section 307(g) contains penalties for failure to maintain or permit inspection of records as follows:

1. The first offense is punishable by imprisonment for not exceeding two years, or a fine not exceeding $10,000, or having his license revoked for not exceeding one year, or any of these.

2. Second and subsequent of such offenses are punishable by imprisonment for not exceeding ten years, or a fine not exceeding $30,000, or having his license revoked for not exceeding five years, or any of these.

Section 307(h) contains the penalties for manufacture or distribution of a counterfeit controlled drug as follows:

1. First offense is punishable by imprisonment for not exceeding five years and a mandatory fine without limitation of an amount sufficient to exhaust the assets utilized in and the profits obtained by the illegal activity.

2. Second and subsequent offenses are punishable by a mandatory imprisonment of not less than five years nor more than thirty years, and a mandatory fine without limitation of an amount sufficient to exhaust the assets utilized in and the profits obtained by the illegal activity.

Section 307(i) sets out certain criteria for guiding the judge in determining the severity of any penalty to be imposed under Section 307. These criteria include:

1. The degree of potential harm to the user of the controlled drug involved.

2. The degree of potential harm to society as a result of the use of the drug.

3. In cases involving illegal distribution, whether the controlled drug was distributed to an experimenter or to an experienced drug abuser, and whether the distributor was part of an organized or professional system of distribution or operated independently.

This section also provides that the Bureau of Drug Abuse of the District of Columbia Department of Mental Health shall prepare a list of controlled drugs, broken down according to the degree of potential harm to the user and to society, for the guidance of the courts.

Section 307(j) provides that there will be no accumulation of penalty under Section 307 of this Act if more than one offense is charged.

Section 307(k) provides that any adjudication of violation or conviction under any related provision of law with respect to controlled drug, other than a juvenile violation, shall constitute a prior offense for purposes of this act.

Section 307(l) provides for the execution of any license revocation ordered by a court.

Section 307(m) provides that a defendant may be convicted of an offense under this Section if he knew that he was engaged in the prescribed act, but his knowledge that the act was a violation of the law is not required for his conviction.

Section 307(n) provides that imprisonment may be imposed for failure to pay a fine only when the offender has the funds and refuses to pay.

Section 307(o) provides that all fines collected under the criminal provisions of this act will be utilized for the treatment and rehabilitation services established under this act.

Section 307(p) authorizes periodic urine analyses as a condition upon which probation, parole, or other conditional release may be granted for a person convicted of an offense under this act. This provision states that neither a relapse into drug abuse nor the failure to conform to a set schedule for rehabilitation shall be sufficient, in and of themselves, to require that the persons' status must be revoked or treatment denied. This provision was requested by officials of the Department of Corrections to permit a flexibility in the treatment program, in accordance with rehabilitative objectives.

Section 307(q) provides that the "implements of crime" provision under present law would not apply if the only criminal activity that could be committed by using such implements would be one or more of the offenses set out in this act.

Section 307(r) calls for a court to hold a fair and full hearing without jury for the purpose of setting the amount of fines under the provisions of this section which call for unlimited fines.

Section 307(s) provides for probation without verdict, in the discretion of the court, for a first-time offender under the Act. Reasonable terms and conditions of probation may be imposed.

Section 308 provides for the regulation of gelatin capsules suitable for packaging any controlled drug. This section requires that a license be obtained for distribution of such capsules and records of that distribution must be kept in order to permit public officials to trace their use.

Section 309 provides that search warrants may be issued for the gathering of evidence involving the violation of sections of this act except with respect to the personal possession and minor marijuana distribution provisions. This section also contains a "no knock" provision, which permits the court, when good cause is shown, to authorize an officer to break down a door without previously announcing his presence if the property sought by the warrant is likely to be destroyed or disposed of, or if danger to the officer may result. This section also sets out the standard provisions of permitting an aggrieved person to contest the warrant and to have the property returned and have any damage repaired.

Section 310 provides for the agencies charged with the responsibility of enforcing the provisions of this act to cooperate with all other Federal and State officials charged with the regulation of the distribution of controlled drugs.

Section 311 provides for the expunging of criminal records upon a showing, after a specified period of time, that the individual involved has reformed his activities and has not engaged in further criminal conduct. This provision is retroactive. This section provides, however, that in the event the expunged conviction may be exceeded by another conviction, the expunged conviction will still count as a prior offense for purposes of any penalty to be imposed for that subsequent offense.

Section 312 provides a mechanism by which the government may require the testimony of any witness, or the production of any evidence, concerning a violation of this act, as a result of granting immunity. Any person who refused to give testimony after obtaining immunity would be in contempt of court and subject to a continuing court penalty.

TITLE IV—PREVENTION, TREATMENT, STUDY, AND CONTROL OF DRUG ABUSE

Title IV of the bill contains all of the prevention and treatment provisions. It represents a major change in emphasis with respect to the drug problem in the District of Columbia, and requires a correspondingly major allocation of public resources.

Section 401 establishes a Bureau of Drug Abuse Control in the District of Columbia Department of Mental Health. The Bureau is delegated full responsibility for all scientific, medical, treatment, and other related functions with respect to drug abuse in the District. The Bureau is also directed to coordinate all efforts to combat problems of drug abuse and drug dependence with the State and local governments in Maryland and Virginia.

Section 402 of the bill outlines the treatment and rehabilitation program of the Bureau. This aspect of the Bureau's program must include three types of treatment modalties: emergency medical care and withdrawal services, inpatient extended care services, and outpatient, intermediate care, and aftercare services. Persons assisted under the bill can be required to contribute toward the cost of the treatment.

The bill also provides that some of the Bureau's personnel may formerly have been drug abusers or drug dependent persons.

Section 403 of the bill relates to emergency medical care and withdrawal services.

Subsection 403(a) provides that any person who appears to be under the influence of a drug may be taken for emergency medical care services. The bill specifies such a person may be detained for purposes of involuntary withdrawal from drugs for no longer than ten days.

Once he has gone through withdrawal and is otherwise in control of his faculties, he is free to leave if no criminal charges are pending against him.

Subsection 403(b) deals with the person charged with a misdemeanor, who is either under the influence of a drug or taken into custody for what appears to be a drug-related offense. Once withdrawal is complete, the individual may be detained for a diagnosis for possible drug dependence, and possible civil commitment.

If the person is diagnosed as drug dependent, the government attorney will decide, with the recommendation of the medical officer, whether the person should be prosecuted, civilly committed, or permitted to follow voluntary treatment. If the person is not diagnosed as drug dependent, the government attorney, with the recommendation of the medical officer, will decide whether he should be prosecuted, or permitted to follow voluntary education and treatment for drug abuse. Even if he is prosecuted and convicted, he may still receive a suspended sentence, or be placed on probation for treatment, or civilly committed for treatment, rather than being criminally sentenced.

The bill provides that the medical officer shall make his recommendations to the government attorney at every stage of the decision-making process with respect to such an individual. In all instances, however, the government attorney has the ultimate decision, and can either accept or reject the medical officer's recommendation. Similiarly, the judge is free to accept or reject the recommendations made by the medical officer.

Subsection 403(c) contains similar provisions relating to a person taken into custody by the police for a felony who either appears to be under the influence of a drug or is charged with a drug-related felony. After any necessary withdrawal, he may be detained for diagnosis for possible drug dependence. If he is diagnosed as drug dependent, the government attorney, with the recommendations of the medical officer, must decide whether to institute civil commitment proceedings or to prosecute the criminal charges. If he is not diagnosed as drug dependent, the criminal charges are prosecuted, and if he is convicted, he may also receive treatment through civil commitment.

Subsection 403(d) provides that the government attorney shall institute involuntary civil commitment proceedings for short-term emergency medical care treatment pursuant to Section 406 whenever possible.

Subsection 403(e) provides that civil commitment proceedings for treatment for drug dependence should be instituted by the government attorney pursuant to Section 407 whenever appropriate under the provisos in Title III which states that a drug dependent person shall be handled under the treatment rather than the criminal provisions of the law. If the medical officer and the government attorney should disagree on the applicability of the proviso, however, the judgment of the government attorney shall prevail. Under these circumstances, the medical officer's report would also go to the court, which in many instances would be obligated under applicable case precedents to raise the issue of criminal responsibility *sua sponte*, or at least bring it to the attention of the defendant's counsel.

Subsection 403(f) makes certain that any police officer, government or defense attorney, court, probation officer, or parole officer must refer any person who appears to be under the influence of drugs for diagnosis. The medical officer must be given the complete records and all available information with respect to any person sent for diagnosis by a law enforcement officer.

Subsection 403(g) provides that the police shall make every reasonable effort to protect the health and safety of any person under the influence of a drug.

Subsection 403(h) provides that no entry shall be made on a person's arrest or other criminal record if no criminal charge is prosecuted against him.

Subsection 404 of the bill outlines the inpatient extended care services established under the Bureau's program. Admission for such services is in the professional judgment of the medical officer. Involuntary treatment may be required only pursuant to Sections 406 and 407 of the bill. If civil commitment is not instituted, voluntary treatment will be encouraged. No patient may be detained for inpatient services without his consent unless he is committed under the civil commitment procedure of this act.

Section 405 of the bill outlines the outpatient, intermediate care, and after-care services. The bill recognizes that a drug dependent person must be expected to relapse into drug abuse one or more times after the onset of therapy. Such relapses, without

more, need not result in any punishment, or elimination from outpatient treatment under this section. In some cases, where the prognosis for recovery of a drug dependent person is poor, emphasis may be given to supportive services and residential facilities so that they may live in a decent manner. In addition, under this section, all public and private, supportive community services will be part of the outpatient program. Except when under civil commitment, no person may be required to remain in the outpatient program.

Section 406 permits a court to order up to 30 days of emergency medical care services for a drug dependent person who, even after the withdrawal period, is in imminent danger of sustaining substantial physical harm and is not in a position to exercise a rational judgment about accepting assistance. Any such person must be released, without court permission, as soon as he is again able to make a rational decision about accepting assistance, and chooses to leave, unless he is charged with a criminal offense.

Section 407 of the bill sets out in detail the conditions under which civil commitment for involuntary treatment of drug dependence may be imposed upon drug dependent persons. Prior to any commitment under this section, the court must conduct a full and fair hearing without a jury.

There are two forms of commitment for treatment of drug dependence. The first relates to a person charged with an offense, who voluntarily requests treatment in lieu of criminal prosecution, or to a person who has already been convicted of an offense. For either of these persons, the court must find that he is a drug dependent person and that adequate and appropriate treatment is available for him. Commitment for this person cannot be longer than the sentence that could have been imposed, or actually was imposed. Voluntary treatment may be provided for as long as the medical officer believes warranted.

The second category of civil commitment for treatment of drug dependence relates to a person who is acquitted of a drug-related offense on the grounds of drug dependence, or is the subject of a civil commitment petition. In either of these cases, the court must find that he is a drug dependent person, that adequate and appropriate treatment is available, and that he constitutes an immediate and continuing danger to the safety of other persons or property. In either case, there is a limitation upon the maximum term of commitment.

Subsection 407(a)(3) provides that a person who volunteers for civil commitment shall be given preferential consideration for treatment over a person who chooses to stand trial and is convicted.

Consistent with the primary objective of protecting the public, the bill provides that no person shall fail to be committed, or shall be released, who continues to represent a substantial danger to other persons or property. Such persons shall be retained in custody until there is good reason to believe that they no longer represent such a danger.

The bill permits little possibility of abuse of the provision requiring detention of dangerous persons. Under the bill, every individual is entitled to intermediate care or outpatient status as soon as possible. It can be anticipated that an individual will have an opportunity to prove himself in this way long before the maximum period of commitment is up.

This section contains procedural safeguards with respect to committed persons. A committed person must be released immediately when he is shown to be rehabilitated. He is, moreover, entitled to a court review of his status every six months. He is entitled to appointed counsel, and retains all of his civil rights and liberties.

The bill emphasizes individualized treatment for committed persons, rather than routine and inflexible treatment. A specific treatment plan, adapted to each individual, must be prepared and maintained on a current basis.

Section 408 contains provisions under which a person who is dependent for his financial support upon a drug dependent person may obtain the appointment of a conservator to manage an estate. Before a conservator is appointed, the court must find that the petitioner is in fact dependent for financial support upon the person alleged to be incompetent, and that the person alleged to be incompetent is a drug dependent person who is in fact incompetent to manage his estate to the extent that the estate is likely to be substantially diminished.

Section 409 provides that a drug abuser or drug dependent person who has been adjudged mentally ill shall be governed by the provisions of the District's Hospitalization for the Mentally Ill statute. However, under this section, the services provided by this act will also be available to any mentally ill drug abuser or drug dependent person.

Section 410 provides that a person treated under the provisions of this bill retains his civil rights and liberties.

Section 411 sets out various provisions with respect to confidentiality of records. It provides that a person treated under the bill is entitled to the confidentiality of the physician-patient relationship, and therefore that no records may be disclosed without a court order, or used against him.

Section 412 permits the Commissioner to contract with other agencies to carry out the purposes of the bill. Such other agencies must provide proper and adequate facilities, services, and personnel.

Section 413 sets out a new drug abuse policy for highway safety. The section provides that rehabilitation shall be sufficient to justify issuance of a motor vehicle operator's license. A person convicted of driving under the influence of drugs is to be treated.

Section 414 provides that drug abusers among Government employees shall be treated rather than summarily punished by dismissal. The Bureau is given the responsibility for fostering drug abuse services in private industry.

Under this section, prior drug dependence is not sufficient to disqualify an individual for any governmental or private employment, or any professional or other license.

Section 415 requires the establishment of a drug abuse program in the Department of Corrections, and coordinates the work of corrections and Mental Health with respect to drug abuse in the District of Columbia. The bill gives the Bureau primary responsibility for establishing all such programs, and provides that the Department of Corrections shall cooperate in utilizing the Bureau's programs and services for correctional inmates and persons on probation and parole. The Bureau, in turn, will provide periodic reports to the Department of Corrections and probation and parole personnel so that these officials may keep abreast of the progress of the persons entrusted to the Bureau's care.

Section 416 establishes a drug abuse program for juveniles. Of particular importance, it requires an educational campaign among young school students designed to warn about misuse of drugs.

Under the bill, any juvenile drug abuser or drug dependent person is still subject to the jurisdiction of the District of Columbia Juvenile Court. The Juvenile Court is required to handle such persons in a manner consistent with the policy of the bill. The services established in the bill are, moreover, available to the Juvenile Court with respect to any particular case.

Section 417 makes the services of the Bureau available to all law enforcement officials in the District of Columbia. The Bureau will serve in a consulting capacity to all courts, and shall be available with respect to any cases involving drug abuse or drug dependence coming before the courts.

Section 418 provides for basically the same services for the Department of Welfare and Vocational Rehabilitation.

Section 419 requires that any health and disability plans offered for sale within the District of Columbia must cover drug dependence in the same way as other major disabling diseases. Funds for treatment of drug dependence will therefore become available from non-public sources.

Section 420 requires that all private hospitals must admit drug abusers and drug dependent persons for treatment without discrimination.

Secion 421 provides that the Bureau is responsible for the organizing and fostering of training of professional and non-professional workers in the field of drug abuse.

Section 422 requires the Bureau to establish a comprehensive public education program with respect to drug abuse.

Section 423 requires annual reports from the Bureau. These reports must specify the action taken and services provided under each provision of the bill. The Bureau may also submit additional recommendations and requests to the Commissioner and to Congress, whenever appropriate.

This bill will authorize the Bureau to obtain its own statistics in the areas of drug abuse and drug related crime, as well as to promulgate regulations specifying uniform statistics to be obtained and reports to be submitted by other public and private agencies.

Section 424 establishes a Drug Abuse Advisory Committee consisting of 9 qualified persons—5 from the District of Columbia, 2 from Maryland, and 2 from Virginia. The Committee will be charged with assisting the Commissioner and the Bureau in carrying out the provisions of the bill. It may establish its own technical consulting committees, and it shall remain independent of the Bureau and the District of Columbia Government. The purpose of this Advisory Committee is to make certain that there is an independent overview of the entire drug abuse program. The Advisory Committee shall employ a full-time executive director with a secretary to assist the Committee and coordinate its activities. They shall not be employees of the Bureau.

Section 425 establishes an Interdepartmental Drug Abuse Coordinating Committee within the District of Columbia Government. This Committee will be responsible for coordinating all District of Columbia efforts with respect to drug abuse and assisting the Bureau in coordinating its drug abuse efforts with those of Maryland and Virginia.

TITLE V—COMPREHENSIVE DRUG ABUSE AND DRUG DEPENDENCE CONTROL PLAN

Title V requires the development of a detailed and comprehensive drug abuse and drug dependence control plan for the District of Columbia to implement the bill.

Section 501 requires the plan to be developed within six months after enactment of the bill, and that it be revised and submitted to Congress annually. As soon as the plan is approved, this section requires all efforts to be directed toward implementing it.

Section 502 requires the Commissioners to consult with all public and private agencies in developing the plan. The plan must, moreover, specify how all of these public and private resources are to be utilized, and how District of Columbia efforts are to be coordinated with Maryland and Virginia efforts.

The Drug Abuse Advisory Committee, the Metropolitan Washington Council of Governments, and the National Institute of Mental Health will be requested to review a final draft of the complete plan, and any comments shall be given full consideration.

The plan must be coordinated with comprehensive health planning in the District of Columbia, pursuant to Federal statutes. All Federal funding will be utilized wherever possible.

The plan shall specify how District efforts will be coordinated with those of Maryland and Virginia.

TITLE VI—MISCELLANEOUS PROVISIONS

Title VI of the bill contains a number of miscellaneous provisions.

Section 601 authorizes promulgation of regulations, which will be subject to the requirements of the District of Columbia Administrative Procedure Act. It also permits the Commissioner to delegate his responsibilities under the bill.

Section 602 is a separability clause, in the event that a provision is declared invalid.

Section 603 repeals the prior criminal and civil law provisions relating to drug abuse and narcotics crime in the District of Columbia.

Section 604 amends two provisions to delete obsolete references to narcotic drugs.

Section 605 provides that the Act shall take effect 90 days after date of enactment, except that Title V—relating to a comprehensive plan—shall take effect immediately.

QUESTIONS AND ANSWERS—TYDINGS NARCOTICS BILL

1. Are drugs and crime related?

Narcotic drugs and crime are directly related. A high percentage of the serious crime in our cities today is committed by narcotic addicts in search of funds to buy drugs. The reason is obvious. To support a heroin habit may cost $50 or $75 a day. There is simply no other way for an addict to get that money without resorting to crime. As the President's Commission on Law Enforcement and the Administration of Justice reported:

"The price of the drug . . . is never low enough to permit the typical addict to obtain it by lawful means. So he turns to crime."

The National Capital is no exception. Testimony before the District Committee hearings on drug abuse revealed that up to three-fourths of the serious crime in the District is committed by drug addicts. A recent study by the D.C. Department of Corrections revealed that 45 percent of the inmates booked into D.C. Jail during the month of August showed up on a urine test as having used narcotics within 48 hours of their incarceration.

There is no doubt drugs and crime are related. As the President's Commission on Crime in the District of Columbia reported: "The law-abiding citizens of the District become victims of drug abuse as addicts shoplift, rob and burglarize to pay for their habit."

2. Why do we need any new narcotics legislation?

We need new narcotics legislation because the present legislation has *not* worked. Despite the fact that heroin has been illegal for more than half a century, and marijuana for nearly that long, there is more drug abuse now than ever before. Nowhere is that more clear than in the case of marijuana. Despite existing laws that outlaw possession of it, it is estimated that as many as 10,000,000 Americans have used marijuana and it is acknowledged that a high percentage of high school and college age youngsters smoke it regularly.

Existing laws, too, have failed to control the use of heroin, primarily because they emphasize law enforcement against the drug users rather than against the traffickers. In other words, existing law hits as hard at the victims of narcotics traffic as it does at the perpetuators of this insidious activity. What is sorely needed is new legislation that effectively focuses the law enforcement effort on stopping the major traffickers from distributing illegal drugs.

Also, existing laws deal ineffectively with the matter of drug-related crime. As long as there are narcotic addicts, there will be drug-related crime, and present law does nothing to cure addicts of their addiction. What is drastically needed, as the President's D.C. Crime Commission recommended, is legislation authorizing an effective treatment program within the criminal justice system. Only that way can addicts be rid of their habit and their necessity to commit more crimes.

Finally, existing laws must be changed in order to strengthen the criminal penalties against illegal narcotics trafficking in the District of Columbia. Under current D.C. law, trafficking is only punishable by imprisonment up to a year on the first offense and up to 10 years on the second. Such penalties are clearly inadequate to deal with major traffickers and must be strengthened. The Tydings bill will strengthen them.

3. Is the Tydings bill more comprehensive than existing drugs laws?

Yes. The Tydings bill is far more comprehensive than any existing federal or state drug legislation. No current piece of drug legislation deals with the problems of illegal drug traffic, drug related crime and rehabilitation of addicts as comprehensively as the Tydings bill.

4. Will the Tydings bill affect the existing federal laws on narcotics, like the Harrison Act?

No. The Tydings bill will in no way affect existing federal legislation, but will simply replace the inadequate existing narcotics statutes in the D.C. Code. After the enactment of the Tydings legislation, however, it is intended that the U.S. Attorney will utilize the new law rather than existing obsolete federal legislation.

5. Does the Tydings bill get at the major narcotics traffickers?

The Tydings bill hits directly at the major traffickers. In fact, the Tydings bill may be the strongest and most effective narcotics legislation ever written to get at the major trafficker. It is designed specifically to knock major traffickers out of the narcotics business.

In 1963, the President's Advisory Commission on Narcotics and Drug Abuse recommended:

"The illegal traffic in drugs should be attacked with the full power of the federal government. The price of participation in this traffic should be prohibitive. It should be made too dangerous to be attractive."

The Tydings bill adopts that philosophy. Specifically, it calls for sentences of up to life imprisonment for wholesale distribution of narcotics, even on the first offense. In addition, the bill requires the judge to fine any narcotics dealer, wholesaler or retailer, an amount great enough to exhaust his assets in the drug business and the profits he obtained from dealing drugs. That means, for example, if an underworld figure placed his profits from selling drugs into a legitimate campany, under the Tydings bill, the judge would mandatorily have to fine him the value of that company.

No current legislation makes the price so prohibitive for dealing in narcotics traffic.

6. How do the penalties of the Tydings bill compare with existing law?

The penalties in the Tydings bill will substantially strengthen the penalties in the law it will replace, the D.C. Uniform Narcotics Act. In fact, the penalties in the Tydings bill against narcotics trafficking are considerably stronger than existing federal law.

Here's how the Tydings bill penalties compare specifically to the penalties in the Uniform Narcotics Act. Under the UNA, trafficking of narcotics—whether hard narcotics or marijuana or wholesale or casual—is penalized on the first offense by imprisonment of not more than one year and a fine of $100 to $1,000. The second offense is penalized by up to 10 years in prison and a fine of $500 to $5,000. Possession of illegal drugs is subject to the same penalties under the UNA.

The Tydings bill will substantially strengthen the penalties for trafficking both hard drugs and marijuana under District of Columbia law. Under the Tydings bill, for example, trafficking of hard drugs will be subject to a penalty of up to 20 years in prison—or twice the existing law. In addition, in either case the trafficker would mandatorily be fined an amount large enough to exhaust the assets utilized in and the profits obtained by his drug traffic.

The Tydings bill also strengthens the penalty for possession of hard narcotics, making it punishable on the first offense by up to two years in prison—twice the existing law—and a fine up to $10,000. The only area where the penalty in the Tydings bill is less than existing D.C. law is for possession of marijuana for personal use, where the Tydings bill calls for a penalty of up to 30 days in prison and a fine of up to $500.

In the case of possession of marijuana, the Tydings bills is in complete accord with the ideas expressed by Dr. Roger Egberg, the government's highest medical officer, and Dr. Stanley Yolles, the Director of the National Institute of Mental Health, the agency charged with the responsibility of handling the health side of the drug problem. At a recent Senate hearing, Dr. Yolles testified on the subject:

"I do not, at this time, advocate the removal of all restrictions on the use of marijuana. I believe that until we know more about the long-term effects of marijuana and other forms of *Cannabis* that use of the drug should continue to be controlled—medically speaking, I cannot give it a clean 'bill of health.' But, penalties for its use should be lowered, in proportion to the danger and risk to the individual and society of this drug."

7. How about kids and others who simply experiment with drugs?

Under the Tydings bill, a person who experiments with drugs and has no previous record of involvement with illegal drugs would be eligible for probation without verdict—as he would be in the Nixon Administration Narcotics Bill—if the judge agrees to follow that course. In other words, in such a case, the experimenter would neither have to go to jail nor have a felony on his record for the rest of his life. It must be stressed, however, that it is left to the discretion of the judge. The judge has the option of imposing a criminal penalty or granting probation without verdict.

Probation without verdict is advantageous both to the defendant and to law enforcement officers. It is advantageous to the defendant because it allows him to avoid going to jail and having a criminal record if he does not violate his probation. It is advantageous to law enforcement officers because if the defendant violates his probation, he can still be sentenced for that offense. In other words, by granting probation without verdict the judge is giving the defendant a second chance. If the defendant muffs that chance, he can be sentenced to jail for that offense.

8. What does President Nixon think about penalties for drug offenders?

The Administration's narcotics bill as originally submitted to the Congress in July called for virtually the same penalties as the existing federal narcotics laws. On October 20, the Administration, through John E. Ingersoll, Director of the Bureau of Narcotics and Dangerous Drugs, suggested three schemes of alternatives to the penalties in the original bill.

All three of the Administration's alternative penalty schemes and its original bill call for softer penalties for drug traffickers than does the Tydings bill. Under the harshest of the President's alternatives, for example, a major trafficker arrested for the first time should be given only 20 years in jail and a $25,000 fine, even if he had been operating

for years and law enforcement officers had spent years trying to crack him. Under two of the President's suggested alternatives, a major narcotics wholesaler could get no more than 12 years in jail. Under the Tydings bill, a major supplier of hard narcotics could get up to life imprisonment and a fine large enough to knock him out of the drug business.

Concerning possession of illegal drugs for personal use, in the suggested revision to its narcotics bill, the Administration called for the first-possession offense of hard drugs and marijuana to be a misdemeanor. Thus, the newly proposed Administration penalties for possession of hard drugs are softer than those in the Tydings bill. Possession of marijuana is also a misdemeanor in the Tydings bill.

9. What do other government officials think of mandatory minimum sentences for people who experiment with narcotics, but commit no other crime?

Other top government officials have supported more flexibility in dealing with offenders of this type. At a recent Senate hearing, Attorney General John Mitchell expressed this view about sentencing narcotics offenders:

"Prison is not the only logical alternative. In some cases, it may be advisable to use federal rehabilitation programs, halfway houses and private medical treatment while on probation or parole. Perhaps the most promising alternative is to approach the narcotics violator in relation to his function; the professional trafficker who should be given as severe a sentence as possible; the casual and intermittent user who is perhaps only experimenting out of curiosity; or the mentally or physically ill addict who, without additional help, cannot break a confirmed habit."

Expanding on the Attorney General's statement at that same hearing, John E. Ingersoll, Director of the Bureau of Narcotics and Dangerous Drugs, said:

"The casual user or intermittent experimenter of drugs, usually of the non-addicting variety such as LSD, marijuana, and other hallucinogens, who, for a variety of reasons starts exploring the drug scene, is the second type of person that must be identified in any penalty structure. This type of person is far different from the professional criminal mentioned above. This is the group that is possessing, or giving away these drugs, usually among its own peer group. For these reasons the penalty structure should be more flexible and open-minded as these persons seem most likely to respond to rehabilitative efforts and the court should not have imposed on its rigid requirements. The penalties should be flexible enough to deter and, if deterrence fails, flexible enough to allow the judge, based on his observations of the defendant, to tailor the penalty to the nature of the crime and the person committing that crime. This type of person forms a major segment of the defendant population and for the penalties to be effective and rational, they must be geared to fit the punishment to this person with fairness.

10. Does this new bill provide for the treatment of drug addicts?

Yes. The Tydings bill provides, perhaps, the most comprehensive treatment of drug addicts ever written into legislation. It authorizes both inpatient and outpatient treatment for either short or extended periods. It authorizes treatment programs for addicts both inside and outside the criminal justice system. In addition, it puts into law an operative civil commitment procedure for narcotics addicts in the National Capital.

11. Does existing legislation provide any effective treatment?

No. There is a great void in the area of treatment of drug addicts in existing legislation. Present narcotics laws deal only with the criminal aspects of sale and possession and not with treatment. The federal treatment statute—the Narcotic Addict Rehabilitation Act of 1966—currently has only about 700 beds for addicts in the entire country. Prosecutors in both Washington and Baltimore have complained that it is difficult to get a person committed under NARA because the program is not large enough. Though there is a civil commitment law for the District of Columbia, it is inoperable and has seldom been used.

12. Why is treatment important?

Treatment of narcotics addicts is vital because it is one of our most powerful weapons in our war against crime. The D.C. Crime Commission reported:

"Federal and local laws must be revised so as to encourage treatment and rehabilitation. . . . Otherwise there is little hope of reducing illegal drug traffic or the significant amount of crime which it spawns."

There is no question that the failure to treat criminal addicts has contributed substantially to the escalating crime rate. If a criminal addict merely goes to prison and receives no treatment, he is almost certain to revert to drugs and crime as soon as he is released. That situation, in the words of the D.C. Crime Commission, "almost guarantees return to serious crime for such addict prisoners upon release."

The consequences of failing to treat criminal addicts were graphically described by Kenneth L. Hardy, Director of the D.C. Department of Corrections. at this spring's hearings of the Senate District Committee:

"We may hold these people for nine months on a misdemeanor charge, or five years on a felony charge. But within a few hours, or a few days, or a few weeks after release, they will have gone back to narcotics. We may punish them by locking them up, we may instruct them, or we may counsel them—individually or in groups. When we follow up later to learn how they have adjusted in the community, we almost invariably find that they have gone back to the needle, or the reefer, or the pill."

In addition to its importance as a weapon against crime, treatment is important because drug addiction is an illness and, as such, can only be cured by effective long-range treatment and rehabilitation.

13. How does the Tydings bill affect drug users who commit no other crimes?

Under the Tydings bill a drug user who is arrested for possession of an illegal drug would be committed to treatment for his addiction under the civil commitment procedures of the bill. In that way, the drug addict will not be released from commitment until he has been cured of his addiction that is likely to lead him to other crimes in the future.

14. How does the Tydings bill affect drug users who commit other crimes?

Under the Tydings bill, an addict who commits a drug-related crime will not be released from commitment until he is no longer a danger to his community. He can, at the option of the prosecuting attorney or the judge, either by treated as any other criminal case or be civilly committed for treatment.

Under the Tydings bill, as soon as a suspect is arrested who either appears to be a drug user or for committing a drug-related crime, he must be diagnosed immediately to determine if he is drug dependent.

If he is an addict, it is then up to the prosecuting attorney to decide whether he should face the criminal charge or be civilly committed to treatment. If the prosecutor decides to prosecute the charge, the judge then has the option upon a guilty finding of sentencing him to prison or ordering him civilly committed to treatment. The judge has the option also of placing him on probation on the condition he accepts treatment.

If he is committed to treatment, he will remain in treatment until he is no longer a danger to his community.

Also under the Tydings bill, the prosecutor may have an addict arrested for a drug-related crime civilly committed for treatment rather than released on bond while awaiting trial, so that he can be cured of the addiction that caused him to commit the crime in the first place.

15. Does the Tydings bill tie the hands of the police, prosecutors and judge?

No, in fact, the Tydings bill gives the police and prosecutors additional investigative tools needed to stop narcotics traffic. And it gives the courts much more flexibility than they now have in dealing with drug offenders.

Specifically, the Tydings bill includes four provisions requested by the Metropolitan Police Department when they testified before the District Committee this spirng. They are:

1. A provision that allows for the commitment of addict suspects to treatment before their release on bond.

2. A "no knock" provision for officers in the confiscation of contraband drugs.

3. A workable civil commitment procedure that will allow police to aid in the rehabilitation process.

4. A provision to regulate the sale and use of gelatin capsules which are often used to package illegal drugs.

The Tydings bill will aid prosecutorial investigations because it contains an immunity provision that will allow prosecutors to grant immunity to persons offering information about narcotics traffic. This has proved an invaluable tool in cracking narcotics conspiracies in the past.

The Tydings legislation generally gives law enforcement officials and the courts considerably more flexibility than any existing legislation in dealing with narcotics offenders. Under the Tydings legislation, prosecutors and judges will have options as to whether to deal with addict criminals through traditional criminal channels or whether to civilly commit them to treatment. In addition, the Tydings legislation gives the judge the flexibility to sentence a narcotics offender in accordance with the severity of his offense.

The flexibility in sentencing was a specific recommendation of the D.C. Crime Commission: "The mandatory sentencing provisions of the federal narcotics statutes should be revised to permit more flexible sentencing, especially for youthful offenders."

S. 3072—INTRODUCTION OF THE FEDERAL LOW-EMISSION VEHICLE PROCUREMENT ACT

Mr. MAGNUSON. Mr. President, I introduce, on behalf of myself and Senators JACKSON and MUSKIE, the proposed Federal Low-Emission Vehicle Procurement Act, a bill to stimulate the development, production, and distribution in interstate commerce of low-emission motor vehicles in order to provide the public increased protection against the hazards of vehicular exhaust emission, and for other purposes.

The air pollution problem in the United States has reached crisis proportions. We are all aware of air pollution's symptoms. Witness the flecks of dirt we smear from our faces, the choking fumes spewed at us by passing buses and cars, or opaque curtains of smog which shroud and blacken our skyscrapers. But these are only the symptoms of a problem which now seriously threatens the life systems of each and every one of us. Air pollution is a significant contributing factor to the rising incidence of chronic respiratory diseases—lung cancer, emphysema, chronic bronchitis, and asthma. In some sections of the country the problem has

become acute. For example, in a single year doctors in Los Angeles advised more than 10,000 to flee from the death dealing smog.

One of the great tasks for us in what remains of the 20th century is the control of air pollution. It will not be enough to stand still, to accept present levels. We must roll back the cloud of pollution and sharply reduce present levels. To do this, we must attack air pollution at its source.

What are the primary sources? Many people see smoke spewing forth from factories and mills, and point an accusatory finger. In my own State, the noxious odors emanating from various pulp mills permeate the nostrils and bring tears to the eyes. But ironically, the most obvious polluters are not the core villains—this, of course, does not suggest that such sources of pollution should not be brought under more stringent control.

Automobiles are the grossest villains in air pollution. They account for at least 60 percent of the total air pollution in the United States—as much as 85 percent in some urban areas. Each year vehicles which all of us operate spew over 70 tons of pollutants into the atmosphere; this is twice as much as any other single contributor. If air pollution is to be curtailed, dangerous emissions from automobiles must be substantially curtailed.

Some would have us believe that "the automobile industry has won the main battle against air pollution." In recent months all auto manufacturers have joined in making such claims. Let us look at the facts.

In the first place, it is rather presumptuous of the automobile industry to take credit for improvements in the air pollution problem. Not until State and Federal legislation forced them to bring the internal combustion engine under control in 1968 did they even start the fight, which has really just begun. Existing emission standards only require Detroit auto makers to control carbon monoxide and hydrocarbon emissions. A third type of pollutants, oxides of nitrogen, has not been controlled—although California has enacted emission standards for oxides of nitrogen beginning in 1971. Manufacturers presently control hydrocarbon and carbon monoxide emission by combusting fuels at high temperatures; this high temperature combustion reduces hydrocarbon and carbon monoxide pollution but increases oxides of nitrogen emission. The auto makers still are battling to bring oxides of nitrogen under control. At this time there is no guarantee that they will win that battle.

It is true that present automobiles produce far less pollution than their uncontrolled predecessors, but air pollution gains in many parts of the country will only be temporary. Total emissions may go from 80 million tons per year to 55 tons per year by 1980 before starting to climb again, but this overall reduction is not going to help such areas as the Pacific Northwest very much. For example, in the next 15 years the Northwest will experience a population growth of 40 percent, whereas the national average will be 20 percent. As suburbia sprawls out from the urban center, people will have to drive their cars more miles and consume more fuel, and the prospects for rapid transit in the immediate future are dim. The influx of people and their cars promises to wipe out in the Northwest any possible gains in vehicular air pollution.

What is the solution? We must find an automobile that does not pollute. Any new approach must be directed toward the development of a low-emission vehicle.

For almost 3 years the Senate Commerce Committee, in joint hearings with the Air and Water Pollution Subcommittee of the Public Works Committee, has been searching for a low-emission vehicle. In the spring of 1967 joint hearings explored the potential for electric cars. A year later hearings on steamcars were held. This March a comprehensive staff report entitled "The Search for a Low-Emission Vehicle" was published by the Senate Commerce Committee.

Some progress has been made. At the urging of the Senate Commerce Committee, the Department of Transportation has sponsored several steam bus demonstration projects. The Department of Health, Education, and Welfare has let a passenger car steam engine design contract, and Congress is about to authorize funds for additional research and development of low-emission vehicles and alternative fuels. But more must be done.

The automobile companies appear unwilling or incapable of transcending the internal combustion engine. They have announced that the main battle against automobile air pollution has been won, but this is not the case. The existing internal combustion engine may not give us the type of air we need or want. The time has come to launch a Government program which will stimulate the development, production, and distribution of low-emission vehicles. Hearings and sponsorship of research and development projects are not enough. Legislative action is necessary.

Therefore, today I propose the Federal Low-Emission Vehicle Procurement Act of 1969. Here is the bill's rationale: In order to foster the development, production, and distribution of low-emission vehicles, Congress should create a legislatively guaranteed market for innovative developers.

Here is how the legislation would work. A low-emission vehicle developer makes application to the Low-Emission Vehicle Certification Board composed of the Secretary of Transportation, Secretary of Health, Education, and Welfare, the Director of the National Highway Safety Bureau, the General Services Administrator, and a Presidential appointee. The Secretary of Health, Education, and Welfare determines whether the vehicle is a low-emission vehicle. For a passenger car such vehicle would probably have exhaust emissions in the range of 0.5 grams per mile of hydrocarbons, 11 grams per mile of carbon monoxide, and 0.75 grams per mile of oxides of nitrogen. The Board then determines whether or not the vehicle is suitable for use as a substitute for a class or model of vehicles presently in use by agencies of the United States. In making that determination it considers such things as the safety of the vehicle, its performance characteristics, its reliability potential, its serviceability, and its fuel availability. Any low-emission vehicle certified by the Board is then eligible for purchase if its procurement and maintenance costs are no more than 125 percent of the procurement and maintenance costs of the vehicle for which it can substitute. The General Services Administrator is required to purchase such vehicles in lieu of other vehicles if the costs are within the prescribed limitations.

The costs for this program will be minimal. In fiscal 1968 the Federal Government spent approximately $128 million for 46,430 buses, trucks, and ambulances and about $26 million for 15,706 passenger cars. If the Government were to start tomorrow and purchase only low-emission vehicles, the yearly add on cost could not exceed $35 million. Of course, the actual costs would be much lower, particularly during the early stages of procurement when few low-emission vehicles would be available. In my opinion, this is a small price to pay for curbing the air pollution epidemic and preserving a life-sustaining environment.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point a very thoughtful letter from the Administrator of the General Services Administration endorsing in principle the proposed legislation.

I also ask unanimous consent to have the full text of the bill printed in the RECORD following that letter.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

GENERAL SERVICES ADMINISTRATION,
Washington, D.C., May 16, 1969.

HON. WARREN G. MAGNUSON,
Chairman, Committee on Commerce, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: This is in reply to your letter of April 25, 1969, regarding proposed legislation for the procurement of low-emission vehicles.

The General Services Administration strongly endorses your proposed legislation for curbing pollution. Therefore, we are in accord with the philosophy that this legislation would most certainly foster independent and perhaps innovative development of low-emission vehicles and provide initial guaranteed markets for these vehicles in the Federal Government.

From the onset, with the publication of Federal Standard No. 515, Standard Safety Devices for Automotive Vehicles, promulgated by Public Law 88-515, August 30, 1964, we used the exhaust emission limits as well as the test procedures established by the State of California (California Test Procedure and Criteria for Motor Vehicle Exhaust Emission Control). Our detailed Federal Standard No. 515/14, Exhaust Emission Control System for Automotive Vehicles, is enclosed. We subsequently published a revised detailed Federal Standard No. 515/14a, Control of Air Pollution from Automotive Vehicles, dated July 15, 1966, also enclosed. In this revised detailed standard, we referred to the standard established by the Department of Health, Education, and Welfare, Control of Air Pollution from New Motor Vehicles and New Motor Engines, 45 CFR Part 85. However, this standard never became effective as we found it prudent to revoke Federal Standard No. 515 in its entirety on September 29, 1967 (Federal Reg-

ister, Volume 32, No. 189). This revocation was in favor of the issuances promulgated by Department of Transportation (DOT) for Motor Vehicle Safety Standards and the issuances on emission control by the Department of Health, Education, and Welfare.

For practical purposes, all of the motor vehicles purchased by the General Services Administration are procured on a competitive basis in accordance with Federal specifications which are under our cognizance. Our current passenger and applicable light truck vehicle specifications provide for positive crankcase ventilation as a means of controlling exhaust emission. However, all vehicles furnished the Government must, of course, comply with the standards issued by the Department of Health, Education, and Welfare. In our new proposed passenger and applicable truck vehicle specifications, which have been distributed to Federal agencies and industry for comments, we have specifically referenced the standard for emission control issued by the Department of Health, Education, and Welfare.

We are unable to furnish any additional information concerning the establishment of performance criteria and the cost framework in connection thereto with emission control performance standards for passenger vehicles and applicable light trucks since we accomplished no basic research in this area. We used the State of California criteria for our initial requirements followed by those standards issued by the Department of Health, Education, and Welfare as we indicated above.

The legislation requiring the Federal Government to procure low-emission vehicles contemplates that some additional costs would be involved in the procurement and operation of the motor vehicles. Since we are experiencing difficulty in obtaining passenger vehicles within the current statutory limitation imposed upon the procurement of sedans, any legislation which is developed should provide that procurements of low-emission vehicles may be made without regard to the existing statutory price limitations.

We would also suggest that your legislation specify the agencies which would be required to use these vehicles. Although the General Services Administration procures most commercial vehicles for use by the Government agencies, the specific and intended use of these vehicles remains with the requesting agency. It is our opinion that without specific statutory authority, it would be impossible for the General Services Administration to require an agency to accept any particular type of vehicle.

With regard to representation on the proposed Certification Board, we recommend representatives from the following organizations:

National Air Pollution Control Administration.

Department of Health, Education, and Welfare.

General Services Administration.

National Highway Safety Bureau, DOT.

State Governments.

In addition, we recommend that the responsibility for certifying these low-emission vehicles be assigned to the National Highway Safety Bureau in view of their current responsibility for certifying that passenger vehicles comply with the Federal Motor Vehicle Safety Standards.

We wish to thank you for the opportunity of reviewing this proposed legislation. If we can be of further assistance, we shall be pleased to do so.

Sincerely,

ROBERT L. KUNZIG,
Administrator.

The ACTING PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 3072) to stimulate the development, production, and distribution in interstate commerce of low-emission motor vehicles in order to provide the public increased protection against the hazards of vehicular exhaust emission, and for other purposes, introduced by Mr. MAGNUSON, for himself and other Senators, was received, read twice by its title, referred to the Committee on Commerce, and ordered to be printed in the RECORD, as follows:

S. 3072

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Low-emission Vehicle Procurement Act of 1969".

DEFINITIONS

SEC. 2. For the purpose of this Act—

(1) "Board" means the Low-emission Vehicle Certification Board;

(2) "Federal Government" includes the legislative, executive, and judicial branches of the Government of the United States, and the government of the District of Columbia;

(3) "motor vehicle" means any vehicle, self-propelled or drawn by mechanical or electrical power, designed for use on the highways principally for the transportation of passengers except any vehicle designed or used for military field training, combat, or tactical purposes;

(4) "low-emission vehicle" means any motor vehicle which produces significantly less pollution that the class or model of vehicles for which the Board may certify it as a suitable substitute.

LOW-EMISSION VEHICLE CERTIFICATION BOARD

SEC. 3. (a) There is established a Low-Emission Vehicle Certification Board to be composed of the Secretary of Transportation or his designee, the Secretary of Health, Education, and Welfare or his designee, the Director of the National Highway Safety Bureau in the Department of Transportation, the Administrator of the General Services Administration, and one member appointed by the President. The Secretary of Transportation or his designee shall be the Chairman of the Board.

(b) Any member of the Board not employed by the United States may receive compensation at the rate of $125 for each day such member is engaged upon work of the Board. Each member of the Board shall be reimbursed for travel expenses, including per diem in lieu of subsistence as authorized by law (5 U.S.C. 5703) for persons in the Government service employed intermittently.

(c) (1) The Chairman, with the concurrence of the members of the Board, may employ and fix the compensation of such additional personnel as may be necessary to carry out the functions of the Board, but no individual so appointed shall receive compensation in excess of the rate authorized for GS–18 by section 5332 of title 5, United States Code.

(2) The Chairman may fix time and place of such meetings as may be required.

(3) The Board is granted all other powers necessary for meeting its responsibilities under this Act.

CERTIFICATION

SEC. 4. (a) The Secretary of Health, Education and Welfare shall determine which models or classes of motor vehicles qualify as low-emission vehicles in accordance with the provisions of this Act.

(b) The Board shall certify any class or model of motor vehicles—

(1) for which a certification application has been filed in accordance with subsection (d) of this section;

(2) which is a low-emission vehicle as determined by the Secretary of Health, Education and Welfare; and

(3) which it determines is suitable for use as a substitute for a class or model of vehicles presently in use by agencies of the United States.

The Board shall specify with particularity the class or model of vehicles for which the class or model of vehicles described in the application is a suitable substitute. In making the determination under this subsection the Board shall consider the following criteria:

(1) the safety of the vehicle;

(2) its performance characteristics;

(3) its reliability potential;

(4) its serviceability; and

(5) its fuel availability.

(c) Certification under this section shall be effective for a period of two years from the date of issuance.

(d) (1) Any party seeking to have a class or model of vehicles certified under this Act shall file a certification application in accordance with rules established by the Board and published in the Federal Register.

(2) The Board shall publish a notice of each application received in the Federal Register.

(3) The Board shall determine whether or not the vehicle for which application has been properly made is a low-emission vehicle in accordance with procedures established by it and published in the Federal Register.

(4) The Board shall conduct whatever investigation necessary, including actual inspection of the vehicle at a place designated by the Board in the certification application rules established under this section.

(5) The Board shall receive and evaluate written comments and documents from interested parties in support of, or in opposition to, certification of the class or model of vehicle under consideration.

(6) Within 90 days after the receipt of a properly filed certification application, the Board shall reach a decision by majority vote as to whether such class or model of vehicle is a low-emission vehicle and is a suitable substitute for any class or classes of vehicles presently being purchased by the Federal Government for use by its agencies.

(7) The Board shall publish in the Federal Register, within 90 days after the receipt of a properly filed certification application, a report of its decision on such application which sets forth with particularity the reasons for granting or denying certification, together with dissenting views.

PROCUREMENT OF LOW-EMISSION VEHICLES

SEC. 5. Certified low-emission vehicles shall be acquired by purchase by the Federal Government for use by the Federal Government in lieu of other vehicles if the General Services Administrator determines that such certified vehicles have procurement and maintenance costs which are no more than 125 per centum of the procurement and maintenance costs of the class or model of motor vehicles for which they are certified substitutes.

WAIVER

SEC. 6. For the purposes of this Act any statutory price limitations shall be waived, and the procuring agency shall be required to purchase available certified low-emission vehicles which are eligible for purchase before purchasing any other vehicles for which the low-emission vehicle is a certified substitute.

APPROPRIATIONS AUTHORIZED

SEC. 7. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

EFFECTIVE DATE

SEC. 8. This Act shall take effect immediately upon signing by the President and the Board shall promulgate the procedures required to implement this Act within 90 days thereafter.

S. 3073—INTRODUCTION OF A BILL AMENDING THE INTERNAL REVENUE CODE OF 1954

Mr. MAGNUSON. Mr. President, I introduce today a bill which provides for the amendment of section 117(b) of the Internal Revenue Code of 1954. This amendment is to be effective for taxable years beginning after December 31, 1965.

This amendment is offered in hopes of correcting a misunderstanding that has existed since the original enactment of section 117 in 1954. I believe that Congress intended a relatively broad interpretation of "scholarships" and "fellowship grants" as used in section 117 so as to encourage a well-educated citizenry by excluding from ordinary income amounts which were within the meaning of these words. Instead, the Internal Revenue Service has given the words a narrow interpretation and hence many graduate students who are required to perform teaching, research, or other services as a condition to receiving financial assistance from educational institutions are being subjected to extreme financial hardship. These students and those faculty members who are in direct contact with them view the amounts received for performing such services as "scholarships" or "fellowship grants" irrespective of certain administrative regulations which necessitate performance of services.

The proposed amendment creates a presumption that minimal amounts are to be excluded from gross income as within the meaning of the terms "scholarship" or "fellowship grant" despite the fact that recipients are required to perform certain services. This will insure a broader interpretation of these terms and place the burden on the Internal Revenue Service to establish that compensation for teaching, research, or other services is truly amounts which are received as wages. Where degree requirements are such that teaching, research, or other services must necessarily be performed to qualify for the receipt, then all amounts received for so performing are to be excluded.

The ACTING PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 3073) to amend section 117 of the Internal Revenue Code of 1954 to exclude from gross income up to $300 per month of scholarships and fellowship grants for which the performance of services is required, introduced by Mr. MAGNUSON, was received, read twice by its title, and referred to the Committee on Finance.

S. 3074—INTRODUCTION OF THE CONSUMER PRODUCTS GUARANTY ACT

Mr. MAGNUSON. Mr. President, I introduce on behalf of myself and the Senator from Utah (Mr. Moss), for appropriate reference, the proposed Consumer Products Guaranty Act, a bill to provide minimum standards for guaranties covering consumer products which have electrical, mechanical, or thermal components, and for other purposes.

The philosophy behind this proposed bill is simple. When a manufacturer or retailer purports to guaranty the performance of a consumer product, he should, in fact, provide a meaningful assurance of performance. The manufacturer or retailer should not hide behind mountains of fine print which negate the very essence of a "guaranty." No maker of a guaranty should provide coverage for the replacement of a defective part which might cost $1 and charge the consumer $30 for the labor to replace it; and no maker should require a consumer to return a heavy appliance to a repair center in order to have it repaired "free of charge"; and no maker should disclaim all implied warranties while purporting to give the consumer an express guaranty of performance.

This bill would not force a manufacturer or retailer to guaranty a consumer product. He could sell it "as is," or he could sell a service contract instead of issuing a guaranty. But if the manufacturer or retailer did guaranty the performance of his product, he would have to stand directly behind that guaranty. He could not sidestep his apparent obligations by riddling the guaranty with page after page of fine print exclusions.

If the consumer is led to believe through a guaranty that manufacturer or dealer stand behind the product, then manufacturer or dealer should be required to do just that. Congress has often provided for the setting of minimum safety standards for hazardous products. In this bill we propose setting minimum standards of guaranty performance. The word "guaranty" has for too long been abused, twisted, and debased. Manufacturers and retailers must begin meeting consumer expectations they, themselves, have fostered.

This bill would require every manufacturer or retailer who guaranteed a consumer product to play by the same rules. No longer could a manufacturer or retailer offer the consumer a product with an illustory guaranty. By requiring everyone to play by the same rules—by imposing minimum guaranty standards—companies would have to compete with each other by lengthening guaranty periods, not by adding a few fine print exclusions or imposing several more burdens. Competitive advantage would accure to those companies producing the most reliable products, not those with the cleverest or most conniving legal draftsmen.

The Consumer Products Guaranty Act, then, could stimulate the "unplanning" of any planned obsolescence and could help focus America's engineering talents on product reliability. It would pay companies to produce more reliable products rather than concentrate on cosmetic frills.

The extent to which American manufacturers are concerned with such frills was brought home to me very vividly by an article which appeared in a recent issue of Time magazine. In that article automobile manufacturers were reported to be very concerned—almost preoccupied—with the sound or "thunk" that closing car doors make. In one instance a group of engineers stole a car from a plant, took it to a nearby field, and carefully listened with stethoscopes to the lingering vibrations accompanying each door slamming. One company's chief of body engineering was quoted as saying:

> There is very little to go on when you buy a car these days. If the glove box opens, the seats are soft and the doors *thunk*, that's all you have over the competition.

That same person employs 250 engineers to work on doors, and every year U.S. auto makers invest millions of dollars and countless man hours trying to produce the "thunk that sells." It is my hope that this proposed guaranty bill will redirect the production genius of U.S. manufacturers away from the "thunking" sounds of doors and toward enhanced soundness of functional design and performance reliability.

Let me discuss with you some of the specifics of the proposed bill. It covers consumer products which have electrical, mechanical, or thermal components—those things that "work" or "do not work." When a manufacturer or retailer makes any promise related to the performance of such a product, by operation of law he immediately is obliged to repair—or replace if repair is not possible or cannot be timely made—any malfunctioning guaranteed component, within a reasonable time, and without charge. The maker of a guaranty cannot impose any duty other than notification upon the consumer as a precondition of securing repair or replacement unless the maker can show that such a duty is reasonable.

Guaranty makers, of course, are afforded protection under the bill. If a maker can show that damage or unreasonable use caused any guaranteed component to malfunction, then he is excused from his duty to repair or replace the consumer product. But the burden of proof is on him; the consumer does not have to prove "no damage" or "reasonable use."

Under section 6 of the proposed bill, the use of the word "guaranty" is expressly reserved. No manufacturer or retailer can use the word "guaranty" to designate any promises except those relating to the performance of consumer products having electrical, mechanical or thermal components. A manufacturer or retailer of other products who wants to give the consumer assurances will have to use some other word such as "warranty." This provision in the proposed bill is designed to let the consumer know when the manufacturer or retailer is required by law to assure the performance of the product he is selling.

Section 12 of the proposed bill prohibits the maker of a guaranty from disclaiming implied warranties that normally accompany the sale of consumer goods. No longer can an express guaranty be used to deny the consumer rights which he would ordinarily have but for that guaranty.

To facilitate the operation of the proposed legislation, the Federal Trade Commission is given authority to issue trade regulation rules which will clarify guarantors' duties under the act. Any violation of such rules or other provisions of the bill are to be treated as violations of section 5 of the Federal Trade Commission Act, but action by the FTC is not the bill's exclusive enforcement tool.

Section 16 of the bill declares it to be the policy of Congress, "to encourage

guarantors to establish procedures whereby consumer disputes related to performance guarantees are fairly and expeditiously settled through informal dispute settlement mechanisms." Industry is encouraged to set up fair and responsive procedures for hearing and settling guaranty disputes. If such procedures are not available or if the informal procedures are unsuccessful in resolving the case, the consumer may seek redress of any alleged wrong by going to court. In order to make his recourse to court economically viable, a successful consumer plaintiff can recover the costs of prosecuting his case—including reasonable attorneys fees—through provisions in section 19 of the proposed bill.

In my opinion the legislative approach outlined above is desperately needed. Senate Commerce Committee correspondence files testify to the high level of consumer frustration generated by unreliable products guaranteed in name, but not in fact. A law requiring minimum guaranty standards will greatly relieve existing consumer frustration by providing meaningful guaranties—guaranties which will cause manufacturers to produce more reliable products.

The proposed legislation would also benefit those existing companies who now produce reliable products and stand behind them. No longer would a reputable firm have to compete on an apparently equal basis with those who hold out false assurances of performance to the buying public. Unguaranteed products could still be sold, but the consumer would know what he was getting. The $279 appliance without a guaranty might turn out to be more expensive in the long run than the $300 guaranteed product. Because of the proposed legislation, the consumer for the first time would be able to consider the product reliability cost factor when making his purchasing decision.

I look forward to participating with Senator Moss in hearings on this bill and welcome the constructive comments of my colleagues, consumers, industry representatives, and product reliability experts.

Mr. President, I ask unanimous consent to have the text of the bill printed in the RECORD at the conclusion of these remarks.

The ACTING PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 3074) to provide minimum standards for guaranties covering consumer products which have electrical, mechanical, or thermal components, and for other purposes, introduced by Mr. MAGNUSON, for himself and Mr. MOSS, was received, read twice by its title, referred to the Committee on Commerce, and ordered to be printed in the RECORD, as follows:

S. 3074

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Consumer Products Guaranty Act."

DEFINITIONS

SEC. 2. For the purposes of this Act—

(1) A "consumer product" is one normally used for personal, family or household purposes.

(2) An "electrical component" is one with an assemblage of parts which conducts a flow of electrons from one point to another in a predetermined manner in order to perform an intended function.

(3) A "mechanical component" is one with an assemblage of parts which transmits mechanical forces or energy from one point to another in a predetermined manner in order to perform an intended function.

(4) A "thermal component" is one with an assemblage of parts which conducts heat energy from one point to another in a predetermined manner in order to perform an intended function.

(5) A "malfunctioning component" is one in which the assemblage of parts is not properly transmitting mechanical, electrical, or thermal forces in a predetermined manner, and, therefore, not performing its intended function.

(6) The term "without charge" means that the guarantor(s) cannot assess the owner for any costs the guarantor or his representative incur in connection with the required repair or replacement of guaranteed components. The term does not mean that the guarantor must compensate the owner for incidental expenses unless such expenses were incurred because the repair or replacement was not made within a reasonable time or because the guarantor imposed an unreasonable duty upon the owner as a condition of securing repair or replacement.

(7) "Reasonable and necessary maintenance" consists of those operations which the consumer reasonably can be expected to perform or have performed which are necessary to keep any thermal, mechanical, or electrical component operating in a predetermined manner and performing its intended function.

(8) The term "replacement" shall include the refunding of the purchase price of the product less reasonable depreciation based upon use prior to malfunctioning if the guarantor is unable to effect replacement, or if the owner is willing to accept such refund in lieu of replacement or repair.

(9) An "express guaranty" is one created as follows:

(a) Any affirmation of fact or promise made by the seller to the buyer which relates to the consumer product or any of its components and becomes part of the basis of the bargain creates an express guaranty.

(b) Any description of the consumer product or any of its components which is made part of the bargain creates an express guaranty.

(c) Any sample or model which is made part of the basis of the bargain creates an express guaranty.

It is not necessary to the creation of an express guaranty that the seller use formal words such as "warrant" or "guarantee" or that he have a specific intention to make a guaranty, but an affirmation merely of the value of the goods or a statement purporting to be merely the seller's opinion or commendation of the goods does not create a guaranty.

DUTIES OF GUARANTORS

SEC. 3. In the sale of consumer products which are distributed in or which affect interstate commerce and which have electrical, mechanical, or thermal components, any express guaranty related to the performance of such products imposes upon the maker or makers of such guaranty the duties—

(a) to repair, or replace if repair is not possible or cannot be timely made, any malfunctioning guaranteed components,

(b) within a reasonable time, and

(c) without charge.

In fulfilling the above duties the maker shall not impose any duty other than notification upon owners as a condition of securing repair or replacement of a malfunctioning guaranteed component unless the maker can show that such a duty is reasonable. In a determination of whether or not the additional duty or duties are reasonable, the magnitude of the economic burden necessarily imposed upon the maker and purchaser shall be weighed against the magnitude of the trouble and annoyance caused owners of malfunctioning guaranteed products.

The above duties extend from the maker to the first purchaser and any subsequent owners for the duration of the guaranty period stated, or if no period is stated, for a reasonable time.

DEFENSES AVAILABLE TO GUARANTORS

SEC. 4. The duties enumerated in section 3 shall not be imposed upon the maker of any performance guaranty if the maker can show that damage or unreasonable use (including failure to provide reasonable and necessary maintenance) caused any guaranteed components to malfunction.

REQUIREMENTS OF WRITTEN GUARANTEES

SEC. 5. Whenever a guaranty described in section 3 is made in writing, the maker of the guaranty shall cause it to be labelled "performance guaranty" and shall cause the following information to be provided to the first purchaser prior to the time of purchase:

(a) The duration of the guaranty period measured either by time, or where practical, by some measure of usage such as mileage.

(b) Any reasonable and necessary maintenance required as a condition of the guaranty.

(c) The costs of such maintenance if required to be performed by a designated representative of the maker.

The maker shall also provide the following information to the first purchaser:

(a) A recital of the maker's duties to the purchaser or subsequent owners during the guaranty period.

(b) The step-by-step procedure which the owner should take in order to obtain repair or replacement of a malfunctioning guaranteed component.

(c) Any means available for quick informal settlement of any guaranty dispute.

(d) A recital that legal remedies are available to any owner if the guarantor has not fulfilled the terms of the performance guaranty.

(e) A recital that any consumer who successfully pursues his legal remedies may recover the reasonable costs incurred, including reasonable attorney's fees.

EXCLUSIVE USE OF THE WORD "GUARANTY"

SEC. 6. One year after the date of enactment of this Act, no guarantor shall characterize any promise or affirmation which relates to consumer products by the word "guaranty" unless such promise or affirmation relates to the performance of consumer products which have electrical, mechanical, or thermal components.

SEPARATE GUARANTY PERIODS

SEC. 7. Nothing in this Act shall prohibit the maker of a performance guaranty from assigning separate guaranty periods to separate components of a consumer product, provided that any varying coverages are clearly stated and reasonable in number.

PARTS WARRANTY

SEC. 8. Nothing in this Act shall prohibit the maker of a performance guaranty from warranting parts and not labor after the expiration of a performance guaranty period if that period is of reasonable duration.

SERVICE CONTRACTS

SEC. 9. Nothing in this Act shall be construed to prevent a manufacturer, distribu-

tor, or retailer who does not give a performance guaranty on consumer products which have mechanical, electrical, or thermal components from selling a service contract covering parts and labor to the first purchaser at the time of sale.

DESIGNATION OF REPRESENTATIVES

SEC. 10. Nothing in this Act shall be construed to prevent the maker of any performance guaranty from designating representatives to perform the duties required under this Act, but no such designation shall relieve the maker of his direct responsibilities to the consumer.

RELATION OF THIS ACT TO STATE LAW

SEC. 11. Except as provided by section 12, State law is not preempted by this Act.

SEC. 12. State law is modified to the extent that there may be no express disclaimer of implied warranties if any performance guaranty is given.

SEC. 13. Remedies for breach of implied warranties may be limited, liquidated, or contractually modified in accordance with applicable provisions of State law.

SEC. 14. Nothing in this Act shall be construed to limit implied warranties to durations coincidental with express performance guarantees.

FEDERAL TRADE COMMISSION

SEC. 15. (a) The Federal Trade Commission shall establish such trade regulation rules as it shall determine are necessary for implementing sections 2–10 of this Act.

(b) It shall be a violation of section 5(a)(1) of the Federal Trade Commission Act (15 U.S.C. 45(a)) for any person or corporation subject to the provisions of this Act to fail to comply with any requirement imposed on such person or corporation by or pursuant to this Act or to violate any prohibition contained in this Act.

(c) Nothing in this section shall be construed as impairing the rights of owners, to seek, individually or as a class, any remedy available for any breach of any duty imposed by law.

REMEDIES

SEC. 16. Congress hereby declares it to be its policy to encourage guarantors to establish procedures whereby consumer disputes related to performance guarantees are fairly and expeditious settled through informal dispute settlement mechanisms. Such informal dispute settlement procedures should be created by guarantors in cooperation with independent and governmental entities and should be supervised by some governmental or public body.

SEC. 17. Any owner, individually or as a class, may sue in any United States, State, or District of Columbia court of competent jurisdiction for any breach of a performance guaranty.

SEC. 18. The guarantor shall be liable to the owner for any breach of a performance guaranty and shall be under a duty to perform as required under this Act and to compensate the owner for all reasonable expenses incurred by the owner because of the guarantor's initial failure to perform.

SEC. 19. If any owner shall finally prevail in any suit or proceeding involving a performance guaranty, he shall be allowed to recover as part of the judgment a sum equal to the aggregate amount of cost and expenses (including attorneys' fees) determined by the court to have been reasonable incurred by such owner for or in connection with the institution and prosecution of such suit or proceeding.

EFFECTIVE DATE

SEC. 20. This Act shall take effect six months after the date of its enactment.

Mr. MOSS. Mr. President, I am pleased to join my distinguished colleague from Washington (Mr. MAGNUSON) in introducing the Consumer Products Guaranty Act, a bill to provide minimum standards for guarantees covering consumer products which have electrical, mechanical, and thermal hazards.

As chairman of the Subcommittee for Consumers of the Senate Commerce Committee I daily receive complaints from American consumers. Many letters often register consumer frustration—almost disgust—resulting from experiences with unreliable products whose guarantees are worthless or whose repairs are ineffectual. The following excerpt from a recent letter is typical:

MEQUEN, WIS.,
October 17, 1969.

DEAR SENATOR MOSS: The following is another "tale of woe" regarding shabby treatment of a consumer:

1. In April of 1966, we bought a new home, which, among other things, contained a new . . . dishwasher.

2. For two years, we gave this machine normal (two-three loads per day) usage and then it began to fall apart starting in April of 1968.

3. In the next 16 months, we had to pay for:

a. a new water valve
b. a new main control system
c. another water valve
d. a new safety switch for the door

Total cost $91.95.

So here we are with a three-and-one-half-year-old dishwasher, $112.94 in repairs, two rusting racks and a great sense of being "had."

Sincerely,

JAMES M. GUINAN.

The letters received are not of the "crank" variety. They are not from the poor and discontented by and large. In the last 3 weeks I have received two letters from irate owners of Cadillacs complaining about the problems they have been having with their recent purchases. One Cadillac owner enclosed a detailed time sheet showing how he had spent 30 hours over the last 3 months trying to get "an uncomfortable and distracting rhythmic vibration" out of his car. I wonder how much that time was worth to him?

The following excerpts from a letter written by a retired Army colonel are also instructive:

OCTOBER 7, 1969.

DEAR SENATOR MAGNUSON: Understanding that your esteemed committee plans to inquire into the subject of product warranties I beg to submit this brief report and documentation on my experience with a . . . warranty for your consideration.

When it is realized that the replacement cost of a picture tube amounts almost to one-half of the original cost of the set, and that the unit without a serviceable tube has no resale or turn-in value, the public risk seems disproportionate to the warranty . . . for only one year.

While I do not plead any such distressing impact, I do think that probably a large number of purchasers, who stretch family budgets to enjoy this refined entertainment, may be hopelessly subjected to a total loss of original investment by being unable to meet this enormous tube replacement cost . . .

Sincerely yours,

GAYLORD B. KIDWELL.

ARLINGTON, VA.

In my opinion, product reliability legislation is desperately needed to protect the consumer's rights. The American consumer has the right to purchase a reliable, high-quality product. Unfortunately, in today's society of planned obsolescence and elusive promises, no individual consumer is able to exercise that right.

"Let the buyer beware." That seems to be the attitude of manufacturers, even though they know full well that the typical consumer is in no position to evaluate the intricate maze of gadgetry involved in today's appliances, much less ascertain a product's reliability potential.

"If you want a more reliable product, pay more" these industrialists urge. Well, the recent recall of a batch of Rolls Royce cars certainly explodes the "pay more for reliability" myth.

Warranties and guaranties at the present time often mean nothing. They too often serve to limit rather than expand the obligations of manufacturer and retailer. Of course, honest disclosure in warranties and guarantees helps the situation, but more technical honesty in disclosure is nowhere near enough to protect the consumer. This is why I strongly support the Consumer Products Guaranty Act which standardizes guaranties so that no manufacturer or retailer can relieve himself of the fundamental burden of standing behind a guaranteed product.

For those who scream that such legislation would make the cost of many products prohibitive, I say let the consumer know the real cost of a purchase at the time he makes it. He is entitled to that in my opinion. A standardization of guaranties, in some ways, is the other side of the truth-in-lending coin. The consumer should know what the costs of the product he is purchasing are—not only should he know what his finance and interest costs are, he should also know how much product reliability will cost.

I look forward to participating in hearings on the bill introduced today by Senator MAGNUSON and cosponsored by me. I believe that such a bill—refined in the legislative process—is a consumer priority in the 91st Congress. I pledge that I will work hard to see that such legislation is given careful consideration.

SENATE CONCURRENT RESOLUTION 43—SUBMISSION OF A CONCURRENT RESOLUTION ON RED CROSS PRISONER OF WAR DECLARATION

Mr. McGOVERN. Mr. President, last month representatives of 77 governments and 91 national Red Cross societies attended the quadrennial International Conference of the Red Cross, in Istanbul.

On the agenda of the convention was a resolution proposed by the American society, urging a renewed commitment to the benefits and protections owing to prisoners of war under the Geneva Convention. The resolution was adopted unanimously, with the hope that all governments be thereby persuaded that the mistreatment of prisoners of war lends no support to the political and military causes they espouse.

Mr. President, this effort merits the strong support of the American people

and their elected representatives. We have a special stake in the international standards for treatment of prisoners of war.

Our military involvement in Southeast Asia has produced over 400 known American prisoners, with another 900 missing and believed captured. And, in violation of the 1949 Geneva Convention, the Government of North Vietnam has refused to provide the names of American prisoners and to permit the flow of mail between prisoners and their families.

This is a matter which has nothing to do with the wisdom of U.S. policies in Vietnam. No American, irrespective of his views on the war, can condone the North Vietnamese handling of prisoners of war.

With an emphatic endorsement of the Red Cross declaration, I think we can make it clear to Hanoi that their continued mistreatment of prisoners of war can only result in public contempt for North Vietnam and in a stiffened U.S. attitude toward possible negotiations or withdrawals.

To this end, I am submitting a concurrent resolution making it the sense of the Congress to approve and endorse the resolution adopted at the 21st international conference of the Red Cross.

The ACTING PRESIDENT pro tempore. The concurrent resolution will be received and appropriately referred.

The concurrent resolution (S. Con. Res. 43) which reads as follows, was referred to the Committee on Foreign Relations:

S. CON. RES. 43

Resolved by the Senate (the House of Representatives concurring), Whereas the 31st International Conference of the Red Cross has approved the following resolution: "Recalling the Geneva Convention of 1949 on the protection of prisoners of war and the historic role of the Red Cross as a protector of victims of war;

Considering that the Convention applies to each armed conflict between two or more parties to the Convention without regard to how the conflict may be characterized;

Recognizing that, even apart from the Convention, the International community has consistently demanded humane treatment for prisoners of war, including identification and accounting for all prisoners, provision of an adequate diet and medical care, that prisoners be permitted to communicate with each other and with the exterior, that seriously sick and wounded prisoners be promptly repatriated, and that at all times prisoners be protected from physical and mental torture, abuse and reprisals;

Requests each party to the Convention to take all appropriate measures to ensure humane treatment and prevent violations of the Convention;

Calls upon all parties to abide by the obligations set forth in the Convention and upon all authorities involved in the armed conflict to ensure that all uniformed members of the regular armed forces of another party to the conflict and all other persons entitled to prisoner of war status are treated humanely and given the fullest measure of protection prescribed by the Convention; and further calls upon all parties to provide free access to the prisoner of war and to all places of their detention by a protecting Power or by the International Committee of the Red Cross; and

Whereas efforts to improve treatment of prisoners of war merit support of all men of good will: Now, therefore, be it resolved by the Senate (the House of Representatives concurring), that it is the sense of the Congress of the United States that—

To approve and endorse the resolution adopted at the 21st International Conference of the Red Cross, to ensure humane treatment of prisoners of war.

TAX REFORM ACT OF 1969—AMENDMENTS

AMENDMENT NO. 254

Mr. MOSS. Mr. President, on behalf of myself and Senators CANNON, CRANSTON, DODD, GRAVEL, GURNEY, HARRIS, HART, HOLLINGS, HRUSKA, INOUYE, MAGNUSON, MATHIAS, MCGEE, MONDALE, NELSON, PACKWOOD, PELL, PROXMIRE, SCOTT, STEVENS, THURMOND, HARRISON A. WILLIAMS, YARBOROUGH, and STEPHEN YOUNG I submit an amendment to H.R. 13270, the Tax Reform Act of 1967, which should correct the unfairness of the withholding provisions toward students. This amendment will permit students to have their withholding rates set on the basis of their total expected income rather than the present formula which assumes that they will be employed full time the year round.

Many students, of course, are employed only during the summer, but their withholding rates are based on a year-round income. Thus many students have much more withheld from their paychecks than they will eventually owe in taxes. Yet they must wait until the next year before filing for a refund.

Many students need the money in the fall and should not, in any event, be forced, in effect, to "lend" the Government their money interest free.

To qualify under this amendment, a student would have to file a certificate with his employer certifying that he is a student. The certificate would also contain a statement of the student's expected total wages for the taxable year. The Secretary of the Treasury would have the authority to prescribe regulations concerning this certificate.

I ask unanimous consent that the amendment be printed in the RECORD.

The ACTING PRESIDENT pro tempore. The amendment will be received, printed, and appropriately referred; and, without objection, the amendment will be printed in the RECORD.

The amendment (No. 254) was referred to the Committee on Finance, as follows:

At the proper place insert the following new section:

"SEC. —. WITHHOLDING OF INCOME TAX IN THE CASE OF STUDENTS

"(a) WITHHOLDING BASED ON EXPECTED WAGES FOR TAXABLE YEAR.—Section 3402 (relating to collection of income tax at source) is amended by adding at the end thereof the following new subsection:

"'(n) SPECIAL RULE FOR STUDENTS.—

"'(1) WITHHOLDING BASED ON EXPECTED TOTAL ANNUAL WAGES.—In the case of an employee who—

"'(A) files with his employer a certificate that he will qualify as a student (as defined in section 151(e)(4) for his taxable year, and

"'(B) sets forth in such certificate the total amount of wages which he expects to receive from all employers during his taxable year,

the amount of tax required to be deducted and withheld under this section upon the wages paid by such employer to such employee for each payroll period during such taxable year shall be the amount which would be required to be deducted and withheld if the amount of wages paid by such employer for such payroll period were the payroll-period equivalent of the total amount of expected wages set forth in such certificate.

"'(2) CERTIFICATE.—A certificate filed under paragraph (1) shall be in such form and contain such information, and shall be filed subject to such terms and conditions, as the Secretary or his delegate may prescribe by regulations.'"

"(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply with respect to wages paid on or after the first day of the first month which begins more than 30 days after the date of the enactment of this Act."

AMENDMENT NO. 255

Mr. MCGOVERN (for himself, Mr. BURDICK, Mr. BAYH, Mr. NELSON, Mr. METCALF, Mr. YOUNG of Ohio, and Mr. MONDALE) submitted an amendment, intended to be proposed by them, jointly, to the bill (H.R. 13270) to reform the income tax laws, which was referred to the Committee on Finance and ordered to be printed.

CALIFORNIANS KILLED IN THE VIETNAM WAR

Mr. CRANSTON. Mr. President, between Monday, October 20, 1969, and Friday, October 24, 1969; the Pentagon has notified eight more California families of the death of a loved one in Vietnam.

Those killed were:

Sp5c. Allen B. Cecil, son of Colonel and Mrs. Thomas J. Cecil, of Edwards Air Force Base.

Pfc. Alan T. Gee, son of Mr. and Mrs. Richard H. Gee, of Baldwin Park.

Pfc. Dennis W. Kipp, son of Mr. and Mrs. Georgie Shoudy, of Fallbrook.

Pfc. Timothy E. Larmon, son of Mr. and Mrs. Elton W. Larmon, of Santa Paula.

Pvt. William A. Ruddan, son of Mr. and Mrs. Andrew W. Ruddan, of Dublin.

Sgt. Valentine B. Suarez, husband of Mrs. Virginia B. Suarez, of Vista.

Pfc. Clyde W. Van Valkenburg, Jr., son of Mr. and Mrs. Clyde W. Van Valkenburg, Sr., of Tulare.

Lt. Comdr. Paul E. Wall, husband of Mrs. Joan M. Wall, of Valley.

They bring to 3,847 the total number of Californians killed in the Vietnam war.

The ACTING PRESIDENT pro tempore. Is there further morning business?

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

FOUNDATIONS

Mr. CRANSTON. Mr. President, just a few years ago, our children and grandchildren were miraculously freed from the terrible scourge of polio that had

wracked and worried our own generation and centuries of generations before us.

Remember how relieved and thankful we parents and grandparents felt at the time?

Remember, too, how there were signs of relief among our children, who felt that one of the many, many threats to their sense of security had vanished?

And remember how we felt especially grateful to the young genius who developed the vaccine that had made the miracle possible?

But while we were thankful to Dr. Jonas Salk, he, in turn, was giving much of the credit for his success to philanthropy.

Dr. Salk told the Senate Finance Committee just this month that he was able to succeed only because of "the American system of private philanthropy." He said the foundation grants he received enabled him to work in ways "that would not have been possible" if private philanthropy did not exist and he either had to do without or depend solely on Government tax money.

Actually, he went even further. He said that, in many ways, Government was more of a hindrance than a help to him when he was engaged in the work that led to his great discovery.

Now Dr. Salk is engaged in new research in California that may lead to the conquest of cancer. This work, too, is being made possible only by philanthropy, through our American system of foundations.

Speaking of the achievements of others, Dr. Salk told the Finance Committee that private philanthropy and private foundations also provided the freedom and the funds that led to man's victories over yellow fever, influenza and measles.

Now this very American system of private philanthropy is under attack. Its future is seriously endangered by the tax bill recently passed by the House of Representatives and now before the Senate Finance Committee.

The bill contains many necessary reforms, but I believe there is reason for grave concern over the provisions dealing with charitable gifts and nonprofit, private foundations.

Fortunately, our Senate Finance Committee, under the leadership of its exceptionally able chairman, Senator RUSSELL LONG, has devoted a great amount of attention—considering the time pressures it is working under—to this aspect of the House bill. Happily, the Senate committee has modified the House provisions relating to the taxation of appreciated gifts to charity.

While the House version of the Tax Reform Act would require the inclusion of the appreciated value of a charitable gift in a taxpayer's income, the Senate Finance Committee would require that only half of the appreciated value of such gift be included in a taxpayer's income.

The committee also has removed gifts of future interest in property from the type of property to which the appreciation rules apply.

There are all too many proposals in the House bill that, ostensibly intended to help the taxpayer, would actually cost the American taxpayer a great deal of money while setting back a unique American tradition—private, charitable giving.

The pending tax bill constitutes a punitive rather than a reform approach to foundations.

Taxes should not be used for punishment. Nor should they be used to impose conformity of views.

I believe private foundations, as private enterprises, should not be unduly restricted. Foundations form an essential part of the private sector in a free society. Their growth and creativity should be encouraged by the Government, not thwarted.

National philanthropic institutions pioneer in the public interest in medical research, foreign area studies and foreign aid, population control, agricultural modernization, urban development and revitalization, and the ever-widening field of educational innovation and enrichment.

Government is unable to do much of what private foundations have done and can do.

In fact, foundations often finance projects which the public sector cannot, or should not—or sometimes even dare not—undertake at a particular time.

Undue, unwise restrictions on foundations could mean that much-needed work of a public nature would be left undone altogether.

The restrictions would also mean that Government—at the taxpayer's expense and at the cost of creativity and diversity—would soon be doing, within the scope of its limited abilities to do these things, some of the things now done and paid for by foundations.

The proposed tax of 7½ percent on foundation investment income would inevitably increase public dependence on direct Government support in areas where individual, family, and corporate foundations now contribute so much.

Foundations spend many millions of dollars every year on academic, scientific, and social advances, thus saving the Government vast sums.

But the less private money foundations can supply, the more public money will be required from Government.

All this is folly.

Thirty percent of foundation money today goes into higher education. Foundation matching grant projects have attracted huge private sums to the support of curriculum reform, science building construction, and higher faculty salaries.

Often the Federal Government itself has required matching grant money from private foundations before granting aid to universities and colleges.

But the Federal Government cannot bring about the change we need on the campuses of our Nation. The last thing we want is Federal interference and intervention in our schools. We know how likely it is that the following step would be domination of State and local education by Washington. Yet the new tax bill, by cutting off private funds from education, will result in greater demand on the Government for more money, and greater and greater dependency by education upon Washington.

Also hit, and hit hard, would be the already overburdened property owner who traditionally finances education at the State and local level. The California taxpayer already contributes a third of his tax dollar to education. How much more can we load on him?

A vast variety of services are now provided by voluntary charities to hundreds of thousands of orphans, emotionally disturbed and retarded children, the aged, individuals, and families needing counseling or medical attention. Charities support beneficial educational, cultural, and recreational activities. They work on behalf of civil liberties and the rights of minorities.

But 85 of the country's most generous philanthropists have told the Finance Committee that the tax bill would force them to cut their charitable donations in half.

What would happen then? Obviously, the burden of supporting charitable activities would shift from voluntary contributions to Government subsidies.

Charitable gifts should be encouraged, not discouraged. Tax incentives for philanthropy are not loopholes benefiting only the taxpayer. They reflect the American commitment to voluntary support of welfare, health, and educational programs.

Because they are discretionary expenditures, charitable contributions are constructive, unselfish acts of citizenship designed to help other human beings.

Taxing charities would not only add to the Government's financial burdens, it would severely reduce citizen participation in welfare programs. That would be a particularly unfortunate development at this time, when the administration is advocating, and community leaders across our land are seeking, increased voluntary citizen efforts in various activities at the local level.

The new tax bill also threatens a hallmark of our society—freedom and diversity—by stifling foundation experimentation and pioneering with the daring, the new, the imaginative.

The pending measure, for instance, would bar foundations from attempts to influence legislation directly or indirectly.

The foremost problem with this is the difficulty of defining what constitutes "influencing legislation." The proposed restriction is too broad, too uncertain, too vague. It raises substantial threats to first amendment guarantees of freedom to publish, to speak, and to petition the Government.

Prohibiting foundations from any attempt to influence legislation through an attempt to affect the opinion of the general public or any segment thereof could very well put out of business many eminent and worthy institutions that have measurably contributed over the years to political, economic, and social research which has wisely and constructively affected vital legislative decisions: Institutions like the world-famous Brookings Institution in Washington, D.C., or the Hudson Institute of New York, headed by Herman Kahn.

The citizens conference on State legis-

lators, funded by industrial foundations like Sears, Roebuck along with 12 private foundations like Ford, Carnegie, and others, has appreciably advanced the modernization of State government.

The California Legislature, for example, has taken the lead in implementing reform measures recommended by the conference. The conference has been the prime source of support for approximately 15 citizens' commissions seeking to strengthen their legislatures.

In 40 of our 50 States, the conference has built a constituency for legislative reform.

Much of its work involves marshaling public interest in reforms of State legislatures through press conferences, magazine articles, and reports.

The whole purpose of the conference is to strengthen government at the State level. The language of the House tax bill would presumably prohibit the work of the conference.

The Carnegie Foundation now sponsors a $210,000 project exploring how 13 cities in the San Gabriel Valley can share a complex, expensive computer system. Carnegie people met repeatedly with city officials to work out design and personnel training, and to advise them on problem solving.

Government simply does not have the money for this kind of experiment; foundations do. If the project works, it will establish a pattern for other cluster cities throughout the United States. Yet it may now be aborted as an attempt to influence public officials.

Public television is an important need in California, as it is throughout the country. Private foundation grants, especially from the Ford Foundation, have been vital to the experimental programming of educational television stations in Los Angeles and San Francisco.

This important project may have to be discontinued under the tax proposal.

Similarly endangered is NET's new "Children's Television Workshops," which will combine education and entertainment. Foundations conducted the research for this new approach to TV that will show no violence, and that will carry commercials designed to teach children the alphabet and how to count and reason logically.

This project, too, will be unlikely to survive if the present text of the tax measure is not changed.

If the foundations, in John W. Gardner's words, are instruments of "private initiative for the public good," the fine name and effectiveness of the majority of those who diligently carry out their mandate must not be undermined by the few who betray their trust through bad management or unscrupulous exploitation of personal tax advantages.

The Government should keep an eye on what foundations do, of course.

The Nixon administration has recommended a 2-percent supervisory charge to finance tightened Government audits and regulations of foundations. This is a reasonable regulation. It would do no damage. In fact, it could be invigorating. I believe most foundations will favor, and will benefit from, a form of better auditing by the Internal Revenue Service.

Government monitoring is completely compatible, however, with self-policing by the foundations, along with referral to Government agencies of any foundations found in violation of the law.

Potentially of great value, too, would be the denial of public accreditation to a foundation failing to satisfy codes of ethics and procedures established by the foundations themselves, working together.

Such a code, first recommended 5 years ago by Mr. F. Emerson Andrews, then president of the Foundation Center, would oblige all foundations to make full public disclosure of their assets and activities. Many major foundations already are doing this. Some do not. All should.

This policy would strike at shoddy management of foundation funds. It would expose profiteering and personal aggrandizement through improper or badly supervised grants.

The accreditation system has long been applied with considerable success to the Nation's schools, colleges, and universities. There have been flaws, of course. But imperfections are inevitable in any policing system, whether private or public.

Surely, in the long run, continuing scrutiny by a better informed public plus self-policing by a joint committee of well-informed foundation experts and independent, public-spirited citizens can best assure foundations that their record of contributing so much to social progress will not be spoiled by selfish, fraudulent defilers.

Some people have likened foundations in our society to army scouts who probe unfamiliar territory and thus protect the main body of troops from the dangers of plunging blindly into the unknown, and perhaps suffering great loss.

I like to think of foundations as a form of philanthropic federalism, testing, probing, experimenting, scouting out untried ground so the rest of us might safely follow.

It would be a serious mistake, indeed a terrible loss, if, because of the sins of a few, we were to punish all foundations.

We need them too much for that.

The stakes are very high.

To dampen nonprofit foundation initiative could seriously threaten the autonomy, vitality, and quality of the controversial and often risky tasks of searching for an unknown truth, of helping others help themselves at home and abroad, of unlocking the mysteries of medical science, and of training each oncoming generation to build a stronger, more far-reaching society.

DECLARATION THAT CERTAIN FEDERALLY OWNED LANDS ARE HELD BY THE UNITED STATES IN TRUST FOR THE INDIANS OF THE PUEBLO OF LAGUNA

Mr. MANSFIELD. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on S. 210.

The legislative clerk laid before the Senate the amendment of the House of Representatives to the bill (S. 210) to declare that certain federally owned lands are held by the United States in trust for the Indians of the Pueblo of Laguna, which was, on page 4, line 6, strike out "while" and insert "which".

Mr. MANSFIELD. Mr. President, on August 13, the Senate passed S. 210, declaring that the United States holds approximately 1,016 acres of excess federally owned land in trust for the Laguna Pueblo in New Mexico.

In the printing of the bill as reported to the Senate, a typographical error was made on page 4, line 6, the word "which" being printed as the word "while". This printing error was noted by the House, and the correction has been made. This in no way alters the bill, its intent, or its purpose, and I move that the Senate concur in the House amendment.

The motion was agreed to.

ORDER OF BUSINESS

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

PROGRAMS OF IMMUNIZATION AGAINST GERMAN MEASLES

Mr. KENNEDY. Mr. President, last week the Senate unanimously approved S. 2264, the Communicable Disease Control and Vaccination Assistance Amendments of 1969. The bill is a measure of major significance in our continuing efforts to eradicate infectious disease from the Nation, and I am hopeful that it will soon be enacted.

One of the important factors behind the strong support for the bill in the Senate was the awareness of the need for additional Federal financial assistance for an intensive immunization campaign against rubella, or German measles as it is commonly called.

In recent months, medical experts have increasingly warned of the prospect of an epidemic of German measles in 1970, 1971, or 1972. Today in the United States, it is estimated that 50 million children and women of child-bearing age are unprotected against this disease. Unless a massive nationwide immunization is undertaken at the earliest opportunity, thousands of American children will be born blind, deaf, or with severe heart disease or mental retardation because their mothers contracted the disease during pregnancy.

Mr. President, yesterday the Washington Post published a significant article written by William Hines, of the Chicago Sun Times, on the current state of our preparations to combat the anticipated German measles epidemic. Mr. Hines reports that in most parts of the United States preparations are being hindered because of lack of funds in the current fiscal crisis. I am pleased to note that the District of Columbia is one of the few places in the Nation where an

adequate immunization program is underway, but I am distressed to hear that at this late date preparations are inadequate in many other parts of the Nation.

Mr. President, the communicable disease control and vaccination assistance amendments recently approved by the Senate are designed to provide the sort of Federal assistance that is needed if our vaccination campaign against German measles is to be successful. I believe that Mr. Hines' article helps to demonstrate the need for such legislation. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

GERMAN MEASLES MAY RAMPAGE

(By William Hines)

Thousands of American women may bear dead, deformed or retarded children in 1972 because a nationwide immunization campaign against rubella ("German measles") is not getting off the ground, except in a few states, New York City and the District of Columbia.

Plans to vaccinate an estimated 40,000,000 children between now and early 1971 have been shelved, and public health officials who a year ago sounded alarms about the consequences of another rubella epidemic like that of 1964 are now applying the soft pedal.

An estimated 20,000 babies were born with brain damage and at least an equal number were crippled or stillborn after their mothers contracted rubella in the early months of pregnancy during the outbreak. Health authorities had hoped to avert or at least blunt the effects of the next big epidemic of this cyclic disease in 1971 through an immunization campaign equal in scope to that against polio.

A vaccine was cleared for use by the U.S. Public Health Service earlier this year after a series of tests, trials and scientific huddles carried out in an atmosphere of urgency. Then—just about the time the first big push for mass vaccinations should have begun at the start of the fall school term—things started to slow down.

The basic reason seems to be the economy drive that is touching virtually all non-military echelons of the federal government, although administration officials deny that this is the case.

Dr. James H. Cavanaugh, assistant secretary for health in the Department of Health, Education and Welfare, even denies that the program is slowing down. "I think it's moving right along," Cavanaugh said this weekend. "We're going along right on schedule."

But subordinates responsible for carrying out the immunization program acknowledge that it is lagging and that money is at the root of the problem. An official of the Public Health Service's National Communicable Disease Center was asked whether financial restrictions were not posing an otherwise avoidable peril to thousands of children yet unborn.

"I don't think you can argue with that," he replied. "It's obvious that if you had the money you could do a whole lot to cut way down or even eliminate rubella."

Because of the insidious way German measles works on the unborn, a strategy was carefully devised to wipe out the "pool of infection" carried by pre-school and school-age children. Women of child-bearing age and adolescent girls old enough to conceive would not receive the vaccine.

Guidelines to this effect were distributed to health agencies and private doctors throughout the United States, and all indications were that the federal Public Health Service would follow through with a massive educational campaign like that organized by the National Foundation Against Polio in the 1950s and early '60s.

This educational barrage has not materialized, however, and expenditures that the Public Health Service hoped last year might top $50,000,000 have been held below $20,000,000.

"We couldn't spend $50,000,000 if we had it," Cavanaugh now asserts. "There isn't nearly the amount of vaccine we would need, we haven't got the personnel to administer it, and anyway this isn't something where you can line up kids and distribute it like Sabin vaccine in a sugar cube."

Precisely the things that Cavanaugh now says could not be done were being planned a year ago, with the difference that the vaccine would be administered subcutaneously by pressure gun rather than orally.

As far as availability of vaccine is concerned, there is also controversy. The drug industry says it could produce all the vaccine needed for a 40,000,000-unit campaign over the next 18 months, if only the government would issue additional licenses.

The only approved vaccine at present is prepared by Merck, Sharp and Dohme from virus grown on duck embryo. M, S and D has a production schedule of 18,000,000 doses by May, 1970, with a monthly production rate of 2,000,000 doses thereafter. By the end of 1970 at this rate this single supplier could turn out 80 per cent of the vaccine needed for the campaign.

The other drug makers stand ready to produce vaccine as soon as another type nurtured on dog kidney is licensed. One of these, Philips Roxane Laboratories, is said to have a production capacity equal to Merck, Sharp and Dohme's.

The federal government has acquired only 1,200,000 doses to date and apparently has decided to let private doctors have first crack at the vaccine.

This will help individual families to pay for shots, but will not go far toward giving the kind of protection the rubella vaccine is intended to give. Not children now living but their unborn brothers and sisters are the principal beneficiaries of rubella immunization.

In the view of most public health experts, the only way to wipe out rubella is through a universal, free program of shots. Doctors will probably charge $10 for an office visit with rubella immunization; even a large medical co-operative here with 50,000 members says it must charge $4.10, a price many low-income families cannot afford.

According to drug industry sources, only four states and two cities have "full-fledged programs" to immunize children against rubella. These are New Hampshire, Michigan, Massachusetts, New Jersey, New York City and Washington, D.C. In all these jurisdictions, including even the national capital, federal funds have provided only partial support.

The District Public Health Department will begin vaccinating kindergarteners through sixth graders in public and parochial schools Nov. 3. The Merck vaccine will be administered in the upper arm by jet injection. It is expected that at least 80,000 children will be immunized during a three-week period.

Evening clinics will be opened later to permit parents to bring children from one year to pre-school age for vaccinations. The health department allocated $100,000 and personnel for the program. The U.S. Public Health Service added $50,000 to purchase vaccine.

Virginia families will have to wait for free shots or else patronize private physicians. The whole state's allotment would barely cover all the children living in Northern Virginia alone, an Arlington health official explained.

Maryland is in a similar situation. With about 300,000 kindergarteners through third graders the state has an allocation of only about 70,000 doses of vaccine. It is being left up to individual counties to finance the purchase of additional vaccine.

Because of the mobility of the American people, most specialists in epidemic-fighting believe it is impossible to stamp out a national scourge with piecemeal statewide or regional programs.

To date the federal government has allocated $19,200,000 for the rubella campaign and has earmarked $6,800,000 more that will become available when and if Congress appropriates it.

THE OCEANS, MAN'S LAST GREAT RESOURCE

Mr. FULBRIGHT. Mr. President, the distinguished Senator from Rhode Island (Mr. PELL) has written for the Saturday Review of October 11 an article entitled "The Oceans, Man's Last Great Resource." Senator PELL has given a great deal of study to the subject of oceans, and his article is extremely well written and informative. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Saturday Review, Oct. 11, 1969]

THE OCEANS—MAN'S LAST GREAT RESOURCE

(By Senator CLAIBORNE PELL)

After millenniums of exploiting and often destroying the riches of the land, man is now hovering acquisitively over the wealth of the oceans that cover three-quarters of the Earth. In the no man's land of the seabed, a scramble for minerals and oil, for new underwater empires secured by advancing armies of technology, could well set a new and wider stage of world conflict.

Even the most conservative estimates of resources in the seabed stagger the imagination of a world grown used to dire predictions of incipient famine and exhausted mineral resources. In the millions of miles of ocean that touch a hundred nations live four out of five living things on Earth. In the seabed, minerals and oil have been proved to exist in lavish supply. The oceans are a source of pure water and food protein; of drugs and building materials; even possibly a habitat for man himself and a key to survival for the doubling population on the land.

Man may yet learn to use a tiny fraction of this wealth. Unless international law soon determines how it shall be shared, that fraction alone could set off a new age of colonial war. Is the deep seabed, like the high seas, common to all, or is it, like the once wilderness areas on land, open to national claim by use and occupation by the first or the strongest pioneer? The question of what is to be done to regulate and control exploitation of the seabeds is no longer an exercise for academics and global thinkers. At stake is not just the prize of great wealth; pollution or geologic accident in the ocean deeps is no respecter of national boundaries.

A few years ago, "practical" men dismissed speculations about wealth in the sea as economic foolishness. It would never, they said, be economically profitable to exploit the seabeds no matter how great the riches to be found there. They underestimated the lure of gold as the mother of invention. Yet such pessimists may well be proved right in a fashion they did not anticipate. In these pioneer years of the ocean age, the damage done sometimes seems to exceed the benefit reaped. Beaches from England to Puerto Rico to California have been soaked in oily slime. Fish and wildlife have been destroyed. Insecticides, dispersed in the Rhine River, killed

fish and revived fears of other lethal legacies that may emerge from our casual use of waterways as garbage dumps. The U.S. Army, until deterred recently by a few alert legislators, was disposing containers of chemical agents in the Atlantic despite some predictions that severe damage to the marine environment could not be ruled out, because of either deterioration of the containers or unforeseen underwater accidents. The future disposal of increasing amounts of atomic waste is an unresolved problem. Millions of acres of offshore seabed have been leased for drilling. Largely in ignorance, we are tinkering with our greatest source of life.

The incredible magnitude of the oceans' resources can be measured by just one isolated example: the metal content of manganese nodules, for years a curiosity with no realizable value. One study of reserves in the Pacific Ocean alone came up with an estimate that the nodules contained 358 billion tons of manganese, equivalent, at present rates of consumption, to reserves of 400,000 years, compared to known land reserves of only 100 years. The nodules contain equally staggering amounts of aluminum, nickel, cobalt, and other metals. Most of these resources exist at great depths of 5,000 to more than 15,000 feet, yet within five to ten years the technology will exist for commercial mining operations, a development that will open to exploitation virtually unlimited metal reserves. Closer to home, the University of Wisconsin discovered a deposit of manganese worth an estimated $15-million in the shallow waters of Green Bay in Lake Michigan.

More familiar to most of us is the accelerated pace of offshore oil drilling that now extends more than fifty miles out to sea and accounts for 15 per cent of U.S. oil production. In the twelve years between 1955 and 1967, offshore production of crude oil increased from seven million to 222 million barrels. Estimates of known reserves of natural gas have more than tripled in the past fifteen years, and each advance of scientific exploration of the ocean beds brings to light new finds that would gladden the eye of the most hardened veteran of the California gold rush.

Perhaps the least developed resource, and one of critical importance to spiraling population figures, is the use of the seas for farming techniques or "aquaculture." Present methods of fishing can only be compared with primitive hunting with a bow and arrow; if fish were cultivated like livestock, the present world fish catch could easily be multiplied by five- or as much as tenfold. The production of protein concentrate and the distillation of fresh water are still experimental in an economic sense; there is no reason to believe that they too cannot become both useful and profitable. Aquaculture could also be applied to a variety of marine plant life.

Nor is the potential confined to what we can extract from the seas or the seabed. In crowded England, serious plans have been developed to build entire cities just off the coast. Offshore airports may solve the demand for large tracts of jet-age space near such large coastal cities as New York and Los Angeles. Some Americans, quick to take advantage of the legal confusion that reigns beyond coastal waters, have planned to build independent islands atop seamounts and reefs outside the three-mile limit. Indeed, a romantic notion, but one with, it is suspected, the more prosaic aim of avoiding the constrictions of domestic law concerning gambling and taxes. One such venture has been restrained by the courts on the grounds that the reefs and seamounts attach to the seabed on the continental shelf, and are, therefore, under U.S. jurisdiction. In another case, a year or so ago, the United Nations was presented with an application for permission to extract minerals from the bed of the Red Sea in an area fifty miles from the coastal states. The Secretariat dodged this thorny question, citing lack of authority to act.

Such claims are no longer isolated or frivolous. Much of the wealth of the oceans is now both proved and exploitable beyond that part of the continental shelf once considered to mark the practical limit of exploitation and national claims. This Pandora's box is as full of political hazards as it is of manganese. Parts of the Gulf of Mexico became such a forest of drilling rigs that an agreement was necessary to clear shipping lanes. This spring, the Dominican Republic granted a single oil concession covering some three-quarters of a million acres of offshore seabed, and many other small coastal nations are looking for an economic bonanza in the leasing of drilling rights. Under what safety and pollution regulations will such developments take place? How far out may any nation grant such leases or undertake such exploitation?

In short, diplomats and politicians who five years ago looked backward to the slow evolution of mining the sea and found nothing to engage their immediate concern have been overtaken, as is frequently the case in this day, by the less stately pace of technological change. If the know-how of ocean exploitation has gathered momentum of its own, the same cannot be said for any reasoned approach to orderly development under a regime of law.

Two years ago, faced with the prospect of orbiting weapons in the legal void of space, nations did agree on a treaty to limit the uses of outer space. Similar concern has not been so evident in the realm of ocean space, perhaps because people are so used to taking marine environment for granted.

A less charitable view might suggest that one of the inhibiting factors is the prospect of making a good deal of money, an incentive not present at the moment in space, except for the manufacturers of hardware here on Earth.

Yet, the oceans offer no less a fearsome stage for escalation of the arms race. The seabed already abounds with a multiplicity of sounding devices and other defensive technology. High "mountain" ridges in the ocean bed offer tempting sites for the deployment of nuclear weapons, and there is no reason why the Soviet Union and the U.S. might not soon be planning ABMs eyeball to eyeball on the Atlantic ridge. Thanks in large part to initiatives in the United Nations, the question of arms control in the seabed is under discussion at the Conference of the Committee on Disarmament in Geneva. Last spring both the Soviet Union and the U.S. offered differing proposals to ban the emplacement of weapons of mass destruction on the seabed; proposals that hopefully could forestall this new escalation of the nuclear race.

If the prospect of a new arms race on the ocean floor precipitated efforts to focus world attention on the problem, there is no lack of other and equally explosive possibilities for conflict. How far may the claims and undertakings of coastal states extend seaward? By whose permission, if any, is exploitation of the ocean deeps undertaken? Who is entitled to the proceeds, and who is to establish and enforce rules governing the safety of such exploitation? There have not been, as yet, any murders or muggings on the ocean floor. If there were, what law would apply? No one knows. The laws of the high seas, which have evolved over so many centuries of our coastal passage across their surface, are not wholly applicable by extension to the ocean floor.

In a study of the full range of our national interests in marine resources, made public early this year, a special Presidential Commission on Marine Science, Engineering, and Resources noted, rather matter-of-factly, that the threat of "unbridled international competition for the seas' resources may provoke conflict," and recommended a series of international agreements that would create new legal political frameworks for the exploitation of the mineral resources underlying the deep seas. There is no lack of proposals for such a regime; their specifics are as various as the magnitude of the interests involved.

As could be expected, the differences among nations reflect political power and geographic accident. In a letter to the Spanish ambassador in 1580, the first Queen Elizabeth of England wrote that "the use of the sea and air is common to all, neither can a title to the ocean belong to any people or private person, forasmuch as neither nature nor public use and custom permit any possession thereof." The Queen may have had in mind the Treaty of Tordesillas, signed a little more than a century earlier by Spain and Portugal, dividing all the world's oceans between them. That treaty did not survive the emergence of a superior naval power, and the Queen's views of freedom of the seas prevailed.

Four centuries later, the same dispute has been revived beneath the seas. There are those who would carve up the shelf and the seabed among the major maritime powers, and there are others who would insure freedom of the ocean beds beyond a narrow claim of national jurisdiction equivalent to the customary three-mile or twelve-mile claim of jurisdiction over territorial waters on the surface.

The three-mile limit claimed by the U.S. is the measure of a cannon shot in the eighteenth century. It may be regrettable that nothing so simple as a cannon shot was used to determine an equivalent measure on the seabed, since efforts to date—with more sophisticated standards—have only compounded the confusion that began in 1945 when the U.S., largely at the behest of the oil industry, unilaterally extended its sovereignty to include the bed of the continental shelf (that portion of the submerged land mass that extends at relatively shallow depths seaward, in some places for more than a hundred miles). Other nations followed, and in 1958 an international Convention on the Continental Shelf declared that a nation's jurisdiction over the shelf extends to a depth of 200 meters (about 650 feet) or "beyond that limit to where the depth of the superjacent waters admits of the exploitation of the natural resources." For coastal nations with extensive shelves, it was the most painless territorial conquest in history. Few then suspected that effective exploitation of resources would soon take place far deeper than 200 meters, or that the "exploitability" clause of the convention—as interpreted by the oil industry and others—would, in effect, grant a license to move in the ocean beds to the limits of a nation's power to defend its claims.

Strategic interest in what goes on in the seabeds off our shores further complicated efforts to decide whether our national interests would be best served by limited claims—as in the waters above—or by a more expansive goal. Yet the same rationale of maximum maneuverability, which is the basis of the jealously guarded right of freedom of the seas, argues equally strongly for a narrow claim of jurisdiction on the seabed. Beyond that narrow band, our own military, like their opposite numbers in the Kremlin, would prefer to trust to luck and muscle in making the best of all possibilities. The oil industry has no such dual interest; it wants to carry the flag as far as effective exploration permits.

And what of the small nations who believe, not unreasonably, that the riches of the seas should not be left up for grabs by the already rich and powerful?

It was this prospect, as well as the looming threat of a new weapons race, that two years ago brought forth two different proposals for

an international regime for the seabed. In the United Nations, the government of Malta introduced a resolution that would place the riches of the sea under international administration to be used for the benefit of mankind. In the U.S. Senate, I introduced a treaty, based in part upon the Treaty on Outer Space, and one that would, in my judgment, deal more realistically than does the Maltese proposal with the competing economic and political interests in ocean space.

Other detailed proposals have been made—by the National Petroleum Council at one end of the spectrum and by the Commission to Study the Organization of Peace, the World Peace Through Law group, and the Center for the Study of Democratic Institutions in Santa Barbara at the other. Neither of these opposing views, whether favoring unilateral action by the U.S. or advocating extensive internationalization of the seabed, is entirely practicable.

The oil industry advises a clubby agreement among the major maritime powers extending their jurisdiction by their own actions to the limits of their technological capacity for exploitation at least to that point where the continental slope meets the abyssal ocean floor. Such a claim would encompass most of the known wealth and would, they argue, neatly delimit the lines of jurisdiction and so insure maximum stability. What might happen in the event of the emergence of a powerful nonmember of the club is not clear, but history provides some clues. In advocating such an approach, the National Petroleum Council piously noted that it "is in the best interest of the United States whether or not it is in the best interests of the American oil and gas industries." So pleased is the industry with this act of statesmanship that the publisher of the *Oil Daily* felt impelled to comment editorially that "we rather doubt there is a record of a more high-minded, patriotic, and statesman-like position involving comparable interests in the whole range of the industrial economy."

Those proposals that advocate international administration of the resources of the sea, or of the profits from their exploitation, also suffer from practical defects, however useful their purpose may appear in theory. Only a few nations, most particularly the U.S., possess both the technology and the financial capability to proceed with the exploitation of the oceans. The financial risks and investments are enormous, and it is unlikely—and unreasonable—to expect that they would be assumed for altruistic purposes. It is clearly essential that any exploiting company be assured of security of tenure and the right to profits.

Adequate protection of economic incentive and investment security is not, however, irreconcilable with the thought that these resources should also provide some revenues for the common benefit of mankind. Ambassador Arvid Pardo of Malta once estimated that at the present rate of development, annual revenues could reach $6-billion by 1975, if a regime such as he proposed were established by 1970. His figures assume that the fees paid would be the equivalent of those now paid to national governments for offshore drilling leases, and that they would cover all exploitation beyond the relatively narrow confines of a 200-meter depth or a lateral distance from the shore of twelve miles. Such a sweeping concept of internationalization, is not likely to prove acceptable, but his estimate paints a tantalizing picture of the measure of funds that could be generated by licensing fees even on a much more limited scale.

Another practical defect in some of the proposals for international administration of the ocean beds, and one even closer to the bedrock of practicality in the present political climate of the world, is that it is simply not realistic to expect any great power to surrender to an international body control of a resource in which its national security interests are so substantially involved unless those interests are fully recognized and protected. Any international regime must be responsive to the realities of power or be doomed to failure.

Despite substantial and specific differences, most advocates of some international regime share a common purpose: to avoid an underseas land grab; to forestall a new nuclear arms race; to control marine pollution and, by extension, other actions that might upset the ecology of the oceans; and to insure some equitable distribution of the wealth for the common benefit of mankind. The same philosophy was stated earlier by President Johnson when he said, "Under no circumstances, we believe, must we ever allow the prospects of a rich harvest in mineral wealth to create a new form of colonial competition among the maritime nations. We must be careful to avoid a race to grab and to hold the lands under the high seas. We must ensure that the deep seas and the ocean bottoms are, and remain, the legacy of all human beings."

As a result of the initiative of Malta, the United Nations created a temporary, and now permanent, forty-two nation subcommittee of the General Assembly to deal with the seabed. Meetings of the subcommittee and its working groups have focused attention on the need to know more about our marine environment; gradually there has been a distillation of basic principles that seem essential to the orderly evolution of a body of law, however minimal. But it is evident that the sea that divides has yet to unite mankind, to paraphrase Longfellow. Except for occasional propaganda forays among the developing nations, the Soviet Union has taken the view that the least done, the better. Some Latin American states have made claims of jurisdiction extending out 200 miles on the seabed as they have also claimed a 200-mile territorial sea in the water above. Other small coastal nations, once in favor of internationalization, are now hoping to get richer quicker by leasing drilling rights off their coasts.

Technology, however, does not await the resolution of political differences, and we are fast approaching a point where the pace of exploitation may govern, rather than be governed by, sound political judgments. If there are, as seems likely, fewer risks in supporting at least a minimal international regime than in a wide-open scramble for control of the seas, it is necessary that we soon agree on some basic principles to serve as guidelines until a treaty can be negotiated.

First among these principles, and one that is embodied in the treaty I have proposed, is the recognition that the seas shall remain the heritage of mankind, open to all nations for peaceful purposes, and not subject to national appropriation by any.

To resolve the boundary problem, the treaty would set the limits of national jurisdiction at a depth of 550 meters or a lateral distance from the shoreline of fifty miles, whichever is greater. The depth measure encompasses most of the geographic shelf. The lateral measure assures those nations with little or no shelf, the security of determining what goes on in the ocean depths within that distance of their shores.

The treaty further proposes that exploitation of the seabeds beyond this limit be licensed by an independent international body to be established by the United Nations. Such a body would be constituted to reflect the realities of power and interest of the major nations. The World Bank is one example of an international body not directly under the aegis of the U.N. and in which both political power and technical expertise are adequately represented so decisions may be both informed and enforceable in terms of practical support. Licenses would be granted for extensive periods to insure security of tenure; the fees paid for the licenses would be used for an agreed international purpose.

Provision is also made in this treaty for the settlement of disputes by a panel appointed by the International Court of Justice, and the treaty draft also envisions an international sea guard, the equivalent of our Coast Guard, to which nations might contribute or lend research and scientific vessels for exploration and to supervise the observance of established standards of safety and pollution controls. Finally, the treaty proposes international regulation of the disposal of atomic waste.

In sum, the treaty provides a sensible and practical means of regulating a resource that is no respecter of national boundaries any more than are the air waves; it ensures a limit on national territorial claims as we have already done in Antarctica; it limits the nature of activities in an area of common danger as we have done in outer space; and it should, someday, become as unremarkable as all the many international agreements that now govern air traffic, maritime lanes, radio frequencies, international mails, and all the incidents of everyday living now taken for granted.

Perhaps most important, it assures incentive for development by technologically advanced nations, while making available a source of funds to benefit poor nations. If there is any single critical issue on this planet, it is not nuclear bombs or ABMs; it is the vastly greater explosive force of billions of men living ever closer to the edge of famine.

It is inconceivable that this last great resource of our planet should not ease the grip of poverty and hunger on much of the Earth. And how tragic it will be if a few centuries hence, these vast oceans that nourish life should become the instrument of our death, a not impossible end. Could those of our early settlers who first viewed the Great Lakes possibly imagine a day—a few short years in the sweep of history—when Lake Erie would become a lifeless testament to the unbridled depredations of men and machines? And, if they had foreseen such consequences, would they then have sought a rule of law to control the license of man? As we view the now abundant oceans around us, it is something to think about. The answers, one way or the other, may not be long in coming.

COMMENT ON VIETNAM MORATORIUM

Mr. ALLEN. Mr. President, on October 17, 1969, the Montgomery Advertiser commented editorially on the elaborately staged and nationally promoted Vietnam moratorium celebration. The newspaper pronounced the affair a massive flop. The reasoning advanced in support of the conclusion is interesting and persuasive. I ask unanimous consent that the editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Montgomery (Ala.) Advertiser, Oct. 17, 1969]

THE GREAT FLOP

The Boston businessman, who with divinity student Sam Brown conceived the Vietnam Moratorium Day, said he was delighted with the response.

Jerome Grossman, president of the Massachusetts Envelope Co., said: "We are overwhelmed . . . *We don't see how President Nixon can fail to change his policies.*"

Hold on, Grossman. The Associated Press, in a nationwide guess, said some 500,000 took part. In a later estimate, the highest we've seen, the AP said as many as 1,000,000 "may" have taken part.

Taking the higher guess, which would include the curious, those who showed up with no sympathy whatever for the movement, or those who merely came out for the "happening" or the entertainment, this was a pathetic turnout.

The moratorium was, by any numerical assessment, a flop, although the publicity build-up was masterful.

In a nation of more than 200,000,000, a half-million or even a million is the barest token. Dr. King's Washington March in 1968 attracted about 250,000—in a single city. The Woodstock folk festival in August attracted at least as many as AP's lower figure and approached, according to some figures, the higher estimate—counting all those who couldn't get near the pasture. And this too was in one location.

Grossman and Brown call it a mandate for Nixon. Ridiculous. More than nine times as many as AP's highest estimate went to the polls and voted for George Wallace last November, and George certainly didn't claim he'd won.

In all, more than 73,000,000 Americans voted last November. Do a few thousand kids, students, idlers, curiosity-seekers, draft-dodgers and the like speak for them? By what strange non-Euclidian mathematics is it that this small number—small in both individual city turnouts and the wildest national estimates—can conceivably be said to represent 200,000,000 Americans, some 122,000,000 of them of voting age?

It was a massive flop, despite all the feature attractions, the speakers, the entertainers, etc. We would have confidently predicted in advance that quite a few million would have massed across the nation. They didn't.

The result is inescapable—a backfire. The TV cameras and reporters didn't see the millions of Americans who went about their business and dismissed the whole thing in disgust. But if the number of those who bothered to put out flags at full staff, burned their headlights, or otherwise demonstrated their support of the Administration were counted, we believe even this number—a small portion of those who don't subscribe to surrender—would have vastly outnumbered the pacifists.

A great and powerful nation was more interested in the fate of the New York Mets than even bothering to tell the demonstrators to go fly a kite.

But saying that it was a bust, which it was, does not alter the fact that such crowds as did gather helped Hanoi immensely in its determination to yield nothing in Paris. The propaganda uses of the films will be evident all over the world to make it appear (falsely) that Americans have staged a mass revolution against their elected leaders.

This is a lie. But it may be a successful lie, because the skillful use of film clips of crowds can make it *appear* that an entire nation is up in arms against the Administration's policy.

Nothing could be further from the truth. Many of those who did turn out oppose immediate withdrawal or unilateral retrenchment without communist quid pro quos. Many who listened to speeches, and more who stayed at home, are sick of the war, but they are more nauseated by the demand for surrender.

Nixon has not been handed anything approaching a plebiscite to alter the course he has chosen, weighing all the risks and imponderables. On the contrary, he has been given a highly articulate, silent mandate to continue on course. He was given this by more than 199,000,000 Americans who *didn't* turn out for what was suggested by some wire services and newspapers, with reckless abandon, to be an overwhelming expression for immediate withdrawal.

It wasn't. It was a microscopic show in terms of numbers. Still, it served the communists well. It will almost certainly complicate Nixon's peace plans, and may well cost the lives of many more brave Americans.

But we hope the message is communicated to our fighting men: the surrender crowd gave a party and almost nobody came.

Those that did are hardly worth a moment's anger in Vietnam—except for the knowledge that they have made an honorable end more difficult and more distant.

THE CASE AGAINST PREVENTIVE DETENTION

Mr. ERVIN. Mr. President, during the year in which the United States began its existence as a Republic, namely, 1789, Congress passed the Judiciary Act of 1789 and thereby established a practice which has prevailed throughout the intervening 172 years, namely, that all persons charged with noncapital crimes have an absolute right to be released on bail pending their trial and conviction. At the instance of the administration, a legislative proposal, which is designated as H.R. 12803 in the House and S. 2600 in the Senate, has been submitted to Congress asking that this 172-year tradition be abrogated and that courts be authorized to imprison persons charged with crime prior to trial and conviction if they are charged with specified crimes designated as either dangerous crimes or crimes of violence in case the court predicts that they may commit some crime if freed on bail.

Manifestly, this proposal, which is known as preventive detention, would authorize the imprisonment and punishment of persons for crimes which they have not yet committed and may never commit. It is not only repugnant to our traditions but handicaps an accused and his lawyer in preparing his case for trial and will result in the incarceration of many innocent persons.

If America is to remain a free society, it will have to take certain risks, such as the risk that a person admitted to bail may flee and the risk that a person admitted to bail may commit crime while free on bail.

Surely it is better for our country to take these risks and remain a free society than it is for it to adopt a tyrannical practice of imprisoning men for crimes which they have not committed and may never commit merely because some court may peer into the future and surmise that they may commit crimes if allowed freedom prior to trial and conviction.

On October 16, 1969, I was privileged to appear before Subcommittee No. 4 of the House Committee on the Judiciary and make a statement in opposition to this legislative proposal. I undertook at that time to state the case against preventive detention. I ask unanimous consent that the statement be printed in the RECORD.

Mr. KENNEDY. Mr. President, I believe that Senator ERVIN's analysis of the constitutional and practical dangers of the proposed legislation is so cogent that it should be brought to the attention of all concerned Americans. Accordingly, I join the Senator from North Carolina in asking unanimous consent that his statement be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR SAM J. ERVIN, JR.

I wish to thank the Chairman of the Judiciary Committee and Chairman Rogers of this Subcommittee for inviting me to appear today at your hearings on H.R. 12806 and other proposals to authorize the preventive detention of alleged dangerous suspects awaiting trial. These measures trouble me greatly for I am convinced that they are unconstitutional and would initiate a dangerous and unfortunate policy in the administration of criminal justice.

Initially, I want to make it clear that I am deeply concerned about the crime problem in this country and about the safety of our law-abiding citizens. The increasing rate of criminal activity in our land is appalling. I am especially disturbed by the crime problems besetting us each day here in the District of Columbia. The existence of these problems, however, should not prompt Congress towards enacting unconstitutional and unwise and deceptively appealing legislation. Rather, it should provide us with the opportunity to make those difficult legislative decisions which are essential if our court and corrective systems are to cope with the demands of modern society.

Proponents of preventive detention legislation assert that it is the only realistic and efficient way to attack the problem of crime by persons free on bail while awaiting trial. In my judgment, the supporters of preventive detention are seriously mistaken in that assertion. Although it is difficult to obtain complete statistics, the available figures indicate that offenses committed by persons released on bail are approximately 6% of the total crime figure. In addition, well over half the crimes on bail are not committed until more than 60 days after release. While any crime by bailees is serious, we should recognize that only a slight portion of our overall crime problem can be attributed to those on bail. That portion could be substantially reduced by providing for speedy trial and by other measures which would not involve such drastic infringement of civil liberties as does this legislation.

Advocates of preventive detention generally attribute the need for preventive detention legislation to problems caused by the Bail Reform Act of 1966. Again, I am constrained to say that they are in error. As members of this Committee well know, the Bail Reform Act revised Federal bail law for the first time since 1789. Its purpose is to implement the two fundamental principles which have always been at the foundation of American bail law—first, that a criminal suspect shall be released pending trial unless there are good reasons to believe he will flee rather than appear for trial; and second, that a person's financial inability to post monetary bond shall not preclude his right to pretrial release. These principles constitute the American ideal of bail—one which we have always sought but had never achieved until 1966. We should not recklessly repudiate these principles by enacting a preventive detention law.

In fairness to the members of the Senate and the House who worked diligently for the Bail Reform Act, I should point out that the Act has not made the problem of crime on bail any more acute nor increased the danger to our law-abiding citizens. A D.C. Crime Commission survey prior to passage of the Bail Reform Act of 1966 showed a reindictment rate among those on bail of 9.2%. No reliable reindictment statistics since the Act was passed reflect a percentage any higher than that, and most show rates of under 5%.

The clamor for repudiation of the Bail Reform Act and for rejection of the constitutional right to pretrial release in non-capital cases rests on a handful of highly emotional

and highly publicized cases. Inflammatory statements have made it appear that this city's crime problem is wholly due to the Bail Act. It was suggested recently that pretrial imprisonment of a few offenders—between 300 and 800—will solve the city's crime problems and usher in the millennium. This is not so. Despite the claims, neither the Justice Department nor any other supporter has produced reliable figures which prove the need for preventive detention.

The Administration recently commissioned the Bureau of Standards to undertake for the first time a scientific study of the rate of crime on bail. All of us who are concerned about that problem anxiously await the outcome. That study is still unfinished. However, if the initial results are indicative of a trend, then the problem of crime on bail may be even smaller than anyone heretofore realized. I submit that this Committee should resist demands for precipitous action and demand instead hard evidence before it takes the serious step of recommending preventive detention.

I believe our search for a solution to the problem of crime on bail should begin with an acknowledgement of three facts. First, crime on bail, though the exact extent is uncertain, represents but a small part of the overall crime problem. Second, the problem, irrespective of its precise magnitude, could be substantially eradicated if trials were conducted between 30 and 60 days following arrest and release. Third, the Bail Reform Act of 1966 has been inaccurately and unfairly cited as the villain responsible for crime on bail. It is in that perspective that we should examine preventive detention and especially H.R. 12806 (S. 2600), the Administration's solution to crime on bail.

The Administration proposal would authorize judges to consider a defendant's "danger to the community" as well as the "likelihood of flight", in setting release conditions. If no condition of release is considered adequate to protect the community, the judge could order a detention hearing for defendants charged with a "dangerous crime" or a "crime of violence." To be subject to detention, the "crime of violence" must have been committed while on bail, probation, or parole, or within 10 years of a prior conviction of a crime of violence. Persons charged with "dangerous crimes" could be detained even if they had no prior record of involvement with the law. It has been estimated that the bill encompasses between 40 and 75% of all persons charged with felonies in Washington.

To order detention, the judge must find "clear and convincing evidence" that the defendant has committed a "dangerous crime" or a "crime of violence", that there is "substantial probability" of his guilt, and that no release conditions will assure the safety of the community. Right to counsel and other rights of an adversary criminal proceeding apply, except that the rules of evidence will not govern. Testimony of the defendant at the hearing may not be introduced later at trial, except for impeachment purposes and perjury and bail violation proceedings.

Detention is nominally limited to 60 days, but it can be extended indefinitely if the trial is in progress or if the defendant has asked for an extension. The detained suspect is given a series of severely qualified "rights"—he is to be confined separately from convicted criminals "to the extent practical;" he is to be given "reasonable opportunity" to consult with counsel; he may be released, in the custody of a U.S. Marshal, for the purpose of aiding his defense when he shows "good cause"; he is to be given an expedited trial "to the extent practicable."

Other provisions of the bill provide mandatory penalties for bail-jumping and for failure to appear at trial, which are presumptively "willful" unless the defendant can show otherwise. Mandatory imprisonment is provided for conviction of an offense committed while on bail.

In my view, the provisions of H.R. 12806 (S. 2600) raise grave constitutional questions when considered in light of the Eighth Amendment's guarantee of reasonable bail, the due process clause of the Fifth Amendment, the Sixth Amendment's guarantee of access to counsel, and the opportunity to participate in preparation of a defense.

The historical purpose of bail is to insure the appearance at trial of a criminal suspect and not to detain him in the hope that such detention will impede the possibility of his further criminal activity. The Eighth Amendment prohibits excessive bail. Clearly, if bail is set at a level higher than necessary to insure appearance, it is excessive and is serving a function not consonant with its historical purpose. The result of excessive bail is pretrial detention violative of the Eighth Amendment. In my judgment, the Eighth Amendment implicitly guarantees a right to bail in all non-capital cases.

Moreover, the right to bail was explicitly provided by the Judiciary Act of 1789, which preceded adoption of the Eighth Amendment. It is evident that the founders of our country adopted the Eighth Amendment's prohibition against excessive bail as a means of securing the pre-existing right established by the same Congress only months previously. An especially significant manifestation of that intent is the presence of an absolute right to bail in noncapital cases in the great majority of our state constitutions. I have just received the memorandum on constitutionality which the Justice Department promised to prepare in defense of this legislation almost 6 months ago. In the memo, the Department argues that the Eighth Amendment guarantees a right to reasonable bail only in those cases where Congress authorizes bail. According to this argument, Congress could define away the right to bail and leave the Eighth Amendment meaningless.

While arguments may be mounted on both sides of the Eighth Amendment issue, it is generally agreed that existing case law is not dispositive. Although I am personally satisfied that preventive detention prostitutes the purpose of bail and runs afoul of the Eighth Amendment, the constitutional implications would remain unclear until a case raising them reached the Supreme Court. At best, preventive detention is a constitutionally questionable device whose survival depends on a frontal assault on the Eighth Amendment as it has been understood from its enactment.

The constitutional difficulty of this proposal does not end, however, even if the Eighth Amendment is overcome. In my opinion, preventive detention proposals are fraught with even greater difficulty when viewed in light of the Fifth Amendment guarantee of due process.

Prior to ordering preventive detention, a judicial officer must find, among other things, that there is a "substantial probability" that the individual committed the offense charged. This provision allows the government to deprive a suspect of his liberty on the basis of a vague and uncertain standard of proof. I do not believe the standard "substantial probability of guilt" comports with due process.

Fundamental to due process of law is the tenet that a man is presumed innocent until proven guilty beyond a reasonable doubt. Preventive detention proponents argue that the presumption of innocence is merely a technical rule of evidence assigning the burden of proof to the government at the actual trial. To the contrary, I believe that the presumption inheres in due process. Under our system of justice the government cannot deprive a man of his liberty on the basis of a mere accusation or assumption that he has committed a crime or is likely to do so. In practical effect, preventive detention legislation convicts individuals of "probable" guilt and "dangerousness" and sentences them to 60 days imprisonment without trial and conviction of a crime. Such flagrant violation of due process smacks of a police state rather than a democracy under law. It is reminiscent of similar devices in other countries which have proved all too useful as tools of political repression.

The Administration's bill attempts to avoid the due process argument by providing for a preventive detention hearing. That hearing is ostensibly designed to protect the accused, but in reality it does him irreparable harm without satisfying due process.

While the preventive detention hearing is adversary in nature, the rules of evidence do not apply. Thus, it appears that hearsay and other incompetent evidence would be admissible and that the hearing would not be a truly evidentiary one. Notwithstanding that fact, the accused's testimony at the detention hearing may be used pursuant to provisions of the bill for his impeachment in any subsequent proceeding. I doubt both the wisdom and constitutionality of that provision.

Under our system of criminal justice, the prosecution must come forward with evidence of guilt at trial. The defendant may reserve his case pending establishment by the prosecution of a prima facie case. This procedure also protects the defendant's privilege against self-incrimination and does not put him to his election on whether or not to testify at least until after the prosecution has gone forward with evidence of a prime facie case.

The procedure for a preventive detention hearing would constitute a radical departure from our traditional procedure in criminal cases and would place a defendant in an untenable position. If he wishes to avoid preventive detention, he must present his defense, including perhaps his own testimony, at this very early stage of the proceedings. The procedure prescribed by H.R. 12806 (S. 2600) thereby strikes a serious blow at two fundamental privileges traditionally reserved to a defendant at the time of his trial.

Notwithstanding the supposed safeguard of the required preventive detention hearing, it should be noted that a suspect could be detained under the Administration's bill for at least eight days without a hearing of any sort. For good cause shown, the U.S. Attorney may secure a continuance of three days while the suspect's attorney may obtain one for five additional days or more in event of extenuating circumstances. Here again we are confronted with the question of whether due process is accorded an individual as required by the Fifth Amendment.

Preventive detention hearing procedures also raise a double jeopardy issue under the Fifth Amendment. If, at the preventive detention hearing, the judicial officer finds no "substantial probability" that a suspect committed the crime, may that suspect successfully plead *res judicata* and double jeopardy at the subsequent trial? It would seem that having failed to meet the standard of "substantial probability," the government should not thereafter be allowed to try to prove guilt beyond a reasonable doubt.

In considering the constitutional problems posed by H.R. 12806 (S. 2066), we must not overlook the Sixth Amendment right of an accused to have the effective assistance of counsel for his defense. Pretrial detention clearly militates against access to counsel and the opportunity to participate in preparing a defense. While the bill provides for a suspect's temporary release "for good cause", that privilege is diluted, if not totally devoid of meaning, because the release is in the custody of a U.S. Marshal and at the pleasure of the custodial official. The presence of a U.S. Marshal is hardly conducive to contacting prospective defense wit-

nesses. Thus, preventive detention, even with a temporary release provision, substantially infringes upon a defendant's ability to assist in his defense and severely impairs his right to the effective assistance of counsel.

It is difficult to exhaust the list of constitutional questions this legislation raises. Plainly, findings of "dangerousness to the community" and "likelihood to commit serious crime" are not petty matters. Nor is a preliminary sentence of 60 days imprisonment. Does the Fifth Amendment provision regarding grand jury indictment apply to preventive detention? Is the guarantee of trial by jury secured by the Sixth Amendment applicable? Can a defendant convicted of "probable guilt" receive a fair and unprejudiced jury trial thereafter? The constitutional defects in this legislation, as I have indicated, are many and not to be dismissed lightly.

There are other equally cogent and persuasive factors, some with constitutional implications, which require Congressional attention. Perhaps the foremost of these is the fact that preventive detention rests on an untested theory of predictability. A judicial officer must be able to pick out with precision the suspect who will commit new crime while on bail. Yet there are no standards for determining dangerousness and no statistical guidelines on which to base the prediction which must be made under the proposed law. Nor will any statistics become available if preventive detention is the law because suspects who are detained will not then be able to demonstrate that they would not recidivate. A legislative judgment of predictability which does not rest on an adequate factual foundation may not be constitutionally valid where the consequences to personal freedom and a fair trial are so serious.

Throughout any consideration of the theory of predictability, on which preventive detention is based, we should remember that only a small percentage and number of suspects actually commit crime while on bail. When that fact is coupled with the fact that judges have nothing to guide them other than some enigmatic power of prophecy, the law will most assuredly result in the imprisonment without trial of many persons who are not dangerous and who are innocent of the charges. If the preventive detention law is judged by its susceptibility to abuse, plainly it is an evil law.

Another policy factor we must consider is the administrative effect of this proposed preventive detention measure. I must confess that I have great difficulty with this matter. The need for preventive detention legislation concededly rests on the inability to provide speedy trials for criminal suspects. It is an attempt to compensate for a progressive breakdown in our law enforcement structure and especially our over-burdened courts. Yet, the proposed solution would impose heavy additional administrative burdens on the already heavily backlogged courts.

The required full adversary hearing and the need to make informed decisions on predictability would, in many instances, take as much time as would actual trial of the principal case. The judicial and prosecutional manpower required by this legislation has not been estimated, but it is no doubt great. Court congestion would get worse. Delays in criminal trials, now running 10–12 months, would increase.

Under the terms of the bill, those detained must be released after 60 days. Measured by present delays, which will be worse because of this bill, the suspect will be in the streets 8–10 months awaiting trial after his 60 days detention period is over. Thus we have the curious situation where our failure to give defendants and the public their constitutional right to speedy trial has spawned legislation which will further burden the judges, and make speedy trials even less likely than at present. Yet the professed goal of protecting the public will still remain unrealized.

As with any legislation affecting the freedom and livelihood of the individual, we should examine the impact of that law upon the individual with the utmost care. It is obvious that 60 days preventive detention will cost the detained individual his job. Loss of employment plus physical absence from his home will unquestionably have a detrimental effect upon his family. The taxpayers will probably be required to contribute to the financial support of his family and will certainly pay the costs of his detention. It is interesting to note that testimony during bail reform hearings a few years ago estimated that the public cost of pretrial detention before the Bail Reform Act was $2 million.

Probably the most serious blows to be dealt the individual will stem from his subjection to the physical and psychological deprivations and degradations of prison life. It is true that H.R. 12806 (S. 2600) does provide that an individual preventively detained under the bill will be confined separately, if "practicable". That provision, however, constitutes another example of the meaningless "rights" the bill offers those subjected to preventive detention.

Approximately 40% of all Federal criminal cases in the country are tried in the District of Columbia. Criminal suspects in the District of Columbia will bear the brunt of the preventive detention law. Consequently, we ought to ask where individuals selected by prophetic judges for preventive detention in the District will be incarcerated pending trial.

The D.C. Corrections Department already wrestles each day with the problems of assault, narcotics, and homosexual rape, as well as general turmoil and unrest, all of which result primarily from overcrowding and inadequate supervision. The jails of this city are already a national disgrace. Yet the advocates of preventive detention would inject untold additional individuals, many of them innocent, into our problem-ridden, overcrowded, prison system. The probability that separate confinement facilies will be available for detainees under H.R. 12806 (S. 2600) is simply non-existent.

A period of sixty days or more of preventive detention in such a system is not likely to improve an individual's reputation. It will make securing employment difficult. It will, in all probability, exacerbate rather than reduce any existing criminal tendencies. And it will sharply detract from the defendant's ability to secure a fair trial, or a probationary or suspended sentence in the event of conviction.

Although I have not exhausted either the constitutional ramifications of H.R. 12806 (S. 2600) or the implications of instituting preventive detention as the policy of our government in the realm of criminal justice, I hope that I have demonstrated, at the very least, the need for great care in your examination of the pending legislation. On the basis of our Senate hearings earlier this year in the Constitutional Rights Subcommittee and my study of proposed preventive detention legislation, I stand firmly convinced that the legislation is unconstitutional on its face and would initiate a disastrous policy in criminal justice. Furthermore, no compelling evidence has been presented to prove the need for such drastic legislation. Preventive detention will not solve the problem at hand. Yet I fear that enactment of the pending Legislation would merely relax the mounting public pressure for a real and lasting solution to our crime problem.

In my judgment, the real answer to the immediate problem of crime committed by persons on bail, and, indeed, the solution to the general problem of crime, lies not in the preventive detention of individuals presumed innocent but in the speedy trial of the accused and the swift and sure punishment of the guilty. To attain that objective we must bring major improvements, long overdue, into our system of criminal justice. We must have more judges with adequate staffs and facilities, more prosecutors with sufficient supporting personnel, a more efficient system of defense for suspects financially unable to obtain counsel, and a more enlightened approach to penal reform.

As you know, the House and the Senate are both considering a variety of legislative proposals designed to achieve those ends. We must proceed with dispatch to enact carefully thought-through legislation in each of the areas affecting our criminal justice system. While working toward such long range reform, we can, I am convinced, meet our immediate problem by greater effort on the part of our judges and prosecutors to bring about speedy trials, by the advancement of cases involving defendants believed dangerous, and by wider use of the procedures established in the Bail Reform Act of 1966 and the D.C. Bail Agency Act to supervise and control the conduct of defendants on bail.

Given the choice between a course of action fraught with constitutional perils and one clearly constitutional, let us choose the latter. Let us reject this facile and desperate detention device which repudiates our traditional concepts of liberty and pursue instead the goal of speedy trial of criminal suspects. That objective does not depend upon constitutional affront but rather plainly preserves and enhances the rights of us all under the Constitution.

I wish to thank the Chairman of the House Judiciary Committee and the Chairman of this Subcommittee for the opportunity to testify here today on this important matter. It is always a pleasure for me to come before my distinguished colleagues in the House and I am grateful for your kind attention to my remarks.

TAX REFORM ACT OF 1969—ACTION OF COMMITTEE ON FINANCE

Mr. LONG. Mr. President, on Thursday, October 23, the Committee on Finance met in executive session and announced decisions with respect to that portion of the House tax reform bill which affects the tax treatment of natural resources under the percentage depletion rules. Also, decisions were made regarding the provisions concerning mineral production payments and mining exploration expenditures.

So that Senators might follow the progress of these executive sessions, I ask unanimous consent that a press release be printed in the RECORD.

There being no objection, the press release was ordered to be printed in the RECORD, as follows:

[A press release from the Committee on Finance, U.S. Senate, Oct. 23, 1969]

TAX REFORM ACT OF 1969—NATURAL RESOURCES COMMITTEE DECISIONS

The Honorable Russell B. Long (D., La.), Chairman of the Committee on Finance, announced today that the Committee on Finance had concluded its work on that portion of the House tax reform bill dealing with the treatment of natural resources. The important question in this area concerned the 27½ percent allowance for depletion of oil and gas wells. The Chairman reported that the Committee had resolved this matter by reducing the allowance to 23 percent.

A complete description of the actions taken at today's meeting follows:

Oil and gas.—The Committee agreed to reduce the percentage depletion rate for oil and gas from the present rate of 27½ percent to 23 percent, with respect to both

domestically and foreign produced minerals. The House-passed bill would have reduced the percentage depletion rate for oil and gas produced in the United States to 20 percent, and would have repealed it entirely for oil and gas produced in foreign countries.

The Committee also agreed that in the case of oil and gas producers with less than $3 million of gross income from oil and gas production the present limitation on the allowance for depletion—50 percent of the net income from the property—will be increased to 65 percent. The House bill did not deal with this matter.

Other minerals.—The Committee agreed that in the case of all other minerals, the provisions of the House bill, which would have reduced the applicable depletion allowances by approximately one-fourth, should be deleted. This action had the effect of retaining the depletion allowances provided by present law. These allowances range from 5 percent for sand and gravel to 23 percent for uranium and sulphur and for certain strategic minerals.

Special limitation on depletion for gold, silver, and copper.—Under present law the allowance for percentage depletion is based upon a specified percent of gross income from the mineral property, except that the deduction could not exceed 50 percent of the *net* income from that mineral property. In addition to the change described above in the case of small oil and gas producers, the Committee agreed that with respect to gold, silver and copper, the 50 percent limitation should be increased to 70 percent.

Great Salt Lake.—The Committee further agreed to an amendment clarifying the treatment, for percentage depletion purposes, of minerals extracted from saline lakes within the United States. Under present law, percentage depletion is not allowed with respect to minerals extracted from sea water or from "similar inexhaustible sources." This latter phrase has been interpreted to prevent a depletion allowance for minerals extracted from the Great Salt Lake. The Committee amendment provides that except for salt and water the regular allowances will be provided for minerals extracted from the Great Salt Lake and other saline lakes in the United States.

Mineral production payments.—The Committee approved the provisions of the House bill which restrict the tax benefits of carved-out production payments and so-called ABC transactions. However, it moved the effective date from April 22, 1969 to October 9, 1969 and provided two transitional rules. The first of these would permit a taxpayer who had sold a production payment in 1968 to elect to treat that transaction as a loan in the same manner as a production payment sold after the effective date. Under the second transitional rule the Committee provided that except for percentage depletion and foreign tax credit purposes, the new provision would not apply to carved-out production payments sold during that part of the taxpayer's taxable year which occurs after October 9, 1969, to the extent that the production payments offset a net operating loss which would otherwise occur in the taxable year in the absence of the carve-out. In this latter case, however, the amount of the carved-out payments qualifying for this treatment would not be allowed to exceed the amount of carved-out payments sold by the taxpayer during his preceding taxable year.

Mining exploration expenditures.—The Committee agreed to adopt the provisions of the House-passed tax bill relating to mining exploration expenditures. This provision amends present law to provide that insofar as future mining exploration expenditures are concerned, the general recapture rules will apply in all cases. However, the Committee provided that this provision would be applicable only to mining exploration expenditures made after December 31, 1969. The House bill would have applied to mining exploration expenditures made after July 22, 1969.

Further, the Committee provided that taxpayers who have elected to deduct mining exploration expenditures under the limited provision of present law will be deemed to have made an election, with respect to expenditures made after December 31, 1969, to deduct the expenditures under the unlimited provision, unless the taxpayer notifies the Treasury that he does not desire to be so treated. The Committee also agreed that it would clarify the treatment of expenditures which are incurred during the development or producing stage of a mine. The intention of the Committee was that a taxpayer should deduct all expenditures incurred in bringing a mine into production, either as exploration expenditures during the exploration stage, or as development expenditures or operating expenses during the development and production stage. The Internal Revenue Service has at times taken the view that these expenditures are not to be treated as development or operating expenses, but rather, they are to be treated as exploration expenditures which must be capitalized, since they are incurred after the development stage of the mine has been reached. The Committee will make it clear that this is not the position it intended in enacting the law.

Oil shale.—The Committee also agreed to adopt the provisions of the House-passed tax bill relating to treatment processes in the case of oil shale. The effect of the House bill generally is to extend the point at which percentage depletion is computed in the case of this mineral to the point at which the oil is extracted from the rock. (Under present law percentage depletion is computed generally on the basis of the value of the shale as it comes from the mine.)

TAX REFORM ACT OF 1969—ACTION OF COMMITTEE ON FINANCE

Mr. LONG. Mr. President, on Friday, October 24, the Committee on Finance met in executive session and announced that it had adopted a new simplified minimum tax—applying to both individuals and corporations with tax preference income—in lieu of the provisions contained in the House bill concerning the limit on tax preferences and the allocation of deductions. Additionally, the committee approved that portion of the House bill which extends the excise tax on passenger automobiles and on telephone services.

So that Senators might follow the progress of these executive sessions, I ask unanimous consent that a press release be printed in the RECORD.

There being no objection, the press release was ordered to be printed in the RECORD, as follows:

[A press release from the Committee on Finance, U.S. Senate, Oct. 24, 1969]

TAX REFORM ACT OF 1969—MINIMUM TAX COMMITTEE DECISIONS

The Honorable Russell B. Long (D., La.), Chairman of the Committee on Finance, announced today that the Committee had adopted a new comprehensive minimum tax to apply to both individuals and corporations with tax preference income which now escapes Federal tax. He reported that the new provision replaces the limit on tax preferences and the allocation of deductions features of the House-passed Tax Reform Act. The Chairman noted that these House provisions were unusually complex in their operation and had been sharply criticized during the month-long hearings on the tax reform bill. He stated that the Finance Committee substitute not only was far simpler than the House provisions but also produced more revenue, in large part because of its extension to corporations.

Senator Long also reported that the Committee had approved the House language extending the 7 percent excise tax on passenger automobiles, and the 10 percent excise tax on telephone services for another year. He noted that the Committee had previously taken identical action when it reported H.R. 12290 to the Senate in July. The full description of the Committee's action follows:

5 percent minimum tax.—The Committee approved a substitute for the Allocation of Deduction Rule and the Limit on Tax Preferences provision of the House bill. The substitute involves the imposition of a 5 percent tax on preference income in excess of $30,000.

Under the Finance Committee provisions, individuals and corporations would total their tax preference income, subtract an exemption of $30,000 and apply a 5 percent rate to find the minimum tax. (For married couples filing separate returns the exemption would be $15,000.) This minimum tax would be in addition to the regular individual income tax, and the regular corporation income tax.

Tax preference income.—The minimum tax under the Finance Committee provision applies to a total of twelve tax preference items. The covered tax preference items are as follows:

(1) *Capital gain.*—One-half of long-term capital gains of individuals. In the case of corporations, the tax preference is three-eights of long-term capital gains (based on the difference between the 30 percent rate that would apply to long-term capital gains and the 48 percent corporate tax rate.)

(2) *Accelerated depreciation.*—The excess of accelerated depreciation (or amortization) over straight-line depreciation on:

(a) Real property;

(b) Section 1245 property (equipment and machinery) where the property is leased on a net lease basis;

(c) Property receiving 5-year amortization for rehabilitation expenses;

(d) Anti-pollution facilities which would qualify for 5-year amortization under section 704 of the bill; [1]

(e) Railroad rolling stock which would qualify for rapid amortization under section 705 of the bill.[1]

(3) *Intangible drilling and development expenses.*—The excess of intangible drilling expenses over the amount that would be recovered through straight line depreciation and cost depletion.

(4) *Percentage depletion.*—The excess of percentage depletion over cost depletion.

(5) *Western-Hemisphere Trade Corporations.*—The tax savings received by Western Hemisphere corporations because their income is taxed at 34 percent instead of the 48 percent regular corporate income tax rate.

(6) *Financial institutions; bed debt reserves.*— Bad debt deductions of financial institutions in excess of actual loss experience.

(7) *Investment interest.*—Interest on indebtedness incurred to purchase, or carry investment property to the extent that such interest exceeds the net investment income received and reported as ordinary income during the year.

(8) *Stock options.*—The difference between the option price and the fair market

[1] The Committee has not yet taken up that part of the Tax Reform Act which provides for this amortization. The final decision on the inclusion of these items in the minimum tax will depend on the Committee's decision with respect to the sections providing the amortization.

value of qualified stock options at the time the option is exercised.

Exemptions from tax preference income.—The 5 percent minimum tax does not apply to tax exempt interest on State and local bonds, unrealized appreciation in the value of property deducted as a charitable contribution, and farm losses.

Treatment of losses.—If a taxpayer sustains a loss or has loss carryovers or carrybacks to the taxable year, then he may elect to offset the loss against the preference income used in the minimum income tax computation. However, to the extent he uses the loss to offset preference income then the loss may not later be used in the regular tax computation.

Revenue effect.—This new minimum tax would increase revenues by an estimated $700 million a year with about half the additional revenue coming from individuals and half from corporations.

Excise tax on autos and communications.—The Committee also approved a provision to continue the 7 percent manufacturers automobile excise tax until January 1, 1971. In addition, the reductions in the automobile excise tax scheduled under present law for future years are postponed for one additional year in each case. Similarly, the Finance Committee's action provided for the continuation of the communication services tax on local and toll telephone, and teletype writer exchange services. The present 10 percent tax on these items will be continued until January 1, 1971, and future scheduled reductions will occur one year later than provided under present law.

ADDRESS BY SENATOR KENNEDY BEFORE WORLD AFFAIRS COUNCIL

Mr. FULBRIGHT. Mr. President, on October 15, the distinguished assistant majority leader, the distinguished Senator from Massachusetts (Mr. KENNEDY), delivered an address to the World Affairs Council in Boston. His remarks are thoughtful, timely, and impressive. I ask unanimous consent that his address be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY SENATOR EDWARD M. KENNEDY BEFORE THE WORLD AFFAIRS COUNCIL, BOSTON, MASS., OCTOBER 15, 1969

It is a pleasure for me to have the opportunity to appear before this distinguished audience once again.

We meet to discuss the war in Vietnam. But we meet in a far different climate than before. The promises and hopes of years of self-deception have now gone the way of history. The policies of the past—strategic hamlets, the winning of hearts and minds," search and destroy, bombing in the North, the storming of countless Hamburger Hills, have all been discredited or discarded.

We meet on a day when millions of Americans are letting it be known that they, too, feel the war must end. They seek open discussion. They seek to persuade. They wish to involve as many as possible in renewed deliberation. In the tradition of those who brought the force of humanity to the abolition of slavery, they are meeting on Boston Common and at a hundred other places, to peacefully petition their government and their fellow citizens.

I am familiar with those who set this day apart, and regardless of the day's success I know them to be moderate, sensitive, and deeply concerned. When these young people were in elementary school the Viet Minh took Dien Bien Phu. As they entered high school, their parents supported President Kennedy's decision to send American military advisors to assist the makeshift government of South Vietnam. During their college years they watched as President Johnson committed first thousands, then hundreds of thousands of young men to the jungles and deltas of Southeast Asia.

But now these young people are adults. Now they expect to be heard. They do not choose to be the silent servants of decisions made in the past—and they have lost a good deal of their faith in the wisdom and righteousness of experts who sit in the safety of Cabinet rooms. They feel they can make a difference, having done so last year. Today they feel they can bring about change to better their nation.

And so today Americans of all ages meet to talk again of the war in Vietnam. That is fitting, for it is we, not the young, who are responsible for the war. But it is they, not we, who will live a full lifetime with the consequences of peace. All elements in America are thus involved, and all should discuss this war's conclusion.

We talk with greater frankness now about Vietnam. The harshness of the real world has finally overtaken us. Finally there is light at the end of the tunnel—but it is not the pleasant glow of victory. It is the glare of difficult compromise. For a time criticism of our Vietnam policy was stilled as we waited for a new President to carry out the promises he made and the mandate he received. And the President has taken action. He has clearly stated that he wishes peace and the extrication of America from the war. On two occasions he announced the total withdrawal of 60,000 American troops. Recent U.S. casualty figures are the lowest in three years—following the issuance of new orders to our field commanders.

Yet impatience grows across the country. For we detect in our government more improvisation than policy, more steps taken in reaction to pressures than out of leadership. The final question of political compromise remains: Are we willing as a nation to accept the fact that the ultimate solution to Vietnam will require the presence of unfriendly elements in the future government of South Vietnam—a solution not totally satisfactory to us? Are we willing as a nation to accept the fact that whatever the future government of the South, it will not be the present government, nor will it be totally free of participation by members of the National Liberation Front. If we are not willing to respond on this issue today the alternative, clear and horrible, is simply to fight on—with more bloodshed, more deaths, more war. For the cold fact is—we have not defeated the enemy in Vietnam nor will we. We are not in a position then to impose the form of government we wish. The matter must be decided by the competing political interests in South Vietnam. But no political change can effectively take place as long as the might of the United States stands between the current regime and those other nationalistic groups that would compete with it.

We have properly rejected, for moral reasons, the option of total destruction of all life in Vietnam. We have fought to a standstill. We cannot remove our adversaries by firepower, they cannot remove us by sporadic assault. We are left with a stalemate costly in lives and resources. Now we must face the final accommodation. Yet we have had no indication from this Administration, either in their public statements or activities in Paris, that they are prepared to compromise for a real settlement.

To be sure, the decisions we must make would be easier if our adversaries were more reasonable, if our allies in Saigon were more flexible, and if Americans were united in support of an agreed upon course of action. But none of these conditions are real. If we are ever to come to grips with reality on Vietnam we must distinguish that reality from our fondest hopes.

Hanoi is not and has not been reasonable. It is to their great discredit that even in matters of simple human decency, such as comforting the families of American prisoners of war, they have refused to yield. But whether we view her leaders and people to be misguided, evil, aggressive or simply wrong, the fact remains that they believe their course to be righteous. They have been willing to undergo twenty years of warfare, staggering losses among their soldiers, and the destruction of a scant industrial base by bombing. They speak and act with the zeal that accompanies a sense of mission and patriotism. To them, it is we, not they, who have intruded into the South, for they make no distinction between the two Vietnams. And having withstood the firepower of the most powerful nation on earth, they must also believe that they have succeeded in their efforts so far.

Reality also demands that we see the Saigon government for what it is. The government of President Thieu and Vice President Ky is not and has not been flexible in the move toward peace. In many major respects their best interests and our best interests are not consistent. They wish no compromise with the National Liberation Front or Hanoi for they see the North as an invader and the Viet Cong as an insurgent minority. But an even greater barrier to peace is the fear of the current leaders in Saigon that they will lose personal power. Their fear of losing power has caused them to turn away from all forms of democratic procedures. In the elections of 1967 not only were Communists forbidden to participate, but no man could run for office who favored a "neutral" South Vietnam or negotiations with the National Liberation Front. Even with this control over candidates and polling places they received only 34 per cent of the vote, and the runner-up languishes in jail to this day, as do hundreds of other political prisoners. As is the case with the Viet Cong, the Thieu regime also represents a distinct minority in the South. The United States has repeatedly stressed to them the need to broaden their base by allowing representatives of other South Vietnamese nationalist groups to share in the power. President Thieu responded recently by reorganizing his government on an even narrower basis. They silence all critics, shut down newspapers they consider offensive, expel American journalists, allow corruption to continue unabated, and presume to tell us what they interpret our obligations to be. In essence the government of South Vietnam has little more claim to democracy than the government in Hanoi, and has exhibited about as little regard for the exercise of self-determination among the people.

Finally, reality demands that we face our conditions here at home. We are a patient people, strong in resolve and firm in our beliefs. We have always been prepared to work, to sacrifice, to meet any test demanded by the national interests of our country. But the American people are also aware, informed, and far more sensitive to the genuine security interests of the United States than many in Washington are willing to believe. The cost of this war is not lost on our citizens. They know how many have died. They know how many more will die. They are aware of social discontent and the growing alienation of our children and under-privileged. We know our cities are distressed, there are diseases to conquer, the poor to assist, the young to educate. The prolongation of this war has created a national malaise, severe discontent and acrimony. The unity of a people has been periled. But now the ledger is before us and, I feel, the balance has been struck. If it ever was the case, continuance of the war in Vietnam is no longer felt to be in the national interest of the United States. Hence the impatience, hence the dissent.

What conclusions then can we draw from this view of the war?

First—North Vietnam will remain committed and adhere to its political goals. Their bargaining stance has not been weakened by increased U.S. military pressure, as we have seen. On the contrary, it has been the easing of our pressures that has accounted for the small steps toward peace. The North now seeks, and will continue to seek, the end of U.S. influence in the South. They care little about striking the political bargain with us. For we are not Vietnamese, we will never be the government in the South. To attribute their strength or rigidity in Paris to the level of dissent here at home is a convincing but empty argument that is not supported by the history of this war. There was relatively little protest here at home during years of escalation, bombing, and massive troop actions, yet the North remained intransigent. For their bargaining position has largely been determined by years of war, by success, by failures, by their own internal demands—not by disagreements in this country.

Second—The government in Saigon will do all in its power to keep us involved in the conflict, thus avoiding the necessity of dealing with the National Liberation Front, the North, or anyone else. To President Thieu, unchallenged power is equated with our presence, and peace is not worth risking a challenge to this power. And, I am afraid, this condition will prevail absent any action on our part.

Finally—The United States has taken the position that we will not seek a military solution in the field. Our military power has gained one result—it prevented a military conquest of the South by the North. But it has also installed and now retains an unrepresentative government in power. Since we have not won and cannot win this war in the traditional military sense, and since our adversaries have not won and cannot win the war, the only course available to reasonable men is to seek the hard compromise that will stop the violence and end the killing.

The combined armed forces of South Vietnam now number approximately one million men. These men are as well equipped as the adversaries. If they are ever to hold their own, they should be capable of doing so now. And we, no longer dedicated to a military solution, should remove our military presence as soon as possible. But we should do this not because we wish to pass on the war to the South, but because a political settlement is not possible as long as we remain.

Ultimately the future of Vietnam is in the hands of the Vietnamese. They have to make the settlement, not us. And it is the best interest of their people, of the United States and the world community, that they do it now.

Accordingly, I would propose that the United States announce a schedule of U.S. troop withdrawals—an irrevocable decision to remove our ground combat forces as soon as possible, but no later than one year from now, and our air and support troops promptly thereafter but no later than the end of 1972. The Administration may have such a schedule in mind. If so, it should be announced for two important reasons:

First—This unconditional statement of intent would force the government in Saigon, as nothing else will, to begin making the political accommodations for the future. There are many groups that form a majority in the South anxious for peace and anxious to negotiate the peace. But the Thieu regime will never delegate this responsibility to other South Vietnamese as long as they feel they can manipulate the power of the United States. So it is that we must drastically alter our diplomatic position with the South Vietnamese government. They must be convinced that we have not fought for them as individuals, but for larger aims. If they are not willing or able to participate in the formation of a broad-based government, others are, and it is those groups that we will look to for the future.

Secondly—The announcement of withdrawal would have a radical effect on the Paris negotiations. For the first time we would be demonstrating to Hanoi, as well, that we are absolutely serious in our desire for a political settlement, thus giving Hanoi, as well as Saigon, the choice between continued warfare among Vietnamese or accepting a compromise settlement. That opportunity should be used to lay on the table in earnest a proposal for a standstill cease fire while our troops are withdrawn and the Vietnamese negotiate. By so doing we would be making clear our desire that our decision to withdraw would result in an end to the killing and violence.

Finally—I wish to conclude on a more personal note. I feel, as a result of past relationships, that I have some knowledge of the burdens of the Presidency. I speak with some awareness of the enormous challenges that face a President in a time when his nation is at war. I also speak as one who supported earlier decisions that so deeply involved us in this conflict. Whether yesterday's decisions were right or wrong in the context of their time is not the issue. I and many others either agreed or were silent when certain steps were taken that led us deeper into this war. And so it should be apparent that my criticism of Vietnam and that of many others is not directed personally at this or any other President of the United States. It is simply an objection to a national policy that allows a conflict to continue disastrous to us as a country.

I do not believe that President Nixon is committed to continuing the war in Vietnam. But I do believe that this Administration is in danger of committing itself to goals and personalities that guarantee the war's continuance. If we continue to assume that one more year's casualties is worth the possibility of a political breakthrough in the peace talks; if we assume that renewed military power will affect the bargaining position of our enemies; if we cling to the myth that the Thieu regime is so legitimate that it must be retained with American lives, if we rely on Saigon to initiate a move toward peace, or if we hope for a truly representative government to be elected in South Vietnam under the repressions of the current regime—if we commit ourselves to these hopes, the war will continue. We have travelled these paths before, we know them to be empty of promise.

I believe what I and most Americans this day are asking of the President is that he not commit himself to things which will not and cannot occur. We ask him not to shoulder the errors of past policy nor the rhetoric of different times. What is being respectfully suggested is that he develop and speak to us of his own policy—not one based on conditions beyond our control, not one whose success is subject to veto by Hanoi or Saigon. But a United States policy—one that puts our government, our people, our national interest in the forefront. To leave Vietnam only *if* there is progress in Paris, only *if* the battle subsides in the field, only *if* the army of the South is ready, places our men and our future in the hands of others. And at this late date, at this moment in our history, that cannot be considered acceptable.

The last time I addressed the World Affairs Council I had just returned from Vietnam—and I spoke to you of that war and all its tragedy and pain. Almost two years later we meet again to speak about the war—and all its tragedy and all its pain. I can only pray, and I know you join with me in the hope, that we will not have to meet again on this matter.

Yet that possibility remains. It remains as long as you and I, and the leaders of our nation shy from facing the realities before us. It remains as long as we cling to hopes long gone, to cliches and assumptions devoid of meaning—as long as in anticipation of the judgment of the future, we avoid the hard current decisions. This time next year, and the year after, and the year after that, we could still be fighting in Vietnam—still in the pit, killing and being killed, seeking to justify past errors, waiting for something to happen that would justify an ending of the war in the old terms of past wars and past policies.

But if we do that, we will wait in vain. For what we should have learned, at the price of blood and suffering, is that this has been unlike any other war in our history. We have a chance, by ridding ourselves of its burden, to renew ourselves as a nation: to make ourselves better able to shoulder our real responsibilities here and around the world. This process must begin for the good of the nation. I hope that the policies we discuss in this room powered by the moral weight of opinion being expressed outside will cause the process to begin today.

RETENTION OF WEATHER BUREAU STATION AT LYNCHBURG MUNICIPAL AIRPORT

Mr. BYRD of Virginia. Mr. President, the city council of Lynchburg, Va., adopted a resolution at its October 14 meeting, asking that the U.S. Weather Bureau keep its station at Lynchburg Municipal Airport open on a 24-hour basis.

I support this request from Lynchburg. The need for a 24-hour weather watch in the Lynchburg area was clearly shown at the time of the disastrous floods of August 19.

During the night, recordbreaking rains fell on the area and caused considerable loss of life and millions of dollars worth of property damage. This tragedy might have been less serious had adequate warning been available from the Weather Bureau.

In addition, air traffic at the Lynchburg Airport has been increasing, particularly during late night and early morning hours, furnishing another reason for a 24-hour weather station.

Mr. President, I ask unanimous consent that the resolution of the Lynchburg City Council, adopted October 14, 1969, be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION

Whereas, many interests in the area of Central Virginia are served by the Weather Bureau station located at the Lynchburg Municipal Airport; and

Whereas, the increase in the air traffic using the facilities at said airport, and particularly the late night or early morning traffic, demonstrates a definite need for weather information on a 24-hour schedule; and

Whereas, it appearing that the Weather Bureau Station at Lynchburg is the only such station in Virginia not now operating on a full 24-hour schedule each day, and

Whereas, the great need for a 24 hour weather watch in this area was shown recently when in the late night or early morning hours when the local weather station was closed disastrous rainfall and subsequent flooding came without warning to this area, inflicting a great loss of life and property damage in the millions of dollars, some of which may have been prevented or minimized had adequate warnings been given.

Now, therefore, be it resolved by the Council of the City of Lynchburg, Virginia:

(1) That a request is hereby made to the U.S. Weather Bureau, that the Weather Bureau Station, located at Lynchburg Municipal Airport, Lynchburg, Virginia be restored as soon as possible to its former operating schedule of 24 hours each day, and

(2) That a copy of this resolution be sent to the proper officials of the U.S. Weather Bureau, Washington, D.C.

EDWARD T. PETTIGREW, Jr.,
Clerk of Council.

Attest:

BESSIE B. AREAS,
Deputy Clerk of Council.

THE VOTING AGE SHOULD BE 18

Mr. SYMINGTON. Mr. President, for a number of years many Members of Congress have urged that there be submitted to the States a constitutional amendment which would establish a minimum voting age of 18 years throughout the United States.

In a democracy such as ours, it appears desirable that the obligations of Federal citizenship be accompanied by rights to participate in the election of political representatives who establish policies that impose those obligations. Certainly the well-informed young men and women in America today have demonstrated their interest in participating in the decisionmaking processes of their Government.

In this Congress, as in the last, I am a cosponsor of one of a number of such proposals. Senate Joint Resolution 147 provides that:

> The right of citizens of the United States, who are eighteen years of age or older, to vote shall not be denied or abridged by the United States or by any State on account of age. The Congress shall have power to enforce this article by appropriate legislation.
>
> This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within seven years from the date of its submission to the States by the Congress.

Sixty-nine Senators have endorsed a voting-age amendment.

So far, we in the Senate have never had an opportunity to vote on such a proposal. An editorial published recently in the Kansas City Times puts this problem in perspective. I ask unanimous consent that it be printed in the RECORD. I would hope that Congress, before it adjourns next year, would vote to submit a constitutional amendment to the States.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

NIL IS THE WORD ON 18-YEAR-OLD VOTING RIGHTS IN CONGRESS

If there was ever broad support in Congress for lowering the minimum voting age, it has now faded. Of the 30 or so pieces of legislation on the subject that have been introduced since the 91st began last January, none is moving. Not only have committee hearings not been scheduled, but congressional sources report that no action is forecast. We think it is time for Congress to act.

As a candidate for the presidency, Richard M. Nixon said he supported letting youths between 18 and 21 years old vote "not because they are old enough to fight (in war), but because they are smart enough to vote." As President he directed the attorney general last February to study the issue. A report has been completed but not made public.

Mr. Nixon's point might signal a shift in the argument for reducing the voting age. For years, the leading edge went like this: If 18-year-olds are old enough to fight in a war, they are old enough to vote. Unfortunately, that approach, legitimate though it may have been, took on a kind of self-righteous fervor that struck at emotional chords rather than logical reasoning. It is now generally conceded that the oncoming generations of youths are better informed, better educated and far more concerned than those of just a few years ago.

Legislation to lower the voting age from 21 has been floating around in Congress for years. In 1954, for example, the Senate killed a constitutional amendment proposed by President Eisenhower to reduce the age to 18. Hearings were held by the Senate judiciary committee during the last Congress, but there was no further action.

Now the best guess around Washington is that too many lawmakers have had adverse reaction to the student unrest on college campuses, and general rejection of the bearded, unkempt image of youth that seems to prevail. That is an expected, though not necessarily well-based sentiment, since much of the trouble has been touched off by a small minority of students. Then too, lowering the voting age to 18-year-olds would mean that those who form the main source of military draft (18-, 19- and 20-year-olds) would be eligible to vote for or against the congressmen who have kept the conscription system intact.

There is another recent development in Congress, however, that should focus new and serious attention on the voting age. A proposed constitutional amendment for a popular-vote presidential election has passed the House and is expected to clear the Senate, possibly this year. That means choosing a President would be, for the first time, a truly national determination. Right now, states control their own election laws and the presidential electors are based on the size of their congressional delegations.

Statutes vary, and one of the differences among the states is the minimum voting age levels. Persons under 21 are allowed to vote in at least four states, a variance that surely would raise constitutional questions. It is our opinion the minimum age should be adjusted downward. Several states will have the issue on the ballot this year and in 1970.

As things stand, youths between 18 and 21 can participate in the political process—hand out literature at the polls, and the like—but the great bulk of them cannot vote. For the many who are aware and disenchanted with the country's course, the frustration is rawer. They are denied a voice within the framework of the system—at the ballot box.

They should be allowed to vote. The direct-vote presidential election no doubt will help force the issue. But Congress can be responsive and responsible by getting at the problem right now.

INTERNATIONAL COOPERATIVE TRAINING CENTER—A BIG PLUS IN OUR RELATIONS WITH THE UNDERDEVELOPED WORLD

Mr. PROXMIRE. Mr. President, I am proud to report that a U.S. institution located in my State has been responsible for training more than 1,600 leaders from 91 developing nations of the world in the past 7 years. I refer to the International Cooperative Training Center at the University of Wisconsin—a joint effort between cooperatives of the United States and the Agency for International Development.

Coming from all over the world to learn about the operations of cooperatives, most of these trainees come to the International Cooperative Training Center for several weeks of classroom instruction, followed by practical field training with cooperatives in the United States. Participating cooperatives provide this field training, as well as several scholarships to help bring a limited number of people from developing countries to ICTC for training, as their contribution to development programs. These trainees then return to their countries to adapt and put into operation what they have learned at the Center and through their experience in the field with U.S. cooperatives.

Returning trainees are making a significant contribution to the economic and social development of their own nations by working with self-help cooperatives and actually organizing many of them. They are found working in agricultural cooperatives, credit unions, housing cooperatives, rural electric cooperatives, handicraft cooperatives, consumer cooperatives, and agricultural credit cooperatives. They are helping to organize new cooperatives and strengthen older ones, with the aim of increasing income or savings to members.

Followup reports on former trainees tell of increased leadership responsibility in their own countries, development of new cooperative departments in government, and other evidence of progress. One former trainee is helping the banana farmers of Jamaica to organize cooperative banana boxing plants, which will result in uniform quality and improved farm income. Several in Uganda and Tanzania are members of parliament or congress in their home country, where their cooperative training can be utilized very effectively. Another is director of a cooperative training center in Nigeria. Still another is in charge of cooperative education and training in India. The numbers of trainees and positions they hold indicate how effective the ICTC training has been.

The International Cooperative Training Center was established in response to a need, recognized by the U.S. Government and by U.S. cooperatives, for an institution that could provide in-depth study of our cooperative development and teach participants how to relate this knowledge and information to economic and social development in their own countries. Prior to the establishment of the center, many people came from developing countries receiving U.S. technical assistance, to study our cooperatives. However, the U.S. cooperatives were not prepared to provide the kind of comprehensive training these "visitors" expected. Consequently they were given little more than a tour of cooperative facilities.

Center accomplishments have been outstanding. Short and longer term training programs have been developed, and are continually being improved to provide the kind of in-depth training which participants expect to receive. The center now is an institution known around the world as one of the best in the field of cooperative training and education. Teaching staff members have, in addition to their regular teaching assignments at the center gone to several countries as consultants, research work-

ers and trainers to extend the services of the center and to multiply their own effectiveness.

Trainees are particularly appreciative of the opportunity they have of participating in community activities, of being invited into the homes of staff members and the families they meet during their field training period.

After the students return to their own countries, continued rapport is maintained and new information given to former trainees by a quarterly professional journal, the International Cooperative Training Journal, and a newsletter, each with a circulation of more than 5,000. These publications are mailed to every country represented by former trainees as well as to visitors who have registered at the Center.

From the beginning the Center has been almost wholly supported financially by AID funds. AID almost literally has built this outstanding training institution, intending that it should be available to those from developing countries or to dedicated Americans who will go to work in developing countries to assist in cooperative development. Training is the most important factor in successful cooperative development—training of management and members—because this training not only provides expertise in economic development, but also teaches democratic principles and practices. No better investment could be made than that which encourages the practical application of sound democratic principles in developing the economic strength of a nation, allowing a people to determine their own destiny and improve their own level of living.

Although AID built this Center for cooperative training the numbers of AID-supported trainees attending the Center have been declining during the past 2 years. This does not seem to be an efficient utilization of a very important investment at a time in the world's history when the need for developing native leadership for both economic and democratic programs is so vital. Why does not AID urge its mission representatives to send more participants for stateside training? It is true that not all people who need to be trained ought to come to the United States. Some can be trained just as effectively in their own countries. But those who will train others in their home countries and who will be indigenous cooperative leaders have a tremendous advantage if taught in the United States, where they can acquire not only the technical know-how they need, but also can benefit from the extension of their horizons offered by the activities of U.S. cooperatives.

U.S. cooperatives have shown a remarkable interest in the field training of these international students and simultaneously seem to be developing a very heartwarming people-to-people relationship that goes on long after the technical training is over. The Center itself offers the informational groundwork needed to develop strong leaders and trainers for cooperative development. U.S. cooperatives offer their management and administrative skills to show how technical training can be applied.

It seems clear that every effort should be made by AID, both here in the United States and abroad, to make use of this valuable resource, already developed, and to send increasing numbers of people for training at ICTC, at the same time utilizing the voluntary contribution made by U.S. cooperatives.

INTERVIEW OF GENERAL NGUYEN CAO KY

Mr. FULBRIGHT. Mr. President, in April of 1968, an Italian newspaperman had an interview with Gen. Nguyen Cao Ky, of South Vietnam. The report was published in the Washington Post, but it was so long ago that I think most of us have forgotten what General Ky said on that occasion.

Inasmuch as we are spending so much money and losing so many lives to support the government of which General Ky is an important part, it seems to me it would be of interest to the Senate to have the article printed in the RECORD. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the interview was ordered to be printed in the RECORD, as follows:

GENERAL KY CATALOGUES ALL HIS HATES

(By Oriana Fallaci)

SAIGON.—He is the most famous man in South Vietnam, and the most hated. Reactionaries hate him because he is the most hostile enemy of the reactionaries. Liberals hate him because he is the most hostile enemy of the liberals. Americans hate him because he is the most hostile enemy of the Americans. And there are many who think he will not die of old age; that someone will try to eliminate him very soon—which he knows. Not by chance, he likes to define himself as uncomfortable, dangerous, without friends.

At first you wouldn't say it. He is a Vietnamese like many others, neither tall nor short, neither strong nor too fragile. Physically, he distinguishes himself from the others only by his mustache. (Vietnamese don't usually wear them) and by a certain air with which he seems to oblige you to remember that he is Nguyen Cao Ky, general of the Air Force, Vice President of the Republic.

He is not cordial. He smiles very rarely and he is always in a bad mood, filled with preoccupation, a detachment which skims the arrogance. When he shakes your hand (he has very beautiful hands, rather feminine), he looks at you so distractedly that you would say he is not even looking at you. Yet when you go looking for news about him, you learn with surprise that beyond that severe scowling, discouraging appearance there is a personality very colorful indeed, one of those that popular magazines emphasize, women's magazines in particular.

A ROMANTIC ADVENTURER

They will tell you, for instance, that he is a real ladies' man. Before he married his second wife, no one in Saigon could compete with him in certain adventures. Until three years ago, this was his principal "virtue," and he did not deny it. On the contrary, he acknowledged it with pride, explaining that every woman loves pilots, "perhaps because flying represents in her eyes somethink new, a daring way of life."

They will tell you that, besides this, he was a playboy, a heavy drinker, always frequenting night clubs, and you can see it from the way he combs his hair, the way he wears the mauve satin scarf around his neck, an unstudied, casual look to his uniform, yet always so ironed—too ironed.

He even wears it when dressed as a parachutist, the same suit, he used when he jumped at night on North Vietnam on secret missions; all black and close-fitting. With such a suit, he seems a bat with a giant rose at his neck, but what an elegant bat.

Others instead will tell you that no, inside he's a sentimentalist. He abandons himself to these harmless characteristics because of an old despair, the disappointment he had from his first wife, who was French and took advantage of him. When married to her, he was such a good boy; he became a playboy when she left him with five children and he went to live with that show girl. Think of it; a Prime Minister who goes to live with a show girl, committing to her his children. If you understand such a drama, they say, then you will also believe how tender he is, and kind and thirsty for a real, normal family, and that for this very reason he married his second wife, as good as beautiful, 11 years younger yet wise, met on an Air Vietnam flight to Bangkok when she was a hostess who studied mathematics at the University of Natrang.

You will believe that in Bangkok he invited her to dinner along with the entire crew; that seven days later he introduced her to his children to make clear that it was not only a wife he wanted, he also wanted a mother for them. Besides, his wife will confirm such a story; she'll even add that he is a good father; a good husband.

Since the day they got married, he never gave her a reason to doubt his fidelity. It is not true what people tell about the day he flew to Hue on a sentimental journey and she followed him on a military plane but he ordered the control tower to forbid her landing. "Such an order was given because the weather was bad, the landing was dangerous. She was joining him because he wished to spend the weekend with his family. People are so nasty."

THE LUCKY DAUGHTER

Finally, others will tell you that he's superstitious, believes in horoscopes in a fanatical way, questions the astrologers before serious decisions and was very happy when the second wife gave birth to a girl because he already had four sons.

As you don't know, in Vietnam four sons mean good luck, five mean misfortune, and the astrologer had announced to him that a daughter would bring him a future full of good promises, a son would bring him disasters, and because of this he called his daughter Duyen, which means "strange magic."

He denies it with indignation. But he does not deny that his fondest amusements, his real relaxation, is watching cockfights. In his house at Tansonnhut he keeps 100 cocks, and every Sunday afternoon he organizes a show that ends in a hecatomb of blood, feathers strewn all over, breasts and necks and legs torn in pieces.

Not satisfied, he goes looking for cockfights wherever they take place. He can cross half Vietnam by plane and jeep, and enter Vietcong zones without escort, just for that. He admits it, explaining that cockfights are a pretext; in reality, those trips are useful to him to make contact with the peasants.

He likes peasants. With them, he has not a distant relationship; with them, he smiles jovially and shows all his teeth, which are white and strong and scary as the teeth of a wolf. With them, he shakes hands very friendly. He believes in them as Ho Chi Minh and Mao Tse-tung do.

He claims that Vietnam's renaissance depends on the peasants, not the intellectuals. The latter are not able to fight because they are not able to suffer, and they are not able to suffer because they have never been hungry. Before becoming a pilot, his dream was to be a farmer, although he comes from a family of mandarins of Hanoi. In other words, he is of aristocratic descent.

From his tastes, you wouldn't guess it. He doesn't love what we consider good music. He listens to Brahms or Beethoven when he wants to get sleepy; while awake, he prefers the Twist, rock and the Beatles.

He obviously doesn't go to the movie theater, such an easy place to get killed—but he often projects moving pictures in his house, and they certainly are not very deep. They are Westerns and James Bond stories. For books, it's the same. All that he reads is detective stories, his wife says that he possesses an entire library of them.

The French journalist Francois Pelou visited him at the Independence Palace and saw, over his Vice President's desk, two detective stories and a Bible. "Congratulations, I see you are dedicated to serious literature," the journalist said, pointing to the Bible. "Someone just gave it to me," he answered with irritation then took the Bible and threw it away.

He is not religious; he's a confessed atheist. He tells that when he was a soldier, his mother prayed to Buddha for him, and he made fun of her. He says he has never faced the problem of the existence of God and adds that he couldn't care less to know if God existed or not.

A LEADER NONETHELESS

In the light of these anecdotes, therefore, nobody would dare to judge him as a representative character, a man whose destiny was and is to enter into the history of this war, the only possible leader in a country painfully poor in leaders. Yet he is. And you realize it, with astonishment, when you listen to him for more than ten minutes.

The man is not stupid. He has something to say and he says it without fear. To begin with is the fact that he is a socialist, but not a pink socialist, undecided between reforms and compromises. I mean a Marxist socialist, exactly like his enemy Ho Chi Minh.

Like Ho Chi Minh, he does not believe in democracy as we accept it, in freedom as we interpret it. To his eyes, the rich are undebatably corrupt, the poor are undebatably innocent, the social revolution is the only answer to the problems of Vietnam. And not a pacific revolution: a violent, bloody one, if necessary.

The most extraordinary thing is that he expresses this belief without pronouncing the formulas "capitalist," "class struggle," "dialectric." He never read Marx and hasn't the slightest idea of what Marxism means. To those ideological conclusions he has arrived all alone, by instinct, confusedly, between a detective story and a cockfight, and it would be difficult to explain to him that such ideas are not new because someone wrote them a hundred years ago.

Things being like that, it's a mystery how he could become the Prime Minister of Vietnam, then the Vice President of the government most hated by any Marxist. And if "mystery" is not the right word, then we must admit to have understood really nothing about Vietnam and what boils there. Not at random, when you say to a responsible person in Vietnam that Nguyen Cao Ky speaks like a Vietcong, you get this answer. "But most of the Ky generation speaks like a Vietcong."

And perhaps the most dangerous enemy that the Americans have in Vietnam is not the ascetic old man who studied in Moscow and whom the Vietcong tenderly call Uncle Ho; it is this young man with a mauve silk scarf and a past of verve, this pilot whom they hosted during eight months at the air base of Maxwell Field, Ala., and whom Henry Cabot Lodge referred to as "my second son."

SLEEPS AT OFFICE

The interview that follows took place in a house of Rue Cong Ly where the Vice President lives daytimes with his family. At night, they all transfer to the Independence Palace, where they sleep in a room adjacent to his office, on mattresses placed on the floor.

Armed guards control their security. The atmosphere around them is tense, suspicious. The children have learned to keep their heads down and get covered as soon as they hear a gun shot. When Mme. Ky says, "We live like soldiers," her porcelain face seems the portrait of sadness.

Ky's face instead stays imperturbable. For him, the risk is normality, the death threat is routine. And a blind faith holds him: the faith that he can walk through that death threat like an invulnerable god. Maybe he's a visionary; maybe he knows very well what he's doing. Maybe he will end as a Lumumba; maybe he will win as a little Napoleon. Others as ignorant as he is, and as debatable, were able to succeed.

Without judging, your reporter limits herself to telling you what he said. Ky spoke to her for hours, with steady voice and hard eyes. It was a Sunday afternoon in March, 1968, and the artillery thundered around Saigon.

THE CLOSER EVIL

MISS FALLACI—Gen. Ky, many disconcerting things are told about you, but the most disconcerting is the one you said a few days ago: "I know that someone is trying to kill me. But this someone will not be a Communist."

GEN. KY—Exactly so. If someone kills me it will not be a Communist. It will be someone on the other side, someone for whom I am much more uncomfortable than I am for the Communists.

Not all the evil is on the Communist side. The corruption is among us, among our leaders. Nine out of ten are corrupted. And as I am the only one to recognize it, to admit it, many people obviously hate me and have their interest to eliminate me.

Politicians don't like me because I am not a politician, because I am not a diplomat, because I denounce this regime as an inefficient one, an incapable one, and because I say that democracy exists in it only as a name.

Americans don't like me because I tell them what I think, and I accuse them of lying. Americans claim to be here in the name of their principles of democracy and freedom. I do not believe them; at the best, I believe them 50 per cent.

Americans are not here for democracy or freedom; they are here to defend their interests. And not always do their interests coincide with the interests of Vietnam. Americans are here because they want to stay in Asia, to fight communism in Asia, not because they care for us. They do not understand what we need; they do not understand our tragedy.

Look at that Robert Kennedy who says: "Democracy, freedom." Words. His concept of democracy and freedom is simply ridiculous to me, because it is always these big powerful countries talking about democracy and freedom which create colonialism. They begin with saying: "We are here to help you." And then they become bosses, and then they become colonialists. Enough with that.

MISS FALLACI—Gen. Ky, are you speaking about revolution?

GEN. KY—I sure am. What Americans do not understand is that South Vietnam needs a revolution to counter the ideal of revolution from North Vietnam, to demonstrate that not only in North Vietnam there is a need for justice.

Americans want to institute in South Vietnam a kind of democratic regime they have in mind; respect for the laws, freedom of speech and so on. Elections. But what does it mean to speak of elections to someone who dies of starvation? What does it mean to talk about legislative power, executive power, when all that you need is a bowl of rice for your children?

When you go in the villages and you speak to the peasants about voting, they answer by telling you that they're hungry. They don't care about democracy; they care about social justice. So for me, democracy means social justice—that is, distribution of the land, building of houses and schools, no more starvation.

In most of the cases, the men who have been elected in South Vietnam are not the men that people want; they do not represent the people. The people voted for them because someone told them to vote. Our last elections were of loss of time and money, a mockery. They were only useful to elect a regime which is wrong and corrupted and weak and would fall immediately with a revolution.

It is hard for me to say so because I share the responsibility of those elections, I have been voted in them and I am the Vice President of such a regime. But at least I recognize the evil where the evil is and I say that laws must be changed, because what we now have are laws that defend the rich. We need new laws to defend the poor.

MISS FALLACI—Gen. Ky, this is what Ho Chi Minh says, and what the Vietcong say. This is socialism, Marxism.

GEN. KY—Who denies it? I am not afraid of the word socialism. It is the Americans who pronounce the word socialism as if it were a dirty word.

You say I am a Marxist. It is not the first time that a European says this to me. So maybe I am a Marxist. Who cares? I don't know Marx, nor Engels nor any of these white people who were born in Europe. They wrote theories, and I have no time to lose with theories.

Frankly, I don't read. I am not even ashamed to admit that my education is rather poor. I only studied in high school and stopped studying when I was 18 years old and the French closed the schools to send us to the war.

I am a pilot. I have spent my life with airplanes, not reading the books of this Marx and this Engels. I couldn't care less to know that this Marx discovered that the poor must not be poor. I don't need his discovery to know such an elementary thing. I am a yellow man, I am an Asiatic, and I know what my country needs much better than all those white people writing books.

MISS FALLACI—The fact remains, Gen. Ky, that had you read those books, you would realize they say the same things as those people that you are fighting. Could you tell me why you fight the Communists?

GEN. KY—Well, as I told you, I only know what I see here in my country. And what I see about the Communists in my country, well, I don't like it. I mean I don't like to see a son who condemns his mother in the name of the party; I don't like a party that in the name of an ideology destroys the family and the sentiments; I don't like a society where a man becomes a member of the party. Because it is true, that I am against the freedom which causes disorders and prevents social justice, but it is also true that I am against the dictatorship.

I don't know how to explain. Maybe I can explain it so: I don't like the Catholics and the Communists resemble the Catholics so much. They belong to the party exactly as the Catholics belong to the Church. Fanatically. So this is why I fight the Communists.

But I certainly don't reproach them for their program of distributing richness and I perfectly agree with them when they take the land of the rich and give it to the poor. I perfectly agree with them when they give a rifle to a peasant and say to him: "Fight for a better life." I perfectly agree with them when they abolish the privileged classes and when they say that the system of division of classes is wrong. As Confucius says, we must raise the poor and lower the rich until they meet at a level where everybody can live harmoniously, totally integrated.

MISS FALLACI—Gen. Ky, did it never occur to you to doubt whether you are on the wrong side of the barricade? Did it ever occur you to think that you could well stay with Ho Chi Minh?

GEN. KY—Well, if my destiny had been different, I could have been on his side. But what would I be today? I would be a little functionary lost in the cadres of the party as thousands of others, completely silenced by them, and I wouldn't be able to do a thing. Staying on this side on the barricade instead, I am Nguyen Cao Ky and I can do something. Because if it is true that a swallow does not make the spring, it is also true that a swallow announces the spring.

Of course, everything would have been easier for me at the other side of the barricade. Probably I would be less unhappy, too. But I also would be more impotent, and I could not dream my revolution.

MISS FALLACI—However, Gen. Ky, should you one day understand that you were unable to achieve your revolution and that you had chosen the wrong side of the barricade, would you be ready to go to the other side?

GEN. KY—No. When a man chooses an ideal, or a way to realize an ideal, he must follow it until the end without changing system. Should I understand, sooner or later, that I had chosen the wrong way and the wrong side of the barricade, I would prefer to die.

I know very well that my choice is not easy and will be very painful. I know very well that the Communists and I have many dreams in common, common targets, common aims. I know very well that the system of this side of the barricade is wrong, but it wouldn't make any sense to abandon a wrong system for another wrong system.

No, I will never go with them. I'd better die than admit to have chosen the wrong way. The only thing that I can admit now is that my choice is not very practical.

MISS FALLACI—Do you really believe you'll succeed or you only dream to succeed?

GEN. KY—I believe in my destiny so I believe I'll succeed. Unless they kill me. If they don't kill me, I should win, because I am not with the minority. The mass of the people that is, the poor, the peasants, are with me. And it is on the poor, on the peasants, that one must count for a revolution, not on the intellectuals, on the middle-class people. He who is not hungry does not shoot well, or does not shoot at all. My revolution must be done with the peasants and by the peasants and for the peasants.

MISS FALLACI—This is what Mao Tse-tung says.

GEN. KY—Mao Tse-tung is a Chinese, and the Chinese have been our enemies for 4000 years. All our history demonstrates that the Chinese only want to absorb us, destroy us, and what a Chinese says can never agree with what a Vietnamese says.

We hate them, in the South as well as in the North. And when some Americans say that Ho Chi Minh will ask the Chinese to intervene in this war, with their troops. I answer: You are crazy. Ho Chi Minh is a Vietnamese, and he hates the Chinese as I hate them, and he knows that calling on the Chinese would be the mistake of his life. Should the Chinese come to Vietnam, we all would reunite, the South and the North, Communists and Nationalists, and we would fight them together and all our problems would be finally resolved and our country would not be divided any more.

MISS FALLACI—Gen. Ky, what do you think of the Vietcong? What do you think of this fight between brothers? Can you consider the Vietcong as brothers?

GEN. KY—A brother is a man who is with me when I am sad and when I am happy. A brother is a man who thinks like me and the Vietcong don't think like me. They speak my language, they have my same blood, my country, but they are not my brothers. The most I can do is to feel pity for them when I see them dead.

This may scandalize you, but should you have put the same question to the Americans during their Civil War, they would have answered the same thing. Now the Americans are united. A day will come when my country will be united, too, like America, and I will not shoot what you call my brothers any more; they will not shoot me any more.

This is our destiny and the destiny I am fighting for. Until that day, don't ask me to like them. I leave this privilege to you Europeans. You Europeans have fallen in love with the Vietcong. All that they do is good for you; all that we do is bad for you. We are the villains and they are the heroes, like in the Western movies. You admire them for parti pris.

Should we attack the North, the whole world would arise against us, like they infiltrate to the South, and the whole world accepts this. I have not yet understood if yours is romanticism or idiocy.

MISS FALLACI—Maybe it's only respect, Gen. Ky; for instance, respect for their courage, their faith. You must admit that it takes a lot of courage, of faith, to go barefoot against the tanks.

GEN. KY—Who denies that they are brave, that they have faith? Sure they have it. A lot. They are Vietnamese. But our soldiers also have guts. It is you Europeans who accuse them of being cowards—I don't know on what base.

When you follow a combat, you always follow it with the Americans, never with the Vietnamese, as if the war were done only by the Americans. All right, Americans do it, and I thank them for this. But they are not alone, and if the North Vietnamese didn't infiltrate between us, we would not need the Americans and we could finally settle our business without the Americans.

We have not less guts than the Vietcong. I personally am not less courageous than a Vietcong. Oh, you have admired the Vietcong so much for their Tet offensive. Well, it certainly was a brave offensive and an intelligent one. I would call it a rather respectable offensive. But we were not less than them. They only have more discipline than we have, more training because they have kept themselves organized since 1954 and we started only three years ago.

MISS FALLACI—Gen. Ky, in your judgment, why did they lose?

GEN. KY—They have lost because they have trusted what the American press and the Vietnamese press have been saying for years, that we are the cowards, they are the lions. They have lost because they thought that our soldiers would not react and the populations would immediately pass to their side. They have lost because they have wrong information and they have not understood that the mass of the population does not stay with Ho Chi Minh, neither with me; it only stays with its bowl of rice.

They have lost because they had not me to guide them. Should I have guided the Tet offensive, I would have won because I know what is necessary to shake the indifference of my people. You have to wake up their conscience. And to wake up their conscience, you have to recognize their right to the bowl of rice. You have to make them fight for that bowl of rice, and then no army or atomic bomb can stop them.

They have lost because their leaders are old and make the revolution in an old-fashioned way, using the books which were written a hundred years ago by the white people. Their leaders reason like the Americans: interrogating computers, not the common sense.

And then, militarily speaking, they have lost because of a few stupid mistakes. First of all, they had not enough troops. Second, their troops were not sufficiently armed nor sufficiently trained. They did not occupy the right places at the right time. They wasted time with the American Embassy, for instance. Who cares about the American Embassy? How can you waste energies and lives for the American Embassy?

They should have conquered the Tansonnhut Airport, they should have conquered the radio stations, they should have spoken to raise the people: "Here we are, in Saigon. No more Ky, no more Thieu, no more Americans. We are the government now, we are your friends." I would have done like that.

MISS FALLACI—Maybe they will next time. Gen. Ky, do you think they will attack again?

GEN. KY—Sure they will. As soon as they have recovered from their terrible losses—they have lost around 50,000 men all around the country—they will attack again. And this will happen very soon. In my judgment, let's say in May or June. They will attack Saigon, because the decisive battle will take place in Saigon and nowhere else.

It is the Americans who publicize Khesanh and the places like Khesanh. The North Vietnamese are not stupid. They know very well that Khesanh has no importance, not militarily nor strategically nor politically. They have no intention to lose energy in transforming Khesanh into a Dienbienphu.

MISS FALLACI—Gen. Ky, are you not tired of this war?

GEN. KY—No, it is you Europeans, you Americans, you white people who think that Vietnamese are tired of this war, both South and North. It is not true. And the reason is that we never knew the peace or the happiness, and the death is a habitude for us and we are not afraid of it.

Every day for us is the day that we could die. We are ready for it. We are Asiatic—that is, fatalistic. We believe in destiny and we are used to the sufferings. You white people cannot understand. You white people give too much importance to life to the length of life, to the comforts of life. You are not ready to sacrifice yourselves for a dream. Should you have been in a war as long as this one, you would have given up a long time since.

Miss FALLACI. You don't love the white people, Gen. Ky, do you?

General KY. I don't. I am too proud to love you. I am too proud to be a Vietnamese, an Asiatic, a yellow. I never thought that the white race would be a superior race; on the contrary. Should I be religious, which I am not, I would say, "I am the son of Buddha, I am the son of God, I am God. I am the man that God sent to save this country and unify it and give it one day the role it has to have in Asia."

Put into your mind that the future is here among us, not among you white. Europe is old, tired, dusty, and America should not be called any more "the New World"; it should be called "the Old World." Its time, your time, is over. Which is why I couldn't care less for your criticisms about us and about me.

Like all that noise for Gen. Loan's episode. I mean when he shot the Vietcong. Of course I blame him, though I understand him: his gesture was the gesture of a man who loses his control after having seen many of his men killed. But I want to have the right to judge a Vietnamese who kills another Vietnamese and I don't transfer such a right to anybody else. I don't recognize you that right.

Miss FALLACI. You don't, but we take it, Gen. Ky. And the result is not always very positive for you. Are you aware of how hated you are?

General KY. Yes. People always seem to expect the worse from me, abroad especially. I remember when I went to Australia and the posters defined me "Butcher, murderer, dictator." When they realized that I was not that bad, they reacted in total amazement. "We waited for a butcher and we find a small, nice gentleman," the newspaper wrote.

Miss FALLACI. Gen. Ky, is there anybody in the world that you admire apart from yourself?"

General KY. I don't admire anybody except the poor who fight, for their bowl of rice. So let's use the word respect instead of the word admiration.

Well, I respect de Gaulle, for the way he fought during the Resistance and the way he brought back prestige to France. I respect Churchill for the way he fought during the Second World War. Then Stalin, for the same reason. But maybe, instead of Stalin, I should say the Russian people, for their patriotism, their courage. Ho Chi Minh, I don't know: it's difficult for me to judge Ho Chi Minh objectively.

And then I respect my cocks when they fight.

Miss FALLACI. You are a man in trouble. Gen. Ky; you could lose also staying alive.

General KY. Well, for a man like me, there are only two solutions: to win or to be eliminated. So you may be right when you say that I am a man in trouble. But perhaps it is righter to say that I am tragic man.

The fact is that it is always tragic to be a Vietnamese. Being a Vietnamese means to be in the middle of a struggle between two giants—or three giants—who don't give a damn for you and use you as a bullet to shoot each other. America and Russia. America and China. Russia and China. We are the pretext for their vanity, which only looks at the conquest of the power, of the supremacy. And in such a struggle, we risk being quashed without pity.

Even Ho Chi Minh knows this plain truth. Even you Europeans. Everybody knows. Everybody but the Americans. But trying to explain this to the Americans would be as hard as to explain to them that the word socialism is not a dirty word and there is no other answer to the civilization that they propose to us. Their civilization of robots.

It is impossible to talk with the Americans, not because they don't want to talk; because they don't understand. Once I tried with a specialist in foreign aid. He wanted to know why Americans are so much hated today in the world in spite of all the help they give.

So I said: "Because it is not what you give; it is how you give it." And he asked, "How should we give it?" So I said, "I could teach it to you. But it would take tens and tens of years. Better, generations and generatons. Better, a civilization of thousands of years."

He did not understand. He could not. He was too much a product of a world dominated by the computers, the technology, the three giants who use us Vietnamese and the small countries like the Vietnamese as instruments of their fight. If I will not be be able to win, it will be only because a man alone can no more win in a world dominated by those giants, those computers, that technology. It is all.

Miss FALLACI. Thanks, Gen. Ky.

Gen. KY. Thanks to you for having listened to me. You see. I am a very lonely man. Very lonely. Really Lonely. It happens so rarely to me to talk with someone, I mean someone who really listens to me. And when it happens, I feel almost happy, because I feel less alone.

RESPONSE TO EDITORIAL ON VIETNAM MORATORIUM, BROADCAST BY WAJM–FM, MONTGOMERY, ALA.

Mr. ALLEN. Mr. President, I have been favored with a copy of a letter written to President Nixon by Mr. Boyd E. Quate, president of radio station WAJM–FM, Montgomery, Ala., on the subject of the Vietnam moratorium. The letter tells of a tremendous response from the people of Montgomery to an editorial broadcast by the station on the subject of the moratorium. The response to the editorial was such that it makes me extremely proud to be an Alabamian. I believe that the attitudes revealed are both significant and instructive.

I ask unanimous consent that the letter and the editorial be printed in the RECORD.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

WAJM–FM,
Montgomery, Ala., October 21, 1969.

President RICHARD M. NIXON,
The White House,
Washington, D.C.

DEAR PRESIDENT NIXON: We thought you might be interested in the attitude of some Alabamians in regard to the Moratorium held October 15, 1969.

We broadcasted an editorial on the radio station all day on the 15th and the response was so gratifying that we have decided to pass the information on to you. Each time we broadcasted the editorial we asked for comments and as a result the phone rang constantly from 6:00 A.M. until 11:00 P.M., with an average of one call every three minutes. Of the phone calls 98.3% were against the Moratorium and for our editorial (a copy is enclosed). In summary, in Alabama at least, for every person that is against you, there are 50 on your side, as far as the war in Viet Nam is concerned.

The following is typical of the comments that were made:

Hooray for your station. My husband was in World War II. Thank God that he came back. The dead from all the wars that involved America, to see how some Americans are acting today, must be looking down and weeping for them.

May God be with the wounded and the brave people who died and the men in the world who are still fighting to save our country from the evils of other countries.

Thank you again for your program on this day.

Sincerely yours,

BOYD E. QUATE,
President.

A WAJM EDITORIAL, OCTOBER 15, 1969

Today there is something going on called Viet Nam Moratorium. We at WAJM are very much against this Moratorium. We think it is stupid, if not out right treason. We believe we should remember the Alabama boys who died in North Viet Nam. We believe we should remember our fighting men who are still prisoners of North Viet Nam. We believe we should do what is best for the fighting men who are still in Viet Nam. If you agree, we suggest you drive with your lights on today and fly the flag. Let the world know that in Alabama "good old-fashioned patriotism" is not dead. If you believe the President should do what is best for the U.S.A., and not what North Viet Nam wants us to do, then we ask you to join thousands of other patriotic Alabamians in protesting today's Moratorium action. If you would like to comment for or against the Moratorium today, please phone us at 269–2506. Thank you.

CYCLAMATES VERSUS CIGARETTES

Mr. MOSS. Mr. President, a letter to the editor, published in a recent issue of the New York Times asks: If cyclamates which are suspected of causing cancer are to be removed from the market, how about cigarettes, which have been proved to cause cancer. Well, why not?

I ask unanimous consent that the letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

[From the New York Times, Oct. 22, 1969]

DOUBLE STANDARD

To the EDITOR:

A perfect example of a double standard:

Cyclamates (which in theory may cause disease in human beings) are to be removed from the market. Probably a proper precaution.

Cigarettes, which, beyond any shadow of a doubt, are responsible for thousands of deaths each year, remain on the market. In fact those who produce tobacco receive substantial Government subsidies.

Sheer hypocrisy! A most blatant example of how supposedly responsible Government officials bow to pressure groups with vested interests.

RICHARD R. BASS, M.D.
KARL NEUMANN, M.D.
REUBEN H. REIMAN, M.D.
JOSEPH SOLOWAY, M.D.

FOREST HILLS, N.Y., *October 18, 1969.*

NATIONAL BUSINESS WOMEN'S WEEK

Mr. BENNETT. Mr. President, during the week of October 19 through the 25th, 180,000 members of the Business and Professional Women's Clubs, Inc., celebrated National Business Women's Week.

During this week, the more than 3,800 member clubs located in every State in the Nation as well as the District of Columbia, Puerto Rico, and the Virgin Islands, have turned their spotlights upon outstanding women in their communities and the role of women in today's world.

In honor of the working women of the United States and on the 50th anniversary of this outstanding organization, I think it is fitting that we note the strides made by women in this Nation during the half century.

In 1920, when many mothers of today's teenagers were born, a woman's life expectancy was 55 years. In 1967, it was 74 years. In 1920, for every 100 girls 17 years old in the population, only 20 were graduated from high schools: in 1968, the comparable figure was 78. Finally, in 1920, only 23 percent of all women were in the labor force, and the occupational choices were generally very limited. In 1968, 42 percent were in the labor force in nearly 500 different occupations.

The number of women earning college degrees has risen significantly in recent years, for a record high of 345,068 in the 1967–68 school year. In 1968, they received 41.5 percent of the bachelor's or first professional degrees; 35.8 percent of the master's degrees and 12.6 percent of the doctorates.

Although the primary role of the woman has traditionally been in the home as a wife, mother, and homemaker, the role of the woman as a working person will undoubtedly continue to grow. Only recently, it was estimated that by 1980 49 percent of all women 18 to 64 years of age would be in the labor force. But this figure has already been reached—49 percent of all women of these ages were in the labor force in April 1969.

The woman has made great strides in last half century. She has been given the franchise and, in fact, has become an important political factor that no aspiring candidate for election takes for granted.

She has been, to a significant degree, empancipated from many of the drudgeries of housekeeping through the miracles of industrial advancement which leave her more time to devote to her family and outside work and other interests.

Although I believe there are still significant areas in which American women will yet become involved as discrimination continues to give way to genuine ability regardless of sex, the American woman has come a long way.

PENALTIES FOR VIOLATIONS OF DRUG ABUSE LAWS

Mr. HUGHES. Mr. President, Dr. Stanley F. Yolles, Director, National Institute of Mental Health, recently made a statement in defense of his position in favor of removing minimum mandatory penalties for violations of the drug abuse laws. I believe this to be a clear and informed statement on an extremely important subject.

I ask unanimous consent, that this statement of one of our Government's respected public servants be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY DR. STANLEY F. YOLLES

I believe along with many physicians, judges, law-enforcement officials, probation officers, and other persons who deal with law breakers that the principle and effects of mandatory minimum penalties defeats the whole purpose of treatment and rehabilitation of drug users; it unnecessarily limits the courts and negates the traditional American expectancy that each individual will be heard by a court of law in terms of his intent, the circumstances of his alleged offense, and his potential ability to be rehabilitated.

In response to the specific question asked by Congressman Watson my reply in favor of removing minimum mandatory penalties was in the context that most "pushers", or sellers, of narcotics are addicts themselves and therefore an unqualified yes or no answer was impossible. I *emphasize* that each violation of drug abuse laws must be decided on its merits to allow the judge to: fit the penalty to the crime; give a maximum sentence; suspend sentence; give an indeterminate sentence; or to see to it that the addict gets treatment.

I would not favor adoption of many legislative proposals in their current form, without further consideration of medical and scientific data, as well as further consideration of statements made by judges, probation officers, prison officials and others who oppose mandatory minimum penalties for drug offenders.

If mandatory minimum sentences really were deterrents to criminal conduct, then there would be little justification for limiting them only to narcotic and marihuana offenders.

Mandatory minimum sentences bear little or no relationship to the public good, to public health or to mental health.

TENNESSEE WALKING HORSE

Mr. TYDINGS. Mr. President, I have introduced and held a hearing on a bill designed to terminate the longstanding practice of deliberately making sore the feet of Tennessee walking horses in order to alter their natural gait.

"Soring," as the practice is known, is both cruel and inhumane.

At present, the bill is being rewritten to insure that horse shows which make an honest effort to exclude sored walking horses from the ring are not unfairly penalized. Other changes are being contemplated, although no final decisions have been made.

The bill, if reported and enacted, will be an improved piece of legislation and will go a long way toward putting an end to a barbaric practice.

I recently received a fine letter from a young girl, Ceci Carmichael, who is 9 years old. Miss Carmichael asks a question that I have often asked myself:

Why do they have to put horses in agony to train for some shows?

I ask unanimous consent that Ceci's letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C.

DEAR SENATOR TYDINGS: Why do they have to put horses in agony to train for some shows? They should just put a stop to this so that these horses won't be in agony.

There *has* to be some other way that won't hurt the horse.

CECI CARMICHAEL,
Horselover.

FRAMINGHAM HEART STUDY FALSE ECONOMY

Mr. KENNEDY. Mr. President, on October 3, 1969, officials of the National Heart Institute confirmed that the Institute's support for the Framingham heart study, in Framingham, Mass., would be phased out at the end of the current fiscal year because of the lack of funds. I am deeply concerned about the imminent termination of this important program. In recent weeks, I have strongly protested what I believe are false economies in the proposed cutbacks in Federal funds for medical research. Once again, with the closing of the Framingham heart study, we see the high price we are paying for the war in Vietnam abroad and the fight against inflation at home.

The closing of the Framingham heart study is especially difficult to justify in light of reports that eminent scientific review panels have repeatedly recommended continuation of the study. The sole reason for the termination, as stated by the National Heart Institute, is the lack of about $400,000 and about 20 staff positions needed to continue the study.

Since its inception in 1949, the Framingham heart study has established an international reputation for its detailed investigation of heart disease in the 5,000 members of the Framingham population group who have participated in the study. In the 20 years of its existence, a remarkably low number of the participants—only 2 percent—have dropped out of the study. The data accumulated over the years now represent an unparalleled source of information on the etiology not only of heart disease, but also of a wide variety of other conditions, such as stroke, arthritis, diabetes, lung disease, high blood pressure, and blood cholesterol. Indeed, as described by Dr. Abraham Lilienfield, professor of chronic diseases at Johns Hopkins University and the head of a review panel that recommended a 10-year continuation of the project, the Framingham study population is a "national research resource."

At the time the closing of the Framingham heart study was first announced, I wrote to the Director of the National Heart Institute, urging him to restore the funds for the study. Since the original announcement, the plans to terminate the program have attracted wide concern. Yesterday's Washington Post, for example, contains an excellent and informative article by Mal Schechter on the history of the program and its potential for the future. I am hopeful, therefore, that the decision to phase out the program will be reviewed, so that this important national health resource will not be lost to the Nation.

Mr. President, I believe that Mr. Schechter's article will be of interest to all Members of Congress who are concerned with our Nation's health priorities.

I ask unanimous consent that it be printed in the RECORD. I also ask unanimous consent that a news report published in the New York Times of October 3, 1969, announcing the closing of the Framingham program, be printed in the RECORD.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

[From the Washington (D.C.) Post, Oct. 25, 1969]

PURSE STRINGS STRANGLING A MAJOR HEART OPERATION

(By Mal Schechter, free-lance medical writer)

In 1949, some 5,200 men and women aged 30 to 62 joined the federal government in an unusual undertaking: the study of heart disease as it would develop in a defined population apparently healthy at the start. The dropout rate among the 5,200 has been an amazingly low 2 percent; only 100 or so have given up. But a single additional dropout threatens to end the project. That quitter is the federal government.

Obeying orders from on high to economize on money and manpower, the National Institutes of Health have quietly ordered a phasing out of the work, with termination in mid-1971. The $400,000 and 27 "slots" it takes to run Framingham annually will be deployed at NIH's home campus in Bethesda. To keep Framingham going would hurt core functions, NIH says.

To kill Framingham would be "criminal," says Dr. Abraham Lilienfeld. The professor of chronic diseases at Johns Hopkins University headed one of several NIH review groups that recommended continuation of Framingham on grounds of scientific merit and promise. "Framingham is a national research resource," Dr. Lilienfeld declares, saying that the study population has implications in other research than heart disease. His group urged NIH to continue Framingham for another decade as a stroke study and possibly as a study of senile dementia, pulmonary disease, arthritis, diabetes and hearing and sight impairment. Indeed, Framingham could serve in a general study of aging; many of its participants are entering the 50-to-80 age range.

"If the program were to be terminated and studies of these important areas of human biology and public health were to be initiated elsewhere, the costs would be many times greater than that necessary for the continued maintenance of this study population," said the Lilienfeld report, made available by a government source. "More important, there

would be a long delay in obtaining the necessary data."

A PREVENTIVE ROLE

Framingham's record gives weight to the Lilienfeld perspectives. The big harvest of the 20 years study has been the definition of factors that predispose an individual to having a heart attack. The "coronary-prone" person has high blood cholesterol, has high blood pressure, smokes cigarettes heavily and lives a sedentary life. These are a few of the factors that must be considered by a physician working to lower the probability of an attack in a coronary-prone person. In this way, Framingham holds an enduring place in the research underlying preventive medicine.

Framingham provided a model for studying chronic diseases in general. Classic epidemiology, which is the study of disease in a population, was devoted to the acute infectious diseases such as malaria, typhoid and diphtheria. A defined infectious agent could be detected by the illness it caused as it moved through a population. By eliminating a source of infection (such as polluted water) or the vector of the infectious agent (such as mosquitoes), the disease could be prevented.

The epidemiology of chronic diseases is different, if not more complex, because often no infectious agent is seen. There is no single obvious cause. Probably there are several interacting factors, none predominating. Some may be biological but some may be psychological and behavioral. And it is hard to find the beginning of a disease process that takes many years to reach a dramatic expression, such as a heart attack.

ISOLATING THE FACTORS

In revolutionizing the epidemiology of heart disease, Framingham demonstrated the power of what scientists call a prospective study. A population in which heart disease had yet to become epidemic was picked. Its members were studied in many ways, not just biologically. The periodic examinations build up baselines for various psychobiological functions. These were watched for changes.

When an individual had a heart attack, he could be compared with his peers in the study group—both those who had had an attack and those who had not. The factors making for heart attacks could be ferreted out.

This kind of study is prospective because no one knows who will be a heart attack victim. In a retrospective study, the victim is the starting point. He is studied intensively after the attack. But preattack measurements of, say blood components may be not available. Moreover, if they are available, they probably are not available on a standardized basis. Not only comparison between victims but also comparison between victims and nonvictims is impossible for lack of data systematically collected beforehand.

Framingham can do this. In its refrigerators, containing 34,000 frozen blood specimens, Framingham has the capability of going back to blood first stored in 1951 to see if a constituent discovered or first deemed important in 1969, for example, existed in a volunteer's blood a decade before he had an attack. NIH once described Framingham's files as containing baselines for "irreplaceable" experiments of nature.

Some 22 volumes of data and analysis have been put out by the Framingham investigators. They cover heart disease and some other diseases, for Framingham found, as time marched on, that it had marched beyond coronary heart disease. In addition to the 334 volunteers who suffered heart attacks, some 160 have had strokes.

"The study of stroke itself," said the Lilienfeld review group, "would be of sufficient importance to justify continuation of the follow-up of the Framingham cohort for another 10 years." Looking even further, it recommended consideration of the feasibility of monitoring the deaths of offspring and siblings of volunteers as part of an attempt to define familial patterns associated with chronic diseases.

A DOUBTFUL ALTERNATIVE

All of this suggests that Framingham has outgrown its 1949 origins in the National Heart Institute as a coronary disease study. If this is true, as Dr. Lilienfeld thinks, then NIH's argument for the phaseout—that Framingham has pretty much accomplished its original mission—is beside the point.

The NIH administration says it would be happy to have a Boston medical school take Framingham under its wing as a stroke study, but the school would have to win a grant priority from an NIH study section composed of nongovernment scientists. Would a study section be inclined to vote support for a project on a grant basis when that project had been killed as an NIH intramural function?

NIH grants are on short fiscal rations. Even if a grant priority were obtained, it probably would not be high. Typically, NIH gives low priority to epidemiology studies, Dr. Lilienfeld says.

The possibility of a consortium of intramural sponsors has been raised. The National Institute of Neurological Diseases and Stroke, the National Institute of Mental Health and the National Institute of Child Health and Human Development might be able to put together enough money to continue Framingham. However, all institutes are said to be short of "slots" because of government-wide restrictions on replacing departing employees. (The heart institute was particularly hard hit on this score.)

NICHD, for example, is hard put to fund and staff adequately its own prospective study at the Gerontology Research Center in Baltimore. A House appropriations subcommittee recently noted that this study of aging in more than 600 men is conducted in a specially built structure that is one-third unused because of budget austerity.

A PRESIDENTIAL PREROGATIVE

In sum, then, Framingham's future appears "iffy." The study population seems likely to outlive the study unless Congress steps in. Under Sen. Warren Magnuson (D-Wash.), a Senate appropriations subcommittee may heed cries of Dr. Lilienfeld, the American Heart Association, the American College of Cardiology and the American Patients Association to keep Framingham alive.

In the long run, however, Framingham's fate is up to President Nixon. He can refuse to spend the money even if Congress earmarks it. Although emphasizing a need for preventive services to minimize high-cost hospitalization, the Nixon administration apparently has been unimpressed by the relationship of Framingham to the development of preventive medicine.

In testifying before Sen. Magnuson, Secretary Robert H. Finch of the Department of Health, Educaton and Welfare loosely referred to Framingham in his prepared text as "a long-term study of heart disease among middleage males." Actually, Framingham is the largest study of heart disease in women as well as men.

Finch said the decision to phase it out was NIH's. But that decision was not made until the Nixon administration decided last spring to pare $38 million from the Johnson NIH budget of $1.484 billion. In addition, the hold on staff replacements became tougher at that time. All told, NIH ends up with $217 million less than it asked for fiscal 1970. And its staff is 5 per cent under the June, 1968, level.

Dr. Lilienfeld says that "in terms of national priorities and its own role in research, NIH has a great contribution to make in epidemiology. It should do those things that other institutions cannot do as well—the conduct of expensive, long-term studies." These require long-term commitments from staffers and from the funding source, he adds.

"These studies are more within the province of NIH than are laboratory research projects that academic institutions can handle. Nobody else can do these epidemiology studies as well as government," he says. "But government wants to drop out."

[From the New York Times, Oct. 3, 1969]

BIG STUDY PROGRAM ON HEART ATTACKS TO CLOSE BECAUSE OF FUND SHORTAGE

(By Harold M. Schmeck Jr.)

WASHINGTON, October 2.—A major study program of the National Heart Institute, which has collected invaluable data on heart attack, rests for almost 20 years, is being closed down for lack of about $400,000 and about 20 staff positions.

The program, the Framingham heart disease epidemiology study in Framingham, Mass., is internationally known for its work. Stringent budget and manpower limits are forcing the institute to close it down, a spokesman confirmed today.

The decision was made recently in the course of budget reviews.

Since 1949 the program's scientists have been collecting data on about 5,000 men and women in their 30's, 40's and 50's who live in Framingham.

It is believed there is no comparable study population in the United States on which a like amount of data has been collected. There are other community studies of heart disease, but most of them concentrate on men in specific occupation groups.

The Framingham study had provided important data on such factors as high blood pressure, cigarette smoking, obesity and the concentration of cholesterol in the blood as indexes of the risk of serious heart disease.

Generally speaking, the risk of heart attack and death from coronary heart disease rises with these factors and with combinations of them. This kind of information has helped doctors identify high-risk patients early so that corrective measures can be taken.

For example, if a middle-age patient smokes heavily, has high blood pressure and is seriously overweight, the doctor can tell him what the odds of a heart attack are and how they may be improved.

Much of the data that could be expected on heart disease have been obtained by now. In recent years, data of the same sort have been accumulating on stroke and other circulatory problems because strokes tend to occur later in life than heart attacks.

The Framingham program is scheduled to be phased out by June 30, 1970.

After that, a small staff will be maintained to compile records on members of the study population who die or are hospitalized, but it will not be possible to collect the thorough data obtained in the past.

Since 1949 each person in the group of Framingham residents has been given a thorough physical examination every two years so that the scientists can observe the progression of health and disease as the individual grows older.

The closing seems to preclude the possibility of collecting data on stroke comparable to those collected on heart disease since 1949.

Dr. Robert L. Ringler, deputy director of the Heart Institute said today that the study would be a source of valuable information on strokes, which kill an estimated total of 200,000 Americans every year.

"Our position is that we recognize this," he said in answer to a query, "but we also recognize the dollar and personnel constraints."

Dr. Ringler said it cost roughly $400,000 a year to operate the program, which has a staff of about 27. He said the Federal ceiling on manpower was at least as important in the institution's decision as the limit on funds

The plan to close the program was not announced formally, but was noted briefly today in a newsletter called American Patient, published by the American Patents Association, a consumer group. Officials at the Heart Institute confirmed the report.

IMPROVED OPERATION OF FEDERAL-STATE-LOCAL SYSTEM OF GOVERNMENT

Mr. HUGHES. Mr. President, we are all aware that if our federal system is to function at the optimum level and adapt satisfactorily to changing times and needs, our concept of it must be continually reexamined and renewed. There is no more useful commentary than a thoughtful analysis of what is required to improve the operation of our federal-state-local system of government.

One of the most thoughtful recent statements on this subject was made by William G. Colman, Executive Director of the Advisory Committee on Intergovernmental Relations, in an address before the meeting of the American Bar Association Section of Local Government Law at Dallas, Tex. I ask unanimous consent that this provocative address be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

MAKING OUR FEDERAL SYSTEM WORK: A CHALLENGE FOR THE 1970'S

(By Wm. G. Colman, Executive Director, Advisory Commission on Intergovernmental Relations, Washington, D.C.)

"We shall be as a City upon a Hill, the Eies of all people are upon us"—From a sermon by John Winthrop, aboard the *Lady Arbella*, 1630.

Our ideal from the beginning was an exemplary system, a "City upon a Hill." But many of our inner cities at present are little better than mudsills of our society. Indeed, they have become the great mirror reflecting much—if not most—of what is ugly, urgent, and fearful in our governmental system.

The crisis of our cities in truth has become the crisis of our federal system, for the agonizing agenda facing us domestically faces our cities initially and most insistently. Seething racial unrest and civil disorder, burgeoning crime and delinquency, alarming differences in individual chances for a good education, and wide variations in housing and employment opportunities—these are the big issues being fought out at the local level. Yet, the manner in which we meet these challenges in the long run will largely determine the fate of the American political system. It will determine if we can maintain a form of government marked by partnership and wholesome competition among national, State, and local levels. It serves as the great "Challenge for the 70's."

Because these problems are so deep, complex, and intertwined with one another; because they involve more than the fate of our localities but that of federalism as well, it is proper at the outset to look briefly at the range of issues that beset local America—especially urban America.

THE AGONIZING AGENDA

The basic intergovernmental problems besetting urban localities form a five sided pattern. *First and foremostly*, political and fiscal fragmentation at this level has resulted in a monstrous mismatch of needs and resources. Yet, as Mr. Justice White noted in the *Midland County, Texas*, case, ". . . In a word, institutions of local government have always been a major aspect of our system, and their responsible and responsive operation is today of increasing importance to the quality of life of more and more of our citizens . . ."[1]

Within metropolitan areas, over 80 percent of the nation's bank accounts are located; over three-quarters of Federal personal income taxes are collected; and 80 percent or more of the value added by manufacture occurs. At the same time, in these same areas local government faces its fiercest challenge with increased crime and delinquency; schools that are becoming jungles of terror; neighborhoods that are blighted; poverty and disease that are rampant and with millions of our citizens feeling completely alienated from their local government. Above all, in these metropolitan areas, the doctrine of ordered liberty is most seriously challenged. How many of our urban citizens, in fact, accept the soundness of Charles Evans Hughes' precept that:

. . . Liberty in each of its phases has its history and connotation. But the liberty safeguarded is liberty in a social organization which requires the protection of law against the evils which menace the health, safety, welfare, and morals of the people. Liberty under the Constitution is thus necessarily subject to the restraints of due process, and regulation which is reasonable in relation to its subject and is adopted in the interest of the community is due process . . .[2]

When historically tested tenents like this are in doubt then meaningful freedom is in doubt. Overall then, most of America's wealth and most of America's domestic problems, including a frontal challenge to freedom itself, now reside side by side in metropolitan areas.

Why then cannot this vast wealth be applied through vigorous social measures to meet the growing problems? Because, as every local, State, and Federal official knows, the resources exist in metropolitan jurisdictions other than those having most of the problems—or they exist in forms that localities cannot reach. Through a large portion of the country, this gap between needs and resources is a gap between central city and suburbs. Here the fact of jurisdictional fragmentation accentuates the problem of fiscal disparities. Local governments typically denote the power to tax and the power to spend for public purposes. With a jungle of jurisdictions in most metropolitan areas, we achieve a parallel pattern of fragmentation of the local tax base. Since the major source of revenue for most local functions is the property tax—especially for education—the fiscal disadvantage for the core city is all too clear. Increasingly populated by low income, nonwhite people, marked by a continuing exodus of businesses and moderate and upper income people to the suburbs, America's central cities are faced with the necessity of spending abnormal amounts per pupil for education and abnormal amounts per capita for such functions as sanitation, law enforcement, and welfare.

Second, the overall pattern of urban development generally has followed a disorderly, destructive, and distasteful course. It is a product of a relative *laissez-faire* land use policy on the part of larger jurisdictions and a generally potent but parochial interventionism or a purposive abstentionism on the part of local jurisdictions. The overall result of these policies, if such they can be called, has been a passivity on the part of government with respect to the migration of people, the concentration and location of industrial development, and the forging of urban growth policies.

Local governmental activities are marked largely by economic competition, exclusionary zoning, and building code anarchy. State governments usually have been indifferent to urban needs and rarely willing to challenge the parochial land use practices of their localities. The Federal role has been wholly confused and ambivalent. On the one hand, Congress enacts areawide planning requirements, strengthens representative regional bodies, adopts programs to assist the rehabilitation of central cities. On the other hand, the Federal-State highway program, FHA's activities, the failure to adopt an equitable relocation program, and various location decisions of the Department of Defense and other Federal agencies have not always given adequate consideration to overall urban development policies (and that is an understatement).

The result of all this at all levels has been to accentuate wrong-way migrational patterns of people and business; to forge a white- and high-income noose around increasingly black and poor inner cities; and to chain much of the rural America to a continuing course of gradual erosion.

Third, most, but not all, State governments have been hesitant if not fearful in grasping the urban nettle. As the road to the present urban hell was paved, many major sins of omission and commission can be ascribed to the States. Cities and suburbs, counties, townships, and boroughs alike are, after all, legal creations of the State. The deadly combination of restricted annexation and unrestricted incorporation; the chaotic and uncontrolled mushrooming of special districts; the limitation of municipal taxing and borrowing powers; the abdication of the all important police powers of zoning, land use and building regulation into the hands of thousands of fragmented and competing local governments—these are but a few of the byproducts of decades of State government's nonfeasance and malfeasance concerning urban affairs.

Some describe the States as "the great arch" in our federal system. In a strictly legal sense, this is an accurate description—insofar as localities are concerned. Yet more often from the local vantage point, the State has appeared like an infrequent visitor, slinking through back alleys, and blind to the real problems marching up the zesty thoroughfare of municipal life. A decade ago, Earl Warren explained all too well the results of State inaction and ineptitude:

"When the state governments fail to satisfy the needs of the people, the people appeal to the Federal Government. Whether the question is one of the advancement of human knowledge through research, of law and order, or the right of all persons to equal protection of the law, the Federal Government need become involved only when the states fail to act."[3]

Fourth, the imbalance of the intergovernmental revenue system has further complicated the life of local government officials. Yes, even State officials are not without this worry. Both the States and localities have been laboring under increasing handicaps as more of them strive to meet their growing responsibilities. The Federal income tax has funded a rapidly rising scale of domestic expenditures from the Federal budget since 1950 despite net decreases in rates over this period. State governments, dependent upon consumption taxes and moderate-to-low rate income taxes, have had to raise rates and impose new taxes time after time in order to keep abreast with increasing education and other domestic expenditures. Local governments have had to do likewise with property taxes and miscellaneous nuisance taxes. The political landscape has been strewn with defeated Governors, mayors, and county officials courageously committing suicide at the polls in doing what had to be

done to increase the resources of government to meet, in part at least, the escalating service demands from an insatiable (and unappreciative) public. Yet, as former Governor Terry Sanford has observed: "Taxes, so unpleasant and so politically hazardous, constitute the red corpuscles of government."

Fifth and finally, a phenomenal growth in what we might call "functional" government has occurred in recent years as a result of greater intergovernmental activity in areas like welfare, health, housing, education, and transportation and of a static or supine position on the part of top policymakers at the Federal-State-local levels vis-a-vis the administrators and pressure group supporters of the individual programs. Functional government reached its zenith in the mid-and late 1960's when Federal categorical grant programs passed the 400 mark. With each new category and subcategory, a new crop of specialists and subspecialists was spawned to administer and propagandize and few, if any, counterbalancing efforts were made to strengthen the position of the department secretaries, the governors, or mayors.

Functional specialists in each aided field typically consult with one another in the formulation of regulations for the aided program. Similar consultations produce draft amendments to enabling legislation and draft bills for completely new programs. The bypassing of general political leadership is not so marked at the Federal level because plans of the specialists must receive the approval of Cabinet officers and the Budget Bureau before transmittal to the Congress. In State and local government the story is different—with political executives being told that a grant is available if matching money can be raised and the accompanying package of regulations adopted. The lure of "50 cent dollars" is usually impossible to resist.

A MULTI-FACETED PROGRAM WITH A SINGLE PURPOSE

These then are five major factors that have generated an incredible and seemingly insoluble array of difficulties for local governments generally and especially for those in urban areas. These factors, however, also reveal the overall institutional agony of our entire intergovernmental system. Moreover, they serve as a stark reminder that even in this age of lunar exploration we have yet to enshrine the precepts of Jefferson's Declaration of Independence within the firm foundations and practices of Madison's constitutional order. From a historical, sociological, political, and certainly a legal vantagepoint, the quagmire of our cities is the major problem of the hour and each of these disciplines has its contribution to offer.

Let us focus then on the governmental and specifically the intergovernmental aspects of the problem. Over the past nine years, the Advisory Commission on Intergovernmental Relations has grappled with these and many other tension-ridden topics that impede effective Federal-State-local relations. As a bipartisan Commission, composed of 26 members from the public-at-large and all levels of government, it is actually a national body representing all levels and is not dominated by any one level of government.

In its several probes of the urban crisis, the Commission has developed an interrelated program of new intergovernmental initiatives—in short, a "Program for the Seventies." This program involves recommendations that seek to civilize local government's jurisdictional jungle; to restore fiscal balance in our federal system; to achieve a strong State urban commitment; to curb the vertical "functional autocracies"; and to achieve explicit overall national and State urbanization policies.

1. Facing up to fragmentation

Only the States have the power to rationalize and to render less harmful the complex array of overlapping governments found at the local level. To discharge this Herculean assignment, a wide variety of State and Federal statutory changes will be necessary, along the following major lines:

An "Arsenal of Weapons" in Permissive Authority Should be Provided to Local Governments to permit them to cope with the spread of population beyond jurisdictional boundaries. Such an arsenal should include authority to establish metropolitan area charter commissions, regional councils of government and multi-purpose areawide functional authorities; to annex more easily unincorporated territory; and to authorize counties to perform urban functions and to establish subordinate urban and rural service and taxing areas.

States Should Take Direct Action and Control to modernize local government, such as reducing numbers of special districts, arbitrating local boundary conflicts and regulating new incorporations. State or regional agencies should be empowered to order the dissolution or consolidation of local units of urban government that fail to meet certain statutory standards of economic, geographic, and political viability. Of the various proposals relating to improving the structure and pattern of urban local government, none is as far-reaching as this, and none spells out more clearly the State's responsibility for bringing greater order to the chaotic map of metropolitan America. The Federal Government, after all, can do little in this field. The Fourteenth Amendment stretches far but it seems doubtful that it extends quite this far.

Federal Incentives for local government modernization in the form of requirements for regional or metropolitanwide review of applications from individual local governments for Federal grants and bonus percentages in Federal matching where projects are tailored to a regional rather than a strictly local need.

2. Building fiscal balance in the American Federal system

Turning to the matter of money, the Commission finds that a massive rearrangement in the scale of fiscal resources available to the three levels of government is absolutely essential if the federal system is to remain viable. A strong partnership, after all, requires each of the partners to be strong, and this condition cannot be met if one partner has the bulk of the resources and the other two have the bulk of expenditures to meet. The realignment proposed by the Commission has four key elements:

Sharing of a percentage of the Federal personal income tax base with States and major localities (at a current scale of $5 billion annually) and with distribution according to population and tax effort. This would "federalize the Federal income tax," and is basically reflected in Title I of the Intergovernmental Revenue Act (S. 2483—91st Congress).

Assumption by the Federal Government of all costs of public welfare and medicaid ($6 billion in additional Federal costs). Welfare has become so interstate in nature and so dominated by Federal policy that only complete Federal financing makes sense.

Assumption by State governments of substantially all local costs of elementary and secondary education. This would help assure equality of educational opportunity, would release the local property tax for use in meeting growing noneducational costs, would halt much of the existing interlocal competition for industry and would mitigate exclusionary zoning practices directed against large, low-income families.

Encouragement of a high-quality, high-yield State tax system through a Federal income tax credit for State income taxes paid (at a current Federal cost of $4–6 billion annually). This would provide a strong incentive for more intensive use of the income tax by State governments and for a better integrated State-local tax system resting upon a strong income tax, a strong sales tax and an equitable and productive local property tax.

The cost in Federal revenues for restoring fiscal balance to the federal system would approximate $15–20 billion at current levels of expenditure. Federal categorical grants have risen by this amount over the past eight years. The Commission's proposals favor a restoration of balance and restoring a strong Federal-State-local partnership over a further willy-nilly massive growth in increasingly narrow categorical grants which already have become so dense a jungle that only the most sophisticated "grantsman" in State and local government can enter with any confidence. All this is not to say that revamped categorical grants have no place in the system. They do, and our strong sponsorship of the Intergovernmental Cooperation Act of 1968 (P.L. 90–577) as well as the proposed ICA of 1969 (H.R. 7366) underscore this belief.

3. More State muscle for solving metropolitan problems

A major part of the Commission's concern since its establishment in 1959 has been to urge an awakening by the States of their inescapable responsibilities for urban affairs, an awakening by the Federal Establishment to the fact that the country simply cannot be run from Washington, and recognition of the inescapable necessity of increased reliance upon those States ready to move ahead on the urban front.

Specifically, we have sought *Establishment of State Departments of Urban or Community Affairs.* Only by first providing administratively for a continuing concern and activity regarding urban affairs can the State government hope to manage a large-scale involvement in the problems of its cities. Such departments can also provide a focus of technical assistance to smaller municipalities and counties within the State. Some 20 States now have established such an administrative unit.

We have sought State Financial Underwriting of Urban Functions. The States must begin to pay part of the bill for urban redevelopment, housing code enforcement, mass transit, and other major urban functions just as they have been paying for years a part of the bill for State agricultural experiment stations, county agents, and rural roads. This, of course, requires a politically painful realignment of expenditure priorities within the State, but until it is done, "one man-one vote" is an empty phrase, and the chances for a strong State role in the federal system diminish.

—We have called for *Channeling of Federal Urban Grants Through the States* under certain circumstances. The Congress and the Federal executive branch must become selective in laying down patterns of intergovernmental relations surrounding Federal grants and must stop treating States like New York, Pennsylvania, and California in an identical fashion with Alabama, New Hampshire, and Wyoming. The Commission has proposed that Federal funds for urban purposes flow through the State where, and only where, two basic conditions are met: the provision of adequate administrative machinery and the provision from State general revenues of at least half the non-Federal share of the required funds. If the State chooses not to meet these two conditions, a Federal-local relationship should obtain with respect to the particular program. If it chooses affirmatively, then the existing Federal-local relationship would be changed to a Federal-State relationship.

—We have sought *Revitalization of State Legislatures.* In order for States to take time-

ly and effective action on urban problems, highly important, complex, and controversial legislation must be enacted and continually amended. Yet relatively few legislatures are equipped constitutionally or administratively to do this, although progress in the past few years has been considerable. The Commission's proposals (paralleling those of several other organizations) call for annual sessions, year-round professional staffing and adequate facilities and compensation. Strong legislatures are an absolute prerequisite for strong State government and strong States are essential if the nation itself is to be strong.

More than a half a century ago, a great constitutional lawyer, Elihu Root declared:

"I submit to your judgment, and I desire to press upon you with all the earnestness I possess, that there is but one way in which the States of the Union can maintain their power and authority under the conditions which are now before us, and that way is by an awakening on the part of the States to a realization of their own duties to the country at large. Under the conditions which now exist, no State can live unto itself alone and regulate its affairs with sole reference to its own treasury, its own convenience, its own special interest." [4]

The Advisory Commission, in its various proposals relating to strengthening the States, has simply been applying this Root doctrine in a later period.

4. Political and functional autocracies: Seedbed of a new federalism?

A common theme associated with many of the Commission proposals is a move away from categorical programs and functional, and special purpose governmental institutions toward stronger general purpose government and political executives and legislators at Federal, State, and local levels. This theme is characterized by recommendations for revenue sharing and grant consolidation at the Federal level; shortening the ballot and strengthening the budget and planning processes at the State level; and curbing and consolidating special purpose districts and authorities at the local levels. It is also marked by proposals for a reorganization authority for the Governor, local planning staffs responsible directly to political governing bodies instead of independent commissions, and channeling of State aid funds in such a way as not to prop up or perpetuate small special purpose units of government.

The overall theme of strong legislative branches also relates to this attack on the New Feudalists. The call for periodic Congressional review of grants-in-aid, increased capability of State legislatures in the fields of legislative oversight and State planning—while directed primarily to other objectives—are also geared to ensuring that functional specialists discharge their responsibilities in a governmentwide and agencywide context.

All of these steps and more are necessary if top policymakers at all levels—the President and the Congress, the Governor and the legislature, the mayor and the council—are to be strengthened in a fashion that will permit them to withstand the mounting, parochial pressures that swirl around them. Top policymakers at all levels must be empowered to plan, pass, implement, and fund the vital programs that this and future generations of Americans demand. Effective Intergovernmental management innovations are crucial to both the executive and legislative branches and efforts to strengthen them on an interbranch, interagency, and interlevel basis should and must be examined, debated, and where meritorious enacted and executed.

[4] Elihu Root, address delivered December 12, 1906, before the Pennsylvania Society of New York.

5. Hammering out national and state urbanization policies

Increasingly apparent to political leadership and the business community is the necessity for some conscious public policies within which can be accommodated the tremendous scale of urbanization and redevelopment bound to occur in the final third of this century. To leave this pattern to chance—to competitive and contradicting policies of thousands of local governments—is to invite economic and social chaos. The Advisory Commission has proposed a large variety of individual measures at all levels of government to begin to fill this vacuum. They can be summarized as follows:

Formulation of a National Urbanization Policy. Institutional responsibility would be vested in the Executive Office of the President with an annual urbanization report from the President to the Congress and the people. At a minimum, such a policy would assure that individual Federal programs did not operate converse to national goals. Some possible new components for such a policy are suggested including: Financial incentives for industrial location in large city poverty areas and rural growth centers; migration allowances to facilitate population movement from labor surplus to labor shortage areas; preference in the award of Federal contracts to areas to which it is desired to attract population and similar preferences in the location of public buildings and other facilities; expansion of governmental assistance for family planning information to low income families; and initiation of new types of Federal support, under certain conditions, to large scale urban development and to the creation of new communities.

Formulation of an Urbanization Policy by Each Industrial State. State urbanization policies would be expected to include components comparable to those suggested for a national policy with the critical addition of a State land development agency empowered to acquire, hold, site develop and sell off land to private developers for use in accordance with a State's urbanization policy and with State, regional, and local land use plans.

Federal and State Action for Equitable Relocation of People and Businesses Displaced by Governmental Activity. One of the fuses leading to social explosion in urban ghettos has been the ruthless bulldozing of homes and small businesses for highway, urban renewal and other public works projects without adequate provision for relocation. Federal and State legislation is needed to assure the availability of standard housing, prior to the beginning of demolition and to provide adequate financial assistance and advisory services to those being relocated.

Increased State Rule in Building Regulation. The States must begin to bring order out of chaos in building codes through such means as State model codes available for local adoption without deviations, by licensing and training of building inspectors and by State assumption of these functions where qualified local personnel are not available.

Escalation to County Level of Local Zoning Authority. Authority to zone is quite often a major incentive to governmental fragmentation in metropolitan areas and use of this State police power by small local units has often resulted in widening fiscal and social disparities between central cities and suburbs.

CONCLUSION

A great act of collective affirmation placed us on the moon. A comparable series of acts—of even greater affirmation and involving far more people and officials—will be necessary if this "Challenge for the 70's" is to be surmounted. The multi-faceted agenda for the future of federalism—that I have laid before you—will test the creativity, the credibility, and the courage of this and future generations of American policymakers.

Whether their response will match those invoked in the Apollo program depends in large measure on whether professions and associations like yours make this national challenge their top priority problem. To put it another way, let us join:

In revising radically the meandering maps of local governmental America;

In achieving substantial balance in our intergovernmental fiscal arrangements;

In converting our States into genuine commonwealths;

In curbing the parochialism of program specialists, pressure groups, and special purpose government and agencies; and

In beginning the tough task of devising relevant, realistic, and farsighted urban growth policies.

When grappling with this arduous assignment, let us be mindful that though we may never have been—nor ever will be—a "City upon a Hill," visualized by John Winthrop "the Eies" of succeeding generations of Americans certainly will focus on how well we face this urban challenge. Given what we know now of the spirit of the next generation, there is absolutely no reason to believe that they will be charitable in their assessment, if we falter, temporize, or stand frozen in fright.

Indeed, why should they? If, in this era, we can reach the moon, why can we not reach agreement on at least a minimum program to salvage Urban America? Our individual and collective response to this question will—in the long run—determine whether our constitutional heritage of ordered liberty, balanced government, and a geographic division of power can endure.

INDIVIDUAL RIGHTS AND INTERNATIONAL LAW

Mr. PROXMIRE. Mr. President, one of the most profound developments in 20th century international law is the increasing recognition of the human rights of the individual in international law. As the world has grown smaller through the development of rapid means of transportation and communication, concern for guaranteeing human rights all over the world has grown. The recent growth of concern for human rights in international law can be traced to the political developments attending the end of World War I.

In the Allied Powers' treaty of peace with Poland, that country resolved to protect certain racial, religious, and linguistic minorities within its boundaries. This was required of Poland as part of the Allies' determination to advance friendly relations between nations. Mistreatment of minorities by a state might antagonize its neighbors or other states, and thus provoke unnecessary wars. The most important precedent set by this treaty was that it recognized the obligations undertaken by Poland to protect its minorities were "obligations of international concern," not simply of national concern.

The pattern of the Polish Convention was followed in other peace treaties formally concluding the First World War and in several similar declarations and conventions. The responsibility for implementing the minorities treaties was lodged with the Council of the League of Nations.

Following World War II and the establishment of the United Nations, concern for human rights became even greater. The Universal Declaration of Human Rights became the cornerstone for the promotion of international human rights by the United Nations. The importance of this declaration has been considerable. In the peace treaty with Japan signed in 1951 Japan promised to strive to realize the aims of the Universal Declaration. In 1954, Italy and Yugoslavia undertook to govern Trieste in accordance with the provisions of the Universal Declaration. More than 30 countries have adopted sections of the declaration as a part of their constitutions.

Mr. President, the United States cannot afford to stand in the way of further progress in promoting human rights. Great strides have already been made, but new guarantees are needed. Ratification of the three conventions covering genocide, forced labor, and political rights for women will represent a great advance. The United States cannot allow itself to be labeled as unconcerned about human rights. We can seize the leadership in this area once again if the Senate acts now. Further delay is simply unjustified.

THE DAVID LAWRENCE COLUMN ON VICE PRESIDENT AGNEW

Mr. THURMOND. Mr. President, the dean of American columnists, Mr. David Lawrence, published some extremely interesting remarks in the Evening Star of October 23, 1969, about the Vice President's right to free speech. Mr. Lawrence writes:

> Some of the so-called "liberals" may unwittingly be creating the impression that, while their kind of dissent comes under the heading of "free speech," the outspoken remarks of Vice President Agnew in recent days are not covered by the same kind of Constitutional privilege.

Mr. Lawrence has come right to the point. There is a kind of double standard prevailing today. Leaders of the Vietnam demonstrations have made the most extreme expressions of hatred and hostility toward the United States, statements which are lauded by their elders as mature and significant statements of dissent, as veritable outpourings of just moral indignation. Anybody who disagrees with this evaluation is characterized as somehow lacking in moral principles and social consciousness. According to this view, one is supposed to sympathize emotionally with the protesters, even if he does not accept their statements fully.

In my judgment, the shrill minority that has been played up by much of the news media does not represent the opinion of the majority of our youth. The Vice President, in his remarks about the protesters, was careful to distinguish between the hard-core militants and the misguided followers. His critics do not care about distinctions. They apparently wish to make it appear that the minority of deviants truly represent our American youth. Moreover, the Vice President's critics appear to identify with this adolescent protest themselves. They object to his characterization of the protesters because they like to think of themselves as part of the self-appointed elite which he is criticizing. I find it difficult to understand what grown men think they can accomplish by aiding and abetting adolescent rebellion.

In this morning's newspaper, an article says that the Vice President refused permission to his 14-year-old daughter Kim to participate in the October 15 marches. The Vice President is quoted as saying that she got over her displeasure in a day or so. Thousands of other adolescents would have gotten over their displeasure in a day or so if their parents had displayed a like assertion of their proper parental authority. Psychologists tell us that many rebellious adolescents are actually rebelling against the lack of firm authority which they need for proper development. I commend the Vice President for his example, and I would hope that more parents would follow it.

Nevertheless, the adult supporters of the youthful protesters are in the same position as parents who abrogate their proper role. How can our youth respect an authority which shirks its duty? When we have national leaders encouraging mindless rebellion, and indeed manipulating it for purely political purposes, without regard for this Nation's welfare, then we can have no reason to expect either superficial peace in the Nation, or the enduring law and order which is the free and voluntary expression of the human heart.

I, for one, believe that the Vice President's remarks generated such an emotional reaction in some quarters simply because he was accurate and correct in his observations. In other words, he hit the nail on the head. Those who took exception to them were strangely offended and left revealed by his candor and perception.

Mr. Lawrence's column discusses the double standards involved with great precision. I recommend it to all Senators.

Mr. President, I ask unanimous consent that the David Lawrence column entitled "Agnew's Right to Free Speech," published in the Evening Star of October 23, 1969, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

AGNEW'S RIGHT TO FREE SPEECH
(By David Lawrence)

Some of the so-called "liberals" may unwittingly be creating the impression that, while their kind of dissent comes under the heading of "free speech," the outspoken remarks of Vice President Agnew in recent days are not covered by the same kind of constitutional privilege.

One Democratic senator now says that when Mr. Agnew, in a speech in Mississippi, declared that school officials had made "a strong case" for delaying desegregation in certain districts, this was an "unwarranted, unethical and grossly improper" attempt to influence the Supreme Court. He suggests that the vice president should devote his time to his "only constitutional duty"—namely, presiding over the Senate.

But the vice president of the United States has additional duties. He has the task of understudying the President and training himself for a job that fate may suddenly require him to take over.

Spiro Agnew announced immediately after election that he was an independent-minded person who would say what he believes, whether or not it agreed with the views of the President. He has the right, of course, to make speeches, and surely it will be conceded at least that he can talk on any subject that a senator can tackle in a public speech.

Only this week, Sen. Sam J. Ervin Jr., D-N.C., declared that constitutional government would perish in the United States if trends set by the Warren Court are not reversed. He prepared a detailed criticism of the legal course set by the Supreme Court and made a public address about it.

The vice president, as presiding officer of the Senate under the Constitution, would seem to be permitted the same rights as any member of the upper house. Senators have never put a limit on the topics they discuss in public speeches, and the vice president certainly has a similar privilege to delve into any subject, however controversial it may be.

Agnew made a speech, for instance, in New Orleans last week that aroused nationwide attention. He condemned the proponents of the Vietnam "Moratorium" and said that the demonstrations were encouraged by "an effete corps of impudent snobs who characterize themselves as intellectuals."

The vice president, speaking at a fund-raising dinner for the Republican party, was endeavoring to defend the Republican administration against the attacks of political opponents. Agnew said that today "subtlety is lost and fine distinctions based on acute reasoning are carelessly ignored in a headlong jump to a predetermined conclusion." He added:

"Thousands of well-motivated young people, conditioned since childhood to respond to great emotional appeals, saw fit to demonstrate for peace. Most did not stop to consider that the leaders of the Moratorium had billed it as a massive public outpouring of sentiment against the foreign policy of the President of the United States.

"Most did not care to be reminded that the leaders of the Moratorium refused to disassociate themselves from the objective enunciated by the enemy in Hanoi."

Agnew is the kind of man who doesn't mind criticism. But he also doesn't hesitate to respond as he pleases to those who make what he deems fallacious and ill-founded attacks on the foreign policy of the United States.

As for "putting pressure" on the Supreme Court through public speeches, many senators have expressed themselves frankly about the departure of the high court from the proper exercise of judicial authority. President Nixon himself said recently there is a need for justices who will interpret the Constitution strictly and not assume legislative functions.

President Franklin D. Roosevelt in the 1930s not only discussed what he felt were the shortcomings of the Supreme Court of that period, but sought from Congress the enactment of legislation which would enlarge the court from nine to possibly fifteen members and enable him to pick justices whose views were in accord with his own and thus attain a "liberal" majority.

It hardly seems consistent for the "liberals" today to deny either Vice President Agnew or anybody else the right to discuss public issues on which the Supreme Court may have to rule or the right to make speeches denouncing protest movements, especially those which have the effect of giving aid and comfort to the enemy in the midst of a war.

CYCLAMATES AND MONOSODIUM GLUTAMATE

Mr. McGOVERN. Mr. President, I ask unanimous consent to have printed in the RECORD a number of news items published recently relating to the Food and Drug Administration's regulation of food additives, particularly the cases of cycla-

mates and monosodium glutamate in baby food. During hearings of the Select Committee on Nutrition and Human Needs this past summer, extensive testimony was heard about the FDA's management of its Generally Regarded As Safe—GRAS—food additive list and about the uses of cyclamates and monosodium glutamate.

After the testimony had been taken, I expressed considerable concern to the FDA Commissioner, Dr. Herbert Ley, that the question of using monosodium glutamate in baby food should be further examined as quickly as possible and that until the question was resolved that the substance be removed from baby food either voluntarily by the companies or at the request of the FDA. The Commissioner responded that the question would be studied by the National Academy of Sciences but that no immediate action would be taken. The companies also responded that they would await the findings of the Academy.

During the last several weeks, however, the situation changed. First, there was Secretary Finch's action to remove cyclamates from the GRAS list. Then there was extensive coverage—by the major television networks and some of our leading daily papers—of the question of monosodium glutamate in baby food. This resulted, last Friday, in an announcement by the FDA and the major baby food companies that they were removing monosodium glutamate from their products until tests on its safety were completed. I applaud that action by the FDA and the companies. I only wish it had come sooner. I also applaud the television and press people for the public service they rendered.

I hope that these actions in regard to cyclamates and monosodium glutamate and the GRAS list in general, mark the opening of a whole new approach to the issue of food additives. From now on, I hope that the FDA will follow a policy of approving additives for use only after they have been tested and proved safe. This is a matter of great importance affecting the health and well-being of all Americans. It is a matter to which the select committee will continue to give attention and on which I feel certain that it will make some important recommendations.

I also ask unanimous consent to have printed in the RECORD, along with the news article, a statement I made on the GRAS list last Friday.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

FDA TO RESTUDY FOUR SUBSTANCES—SACCHARIN, SALT, MSG AND STARCH TO BE EXAMINED

(By Harold M. Schmeck, Jr.)

WASHINGTON, October 22.—The Food and Drug Administration is restudying saccharin, monosodium glutamate and two components of baby food in the aftermath of the decision to halt general use of the cyclamates, widely used artificial sweeteners.

The drug agency has asked its experts to go through the entire list of food additives that are generally regarded as safe and report, as soon as possible, whether further testing will be needed on any of them.

Saccharin, the only remaining nonnutritive sweetener on the list now that cyclamate has been removed from it; monosodium glutamate, a flavor-enhancer, and modified starch and common salt, which are used in baby foods are high-priority items on the second-look roster.

When the announcement was made last week that cyclamate would be withdrawn from general use, Dr. Herbert L. Ley, Jr., Commissioner of Food and Drugs, noted that very little valid information was available on saccharin, although it has been in wide use for about 50 years.

Today, Winton B. Rankin, deputy commissioner, said it seemed probable that some further testing would be needed to insure that saccharin merits its present clean bill of health. This will not be determined, however, until the F.D.A. experts have gone through all the scientific literature pertaining to the substance to see what testing has been done already and what gaps in knowledge may exist.

NEW DIET ADDITIONS

He said that monosodium glutamate and modified starch were more recent additions to the American diet and it was possible that all the necessary testing had already been done on them. Again, the drug agency staff will search the literature to find out whether or not this is true.

Modified starch is ordinary starch that has been altered chemically to modify such properties as its thickening or jelling characteristics. It is used in prepared foods for adults as well as in baby food, but the F.D.A. is particularly concerned over its safety in the latter use.

Mr. Rankin said some of a baby's organs were not entirely developed and could be affected differently from those of an adult. Furthermore, giving any food item to a baby raises the possibility that it will be used throughout his entire lifetime. Such potential long-term use raised safety issues distinct from those of shorter-term adult use.

Opponents of the use of salt in baby food have argued that babies cannot taste the salt and that it is put in the product to make the food taste better to the mother. Some nutritionists believe that Americans use more salt than is good for their health and that starting to consume it in babyhood simply makes the situation worse.

In recent years there has been some controversy over the safety of monosodium glutamate. It is used widely in oriental foods and has been linked to the so-called Chinese restaurant syndrome—burning sensations, a tightness in the head, occasional headaches and chest pain experienced sometimes by some persons who eat in Chinese restaurants.

Altogether there are several hundred items on the F.D.A.'s lists of substances generally recognized as safe for their intended use. These range from aluminum calcium silicate, used as an anticaking agent in table salt, to caffeine and ordinary sodium bicarbonate.

NUMBER IS NOT KNOWN

The drug agency is uncertain how many of the items will have to undergo further testing. Mr. Rankin said he expects that the number will be small. Not until the newly started literature search has produced some results will it be known what kind of tests will be required or who will do them.

One standard procedure is to feed the substance being tested to at least two species of laboratory animals during the animals' normal lifespan and compare their health and growth with animals fed the same diets minus the key item.

What does seem clear, however, is that any new nonnutritive sweetener that becomes a candidate to replace the cyclamates will have to undergo thorough and extensive testing before it goes into use. Several artificial sweeteners have been under development in recent years. At least two such items have been developed from citrus fruit extracts, according to an article in Chemical and Engineering News.

One of these was developed from a bitter substance in grapefruit. Far more powerful, however, is the other one extracted from Seville oranges. It is said to be 2,400 times as sweet as ordinary table sugar.

The article, by Howard J. Sanders, a senior editor of the magazine, said more than a dozen artificial sweeteners had been the subject of active research. None could be used in food without long and expensive safety testing first.

DOSES OF MONOSODIUM GLUTAMATE FOUND TO AFFECT BRAINS OF MICE

(By Harold M. Schmeck, Jr.)

WASHINGTON, October 23—A scientist in St. Louis said today that he had fed infant mice monosodium glutamate in amounts greater than those in baby food and had produced brain damage in the portions of the mice's brains regulating appetite.

Monosodium glutamate is a food enhancer.

The area in the rodents' brains that was affected, according to the scientist, was the hypothalamus. Among other things, the hypothalamus has the function of controlling the desire for food and water.

Dr. John W. Olney, assistant professor of psychiatry at the Washington University School of Medicine, said this new evidence, added to research he has done previously, had convinced him that the widely used substance should be removed from baby food. The same view was expressed independently today by Dr. Jean Mayer, internationally known nutritionist.

However, two executives of companies that manufacture baby food entered demurrers.

The first, Imri J. Hutchings, general manager for research of J. H. Heinz Company, said he doubted that Dr. Olney's research was applicable to man.

Daniel F. Gerber, chief executive officer of Gerber Products Company, also expressed doubt that monosodium glutamate had any potential harm for human beings.

Dr. Mayer is director of the first White House Conference on Food, Nutrition and Health. It will be held here in December.

Asked about monosodium glutamate at a luncheon today at the Women's National Press Club, he said that there had not been any evidence that the flavor enhancer, usually called MSG, had any dangerous effects on man. High concentrations of it do have effects on baby animals, he said, causing damage to the part of the brain called the hypothalamus. Among other functions this regulates food and water intake.

The scientist, a professor of nutrition at Harvard, said he would favor taking the substance out of baby food if there was the "slightest presumption of guilt," even though unproven. In answer to a question, he said bluntly: "I would take the damn stuff out of baby food."

During a telephone interview, Dr. Olney said he had tube-fed mice an amount of sodium glutamate about five times as great as that found in a 4½ ounce battle of baby food and he found brain damage in seven of nine animals.

At higher dosages he got substantially higher percentages of brain damage.

CELLS ARE KILLED

Specifically, he said, cells were killed in the hypothalamus. If this kind of damage occurred in a human infant, he said, it might pass unnoticed, but later the individual might have obesity problems or impaired fertility.

Dr. Olney said he had been attracted to research in this area by the observation that infant animals injected with MSG often become obese later in life. Last spring he re-

ported that injections of the substance under the skin of baby mice produced brain damage. Testimony on this point was presented to the Senate Select Committee on Nutrition and Human Needs.

A logical step was to see whether or not the same effect could be produced in a primate, because these animals are far closer to man, genetically, than are mice. Dr. Olney and a co-worker, Lawrence G. Sharpe, published a report confirming that this can be done, in the current issue of Science, weekly journal of the American Association for the Advancement of Science.

Damage to nerve cells in the hypothalamus of an infant rhesus monkey were produced after an injection of a relatively heavy dose of MSG, the report said.

The details of the production of similar lesions by the feeding of infant animals has not yet been published although it has been submitted to a scientific journal. Dr. Olney said the research had already been reviewed by a pathologist of the Food and Drug Administration.

Today this was confirmed by the pathologist, Dr. Howard Richardson of the F.D.A. Bureau of Science. He said the evidence he was shown clearly showed brain damage.

Dr. Richardson said the fact that the effect was attributed to a single feeding of the substance was particularly interesting because it showed that "a single insult" to the infant animal body from the chemical could produce such a result.

Dr. Olney said the 10-day-old mice were tube fed because they had not yet been weaned. He said their development age is about that of a three-month-old human infant. The dose of MSG with which he produced nerve cell death in seven of nine of the baby animals was one half gram per one kilogram of body weight. This is a small amount that he said is about five times the amount of monosodium glutamate to be expected in a 4½ ounce jar of some baby foods.

This afternoon Mr. Hutchings said he was familiar in general with Dr. Olney's research, but did not consider it at all applicable to man.

He said infants were not likely to get baby food that contained MSG before the age of five months because the substance is used primarily in vegetable and meat mixture. At that age, he said, the human brain is far more developed and thus, presumably is less likely to be harmed.

Furthermore, even at that age, he said, the amount of MSG a baby would eat would be extremely small in relation to the amounts the animals received.

Mr. Gerber also expressed doubt that the substance had any potential for harm to human beings.

"We want to find out the truth whether it is harmful or not," he said. "If we find that it is harmful we certainly will eliminate it. We don't feel, at the levels we are now using, that there is any indication that it is harmful."

Mr. Gerber said he thought industry in general would stop using the substance if there was any valid evidence that it is harmful.

[From the New York Times, Oct. 25, 1969]

MAKERS OF BABY FOODS CURTAIL USE OF MONOSODIUM GLUTAMATE

(By Sandra Blakeslee)

The makers of Gerber, H. J. Heinz and Beechnut baby foods announced yesterday that they would no longer put monosodium glutamate, a popular food flavor enhancer, into their products pending further study of the chemical's safety.

The safety of monosodium glutamate was called to question Wednesday by Winton B. Raskin, deputy commissioner of the Food and Drug Administration. At that time Mr. Raskin announced the agency's intention to review at least four food additives, monosodium glutamate among them, that have been widely regarded as what are known as GRAS food additives—"Generally Recognized As Safe."

It may be that monosodium glutamate is not so safe after all, Mr. Raskin said. A St. Louis researcher has found that large doses of the substance fed to infant mice causes damage to that part of the rodent's brain that controls appetite.

In announcing their moratorium on the use of monosodium glutamate, the three largest producers of baby food in the United States were all critical of recent publicity about the substance. They said that the public had been unnecessarily alarmed and confused by the "unconfirmed body of evidence" against the chemical's use.

The Heinz Company, for example, said it planned to discontinue the use of monosodium glutamate in current packs "in full confidence that industry practice will be vindicated by scientific findings of a more valid order than those that have been used to promote the current controversy."

The study implicating monosodium glutamate and brain damage in mice was carried out by Dr. John W. Olney, an assistant professor of psychiatry at the Washington University School of Medicine.

A further criticism of the chemical was voiced yesterday by Senator George S. McGovern, who heads the Senate's Select Committee on Nutrition and Human Needs.

"MSG does not serve any nutritional purposes in baby food," the Senator said, "and there is no need to take any risk with a child's health until it has been proven safe."

It is generally recognized that monosodium glutamate is added to baby food to make it more palatable to the mother.

Senator McGovern also criticized the Food and Drug Administration for taking a "timid" approach to the question of the safety of food additives.

"Food additives are permitted for use without advance proof of safety and manufacturers are allowed to decide for themselves whether they have to prove products are safe before selling them," he said.

"What we really need," the Senator said, "is to change the name of the GRAS list to the PAS list instead—Proven As Safe."

SIX HUNDRED EIGHTY INGREDIENTS ON LIST

There are currently 680 food ingredients, including monosodium glutamate, on the GRAS list. That is, they are considered safe enough by the F.D.A. to be used by food manufacturers in any desired amount. Other GRAS additives are salt, pepper, cinnamon, cloves and a wide range of spices and organic chemicals.

Another 2,000 food additives are liberally used in food production but must meet Government regulations and minimum standards after a long testing procedure.

Monosodium glutamate was put on the GRAS list nine years ago when the F.D.A. revised its system of reviewing food additives. Experts reviewing the list of GRAS additives at that time believed the chemical to be a harmless substance that had proved itself to be safe after thousands of years of use by cooks throughout the world.

No one knows when monosodium glutamate was first found to enliven the taste of foods—especially meat and vegetables—although the Chinese have cooked with it since antiquity.

FOUND IN SEAWEED

Then, in 1908, Dr. Kikunae Ikeda of Tokyo University recognized that a chemical he had isolated from a certain type of seaweed—monosodium glutamate—was the active agent that enhanced food flavors. The Japanese had been crushing the seaweed for centuries to obtain the flavor enhancer.

After Dr. Ikeda made his discovery, scientists began to look for ways to extract the substance from natural foods, generally found in those rich in carbohydrates, and purify it for later addition to foods.

A process of extraction was used for many years and then replaced by a fermentation process, which is how most of the monosodium glutamate is manufactured in the United States today.

American housewives and food manufacturers purchased approximately 43 million pounds of monosodium glutamate last year, which is only a small part of the total world consumption of 180 million pounds. The average American ate less than the two ounces of the chemical last year, which is one-fourth the amount consumed in a year by most Asians.

Monosodium glutamate, which is a naturally occurring chemical substance that a chemist also calls a sodium salt of an amino acid, has baffled scientists trying to figure out precisely how it works to enhance food flavor. What they know is that when it is added to food, food tastes better.

According to many experts, it might be that the substance stimulates sections of the taste buds or that it stimulates saliva flow.

Although monosodium glutamate is tasteless in small amounts, it can have a slightly meaty flavor when eaten in larger doses. The flavor may result from impurities in processing but the scientists are not even sure of this. Perhaps the meaty flavor, some scientists have said, that causes the substance to make food taste better.

Researchers know that monosodium glutamate works best to enhance the flavor of foods high in protein, and it is fairly useless in starchier foods. They guess that the chemical acts to replace glutamate, which is found in highest concentrations in high protein foods, when it is cooked or processed out of such foods.

BABY-FOOD MAKERS HALT USE OF ADDITIVE—GERBER, BEECHNUT, HEINZ RESPOND TO DEMAND BY MCGOVERN ON MONOSODIUM GLUTAMATE

WASHINGTON, October 24—Senator George S. McGovern (D., S.D.), chairman of the Senate Committee on Nutrition, today recommended an overhaul of government practices which permit sale of more than 680 everyday food additives without requiring safety tests.

The special, government-exempt list of additives included cyclamates until last week, when this type of artificial sweetener was banned because of a high incidence of animal cancer found in laboratory experiments.

EXPECT VINDICATION

Gerber Products Company, the nation's largest maker of baby foods, said it is discontinuing the use of monosodium glutamate, "because a tremendous amount of unwarranted publicity has served to confuse the consumer."

Meanwhile, Beechnut, Inc., announced it had discontinued the use of monosodium glutamate in all products "pending the outcome of the studies just initiated by the Food and Drug Administration." A spokesman for the firm said only a minimal amount of the substance was included in a few of the company's baby foods.

The H. J. Heinz Company announced that "in deference to public concern" it would discontinue the use of MSG "in the limited number of its baby-food products" in which it was used. A company spokesman said the firm had "full confidence that the industry use of MSG will be vindicated by more accurate and scientific findings than those now available."

In making his recommendation, Senator McGovern termed the exempt list of additives "a never-never land of non-regulation."

"Food additives are permitted for use with-

out advance proof of safety," he said in a prepared statement. "And manufacturers are allowed to decide for themselves whether products are safe before selling them."

ALL TYPES OF ADDITIVES

The long used additives on the list—ranging from the well-known monosodium glutamate to the little-known preservative butylated hydroxytoluene—enjoy congressional exemption from animal safety tests required for government approval of most new additives.

Representative Paul G. Rogers (D., Fla.), a ranking member of the House public health subcommittee, said today and added that a panel of the World Food and Drug Administration examination of the list is insufficient.

He called instead for an "immediate and systematic review in clinical testing of all chemicals" on the exempt list. And the Health Organization has reported "possible harmful effects" from two color additives now on the exempt list—benzyl violet and Ponceau SX or Red No. 4, used in maraschino cherries.

Benzyl violet is possibly linked with cancer, Mr. Rogers claimed.

SPICES NO DANGER

The safety of most additives on the list, some of them century-old cooking aids such as spices, never has been seriously challenged. But cyclamates were on the market for 17 years before tests showed they increased the incidence of cancer in rats.

A high-ranking official of the Food and Drug Administration agreed with Senator McGovern's description of the exempt list.

"The list is indeed a land of non-regulation," the official said.

"It is bad first because it permits additives in foods without advance proof of safety, and second because it allows additive makers to decide for themselves whether they must prove their products safe before they sell them."

Commissioner Herbert L. Ley, Jr. of the FDA followed up last week's cyclamate ban with a promise to examine the special additives list and conduct any laboratory tests that seem necessary.

The FDA will focus on MSG, the widely used taste-enhancer found in baby foods, among other places. MSG in high dosage has been found to cause brain damage in infant animals.

Earlier, Senator McGovern * * * about MSG are resolved, it "should be removed from baby food or the amounts in baby food drastically reduced."

Dr. Jean Mayer, President Nixon's chief nutrition adviser, has said yesterday that the "stuff should be removed" from baby food.

Mr. Ley, however, believes MSG still has a place in baby food: "Our present position is based on the lack of adequate data that would implicate MSG as being harmful to human infants when ingested in amounts currently in use."

Senator McGovern said the action against cyclamates "opened a Pandora's box in the food additive field.

PROVE ALL SAFE

"Now that the box is open it should not be closed until every food additive in it is proven safe beyond doubt for human consumption," he said.

"If the FDA needs more authority or resources to do that job, Congress should give either or both.

"In the last analysis, the FDA should apply the same test to food additives as to drugs. They should be proven safe before they are approved for public use."

The National Academy of Sciences estimates that 2,000 chemicals are employed as additives. They are generally intended to retard spoilage, add nutritives, enhance flavor and make foods look better.

RISE AND FALL OF CYCLAMATES

(By Morton Mintz)

Cyclamates have been "more widely and thoroughly studied than any of the . . . food additives in present use . . . more widely studied than any other food substance—natural or synthetic—with the possible exception of the amino acids."

—Joseph C. Lowey, an Abbott Laboratories marketing executive, at a seminar on nonnutritive sweeteners, Oct. 8, 1969.

"If there is slightest presumption of guilt" about a food additive, "I just would not put it in the food."

—Dr. Jean Mayer, special consultant to the President on nutrition, at the Women's National Press Club, Oct. 23, 1969.

The bittersweet saga of cyclamates began in 1937 when Michael Sveda, a chemistry student, decided to satisfy his curiosity about why there was a sweet taste in a cigarette he had laid down on a laboratory bench at the University of Illinois. Eventually Sveda traced the sweet taste to the salts of what came to be called cyclamates.

About 1950—a time when pre-marketing clearance for safety was not required for additives under the food and drug law—Abbott Laboratories, a North Chicago, Ill., firm which would become far and away the largest producer of cyclamates—introduced the first commercial cyclamate product. This was a 125-milligram tablet for sale by druggists.

With this cyclamates became a competitor to saccharin, the first synthetic sweetener, which was discovered in 1879. Although saccharin has a sweetening power 350 times that of sugar (and more than 10 times that of cyclamates), its popularity was limited by the objectionable after taste it left in the mouths of some users.

During the 1950s, cyclamates became popular in commercially produced foods and beverages intended for patients with diabetes and high blood pressure.

Not until about 1963, however, did the cyclamates—by then freely available for general use—achieve wide acceptance among the general public. In 1963 about 5 million pounds were produced. Last year, with 12 million pounds produced, cyclamates were in three out of four households.

Sales of products containing cyclamates soared, exceeding $1 billion last year.

A week ago, the whole structure toppled. At a press conference, Robert H. Finch, Secretary of Health, Education and Welfare, confirmed earlier rumors with a stunning announcement: He was ordering an immediate stop to production of cyclamate-sweetened products.

He also set deadlines for a phased recall of such products from distribution pipelines: Jan. 1 for beverages (which contain the highest levels of cyclamates), Feb. 1 for foods (ranging from frozen desserts to pickles) and July 1 for vitamins (so casual has the attitude toward cyclamates been that the Food and Drug Administration admits it failed to enforce requirements that the presence of cyclamates be disclosed on the label of vitamin containers) and drugs (mainly antibiotics).

CANCER IN RATS

The reason was a surprise discovery of bladder cancer in rats treated with massive doses of the chemicals.

The cyclamates are only one among possibly hundreds of food additives whose safety has been taken for granted. But there are troubling reports about others, particularly monosodium glutamate (MSG). The concern has focused on the use of MSG to enchance the flavor of processed baby foods, which may please mother but is a matter of indifference to infants with undeveloped tastebuds.

A key date in the cyclamate study in the late 1940s when three FDA scientists began to feed a large number of rats a mixture of cyclamates and saccharin over their two-year lifespan.

In a report published in 1951, the scientists—Drs. O. Garth Fitzhugh, Arthur A. Nelson, and John P. Frawley—concluded that there was no cause for concern. This study is of special interest because of the reliance placed upon it in the succeeding two decades.

In a report last November, for example, the Ad Hoc Committee on Non-Nutritive Sweeteners, a unit of the Food Protection Committee of the National Academy of Sciences-National Research Council, termed the study "wholly satisfactory." And went on to conclude that there was "no evidence" that either cyclamates or saccharin are carcinogenic (cancer-producing).

It now turns out that the NAS–NRC had never been given data on the incidence, variety and other specific findings involving possible tumors in the rats.

In contrast, anyone wishing to market an additive not on the GRAS list must provide extensive safety studies, including, if the FDA deems it necessary, feeding trials in man.

In 1962, the NAS–NRC Committee, in a second review, noted that there was "no clear justification for the use of artificial sweeteners by the general public as a weight-reducing procedure.

NO HELP FOR DIETERS

This observation has been bolstered by clinical evidence that cyclamates commonly stimulate the appetite.

In 1965, the FDA in a public statement said there was no evidence that cyclamates are a hazard to health.

In 1966, two events, superficially unrelated, raised warning signals about additives:

In Quebec City and in Omaha, Neb., 38 long-time and very heavy beer drinkers died. Their hearts were found grossly enlarged. The cause was a mystery. Finally, Canadian scientists traced the deaths to the use of cobaltous salts, an additive that controls the gushing of beer from containers and foaming. The threat, apparently, was only to certain vulnerable individuals. All brewers in the United States and Canada that had been using the pink powders immediately abandoned the practice.

RATS AND CHICKS

In Japan, two scientists at Kunamoto University reported that cyclamates are converted in the digestive tracts of some persons at a rate of about 0.8 per cent into a toxic "breakdown" or metabolic byproduct called cyclohexylamine (CHA).

The significance of the Japanese finding remains disputed and uncertain. However, about a year ago, the FDA's Dr. Marvin S. Legator reported that unlike cyclamates, CHA caused breakage in rat chromosomes. These contain the genes, the transmitters of heriditary characteristics.

CANCER IS KEY

Under the Delaney legislation enacted a decade ago, the government is required to stop production of foods containing an additive only if the chemical has been demonstrated to cause cancer in animals or humans. That law was the basis for the order of Oct. 18 with which HEW Secretary Finch stopped production of products containing cyclamates.

However, the government is not required to act on the basis of animal studies indicating a threat from diseases other than cancer.

The law governing the regulation of medicines puts the burden of proof on manufacturers, who must demonstrate—before their products go on sale—that they are safe in the uses to which they are to be put.

The food industry, in contrast, generally has preferred to put the burden of proof on government—make the regulators show that a product is unsafe.

In March, 1968, the FDA requested the

NAS-NRC's Ad Hoc Committee take yet another look at the evidence on the safety of cyclamates.

In a report last November, the committee concluded that there was no basis for prohibiting use of the synthetic sweeteners.

NEW LOOK AT OLD DATA

But just a couple of weeks ago, Drs. Howard L. and Mary E. Richardson, a husband and wife team of pathologists in the FDA's Bureau of Science, concluded from a new analysis of the original data and microscopic tissue slides that there had been, after all, reason for concern about a possible cancer potential in cyclamates.

Challenges by the sugar industry contributed to decisions to undertake periodic reviews of the evidence of safety for the cyclamates, according to a comprehensive report prepared by the FDA's Bureaus of Science and Medicine for a recent meeting of the NAS-NRC's Food Protection Committee.

Thus, in 1955, the Committee took a look at available data and concluded that there was no hazard in the carefully regulated use of cyclamates in special purpose foods.

Only if a person's daily intake exceeded five grams—the equivalent of 100 tablets of the type used to sweeten coffee—would there be a problem, and the problem would be merely a softening of the stool, the NAS-NRC scientists said.

In 1958—over strong opposition of the chemical industry—Congress enacted food additive legislation sponsored principally by Rep. James J. Delaney (D-N.Y.).

Under this law, the FDA compiled a list of food additives, ranging from salt and pepper to cyclamates and saccharin, that it proposed to classify legally as GRAS (generally regarded as safe).

The proposed GRAS list was circulated among about 900 outside experts. Of the 355 who commented to the FDA, none objected to cyclamates. And so they were locked into the GRAS list from Nov. 20, 1959, the date it became legally effective, until last Tuesday, when the agency published an order to remove them in the Federal Register.

The presence of an additive—there are an estimated 680—on the GRAS list confers a wondrous advantage on the manufacturers. Safety is presumed. "Periodic review of the list is not a present feature of our implementation of this program."

By last December, Dr. Jacqueline Verrett, also an FDA scientist, had gathered data showing a "very firm" cause-effect relation in chicken embryos between CHA and severe deformities at rates approaching 100 per cent. The rates for unconverted cyclamates were in the 15 per cent range.

Adding to the concern is a recent national survey in which the FDA, using newly developed, sensitive detection techniques, found that CHA was, mainly as a result of processing, present in 174 out of 232 samples of cyclamate-sweetened products.

Neither the Legator nor the Verrett findings could be extrapolated to man.

At the same time, no one could say with certainty that the findings of the FDA scientists ultimately might not be proved to be pertinent to human beings.

Even if the scientific implications were obscure, the regulatory implications, in the eyes of many scientists inside and outside of FDA, were clear: The cyclamates should have been removed from the GRAS list, so as to halt sales until Abbott Laboratories and other producers demonstrated safety with scientific evidence.

MSG IN BABY FOOD

Precisely the same point was made about MSG after its safety as a flavor-accenter in processed baby foods became suspect.

As late as last July, FDA Commissioner Ley was telling the Senate Select Committee on Nutrition and Human Needs that MSG was safe for this purpose, which, as has been noted, appealed to the tastes of mothers, not infants. In support of his position, Dr. Ley cited four scientific studies.

Last month, consumer advocate Ralph Nader charged that two of the studies did not exist in the form claimed and that the other two were preliminary. Dr. Ley, in a letter to Committee Chairman George S. McGovern (D-S.D.), then acknowledged that there indeed had been grievous errors in his testimony.

On Thursday in St. Louis, Dr. John W. Olney, a Washington University psychiatrist, reported that infant mice fed MSG, in quantities proportionately greater than in baby foods, suffered brain damage. He urged Commissioner Ley to remove MSG from the GRAS list.

The same day, by coincidence, Dr. Mayer, President Nixon's nutrition adviser, told a questioner at the Women's National Press Club, "I think the damned stuff should be removed."

But on Friday, the leading producers—Gerber Food Products, H. J. Heinz and Beech-Nut—reacted to the heat with an announcement that they no longer will add MSG to baby foods.

CRITICAL REPORT

Although it had not been known until now, the NAS-NRC report was sharply criticized in a detailed, eight-page analysis prepared for Commissioner Ley by Drs. John J. Schrogie of the Bureau of Medicine and Herman F. Kraybill of the Bureau of Science.

In an internal memo dated last Dec. 11, which was obtained by James S. Turner, director of a "Nader's Raiders" task force on FDA, the agency scientists said that the ad hoc committee report suggests a level of knowledge of many aspects of this topic which simply does not exist.

"It should have pointed more critically to the current deficiencies in information as a basis for further action," the scientists said.

However, Drs. Schrogie and Kraybill particularly exempted from criticism the NAS-NRC judgment that the data on CHA and possible cancer-causing potential were inadequate, despite the committee's praise for the FDA rat study reported in 1951.

The committee said that cancer studies of cyclamates in species other than the rat "are either incomplete, or of relatively short duration, or involved too few animals."

Publicly, the FDA said merely that consumers should use cyclamates in moderation.

IMMEDIATE ACTION ASKED

Last January, Dr. Legator, the FDA scientist whose laboratory studies revealed chromosomal breakage, said in an internal memo, "The use of cyclamates should be immediately curtailed pending the outcome of additional studies."

This sentence, it is revealed in documents obtained by James Turner of Nader's Center for Study of Responsive Law, was deleted by Dr. Edwin L. Hove, acting director of FDA's Department of Nutrition, before it was passed up to top echelons of the agency.

In April, citing the acknowledged potential of mild diarrhea, the FDA formally proposed a regulation intended to encourage limits on the intake of cyclamates.

The reports offered evidence that, in addition to causing deformities in chick embryos, chromosome breakage in test-tube cultures of rat germs, and circulatory disease in hamsters, cyclamates in humans could interfere with the action of oral antidiabetic drugs, make insulin more toxic, decrease normal absorption of an antibiotic called Lincocin, and distort laboratory tests so as to cause erroneous medical diagnoses.

And in June, experiments at the University of Wisconsin showed that pellets combining cholesterol and a high content (20 per cent) of sodium cyclamate produced abnormally large numbers of tumors in the bladders of Swiss mice. Because the technique used—injection of the pellets into the cavity of the bladder—was controversial, the significance of the findings is obscure.

DR. VERRETT ON TV

On Sept. 30, Dr. Verrett was interviewed by NBC-TV about her chick-embryo studies. This set off a new wave of concern which resulted, three days later, in Commissioner Ley asking the NAS-NRC to review not only her data, but all other evidence as well. For this purpose, the agency's Bureaus of Science and Medicine assembled a report that Dr. Ley would later call "magnificent."

On Oct. 3 at a Chicago hotel called Hyatt House, Abbott Laboratories convened a seminar on non-nutritive sweeteners for 200 representatives of food and beverage makers.

"The American housewife need have no hesitancy about using artificial sweeteners," Dr. Karl Beck, an Abbott marketing executive said.

A colleague, Joseph C. Lowey traced the "alarm" about safety principally to the sugar industry. "Cyclamate sweeteners are safe," he said.

But by an apparent, sheer coincidence, a phone call came to company's offices in North Chicago on the very morning of the seminar that completely undermined the assurances being given at Hyatt House.

According to Dr. Jesse L. Steinfeld, HEW's Deputy Assistant Secretary for Health and Scientific Affairs, the phone call was made by Food and Drug Research Laboratories in Long Island, N.Y.
